5624 1889-O MS65+ PCGS. The PCGS Plus designation is of great significance to the grade of this brilliant-smooth and lustrous Gem dollar. While more than 200 pieces have achieved the MS65 level, relatively few can claim the Plus identifier of high-end quality. This example is particularly well-struck for the O-Mint issue — untuned, with cartwheel silver luster throughout. Population: 12 in 65+, 10 finer (7/15). NGC ID# 255A, PCGS# 7192

5625 1889-O Clashed E, VAM-1A, MS61 PCGS Secure. A Top 100 Variety. According to the VAMWorld.com website, the VAM-1A has been renamed the VAM-1A2 variety, which is still valid. This piece shows many of the clash marks that characterize the VAM-1A2, most clearly the bold L clash beneath the eagle's tail, although that beneath Liberty's neck and right of the corn leaf on the obverse is also perceptible. This piece is untuned save for a golden tinge at the extreme rim and shows excellent preservation, seemingly on the cusp of an even finer grade. PCGS# 133930 Base PCGS# 7192

5626 1889-S MS65 NGC. This richly toned Gem exhibits attractively blended lilac and gold toning over frosty silver luster. A highly appealing example that is elusive in finer grades. NGC ID# 255B, PCGS# 7194

**1889-S Dollar, Radiant MS66
Underappreciated Low-Mintage Issue**

5627 1889-S MS66 PCGS. The handful of issues in the Morgan series with six-figure mintages tend to be highly coveted, but the 1889-S (only 700,000 coins struck) is generally overlooked in favor of its famous Carson City counterpart. Examples are very scarce in Premium Gem condition, and there is only a single submission finer between the two leading certification services. Uninhibited brilliance characterizes each side. Radiant luster, excellent preservation, and sharply struck devices complete the appeal. Population: 81 in 66 (6 in 66+), 1 finer (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255B, PCGS# 7194

5628 1890 MS65 PCGS. The supply of Gem 1890 dollars is enough to satisfy most Morgan dollar specialists, but finer coins are within the reach of only the most well-resourced collectors. This brilliant example is strongly defined with trivial grazes. A dark fleck occurs above (DO)L(LAR). PCGS shows just four finer submissions (7/15). NGC ID# 255C, PCGS# 7196

5629 1890 MS65 PCGS. Ex: NFL Set. Lustrous with light olive-gold toning and exemplary surfaces. The centers are incompletely brought up. The 1890 is a high mintage issue plentiful in scuffy Mint State grades, but surprisingly scarce as a Gem.
Ex: Gregg Bingham NFL Collection (Heritage, 1/2001), lot 7953, which realized \$2,760. NGC ID# 255C, PCGS# 7196

5630 1890 MS65 PCGS. CAC. The design elements of this attractive Gem are sharply detailed with light doubling showing on many devices on the reverse. The surfaces radiate vibrant mint luster and no mentionable distractions are evident. PCGS has certified four numerically finer examples (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255C, PCGS# 7196

5631 1890 MS65 Prooflike PCGS. Looking-glass fields provide a mirrored backdrop to frosty devices on this untuned Gem, showing great contrast and only a couple of mentionable marks, one on Liberty's neck and one on the lower eagle breast. Seldom seen with the Prooflike designation. Population: 16 in 65 Prooflike, 1 finer (7/15). NGC ID# 255C, PCGS# 7197

5632 1890 MS64 Deep Mirror Prooflike NGC. The mirrored fields of this near-Gem accentuate the well-defined motifs. Silver-gray surfaces reveal just a few minute marks that preclude Gem classification. Nevertheless, this piece exhibits pleasing overall eye appeal. The 1890 is challenging in this grade and very rare any finer. NGC ID# 255C, PCGS# 97197

**1890-CC Dollar, MS65
Better Carson City Issue**

5633 1890-CC MS65 PCGS. VAM-7. The mintmark is lightly repunched, noticeable along the inside curve of the first C. Faint honey-gold and ice-blue toning visits the obverse, while the reverse is essentially brilliant. Lustrous and nicely struck with a nearly pristine reverse. Delicate parallel roller marks on the lower cheek are as issued.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255D, PCGS# 7198

5634 1890-CC MS64 Prooflike PCGS. An attractive Choice Morgan dollar from the famous Carson City Mint, with well-detailed frosty design elements and mirrored prooflike reflectivity in the fields. Only minor signs of contact are evident. PCGS has graded 15 numerically finer examples (6/15). NGC ID# 255D, PCGS# 7199

**1890-CC Morgan Dollar, MS63
VAM-4, 'Tail Bar' Variety**

5635 1890-CC Tail Bar, VAM-4, MS63 PCGS. A Top 100 Variety. The "Tail Bar" VAM variety gets its moniker from a thick, heavy die gouge that connects the eagle's tailfeathers to the wreath left of the bow. This variety is quite popular as the die flaw is plain to the naked eye. The current coin is vibrantly lustrous and brilliant, with grade-consistent abrasions primarily restricted to Liberty's cheek. A trifle lightly struck, showing faint remnants of parallel roller marks in the center on each side. PCGS# 133934 Base PCGS# 87198

**1890-CC 'Tail Bar' Dollar, MS64
Well Known Carson City Variety**

- 5636 1890-CC Tail Bar, VAM-4, MS64 PCGS.** A Top 100 Variety. The straight die gouge beneath the fletchings can be identified at arm's length with the unaided eye, and makes the "Tail Bar" VAM the most easily attributed of the Morgan dollar series. The "Tail Bar" comprises approximately 10% of all Uncirculated 1890-CC dollars, a better Carson City issue. This lustrous and essentially brilliant near-Gem has a good strike and a clean obverse. Nearly unobtainable any finer.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
PCGS# 133934 Base PCGS# 87198

- 5637 1890-O MS65 PCGS.** A vibrant, wholly original example, typically softly struck in the centers and virtually untuned, with very few marks on either side. This issue is surprisingly scarce at the Gem grade level, considering how many thousands of coins are known at MS63 and MS64. NGC ID# 255E, PCGS# 7200

**1890-O Dollar, MS65+
Lightly Repunched Date**

- 5638 1890-O MS65+ PCGS. VAM-31.** The top of the 9 is repunched. Light honey-gold patina adorns this lustrous and clean-cheeked Gem. The eagle's breast and the hair above the ear display unimportant incompleteness. Minor grazes near AMERICA determine the grade. Despite a generous mintage, the 1890-O is a challenging issue to locate any finer.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255E, PCGS# 7200

- 5639 1890-S MS66 PCGS.** A lovely Premium Gem with frosty silver luster, this brilliant and untuned Morgan dollar has an exceptional strike and outstanding eye appeal. PCGS has only certified seven finer examples (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255F, PCGS# 7202

- 5640 1890-S MS66 PCGS.** The brilliant centers of this delightful Premium Gem yield to rings of greenish-gold at the rims. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. PCGS has graded seven numerically finer examples (7/15). NGC ID# 255F, PCGS# 7202

**1891 Dollar, Frosty Gem
Just Three Coins Finer at PCGS**

- 5641 1891 MS65 PCGS.** Unlike so many other Morgan dollar issues, the 1891 actually circulated extensively. Mint State examples are still plentiful through MS64, while comparable Gems are conditionally scarce. PCGS and NGC have only seen three finer representatives apiece (7/15). This coin is frosty and brilliant with well-detailed motifs. Faint blushes of rose at the upper right reverse are the only indications of color. Light chatter in the field above the eagle and a couple of small marks on Liberty's portrait preclude an even higher grade.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255G, PCGS# 7204

**1891 Silver Dollar
Lustrous, Frost-White Gem**

- 5642 1891 MS65 PCGS.** A deeply lustrous and visually impressive dollar with spectacular eye appeal — not often in evidence for this P-Mint issue, as confirmed by just six pieces graded numerically finer by the two services combined (6/15). Slight blending of the hair strands above the ear is unavoidable for the issue. Only a tiny scattering of insignificant marks is seen, suggesting this frosty Gem is close to an even finer grade. NGC ID# 255G, PCGS# 7204

- 5643 1891-CC MS64 PCGS.** A well struck near-Gem that has original, somewhat frosty luster. Pale blue toning appears at the reverse periphery, as does a small spot of dark gray between the AT of STATES, but the rest of the piece is virtually untuned. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, Brilliant MS65

5644 1891-CC MS65 PCGS. A shining Gem with delightful frosty whispers across the well-defined high points. Faint hints of milky toning in the fields do nothing to dampen the coin's silver-white essence. A few small reeding marks isolated in the fields contribute to the grade. Rare any finer, with only 31 such pieces graded by PCGS (6/15).

Ex: *Summer FUN Signature (Heritage, 7/2009)*, lot 944.
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 255H, PCGS# 7206

**1891-CC Silver Dollar, MS65
Doubled Die Reverse, VAM-6**

5645 1891-CC MS65 PCGS. VAM-6. Portions of AMERICA are lightly die doubled. An underrated variety; much scarcer than the well known "Spitting Eagle" VAM-3. The present lustrous Gem has a good strike and only a wisp of almond-gold toning. The fields are smooth, while Liberty's cheek and neck display minor contact.

Ex: *Rosemont Central States Signature (Heritage, 4/2011)*, lot 5767, which realized \$4,025. NGC ID# 255H, PCGS# 7206

5646 1891-CC Spitting Eagle, VAM-3, MS64 NGC. A Top 100 Variety. A wisp of golden toning graces this lustrous and boldly struck Choice Carson City dollar. Perhaps half of all Uncirculated '91-CC dollars are VAM-3, with a die lump beneath the beak, but the variety nonetheless remains popular. PCGS# 133937 Base PCGS# 7206

**1891-CC Dollar, MS65
Rarely Seen Finer**

5647 1891-CC Spitting Eagle, VAM-3, MS65 PCGS. A Top 100 Variety. Although the 1891-CC is scarcer than the Carson City dollars struck between 1881 and 1885, this late-date issue can be located with little searching through Gem condition, above which point examples are decided rarities. This brilliant, sharply struck representative has a few light grazes on the cheek that limit the grade, but the fields are minimally marked. PCGS counts just 31 coins finer (7/15). PCGS# 133937 Base PCGS# 7206

**1891-O Morgan Dollar, MS65
Unknown in Premium Gem Grade**

5648 1891-O MS65 PCGS. The satiny, untuned, silver-white surfaces of the Gem 1891-O Morgan dollar offer excellent preservation and top-notch eye appeal. Liberty's cheek is free of all but the most insignificant tiny ticks, although a couple of small abrasions show on the eagle's breast. Although PCGS has graded four examples of the 1891-O in MS65+, it has yet to ever certify an MS66 of the issue (6/15).

From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 255J, PCGS# 7208

**1891-O Silver Dollar, MS65
Exceptional Preservation**

5649 1891-O MS65 PCGS. A high mintage issue available in Uncirculated grades, but rarely in the present quality. This essentially brilliant Gem offers dynamic luster and exceptionally smooth surfaces. The strike is good by New Orleans standards, although the centers show minor blending. Encapsulated in an old green label holder, and virtually unobtainable any finer. NGC ID# 255J, PCGS# 7208

5650 1891-O MS63 Prooflike PCGS. A frosty and reflective black and white coin, this CC dollar is well-struck and essentially untuned. Minor scuffs in the obverse fields prevent an even higher grade. This issue is rarely seen in Prooflike condition. Population: 21 in 63 Prooflike, 11 finer (7/15).

Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 5945. NGC ID# 255J, PCGS# 7209

**1891-S Morgan Dollar, Frosty MS66
Untoned and Well-Preserved**

- 5651 1891-S MS66 PCGS.** This brilliant Premium Gem boasts generous, frosty luster throughout both sides amid excellent preservation and a bold strike for the issue. Liberty's cheek and the eagle's breast are free of major marks. This better-date issue is available for a price up to MS66, but PCGS reports only eight in higher grades (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 255K, PCGS# 7210

**1891-S Silver Dollar, MS66
Outstanding Preservation**

- 5652 1891-S MS66 PCGS.** The 1891-S Morgan dollar is an available issue through MS64, but the certified population thins considerably at the Gem level and finer pieces are genuinely scarce. This Premium Gem is among the finest examples that most budget-conscious collectors will be able to acquire. The strike is bold and both sides exhibit attractive lavender-gold toning, with deeper burgundy overtones appearing periodically around the peripheries. Liberty's cheek is pristine, and were it not for a few trivial grazes in the left obverse field, this 1891-S might have garnered an even higher grade. Population: 85 in 66 (7 in 66+), 8 finer (7/15). NGC ID# 255K, PCGS# 7210
- 5653 1892 MS64 PCGS. CAC.** A mostly brilliant Choice Mint State piece, this example shows splashes of gold and iridescent toning on each side. The strike is typically weak over Liberty's ear. NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, Frosty MS65

- 5654 1892 MS65 PCGS.** Frosty, untoned silver-white surfaces display generous luster and notable absence of mentionable abrasions on this nicely preserved Gem 1892 Morgan, which also boasts a nice, sharp strike for the date. Liberty's cheek is free of distractions, as is the eagle's breast. The few marks occur mostly in the fields on the reverse. PCGS reports only five finer in MS66 (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 255L, PCGS# 7212

**1892 VAM-3 Dollar, MS65
Die Doubled Reverse**

- 5655 1892 MS65 PCGS. VAM-3.** Mintages of silver dollars at Philadelphia declined annually between 1889 and 1895, partly due to Grover Cleveland's opposition to Free Silver. The 1892 has a fairly low production of 1,036,000 pieces, and becomes elusive at the MS65 level. This lustrous and brilliant Gem has a pristine reverse and only minor contact on the obverse. The reverse is lightly die doubled, most apparent on the upper legends. Certified in an old green label holder. NGC ID# 255L, PCGS# 7212

**1892 Silver Dollar, MS66
Prohibitively Rare Finer**

- 5656 1892 MS65 PCGS.** The availability of the 1892 Morgan dollar declines significantly between MS64 and MS65, and Premium Gems are extremely rare. This Gem representative is boldly struck, with vibrant, frosty luster that shows just a touch of golden toning around the periphery. A single, linear graze on Liberty's cheek and a faint reed mark on the upper lip are the only grade-limiting faults. PCGS lists only five MS66 coins finer (7/15). NGC ID# 255L, PCGS# 7212
- 5657 1892-CC MS61 PCGS. CAC. VAM-4B.** This interesting VAM features a repunched mintmark and at least three sets of clash marks. A lustrous and lightly toned better date Carson City dollar. The centers are typically struck and the left obverse displays marks commensurate with the grade. NGC ID# 255M, PCGS# 7214
- 5658 1892-CC MS61 PCGS. CAC.** Numerous wispy die cracks occupy the peripheries on each side of this lustrous, untuned Mint State dollar. A few larger marks on the cheek and chin of Liberty account for the grade, but this is a coin with excellent eye appeal nonetheless. *From The College Collection, Part Two.* NGC ID# 255M, PCGS# 7214
- 5659 1892-CC MS62 PCGS.** An occasional wisp of reddish-gold adheres to the margins of this well-struck CC Morgan. Some luster disruptions are noted, especially on Liberty's cheek that is heavily abraded. NGC ID# 255M, PCGS# 7214
- 5660 1892-CC MS62 PCGS.** Nearly 3 million Carson City dollars were distributed through the GSA sales, but the 1892-CC was not part of that distribution, with just one recorded example. This fully brilliant Carson City dollar exhibits frosty mint luster and no evidence of toning on either side. NGC ID# 255M, PCGS# 7214

- 5661 1892-CC MS63 NGC.** Concentric patina decorates the obverse of this Select 1892-CC dollar in rings of gold, copper, magenta, and aqua contrasting against an untoned silver center. The reverse shows a peripheral ring of light copper-gold, and on its own might garner a Prooflike designation, although the obverse contrast is not quite sufficient. Nonetheless a beautiful coin, and relatively unabraded for the grade. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
Above Average Strike**

- 5662 1892-CC MS64 NGC. VAM-8A.** Missing from the GSA sales except for one lonely coin, this late-date Carson City issue is considerably more challenging than the high-release dates from the early-to-mid-1880s. A faint hint of fawn-gold toning sneaks into the margins of this semiprooflike example, but for all practical purposes the coin is untoned and brilliant with sharp silver luster. A near-full strike adds to the appeal. Marks are scattered about, but they are minor in the context of the rough handling most CC dollars received. For VAM enthusiasts, the coin shows a filled 2 and faintly clashed N. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
Semiprooflike**

- 5663 1892-CC MS64 PCGS.** The bold strike and brilliant silver luster create exceptional eye appeal for the grade of this Choice Mint State Carson City dollar. Both sides are untoned with reflective fields and frosty devices that combine to present light cameo contrast. Trivial grade-limiting marks are the only distraction. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64+
High-End Example**

- 5664 1892-CC MS64+ PCGS.** Always in demand, this Carson City issue often displays high-quality, attractive surfaces and a bold strike. This borderline Gem coin is a sharp example, with nice frosted detail on the motifs and clear, unabraded fields. A couple of small marks above the eagle's head do not detract significantly from the appeal. A glint of champagne-gold toning appears overall. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
Scarcer CC Issue**

- 5665 1892-CC MS64 PCGS. CAC.** Choice condition is about the highest grade for which the 1892-CC can be considered collectible. Finer examples are considerably scarcer than the demand for them. Dappled red-violet, fiery-orange, and ice-blue patina clings to the recesses of this eye-catching near-Gem, while the exposed regions maintain their brilliance. The motifs are well-struck with strong detail on the hair over Liberty's ear.
From The College Collection, Part Two. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64
Beautiful Orange and Red-Violet Patina**

- 5666 1892-CC MS64 PCGS. CAC.** Quantities of 1892-CC dollars were dispersed in the late 19th century, and then intermittently from the mid-1920s through the 1950s. By the early 1960s only a single example remained in Treasury vaults. Nevertheless, examples are accessible through Choice condition, making this a perfect Carson City type coin. Golden-orange and red-violet elements coalesce around the edges, ceding to mostly brilliant centers. Glowing luster issues from surfaces that show strike softness at the extreme centers, and lightly peppered abrasions throughout.
From The College Collection, Part Two. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar
Close to Full Gem Quality**

- 5667 1892-CC MS64+ PCGS. CAC.** A brilliant and frost-white coin, with blazing mint luster. A hint of pale gold at ONE on the reverse is the only semblance of toning, but it is barely noticed. This Carson City issue, like all of the CC-Mint dollars, was subjected to rough handling and transport, but the present coin escaped relatively unscathed. The few small bagmarks are grade-appropriate and of minimal concern. The coin is sharply struck save for minor blending at the ear and talons. CAC endorsed. NGC ID# 255M, PCGS# 7214

5668 1892-O MS64+ NGC. A few marks near Liberty's mouth and on her neck likely prevent a Gem grade on this O-mint dollar, nonetheless quite an attractive coin, showing surfaces that are untuned save for a thin accent of gold and copper at the margins. NGC ID# 255N, PCGS# 7216

5669 1892-O MS64 PCGS. CAC. A virtually brilliant and highly lustrous near-Gem of this conditionally rare New Orleans issue. The fields are smooth and the cheek shows only minor grazes. Customary for the '92-O, the centers are lightly brought up. Encapsulated in an old green label holder.
From The College Collection, Part Two. NGC ID# 255N, PCGS# 7216

**1892-O Dollar, MS65
Multicolor Patina, Smooth Surfaces**

5670 1892-O MS65 PCGS. VAM-2. The 2 in the date is repunched north. Navy-blue and autumn-gold dominate the obverse, while the reverse displays iridescent peach, lemon, and aquamarine shades. Lustrous and essentially unabraded. The centers show the incompleteness of strike characteristic of the '92-O. Much nicer than usually encountered for the issue.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255N, PCGS# 7216

5671 1892-S AU50 PCGS. Cream-gray surfaces show few marks and good eye appeal on this lightly circulated semikey S-mint dollar. The minor wear shows more as thinned luster in the fields, although light high-point rub appears. A faint golden accent also shows on each side. Nice for the grade. NGC ID# 255P, PCGS# 7218

5672 1892-S AU50 NGC. Dove-gray fields contrast against charcoal-gray device outlines on this appealing and still-lustrous 1892-S dollar. The light high-point wear is as expected, but abrasions are minimal throughout. NGC ID# 255P, PCGS# 7218

5673 1892-S AU53 NGC. The lightly abraded surfaces of this pleasing AU53 example retain much of their original mint luster, and just a touch of high-point wear shows on the well-detailed design elements. From a smallish mintage of 1.2 million pieces. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55
Remarkably Clean Surfaces**

5674 1892-S AU55 PCGS. A lightly worn example that retains most of its original luster. Nicely struck with silver-gray surfaces toned pale red in patches on the reverse. The only mentionable mark is located above the head of the eagle. An attractive and affordable example of this surprisingly difficult semikey date.
Ex: Denver Signature (Heritage, 8/2006), lot 3069. NGC ID# 255P, PCGS# 7218

1892-S Silver Dollar, Lustrous AU55

5675 1892-S AU55 PCGS. After the key-date 1893-S, the 1892-S Morgan is the most challenging issue in the series to acquire in Mint State. This Choice AU representative offers the budget-conscious collector with a well-detailed, still-lustrous alternative to a costly Uncirculated piece. The surfaces are smooth and both sides show a light blush of golden toning. NGC ID# 255P, PCGS# 7218

**1892-S Dollar, Vividly Toned AU58
Lustrous and Semiprooflike**

5676 1892-S AU58 NGC. This magnificent near-Mint 1892-S Morgan has a distinct shot at being the single most attractive AU example known. The fields are semiprooflike and the sharp devices are almost devoid of perceptible friction. Vivid splashes of amber, violet, gold, and olive toning blanket each side, while the underlying surfaces are devoid of distracting abrasions. The 1892-S is one of the rarest dates in the series in Mint State, making this Borderline Uncirculated coin all the more impressive. NGC lists 48 Mint State coins finer, including resubmissions (6/15). NGC ID# 255P, PCGS# 7218

**1892-S Silver Dollar, AU58
Conditionally Challenging**

5677 1892-S AU58 PCGS. The 1892-S is only a semikey date in the context of the Morgan dollar series, but in Mint State it is nearly as rare as the 1893-S. However, what separates these two issues is the number of coins extant in AU grades. The '93-S poses a problem for collectors all the way down to the XF range, but the 1892-S becomes moderately available as quickly as AU55. Thus, near-Mint examples of the '92-S, while scarce, are collectible by average enthusiasts, which heightens demand. This piece appears Uncirculated at first glance, but a loupe reveals traces of friction over the high points of the devices. Luster remains in the fields and there is a hint of light golden toning overall. A few marks on Liberty's cheek are not unusual for the grade. PCGS lists only 60 Uncirculated examples finer, including possible resubmissions (7/15). NGC ID# 255P, PCGS# 7218

- 5678 1892-S Doubled Date, VAM-2, AU53 NGC.** A Top 100 Variety. The date is repunched, most apparent on the 8. The variety is undesignated on the NGC insert. But any AU53 1892-S dollar is desirable, since the relatively low mintage issue is typically encountered in Fine to VF grades, and becomes a formidable condition rarity in Mint State. The present partly lustrous piece is lightly abraded and displays medium gunmetal and chestnut toning. PCGS# 133941 Base PCGS# 7218

**1893 Silver Dollar, MS65
Attractive Album Toning**

- 5679 1893 MS65 PCGS. VAM-2.** The 3 in the date is repunched. Liberty's chin is lightly die doubled. Lovely orange-red and navy-blue toning the borders of this sharply struck and thoroughly lustrous Gem. The 1893 is a much better date due to its low mintage, and is nearly unobtainable above the MS65 level. Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1560. From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255R, PCGS# 7220

- 5680 1893-CC XF45 PCGS.** Light silver-gray surfaces peak through the golden-brown and iridescent toning on this Choice XF Morgan dollar. This issue is usually found in Mint State grades, or in well-circulated grades, but rarely between those extremes. PCGS has certified more than 2,100 examples below XF40, and more than 4600 pieces in AU or finer grades, but just 371 pieces in XF grades (7/15). NGC ID# 255S, PCGS# 7222

- 5681 1893-CC AU55 NGC.** The silver-gray surfaces of this Choice AU Carson City issue display luster in the recessed areas. The design features are well-defined, including some detail in the hair over Liberty's ear. Scattered marks are in line with a large silver coin that has seen brief circulation. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS62
Final Carson City Morgan**

- 5682 1893-CC MS62 PCGS.** An attractive MS62 example of the final Morgan dollar issue from the Carson City Mint. This piece offers sharply detailed design elements and brightly lustrous surfaces with a few hints of golden-tan toning and some scattered minor contact marks. Eye appeal is quite strong for the grade and this date is always in demand. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS63
Eye-Catching Luster**

- 5683 1893-CC MS63 PCGS.** The popular final-year Carson City issue, and a slightly better date in high grade. This Select example shows vibrant, frosty luster with tinges of gold around the peripheries. A few light abrasions limit the grade, and the central devices show the usual striking deficiency. Housed in a green label holder. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63
Sharp, Vibrant Appeal**

- 5684 1893-CC MS63 PCGS. CAC.** Slight areas of russet toning are confined to the rims and margins of this brilliantly lustrous Carson City dollar. Bagmarks are always the challenge for the final-year issue, and the present Select Uncirculated example has its share, but the cheek is relatively smooth and the strike and luster are significantly above average. Great eye appeal for the grade. NGC ID# 255S, PCGS# 7222

- 5685 1893-O AU58 NGC.** Whispers of russet patina make occasional visits to the borders of this near-Mint Morgan, somewhat more so on the reverse. Traces of luster reside in the recesses of the well-struck design elements. The few scattered marks are in concert with a large silver coin that has seen brief circulation. NGC ID# 255T, PCGS# 7224

- 5686 1893-O AU58 NGC.** Greatly overshadowed by its San Francisco and Carson City brethren, the 1893-O is still a better date in the series with a paltry mintage of just 300,000 coins. This borderline-Uncirculated dollar is all-brilliant with lustrous surfaces and minimal signs of handling. Minor clash marks appear on each side. NGC ID# 255T, PCGS# 7224

- 5687 1893-O AU58 PCGS. CAC.** Nearly full luster is evident beneath light gold toning over natural silver-gray surfaces. A few scuffs are noted in the fields of this highly attractive example. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS61
Better New Orleans Issue**

- 5688 1893-O MS61 NGC.** The 1893-O, with a mintage of 300,000 coins, is a better date in all grades, particularly in Mint State. This piece is untoned, with pleasantly few major abrasions, considering the grade. The fields show characteristically satiny luster with a hint of semiprooflike mirroring when tilted beneath a light. The New Orleans specialty — minor striking softness — appears on the central high points. NGC ID# 255T, PCGS# 7224

**1893-O Morgan Dollar, MS63
Elusive New Orleans Issue**

- 5689 1893-O MS63 PCGS.** A recognized semikey in the series, boasting a limited 300,000-coin mintage. Many 1893-O Morgans were distributed into circulation, and those coins released from the Treasury in later decades typically come heavily abraded. This Select example is free of any major surface flaws, with satiny luster and just a few wisps of light golden toning. As expected for the issue, slight striking softness is seen on the eagle's breast and the hair above Liberty's ear.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255T, PCGS# 7224

**1893-O Dollar, MS63
Popular Semikey Issue**

- 5690 1893-O MS63 NGC.** All 300,000 Morgan dollars struck at New Orleans in 1893 were manufactured in January, and the issue's survivorship in circulated grades suggests many pieces were distributed to the public soon after production. Mid-20th century releases yielded stray coins and small groups, but no large hoards. This Select example is untoned aside from light russet color around the rims. Central strike detail is typical for the facility, and the luster is softly frosted. A lightly marked example that would prove exceedingly difficult to improve upon. NGC has only seen 35 coins finer (7/15). NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS63
Semiprooflike, Border Toned**

- 5691 1893-O MS63 PCGS. CAC.** A thin band of rustic-red toning encircles both sides of this otherwise silver-white Select dollar. Always challenging to find with any measure of eye appeal, this semiprooflike New Orleans example earned high marks from CAC for its pleasing surfaces and above-average strike. Liberty's cheek is clean, and most of the bagmarks are slight and unobtrusive. The visual impression suggests an even higher grade. NGC ID# 255T, PCGS# 7224

- 5692 1893-S Good 6 PCGS.** All major design elements remain complete in outline and some interior design detail remains intact, all lettering is legible, but the rim is worn flat in places on the obverse. The dove-gray surfaces of this important series key are problem-free and no large abrasions are noted, aside from a rim bruise at 10 o'clock on the obverse. NGC ID# 255U, PCGS# 7226

- 5693 1893-S Good 6 NGC.** An excellent opportunity for collectors to afford this otherwise hard-to-obtain issue. Deep gray surfaces show the extensive wear associated with the grade, but the rims are intact and marks are not excessive for the amount of time this piece must have spent in circulation. NGC ID# 255U, PCGS# 7226

- 5694 1893-S — Damaged, Cleaned — NGC Details. VG.** Light battleship-gray surfaces offer glimpses of golden patina throughout this well-worn key date representative. The legends, including the date and mintmark remain clear. The noted damage occurs at the tip of Liberty's cap, but it does not overly detract. A perfect example for the budget-minded collector. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, VG10
Collector-Grade Example**

- 5695 1893-S VG10 NGC.** Well-circulated, as are most surviving examples of this key San Francisco issue, but therein well-suited for the budget-conscious collector. The surfaces are smooth, with even wear and consistent tan-gray patina. A few deeper gray overtones appear on the lower-left obverse. NGC ID# 255U, PCGS# 7226

- 5696 1893-S — Repaired — PCGS Genuine. Fine Details.** This cream-gray and straw-gold key date Morgan dollar displays ample plumage detail. The cheek has been smoothed, and both sides are thoroughly hairlined. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Collectible Fine 15

5697 1893-S Fine 15 NGC. A collector-grade example of the 1893-S Morgan, such as the present coin, never fails to have demand among budget-conscious collectors. This piece is well-circulated but retains a pleasing degree of detail for the grade. Both sides are consistently colored in dusky golden-gray patina. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF25 An Accessible Key Date Representative

5698 1893-S VF25 PCGS. This is a great key date example that actually served its intended role as a medium of exchange in West Coast commerce. Fortunately, a forward-thinking individual saved the coin from complete annihilation — an adverse fate met by about 90% of the 100,000-coin mintage. Battleship-gray surfaces with darker color in the protected areas exhibit an expected amount of wear over the devices. The hair retains partial detail, as do the wing feathers. Abrasions are peppered over each side. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Collectible VF30

5699 1893-S VF30 PCGS. A collector-grade example of this key San Francisco issue, slightly sharper than the typical VF representative. This piece shows medium golden-gray patina with occasional charcoal overtones attesting to the originality of the surfaces. The 1893-S boasts the lowest mintage in the Morgan dollar series at 100,000 coins, and most known survivors are in lower circulated grades. NGC ID# 255U, PCGS# 7226

1893-S Morgan, Choice VF

5700 1893-S VF35 NGC. This piece is well-circulated, but shows a little sharper detail than is typical for the issue which experienced extensive circulation in the 19th century. The coin shows medium golden-gray toning with hints of luster in the fields. Strong detail remains throughout, save for the eagle's breast and the hair above Liberty's ear, which bear the brunt of the wear. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF Details The Key Morgan Issue

5701 1893-S — Improperly Cleaned — NGC Details. XF. Some numismatists believe that the actual mintage of 1893-S Morgan dollars was even smaller than the reported figure of 100,000 coins. Regardless, the 1893-S is the key-date among circulation-strike Morgans and it enjoys great demand in all grades. This light silver-gray example was undoubtedly cleaned long ago, but not displays pleasing surfaces and good eye appeal. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF45 Details Hints of Tan Toning

5702 1893-S — Cleaned — ANACS. XF45 Details. The diagnostic die markers on the RT in LIBERTY are clear on the present key date dollar. Luster glimmers across the devices, and protected areas display wheat-gold toning. The predominantly stone-gray surface are subdued and minutely granular. Occasional minor marks are of little import. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Sharpness

- 5703 1893-S — Improperly Cleaned — NGC Details. AU.** A subdued steel-gray and golden-brown representative of the key business issue. Faintly hairlined but only lightly abraded. Wear is apparent on the eagle's breast, although most design elements are sharp. From the mintage of 100,000 pieces, survivors are insufficient to meet collector demand. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Details Well-Defined Cornerstone Example

- 5704 1893-S — Cleaning — PCGS Genuine. AU Details.** A bright key date representative, this untoned 1893-S features light friction over the devices and scattered marks over each side. Wispy hairlines from the noted cleaning do not overly detract. Most of the 100,000 coins struck in 1893 were employed in commercial transactions. There was little collector interest in mintmarked coins at the time, and only after Augustus Heaton published his landmark treatise (also in 1893) did collecting horizons expand to include the branch mints. *From The College Collection, Part Two.* NGC ID# 255U, PCGS# 7226

- 5705 1894 AU53 NGC.** The second-lowest mintage in the series (110,000 coins) ensures the 1894 as one of the most sought-after Morgan dollars in the set. Somewhat muted silver-gray surfaces show an expected number of marks from brief circulation, and moderate blending occurs over the hair and breast feathers. NGC ID# 255V, PCGS# 7228

- 5706 1894 AU53 NGC.** An attractive AU53 example of this low-mintage Morgan dollar, with just a touch of wear on the well-detailed design elements and lustrous, lightly abraded surfaces that show a few hints of pale gold and lavender toning. NGC ID# 255V, PCGS# 7228

- 5707 1894 AU58 PCGS.** Largely pale silver with just a hint of rub. The obverse has a few scattered abrasions, while a scrape on the reverse descends from the eagle's beak. An important example from an issue of just 110,000 business strikes. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, Remarkable MS64

- 5708 1894 MS64 PCGS.** A remarkable 1894 Morgan dollar, this near-Gem is fully brilliant and sharply defined with nearly full hair detail over the ear, and strong breast feathers on the reverse. The surfaces are exceptional for the grade with only a few mostly hidden abrasions. PCGS has only certified 27 examples in higher grades (6/15). *Ex: Carson Silver Collection / Los Angeles Signature (Heritage, 8/2009), lot 1996.*
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255V, PCGS# 7228

1894-O Dollar, Appealing MS64

- 5709 1894-O MS64 PCGS.** This better-date Morgan dollar shows a few luster grazes and ticks on Liberty's cheek and neck and in the left obverse field that determine the grade, amid much eye appeal and soft but thorough luster on both sides. The largely silver-white surfaces display a tinge of copper-gold near the rims. The moderate strike shows typical O-mint weakness on the hair over the ear. PCGS reports only 11 at the Gem level or finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 255W, PCGS# 7230

1894-O Silver Dollar, MS64 Vibrant Mint Bloom

- 5710 1894-O MS64 PCGS.** The 1894-O Morgan dollar is plagued by poor strikes and deficient luster, and extensive cherrypicking is needed to locate an attractive representative. This Choice example exhibits the usual weakness on the hair above Liberty's ear and the eagle's breast, but the surfaces display uncharacteristically vibrant, untuned mint luster so as to fully balance the visual appeal. As only 11 coins have been certified numerically finer at PCGS (6/15), this well-preserved piece represents an important opportunity for the advanced specialist. NGC ID# 255W, PCGS# 7230

**1894-O Morgan Dollar, MS64
Few Seen Finer**

5711 1894-O MS64 PCGS. An attractive Choice specimen of this challenging branch mint issue, with well-detailed design elements that show just a touch of softness on the hair above the ear. The well-preserved surfaces are lightly toned and vibrant mint luster radiates from both sides. PCGS has graded 11 numerically finer examples (7/15). NGC ID# 255W, PCGS# 7230

5712 1894-S MS62 PCGS. CAC. Copious cartwheel luster occupies both sides of this untoned better-date dollar. Scattered marks account for the grade, but the eye appeal is good. Light roller marks appear under a loupe throughout the obverse and in the lower portion of the reverse. A couple of small die-grease spots on the obverse are undistracting.
From The College Collection, Part Two. NGC ID# 255X, PCGS# 7232

5713 1894-S MS63 NGC. The lustrous silver-gray surfaces of this Select S-mint Morgan exhibit well-struck design features, including a modicum of detail in the hair above Liberty's ear. Scattered contact marks limit the grade. Die polish lines, a typical feature of this issue (Bowers, 2007), are visible in the obverse field. The 1894-S is available in MS63 and MS64 grades, but finer examples are difficult to locate. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS64+
Radiant Mint Luster**

5714 1894-S MS64+ PCGS. CAC. The well-preserved surfaces of this impressive Morgan dollar are mostly brilliant, with some delicate highlights of pale gold toning. Vibrant mint luster is evident on both sides and the design elements exhibit razor-sharp definition throughout. Eye appeal is outstanding. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, Untoned MS65
Lavish Cartwheel Luster**

5715 1894-S MS65 PCGS. Lavish cartwheel luster rides the surfaces on both sides of this untoned silver-white Gem 1894-S Morgan dollar. Liberty's cheek in particular, and the devices elsewhere in general, are well-preserved and free of post-Mint distractions, although some light roller marks, as made, appear on the cheek. This issue is much more elusive in MS66 and finer grades, where PCGS reports only 15 submissions (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS65
Outstanding Visual Appeal**

5716 1894-S MS65 PCGS. CAC. Speaking of the 1894-S Morgan dollar, Q. David Bowers opines "MS-65 coins are difficult to find." The present Gem specimen displays brilliant fields and dazzling mint luster. The coin offered here is certified in an old green-label holder and is almost fully struck; the eye appeal is outstanding. A few shallow roller marks above the ear and on the cheek can be detected with a glass. PCGS lists only 15 numerically finer representatives (6/15).
Ex: FUN Signature (Heritage, 1/2010), lot 3030. NGC ID# 255X, PCGS# 7232

5717 1895-O AU55 PCGS. Broad luster remains in the pale silver-gray fields. Minor wear is noted on the high points and to the left of the eagle. Scattered minor marks contribute to the grade of this semikey coin. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, Lustrous AU58

5718 1895-O AU58 NGC. The scarcity of the 1895-O Morgan in Mint State heightens demand for better AU representatives, such as this Borderline Uncirculated piece. The strike is bold and only trivial friction is evident over the high points of the design. Light golden toning accentuates the luster that illuminates the fields. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58
Semiprooflike Fields**

- 5719 1895-O AU58 PCGS.** The 1895-O is a scarce semikey date in Mint State, out of reach for many budget-conscious collectors. This Borderline Uncirculated example offers excellent detail at a more affordable grade level, with noticeably semiprooflike fields. Both sides show golden-gray toning and have few detracting abrasions. Without a doubt, this is one of the finer AU examples we have handled. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58
Semiprooflike Slider**

- 5720 1895-O AU58 PCGS. CAC.** Years ago, this near-Mint dollar would most likely be a strong candidate for Mint State holder, and that still may be the case. The brilliant luster and semiprooflike fields are terrific for the grade, and the strike is extra-sharp for the New Orleans issue. Abrasions on and near the chin and a scuff around star 8 are the most likely deterrents to a confirmed Uncirculated designation. CAC endorsed for quality. NGC ID# 255Y, PCGS# 7236
- 5721 1895-S AU50 PCGS.** Speckles of brownish-gray patina gravitate to the borders of this AU Morgan. Traces of luster are visible in the recessed areas. A few minute marks are in line with the grade designation, however, these are less severe than typically seen on this issue that has been heavily bagmarked, even in Uncirculated grades. NGC ID# 255Z, PCGS# 7238
- 5722 1895-S AU55 PCGS.** A Choice AU example of this low-mintage Morgan dollar issue, with just a trace of high-point wear and lightly abraded surfaces that retain much of their original mint luster. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan, AU58
Lustrous Fields**

- 5723 1895-S AU58 NGC.** Dusky champagne-gray toning graces the still-lustrous surfaces of this near-Mint 1895-S Morgan dollar. The design elements are boldly rendered and show friction only on the high points of the eagle's breast and the hair above Liberty's ear. A few scattered abrasions are as expected for the grade. NGC ID# 255Z, PCGS# 7238

- 5724 1895-S — Reverse Repaired — NGC Details. Unc.** A portion of the eagle's right (facing) wing is smoothed, and the nearby field is hairlined. The lustrous obverse is problem-free. The reverse has a broad diagonal area of brilliance, while the remainder of that side is richly toned sea-green and rose-red. NGC ID# 255Z, PCGS# 7238

**1895-S Silver Dollar, MS63
Better Date in Mint State**

- 5725 1895-S MS63 PCGS.** Mint State examples of this better San Francisco issue are infrequently seen finer than the currently offered MS63 coin. Well-struck design elements are accentuated by semiprooflike fields and a lack of all toning save for a hint of champagne color. A few light, scattered abrasions limit the grade. NGC ID# 255Z, PCGS# 7238

**1895-S Silver Dollar, MS64
Only 400,000 Minted**

- 5726 1895-S MS64 PCGS.** In Mint State grades, the 1895-S is the only reasonably obtainable Morgan dollar of the year. This example is a splendid Choice Mint State dollar with brilliant silver surfaces. Light field reflectivity surrounds the lustrous devices. The obverse is untoned and the reverse exhibits delicate champagne hues. NGC ID# 255Z, PCGS# 7238

5727 1895-S/S VAM-3 AU50 NGC. A Hot 50 Variety. Although undesignated on the NGC insert, this is the variety with the mintmark initially entered widely left and tilted, then corrected. A curve from the first mintmark impression remains visible, northwest of the primary mintmark. A lightly toned example with ample border luster and moderate field marks beneath the eagle's wings. PCGS# 134020 Base PCGS# 7238

5728 1896 MS67 NGC. Iridescent rainbow toning on the obverse and a brilliant reverse likely result from years spent in an old Whitman folder. The impeccably preserved surfaces are free of marks, further suggesting this Superb Gem was set aside following the releases of the mid-20th century. Census: 70 in 67 (7 in 67 ★, 1 in 67+★), 4 finer (7/15). NGC ID# 2562, PCGS# 7240

5729 1896 MS67 PCGS. The 1896 Morgan, claiming a mintage approaching 10 million pieces, is plentiful in mint condition. Superb Gems such as the present offering are very scarce, however, and finer specimens are extremely rare. Luster radiates from both sides, each of which is untuned and well-struck. Impeccably preserved surfaces further enhance the coin's pleasing eye appeal. PCGS has graded just two examples finer (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2562, PCGS# 7240

5730 1896 MS67 PCGS. This coin is a bright, mostly brilliant, and sharply struck Superb Gem Morgan dollar. Whispers of gold color concentrate at the borders. A superficial abrasion is noted just above Liberty's eye, but the overall quality of the coin is exceptional. PCGS has certified only two numerically finer examples (6/15). NGC ID# 2562, PCGS# 7240

5731 1896 MS67 PCGS. Radiant luster issues from the silver-white, impeccably preserved surfaces of this Superb Gem Morgan. Sharp definition is apparent on the design elements, including strong detail in the hair above Liberty's ear. These attributes add up to outstanding eye appeal. PCGS has graded just two submissions finer (7/15). NGC ID# 2562, PCGS# 7240

1896 Dollar, MS66 Deep Mirror Prooflike White-on-Black Cameo Contrast

5732 1896 MS66 Deep Mirror Prooflike PCGS. This remarkable Premium Gem is so deeply mirrored in the fields that at first glance it could be mistaken for a proof. The devices are sharp and starkly contrasted against the mirrors, and the surfaces are devoid of toning. The 1896 is a plentiful Philadelphia issue in the absolute sense, but Deep Mirror Prooflike examples are rarely encountered this well-preserved. Population: 18 in 66 Deep Mirror Prooflike, 1 finer (7/15). NGC ID# 2562, PCGS# 97241

5733 1896-O MS61 NGC. A veneer of soft russet patination covers portions of this O-mint Morgan dollar. The design elements are relatively well-struck, including some detail in the hair over Liberty's ear. Small marks and scuffs on Liberty's cheek and neck help to determine the grade. Nonetheless, taking the coin as a whole, these are fewer than what might be expected for the grade designation. NGC ID# 2563, PCGS# 7242

5734 1896-O MS61 NGC. This attractive Mint State branch mint Morgan dollar exhibits well-detailed design elements, with just a touch of the usual softness on the hair above Liberty's ear. The lustrous surfaces show a minimum number of minor contact marks for the grade. NGC ID# 2563, PCGS# 7242

5735 1896-O MS62 PCGS. Silver-gray lustrous surfaces exhibit well-struck design features, including a modicum of detail in the hair over Liberty's ear. The distributed minute marks are in concert with the grade designation. NGC ID# 2563, PCGS# 7242

1896-O Silver Dollar, MS63 Lightly Toned and Lustrous

5736 1896-O MS63 PCGS. Despite a mintage of 4.9 million coins, the 1896-O Morgan dollar is elusive in pleasing Mint State condition. This Select example shows an above-average strike for the issue, with satiny luster shining through golden-gray toning on each side. Grade-consistent abrasions are largely minor in nature, posing little distraction. PCGS has seen only 32 numerically finer submissions (7/15). NGC ID# 2563, PCGS# 7242

1896-O Dollar, MS63 An Attractive Example of the Issue

5737 1896-O MS63 PCGS Secure. For all practical purposes, this New Orleans issue is impossible to find in Select Uncirculated condition with attractive surfaces and appealing mint luster. While nearly 300 coins have achieved the MS63 grade at PCGS (and about half that number at NGC), few display an even moderately sharp strike and most are bagmarked with poor luster. This lustrous coin is an exception, with few marks for the grade and considerable eye appeal. The obverse fields are nearly unmarked, while the strike is above average for the issue. Glints of gold toning appear mainly at the reverse margins. Just 32 coins are numerically finer at PCGS (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2563, PCGS# 7242

**1896-O Morgan Dollar, MS63
Unusual Quality and Eye Appeal**

- 5738 1896-O MS63 PCGS. CAC.** The 1896-O Morgan dollar was not a well-produced issue, and few examples were saved by contemporary collectors or preserved in government storage. As a result, the 1896-O is one of the most challenging issues of the series in attractive high-grade condition. This impressive Select specimen displays sharp definition on all design elements and vibrant mint luster on both sides. A few minor contact marks are distributed about the unusually clean surfaces. PCGS has certified 32 numerically finer examples (7/15). NGC ID# 2563, PCGS# 7242

**1896-S Morgan Dollar, MS64
Scarce Any Finer**

- 5739 1896-S MS64 PCGS. CAC. VAM-2.** The date is lightly repunched north, visible most noticeably at the top curve of the 6. Mottled peach-gold and ice-blue toning enhance the lustrous silver surfaces of this near-Gem dollar. Struck from cracked dies on both sides, yet the strike is uniformly bold — especially at the centers. A few bagmarks dot the obverse, contributing to the assigned grade. PCGS reports just 77 coins numerically finer (6/15). NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, Beautiful MS64+
Radiant Mint Brilliance on Each Side**

- 5740 1896-S MS64+ PCGS. CAC.** A production of 5 million coins belies just how challenging the 1896-S is in the upper tiers of Uncirculated condition. Dave Bowers suggests 1 million or so pieces were put into circulation, a small quantity remained in storage at the San Francisco Mint, and the rest were melted. This near-Gem has fully brilliant surfaces and surprisingly few abrasions on the reverse. Parallel roller marks appear over lightly struck centers with strong detail elsewhere. PCGS reports just 80 finer submissions (7/15) NGC ID# 2564, PCGS# 7244

- 5741 1897 MS66 PCGS. Ex:** Larry Shapiro. A hint of golden-gray toning graces the otherwise brilliant surfaces. A lustrous and precisely struck Premium Gem. Uncommonly free from contact. Larry Shapiro is best known for his remarkable PCGS Registry Set of Mercury dimes, auctioned by Heritage in our 2006 FUN Signature. *Ex: Long Beach Signature (Heritage, 10/2001), lot 7606, which realized \$977.50. NGC ID# 2565, PCGS# 7246*

1897 Silver Dollar, Top-Grade MS67

- 5742 1897 MS67 PCGS.** Liberty's cheek is completely free of distractions, as are the surfaces overall, untuned, frosty-white, well-struck, and impeccably preserved. The 2.8 million coins minted for the 1897 Morgan make it a common coin in lower grades but a conditional rarity at the Superb Gem level. Population: 30 in 67 (1 in 67+), 0 finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2565, PCGS# 7246*

- 5743 1897-O MS62 PCGS.** Moderate luster and minimal marks for the grade create good eye appeal on this O-mint Morgan, which shows a typical strike on the hair above the ear and the eagle's breast. The surfaces are untuned save for a light golden hue. NGC ID# 2566, PCGS# 7248

1897-O Morgan, Untoned MS63

- 5744 1897-O MS63 PCGS.** The untuned silver-white surfaces on this Select 1897-O Morgan host ample luster and good eye appeal, despite the smattering of small marks that determine the grade, most of them minor. A couple of small ticks on Liberty's cheek and neck are the most obvious, yet still undistracting. The certified populations at PCGS thin out rapidly in finer grades than this MS63 piece: Only 36 are reported in MS64, with 13 finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2566, PCGS# 7248*

1897-O Silver Dollar, Lustrous MS63

5745 1897-O MS63 NGC. This 1897-O Morgan is lightly abraded, as the grade suggests, but exhibits unusually vibrant, frosty luster for the issue. The strike is also above-average, and the overall eye appeal is simply pleasing. Few finer examples are certified, and the date is rare in Gem condition. NGC lists 34 numerically finer representatives (6/15). NGC ID# 2566, PCGS# 7248

5746 1897-S MS66 PCGS. The well-preserved surfaces of this impressive Premium Gem display vibrant mint luster on both sides, with a few hints of golden-tan toning. The design elements are sharply detailed and eye appeal is outstanding. PCGS has graded 25 numerically finer examples (7/15). NGC ID# 2567, PCGS# 7250

1897-S Dollar, MS67 Two Finer at PCGS

5747 1897-S MS67 PCGS. The 1897-S is a high-mintage issue within the Morgan dollar series, struck to an extent exceeding 5.8 million coins, but most survive today either circulated or in the lower Mint State grades. This Superb Gem is among just 23 such at PCGS, which has seen but two pieces numerically finer (6/15). This piece hosts thoroughgoing mint luster on pristine silver-white surfaces that are uniformly frosty and show a slight glint of cinnamon at the rims. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2567, PCGS# 7250

1898 Morgan Dollar, Satiny MS67

5748 1898 MS67 PCGS. Although a large PCGS population is recorded for 1898 silver dollars, they are elusive at the Superb Gem level. This majestic Morgan has satiny silver surfaces and bold design motifs, with only slight merging of the hair strands over Liberty's ear. Both sides are brilliant and untuned, with exceptional eye appeal. Population: 81 in 67 (4 in 67+), 0 finer (6/15). Ex: *ANA Signature (Heritage, 10/2012)*, lot 4976. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2568, PCGS# 7252

5749 1898 MS65 Deep Mirror Prooflike PCGS. *A Guide Book of Morgan Silver Dollars* explains that 1898 "DMPL coins with cameo contrast are rare indeed." The watery mirrors on this Gem example surround frosty devices on both sides. Sharply struck and minimally marked with light champagne-gold tones peripherally. NGC ID# 2568, PCGS# 97253

5750 1898-O MS67 PCGS. Before the Treasury release half-a-century ago, the 1898-O Morgan dollar was a premier rarity in the series. Nearly all of those that survived the melting pot following passage of the 1918 Pittman Act remained in storage until the early 1960s. Today, Superb Gem representatives are plentiful and extremely popular with type collectors and Morgan dollar aficionados. This sharply struck example, tied for the finest that PCGS has certified (7/15), is highly lustrous and fully brilliant with untuned silver surfaces. NGC ID# 2569, PCGS# 7254

5751 1898-O MS67 PCGS. CAC. Ex: STP Legacy Collection. This impressive Superb Gem offers well-detailed design elements and well-preserved lustrous surfaces that show light shades of golden-tan toning. PCGS has graded no coins in higher numeric grades (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2569, PCGS# 7254

5752 1898-S MS65 PCGS. This brilliant Gem shows reflective surfaces on both sides that appear to merit a Prooflike designation. The portrait of Liberty is thickly frosted with a touch of incompleteness over the ear. The eagle's breast is also a bit soft, but the overall impression is sharp. NGC ID# 256A, PCGS# 7256

1898-S Silver Dollar, Bold MS66

5753 1898-S MS66 PCGS. Wisps of gold-tan color around the margins show under high magnification, and pleasing luster emanates from well-cared-for surfaces. The strike is bold on each side, despite the characteristic minor softness apparent on the hair over Liberty's ear. Population: 81 in 66 (5 in 66+), 3 finer (6/15). Ex: *Summer FUN Signature (Heritage, 7/2007)*, lot 1683; *FUN Signature (Heritage, 1/2009)*, lot 4771. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256A, PCGS# 7256

1898-S Dollar, Untoned MS66+

5754 1898-S MS66+ PCGS. CAC. This frosty Premium Gem is untuned and shows only a few minimal marks on Liberty's cheek, and two faint scrapes on the neck. Two reeding marks show on the eagle's breast, along with a squiggly, curving wire mark in the same area. The strike is quite nice and sharp, and the fields are largely mark-free. Top-notch eye appeal. Population: 81 in 66 (5 in 66+), 3 finer (7/15). NGC ID# 256A, PCGS# 7256

5755 1899 MS66 PCGS. Strongly struck and snow-white with captivating luster. This 19th century issue is borderline scarce in Premium Gem condition and a clear rarity any finer, with just 19 coins rated MS67 or finer known to PCGS (6/15).

Ex: Long Beach Signature (Heritage, 6/2006), lot 2690. NGC ID# 256B, PCGS# 7258

5756 1899 MS66 NGC. A bright silver beauty with a strong cartwheel effect and minimal patina. Detail is surprisingly good on the hair over Liberty's ear. A small dot of toning is noted over the A in STATES on the reverse. Census: 73 in 66 (1 in 66+), 3 finer (7/15). NGC ID# 256B, PCGS# 7258

5757 1899 MS66 NGC. Sharply struck, particularly on the hair over Liberty's ear. A frosty, lustrous example of this popular issue of the late 19th century. Census: 73 in 66 (1 in 66+), 3 finer (6/15). *Ex: Long Beach Signature (Heritage, 9/2006), lot 5520. NGC ID# 256B, PCGS# 7258*

1899 Morgan Dollar, MS66 Remarkably Well-Preserved

5758 1899 MS66 PCGS. CAC. Well-defined and brightly lustrous with immense eye appeal. Largely silver-white surfaces show only a brief hint of pale peach toning in Liberty's forecurls. The cheek is entirely smooth and free of marks. CAC endorsed, housed a blue-label holder. PCGS has graded just 19 finer pieces (7/15). *Ex: Long Beach Signature (Heritage, 9/2009), lot 1176. NGC ID# 256B, PCGS# 7258*

1899 Morgan Dollar, MS66+ Thickly Frosted and Untoned Semikey

5759 1899 MS66+ PCGS. CAC. A well-known semikey, the 1899 tends to be more available than its low mintage of 330,000 coins suggests. Unopened bags were dispersed throughout the 1950s and 1960s, and seemingly freshly minted Gems are readily collectible. The 1899 is scarcely seen in Premium Gem condition and rarely with a Plus designation. This gorgeous MS66+ is thickly frosted, untoned and strongly defined, representing the upper level of quality for the grade. Two small nicks around Liberty's mouth preclude a Superb Gem assessment. *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256B, PCGS# 7258*

5760 1899 MS65 Deep Mirror Prooflike PCGS. This spectacular Gem Morgan dollar exhibits sharply detailed frosty design elements that contrast boldly with the reflective prooflike fields. Only minor signs of contact are evident and eye appeal is outstanding. Population: 51 in 65 Deep Mirror Prooflike, 12 finer (7/15). NGC ID# 256B, PCGS# 97259

5761 1899-O MS67 PCGS. Pleasing cartwheel luster swirls over the silver-white surfaces of this Superb Gem O-mint Morgan. The design features are well-defined and the few light marks are within the parameters of the designated grade. Examples grading MS67 will require some diligent searching, and are the finest that are likely to be encountered. PCGS has seen a solitary piece finer and NGC has graded none finer (7/15).

Ex: FUN Signature (Heritage, 1/2004), lot 9073.

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256C, PCGS# 7260

1899-O Morgan, MS67 Multihued Two-Sided Toning

5762 1899-O MS67 NGC. CAC. The strike and surface quality of this Superb Gem dollar are exemplary, yet they are second fiddle to the intense, multihued toning that covers both sides. Coppery-gold and ocean blue tones predominate on the obverse, with rainbow shades of ruby-red, orange, lime-green, and yellow-gold on the reverse. Mint luster shines through the variegated patina. No examples are certified numerically finer at NGC, and a single coin at PCGS ranks higher (7/15). NGC ID# 256C, PCGS# 7260

1899-O Dollar, Stunning MS67

5763 1899-O MS67 PCGS. CAC. Although the 1899-O Morgan dollar issue is common even in the Superb Gem grade level, few attain the beauty and high eye appeal of this stunning untoned example, which has garnered the added CAC designation as well. The focal points are mostly mark-free (one small hit shows on the eagle's breast), and the strike is better than expected. CAC has certified only 33 in this grade (7/15). NGC ID# 256C, PCGS# 7260

5764 1899-O MS66 Prooflike PCGS. The design elements are well struck, the fields are richly reflective, and there are few marks on either side of this lovely, prooflike Premium Gem. Population: 15 in 66 (1 in 66+) Prooflike, 0 finer (7/15). NGC ID# 256C, PCGS# 7261

**1899-O Dollar, MS66 Deep Mirror Prooflike
Outstanding Surface Quality**

5765 1899-O MS66 Deep Mirror Prooflike PCGS. The 1899-O Morgan is usually regarded as a common date, however its availability plummets in the Deep Mirror Prooflike category. This Premium Gem example is among the finer-known representatives. Sharp, frosty motifs provide pleasing contrast against the mirrored fields, while hints of light golden toning intrude from the peripheries. Population: 19 in 66 (1 in 66+) Deep Mirror Prooflike, 2 finer (6/15). NGC ID# 256C, PCGS# 97261

5766 1899-O Micro O, VAM-6, MS61 PCGS. A Top 100 Variety. The date is placed far left, the mintmark is tilted right, and a confirming die line connects the eagle's right wing and rear neck-feathers. This variety is ranked R.5 by VAMWorld and seldom seen in Mint State. This is an attractive untuned example with a light golden cast and good eye appeal despite minor, unobtrusive marks. For the Micro O varieties, Population: 2 in 61, 5 finer (7/15). PCGS# 133948 Base PCGS# 87260

5767 1899-S MS65 PCGS. Minimally toned and brightly appealing with powerful obverse luster in particular. Solid detail on the hair over the ear is a welcome bonus on this Gem. NGC ID# 256D, PCGS# 7262

5768 1899-S MS65 PCGS. Splendid cartwheel luster rolls around each side of this untuned Gem 1899-S, a boldly struck coin with great eye appeal and a clean cheek on Liberty. A pair of reeding marks show on the eagle's breast, which is otherwise equally well-preserved. NGC ID# 256D, PCGS# 7262

1899-S Dollar, Sharp MS66

5769 1899-S MS66 PCGS. Whispers of light tan and gray patina appear over the lustrous surfaces of this Premium Gem, especially on the reverse, and the design features are generally well-impressed, save for typical minor softness on the hair above Liberty's ear. A nicely preserved piece. PCGS reports only 10 submissions in MS67 (one MS67+) (6/15).

Ex: Long Beach Signature (Heritage, 2/2009), lot 1939; Central States Signature (Heritage, 4-5/2009), lot 3200.

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256D, PCGS# 7262

5770 1899-S MS65 Prooflike PCGS. The well-preserved surfaces of this impressive Gem are mostly brilliant, with a few highlights of golden-tan toning and strong prooflike reflectivity in the fields. The design elements are sharply detailed throughout. Population: 42 in 65 Prooflike, 4 finer (7/15). NGC ID# 256D, PCGS# 7263

5771 1900 MS66+ PCGS. CAC. This high-end Premium Gem displays creamy pristine surfaces with vibrant frosty mint luster. The design elements show just a touch of softness on the hair strands above Liberty's ear. Overall visual appeal is terrific. NGC ID# 256E, PCGS# 7264

**1900 Morgan Dollar, MS67
Completely Brilliant, Nearly Flawless**

5772 1900 MS67 PCGS. This Superb Gem is a must for the Morgan dollar enthusiast who desires a frosty, entirely brilliant example of unsurpassed technical quality. Both the obverse and reverse are devoid of even the faintest trace of toning, and bagmarks are nearly unseen. Sharply struck overall with moderate central softness over Liberty's ear and the eagle's breast. Population: 38 in 67 (3 in 67+), 0 finer (7/15).

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256E, PCGS# 7264

5773 1900-O MS67 PCGS. The 1900-O Morgan dollar, with a mintage exceeding 12 million pieces, is a readily available issue through Premium Gem. MS67 examples are elusive, however, and finer pieces are virtually unobtainable. Strong luster emanates from the untuned surfaces that exhibit well-struck design elements, including the hair over Liberty's ear and the eagle's breast feathers. Both sides are impeccably preserved. Population: 62 in 67 (4 in 67+), 0 finer (7/15).

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256F, PCGS# 7266

**1900-O/CC Dollar, MS66
VAM-10A, Top 100**

5774 1900-O/CC VAM-10A MS66 PCGS. A Top 100 Variety. The base of both Cs in the Carson City mintmark are apparent, bookending the New Orleans mintmark. The late die state with a clashed N (from IN) on the obverse field near Liberty's neck. A brilliant Premium Gem with potent luster, a good strike, and exceptionally mark-free fields. The portrait displays only delicate contact.

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133962 Base PCGS# 7268

5775 1900-S MS65 NGC. The brilliant surfaces show little contrast but great luster on this untuned Gem better-date S-mint. Liberty's cheek shows a few light vertical roller marks, as made, but post-Mint abrasions are few throughout both sides. NGC ID# 256H, PCGS# 7270

5776 1900-S MS65+ NGC. Blushes of cobalt-blue, plum, and golden-amber patina adorn the rims, while the interior portions of this well-detailed high-end Gem remain largely brilliant. Light marks are not overly distracting, and the only noteworthy flaw is a linear depression below PL(URIBUS). NGC reports just 27 pieces finer (7/15). NGC ID# 256H, PCGS# 7270

**1900-S Morgan Dollar, MS66
Green Label Holder**

5777 1900-SMS66PCGS. CAC. Glimpses of straw-gold toning are noted near PLURIBUS, but this highly lustrous and high grade silver dollar is otherwise close to brilliant. The strike is good, and the eye appeal is attractive. Significantly scarcer than its 1900-dated New Orleans and Philadelphia counterparts. Certified in a green label holder.
Ex: Long Beach Signature (Heritage, 5/2001), lot 6628.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 256H, PCGS# 7270

5778 1901 AU58 PCGS. CAC. Just a whisper of wear crosses the high points of this still-lustrous 1901 dollar. Both sides remain brilliantly light silver with a few dusky elements in the reverse fields. Housed in a green-label PCGS holder. NGC ID# 256J, PCGS# 7272

1901 Silver Dollar, Satiny MS60

5779 1901 MS60 NGC. An affordable Mint State example of this conditionally challenging Philadelphia issue. This piece displays brilliant, satiny luster with light, scattered abrasions as noted by the grade. Some typical striking weakness on the eagle's breast and the hair above Liberty's ear is not overly obvious. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62
Attractively Lustrous**

5780 1901 MS62 NGC. This Mint State 1901 Morgan dollar exhibits satiny silver-gray luster with hints of golden toning around the peripheries. Light, scattered surface grazes limit the grade, but no singularly significant abrasions are present. This piece shows only a touch of striking softness on the eagle's breast and the hair above Liberty's ear. NGC ID# 256J, PCGS# 7272

**1901 Silver Dollar, Choice AU
Doubled Die Reverse, VAM-3
Important Guide Book Variety**

5781 1901 Doubled Die Reverse, VAM-3, AU55 PCGS. *Ex: Jeffrey M. Cohen. A Top 100 Variety.* The reverse is die doubled north, with the spread most impressive on the branch, arrows, and tail feathers. Listed in the *Guide Book*, and among the most popular die varieties of the series. Only a handful of Uncirculated examples are known. The present untoned example has substantial peripheral luster and lacks any mentionable marks.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
PCGS# 133965 Base PCGS# 7302

**1901 Morgan, Lustrous AU55
VAM-3, 'Shifted Eagle'**

5782 1901 Doubled Die Reverse, VAM-3, AU55 PCGS. A Top 100 Variety. Popularly known as the "Shifted Eagle" variety, VAM-3 shows bold die doubling on most reverse design elements, and is recognized as one of the must-have varieties of the Morgan dollar series. This Choice AU representative displays still-lustrous fields with a hint of golden toning. The high points of the devices show trivial wear. Population: 34 in 55, 16 finer (6/15). PCGS# 133965 Base PCGS# 7302

5783 1901-O MS66 PCGS. CAC. The well-detailed design elements of this impressive Superb Gem show just a trace of the usual softness on the hair above the ear and the lustrous surfaces display highlights of pale gold and lavender-gray toning. PCGS has graded four numerically finer examples (6/15). NGC ID# 256K, PCGS# 7274

5784 1901-S MS64+ PCGS. CAC. Splashes of cobalt-blue, lavender, and reddish-orange patina gravitate to the borders of this high-end near-Gem Morgan. Minimal contact marks are evident on the lustrous surfaces, though roller marks are visible on both sides. Pleasing overall eye appeal, appropriately recognized by CAC. NGC ID# 256L, PCGS# 7276

**1901-S Morgan Dollar, MS65
Rainbow Toning, Sharp Strike**

- 5785 1901-S MS65 NGC.** Shades of blue, violet, and sunset-gold grace both sides of this Gem San Francisco issue, which becomes scarce at this grade level and notably rare any finer. The strike is often problematic on the 1901-S, yet only slight central blending can be seen on this well-produced example. Mint luster glows beneath the vibrant colors. NGC reports just six numerically finer examples (6/15). NGC ID# 256L, PCGS# 7276

**1901-S Dollar, MS66
Prohibitively Rare Any Finer**

- 5786 1901-S MS66 PCGS.** This is one of the more elusive S-mint issues in the series. Bowers (2007) estimates that only 30 to 45 examples survive in this rarified grade. Swirling cartwheel luster rolls over all-brilliant surfaces on each side of this Premium Gem. A small grouping of minor ticks is concentrated around the point of Liberty's bust. We have only seen a single example of the 1901-S finer (MS67 PCGS), which realized \$42,300 in our February 2015 Dallas Signature sale. Population: 34 in 66 (3 in 66+), 3 finer (7/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256L, PCGS# 7276

- 5787 1902 MS66+ PCGS. CAC.** The silver-gray surfaces of this high-end Premium Gem Morgan yield pleasing luster and well-struck design elements, including ample definition in the hair above Liberty's ear. Both sides have been well-cared for. The 1902 becomes elusive any finer, evidenced by PCGS having graded fewer than 30 such examples (7/15). NGC ID# 256M, PCGS# 7278

1902 Morgan Dollar, Top-Grade MS67

- 5788 1902 MS67 PCGS.** The 1902 Morgan dollar claims a large mintage of nearly 8 million pieces, and this coin is among the finest survivors of that notable production. Razor-sharp definition is apparent on all design elements, and both sides radiate vibrant mint luster. A few hints of pale gold toning enhance the top-notch eye appeal. Population: 29 in 67 (2 in 67+), 0 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256M, PCGS# 7278

- 5789 1902-O MS66+ PCGS.** Bright silver luster with only a hint of pale blue visiting the surfaces. Well-defined overall, if a trifle soft on the hair over the ear. Carefully preserved and attractive. PCGS has graded just 16 pieces as MS67 or better (7/15). NGC ID# 256N, PCGS# 7280

**1902-S Morgan, Silver-White MS66
Good Eye Appeal and Preservation**

- 5790 1902-S MS66 NGC.** Liberty's cheek and mouth show only small, trivial ticks and luster grazes on this better-date S-mint, but a couple of larger hits on the eagle's breast likely help account for the grade. The eye appeal and preservation are nonetheless quite high on this untoned example. Roller marks on the cheek could go unnoticed without a loupe and careful scrutiny. Census: 9 in 66, 0 finer (7/15). NGC ID# 256P, PCGS# 7282

**1902-S Dollar, MS66
Ex: Bella Collection**

- 5791 1902-S MS66 PCGS Secure.** Ex: Bella. This low mintage issue had production halted after 1.53 million coins were produced, and survivors, while available, are elusive in higher grades. This lustrous Premium Gem exhibits delicate almond-gold and pearl-gray toning. The centers show moderate incompleteness. The Bella Collection of Morgan dollars, a high-ranking PCGS Registry Set, was purchased by Legend Numismatics in 2013 for a price in excess of \$3,000,000. Population: 42 in 66 (3 in 66+), 4 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256P, PCGS# 7282

- 5792 1903 MS67 PCGS.** Ex: David S. Emery. Wisps of light gold, violet, and ice-blue toning grace the surfaces of this attractive Superb Gem. The fields are virtually mark-free, and vibrant mint luster shines beneath the patina. This coin combines outstanding eye appeal and the highest available technical grade from PCGS. Population: 91 in 67 (1 in 67+), 0 finer (6/15).
Ex: *Summer FUN Signature* (Heritage, 7/2011), lot 4212.
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256R, PCGS# 7284

**1903 Morgan Dollar, MS67
Among the Finest at PCGS**

- 5793 1903 MS67 PCGS. CAC.** This late-date Philadelphia issue only becomes scarce at the Superb Gem level, and finer coins are virtually unknown. The devices show needle-sharp detail with the hair strands over Liberty's ear boldly defined. Even the wrinkles on the eagle's talons are fully delineated. Radiant surfaces are entirely brilliant with coruscating mint frost, and there are no singular marks to report. Population: 91 in 67 (1 in 67+), 0 finer (7/15).
NGC ID# 256R, PCGS# 7284

- 5794 1903 MS65 Prooflike PCGS.** Even though struck in an amount exceeding 4.6 million coins, the 1903 Morgan dollar seldom appears in high grade with prooflike surfaces. This untuned piece shows generous luster and abundant contrast, a happy exception. Population: 34 in 65 Prooflike, 6 finer (7/15). NGC ID# 256R, PCGS# 7285

1903-O Morgan Dollar, Frosty MS67

- 5795 1903-O MS67 PCGS.** The 1903-O Morgan dollar was once upon a time among the rarest issues in the series, before bagfuls turned up in the Treasury holdings released circa 1962-65. Today it has among the highest "curiosity factor" quotients of any issues in the series, which in turn leads to much demand. The Superb Gem level is the top for the 1903-O, and this silver-white example boasts pristine preservation and top-notch frosty luster. Population: 73 in 67 (1 in 67+), 0 finer (6/15).
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256S, PCGS# 7286

- 5796 1903-O MS65 Prooflike PCGS.** A light coating of golden patina covers flashy, reflective fields. This is a well-defined, highly attractive representative of a New Orleans issue that is rarely seen with a Prooflike finish. Population: 26 in 65 Prooflike, 5 finer (7/15).
Ex: *Central States Signature* (Heritage, 5/2005), lot 9971. NGC ID# 256S, PCGS# 7287

**1903-O Dollar, MS65 Deep Mirror Prooflike
Gleaming, Brilliant Surfaces**

- 5797 1903-O MS65 Deep Mirror Prooflike NGC.** Quantities of 1903-O Morgan dollars survive in Mint State, but few exhibit Prooflike contrast and even fewer deserve the Deep Mirror Prooflike designation. This Gem example is brilliant and impressively reflective. The devices are well-struck for a New Orleans issue, showing satiny luster. No major abrasions are observed. Census: 5 in 65 Deep Mirror Prooflike, 1 finer (6/15). NGC ID# 256S, PCGS# 97287

- 5798 1903-S AU53 PCGS.** The 1903-S is a lower-mintage semikey that poses a challenge in Mint State condition. This collectible AU coin has bright silver surfaces with accents of pale gold in the recesses. The centers show expected blending, and marks are lightly scattered over each side. NGC ID# 256T, PCGS# 7288

1903-S Silver Dollar, MS62

- 5799 1903-S MS62 PCGS. CAC.** This delicately gold-toned Morgan dollar is housed in a first-generation PCGS holder. Both sides have satiny silver luster and sharp design motifs. The 1903-S is a scarce issue in the Morgan series with relatively few remaining in Treasury vaults in the 1960s. NGC ID# 256T, PCGS# 7288

**1903-S Silver Dollar, Radiant MS65
Elusive Late-Series Issue**

- 5800 1903-S MS65 PCGS.** Radiant cartwheel luster shows amid a scant trace of color on this largely untuned Gem 1903-S dollar. Faint hints of rose are scattered hither and yon. Were it not for a few trivial marks on Liberty's cheek and a couple of small luster grazes, this attractive coin might be eligible for an even finer grade. The 1903-S is among the more-elusive late-series S-mint issue in the Morgan series, seen in Gem and finer grades far less often than the 1902-S and a more often than the key 1904-S. PCGS reports only 40 submissions in higher grades (5/15).
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256T, PCGS# 7288

**1903-S Morgan Dollar, AU53
VAM-2 Micro S Variety**

- 5801 1903-S Micro S, VAM-2, AU53 PCGS. CAC.** A Top 100 Variety. Ex: Jeffrey M. Cohen. The minuscule S mintmark is centered beneath the bow and upright, far smaller than the normal S mintmark. The 1903-S Micro S variety is a popular one that is quite elusive in the higher grades, combining the absolute rarity of the 1903-S with the added conditional rarity of the variety. VAMWorld.com writes of the VAM-2 variety: "The 1903-S is a costly coin to begin with, but add this micro S and the price jumps considerably. In addition, condition plays a part in the rarity. VAM-2 coins are very hard to find in XF and above." This slightly circulated example alternates areas of untuned silver-white with rose-gold near the borders and some patches of deeper lilac, cinnamon, and cobalt-blue on the reverse. Minor high-point wear appears amid no singularly mentionable signs of contact. Population: 7 in 53, 6 finer (5/15). This piece is one of two in this grade with the CAC green approval sticker.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
PCGS# 133967 Base PCGS# 7306

- 5802 1904 MS65 PCGS.** Most 1904 dollars are poorly struck and exhibit substandard luster (Bowers, 2007). The present Gem offering deviates from this profile. Its mint luster is thick and satiny, and the striking definition is above average, especially in the hair over Liberty's ear. Mostly brilliant, there is just a hint of golden toning present over the denticles on each side.
Ex: Long Beach Signature (Heritage, 2/2006), lot 2374; FUN Signature (Heritage, 1/2009), lot 4825.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 256U, PCGS# 7290

- 5803 1904 MS65 PCGS.** Dusky green-gold at the margins with blue-gray interiors that are lighter on the reverse. Considerable cartwheel luster pierces the patina on this late-date Gem. NGC ID# 256U, PCGS# 7290

**1904-O Dollar, MS67
None Finer at Either Service**

- 5804 1904-O MS67 PCGS.** New Orleans Morgan dollar production dropped to 3.7 million coins in 1904, representing the lowest total since 1895. Massive quantities were released from the Treasury vaults in the early 1960s, turning the previously ultra-rare 1904-O into a popular issue for type representation. Today, examples only become scarce at the MS67 grade level. This is an untuned Superb Gem with vibrant mint luster and boldly impressed devices. The surfaces are remarkably clean, as expected given the high technical assessment. Population: 43 in 67, 0 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 256V, PCGS# 7292

**1904-O Morgan, MS66 Deep Mirror Prooflike
In an Old Green Label Holder**

- 5805 1904-O MS66 Deep Mirror Prooflike PCGS. CAC.** Although a significant quantity of Mint State coins were turned up in the Treasury releases, the 1904-O Morgan dollar is still scarce in the higher reaches of the Deep Mirror Prooflike category. This Premium Gem shows gleaming mirror-like fields around satiny devices. Hints of light golden toning appear around the periphery, barely noticeable. Only a touch of striking softness is evident on the eagle's breast and the hair above Liberty's ear. Housed in an old green label holder. Population: 19 in 66 Deep Mirror Prooflike, 1 finer (7/15). NGC ID# 256V, PCGS# 97293

**1904-S Silver Dollar, MS63
Semiprooflike Fields**

- 5806 1904-S MS63 PCGS.** Consistent with the grade, this Select 1904-S Morgan dollar shows light, scattered abrasions, but these are almost insignificant in the shadow of the gleaming near-prooflike fields that deliver outstanding eye appeal. Amber-gold toning begins at the peripheries and lightens as it expands inward, leaving the central devices with a faint champagne hue. Some lightness of strike on the eagle's breast and the hair above Liberty's ear is not unusual for the issue. NGC ID# 256W, PCGS# 7294

**1904-S Silver Dollar, MS64
Pleasing for the Grade**

- 5807 1904-S MS64 PCGS.** A vibrantly lustrous, untuned example of this conditionally elusive San Francisco issue. Not unusual for the grade, there is minor striking weakness on the eagle's breast and the hair above Liberty's ear. Grade-limiting abrasions are at a minimum. The 1904-S is available through the MS64 level, but finer pieces are seldom seen. NGC ID# 256W, PCGS# 7294

**1904-S Silver Dollar, Satiny MS64+
Blaze-White and Attractive**

- 5808 1904-S MS64+ PCGS. CAC.** Those who prefer untuned Morgan dollars will find this example powerfully attractive. Granted both the PCGS Plus for high-end quality and CAC endorsement as an additional award, the coin is a true borderline Gem with a strike that is above average for the San Francisco issue. Marks are minimal on the obverse. A scrape through the A in States is noted, yet it is visible under magnification but mostly hidden to the naked eye. NGC ID# 256W, PCGS# 7294

**1904-S Morgan Dollar, MS64+
Attractive Luster and Toning**

- 5809 1904-S MS64+ PCGS. CAC.** From a late-series mintage of 2.3 million pieces, the 1904-S Morgan dollar is a challenging issue in grades above the MS64 level. This high-end Choice example is well-detailed and brightly lustrous, with well-preserved surfaces that are blanketed in shades of golden-brown and lavender toning. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, Luminous MS65
Outstanding Surface Quality**

- 5810 1904-S MS65 PCGS.** A beautiful example of this late-series S-mint. The 1904-S is only occasionally available in Gem condition and seldom finer. Luminous mint luster emanates from both sides, complementing pale gold, rose, and ice-blue patina amid excellent preservation. The strike through the central high points is a bit on the mushy side, as usually seen, but the lack of singular marks and lovely surfaces more than compensate. PCGS reports only 13 submissions in MS66 or finer grades (5/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 256W, PCGS# 7294

**1921 Morgan Dollar, MS66+
Terrific Luster, Frost-White Surfaces**

- 5811 1921 MS66+ PCGS. CAC.** It is hard to visualize a more appealing example of this massively minted Philadelphia issue, which is equally known for its easy availability yet lack of truly attractive representatives. This coin is razor-sharp and thickly frosted, with blazing silver luster. Aside for a handful of tiny marks and grazes, none of which are significant, the surfaces are wholly undisturbed. Population: 46 in 66+, 10 finer (6/15). NGC ID# 256X, PCGS# 7296

**1921 Morgan Dollar
High-End Premium Gem**

- 5812 1921 MS66+ PCGS. CAC.** The strike is needle-sharp on Liberty's portrait and the eagle, with full details throughout. A thick blanket of mint frost captures the brilliant cartwheel luster, which flashes across the frost-white surfaces that are entirely untuned. Only minor luster grazes and minor scuffs prevent an even finer grade. Excellent eye appeal, CAC endorsed. Population: 46 in 66+, 10 finer (6/15). NGC ID# 256X, PCGS# 7296

1921 Morgan Dollar, Frosty MS66+

- 5813 1921 MS66+ PCGS. CAC.** Generous frost-white luster complements untuned silver-white surfaces that show excellent preservation on this last-year 1921 Morgan dollar. A Superb Gem, only a skosh finer, would be a difficult upgrade to achieve, and this piece's CAC approval further separates it from most of its ilk. Population: 46 in 66+, 10 finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 256X, PCGS# 7296

- 5814 1921-D MS66 PCGS. CAC.** After production ceased in 1904, the Morgan dollar was again issued in 1921, prior to the introduction of the Peace dollar. Since the Denver Mint begun operations in 1906, the 1921-D is the only Morgan issued at that facility. This Premium Gem is a lovely example with satiny silver luster beneath dappled green and gold toning. NGC ID# 256Y, PCGS# 7298

5815 1921-D MS66 PCGS Secure. CAC. Ex: Sunnywood/Simpson. Stunning but unusual colors make this coin stand out, burnt orange around the peripheries of each side, moss-green moving inward, to violet and rose. A likely fingerprint in the center obverse is scarcely bothersome, given the otherwise-high eye appeal. The surfaces are unabraded and show great luster, despite the intense color. NGC ID# 256Y, PCGS# 7298

5816 1921-D MS66+ PCGS. CAC. Denver Morgan dollar output amount to 20.3 million coins in the facility's only year producing the design. Mottled album toning on each side shows a mix of blue, violet, and orange shades marginally with brilliant, frosty centers. Liberty's cheek is exceptionally clean. There are a mere eight submissions finer at PCGS (7/15). NGC ID# 256Y, PCGS# 7298

**1921-S Morgan Dollar, MS66
None Graded Finer at PCGS**

5817 1921-S MS66 PCGS. Morgan dollar collectors are well-aware that this San Francisco issue is — for all practical purposes — unobtainable any finer than MS66. Premium Gems are scarce enough, with lustrous and attractive coins such as the present example always in hot demand. The intense silver surfaces of this coin are well-struck and enriched with a faint dusting of reddish-gold patina. The luster is terrific. Population: 70 in 66 (2 in 66+), 0 finer (6/15). NGC ID# 256Z, PCGS# 7300

**1921-S Morgan Dollar, MS66
Only One Coin Numerically Finer**

5818 1921-S MS66 NGC. The 1921-S is the most challenging of the three final-year Morgan dollar issues to locate in high grades. This Premium Gem example shows brilliant, frosty luster, with unusually well-preserved surfaces. The eagle's breast and the lower wreath leaves show some of the usual striking softness. Census: 62 in 66 (3 in 66+, 3 in 66 ★), 1 finer (6/15). NGC ID# 256Z, PCGS# 7300

**1921-S Morgan Dollar
Sharp, Untoned Premium Gem**

5819 1921-S MS66 PCGS. This brilliant, frost-white silver dollar stands out for its sharp strike. The final-year Morgan dollars were struck in huge quantities at all three Mints, with scant regard for die wear. Perhaps this frosty Premium Gem was an early strike, given its bold overall detail including the eagle's lower extremities. Some blending on the wreath leaves prevents "full strike" status. Blazing mint luster and a clean cheek on Liberty compensate for the few field ticks seen on the reverse. Population: 71 in 66 (2 in 66+), 0 finer (7/15). NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, Brilliant MS66

5820 1921-S MS66 PCGS. This untuned Premium Gem 1921-S Morgan features sumptuous cartwheel luster that races around both sides. Only trivial marks are present amid top-notch eye appeal. Despite a mintage of nearly 22 million coins, the 1921-S issue has only 68 submissions in MS66 at PCGS and two MS66+ in the top spot (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

**1878 8 Tailfeathers Dollar, PR64
A Popular Low-Mintage Issue**

5821 1878 8TF PR64 PCGS. CAC. The 8 Tailfeathers variety of the proof 1878 Morgan dollar claims a small estimated mintage of 500 pieces, and attractive examples are always in demand. This impressive Choice specimen exhibits sharply detailed devices and stunning iridescent gold and violet patina. The surfaces are deeply reflective beneath the toning. Population: 27 in 64, 21 finer (7/15).
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4308 NGC ID# 2572, PCGS# 7311

- 5822 1879 PR62 PCGS.** Hints of champagne toning deepen to gold at the borders of this pleasing proof. Faint hairlines in the fields limit the grade, although they are barely noticeable. A pleasing example for a type set or proof Morgan collection. NGC ID# 27Z2, PCGS# 7314

1880 Dollar, Colorfully Toned PR65

- 5823 1880 PR65 PCGS.** Silver proof mintages were generous in 1880, but this Morgan dollar issue is seldom encountered in Gem condition. This delightful Gem is spectacularly toned in shades of gray, gold, lavender, and cobalt-blue, with reflective fields and well-detailed design elements. Population: 42 in 65, 52 finer (7/15). NGC ID# 27Z4, PCGS# 7315

**1885 Morgan Dollar, PR64 Cameo
Nicely Contrasted Surfaces**

- 5824 1885 PR64 Cameo NGC. CAC.** This well-struck near-Gem Cameo proof displays frosty devices and reflective fields of champagne-pink and pale lilac. The surfaces are well-preserved, and the fields set up nice contrast against the devices. Census: 15 in 64 Cameo, 46 finer (7/15).
Ex: Long Beach Signature (Heritage, 6/2002), lot 6235. PCGS# 87320

- 5825 1889 — Altered Surface — PCGS Genuine. Proof, Unc. Details.** A razor-sharp specimen with dusky butter-gold and steel-blue toning. The fields are moderately subdued but void of contact marks or detracting hairlines. One of just 811 proofs issued. NGC ID# 27ZJ, PCGS# 7324

**1889 Silver Dollar, PR64 Cameo
Moderately Toned and Attractive**

- 5826 1889 PR64 Cameo NGC.** The obverse shows an area largely untuned at the center, save for a slight golden cast, deepening to copper-gold and pale blue near the rims, while the reverse is subsumed by lovely sunset-orange patina accented by ice-blue. The fields are nonetheless well-mirrored on both sides and the devices frosted, a bit heavier on the reverse. An attractive example of this midseries proof issue. Census: 11 in 64 Cameo, 27 finer (7/15). PCGS# 87324

**1889 Dollar, PR65 Cameo
Lightly Toned, Stark Field-Device Contrast**

- 5827 1889 PR65 Cameo PCGS.** Proof Morgan dollar production remained fairly stable between 1888 and 1889, declining modestly from 833 proofs to 811 proofs. Gems with cameo contrast are rare despite the unremarkable mintage. This magnificent PR65 Cameo representative offers profound reflectivity in the fields, contrasting appreciably against frosty motifs. Faint gold and lavender toning lightly colors surfaces that are free of mentionable imperfections. Population: 12 in 65 Cameo, 10 finer (7/15). PCGS# 87324

**1891 Morgan Dollar, Attractive PR63
Light, Even Toning**

- 5828 1891 PR63 NGC.** Light, even golden toning covers both sides of this deeply mirrored proof Morgan dollar. Some cameo contrast is evident between the fields and devices, a bit more perceptibly on the reverse. Quite nice for the grade, which is determined largely by tiny contact marks on the cheek.
Ex: Long Beach Signature (Heritage, 2/2001), lot 6464; Atlanta Bullet Sale (Heritage, 8/2001), lot 1200. NGC ID# 27ZL, PCGS# 7326

1892 Dollar, PR64
An Accessible Proof Example

- 5829 1892 PR64 PCGS.** Proof Morgan dollar production nearly doubled between 1891 and 1892 (650 pieces versus 1,245 pieces), no doubt reflecting the heightened demand for sets containing the new Barber coinage. This is an eye-catching black-and-white example with bold contrast. Brilliant surfaces show a slight tinge of rose coloration and minimal contact marks. NGC ID# 27ZM, PCGS# 7327

1893 Morgan Dollar, PR64 Cameo
792 Pieces Struck

- 5830 1893 PR64 Cameo PCGS.** The margins offer rich navy-blue and peach-gold patina, though the majority of the present Choice proof is untoned. The motifs are frosty aside from an overlay of gunmetal-gray and ruby-red on the lower portion of the portrait. The centers are lightly brought up and retain a couple of slender planchet marks, as coined. Population: 18 in 64 Cameo, 20 finer (7/15). PCGS# 87328

1894 Morgan, Beautifully Toned PR65
Better Date in the Series, CAC

- 5831 1894 PR65 NGC. CAC.** The business strike 1894 Morgan dollar is a low-mintage issue, struck to the extent of only 110,000 pieces, that is difficult to locate in the preferred Mint State grades. This Gem proof offers an originally preserved coin that would fit equally well into a high-quality date set. Both sides are uniformly reflective, well-preserved, and show some cameo contrast. The toning is stunning on both sides, although painted from differing palettes. The obverse offers pale sunset-orange and lilac hues; the reverse is vividly and beautifully toned in saffron, gold, copper-orange, violet, and aqua. Both sides are remarkably well-preserved. Any Gem proof Morgan is a conditional rarity, and this better-date, beautifully toned 1894 is far more desirable still. Census: 46 in 65, 74 finer (7/15). Only three non-Cameo/Deep Cameo 1894 Morgans in PR65 bear the CAC green approval sticker. Ex: Long Beach Signature (Heritage, 2/2001), lot 6466. NGC ID# 2577, PCGS# 7329

1898 Morgan Dollar, Nicely Contrasted PR63

- 5832 1898 PR63 NGC.** This pleasing proof will find demand from both specialists and type collectors. Faint steel-gray field toning contrasts well against lighter cream-gray devices. Minor hairlines limit the grade. Judging solely by the reverse, this piece would likely merit a Cameo designation, but the obverse falls just short. Ex: Long Beach Signature (Heritage, 2/2005), lot 10667. NGC ID# 27ZW, PCGS# 7333

- 5833 1899 PR60 NGC.** Though this proof has extensive imperfections, including numerous hairlines and contact marks, it is unworn in the strictest sense. On the reverse, cameo contrast persists. A fascinating coin. NGC ID# 27ZX, PCGS# 7334

1899 Silver Dollar, PR64 Cameo
Undeniable Eye Appeal

- 5834 1899 PR64 Cameo PCGS.** This near-Gem proof displays illimitable reflectivity in the fields and rich mint frost over the devices. A hint of natural-gold patina is seen at the borders while only a few scattered hair-thin lines limit the grade. Exceptional overall quality with sharp Cameo contrast provides undeniable eye appeal. Population: 21 in 64 (2 in 64+) Cameo, 22 finer (6/15). Ex: Palm Beach Signature (Heritage, 11/2004), lot 10224. PCGS# 87334

1900 Dollar, PR65 Cameo
Strong Field-Motif Contrast

- 5835 1900 PR65 Cameo NGC.** This turn-of-the-century Gem has strong contrast despite rich patina occupying all but the silvery centers. Lush gold-to-orange hues turn to violet at the rims, and the mirrors around the well-frosted devices remain strong. Sharply struck with great eye appeal from late in the Cameo era for proof Morgan dollars. Census: 17 in 65 Cameo, 37 finer (7/15). PCGS# 87335

1900 Dollar, PR65 Cameo
Elusive Cameo Specimen

- 5836 1900 PR65 Cameo PCGS.** The silver-white devices contrasting against deeply mirrored, midnight-black fields place this appealing Gem on the cusp of a Deep Cameo designation. The design elements are sharply struck and there is a lack of mentionable contact. Seldom seen with Cameo surfaces. Population: 11 in 65 Cameo, 14 finer (7/15). PCGS# 87335

1902 Morgan Dollar, PR66
Subtle Field-Motif Contrast

- 5837 1902 PR66 NGC.** This is an outstanding Premium Gem example of this early 20th century proof Morgan dollar, showing brilliant, satiny motifs and deeply mirrored fields that show just a hint of purplish-gray color. As anticipated for the issue, cameo contrast is lacking the boldness necessary for such a designation, but is nonetheless present to a modest extent on each side. Census: 39 in 66 (1 in 66 ★), 18 finer (6/15). NGC ID# 2822, PCGS# 7337

1903 Morgan Dollar, PR63
Low-Contrast Late-Series Proof

- 5838 1903 PR63 NGC.** This Select proof bears the low-contrast “chromium look” of many post-1902 Morgan dollar proofs, although the eagle on the reverse shows faint contrast against the fields. Pale champagne-pink patina is uniform and attractive. There is a trivial staple scratch below TRUST. Only 755 proofs were struck.
Ex: Long Beach Signature (Heritage, 2/2002), lot 6250. NGC ID# 2823, PCGS# 7338

1921 Morgan Dollar, SP63
Zerbe Special Strike

- 5839 1921 Zerbe SP63 PCGS. VAM-1AG.** Research conducted by Ash Harrison in 2009 on 1921 Morgan dollars revealed an interesting commonality among many encapsulated Zerbe proofs by both grading services. Per VAMworld.com, “he determined that the same variety [VAM-1AG] tended to occupy PCGS and NGC holders labeled as Zerbe proofs.” The variety is attributed by specific and distinctive die polish lines through the US in PLURIBUS with repeating X convergences of the polish lines and “scribbling die scratches” around the talons on the reverse. This VAM-1AG example displays an even layer of golden toning with pleasing reddish undertones. The reflective fields, a virtually full strike, and an absence of bagmarks all suggest specimen status common to Zerbe proofs, as confirmed by the PCGS attribution. Population: 18 in 63, 46 finer (6/15). NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

- 5840 1921 MS64+ PCGS. CAC. VAM-1F.** The dies for this VAM were used to strike matte proofs, though the present near-Gem is a business strike with expected moderate incompleteness at the centers. Lustrous with faint tan toning and a few delicate obverse abrasions.
Ex: Orlando FUN Signature (Heritage, 7/2012), lot 4473, which realized \$977.50. NGC ID# 2U4E, PCGS# 7356
- 5841 1921 MS65 NGC.** The satiny surfaces and above-average central detail on this untoned Gem 1921 Peace dollar marks it as probably one of those struck during the first few days of production from fresh dies. A few ticks that determine the grade are largely confined to the eagle’s midsection on the reverse. NGC ID# 2U4E, PCGS# 7356
- 5842 1921 MS65+ PCGS.** The satiny surfaces are largely untoned, save for a light golden accent on the left half of the obverse. The central strike is not sharp but better than typically seen. Abrasions are few and mostly away from the high points, and generous luster creates great eye appeal on this key-date Peace dollar. A couple of milky-gray spots show in the left reverse field. NGC ID# 2U4E, PCGS# 7356
- 5843 1921 MS65 PCGS. CAC.** A colorful first-year Peace dollar Gem with ample luster lighting up the violet-gray, peach, and steel-gray surfaces. Ideal for a toned type set needing this higher-relief variety. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS66
First-Year High Relief Type**

5844 1921 MS66 PCGS. The 1921 is widely pursued as both the first issue in the Peace dollar series and a one-year High Relief type. Over 1 million coins were struck in that first year, and while demand puts added pressure on coins across all grade levels, examples only become scarce in Premium Gem condition. As usual, the strike is problematic over the centers, but the overall impression is strong. Vibrant luster shimmers beneath light golden patina, enhancing the appeal. PCGS reports only seven submissions finer (7/15). NGC ID# 2U4E, PCGS# 7356

5845 1922 MS66+ PCGS. CAC. The Mint struck an astonishing 51.7 million Peace dollars in 1922, and examples can be found in MS66 with ease. Plus-graded coins with CAC approval, however, are very scarce. Largely brilliant centers turn to mottled shades of russet and olive at the rims. Liberty's portrait is remarkable for its lack of abrasions. A frosty, well-defined type representative. NGC ID# 257C, PCGS# 7357

5846 1922 MS66+ NGC. CAC. An impressively preserved second-year Peace dollar with smooth silver-white luster and pleasing detail. Modest patina is noted at the upper obverse. NGC has graded just 36 pieces as MS67 or better (6/15). NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, Frosty MS67
Superb Type Coin**

5847 1922 MS67 PCGS. The 1922 has a reputation as being one of the most plentiful issues in the Peace dollar series, a favorite among type collectors. This is a conditionally rare Superb Gem example, tied with 25 others as the finest at PCGS (7/15). The strike is bold and the intensely frosted surfaces show traces of pale champagne toning to attest to their originality. Eye appeal is incredible. NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, MS67
Tied for Finest Certified**

5848 1922 MS67 PCGS. A thin coating of golden-tan patina embraces near-pristine surfaces. Liberty's hair and diadem, and the eagle's feathers are crisply impressed, while IN GOD, ONE, and DOLLAR are a tad soft. A die crack travels from the top of the 1 through the truncation of the bust to the T in TRUST. A perfect coin for type or Registry purposes. Population: 26 in 67, 0 finer (7/15). NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, Untoned MS67
Blatant Cartwheel Luster**

5849 1922 MS67 PCGS Secure. Ex: MJB. The cartwheel luster on this Superb Gem Peace dollar is far more radiant and blatant than normally seen on examples of this type. The satiny surfaces are untoned, save for a light dusting of gold patina more prominent on the reverse. The devices are quite sharp throughout both sides. A great type coin or Registry Set entry. Population: 26 in 67, 0 finer (7/15). From The DeMicco Family Collection. NGC ID# 257C, PCGS# 7357

5850 1922-D MS66 PCGS. This untoned Premium Gem shows fulsome cartwheel luster that would not be out of place on many Morgan dollars. Light golden-gray patina is scarcely perceptible without a loupe, and the surfaces are uniformly well-preserved. NGC ID# 257D, PCGS# 7358

5851 1922-S MS65 PCGS. An interesting bicolor Gem, this piece shows a dusky golden band in the centers of each side with bright ice-white nearer the top and bottom rims — unusual but beautiful. Satin luster completes the broad eye appeal, and the surfaces are nicely preserved despite a couple of marks on Liberty's mouth and neck. PCGS reports only seven submissions in the MS66 grade level (7/15). NGC ID# 257E, PCGS# 7359

**1922-S Dollar, MS65+
Frosty and Pleasingly Toned**

- 5852 1922-S MS65+ PCGS.** A ring of copper-orange patina encircles lighter interior surfaces that are overlaid in delicate champagne-gold toning. Frosty S-mint luster issues from each side of this Gem Peace dollar, illuminating typically struck devices. Bagmarks are usually a problem for the 1922-S, but not for this coin. Only 4% of MS65 representatives at PCGS have been awarded a Plus designation, and just seven submissions are rated higher at that service (7/15) NGC ID# 257E, PCGS# 7359

**1922-S Peace Dollar, Untoned MS65+
Sharp Strike and Great Luster**

- 5853 1922-S MS65+ PCGS.** Effulgent cartwheel luster rolls around each side of this untuned and brilliant Peace dollar, one that amply deserves its Superb Gem grade. The devices front and back are free of all but tiny, undistracting ticks, and the sharp is well-impressed throughout. Population: 16 in 65+, 7 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257E, PCGS# 7359

**1923 Dollar, MS67
None Certified Finer**

- 5854 1923 MS67 PCGS.** It is unsurprising that given a mintage of 30 million coins, most of which remained in storage as currency reserves, the 1923 Peace dollar is obtainable even in this lofty grade. However, those looking for a finer example in MS68 will be disappointed, as none have been certified at that level by either service. Frosty luster cartwheels over the brilliant surfaces of this top-graded Superb Gem. Well-struck and nearly unmarked. Population: 58 in 67, 0 finer (7/15). NGC ID# 257F, PCGS# 7360

1923 Peace Dollar, Pristine MS67

- 5855 1923 MS67 PCGS Secure.** Ex: MBJ. Strong cartwheel luster is the calling card of this nicely preserved 1923 Peace dollar, a Superb Gem with a bold strike on satiny surfaces and minimal abrasions on either side. A light cast of gold on both sides adds to the eye appeal. Despite the enormous mintage of more than 30 million coins, only a few dozen meet the strict requirements for an MS67 grade. Population: 58 in 67, 0 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257F, PCGS# 7360

**1923-D Dollar, MS66
Only a Single Coin Certified Finer**

- 5856 1923-D MS66 PCGS.** Ex: Jack Lee 2. The 1923-D mainly sat in storage vaults until distribution began in the late 1930s. Dispersal continued through the 1950s, when the inventory ran out. Today the 1923-D can be found through Gem condition, but examples are very scarcely seen in MS66. Only a single coin is certified in MS67 between the two leading grading services. This brilliant Premium Gem is much better struck than the typical survivor with minor softness confined to the centers. A couple of small marks on the eagle's wing limit the grade. Population: 94 in 66 (3 in 66+), 1 finer (7/15). NGC ID# 257G, PCGS# 7361

1923-D Peace Dollar, Sharp MS66

- 5857 1923-D MS66 PCGS.** Ex: MBJ. The 1923-D Peace dollar is quite common in circulated grades, but Gems, or Premium Gems such as the present piece, are quite another story, despite the mintage exceeding 6.8 million coins. This coin boasts a fairly sharp strike through the centers, although a few light ticks appear on the high points, and some tiny dark areas on Liberty's neck. The die crack through Liberty's neck is a common occurrence on the issue. Population: 94 in 66 (3 in 66+), 1 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257G, PCGS# 7361

1923-S Peace Dollar
Scarce, Brilliant-Gem Example

5858 1923-S MS65 PCGS. Brilliant frosty luster and a strong strike on the central motifs far exceed the norm for this quality-challenged San Francisco date. The textured surfaces capture and hold the mint bloom for great eye appeal. Numerous die cracks traverse both sides and minor scuffs on and near the portrait are noted, yet few examples of the issue can equal this coin for visual impact and desirability. PCGS has graded just three examples in a numerically finer grade (6/15). NGC ID# 257H, PCGS# 7362

1923-S Peace Dollar, MS65
Condition Rarity in Finer Grades

5859 1923-S MS65 PCGS. The 1923-S Peace dollar is a scarce issue in MS65 condition and a prime condition rarity in finer grades. This impressive Gem exhibits well-detailed design elements and well-preserved lustrous surfaces with a few hints of lavender-gray and amber toning. PCGS has graded three numerically finer examples (7/15). NGC ID# 257H, PCGS# 7362

1923-S Peace Dollar, MS65
Essentially Unobtainable Any Finer

5860 1923-S MS65 PCGS. The San Francisco Mint struck a copious production of over 19 million Peace dollars in 1923. The typical example grades MS62 to MS64 with myriad bagmarks and a soft strike. In Gem condition, the 1923-S becomes a very scarce date, especially with well-struck motifs. This Gem has lightly toned but mostly brilliant surfaces with minimal bagmarks scattered over each side. The strike shows a touch of softness at the centers, but the peripheries and legends are boldly impressed. PCGS has only seen three finer submissions (7/15). NGC ID# 257H, PCGS# 7362

1923-S Dollar, Conditionally Rare MS65

5861 1923-S MS65 PCGS Secure. Ex: MBJ. Due to overall poor strikes, bagmarks, and usually lackluster surfaces, the 1923-S Peace dollar is one that is seldom found in Gem or finer grades, where it is quite elusive. Lower-Mint State examples, showing some of the problems cited, however, are quite common. This piece is a happy exception, showing brilliant cartwheel luster, a decent strike, and minimal marks, mostly on Liberty's neck, although a few show on the eagle's breast as well. This piece ranks far above average for the issue. A circular die crack covers much of the obverse periphery, and radial die-polishing marks appear on the obverse as well, accentuating the curious appearance. PCGS reports only three examples in higher grades — two in MS66, one in MS67 (7/15).
From The DeMicco Family Collection. NGC ID# 257H, PCGS# 7362

1924 Peace Dollar, MS67
Fulsome Satin Luster

5862 1924 MS67 PCGS. Fulsome satin luster creates a cartwheel effect on this stunning, lightly toned Superb Gem Peace dollar, showing a slight golden cast. The surfaces are almost completely free of mentionable marks, save for a couple of small luster grazes on Liberty's neck and two small ticks at the rear midsection of the eagle. Certified in a green-label holder. Population: 29 in 67, 1 finer (7/15). NGC ID# 257J, PCGS# 7363

1924 Peace Dollar, Appealing MS67

5863 1924 MS67 PCGS Secure. CAC. Ex: MBJ. The luster on this greenish-gold Superb Gem is of the cartwheel variety but not truly flashy, the effect apparently somewhat muted by die fatigue. The eye appeal is nonetheless quite good, and further enhanced by overall excellent preservation, save for one noticeable scrape somewhat hidden by the lower curve of the eagle's wing. Population: 29 in 67, 1 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257J, PCGS# 7363

5864 1924-S MS64 PCGS. This better-date S-mint Peace dollar shows good eye appeal on the gold-tipped silver-white surfaces that emanate generous luster throughout. Liberty's face and the eagle are nearly mark-free, but a couple of large hits show on the bust truncation. NGC ID# 257K, PCGS# 7364

5865 1924-S MS64+ PCGS. Variegated gold, green, burnt orange, and blue patina enlivens the surfaces of this better-date Peace dollar, which shows considerable luster despite the moderate color. A better-than-average strike separates this piece from most of its cohort. Population: 85 in 64+, 85 finer (7/15). NGC ID# 257K, PCGS# 7364

5866 1924-S MS64 PCGS. CAC. The frosty surfaces are fully lustrous and brilliant with a light peppering of deeper russet and gunmetal-gray tones. A well-struck coin showing only scattered minor marks. This S-mint issue is readily accessible through Choice condition, while Gems or better are very scarce. NGC ID# 257K, PCGS# 7364

1924-S Dollar, MS65 Underappreciated S-Mint Issue

5867 1924-S MS65 PCGS. The 1924-S Peace dollar was never available in any significant quantity at the Uncirculated level, and coins in high grades are apt to have a substandard strike. Consequently, the 1924-S is a legitimate, if unheralded scarcity in the series. This Gem example is particularly well-struck for the issue with pleasing, mostly brilliant surfaces that show subtle apricot accents. Population: 80 in 65 (1 in 65+), 5 finer (7/15). Ex: *Dallas Signature* (Heritage, 11/2005), lot 3747. NGC ID# 257K, PCGS# 7364

1924-S Dollar, Elusive MS65 Beautiful Color and Luster

5868 1924-S MS65 PCGS Secure. CAC. Ex: MJB. Beautiful color and generous cartwheel luster are this coin's chief attributes, far nicer than usually seen on this generally appearance-challenged issue. Pale gold, sandy-tan, and ice-blue patina complements the gorgeous luster amid few marks. The 1924-S is among the rarest Peace dollar issues in this grade, along with the 1927-S and (more elusive) 1928-S. From *The DeMicco Family Collection*. NGC ID# 257K, PCGS# 7364

1925 Peace Dollar, MS67 Superb Type Coin

5869 1925 MS67 PCGS. Although undeniably scarce at this level, the 1925 Peace dollar is nonetheless one of the most available dates in the series in Superb Gem condition, ideal for the type collector seeking exceptional quality. This MS67 coin is beautifully preserved with frosty golden-toned luster. Bold design elements further contribute to the eye appeal. Population: 99 in 67 (1 in 67+), 1 finer (6/15). NGC ID# 257L, PCGS# 7365

1925 Peace Dollar, MS67

5870 1925 MS67 NGC. An impressive Superb Gem, this 1925 Peace dollar has frosty silver luster with no toning on either side. The strike is bold and the surfaces are pristine. The 1925 was the final issue with a mintage over 10,000,000 pieces. Census: 77 in 67 (1 in 67+, 1 in 67 ★), 1 finer (7/15). NGC ID# 257L, PCGS# 7365

1925 Peace Dollar, MS67 Excellent Type Set Candidate

5871 1925 MS67 PCGS. A mintage of 10.2 million coins and widespread availability through MS66 make the 1925 a popular issue among collectors looking to assemble a high-grade type set. This Superb Gem has strong strike definition on each side. Brilliant surfaces are aglow in frosty mint luster with splashes of golden-tan hues interspersed. PCGS has seen just a single submission rated finer. NGC ID# 257L, PCGS# 7365

1925 Silver Dollar, Well-Preserved MS67

- 5872 1925 MS67 PCGS Secure.** Ex: MBJ. A light wash of gold patina, typical for the issue (and many other Peace dollar issues), lends an aura of originality to the surfaces, complementing radiant cartwheel luster and the excellent preservation evidenced by minimal marks on Liberty. The eagle shows a few minor ticks and reeding marks. Population: 99 in 67 (1 in 67+), 1 finer (7/15).
From *The DeMicco Family Collection*. NGC ID# 257L, PCGS# 7365

1925 Peace Dollar, MS67 Just One Higher-Rated Example at PCGS

- 5873 1925 MS67 PCGS. CAC.** The 1925 Peace dollar claims a prodigious mintage of more than 10 million pieces, but the issue is very scarce in MS67 condition and prohibitively rare any finer. This spectacular Superb Gem exhibits razor-sharp design elements and vibrant mint luster, all under a thin layer of attractive champagne-gold toning. PCGS lists a single higher-rated example (7/15). NGC ID# 257L, PCGS# 7365

- 5874 1925-SMS64+ PCGS. CAC.** A pleasing MS64+ Peacedollar, largely silver and bright with touches of gold and peach-rose along the rims. Shallow reed marks on Liberty's chin preclude an even finer grade.
From *The College Collection, Part Two*. NGC ID# 257M, PCGS# 7366

- 5875 1926 MS66 PCGS. VAM-3.** A virtually immaculate Premium Gem draped in light caramel-gold and powder-blue toning. Well struck and exceptional, even by the rigorous standards of the MS66 level. The 6 in the date and designer's monogram are lightly die doubled. Housed in an old green label holder. NGC ID# 257N, PCGS# 7367

- 5876 1926 MS66 PCGS Secure. CAC.** Ex: MBJ. The radiant cartwheel luster on this Premium Gem 1926 Peace dollar is uncommonly fine and flashy, an effect that would do even the finest Morgan dollar proud. Perhaps only a single small tick in the center of Liberty's cheek keeps this high-end piece from an even finer grade. A light wash of gold completes the eye appeal.
From *The DeMicco Family Collection*. NGC ID# 257N, PCGS# 7367

- 5877 1926-D MS66 PCGS.** The 1926-D Peace dollar is among the best-produced issues in the series, as this Premium Gem amply demonstrates. This boldly struck example offers cartwheel luster on untoned surfaces and top-notch preservation. NGC ID# 257P, PCGS# 7368

1926-D Peace Dollar, MS66 Flashy-White Example

- 5878 1926-D MS66 PCGS. CAC.** The curving die crack bridges Liberty's neck and connects WE and TRUST — an interesting feature of this brilliant-white Peace dollar. The surfaces are otherwise smooth and free of all but the most minor disturbances, with a few tiny nicks but no significant abrasions or contacts. The legends are sharp for the issue, as are the main motifs including Liberty's hair strands and the eagle's plumage. Flashy mint luster covers both sides. PCGS reports just 8 numerically finer coins (7/15). NGC ID# 257P, PCGS# 7368

- 5879 1926-S MS65 PCGS. CAC.** Rich violet, rose, and gold-gray hues enrich each side of this S-mint Peace dollar. Softly struck as usual on the portrait but a warmly lustrous Gem.
From *The College Collection, Part Two*. NGC ID# 257R, PCGS# 7369

- 5880 1926-S MS65+ PCGS. CAC.** This high-end Gem displays well-detailed design elements and vibrant mint luster under shades of golden-tan and amber toning. The 1926-S Peace dollar is very scarce in finer grades. NGC ID# 257R, PCGS# 7369

1926-S Peace Dollar, MS66 Intense Mint Bloom

- 5881 1926-S MS66 PCGS.** This incredibly vibrant Premium Gem is boldly struck and awash in frost-white luster. A few trivial surface grazes are almost unnoticeable amid the captivating cartwheel effect. The 1926-S is conditionally scarce as a Premium Gem and is almost unknown finer. Population: 79 in 66, 2 finer (6/15). NGC ID# 257R, PCGS# 7369

1926-S Dollar, Sharp Premium Gem

- 5882 1926-S MS66 PCGS.** Ron Guth notes that the 1926-S is "one of the only S-mint Peace dollars that can be found with a good strike," and Dave Bowers adds that "the typical piece encountered is fairly well struck." This Premium Gem is typical in that regard, with sharp definition on the motto, date, and reverse legends. Each side remains brilliant with wisps of olive-tan patina over the right obverse field and the eagle's breast. Population: 79 in 66, 2 finer (7/15). NGC ID# 257R, PCGS# 7369

1926-S Peace Dollar, Flashy MS66

- 5883 1926-S MS66 PCGS Secure. CAC.** Ex: MBJ. The 1926-S Peace dollar is an anomaly among S-mint dollar issues, interrupting a string of mediocre-looking dates with surprisingly strong eye appeal. This Premium Gem is no exception, showing flashy cartwheel luster, a bold strike on untuned, satiny surfaces, and excellent preservation. Population: 79 in 66, 2 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257R, PCGS# 7369

- 5884 1927 MS64 PCGS.** Only 848,000 Peace dollars were manufactured at Philadelphia in 1927, and the issue enjoys the second-lowest mintage in the series. This near-Gem shows specks of orange toning scattered over frosty and brilliant surfaces with a pale-blue tint. A milling mark on the cheek is the only notable flaw. NGC ID# 257S, PCGS# 7370

- 5885 1927 MS65 PCGS.** Unusually well-defined for a Peace dollar, if still a bit soft on the hair over the ear, and beautifully satiny with bright silver luster and minimal color. Housed in a green label holder. PCGS has graded just 10 pieces as MS66 or better (6/15).
Ex: Dallas Signature (Heritage, 11/2005), lot 3767. NGC ID# 257S, PCGS# 7370

- 5886 1927 MS65 NGC.** Above-average detail for this notoriously soft series and attractive silver brilliance are this Gem's greatest assets. The 1927 is very rare any finer with just three MS66 and better coins graded by NGC (6/15).
Ex: Long Beach Signature (Heritage, 9/2005), lot 6233. NGC ID# 257S, PCGS# 7370

- 5887 1927 MS65 PCGS.** Great eye appeal is the calling card of this untuned satin-lustered Gem Peace dollar, showing no mentionable high-point marks on Liberty, although small abrasions gather on the eagle. NGC ID# 257S, PCGS# 7370

1927 Silver Dollar, MS65+ Flashy Luster and Good Preservation

- 5888 1927 MS65+ PCGS.** The low-mintage issue of 848,000 1927 Peace dollars consisted of coins that are well-made overall but usually fall short of the Gem grade level. This MS65+ example is a pleasing exception, showing bold luster on silvery surfaces with a light golden cast. Minimal abrasions complete the top-notch eye appeal. Population: 7 in 65+, 10 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257S, PCGS# 7370

- 5889 1927 MS65 PCGS. CAC.** Faint crimson and gold patina covers largely brilliant surfaces throughout this impeccable Gem representative. The 1927 has a low mintage of 848,000 coins, and examples, including this coin, are typically strongly struck. PCGS reports only 10 submissions rated higher (7/15). NGC ID# 257S, PCGS# 7370

1927-D Peace Dollar, MS65 Glistening Satin Luster

- 5890 1927-D MS65 PCGS.** While the East and West Coast mints restricted silver dollar production to fewer than 900,000 coins each, the Denver Mint was busy manufacturing over 1.2 million Peace dollars in 1927. In MS65, the 1927-D is more available than the 1927-S, but scarcer than the 1927-P. This minimally patinated Gem features areas of light tan coloration over otherwise brilliant surfaces with glistening satiny luster. Abrasions are mostly well-concealed within the design elements, and PCGS reports just 10 examples in higher grades (7/15). NGC ID# 257T, PCGS# 7371

1927-D Dollar, High-End MS65+ Minimally Abraded and Attractive

5891 1927-D MS65+ PCGS Secure. Light golden patina shows throughout the well-preserved surfaces of this sharply struck 1927-D Peace dollar. The issue is generally found attractive, well-preserved, and boldly impressed, making this pleasing example typical but still thoroughly attractive. The lack of mentionable abrasions on Liberty's face and the eagle's high points, however, separates this coin from most of its cohort. Population: 8 in 65+, 10 finer (7/15). From *The DeMicco Family Collection*. NGC ID# 257T, PCGS# 7371

5892 1927-S MS64 PCGS. The 1927-S claims a relatively low mintage of 866,000 coins. Examples are available through MS64, but finer examples are very scarcely seen. Frosty surfaces glow beneath speckled gunmetal-blue, violet, and green toning on each side of this Choice S-mint Peace dollar. Typically struck without detracting bagmarks. NGC ID# 257U, PCGS# 7372

1927-S Dollar, MS65 Nearly Unobtainable in Better Condition

5893 1927-S MS65 PCGS. Of the three Peace dollar issues struck in 1927, the 1927-S is by far the most challenging to locate in Gem condition, and finer examples are virtually unknown. In fact, in MS65 "the 1927-S is one of the top several rarest varieties in the Peace dollar series," per Bowers' *Silver Dollar Encyclopedia*. This top-notch coin is frosty and brilliant with elements of gold and olive patina. The devices are well-struck, save for expected incompleteness on IN GOD. Population: 75 in 65 (1 in 65+), 2 finer (7/15). NGC ID# 257U, PCGS# 7372

1927-S Dollar, Flashy MS65

5894 1927-S MS65 PCGS Secure. CAC. Ex: MBJ. The low-mintage 1927-S Peace dollar issue saw a production of only 866,000 coins, and few Mint State examples survive with good luster, a bold strike, and well-preserved surfaces. This Gem is a happy exception on all counts, showing bold, flashy luminosity, good detail throughout, and minimal abrasions. Population: 75 in 65 (1 in 65+), 2 finer (7/15). From *The DeMicco Family Collection*. NGC ID# 257U, PCGS# 7372

5895 1928 MS64 PCGS. Both sides of this color-free near-Gem are awash with potent luster and exhibit sharply struck design elements. A few minute marks prevent Gem classification. This is a popular low-mintage date. NGC ID# 257V, PCGS# 7373

5896 1928 MS64+ PCGS. CAC. A gorgeous example of this low-mintage key date on the cusp of a considerably scarcer and pricier grade. Rich gold and pale sky-blue tints grace abundantly lustrous surfaces with just a few marks that barely prevent a full Gem designation. Ex: *FUN Signature (Heritage, 1/2012)*, lot 4493. NGC ID# 257V, PCGS# 7373

5897 1928 MS64+ PCGS. CAC. The centers of this brilliant example are a trifle indistinct, with the outer details strong. Both sides of this near-Gem are fully lustrous and untoned. The 1928 is acknowledged as the key date of the Peace dollar series, and it is difficult to find in higher Mint State grades. NGC ID# 257V, PCGS# 7373

1928 Silver Dollar, Sought-After MS65

5898 1928 MS65 PCGS. A Gem example of this highly sought-after date, this 1928 Peace dollar shows great eye appeal via its bold luster on surfaces that are nicely preserved and untoned, save for a faint blush of gold. A couple of marks show on Liberty's jaw, but her cheek is clean, and two other small marks show on the eagle. The preservation overall, however, is far better than usually seen on this date. PCGS reports only 15 in MS66 (7/15). NGC ID# 257V, PCGS# 7373

1928 Peace Dollar Scarce Gem Example

5899 1928 MS65 PCGS. CAC. The low mintage of just 360,649 pieces makes the key-date status of this Philadelphia issue a foregone conclusion, and the scarcity in high grades is confirmed by both services. This appealing Gem displays pale reddish-gold toning over softly lustrous, silver surfaces. The reverse is delightfully iridescent. Only a few light marks are visible under magnification. PCGS has certified just 15 numerically finer examples (6/15). NGC ID# 257V, PCGS# 7373

1934 Peace Dollar, Golden MS66

- 5900 1934 MS66 PCGS.** Frosty, golden luster glows over each side of this Premium Gm 1934 Peace dollar, a conditionally scarce example of a popular late-series issue. The strike is sharp and there are no obvious surface flaws. The 1934 is one of only four dates in the series with a mintage of fewer than 1 million coins. PCGS lists only three Superb Gems finer than this piece (7/15). NGC ID# 257X, PCGS# 7375

1934 Peace Dollar, Well-Preserved MS66

- 5901 1934 MS66 PCGS.** One or two stray, minor marks on Liberty's otherwise-clean cheek help to account for the grade on this nicely preserved Premium Gem Peace dollar. A light golden-gray patina encompasses both sides with warm luster and excellent eye appeal. The strike is a bit weak on some of the letters at the upper reverse. PCGS reports only three in finer grades (7/15). NGC ID# 257X, PCGS# 7375

1934 Peace Dollar, Sharp Premium Gem

- 5902 1934 MS66 PCGS Secure. CAC. Ex: MBJ.** The 1934 Philadelphia Peace dollar issue is a well-produced one, as this piece amply demonstrates. Copious cartwheel luster runs over surfaces that are untuned save for a uniform golden cast. The well-struck surfaces are devoid of mentionable distractions, as marks are minimal and distant from the device high points. PCGS reports only three in MS67 (7/15).
From The DeMicco Family Collection. NGC ID# 257X, PCGS# 7375
- 5903 1934-D MS65 PCGS. CAC. Micro D.** Lightly dappled tan-brown toning accompanies the margins of this lustrous and carefully preserved Gem. The strike is good despite minor merging at the centers. A lower mintage Denver issue. NGC ID# 257Y, PCGS# 7376

**1934-D Silver Dollar, MS66
Sharp Central Strike**

- 5904 1934-D MS66 PCGS.** Medium D. Only a trace of gold toning visits this thoroughly lustrous and crisply struck Premium Gem. The reverse field is essentially pristine, while the portrait and obverse field exhibit only delicate grazes. The date is moderately strike doubled. Population: 72 in 66 (2 in 66+), 2 finer (6/15). NGC ID# 257Y, PCGS# 7376

**1934-D Dollar, Untoned MS66
Remarkably Preserved Surfaces**

- 5905 1934-D MS66 PCGS.** Micro D. The 1934-D is moderately more challenging in high grades than the 1934-P, but the issue often plays second fiddle to the conditionally rare 1934-S. This is an all-brilliant, satiny Premium Gem with strong strike characteristics on each side and particularly bold definition on the motto. The fields and devices are remarkably clean, even for the lofty technical grade. Population: 73 in 66 (2 in 66+), 2 finer (7/15). NGC ID# 257Y, PCGS# 7376

**1934-D Dollar, MS66
Just Two Coins Finer at PCGS**

- 5906 1934-D MS66 PCGS.** Micro D. Splashes of golden-tan patina accent otherwise brilliant surfaces with gleaming satiny mint luster. The motto and date are razor-sharp, while the reverse legends show a touch of typical softness. The 1934-D is often overshadowed by the 1934-S, but it is a challenging issue in its own right in this high grade. Population: 73 in 66 (2 in 66+), 2 finer (7/15). NGC ID# 257Y, PCGS# 7376

1934-D Dollar, Flashy MS66

5907 1934-D MS66 PCGS Secure. CAC. Micro D. Ex: MBJ. The 1934-D is a well-produced but overlooked issue in the Peace dollar series, overshadowed by its more famous sibling, the 1934-S. This piece shows the typical bold luster the issue is known for, on untuned surfaces with flashy eye appeal and minimal marks. Population: 73 in 66 (2 in 66+), 2 finer (7/15). CAC reports only 15 in this grade with the green approval sticker.

From The DeMicco Family Collection. NGC ID# 257Y, PCGS# 7376

1934-S Dollar, MS64 First Generation Holder

5908 1934-S MS64 PCGS. CAC. Although the 1928 is the key to the series in circulated condition, the 1934-S is the most elusive issue at the MS64 level, approximately three times rarer than the 1928. This highly lustrous and essentially brilliant near-Gem has a nearly pristine cheek. The grade is limited solely by a pair of grazes on the right reverse field. Housed in a first generation holder.

Ex: Orlando FUN Signature (Heritage, 7/2012), lot 4501, which realized \$5,031.25. NGC ID# 257Z, PCGS# 7377

5909 1935 MS66 PCGS. The untuned silver-white surfaces are lightly coated in lovely gold on both sides of this stunning Premium Gem. Lavish mint luster of the cartwheel kind complements excellent surface preservation. PCGS has never graded an MS67 of this issue, giving this piece Registry Set potential (7/15). NGC ID# 2582, PCGS# 7378

1935 Dollar, High-End MS66+

5910 1935 MS66+ PCGS. CAC. This untuned, high-end Premium Gem sports flashy, lavish cartwheel luster on surfaces that approach MS67 quality. A mixture of frosty and brilliant areas appears on the reverse, while the obverse is frosty throughout. The surfaces are largely untuned silver-white but showing a light golden cast and a small area of tan patina between T and Y on the obverse. Population: 12 in 66+, 0 finer (7/15).

From The DeMicco Family Collection. NGC ID# 2582, PCGS# 7378

1935-S Peace Dollar, Nicely Preserved MS66

5911 1935-S MS66 PCGS. Three Rays below ONE. One thin scrape is well-hidden in Liberty's hair, well consistent with the Premium Gem grade on this nicely preserved Peace dollar. The satiny surfaces are untuned save for a light golden cast and show considerable cartwheel effect on both sides. A higher-graded example would be difficult to find: PCGS reports only two each in MS66+ and MS67 (7/15). NGC ID# 2583, PCGS# 7379

1935-S Peace Dollar, MS66+ Top-Notch Example

5912 1935-S MS66+ PCGS Secure. CAC. Ex: MBJ. Three Rays below ONE. Flashy cartwheel luster on both sides is quite strong, with little evidence of patina other than a slight golden accent, perceptible on both sides but stronger on the reverse. The satiny surface texture is uniformly pleasing, and there are simply no mentionable marks that interrupt the smooth, untroubled appearance of this remarkably nice Peace dollar, a top-notch example of the final San Francisco issue. Population: 2 in 66+, 2 finer (7/15).

From The DeMicco Family Collection. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

5913 1972 Type One MS66 NGC. Beautifully preserved surfaces show good luster amid pale rose and blue patina on each side. President Eisenhower's face is free of major marks. A couple of larger abrasions show on the reverse. This is the common Type One reverse. The NGC Census shows only 21 submissions of all 1972 varieties in MS66, along with one attributed as Type One (7/15). None are finer. NGC ID# 2587, PCGS# 87409

1972-D Eisenhower Dollar, MS67
Delicate Toning, Tied for Finest Certified

5914 1972-D MS67 PCGS. Lovely ice-blue toning is accentuated by hints of champagne on each side of this Superb Gem Registry coin, while a thin sliver of rainbow color appears along the lower reverse rim. The strike is lacking sharpness on the eagle and the finer hair details of the obverse portrait, with a few faint roller lines (as struck) evident in its place. As one of only eight MS67 examples certified by PCGS with none finer (6/15), this coin is of great importance for Registry purposes. NGC ID# 2588, PCGS# 7410

5915 1972-D MS67 NGC. Incredible preservation is the hallmark of this stunning Superb Gem, showing surfaces that are virtually free of abrasions throughout both sides. A lack of any toning further emphasizes its pristine state. One of the five top-graded examples at NGC (7/15). NGC ID# 2588, PCGS# 7410

5916 1972-D MS67 NGC. Registry Set competitors will want to pay attention when this Superb Gem crosses the auction block. NGC has certified only five examples in this lofty grade, and none numerically finer (7/15). Nickel-gray surfaces yield a faint golden hue amid vibrant cartwheel luster. No significant abrasions are present, delivering pronounced visual appeal. NGC ID# 2588, PCGS# 7410

5917 1973-D MS67 NGC. A fine-looking and stunningly preserved example of the 1973-D Ike dollar, issued along with the 1973-P only in mint sets; none were made for circulation. This Superb Gem shows a light golden wash on surfaces that are extremely lustrous and nearly mark-free. This piece is one of only two in this grade at NGC and 11 at PCGS (7/15). NGC ID# 258B, PCGS# 7413

5918 1976-D Type One MS67 NGC. The 1776-1976 Bicentennial Ike dollars with the low-relief, bold lettering on the reverse known as Type One are among the keys the complete set. This 1976-D example in MS67 shows intense luster and great eye appeal on golden-toned surfaces free of mentionable defects. Census: 7 in 67, 0 finer (7/15). NGC ID# 258J, PCGS# 7420

PROOF EISENHOWER DOLLARS

1972-S Silver Eisenhower Dollar
PR70 Deep Cameo

5919 1972-S Silver PR70 Deep Cameo PCGS. Few examples of this popular silver proof are certified at the perfect PR70 Deep Cameo grade level, but this outstanding coin is among them. An ideal Registry Set contender, this piece is razor-sharp and starkly contrasted, with just a touch of light golden toning over each side. Population: 70 in 70 Deep Cameo, (7/15). NGC ID# 258T, PCGS# 97429

1973-S Clad Eisenhower Dollar
Pristine PR70 Deep Cameo

5920 1973-S Clad PR70 Deep Cameo PCGS. Both the 1973-S and 1974-S clad and 40% silver issues are elusive and seemingly rare in unsurpassable proof condition. Just 16 such pieces are reported by PCGS, one of which is this gleaming example. Nicely contrasted raised elements are suspended over glassy-black fields, which are entirely untuned save for a faint gold dot in the left obverse field. Unimprovable technical quality. Population: 16 in 70 Deep Cameo, (7/15). NGC ID# 282A, PCGS# 97430

1973-S Silver Eisenhower Dollar
PR70 Deep Cameo

5921 1973-S Silver, Doubled Die Obverse, FS-101, PR70 Deep Cameo PCGS. The die doubling is minimal, but is evident on the motto IN GOD WE TRUST. This piece is one of only 18 silver 1973-S proof Eisenhower dollars awarded a perfect PR70 Deep Cameo grade at PCGS; no Ultra Cameos have been graded this high by NGC (6/15). The strike is bold and the devices are starkly contrasted against the mirrored fields. A brilliant, eye-catching Registry coin. PCGS# 396480 Base PCGS# 97431

5922 1974-S Silver PR70 Deep Cameo PCGS. By definition for the grade, this is a perfect proof Eisenhower dollar that was struck in 40% silver. Both sides are fully brilliant and untuned with black-and-white contrast between the fields and devices. Population: 30 in 70 Deep Cameo (7/15). NGC ID# 258V, PCGS# 97433 Base PCGS# 999138

1978-S Eisenhower Dollar, PR70 Deep Cameo

5923 1978-S PR70 Deep Cameo PCGS. PCGS reports only 67 1978-S Eisenhower dollars in PR70 Deep Cameo, while NGC lists just four coins in this grade (6/15). This Registry Set contender is fully rendered, with bold field-device contrast and pristine mirrors. Traces of light golden toning accentuate the eye appeal. NGC ID# 282D, PCGS# 97438

End of Session Four

The David Cassel Collection of U.S. Pattern Postage Currency Coins and Related Items

As part of Heritage's presentation of the broader David Cassel Collection, it is our pleasure to present a special section for The David Cassel Collection of United States Pattern Postage Currency Coins and related items.

Midway through his career collecting patterns, an unexpected discovery changed Mr. Cassel's numismatic focus. At a 1994 auction, he was intrigued by three Postage Currency ten cent coins: one PCGS certified as Judd-325 (Plain Edge, silver alloy), another as Judd-326 (pure copper, reeded edge), plus Judd-326a (billion, plain edge, which is predominantly copper with less than 50% silver content). After acquiring the coins, Cassel weighed the slabs on a precision scale and discovered that all of the coins had an identical gross weight – a result that seemed implausible based on the current Judd reference.

Intrigued, Cassel had the coins cracked out and studied using the pioneering Scanning Electron Microscopy with Energy-Dispersive X-Ray analysis (SEM-EDX). The high-tech analysis is a harmless process that does not alter a coin in any way.

To his amazement, all three coins were essentially the same composition, matching Judd-326a (billion, plain edge). At once, Cassel had a new mission: To buy and borrow as many Postage Currency ten cent coins as he could, and to study them and make conclusions about their compositions and characteristics.

Today, Mr. Cassel is known for acquiring a comprehensive set of the United States Postage Currency ten cent pattern coins of 1863, as well as the related issues dated 1868 and 1869. Analyzing a core group of 70 coins using SEM-EDX, he was able to show metallurgical differences in some coins that would lead to changes in the Judd reference as well as refinements in the grading service numbering systems. He also identified several coins that needing attribution changes by the major grading services.

The discoveries confirm that not all Judd-325 (silver alloy) coins are run-of-the-mill Judd-325 examples. Two R.8 examples of Judd-325 were discovered to be nearly pure silver weighing 38 grains each, and not the more-common variety that was predominantly silver but weighed only 22 grains.

Interesting conclusions were drawn from some of the data. The two 38-grain examples were possibly *pièces de caprice*, coins produced for the clandestine purpose of enriching the owner for their rarity. The coins had an intrinsic value of more than ten cents when the Mint was tasked with producing a ten cent coin that would cost the Mint less than ten cents to produce.

Other interesting varieties were discovered in the series including a Judd-326 (pure copper) coin and the Judd-326A variety (billion or mostly copper coins). The Judd-326 consists of a unique 36-grain pure copper example with a reeded edge, and two rare examples of a lightweight plain edge variety, each weighing approximately 20 grains. Several more-common examples of Judd-326A (billion) exist in a tight range of 24 to 25 grains.

In 2000, Mr. Cassel published a limited edition book chronicling his work. Seven years later he improved and revised his book, publishing just 30 limited-edition volumes. Entitled *United States Pattern Postage Currency Coins*, a pair of two-volume sets (numbered 29 and 30) was set aside to be offered along with the Cassel pattern collection in this sale. The Postage Currency coins offered here are featured in those books, including the coin's elemental analysis and provenance where known.

THE DAVID CASSEL COLLECTION OF
U.S. PATTERN POSTAGE CURRENCY
COINS AND RELATED ITEMS

1863 Postage Currency Pattern in Silver, PR63
Judd-325, Two Planchet Cracks
Only One Other Piece Known With Such Cracks

- 5924 1863 Ten Cents, Judd-325, Pollock-390, Cassel-9, R.8, PR63 PCGS. 20.0 grains. The obverse design features the heraldic shield with arrows, inside an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY above, and ACT JULY 1862 below. SEM-EDX tested by S&N Labs on certificate number 60482.63/2671752 as struck in 94.2% silver and 5.8% copper with a plain edge. In addition to the customary die cracks found on coins of this type, this piece exhibits a planchet crack. This test piece (and one other) were likely struck on one of the Mint's steam-powered presses. When one considers the Postage Currency planchets were only half as thick as a regular dime, the extreme pressure yielded a predictable result, planchet cracks. Later the steam press was abandoned for striking these thin coins and the old screw press was used. This example shows two cracks in the planchet, not immediately recognizable as such but close examination confirms the cracks at 10 o'clock on the obverse and 8 o'clock on the reverse are definite cracks in the planchet. The surfaces are pleasing for the grade with pronounced die striations in the fields and bright mirroring on each side. The surfaces are lightly toned and there are two small spots that are useful pedigree identifiers: one at the top of the vertical shield stripes and on the reverse a faint spot within the 0 in the denomination.
Ex: Rossi and Wilson Collections (Bowers and Merena, 5/1997), lot 2010.
From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern in Silver
Judd-325, PR64
Possible Presentation Piece to Salmon Chase

- 5925 1863 Ten Cents, Judd-325, Pollock-390, Cassel-7, R.8, PR64 PCGS. 19.9 grains. The standard Postage Currency designs are seen on each side. Struck in 88% silver, 12% copper with a plain. Elemental analysis was done on this piece by S&N Labs and Certificate Number 04650163 confirming the less-than-coin silver content of this piece. The three Postage Currency patterns of 1863 differ by weight and thickness. Two types are on thin planchets and either weigh 20 grains or 22 grains. The thick planchet pieces (likely fantasy pieces) weigh 38 grains. Only two 20-grain examples (excluding the cracked planchet coins, Cassel-9, and the Bowers and Merena-Silverman coin are known), and both are in this collection. David Cassel believes these 20-grain pieces to have been struck by J.R. Eckfeldt and William E. DuBois and presented to Treasury Secretary Salmon P. Chase by James Pollock. The standard silver striking that weighed 20 grains was valued at 5.21 cents according to handwritten documentation that existed at one time, was photocopied, recorded, and is now lost. The 20-grain pieces are approximately 15 times rarer than their 22.5-grain counterparts. The fields show evidence of strong die polishing and there is no loss of mirroring with the light layer of golden toning seen over each side.
Ex: Long Beach and Cherry Hill Collections (NERCA, 6/1981), lot 961; L.S. Ruder Collection (Stack's, 9/1981), lot 978; Milton R. Friedberg to Auction '90 (Superior's session, 8/1990), lot 1409; David Cassel.
From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern, 97.82% Silver
Judd-325, Richly Toned PR64

5926 1863 Ten Cents, Judd-325, Pollock-390, Cassel-58, Low R.6, PR64 PCGS. 22.2 grains. This is the standard Postage Currency design. Here it is struck in 97.28% silver and 2.72% copper, with a plain edge, as verified by SEM-EDX testing by QC Metallurgical on certificate number 60482.64/21873034. According to the Chapman brothers in their 1903 Eavenson Collection, the Mint struck 43 Postage Currency patterns in May 1863. These are the most frequently encountered pieces in the Postage Currency series and most often used for type purposes. This example displays rich olive and rose toning over each side with remarkably deep mirrors that enliven the patina when the piece is rotated beneath a light.

Ten Postage Currency patterns were presented to Salmon P. Chase in 1863, and all were in original wrappers until recently. The original wrappers are now thought to be lost, but photos of them survive. It is possible to see diagnostic markings and correlate the coin with the photo taken of these presentation pieces. This example is one of the 22-grain presentation pieces, provable by comparison to these photographs (the photo negatives were originally owned by Milton Friedberg and later given to David Cassel). These photos of the wrappers and coins are reproduced on three pages in the first edition and three pages in the second edition of Cassel's Postage Currency references.

Ex: Long Beach & Cherry Hill Auctions (NERCA, 6/1981), lot 962; Auction '90 (Superior's session, 8/1990), lot 1410; Larry Shepherd Collection / Superior (8/1991), lot 910; Superior (2/2001), lot 5122; TAGZ FPL; to David Cassel.

From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Ten Cents in Silver
Judd-325, PR64, 2.6% Iron Alloy
Second Possible Presentation Piece

5927 1863 Ten Cents, Judd-325, Pollock-390, Cassel-25, R.8, PR64 PCGS. 20.17 grains. *Ex: Bass.* The standard Postage Currency obverse and reverse designs, but this lightweight example is struck in an unusual alloy of 94.5% silver, 2.9% copper, and 2.6% iron, with a plain edge, as verified by SEM-EDX testing conducted by QC Metallurgical on certificate number 60482.64/5501080. Only two 20-grain patterns were presented to Treasury Secretary Salmon Chase — who requested they be struck — and then rejected them. This is believed to be the second of the two lightweight pieces struck for presentation for him. What is most curious is the 2.6% iron alloy. According to series specialist David Cassel: "This coin was produced to test if some iron replacing an equal amount of copper would strengthen this thin, fragile coin. This is the only tested silver J-325 coin that has iron." Each side is richly toned in shades of golden-rose and sky-blue with strong underlying mirrors. Numerous lint marks were struck into the surfaces, especially the reverse.

Ex: Numismatics, Ltd. to Harry Bass (8/12/1974); Bass I (Bowers and Merena, 5/1999), lot 1080; to David Cassel.

From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern, 96% Silver
Judd-325, PR63
One of Only Two Heavy-Weight Coins Known

5928 1863 Ten Cents, Judd-325, Pollock-390, Cassel-10, R.8, PR63 PCGS. 38.3 grains. The obverse design features the heraldic shield with arrows, inside an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY above, and ACT JULY 1862 below. Struck in 96% silver / 4% copper alloy. This pattern is also known in coin silver as well as 88% silver / 12% copper alloy. Plain edge. While R.5 as a Judd-325 only one other heavier weight piece is known, making this piece R.8 in this weight category and thicker planchet type. This pattern had an intrinsic value of approximately twelve cents when it was produced. This was at a time when the Mint was charged with producing a dime worth considerably less than its intrinsic value. As such, this may be classified as a *pièce de caprice* or fantasy coin. According to David Cassel it might arguably be a rarity made for the enrichment of someone in the Mint.

There are three types of Judd-325 ten cent patterns. The first two types (both thin planchet) weigh 20 and 22.5 grains and were struck in 1863. This third type weighs 38.3 grains (thick planchet). It is identifiable as an early strike from the planchet flaw through the 0 in 10 on the reverse, a common characteristic on both of these heavier weight Judd-325 patterns. SEM-EDX testing was done by S&N Labs for PCGS to determine the metallic composition. Certificate #04646240 states this piece is 96% silver, 4% copper. The fields show evidence of heavy die polishing (and subsequent deep mirroring). Each side is mostly brilliant, and there is an immediately identifying check-like scratch at the top of the reverse.

Ex: ANA Auction (Superior, 8/1975), lot 1229; to Julian Leidman; privately to Milton R. Friedberg, prior to September 26, 1987; Milton R. Friedberg Collection (C.A.A., 1/1997), lot 1120; to David Cassel. From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern in Silver
Judd-325, PR64
38.5-Grain Planchet, 12 Cents Intrinsic Value

5929 1863 Ten Cents, Judd-325, Pollock-390, Cassel-69, R.8, PR64 PCGS. 38.5 grains. Both sides show the usual Postage Currency design. SEM-EDX tested by QC Metallurgical on certificate number 60482.64/13189787, and confirmed to be struck in coin silver (90% silver / 10% copper) with a plain edge. Like the other heavier weight example in this collection (the only two 38-grain examples known), this piece contains the normal amount of silver for a dime, and may have in fact been have been struck on an actual production dime planchet. This is an especially curious development as the Postage Currency series, along with encased postage and other coinage alternatives produced during the Civil War, were tokens produced of fractional value to actual Federal coinage. The thicker planchet and larger intrinsic value point to these two pieces being produced as fantasy pieces, or *pièces de caprice*. The mirrored fields flash brightly through the light layer of reddish-golden toning that covers each side.

Ex: Numismatic Gallery (11/1955), lot 566; Harold Bareford Collection (Stack's, 10/1981), lot 285; Baron Von Stetten-Buchenbach (Bowers and Merena, 11/1986), lot 775; to Doug Hales privately; to Tom O'Mara in 1999; Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16145; to David Cassel. From The David Cassel Collection. PCGS# 60482

**1863 Postage Currency Ten Cents Pattern
PR65 Red and Brown
Judd-326, Pure Copper Striking
Only Two Examples Privately Owned**

- 5930** 1863 Ten Cents, Judd-326, Pollock-395, Cassel-13, R.8, PR64 Red and Brown NGC. 36.0 grains. This is the standard Postage Currency design. The Judd-326 is struck in pure copper and has a reeded edge. Previously believed to be struck in billon (copper and silver). Only three other examples are known of this pattern. The others are in the Byron Reed Collection in Omaha, Connecticut State Library, and the 35-grain Bass Collection (offered by us in our August 2014 ANA sale). These pieces have tested as either pure copper (in the case of this piece) or nearly pure copper with negligible amounts of iron and lead (in the case of the Byron Reed piece). It appears only two heavy (35-36-grain) pieces are known. S&N Labs tested this piece in 1997 (while it was still in a PCGS holder) and its certificate number 04646243 stated it was 100% copper. This may well be the only pure copper example known in this heavier weight subset for the Judd-326. The fields are bright and shine forcefully through the blue-yellow patina that is intermixed with original red.
Ex: Quality Sales (6/1970), lot 1285; Isadore Herman Collection (Lester Merkin, 9/1974), lot 221; Milton Friedberg Collection (C.A.A., 1/1997), lot 1123.
From The David Cassel Collection. PCGS# 535038

**1863 Postage Currency Ten Cents in Billon
Judd-326A, PR64, 90.6% Copper / 9.4% Silver
Ex: Gschwend / Friedberg**

- 5931** 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-11, High R.6, PR64 PCGS. 24.7 grains. The obverse features the usual heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in billon with a plain edge. Among the numerous coins tested by SEM-EDX analysis, David Cassel found the composition varied from a low of 9.4% silver, 90.6% copper (this piece) to a high of 39.2% silver, 60.8% copper. This example was tested by S&N Labs on certificate number 60485.64/4646241. As with most billon coins, they are easily confused with copper or bronze, and as a result their pedigrees are problematic prior to the advent of metallurgical testing. However, David Cassel has traced this piece back to 1908 with a high degree of confidence. Nevertheless, this piece does look like a copper or bronze pattern with its deep brown surfaces. Slight blue patina can be seen on each side in addition to spots on the obverse (that we are not convinced are carbon). Fully struck throughout.
Ex: Peter Gschwend Collection (Thomas Elder, 6/1908), lot 218 (as brass); George H. Blake; ANA Auction (Stack's, 8/1971), lot 381; to Milton R. Friedberg; Milton R. Friedberg Collection (C.A.A., 1/1997), lot 1121; ANA Auction (C.A.A., 7-8/1997), lot 7262; to David Cassel.
From The David Cassel Collection. PCGS# 60485

1863 Postage Currency Ten Cents in Billon
Judd-326A, PR64
Struck From Uncracked Dies

5932 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-3, High R.6, PR64 PCGS. 24.8 grains. The usual obverse design that features the Federal shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse contains the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in billon with a plain edge. These interesting Civil War patterns were struck clandestinely to reduce the weight of dimes and thus produce a “token” silver coinage for use during the war. SEM-EDX testing by S&N Labs on certificate number 60485.64/9460714 revealed this piece was composed of 84% copper and 16% silver. Perhaps the most significant aspect of this piece is the lack of die cracking, indicating its first-strike status. Like other billon pieces in this collection the surfaces show deep blue-green patina with a trace of red around the reverse margin. Fully struck, spot-free, the only pedigree identifier we see is a shallow planchet flake out of the reverse to the right of the 0 in the denomination.

In pattern production, the Mint greatly abbreviated the usual process of die production. Normally, a galvano was placed on a reducing lathe, a hub was cut, and then sunk into a die blank. The stars, lettering, dentils were then added. Once it was hardened, a working hub was raised that could be used to produce working dies. But with patterns, where production runs were usually no more than a couple of dozen pieces, that process was greatly reduced. A die would be directly made for a pattern, and if more pieces were needed a hub could be created from the die. A new die could then be fashioned from the existing hub. (Thus, the argument could be made that most patterns were struck from a master die.) The fact is, no hub was ever created for the Postage Currency patterns. Not long after this coin was struck, the only existing obverse and reverse dies suffered cracks. As the cracks advanced, the resulting coins showed larger and more progressive cracks. Die crack progression is how we can demonstrate the order of striking of these coins. It is more than likely that a Mint employee created the rare early die state pieces, showing only minor cracking, before striking the coins that were authorized in silver, aluminum, and tin.

From The David Cassel Collection. PCGS# 60485

1863 Postage Currency Pattern in Billon
Judd-326A, PR64, 81% Copper / 19% Silver

5933 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-1, High R.6, PR64 PCGS. 24.8 grains. Another Postage Currency pattern from 1863, struck in billon and with a plain edge. While these billon pieces seem numerous, they are, in fact, individual compositions. This particular piece contains 81% copper and 19% silver, reasonably close to the 75 / 25 composition expected for billon coinage. This example was originally purchased by David Cassel as a silver Judd-325. With SEM-EDX testing conducted by S&N Labs on certificate number 60485.64/4137217 it turned out to be a much scarcer billon striking. Examination of the piece shows how one could be easily confused. The surfaces show a confirmed brightness, in part from the proof finish but in part also from the silver content. Otherwise each side displays an "autumn leaves" display of toning. Fully struck, of course.

*Ex: Superior (5/1994), lot 1175, as a Judd-325; to David Cassel.
From The David Cassel Collection. PCGS# 60485*

1863 Postage Currency Ten Cents in Billon
Judd-326A, PR64

5934 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-66, High R.6, PR64 PCGS. 24.9 grains. The normal Postage Currency pattern on obverse and reverse. However, here it is struck in billon, consisting of 60.8% copper and 39.20% silver, with a plain edge. David Cassel succinctly and accurately sums up the past (mis) understanding of the various Judd-326 variants when he wrote: "This category is totally screwy." To see just how screwy, read the four pages in his reference that deals with these pieces.

The best way to understand this pattern is to break down 326A as billon pieces and 326B as pure copper strikings. Billon is a difficult alloy to identify since it has such a high percentage of copper, and unsurprisingly such pieces have been cataloged in the past as copper. Fortunately SEM-EDX testing has clarified the status of most known examples (this piece was tested on certificate number 60485.64/13189496. The surfaces display deep purple-blue patina with significant brightness, which we assume must come from the 39.20% silver alloy. Just the tiniest flecks of carbon can be seen in the right obverse field, preventing an even higher grade.

*Ex: Milton Friedberg to Doug Hales to Tom O'Mara (all by private treaty); Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16146; to David Cassel.
From The David Cassel Collection. PCGS# 60485*

1863 Postage Currency Pattern, PR65
Judd-326A, Billon With a Trace of Iron
Ex: Bass

1863 Billon Postage Currency Pattern
Judd-326A, Nearly Spot-Free PR65

5935 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-27, High R.6, PR65 PCGS. 24.5 grains. Ex: Bass. The obverse features the heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in billon with a plain edge. This piece was originally thought to have a tin / copper alloy, and it was attributed as a Judd-330. However, SEM-EDX metallurgical testing conducted by QC Metallurgical on certificate number 60485.65/5500638 showed the composition to be 76% copper, 20.2% silver, and 3.2% iron. It was then correctly attributed as a Judd-326a as this is a billon composition. This example may well be the only Judd-326a with iron in the coin's alloy. The billon composition gives the coin an unusual hybrid appearance. It certainly doesn't look like silver, nor does it have a confirmed copper appearance. We have to wonder if these billon pieces may have had a more silvery appearance 152 years ago, enough that they would have been accepted in the channels of commerce. The surfaces are toned moss green with occasional hints of rose. The fields are brightly reflective and the strike details are complete throughout. A few tiny spots can be made out on the obverse, many more are seen on the reverse.
Ex: Numismatics Ltd. (8/12/1974); Harry Bass; Bass I (Bowers and Merena, 5/1999), lot 1083; David Cassel.
From The David Cassel Collection. PCGS# 60485

5936 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-6, High R.6, PR65 PCGS. 24.7 grains. Standard Postage Currency obverse and reverse designs. Struck in billon with a plain edge. This beautiful Gem proof was SEM-EDX tested by S&N Labs on certificate number 60485.65/2412871 and the metallurgical results were: 83.3% copper and 16.2% silver. Like the other PR65 (the 24.5 grains-piece), this example has rich moss green patina over each side with faint traces of rose. The common color of these two pieces makes us wonder if patterns with this percentage of copper / silver alloy naturally take on this particular color scheme. We are even more convinced this may be the case since both pieces came from such diverse sources. This piece is nearly spot-free and the strike is complete on each side.
Purchased from Donald Kagin.

1863 Postage Currency Ten Cents
PR64 Red and Brown
Judd-326B, Pure Copper, Plain Edge
Possibly Unique

5937 1863 Ten Cents, Judd-326B, Pollock-396, Cassel-65, R.8, PR64 Red and Brown PCGS. 19.75 grains. This is the typical Postage Currency design. Listed as Judd-326 except it is struck in copper rather than the billon composition described by Judd. Plain edge. This piece was SEM-EDX tested by QC Metallurgical on certificate number 70515.64/21873027 and found to be pure copper. Mint records indicate only the striking of plain edge examples in billon, indicating this is a *pièce de caprice*, and incredibly rare as such. This Judd-326 version was suffixed with a "B" because it has a plain edge, unlike the Judd-326 that has a reeded edge. At 19.75 grains, its weight is also considerably different from the 36-grain Judd-326.

The surfaces are only slightly mellowed, mostly on the reverse. Bright yellow-red color is seen over much of the obverse. Another Judd-326B has been certified by PCGS, a PR64 Brown, but its present location is unknown. Assuming it does indeed exist and is correctly attributed, then this is an R.8 pattern; if not, then this piece is unique.

Ex: William W. Moore (Stack's, 3/1992), lot 1647; New York Signature (Heritage, 7/2004), lot 7896; Pre-FUN Auction (Superior, 1/2005), lot 447, where it brought \$12,650.

1863 Aluminum Postage Currency Pattern
Judd-327, PR66, Alloyed With Silicon

5938 1863 Ten Cents, Judd-327, Pollock-397, Cassel-59, High R.6, PR66 NGC. 8 grains. The obverse depicts a Union shield pierced by two arrows; a simple wreath rests above. The remainder of the design consists of token-like legends; EXCHANGED FOR U.S. NOTES on the obverse, POSTAL CURRENCY ACT JULY 1862 and 10 CENTS 1863 on the reverse. Struck in aluminum (mostly) with a plain edge. The actual composition of this pattern as determined by SEM-EDX testing (conducted by Ledoux & Company on certificate number 1285227-001 is 96.6% aluminum, 2.3% iron, 0.9% silicon, and 0.1% lead. Many aluminum and tin patterns are actually alloyed with a small amount of silicon which hardens the resultant alloy and helps preserve the surfaces. This is a remarkably bright example of aluminum coinage with no areas of oxidation present. A shallow, irregular area of planchet roughness is observed between the 1 in the date and CT of ACT. This is believed to be one of the 1863-dated presentation coins delivered to Salmon P. Chase. In 1863 aluminum was still an expensive metal. This piece had an intrinsic value of five cents, yet it weighed just a twentieth of a silver dime that was worth ten cents.

Ex: Lester Merkin to Milton R. Friedberg via private treaty in 1967; Long Beach and Cherry Hill Collection (NERCA, 6/1981), lot 963; Auction '90 (Superior's session, 8/1990), lot 1411; Larry Shepherd Collection (Superior, 8/1991), lot 914; eBay Auction (TAGZ, 12/2000); Superior (2/2001), lot 5123, to David Cassel.

1863 Postage Currency Aluminum Pattern
Judd-327, Plain Edge Striking, PR66

- 5939** 1863 Ten Cents, Judd-328 (misattributed), Pollock-398, Cassel-20, High R.6, PR66 PCGS. 8.2 grains. The obverse features the usual heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in aluminum with a plain edge. The percentage of aluminum in this alloy, as determined by S&N Labs on certificate number 60487.66/2679413, was very high at 96%, followed by 2.2% iron, and 1.6% silicon. This is an extraordinarily well-preserved pattern. The aluminum shows no signs of oxidation, and there is just the slightest hint of pale golden toning present on each side. This piece is misattributed as a Judd-328 (reeded edge). It is actually a Judd-327 (plain edge). Actually, this piece is even misattributed as a Judd-327. In earlier editions of Judd, the Judd-327 listing included aluminum Postage Currency versions in both 8 grains and pure aluminum. However, no pure aluminum pieces have been located. Judd-328 pieces weighed 11 grains, had a reeded edge, and 3% copper combined with 97% aluminum. To better cope with these impossible combinations, beginning with the eighth edition, Judd-327 encompassed all the plain edge versions; Judd-328 covered all the reeded edge pieces, and the 8 and 11 grain weights were ignored. Considering the variants of weight, purity, and edge, there eight possible combinations for just two Judd numbers: Judd-327 and Judd-328.

1863 Postage Currency Ten Cents in Aluminum
Judd-328, Unc Details
Rarely Seen Reeded Edge Variant

- 5940** 1863 Ten Cents, Judd-328, Pollock-398, Cassel-14, R.8 — **Damaged — PCGS Genuine. Unc Details.** 10.8 grains. Standard Postage Currency obverse and reverse. Struck in aluminum with a reeded edge. This rarely encountered Postage Currency issue was metallurgically examined by S&N Labs on Certificate number 635017 “Corroded” and it was found to contain 97% aluminum, 1.2% silver, and 1.6% iron. Believed to be one of only two or three reeded edge aluminum strikings extant. The surfaces are bright, most likely from cleaning, and there are numerous small to medium-sized spots of oxidation present. There is also a larger planchet lamination observed on the lower reverse (in the date area).
Ex: Stack’s MBS (11/16/1983), lot 2067; L.S. Ruder Collection (Stack’s, 9/1987), lot 983; Superior (10/1990), lot 1826; Milton R. Friedberg Collection (C.A.A., 1/1997); David Cassel.

1863 Postage Currency Pattern in Aluminum
Judd-328, PR62
Very Rare Reeded Edge Striking, PR62

- 5941** 1863 Ten Cents, Judd-328, Pollock-398, Cassel-67, R.8, PR62 PCGS. 10.9 grains. Standard Postage Currency obverse and reverse. Struck with a high percentage of aluminum with a reeded edge. The actual metallic composition of this piece as determined by SEM-EDX testing by QC Metallurgical on certificate number 60487.62/13189786 is 89.7% aluminum, 7.9% silver, 1.2% iron, and 1.2% silicon. Believed to be one of only two or three reeded edge, aluminum pieces known. Silicon is never found uncombined in nature. It is always combined with other elements, such as iron, copper, or manganese, according to the *New Columbia Encyclopedia*. While a small amount of silicon helped to harden and preserve the surfaces of this pattern, environmental conditions after a century and a half still has had an even greater influence on this coin's preservation. The other two known examples of 11-grain aluminum patterns with a reeded edge are in lower grades, and no silicon was found in either. This leads to the conclusion that the more silicon present in the aluminum alloy (as well as other base metal coins), the higher the potential grade. On this piece, each side has numerous spots of oxidation which accounts for the grade. These reeded edge, 11-grain aluminum patterns have been tested and found to contain alloys of silver, iron, silicon, and / or lead. The 11-grain, reeded edge aluminum patterns are exceptionally rare, and only three are known. (No 8-grain, reeded edge variety exists.) This aluminum Postage Currency pattern is the finest example known.
Ex: L.S. Ruder Collection (Stack's, 9/1987), lot 982; Doug Hales; Tom O'Mara; The Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16148; to David Cassel.

1863 Postage Currency Ten Cents in Aluminum
Judd-328A, 8.02-Grain Planchet, PR64

- 5942** 1863 Dime, Judd-328A, Pollock-398, Cassel-4, High R.7, PR64 PCGS. 8.02 grains. The usual obverse design that features the Federal shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse contains the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in aluminum with a plain edge. Each aluminum striking of this design varies in composition. Most likely these were struck as metallurgical trial pieces to test color, malleability, oxidation resistance, and resistance to damage in the striking process. The SEM-EDX composition of this piece as determined by S&N Labs on certificate number 70487.64/4486786 is 97.5% aluminum and 2.5% iron. This is a bright example with the often-found contrast between the fields and devices. Only a couple of spots of oxidation are seen.
Ex: Corrado Romano Estate (Stack's, 6/1987), lot 851 (as a Judd-327); L.S. Ruder Collection (Stack's, 9/1987), lot 981; Stack's (6/1994), lot 1050; David Cassel.

1863 Aluminum Postage Currency Pattern
Judd-328B, PR65
8-Grain Planchet / Plain Edge

1863 Postage Currency Ten Cents in Tin
Judd-329, PR65
Ex: Bass

5943 1863 Ten Cents, Judd-328B, Pollock-397, Cassel-8, High R.6, PR66 PCGS. 8.2 grains. The standard Postage Currency obverse and reverse designs are present on each side. Struck in aluminum with a plain edge. The SEM-EDX testing by S&N Labs on certificate number 80487.66/4624173 revealed the composition to be: 94.5% aluminum, 4.2% silicon, and 1.3% iron. The aluminum strikings of the Postage Currency patterns are found in two weight classes: 8.2 grains and 11 grains. The 328B designation is explained by PCGS' attribution of Judd-327 pieces as pure aluminum on an 11-grain planchet. Judd-328 is an alloyed aluminum eight-grain planchet with a reeded edge; therefore, Judd-328B was the PCGS choice for an alloyed 8-grain striking with a plain edge. The surfaces are remarkably preserved. There are a couple of minor planchet laminations, a common occurrence on early aluminum patterns. Otherwise, the surfaces are bright and essentially "as struck." The iron /silicon addition to the aluminum alloy appears to have been remarkably effective. We would be interested to find out if other later-dated aluminum patterns also used this as part of the aluminum alloy, or was the discovery of the combination of the strengthening property of iron and the preservation of surfaces of silicon lost on Mint personnel at the height of the Civil War?
Ex: Lester Merkin private treaty sale to Milton R. Friedberg in 1967; Long Beach & Cherry Hill Collection (NERCA, 6/1981), lot 963; Larry Shepherd Collection (Superior, 8/1991), lot 913; Superior (5-6/1993), lot 1250; David Cassel.
From The David Cassel Collection. PCGS# 80487

5944 1863 Ten Cents, Judd-329, Pollock-399, Cassel-26, Low R.6, PR65 PCGS. 21.1 grains. Ex: Bass. Standard Postage Currency obverse and reverse. Struck in tin with a plain edge. Patterns struck in tin are rare, and high-grade examples are even rarer. The composition of this piece explains a great deal about why this piece has survived in Gem condition. SEM-EDX testing conducted by QC Metallurgical on certificate number 60488.65/5500637 revealed the composition as: 96.7% tin, 2.9% iron, and 0.4% silicon. The iron would have been a natural alloy metal added to the tin to strengthen the coin's composition. But silicon was found with the iron ore. Silicon is never found in nature in a pure state. In this case it bonded with iron to produce ferro-silicon, with the result that the iron strengthened the composition and the silicon helped prevent oxidation. According to the George Eavenson Collection of 1903 (Chapman Brothers), 39 pure tin coins were struck in May 1863. The surfaces are exceptionally bright and reflective with a rippling effect in the fields. No toning is present.
Ex: Massachusetts Historical Society and Appleton Collection (Stack's, 5/1973), lot 325; Harry Bass Collection, Part I (Bowers and Merena, 5/1999), lot 1082; David Cassel.

1863 Postage Currency Ten Cents in Tin
Judd-330, PR62, Ex: Garrett
Heaviest Known, Slightly Alloyed With Lead

5945 1863 Ten Cents, Judd-330, Pollock-399, Cassel-21, Low R.6, PR62 PCGS. Ex: Garrett. The obverse depicts an ornamental shield with an inverted laurel wreath suspended from a ring. A pair of crossed arrows is behind the shield. The inscription reads EXCHANGED FOR U.S. NOTES. The reverse has 10 CENTS 1863 in the center with * POSTAGE CURRENCY * ACT JULY 1862 around the margin. Struck in almost pure tin with a plain edge. As David Cassel stated in his reference this Judd-330 piece is a "version" of a Judd-330. It is the heaviest Judd-330 known, undoubtedly because of the presence of a small amount of lead in the composition. SEM-EDX testing conducted by S&N Labs on certificate number 60489.62/2407865 indicated this piece is composed of 98% tin, 1% copper, and 1% lead. The difference between Judd-329 and 330 is weight. Both are tin compositions, either pure (329) or slightly alloyed (330). The Judd-329 coins weigh 20.5 grains, the Judd-330 pieces are heavier at 25 grains. The "variant" mentioned above is explained by the heaviness of this piece. The surfaces are muted gray-brilliant with significant brightness in the proof fields.

Ex: Mendez I. Cohen Collection (Edward Cogan, 10/1875), lot 1336; to John W. Haseltine; T. Harrison Garrett; Garrett II (Bowers and Ruddy, 3/1980), lot 1015; Auction '82 (Superior's session, 8/1982), lot 1494; Superior (5-6/1993), lot 1257; Larry Hanks private transaction to David Cassel.

1863 Postage Currency Pattern
Tin / Copper Alloy, Judd-330, PR63

5946 1863 Ten Cents, Judd-330, Pollock-399, Cassel-68, Low R.6, PR63 PCGS. 28.1 grains. Standard Postage Currency obverse and reverse designs. Struck in tin (mostly) with a plain edge. According to the Chapman Brothers in their 1903 catalog of the George Eavenson Collection, 15 tin coins that were alloyed with copper were struck in May 1863. This piece's SEM-EDX testing that was conducted by QC Metallurgical on certificate number 60489.63/13189497 showed its alloy to be 98.72% tin and 1.28% copper. The Judd reference previously (7th edition and earlier) stated these pieces contained 3% copper. However, to date none of the pieces tested have had that much copper content, and the 3% assertion has been dropped from subsequent editions. The tin surfaces are bright and virtually undiminished by toning. The strike is strong throughout and there are a number of lint marks impressed into the reverse, debris that obviously adhered to the die by static electricity after the die was wiped by the coiner.

Ex: Len Glazer to Tom O'Mara (1/3/1985); The Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16149; David Cassel.

1863 Copper-Nickel Postage Currency Ten Cents
Judd-330A, PR65
Unusual Iron and Silicon Additions to the Alloy

5947 1863 Ten Cents, Judd-330A, Pollock-401, Cassel-32, R.7, PR65 PCGS. 32.7 grains. The obverse features a heraldic shield with arrows, framed by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the peripheral inscriptions POSTAGE CURRENCY and ACT JULY 1862. Struck with a medal turn, in cupro-nickel with a reeded edge. SEM-EDX testing conducted by QC Metallurgical on certificate number 60490.65/2615814 reveals the curious alloy of this piece: 73.32% copper, 24.06% nickel, 2.57% iron, and 0.05% silicon. The composition raises two questions about the alloy of these patterns. How much harder would the iron make the already hard copper / nickel alloy? How much (or little) silicon was necessary to enhance the preservation of the surfaces? To answer the second question first, it appears very little silicon is actually needed to prevent deterioration of the alloy. The question of the addition of iron remains an open one.

There were no cupro-nickel Postage Currency listed in either the Eavenson Sale (1903) or the George H. Earle Sale (1912). It is most likely the three known (and fourth possible) copper-nickel pieces were confused with silver strikes. However, silver pieces with reeded edges never existed and have been delisted.

Only slight strike softness is noted from this hard alloy with some weakness on the venation on the leaves in the wreath noted. Each side displays reddish-lilac patina with a light gray overtone. Close examination shows only a few small spots of carbon.

Ex: L.S. Ruder Collection (Stack's, 9/1987), lot 985; Musikoff Collection (Jay Parrino FPL, 1997); The California Sale (Goldberg Auctions, 10/2000), lot 590; David Cassel.

1863 Postage Currency Ten Cents, PR64 Brown
Judd-331A, Unique Copper Striking
Ex: Davis-Brand-Boyd-Farouk

5948 1863 Ten Cents, Judd-331A, Pollock-403, Cassel-17, Unique, PR64 Brown PCGS. 38.4 grains. Regular obverse dies trial but undated, the reverse is the standard Postage Currency format. Struck in pure copper with a reeded edge. David Cassel had S&N Labs conduct SEM-EDX testing for PCGS on this piece in 1997. Their certificate number 104646247 confirmed this piece was pure copper. To quote Cassel from his second edition: "It is a fantasy piece created for no other reason than to create a great and valuable rarity." Later he speculates about the creation of this piece:

"The coin was probably created by William E. DuBois, assayer and coiner at the request of Dr. Henry Linderman, later to become Direction of the U.S. Mint. Linderman and others are credited with creating some of the classic and rarest collectibles to come out of the Mint, including some incredible restrikes. It is probable that William E. DuBois had a hand in all of this as he knew every job connected with the Mint. He was employed at the U.S. Mint for more than forty years beginning in 1840."

The brown patina is thick over the surfaces, but if the piece is angled just right underlying multicolored iridescence is abundantly evident. The strike details are strong throughout and there are no obvious contact marks.

Ex: Robert Coulton Davis (New York Coin & Stamp Co., 1/1890), lot 1067; S.C. Stevens; Virgil Brand (journal entry #16857); F.C.C. Undated (1863) Postage Currency Pattern
Judd-331B, PR64, Copper-Nickel Alloy
Ex: Eliasberg

- 5949** 1863 Ten Cents, Judd-331B, Pollock-402, Cassel-5, R.7, PR64 PCGS. 33.1 grains. Ex: Eliasberg. The design is a dateless Seated Liberty obverse, paired with the Postage Currency reverse featuring 10 CENTS 1863 in the center and * POSTAGE CURRENCY * ACT JULY 1862 around the margin. Struck in copper-nickel with a reeded edge. This dateless Seated Liberty obverse was left over from 1863 and is characterized by the broken top to the first S in STATES, obviously caused by the heavy lapping required to eliminate six years of die rust that had accumulated. A few of these fantasy pieces were created by pairing the undated obverse from 1863 with the Postage Currency reverse from that same year. A faint diagonal die scratch through the field and foot of Liberty is seen to some degree on all five pieces known of this obverse/reverse pairing. SEM-EDX testing conducted by S&N Labs on certificate number 60493.64/4486785 revealed the exact composition of this piece to be 74% copper and 26% nickel. The surfaces show just the slightest hint of reddish toning with strong underlying brightness in the fields. Each side also shows (with magnification) a number of contact marks and lint marks. A couple of other obverse die scratches are also seen, an obvious effort on the coiner's part to efface die rust. Ex: Charles Morris Collection (S.H. and H. Chapman, 4/1905), lot 384; J.M. Clapp; Louis Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 5/1996), lot 193; David Cassel. From The David Cassel Collection. PCGS# 60493

Undated (1863) Postage Currency Pattern
Judd-331C, PR65
Iron and Cobalt in the Cupro-Nickel Alloy

- 5950** 1863 Ten Cents, Judd-331C, Pollock-402, Cassel-23, R.8, PR65 NGC. 31.86 grains. The design is a dateless Seated Liberty obverse, paired with the Postage Currency reverse featuring 10 CENTS 1863 in the center and * POSTAGE CURRENCY * ACT JULY 1862 around the margin. Struck in medallic alignment in copper-nickel with a reeded edge. Like the Judd-331b above, this piece shows the diagnostic angling die scratch through the foot of Liberty and the "broken" top of the first S in STATES, both characteristics of reworking of the leftover, repolished obverse from 1863. The "c" designation indicates a different copper-nickel alloy, in this case alloyed with iron and cobalt. One other such piece is known. SEM-EDX testing conducted by Ledoux & Company Certificate number 289163-019 showed the metallurgical composition of this piece as: 74.9% copper, 24.5% nickel, 0.35% iron, and 0.18% cobalt. No one has given an explanation for the presence of iron and cobalt in the copper-nickel alloy. David Cassel's only guess is that in larger percentages, iron and cobalt would make the coin magnetic. The fields are remarkably bright and mirrored, especially so for a coin with such a strong presence of nickel in the alloy. Light, streaky reddish toning is seen across each side. There are a few field marks and Mint-made lint marks, and the strike displays localized softness on the head of Liberty. Ex: Lenox Lohr / ANA Auction (Numismatic Gallery, 8/1958), lot 49; Bareford Collection (Stack's, 10/1981), lot 288; to a New England collector; appeared in a Coin World ad for JMN & Associates, 1/31/1990; to Donald Kagin and Andy Lustig; David Cassel (1998). From The David Cassel Collection. PCGS# 60491

1868 Ten Cent Pattern
Judd-641A, Bright and Flashy PR65
 Remotely Related to Postage Currency Issues

1868 Dime Pattern in Copper, PR63 Brown
Judd-642, The Only Example in Private Hands
 Ex: Woodin-Farouk

5951 1868 Ten Cents, Judd-641, Pollock-713, Cassel-30, Low R.7, PR65 NGC. 31.64 grains. The obverse is the regular issue design of the Seated Liberty dime except with no date. The reverse is similar to the regular issue Seated Liberty design with the date and a star inside the wreath. Struck in copper-nickel alloy with a reeded edge. The obverse is from the same undated, vigorously polished obverse die used to strike the undated mules that were paired with the Postage Currency reverse; thus making these pieces distantly related to the Postage Currency series. SEM-EDX testing conducted by Ledoux & Company on certificate number 581886-002 revealed the composition of this piece as: 76% copper, 23% nickel, 0.3% cobalt, 0.2% iron, and 0.1% silicon. It is David Cassel's opinion that the presence of small amounts of silicon, iron, and cobalt account for the better flash and contrast of this piece than the Friedberg, Eliasberg, or Wolfe examples. To us this seems doubtful since these elements are present in such small amounts. It seems more likely this was simply a well-produced and well-preserved pattern. The fields show the expected die polishing marks, and they are exceptionally deep in mirrored reflectivity. Additionally, the devices display significant mint frost, giving the coin considerable field-device contrast on each side. Just a hint of pale golden-rose toning is present across each side. The devices are fully struck in all areas.
 Ex: National Money Show Auction (Superior, 3/2000), lot 655; Donald Kagin and Andy Lustig; David Cassel.
 From The David Cassel Collection. PCGS# 60859

5952 1868 Ten Cents, Judd-642, Pollock-714, Cassel-39, R.8, PR63 Brown PCGS. 27.46 grains. The obverse is of the regular dies 1868 dime. The reverse, however, shares the same design as Judd-640 through 646, showing ONE DIME in the center, a six-pointed star above, the date below, and all surrounded by a wreath of cotton, corn, and tobacco. SEM-EDX tested by QC Metallurgical on certificate number 60860.63/21873030 confirmed this piece was struck in pure copper. Designated a Brown coin, the surfaces are deep brown with just the faintest glimmers of red still evident surrounding the devices. Only one other Judd-642 is known, and that piece is part of the Mitchelson Collection at the Connecticut State Library. That coin weighs 18 grains, making each piece known unique in its weight category.
 Ex: William Woodin; Hans Schulman to King Farouk; The Palace Collections of Egypt (Sotheby's, 2/1954), lot 1815; to Sol Kaplan; to Gene Wolfe; Gene Wolfe Collection / FUN Signature (Heritage, 1/2000), lot 7423; Stack's (12/2003), lot 197, uncertified, where it brought \$9800.

1868 Postage Currency Dime (Struck in 1863)

Judd-644, PR64

Ex: Garrett

5953 1868 Ten Cents, Judd-644, Pollock-716, Cassel-18, Low R.7, PR64 PCGS. 30.9 grains. Ex: Garrett. A Postage Currency related pattern, dated 1868. The obverse has a central shield with diagonal arrows behind, EXCHANGED FOR above and U.S. NOTES below. The reverse is a variant of the adopted design with the central wreath surrounding ONE DIME, a six-pointed star above and the date below. Struck in copper-nickel with a reeded edge. The metallic composition of this piece, as determined by SEM-EDX testing by S&N Labs on certificate number 60862.64/4646248, is 74% copper and 26% nickel.

The most numismatically interesting revelation about this series of patterns is when the 1868-dated pieces are compared side-by-side with those from 1863, the 1868-dated coins have less advanced die cracks. In the second edition of his reference on the Postage Currency series, David Cassel explained:

“these coins dated 1868 ... were produced in May 1863 before most of the Dies 1-A coins as *pièces de caprice* for collectors. The several I have seen do not appear to be restrikes but appear to be Mint date logo punch errors. I am not aware of any patterns that were struck five years in anticipation of the expectation of a need.”

Pronounced striking softness is noted at 2 o'clock on the obverse, affecting most of the word FOR. The obverse die was vigorously lapped and the fields are brightly reflective. The reverse shows peripheral die cracking and occasional areas of die rust. The leaves on the lower right portion of the wreath are weakly impressed also. These two areas of strike weakness are undoubtedly from the hardness of the 26% nickel alloy. Pale rose toning covers otherwise brilliant surfaces.

Ex: John Work Garrett Collection (Stack's, 3/1976), lot 602; Auction '82 (Paramount's session, 8/1982), lot 1814; Charmont Sale (Steve Ivy, 8/1983), lot 4586; Milton R. Friedberg Collection (C.A.A., 1/1997), lot 1128; David Cassel.

1868 Postage Currency Pattern in Copper
Judd-645, PR67 Brown
Thin Planchet, Probably Unique as Such

5954 1868 Ten Cents, Judd-645, Pollock-717, Cassel-28, High R.7, PR67 Brown PCGS. 28.1 grains. Ex: Bass. A rare Postage Currency related pattern, dated 1868. The obverse displays the expected central shield with diagonal arrows behind, EXCHANGED FOR above and U.S. NOTES below. The reverse is a variant of the adopted design with the central wreath surrounding ONE DIME, a six-pointed star above and the date below. Struck in copper, medallion alignment on a thin planchet, and with a plain edge. This appears to be the only thin planchet, light weight example known of this pattern. At least one thick planchet coin exists and possibly two exist at 38.6 grains. This seldom-seen 1868 Postage Currency pattern has two distinctive characteristics. The first is the previously mentioned misdated date punch used — the coin having actually been struck in 1863 — and showing a pronounced lack of die cracking seen on later 1863 strikes. Second is the curious double-struck reverse. There is approximately 5 degrees of rotation between the first and second strike, and no evidence of double striking on the obverse. SEM-EDX testing conducted by QC Metallurgical on certificate number 60863.67/5500641 showed this piece to be almost pure copper. The exact breakdown is 97.65% copper and 2.35% iron. The surfaces on this piece are nothing less than spectacular. The PR67 grade tells much more about the appearance than does the Brown designation. Each side has an inescapable deep blue patina and the deeply mirrored fields further enhance the vibrancy of the color. What is not stated on the insert is the contrast present on each side, but the fields and devices display a stark cameo effect. The surfaces are almost perfectly preserved.

1868 Dime Pattern in Copper
Judd-645, PR64 Red and Brown
Combined 2-3 Pieces Known of This Issue
Ex: Garrett

5955 1868 Ten Cents, Judd-645, Pollock-717, Cassel-60, R.8, PR64 Red and Brown PCGS. 38.7 grains. Ex: Garrett. This unusual and rare pattern shows a small shield and inverted wreath on the obverse and a legend that reads EXCHANGED FOR U.S. NOTES. The reverse is laid out in a peculiar fashion also with ONE DIME in the center, a six-pointed star above, the date below, and all surrounded by a wreath of cotton, corn, and tobacco. Struck in copper, medallic alignment, and a plain edge. Only one or two other heavy weight examples of this pattern are known. The plain edge copper strikings (now believed unique) were not included in the Adams-Woodin pattern reference in 1913, but have been included in both the Judd and Pollock references. This piece was SEM-EDX tested by QC Metallurgical on certificate number 70863.64/21873025.

The surfaces are remarkably clean and problem-free for the stated grade. Original mint red is obvious beneath the light layer of brown patina that covers each side. Fully defined throughout with significant mirroring in the fields.

Ex: Garrett Collection (Bowers and Ruddy, 3/1980), lot 1016; unknown intermediaries; Long Beach Signature (Heritage, 3/2003), lot 9075.

1868 Ten Cents Pattern
Judd-646, PR61
Unusual Aluminum / Silver Alloy

5956 1868 Ten Cents, Judd-646, Pollock-718, Cassel-29, R.7, PR61 PCGS. 11.9 grains. The obverse has an ornamental shield in the center with an inverted laurel wreath suspended from a ring. A pair of crossed arrows is behind the shield. The peripheral device reads EXCHANGED FOR U.S. NOTES. The reverse displays ONE DIME / 1868 / a six-pointed star in the center / surrounded by a cereal wreath. Struck in aluminum / silver alloy with a plain edge. SEM-EDX testing, conducted by QC Metallurgical on Certificate number 60864.61/9321628, shows this piece to be composed of 61.1% aluminum, 29.5% silver, 6.19% iron, and 3.21% copper. One can only speculate what the Mint's intention was in striking this (and the other Judd-646) in this unusual aluminum / silver alloy. David Cassel considered these two pieces fantasy products of the Mint with a value of nine cents at the time they were produced. The surfaces, undoubtedly a result of the peculiar alloy, are dull and chalky-white. The strike is strong throughout and there are numerous small, but individually insignificant spots across each side.

Ex: W.J. Crouch Collection (Superior, 6/1977), lot 297; Gene Wolfe Collection of Postage Currency Patterns / FUN Auction (Heritage, 1/2000), lot 7424; David Cassel.

From The David Cassel Collection. PCGS# 60864

1868-Dated Ten Cents Pattern
Judd-646, PR63
Unique Aluminum / Silver Alloy Composition

5957 1868 Ten Cents, Judd-646, Pollock-718, Cassel-70, R.7, PR63 PCGS. 11.6 grains. An unusual and rare pattern with a small shield and inverted wreath on the obverse and a legend that reads EXCHANGED FOR U.S. NOTES. The reverse is laid out with ONE DIME in the center, a six-pointed star above, the date below, and all surrounded by a wreath of cotton, corn, and tobacco. Struck in aluminum / silver alloy with a plain edge. As with the PR61 Judd-646 above, this piece was struck in a similarly unusual alloy. The differing compositions of each lend a unique quality to each. This piece was SEM-EDX tested by QC Metallurgical on Certificate number 60864.63/13189788, which showed the piece to be composed of 80.4% aluminum, 18.10% silver, 0.9% silicon, and 0.7% iron. In addition to the singular metallic compositions of these Judd-646 pieces, they are noteworthy for another reason. The die cracks on the obverse are less advanced than those on the aluminum Die 1-A presentation pieces. The significance being this proves these pieces were struck in May 1863, not in 1868 as the date on these pieces would lead one to believe. This example lacks the chalky color of the other Judd-646, and the fields are moderately bright. There are numerous spots of oxidation on each side, a problem seen on many aluminum patterns that were not stored properly.

Ex: *Goldberg Auctions* (5/2003), lot 593; *Stack's* (10/2003), lot 2025; *Oliver Jung Collection* (*American Numismatic Rarities*, 7/2003), lot 1018; *Medio and Henry da Costa Gomez Collections* (*Stack's / ANR*, 6/2004), lot 4685; *Richard Jewell Collection* (*American Numismatic Rarities*, 3/2005), lot 1050; *Rarities Sale* (*Bowers and Merena*, 7/2005), lot 2390; *David Cassel*.

1869 SIL. / NIC. Dime Pattern
Judd-714, PR64
Cupro-Nickel Experimental Strike

5958 1869 Ten Cents, Judd-714, Pollock-793, Cassel-22, Low R.7, PR64 PCGS. 30.9 grains. The obverse features the regular issue Liberty Seated design without the date. The reverse is inscribed SIL. 9 / NIC. 1 / 1869. Struck in cupro-nickel composition with a reeded edge. While one would naturally assume (as did Adams-Woodin and the early editions of the Judd book) that this pattern would be a metallurgical trial for a silver / nickel alloy, that has not turned out to be the case. The only pieces known of this pattern are in copper-nickel alloy. This particular piece was SEM-EDX tested by S&N Labs on certificate number 60939.64/2510321 and turned out to be 75% copper and 25% nickel. The surfaces have the "hard" look of a nickel coin with satiny mint luster and light oil-slick iridescence over each side. In spite of the high nickel content, the strike details are strongly brought up, and there are no obvious or detracting abrasions. A light streak of discoloration through the S in SIL. is noted, and is an easy pedigree identifier. Fine diagonal die striations are seen to the upper-right of the figure of Liberty, a characteristic of all patterns in this series.

Ex: *David B. Silberman, Jr. Collection* (*Bowers and Merena*, 11/1988), lot 5392; *ANA Signature Auction* (*Heritage*, 8/1998), lot 5103; *David Cassel*.
From The David Cassel Collection. PCGS# 60939

1869 Copper Ten Cent Pattern
Judd-715, PR66 Brown
SIL. / NIC. Reverse Design

- 5959** 1869 Ten Cents, Judd-715, Pollock-794, Cassel-61, Low R.7, PR66 Brown NGC. 37 grains. The obverse is similar to the regular issue, but without the date in the exergue area. The reverse has SIL. 9 / NIC. 1 / 1869 in large letters and digits. This reverse design pattern was struck in copper with a reeded edge. Of the six known examples of this copper striking, this is the finest certified. SEM-EDX testing by Ledoux & Company Certificate number 919577-011 proved it to be almost pure copper: 99.7% copper and 0.2% nickel. Curiously, the silver / nickel alloy stamped on the reverse of this piece does not appear to exist on any coins of this design. The production of this almost pure copper piece makes one wonder what was intended by Mint officials. Each side displays variegated “autumn leaves” toning that is quite deep in hue, yet the surfaces show strong underlying brightness. Pronounced die striations are easily in the upper-right of the obverse as well as the long diagonal die scratch in the lower obverse field that passes under the foot of Liberty.
Ex: Goldberg Auctions (5/2003), lot 593; David Cassel.
From The David Cassel Collection. PCGS# 60940

1869 Ten Cents Pattern, PR64
Judd-716, SIL. / NIC. / COP. Reverse

- 5960** 1869 Ten Cents, Judd-716, Pollock-795, Unlisted in Cassel, High R.6, PR64 PCGS. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. in larger letters, the date is below, smaller, and slightly curved. Allegedly struck in Koultz's alloy, a variant of German silver, with a reeded edge. SEM-EDX testing was done on this piece, but the totals only add up to 98%. The known percentages are: 35% nickel, 38% copper, and 25% silver. This piece has the appearance of a nickel coin with more subdued, satiny surfaces and minimally reflective fields. Each side displays finely variegated rose-lilac-gray patina, and there are no mentionable flaws on either side. Sharply defined throughout.
From The David Cassel Collection. PCGS# 60941

1869 'Koulz's Alloy' Dime in Silver
Judd-716A, PR63

- 5961** 1869 Ten Cents, Judd-716A, Pollock-796, Cassel-62, High R.7, PR63 PCGS. 38.4 grains. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. in larger letters with the date below, in a smaller font, and slightly curved. This design pattern has a reeded edge and was supposedly struck in the unworkable alloy of silver, nickel, and copper: Koulz's alloy. This piece was struck in 100% silver, as confirmed by SEM-EDX testing conducted by QC Metallurgical on certificate number 60942.63/21873023. As a reminder, the link of the so-called Koulz's Alloy patterns with the Postage Currency series is the use of the Postage Currency undated obverse, identifiable by the broken first S in STATES. The so-called Koutz's Alloy has turned out to be a misnomer. David Cassel's extensive research failed to reveal a single person named Koulz. However, there were a number of entries for a French chemist, Montchal Roulz. So Koulz's Alloy may simply be a typographical error or misreading of the capital letter R, one that should actually be Routz's Alloy. The surfaces of this piece are bright throughout with just the slightest trace of toning on the reverse. The strike is well brought up overall and there are no distracting contact marks evident.
Ex: *The Palace Collections of Egypt*, (Sotheby's, 2/1954), lot 1831; Hans Schulman; T. James Clarke, et al.; (Numismatic Gallery, 11/1955), lot 581; Maurice M. Burgett & Lenox R. 1869 Silver 'Koutz's Alloy' Dime
SIL. / NIC. / COP. Reverse
Judd-716A, PR64

- 5962** 1869 Ten Cents, Judd-716A, Pollock-796, Cassel-63, High R.7, PR64 PCGS. 38.6 grains. The obverse was struck from the leftover, undated obverse die used on Postage Currency patterns from 1863. The reverse has SIL. / NIC. / COP. in larger letters with 1869 below, in a smaller font, and slightly curved. Struck in almost pure silver (not the alloy stated on the reverse) with a reeded edge. The SEM-EDX composition of this piece as determined by QC Metallurgical on certificate number 60942.64/21873026 proved to be 98.77% silver and 1.23% copper. The name Koulz appears to have originated in an obscure 1869 government publication *Suggestions to Congress of the Finances of the United States*. In that booklet there is a quote from W. E. DuBois who described the proposed the alloy of 41% copper, 33% nickel, and 26% silver:

"Mr. Eckfeldt made a small bar, and gave it three meltings. It rolled down with great difficulty, splitting and cracking in spite of all the precaution and annealings. Mr. Barber made a reverse to try it under the press (using the dime head for the obverse), and a faint impression was produced in the steam press. The metal is totally unfit for coinage, and the color is bad."

It is unlikely that any of the so-called "Koulz's alloy" impressions made it out of the Mint. Only one piece is known with a roughly comparable composition. Instead, the reverse die was used to strike more conventional metals and alloys. Deep rose and blue toning is seen in equal measures over each side with light hairlining apparent with magnification. Otherwise, no contact marks are seen.

1869 'Koulz's Alloy' Ten Cents in Copper
Judd-717, PR64 Red and Brown

- 5963** 1869 Ten Cents, Judd-717, Pollock-797, Cassel-46, Low R.7, PR64 Red and Brown PCGS. 31.20 grains. The "Koulz's Alloy" design that uses the undated Postage Currency obverse (from 1863) with the "broken S" in STATES, paired with the reverse that displays SIL. / NIC. / COP. in the center, followed by a straight line, then the date, in exergue. Struck in copper with a reeded edge. Certificate number 5500648 Similar to German silver (Neusilber), French chemist Montchal Roulz received a French patent for his silver / nickel / copper alloy in 1841. The composition's unsuitability for use in coinage left the Mint with an experimental reverse die, but no usable experimental alloy. Pieces were struck using the SIL. / COP. / NIC. reverse in silver, nickel, and copper. This piece displays rich cherry-red color with faint traces of blue intermixed. The fields show signs of heavy die polishing which give the piece its brightly mirrored fields. The strike is sharp throughout with a few small, grade-limiting specks of carbon present.
Ex: David Golding Sale (Stack's, 6/1952), lot 16; ANA Auction (Stack's, 8/1971), lot 402; Brinton T. Schorer (5/3/1973); Harry W. Bass Collection, Part I (Bowers and Merena, 5/1999), lot 1093; Teletrade Auction 1382 (11/29/2000), lot 1148; David Cassel.

1869 Ten Cent 'Koulz's Alloy'
Judd-717A, PR64
Alloyed With Traces of Iron and Silicon

- 5964** 1869 Ten Cents, Judd-717A, Pollock-798, Cassel-64, High R.7, PR64 PCGS. 44.3 grains. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. in the center with the date slightly curved below and in a smaller font. This second reverse design pattern has a reeded edge. The reverse states it was struck in the unworkable alloy of silver, nickel, and copper: Koulz's alloy. However, this example proved to be composed of a most interesting alloy when SEM-EDX testing was conducted by QC Metallurgical on certificate number 60944.64/21873031: 76.07% copper, 23.42% nickel, 0.27% iron, and 0.24% silicon. This piece was originally attributed as a Judd-716 (Koulz's alloy), but after metallurgical testing was done it was reholdered as a Judd-717A (mostly nickel) striking. The difference between the two cannot be discerned by appearance, weight, or specific gravity; only SEM-EDX testing can differentiate between the two alloys. The piece looks like other nickel patterns we have seen with subdued mint luster. The strike is surprisingly strong for a composition as hard as this one. Moderate reflectivity is seen in the fields and the devices are notably frosted, yielding significant contrast. Light gray-rose toning is seen over each side. An irregular planchet flaw in the right field serves as a useful pedigree identifier.
Ex: eBay offering #391360575 (2004) by Blue Moon Coin; David Cassel.
From The David Cassel Collection. PCGS# 60944

1869 'Koulz's Alloy' Dime
Judd-717A, PR65
Copper / Nickel Composition

1869 Dime Pattern, Cupro-Nickel
Judd-717A, PR66
The Finest SIL. / NIC. / COP. Design

5965 1869 Ten Cents, Judd-717A, Pollock-798, Cassel-24, High R.7, PR65 NGC. 45.94 grains. The undated obverse is similar to the regular issue and was used to strike the Postage Currency patterns in 1863, as seen by the broken top of the first S in STATES. The reverse features SIL. / NIC. / COP. in the center, followed by a straight line, the date in the exergue below and in a smaller font. Allegedly struck in the unworkable Koulz's alloy with a reeded edge. SEM-EDX testing conducted by Ledoux & Company Certificate number 235641-018 actually showed this piece to be struck in 74.5% copper, 24.9% nickel, 0.33% iron, and 0.27% cobalt. Two of the three elements in Koulz's alloy (or more precisely Montchal Roulz's alloy) are present in this piece, but no silver was found. This is a brightly mirrored proof whose reflectivity greatly enhances the oil-slick patina seen over each side. High-point definition is lacking on the hair and breasts of Liberty, not surprising considering the hardness of the alloy this piece was struck in. Numerous flyspecks of carbon are scattered over each side, but there are no obvious or detracting contact marks.

Ex: *The Palace Collections of Egypt* (Sotheby's, 2/1954), lot 1831; *T. James Clarke, et al.*; (Numismatic Gallery, 11/1955), lot 581; *Maurice M. Burgett & Lenox R. Lohr* (Numismatic Gallery, 8/1958), lot 55; *Lenox Lohr Collection* FPL (Empire Coin Company, 1965); *Harold L. From *The David Cassel Collection*. PCGS# 60944

5966 1869 Ten Cents, Judd-717A, Pollock-798, Cassel-31, High R.7, PR66 NGC. 44.60 grains. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. with the date slightly curved below and in a smaller font. This second reverse design pattern has a reeded edge and was a modification of the virtually unworkable "Koulz's Alloy." This piece has been SEM-EDX tested at Ledoux & Company Certificate Number 919577-012 and the results are: 76% copper, 23% nickel, 0.2% silicon, 0.1% iron, 0.1% cobalt, and 0.05% silver. This composition was also very difficult to produce because of the high nickel content. This particular piece is the finest known at both services (5/15). The bright nickel-gray fields show light oil-slick iridescence that is most attractive, and the devices are especially well struck considering the hardness of the alloy.

Ex: *Heritage FPL* (9/22/1998), offered as a Judd-716; *Kagin's private treaty* (3/2000) to *David Cassel*.

CASSEL COLLECTION BOOKS

Postage Currency References by David Cassel First and Second Editions

- 5967 Pattern Postage Currency References, First and Second Editions.** For the Postage Currency specialist, these two volumes are indispensable. Each is long out-of-print. Each volume of *United States Pattern Postage Currency Coins* details David Cassel's journey of knowledge in uncovering the facts of this oftentimes surprising series. The first edition is Number 29 of a run of 110 volumes of the Premier Edition from 2000. The second edition is Number 29 of a tiny run of only 30 books, published in 2007. Each volume is in mint condition and shrink-wrapped. The first edition is autographed by the author.
From The David Cassel Collection. (Total: 2 books) PCGS# 661000

Postage Currency References First and Second Editions

- 5968 Pattern Postage Currency References, First and Second Editions.** A second set of this definitive reference on Postage Currency and associated patterns. These editions of *United States Pattern Postage Currency Coins* have long been out-of-print, and this and the previous lot are the final books held by the author. The Premier first edition (2000) is Number 30 of 110 books printed, and it autographed by David Cassel. The second edition (2007) is Number 30 of only 30 books printed. The pair is shrink-wrapped by the author and in new condition.
From The David Cassel Collection. (Total: 2 books) PCGS# 661000

PATTERNS

1836 Two Cent, Near-Mint Judd-53, Reeded Edge

- 5969 1836 Two Cents, Judd-53, Pollock-54, Low R.6, AU58 PCGS.** The first pattern two cent design. The obverse has a small eagle that stands on a cloud, with the date below and UNITED STATES OF AMERICA at the borders. The reverse has the denomination widely spaced within a peripheral laurel wreath. Struck in billon with a reeded edge. A well defined example with deep gunmetal-gray toning. Despite momentary circulation, we can mention only a small spot near the left (facing) wingtip and a slight obverse edge knock at 5:30 o'clock. PCGS# 11196

1858 Indian Cent in Copper-Nickel Judd-208, Pollock-259 Centered Date, Five Leaf Clusters

- 5970 1858 Indian Cent, Judd-208, Pollock-259, R.3, PR64 PCGS.** Snow-PT28. Die Pair 1. The Indian Head cent as adopted in 1859, with clusters of five leaves on the reverse wreath. This is the Centered Date Pollock variant. Struck in copper-nickel with a plain edge. This is the most commonly encountered of the four Judd-208 variants. Obviously a copper-nickel product from the "white" appearance of the coin, only slight rose color is seen on each side. A number of small, but individually insignificant contact marks are seen on each side. Slight high-point softness is noted on the headdress and laurel wreath. PCGS# 11885

1859 Indian Cent Pattern, PR12 Judd-230, Pure Copper

- 5971 1859 Indian Cent, Judd-230, Pollock-274, High R.7, PR12 NGC.** Ex: Col. Green, Eric P. Newman Collection. 4.7 gm. Struck from regular issue 1859 Indian cent plain edge dies, but in 100% copper instead of the expected 88% copper, 12% nickel alloy. The cent undoubtedly circulated for a number of years until was saved, probably because of its pre-Civil War date, or laurel wreath reverse. But its status as a pattern was known to Newman, who paid \$12.50 for it when he acquired it circa-1940. The mahogany-brown surfaces display distributed unimportant marks, in addition to a small rim knock at 7 o'clock on the reverse. PCGS# 11944

1863 Indian Cent in Bronze Judd-299, Thin Planchet, PR64 Red and Brown

- 5972 1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Brown PCGS.** Struck from regular issue, plain edge dies, but in bronze instead of copper-nickel. No L on the ribbon. The Indian cent alloy switched from bronze to copper-nickel during 1864. The dies exhibit medallic alignment, as usual for Judd-299, and this is a thin planchet variant. This pattern was the Mint's first experiment with bronze. Only 200 or so pieces are believed known, and examples are rarely seen with any red color remaining. Strike details on this piece are complete throughout, and the fields are deeply reflective with rich brown and blue patina.
From The David Cassel Collection. PCGS# 60454

**1863 Reeded Edge Copper-Nickel Cent, PR64
Judd-300, Pollock-360, High Date Variety**

- 5973** 1863 One Cent, Judd-300, Pollock-360, R.7, PR64 NGC. Struck from regular issue Indian cent dies in the usual copper-nickel alloy, but the edge is reeded instead of plain. High Date variant. All Judd-300 strikes are rare, whether in circulation or proof format. This is a most unusual pattern. It is the only proof cent coin struck with a reeded edge. This is a remarkable proof that displays deeply reflective fields on each side. The color, rather than the usual whitish lack of color, is deep yellow-gold in the fields with deep red accents around the devices. Fully struck.
From The David Cassel Collection. PCGS# 60455

**1863 Indian Cent in Copper-Nickel
Judd-300, Pollock-362, MS64
Low Date Variant**

- 5974** 1863 One Cent, Judd-300, Pollock-362, R.7, MS64 PCGS. 71.9 grains. Ex: Starr. The regular dies trial issue for the 1863 Indian cent. Struck in copper-nickel but with a reeded edge. This is a low date variant, and is rare as such with only a half dozen known according to USPatterns.com. Business strikes can be distinguished by the crooked fleck on the cheek below the eye. Pollock, in his standard reference on patterns, broke the single Judd variety into three variants, two in proof format and Pollock-362 as a business strike. A reeded edge Uncirculated piece was first offered in public auction in an 1865 Cogan sale. For a copper-nickel coin, the surfaces display a remarkable amount of red patina. The surfaces glow with mint luster, and there are no mentionable contact marks present.
Ex: Floyd Starr (Stack's, 10/1992), lot 1046.
From The David Cassel Collection. PCGS# 70455

**1863 Copper-Nickel Indian Cent, MS64
Low-Date Judd-300, Pollock-362 Variety**

- 5975** 1863 One Cent, Judd-300, Pollock-362, R.7, MS64 PCGS. Regular dies trial issue for the Indian cent. Struck in copper-nickel with a reeded edge. This is a Low Date example with the diagnostic hook-shaped mark on the cheek just below the eye. What is significant about this pattern is their experimental nature, they were struck in both business strike and proof format, with a reeded edge. These pieces were believed at one time to have had the reeds filed into each coin, but was recently disproved. Compared to the other MS64 above, this piece displays more traditional "white" surfaces of a copper-nickel coin with just faint tinges of red present. A bit softly defined on the tips of the feathers in the headdress, and showing no objectionable contact marks.
From The David Cassel Collection. PCGS# 70455

**1863 Judd-305 Two Cents, PR63 Brown
Popular Washington Design**

- 5976** 1863 Two Cents, Judd-305, Pollock-370, R.4, PR63 Brown PCGS. The obverse displays a portrait of Washington facing right, GOD AND OUR COUNTRY around, date and two stars below. The reverse expresses the denomination 2 CENTS within a wheat wreath, UNITED STATES OF AMERICA around. CENTS is curved dramatically. Struck in copper with a plain edge. Lovely olive-brown surfaces exhibit traces of pale blue toning with golden-tan splashes on the obverse. Population: 6 in 63 Brown, 18 finer (7/15). PCGS# 60460

**1863 Half Dime, PR65 Red and Brown
Copper Strike From Regular Dies, Judd-323**

- 5977** 1863 Seated Half Dime, Judd-323, Pollock-388, High R.7, PR65 Red and Brown PCGS. CAC. Struck in copper with a reeded edge. Only about a dozen examples of this type are known. The design elements are the same as those seen on the regular issue coins. According to the USPatterns.com website: "Although described in the literature as 'regular dies trial pieces', these are actually restrikes deliberately made in the early 1870s and sold as part of complete off-metal sets with the silver coinage of this year ... These half dime dies were made from a hub which had the "D" in "United" broken and are believed to be backdated novodels." A well struck, nicely mirrored, and unabraded Gem. The reverse field and obverse margin are fire-red, although sea-green toning embraces the obverse field. PCGS# 70480

**1867 Five Cent Pattern in Nickel
Judd-570, Pollock-638, PR64+ Cameo**

- 5978** 1867 Five Cents, Judd-570, Pollock-638, R.5, PR64+ Cameo NGC. Liberty wears a coronet and faces left on the obverse, showing UNITED STATES OF AMERICA around the periphery and the date below. The top of the 7 is distant from the curl, distinguishing the Pollock-638 variety from the Pollock-640, which shows the 7 close to the curl. The reverse shows 5 CENTS centered within a laurel wreath and IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. For a nickel product, this is a remarkably well-struck and deeply mirrored example. The surfaces are untoned and a few tiny planchet divots are seen scattered over each side. PCGS# 860780 Base PCGS# 60780

**1868 Cent Pattern in Nickel
Judd-608, Centered Date Variant, PR62**

- 5979** 1868 Cent, Judd-608, Pollock-673, R.4, PR62 PCGS. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. The die variant with the 1 in the date centered over a dentil. Struck in nickel with a plain edge. This particular variety does not appear to match either of the photos on the USPatterns.com website. The Centered Date variant there shows a longer flag on the top of the 1 in the date than seen here. The fields are moderately reflective, and there is an oval-shaped area of planchet granularity in the upper-left portion of the obverse. Bright surfaces with just the slightest tinge of patina present. The central device of Liberty shows some softness of detail on the hair curls. PCGS# 60820

**1868 Five Cent Pattern in Nickel
Judd-623, PR64**

- 5980** 1868 Five Cents, Judd-623, Pollock-692, Low R.6, PR64 PCGS. The obverse depicts Liberty wearing a coronet inscribed LIBERTY. Around, the legend UNITED STATES OF AMERICA and below, the date, with a wide border. On the reverse, the denomination 5 CENTS is enclosed within a laurel wreath, with the motto IN GOD WE TRUST above, and a wide border. Struck in nickel with a plain edge. USPatterns.com estimates probably 40-50 pieces are known of this nickel pattern. As often seen with nickel products, the surfaces have slight granularity and are just a tad softly struck in the centers. Each side is surprisingly well-mirrored in the fields, though, and just the faintest rose patina is seen throughout. From The David Cassel Collection. PCGS# 60840

1868 Nickel Composition Five Cent Piece
Judd-624, PR65

- 5981** 1868 Five Cents, Judd-624, Pollock-693, Low R.6, PR65 PCGS. Struck on a broad, slightly oversized five cent planchet. The obverse is a larger variant of the three cent nickel design, while the reverse has 5 CENTS in the center surrounded by a laurel wreath. Struck in nickel with a plain edge. Approximately 2-3 dozen pieces are believed extant of this popular nickel pattern. As with the Judd-623 above, this piece also shows slight granularity and central striking softness, common to the hard nickel alloy used to strike these pieces. Fine die striations are seen in the fields on each side with resultant bright mirroring. Pale toning.

From The David Cassel Collection. PCGS# 60841

1868 Five Cent Planchet in Copper
Oversized Planchet, Reeded Edge
Judd-628, PR64 Red and Brown

- 5982** 1868 Five Cents, Judd-628, Pollock-697, High R.7, PR64 Red and Brown PCGS. The obverse shows the head of Liberty similar to the three cent nickel, only larger. The legend UNITED STATES OF AMERICA is around the border and the date 1868 is below. The reverse has 5 CENTS in the center encircled by a laurel wreath, and IN GOD WE TRUST at the top in very small letters. Struck on a broad copper planchet with a reeded edge. This is a rare and infrequently offered copper striking. The last offering we show in our Auction Archives (and the last offering listed in the Judd book also) is from our 2004 ANA Sale. We show only five auction appearances since 1990 by all the major auction companies. The Red and Brown designation is accurate, but there is significant mint red remaining on each side as well as yellowish-tinged green-brown. The fields are brightly mirrored with fine die striations on each side. An exceptionally well-preserved example of this overlooked rarity. Ex: Lenox Lohr FPL (Empire Coin Co., 1961); Robert Branigan / ANA Auction (Bowers and Merena, 8/1978), lot 1775.

From The David Cassel Collection. PCGS# 70845

**1868 Five Cent Pattern, PR65
Underrated Judd-630**

- 5983** 1868 Five Cents, Judd-630, Pollock-700, R.7, PR65 NGC. Ex: Eric P. Newman Collection. The obverse displays a Liberty head facing left, similar to the design on the regular-issue three cent piece, with UNITED STATES OF AMERICA around and the date 1868 below. The design is similar to other patterns of the same date, but this variant has no star on Liberty's coronet. The reverse exhibits a large V on an ornate shield, with IN GOD WE TRUST above. Struck in nickel with a plain edge.

Well-detailed design elements of this charming Gem show just a touch of softness on Liberty's curls. The brightly reflective surfaces display a few hints of champagne-gold toning, with a couple of minor contact marks in the obverse field. Visual appeal is quite strong. Census: 1 in 65, 0 finer (6/15). PCGS# 60847

**1868 Ten Cent, Gem Proof
Judd-647, Nickel, Plain Edge**

- 5984** 1868 Ten Cents, Judd-647, Pollock-720, Low R.6, PR65 NGC. CAC. The obverse features the almost identical design used on large cents from 1843 to 1857. The reverse is similar to the large cent design except the wreath is smaller and open, and TEN CENTS appears in its center. Struck in nickel with a plain edge. The obverse die was also used to strike large cent patterns in 1868, an unlikely return of the long-dormant denomination. The present tan-brown example displays minor carbon across unabraded, satiny surfaces. Census: 5 in 65, 5 finer (6/15). PCGS# 60865

**1868 Dual-Denomination Pattern in Copper
Judd-656, PR65 Red and Brown**

- 5985** 1868 Dual Denomination \$5-25 Francs, Judd-656, Pollock-729, Low R.7, PR65 Red and Brown NGC. Anthony Paquet's design for an international five dollar coin equal to the value of a proposed 25 franc piece. The obverse depicts Liberty, facing left, hair bound with a ribbon and star at the front. The reverse is simply inscribed 5 / DOLLARS / 25 / FRANCS in the center with a laurel and oak wreath surrounding. Struck in copper with a reeded edge. Only a dozen or so copper pieces are known, several of which have been gilt. This pattern was the United States' first attempt at an international coinage. These pieces were also struck as plain edge copper pieces, and there are aluminum pieces also known, both with plain and reeded edges.

These patterns were to be struck as a five-dollar coin weighing 124 9/20 grains, rather than the standard 129 grains. The lower weight would equal the weight of a 5-franc gold coin. This international coinage was apparently taken seriously, at least for a while. France and Great Britain also struck similar patterns. The French produced patterns with the same monetary expression, as seen here, plus there is another design with a reverse that reads: 10 / FLORINS / 25 / FRANCS. The English struck a similar pattern with the reverse denomination reading: DOUBLE / FLORIN / FIVE FRANCS / 1868 (plain and reeded edges). **These four types mentioned above are also included in the Cassel Collection as part of our World Coins catalog in association with the ANA Auction.**

The red part of the Red and Brown designation is muted and more cherry-red, while the remainder of the surfaces orange-yellow and sea-green. The fields are brightly mirrored and serve to enhance the multicolor patina. Fully struck.

From The David Cassel Collection. PCGS# 70874

These English and French counterparts to these dual-denomination patterns are included in the World Coins catalog of the ANA Auction.

**1868 Dual-Denomination Aluminum Pattern
Judd-658, Reeded Edge, Contrasted PR64**

5986 1868 Dual Denomination \$5-25 Francs, Judd-658, Pollock-731, Low R.7, PR64 PCGS. The obverse has a bust of Liberty facing left, with UNITED STATES OF AMERICA and the date along the periphery. Liberty has a headband with a star, hair tied with a ribbon. The reverse displays an olive and oak wreath, with 5 / DOLLARS / 25 / FRANCS inside the wreath. Struck in aluminum with a reeded edge. About a dozen pieces are known. The proposed international coinage patterns from 1868 were an outgrowth of the 1867 Latin Monetary Union. According to Wikipedia: "The LMU served the function of facilitating trade between different countries by setting the standards by which gold and silver currency could be minted and exchanged." **These patterns were also struck in France and England. David Cassel has examples of all four types (two French, two English) in the World Coins section of this ANA Catalog.** This is a lovely, unoxidized example of this rare dual-denomination pattern. The fields are nicely mirrored with strongly contrasting, frosted devices. Close examination shows faint glimmers of pale lilac and rose patina. A splendid example of this first attempt at an international coinage.
From The David Cassel Collection. PCGS# 60876

**1868 5 DOLLARS / 25 FRANCS Pattern
Judd-659, Aluminum, Plain Edge, PR64**

5987 1868 Dual Denomination \$5-25 Francs, Judd-659, Pollock-732, Low R.7, PR64 PCGS. Anthony Paquet's design for an international five dollar coin equal to the value of a proposed 25 franc piece. The obverse depicts Liberty, facing left, hair bound by a ribbon and star at the front. The reverse is simply inscribed 5 / DOLLARS / 25 / FRANCS in the center with a laurel and oak wreath surrounding. Struck in aluminum with a plain edge. After the international monetary convention in Paris in June 1867, a coinage bill was introduced to produce a 5 dollar / 25 francs gold coin. The experimental international coin, of course, went nowhere but patterns were produced in copper and aluminum. All are very rare. **Even rarer are the French and English pattern counterparts. All four types, two English and two French patterns, are offered in the World Coins section of this ANA Auction.**

This is a bright aluminum striking, one that shows the usual strong field / device contrast on each side. The only surface problem is a minor streak of oxidation near the obverse rim at 3 o'clock — a common problem on many aluminum patterns — here of only slight consequence. Of the greatest rarity and desirability.
From The David Cassel Collection. PCGS# 60877

**1868 Ten Dollar Pattern in Copper
Judd-662, Pollock-735, PR65 Brown**

- 5988** 1868 Ten Dollar, Judd-662, Pollock-735, Low R.7, PR65 Brown NGC. The obverse design, attributed to James B. Longacre, is quite similar to the design on the circulating three cent nickel, although in the large format here it looks radically different. The reverse shows a small eagle in the center with raised wings, the scroll reads IN GOD WE TRUST, UNITED STATES OF AMERICA around, and TEN D. at the rim below. Struck in copper with a reeded edge. This is the Low Date variant with the 1 in the date close to the border and distant from the bust. Possibly as many as a dozen examples of this variety exist, and several are gilt. The other variety, Pollock-737, has the 1 closer to the bust. Only two examples of the High Date variety are thought to exist. Examples of this design were struck in gold, copper, and aluminum. Only four pieces are known in gold. This is a lovely Brown example that, while technically Brown, appears to even the most casual observer to be blue. The fields are brightly mirrored and greatly enhance the radiant appearance of this Gem. Problem-free surfaces.
From The David Cassel Collection. PCGS# 60880

**1869 Standard Silver Ten Cent, PR64
Judd-708, Silver, Plain Edge**

- 5989** 1869 Standard Silver Ten Cents, Judd-708, Pollock-787, R.5, PR64 PCGS. CAC. Liberty faces right, wearing a headband adorned with a single large star above the forehead. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. Reverse: STANDARD SILVER around upper edge with 10 / CENTS in an oak and laurel wreath. Struck in silver with a plain edge. Although this unblemished and conservatively assessed pattern is undesignated as Cameo, both the portrait and wreath are frosty, and the rose-gold fields are impressively mirrored. Certified in a green label holder. PCGS# 60933

**1869 Standard Silver Ten Cent, PR65
Judd-709, Silver, Plain Edge**

- 5990** 1869 Standard Silver Ten Cents, Judd-709, Pollock-788, High R.6, PR65 NGC. This Standard Silver design variety has only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, crowded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in silver with a plain edge. A flashy Gem that shows powder-blue toning on the portrait. The fields are caramel-gold aside from a few tan freckles near 7:30 on the reverse. Census: 4 in 65, 0 finer (6/15).
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2263. PCGS# 60934

1869 Standard Silver Half in Silver
Judd-742A, PR60
No Initial 'B' at Back of Cap

- 5991** 1869 Standard Silver Half Dollar, Judd-742A, Pollock-830, R.8. PR60 PCGS. A bust of Liberty faces right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with two large stars. William Barber's initial "B" is not seen within the folds of the ribbon at the back of the cap. The reverse has 50 CENTS centered within a wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. This rare variety was apparently first discovered in the Morris Evans Collection in 1998. So far it is only known in silver and with a reeded edge. Deep freckled gray-blue toning covers most of each side. The fields are only moderately reflective, but there are no obvious contact marks present.
From The College Collection, Part Two. PCGS# 60970

1870 Standard Silver Ten Cent, PR66
Judd-856, Silver, Plain Edge

- 5992** 1870 Standard Silver Ten Cents, Judd-856, Pollock-936, High R.6, PR66 NGC. CAC. The central obverse device features Liberty facing right, wearing a cap ornamented with three stars. The motto is below and UNITED STATES OF AMERICA is above. A wreath of oak and laurel surrounds 10 CENTS in the center, with STANDARD SILVER above and 1870 below. Struck in silver with a plain edge. This fully struck and flashy high grade specimen offers medium autumn-brown, lilac, and navy-blue toning. Devoid of any post-strike detractors. Although the Judd 12th edition lists both the plain and reeded edge (Judd-855) silver varieties as High R.6, we have seen several more of the latter than the former, and in fact our auction archives show only a single Heritage appearance of Judd-856 over the past 15 years. PCGS# 61100

1870 Quarter Dollar Pattern in Aluminum
Judd-886, PR66 Cameo

- 5993** 1870 Quarter Dollar, Judd-886, Pollock-985, High R.7, PR66 Cameo PCGS. CAC. Ex: Denali Collection. The obverse is designed by William Barber and features Liberty seated and facing left, surrounded by 13 stars. She supports a shield with her right hand and has an olive branch in her left hand. A Liberty pole is behind the shield, and the date is in the exergue. The reverse is the regular issue With Motto Seated Liberty quarter design. Struck in aluminum with a reeded edge. Just a hint of obverse haze keeps that side from a black-and-white appearance. The reverse is less toned but a trifle less reflective in the fields, a subtle tradeoff. Starkly contrasted on each side. Pleasingly preserved and an all-around appealing piece. PCGS# 800012

1870 Standard Silver Quarter in Silver
Judd-918, PR64

- 5994** 1870 Standard Silver Quarter Dollar, Judd-918, Pollock-1022, Low R.7, PR64 NGC. The obverse exhibits a bust of Liberty facing right with the legend UNITED STATES OF AMERICA around the upper border. Liberty wears a ribbon inscribed LIBERTY, and the motto IN GOD WE TRUST is on a scroll near the lower border. The reverse displays the denomination 25 CENTS within a wreath of laurel and oak. STANDARD SILVER is at the top, the date 1870 is below. Struck in silver with a reeded edge. Rich blue and golden-rose toning is seen over each side with strong, flashy mirrors in the fields.
From The David Cassel Collection. PCGS# 61162

1870 Judd-955 Aluminum Pattern, PR66 Cameo
Standard Silver Design

- 5995** 1870 Standard Silver Half Dollar, Judd-955, Pollock-1099, High R.7, PR66 Cameo PCGS. CAC. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in aluminum with a reeded edge. Less than half a dozen of these aluminum patterns survive, and none can equal this amazing Cameo proof. Aside from tiny planchet flakes as made, the brilliant light gray surfaces are pristine with excellent contrast. Population: 1 in 66 Cameo, 0 finer (7/15). PCGS# 505671 Base PCGS# 61201

1870 Indian Princess Dollar in Copper
Judd-1017, PR63 Brown

- 5996** 1870 Dollar, Judd-1017, Pollock-1151, Low R.7, PR63 Brown PCGS. The obverse is the Longacre Indian Princess design with a figure of Liberty seated and facing left, 13 stars around the upper peripheries, and the date 1870 below. Liberty is wearing an Indian headdress, and supports a liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Behind are two flags, one of which is ornamented with twenty-two stars. The figure of Liberty is taken from the Indian Princess design of James Longacre, and his last name is printed in small letters just beneath the base of the globe. The reverse design is the same used to coin regular issue Liberty Seated silver dollars. Struck in copper with a plain edge. Beautiful watery iridescence covers each side, mostly blue-green and pinkish-rose in hue. The fields are brightly reflective and serve to greatly enhance the coloration. A spot below star 5 is the only grade-limiting flaw we can see. From The David Cassel Collection. PCGS# 61265

1870 Gold Dollar in Copper
Judd-1023, PR65 Brown
Only 4 or 5 Pieces Believed Known

5997 1870 Gold Dollar, Judd-1023, Pollock-1158, High R.7, PR65 Brown NGC. Regular dies trial issue struck from the regular 1870 gold dollar dies. Struck in copper with a reeded edge. While termed a dies trial issue, it is more likely these pieces were struck for sale to collectors as part of off-metal sets. Only four or five pieces are believed known. While this example is called Brown, it still retains much underlying red which is most apparent when the mirrored fields are flashed beneath a light. A few minor lint marks are scattered over each side, struck into the coin after the dies were wiped and static electricity caused lint to adhere to the dies. PCGS# 61271

1871 Copper Indian Princess Dollar
Judd-1148, PR64 Brown

5998 1871 Dollar, Judd-1148, Pollock-1290, Low R.7, PR64 Brown PCGS. The Longacre obverse, with a seated Liberty facing left, wearing an Indian headdress and supporting a liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Behind is a flag ornamented with 22 stars. Thirteen stars surround the date 1871 is at the bottom. The design is executed in high relief with the appearance of a medal. The reverse was struck from the die used for regular issue Seated Liberty dollars. Struck in copper with a plain edge. Implemented by William Barber after James Longacre's death, this Indian Princess design is a favorite among pattern collectors and available in a number of metals, edges, and reverse types. The surfaces are deep moss-green, blue, and brown, but the mirrored fields flash strongly when angled just so beneath a light. Remarkably problem-free for a copper coin and seemingly finer than the stated grade.

From The David Cassel Collection. PCGS# 61410

1873 Pattern Trade Dollar, PR63
Judd-1276, Bright Mirrors

5999 1873 Trade Dollar, Judd-1276, Pollock-1418, R.4, PR63 NGC. A distinctive Trade dollar pattern with a small head of Liberty (reminiscent of William Barber's "Sailor" Head design) facing left, set amid a large, open field with 13 stars at the margin. The reverse has the required legends mostly set in the middle of that side, surrounded by an olive wreath, and UNITED STATES OF AMERICA at the upper periphery. Struck in silver with a reeded edge. This issue was sold as part of six-piece pattern sets for \$30. Another silver variant, Judd-1277, has a plain edge. This Select example is boldly struck and well-mirrored. Hints of gold and russet toning accent otherwise brilliant surfaces. Census: 6 in 63, 8 finer (6/15). PCGS# 61561

**1873 Bailly / Barber Trade Dollar
Judd-1316, PR62+ Cameo
Rare Plain Edge Striking in Silver**

- 6000** 1873 Trade Dollar, Judd-1316, Pollock-1459, High R.7, PR62+ Cameo PCGS. The obverse shows Liberty seated on a globe, with 13 stars around and the date below. The reverse has a defiant eagle perched on a rock, with a scroll and motto below; TRADE DOLLAR and UNITED STATES OF AMERICA are around the periphery, along with two stars. E PLURIBUS UNUM is set into the field above the eagle's head; 420 GRAINS and 900 FINE are below the scroll and above TRADE DOLLAR. Modified from a design of Joseph Alexis Bailly by William Barber, and struck in silver with a plain edge. Curiously, the reeded edge strikings of this design are only R.4, but the plain edge pieces (like this one) are High R.7. This is an almost-brilliant dollar with just the thinnest trimming of golden-russet around the margins. The fields display profound depth of mirrored reflectivity with stark white cameo devices set against the "black" fields. Only minor hairlines account for the grade, which appears much finer than its numeric designation. From *The David Cassel Collection*. PCGS# 543600 Base PCGS# 61602

**1879 Metric Dollar by William Barber
Judd-1617, Toned PR64**

- 6001** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR64 PCGS. William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. Streaks of golden-gray patina cover each side and serve to mute the mirrored flash in the fields. Well struck and only showing a couple of shallow field marks to the left of the mouth of Liberty. PCGS# 61995

**1879 Goloid Metric Dollar in Copper
Judd-1628, PR65 Red
Complete, Unmellowed Red Surfaces**

- 6002** 1879 Goloid Metric Dollar, Judd-1628, Pollock-1824, R.7, PR65 Red PCGS. William Barber's design for the Goloid Metric dollar with a large head of Liberty facing left and LIBERTY on a wide ribbon around her head. The reverse is laid out with the proposed composition of the coin in the center, surrounded by a circle of 38 stars. Struck in copper with a reeded edge. While this is a William Barber design, it is possible this was executed by his son, Charles. This Goloid Metric design was struck in goloid, silver, copper, aluminum, and white metal. What is most extraordinary about this piece is not only its rarity, but the retention of its full red color. Very few copper patterns are known today with the original mint luster intact. Brighter red is noticed in the centers with a slightly deeper hue around the margins. Nevertheless, there is no mellowing on either side. The fields are bright and highly reflective, and there are no obvious or mentionable flaws present. From *The David Cassel Collection*. PCGS# 82006

**1880 Metric Dollar in Copper
Judd-1646, PR65 Red and Brown**

- 6003** 1880 Metric Dollar, Judd-1646, Pollock-1846, R.7, PR65 Red and Brown PCGS. William Barber's Metric dollar depicts Liberty wearing a coronet with a border of pearls. The elaborate reverse displays a partial wreath of cotton and corn tied at the base, a ribbon, and the motto DEO EST GLORIA within a cartouche above. Struck in copper with a reeded edge. This majestic design was taken from the 1877 half union. Examples were struck in silver or goloid, copper, and aluminum. More than a dozen examples are known in copper. For a Red and Brown coin, this piece retains a significant amount of deep red. The fields are only tempered by slight blue, not the usual brown one would expect. Outstanding preservation. From *The David Cassel Collection*. PCGS# 72031

**1884 Five Cent, Judd-1724, PR67 Cameo
Octagonal Perforation, Nickel**

- 6004** 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR67 Cameo PCGS. CAC. The Eastman Johnson "holey five cent" design. The obverse shows FIVE above and CENTS below a roughly octagonal opening in the planchet, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge. Faint wheat-gold toning graces fully struck and pristine surfaces. A few minuscule lint marks provide the sole imperfections. PCGS# 397007 Base PCGS# 62154

**Martha Washington 'Dime' Reverse Die
Excellent Condition**

- 6005** ("1759") Martha Washington "Dime" Reverse Die. 188.4 gm. 54 mm in height with a 32 mm base and a 21 mm face. A reverse die for the 1759-dated Martha Washington "dime," used to strike Judd-2101 cupronickel-copper patterns circa 1965 during the dime alloy transition from silver to clad. The die depicts Mount Vernon, the George Washington family home. According to USpatterns.com, the Martha Washington dies were used at the Mint and "also given out to certain vendors including IDX Inc., PMX Industries, and the Olin Brass Corporation by the Mint to test planchets." The face of the die is undamaged, and displays light golden-brown and steel-blue toning.

GOLD DOLLARS

**1849 Closed Wreath Dollar, MS65
Infrequently Seen in Gem**

- 6006** 1849 Closed Wreath MS65 PCGS. The yellow-gold surfaces of this Gem display strong luster and sharply struck design elements. Close examination reveals no marks of significance. The 1849 gold dollar is very popular as the first year of the denomination struck in gold. It is only infrequently seen in MS65 and finer grades. Population: 17 in 65, 4 finer (7/15). PCGS# 7503

**1854 Gold Dollar, MS66
Fully Struck Type One Example**

6007 1854 Type One MS66 PCGS. Fully struck with frosty luster over pristine lemon-gold surfaces, this Premium Gem gold dollar is perfect for type representation. The 1854 Type One dollar (855,502 coins struck) is as rare as the 1854 Type Two dollar (783,943 coins produced later in the year) in MS66, yet the Liberty Head issue sells for a fraction of its Indian Princess Head counterpart. Housed in a green label holder. Population: 14 in 66 (2 in 66+), 3 finer (6/15). NGC ID# 25BY, PCGS# 7525

6008 1854 Type Two MS61 PCGS. Flashy luster issues from colorful rose and green-gold surfaces. This Indian Princess Head gold dollar is crisply rendered with minor incompleteness on the hair and right corn husk. A small dig in the left obverse field is the only flaw of note. A fantastic, minimally clashed Type Two representative. NGC ID# 25C3, PCGS# 7531

6009 1854 Type Two MS61 NGC. Prominent clash marks show on the reverse of this attractive Mint State example, with well-detailed design elements and lustrous orange-gold surfaces that show a few hair-thin surface scratches. Always popular as a representative of the short-lived Type Two design. NGC ID# 25C3, PCGS# 7531

6010 1855 MS62 PCGS. A coveted Type Two gold dollar from a mintage of 758,269 coins, this Uncirculated 1855 example has marvelous wheat-gold color with olive elements. The surfaces exude glistening frost and offer little to critique aside from small scattered ticks. Lightly clashed and sharply defined, especially on the bow knot and leaves. NGC ID# 25C4, PCGS# 7532

6011 1855-O AU50 PCGS. Variety 2. This is the late, lapped die state of Variety 2. A light yellow-gold example of the low-mintage Type Two gold dollar, the only issue of the type coined in New Orleans. Just 55,000 examples were produced. Traces of mint luster are visible in the protected areas of the design, with a few scattered marks of little consequence. NGC ID# 25C7, PCGS# 7535

**1857-C Gold Dollar, AU55
Above-Average Preservation**

6012 1857-C AU55 NGC. Variety 1, the sole die pair employed for striking the meager total of 13,280 gold dollars of this vintage. This greenish-gold example shows the typical strike weakness around portions of the rims on each side and the bowknot. A small die lump shows in the field underneath ST, but mentionable abrasions are minimal. The preservation on this piece is considerably above average. Census: 52 in 55 (1 in 55+★), 46 finer (7/15). NGC ID# 25CE, PCGS# 7545

**1858-S Gold Dollar, MS61
Low-Mintage Condition Rarity**

6013 1858-S MS61 NGC. The 1858-S has a mintage of only 10,000 pieces and is an important condition rarity in AU and Mint State. This piece possesses full, shimmering mint luster and exhibits a hint of reflectivity on the obverse with rich reddish-gold patina throughout. There are no obvious blemishes on either side, just some minor scuffiness that is confined mostly to the obverse. Census: 8 in 61, 3 finer (7/15).
Ex: Long Beach Signature (Heritage, 9/2006), lot 3072. NGC ID# 25CK, PCGS# 7550

**1858-S Gold Dollar, MS61
Superior Eye Appeal**

6014 1858-S MS61 PCGS. A crisply struck and minimally marked orange-gold example. Luster illuminates design elements. Despite a low mintage of 10,000 pieces, there was little contemporary interest in the 1858-S gold dollar, and few were set aside. Most of the approximately 200 survivors are in XF to AU grades. Certified in a green label holder. Population: 6 in 61, 5 finer (6/15). NGC ID# 25CK, PCGS# 7550

6015 1859 MS64 PCGS. A lovely Choice Mint State 1859 gold dollar, the likes of which are rarely seen. This example has splendid yellow-gold luster with frosty mint surfaces. Trivial marks prevent a higher grade. Population: 28 in 64 (2 in 64+), 30 finer (7/15). NGC ID# 25CL, PCGS# 7551

6016 1859 MS65 PCGS. The 1859 gold dollar is elusive in all grades, and Gem examples are hard to locate. The collector who seeks a high grade example will do well to consider this piece. The frosty mint surfaces are fully brilliant with hints of orange and blue over the yellow-gold luster. Population: 18 in 65, 12 finer (7/15). NGC ID# 25CL, PCGS# 7551

1859-C Gold Dollar, AU50
Final Charlotte Issue

6017 1859-C AU50 PCGS. Variety 1. A radiant honey-gold example. Surprisingly free from abrasions, and Liberty's cheek shows only a hint of wear. As usual for the '59-C, the strike is indistinct on the hair and dentils, and minor mint-made strike-throughs affect portions of the date. The sole post-1857 Charlotte issue of the denomination. Only 5,235 pieces were struck. NGC ID# 25CM, PCGS# 7552

6018 1860-S AU58 PCGS. Just a touch of rub visits the high points of this later S-mint gold dollar. Both sides are largely copper-gold though lighter elements appear in parts of the fields. Population: 17 in 58 (1 in 58+), 31 finer (7/15). NGC ID# 25CT, PCGS# 7557

1861 Gold Dollar, MS65
Early Type Three Representative

6019 1861 MS65 PCGS. The 1861 is one of the more plentiful gold dollar issues of the period, suitable for type purposes. This Gem example offers sharp design elements and frosty apricot-gold luster. The reverse is heavily clashed, with an impression of LIBERTY visible below the date. No major abrasions are observed. Population: 40 in 65, 11 finer (6/15). NGC ID# 25CU, PCGS# 7558

1862 Gold Dollar, MS66+
Radiant Eye Appeal

6020 1862 MS66+ PCGS. In high grades, the 1862 is the most available gold dollar issue of the 1860s, popular among type collectors. This Plus-graded Premium Gem showcases radiant yellow-gold luster with sharp motifs and largely unabraded surfaces. Struck from fresh dies, with some semiprooflike surface remaining in portions of the fields. Population: 33 in 66 (3 in 66+), 7 finer (6/15). NGC ID# 25CW, PCGS# 7560

1862 Gold Dollar, MS67
Prooflike Obverse, Tied for Finest at PCGS

6021 1862 MS67 PCGS. CAC. The 1862 is a contender for the title of "Most Available Type Three Gold Dollar," boasting a sizeable mintage of 1.3 million coins. The obverse of this Superb Gem is decidedly prooflike with frosty, sharply defined motifs that stand out against moderately reflective fields. Glistening luster and peach-gold color characterize the reverse. The resulting visual appeal is unsurpassed. Minimally clashed and void of readily detectable marks. Population: 7 in 67, 0 finer (7/15).
From The College Collection, Part Two. NGC ID# 25CW, PCGS# 7560

6022 1874 MS66 PCGS. CAC. This boldly defined Premium Gem is an important condition rarity in the series. A fully lustrous example, this gold dollar has brilliant yellow-gold surfaces. PCGS has only certified 35 finer examples (7/15). NGC ID# 25DC, PCGS# 7575

1878 Gold Dollar, Semiprooflike MS65

6023 1878 MS65 PCGS. With a mintage of only 3,000 pieces, the 1878 gold dollar is elusive in all Mint State grades, but becomes genuinely rare at the Gem level. This MS65 coin displays a sharp strike, with wheat-gold luster and semiprooflike fields. A couple faint vertical roller marks on Liberty's cheek (as struck) should not be confused for abrasions. Population: 16 in 65, 7 finer (7/15). NGC ID# 25DG, PCGS# 7579

**1880 Dollar, Sharply Struck MS67
A Low-Mintage, High-Population Date**

6024 1880 MS67 PCGS. Despite the small mintage of 1,600 circulation strikes, the 1880 gold dollar has a relatively high survival rate. PCGS and NGC combined report 657 submissions, the vast majority in Mint State grades (7/15). Most of the production was saved by collectors, dealers, and speculators.

The yellow-gold surfaces of this Superb Gem display hints of olive-green, orange, and rose and are highly lustrous. The design elements are sharply struck, including the feathers and plumes of the headdress, the letters in LIBERTY, and the wreath. Both sides are impeccably preserved. PCGS reports 28 examples finer. NGC ID# 25DJ, PCGS# 7581

6025 1881 MS66 PCGS. Especially vibrant mint luster and sharply detailed design elements are the outstanding visual attributes of this delightful Premium Gem. The well-preserved surfaces add to the outstanding eye appeal. NGC ID# 25DK, PCGS# 7582

6026 1882 MS66 PCGS. Reddish-gold surfaces feature moderate reflectivity in the fields and crisp design definition. Such characteristics are common among 1882 gold dollar representatives given the low mintage of just 5,000 pieces. Population: 29 in 66, 43 finer (7/15). NGC ID# 25DL, PCGS# 7583

**1883 Gold Dollar, MS67+
Modest Cameo Contrast**

6027 1883 MS67+ PCGS. CAC. The 1883 gold dollar was heavily saved at the time of issue and is usually available for type representation, even in high grade. Yet, above the MS67 level this issue becomes conditionally rare. This Plus-graded example is boldly struck, with frosty motifs that offer modest cameo contrast against the mirrored golden-orange fields. PCGS lists only a dozen finer representatives in MS68 (7/15). NGC ID# 25DM, PCGS# 7584

6028 1887 MS65 PCGS. Ex: Stecher Collection. A beautiful sun-gold Gem that boasts a sharp strike and exemplary preservation. Per its prior Heritage auction appearance, Karl Stecher, Sr. purchased the present coin from the Gutttag Bros. of New York for \$6.00 during the 1930s.
Ex: *ANA National Money Show (Heritage, 3/2007)*, lot 1662. NGC ID# 25DS, PCGS# 7588

6029 1889 MS65+ PCGS. CAC. Strong luster embraces the yellow-gold surfaces of this high-end Gem. The design elements are well-struck except for the usually seen weakness in some of the letters in LIBERTY. A few minor marks are within the parameters of the designated grade. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, Superb MS68
Tied for Finest Certified**

6030 1889 MS68 PCGS. The 1889 is one of the most plentiful dates in the gold dollar series, and is highly popular as a final-year type coin. However, only a paltry six examples are certified by PCGS as MS68 (7/15), the current coin among them. The strike is bold and the satiny orange-gold surfaces are seemingly free of even the slightest imperfection. The reverse is semiprooflike. Superb. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

6031 1835 AU58 PCGS. Breen-6141, Variety 6, R.2. A pleasing Borderline Uncirculated Classic type coin. The peach-gold surfaces are refreshingly unmarked, and the borders retain substantial flashes of luster. The hair above the ear is softly brought up, usual for the variety. NGC ID# 25FT, PCGS# 7693

6032 1838 AU55 NGC. Breen-6146, Variety 19, R.2. The Philadelphia Mint recorded the production of 47,030 quarter eagles in 1838, and they were all minted from a single pair of dies. This Choice AU example has rich coppery-orange toning on both sides that accents the light yellow luster. NGC ID# 25FY, PCGS# 7696

6033 1838 AU58 PCGS. Breen-6146, Variety 19, R.2. A single die pair is identified for the 1838 quarter eagle coinage. This sharply detailed near-Mint example retains virtually all of its satiny mint luster with brilliant yellow surfaces and splashes of pale orange toning. NGC ID# 25FY, PCGS# 7696

**1839-O Two and a Half, XF45
Only New Orleans Classic Issue**

6034 1839-O XF45 NGC. Breen-6152, Variety 27, R.3. The High Date, Wide Fraction variety. No gold coins were struck at New Orleans in its first year of operation, 1838. Thus, the 1839-O is the sole Classic issue coined at the facility. Only 17,781 pieces were issued. The present almond-gold example displays moderate wear. Abrasions are absent aside from a hair-thin diagonal line on the field near the profile. NGC ID# 25G7, PCGS# 7701

**1839-O Quarter Eagle, Luminous AU58
Original Green-Gold Color, Bold Detail**

- 6035 1839-O AU58 PCGS. CAC. Breen-6152, Variety 27, R.3.** High Date, Wide Fraction. The more available of two varieties. This offering represents the first gold issue struck at New Orleans, consisting of 17,871 coins. As an introductory issue, many pieces were saved, though few survivors are as appealing as this near-Mint example. Medium green-gold coloration is obviously original. Vibrant luster emanates from the design recesses, illuminating sharply struck devices with typical incompleteness between 5 and 7 o'clock at the lower reverse. Each side is void of distracting abrasions. *From The College Collection, Part Two.* NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

- 6036 1841-D — Removed From Jewelry — NGC Details. AU. Variety 2-C.** This low mintage Dahlonega two and a half has little if any wear from circulation, but the olive-green surfaces are hairlined and microgranular. The fields display scattered minor abrasions. NGC ID# 25GF, PCGS# 7722

**1842 Quarter Eagle, AU55
Rare Early Philadelphia Issue**

- 6037 1842 AU55 NGC.** The Philadelphia Mint coined a paltry 2,823 quarter eagles in 1842, and most were either lost over time or heavily circulated. Surviving examples in any grade are rare, and AU or finer specimens are exceedingly so. This Choice AU representative displays a touch of light wear over each side, with faint apricot overtones accenting primarily green-gold patina. No major abrasions are observed, giving this piece a pleasing level of eye appeal. Census: 4 in 55, 5 finer (6/15). NGC ID# 25GG, PCGS# 7723

**1842-O Quarter Eagle, MS61
Good Luster and Eye Appeal**

- 6038 1842-O MS61 NGC. Variety 1.** Only a single die marriage was required to produce the 19,800 New Orleans Mint quarter eagles dated 1842. Most of those coins circulated heavily, due no doubt in part to pent-up demand from the lack of any O-mint quarter eagles being struck for circulation in 1841. (And a reported 50 1841-O half eagles were made, but none are known to survive today in any collection.) This piece shows a few scattered abrasions for the grade, but perhaps fewer than expected, and the eye appeal remains quite high on the wheat-gold, lustrous surfaces. The 1842-O quarter eagle is nearly always found weakly struck through the centers, and this example is no exception. Census: 4 in 61, 7 finer (7/15). NGC ID# 25GK, PCGS# 7726

**1843-C Two and a Half, AU58
Large Date, Plain 4**

- 6039 1843-C Large Date, Plain 4, AU58 PCGS. CAC. Variety 1.** The borders teem with luster, and the fields display relatively few consequential abrasions. The centers show the incompleteness of strike customary for the issue. Although more available than its Small Date counterpart, the 1843-C Large Date is nonetheless rare in Mint State, and AU examples are very scarce. Population: 10 in 58, 12 finer (6/15). *Ex: Milwaukee Central States Signature (Heritage, 4/2010), lot 3450.* NGC ID# 25GN, PCGS# 7728

- 6040 1843-O Large Date, Plain 4 AU55 NGC. Variety 1.** The Large Date, Plain 4 1843-O quarter eagles are far scarcer than their Small Date, Crosslet 4 counterparts. This lightly circulated caramel-gold Large Date example is minimally abraded and shows moderate incompleteness of strike on Liberty's curls. NGC ID# 25GS, PCGS# 7732

**1846 Quarter Eagle, MS61
Low-Mintage Issue**

- 6041 1846 MS61 NGC.** Myriad surface marks prevent a higher grade to this greenish yellow-gold quarter eagle that was struck prior to the California gold rush. Both sides exhibit reflective fields and bold design motifs. The 1846 is a low-mintage condition rarity from a production of only 21,598 coins. Census: 17 in 61, 4 finer (7/15). NGC ID# 25GZ, PCGS# 7740

**1847-C Quarter Eagle, AU58
Collectible Charlotte Representative**

- 6042 1847-C AU58 NGC. Variety 1.** The 1847-C is the most collectible Charlotte quarter eagle with a mintage of 23,226 coins, but examples are "scarce in properly graded AU58 and rare in Uncirculated [condition]," according to Doug Winter. Reddish-gold surfaces display extraordinary detail for the facility with bold stars and crisp definition on the portrait and eagle. A trace of high-point blending occurs over the hair curls and feathers, but abrasions from circulation are minimal. Census: 45 in 58, 33 finer (7/15). NGC ID# 25H6, PCGS# 7745

1852-C Two and a Half, Honey-Gold AU58

- 6043 1852-C AU58 PCGS. Variety 1.** A honey-gold Borderline Uncirculated example of this rare Charlotte issue. Just 9,772 pieces were struck, and the typically encountered survivor is a cleaned XF. The present coin is significantly finer since wear is minimal and there are no detracting marks. The centers show moderate incompleteness usual for the remote branch facility. Population: 11 in 58 (1 in 58+), 6 finer (7/15). NGC ID# 25HS, PCGS# 7764

1852-O Quarter Eagle, Seldom-Seen MS61

- 6044 1852-O MS61 NGC. Variety 1,** scarcer than Variety 2, showing a bit of the fletchings inside the top-left corner of the mintmark. Even though it has a much larger mintage at 140,000 coins, the 1852-O quarter eagle in Mint State is of similar rarity to its smaller-mintage cousins, the 1852-C and 1852-D quarter eagles. Doug Winter's latest O-mint reference calls it "one of the rarest No Motto eagles" and a "very undervalued date that has still not received the merit it deserves, especially in higher grades." This piece shows good reflectivity on honey-gold surfaces that show light smoky accents. A few larger scrapes appear under a loupe both before and behind Liberty's head, and the strike is typically soft on the eagle's wing tips, lower legs, and claws. Census: 18 in 61, 11 finer (7/15). NGC ID# 25HU, PCGS# 7766

**1854-C Quarter Eagle, AU53+
Better Charlotte Date**

- 6045 1854-C AU53+ NGC. Variety 1.** The 1854-C quarter eagle is scarcer than the certified population reports would suggest. Likely only 105 to 145 examples are known in all grades, these more or less evenly distributed throughout the VF, XF, and AU grade ranges. In Mint State, this issue is genuinely rare. The present Plus-graded AU coin displays medium green-gold patina with minimal abrasions. Weakness on the central eagle and the hair curls around Liberty's face is due to strike, not wear. Census: 20 in 53+, 65 finer (6/15). NGC ID# 25HY, PCGS# 7770

**1856-C Quarter Eagle, AU55
Variety 1, the Only Dies**

- 6046 1856-C AU55 NGC. Variety 1.** The only known dies for the 1856-C quarter eagle saw a total production of just 7,913 coins. Hints of orange toning remain in the protected areas of the design, with scattered grade-consistent marks that are entirely insignificant. Traces of luster remain on both sides of this pleasing Charlotte quarter eagle. Census: 15 in 55, 31 finer (7/15). NGC ID# 25J8, PCGS# 7778

1856-C Two and a Half, AU58
Difficult Charlotte Issue

- 6047 1856-C AU58 NGC. Variety 1.** A mintage of 7,913 pieces confirms the rarity of this antebellum Charlotte issue. The caramel-gold surfaces are minimally abraded, although the mint-made strike-throughs (customary for the '56-C) provide a granular appearance. The major devices are lightly brought up, as always for the issue. Census: 19 in 58, 12 finer (6/15). NGC ID# 25J8, PCGS# 7778

1859 Quarter Eagle, MS63
Type Two Reverse

- 6048 1859 New Reverse, Type Two, MS63 PCGS.** A new reverse hub was introduced in 1859, exhibiting several minor differences in the placement of the lower design elements, most notably that of the arrows, which are smaller and well-separated on the Type Two Reverse. This variant is only slightly scarcer than its Type One Reverse counterpart, though both are elusive in all Mint State grades. This piece displays original honey-gold luster and sharp motifs. Surface abrasions are faint and evenly dispersed. Population: 11 in 63, 5 finer (6/15). NGC ID# 25JK, PCGS# 7788

- 6049 1861 New Reverse, Type Two, MS64 PCGS.** The New Reverse has long, slender arrows that are fully separated. This rich lemon-yellow example has frosty mint luster with delightful orange overtones. Minuscule field marks limit the grade of this near-Gem. NGC ID# 25JX, PCGS# 7794

1861 New Reverse Quarter Eagle
Boldly Struck Gem

- 6050 1861 New Reverse, Type Two, MS65 PCGS. CAC.** The 1861 New Reverse quarter eagles are popular as a Civil War memento and also because they are usually well-struck. In any case, they are conditionally elusive at the Gem level, despite the large mintage exceeding 1.2 million pieces. This example displays a strike that is virtually full, complementing bright yellow-gold color. Population: 31 in 65, 12 finer (6/15). NGC ID# 25JX, PCGS# 7794

1862 Quarter Eagle, MS63
Very Rare So Well-Preserved

- 6051 1862 MS63 PCGS.** The economic impact of the Civil War is clear by examining the decline in quarter eagle mintages beginning in 1862. Between 1861 and 1862, the production of quarter eagles at the Mint dropped by over 92%. One year later, no two and a half dollar gold coins were produced at all. The 1862 (98,508 coins struck) is very scarce in all grades and rare in Uncirculated condition. Select survivors are very rare. This piece has rich orange and reddish-gold color with luminous luster and a full strike. Light field marks are undistracting. Population: 8 in 63, 3 finer (7/15). NGC ID# 25JZ, PCGS# 7796

1866-S Quarter Eagle, MS61
Rare in Mint State

- 6052 1866-S MS61 PCGS. CAC.** The 1866-S Liberty quarter eagle had a mintage of only 38,960 pieces, most of which were lost to circulation. Today, the typical survivor grades only VF or XF; this issue is scarce in AU and any Mint State coin is a major rarity. This MS61 example shows original frosty luster with honey and coppery-gold hues in the fields. Some minor striking softness on the eagle's left (facing) leg is not unusual for the issue. Population: 3 in 61, 1 finer (7/15). NGC ID# 25K8, PCGS# 7804

- 6053 1868-S AU58 PCGS. CAC.** The 1868-S Liberty quarter eagle claims a mintage of 34,000 pieces and high-grade examples are very scarce. This attractive near-Mint specimen is lightly worn and lightly abraded, with orange-gold surfaces that retain traces of original mint luster. Population: 17 in 58, 13 finer (7/15). *From The College Collection, Part Two.* NGC ID# 25KC, PCGS# 7808

- 6054 1869-S AU58 NGC.** This San Francisco quarter eagle issue, like its contemporaries, circulated extensively and is rarely found in high grades. Reddish-gold, partly lustrous surfaces exhibit strong detail with full star centers and minimal marks. Light blending occurs over the eagle's feathers. Census: 67 in 58, 19 finer (6/15). NGC ID# 25KE, PCGS# 7810

- 6055 1870 AU58+ NGC.** From a small mintage of 4,520 business-strike examples, this attractive near-Mint quarter eagle shows only the slightest wear on the high points of the design elements and the lightly marked green and rose-gold surfaces retain much of their original mint luster. Census: 38 in 58 (1 in 58+), 19 finer (7/15). NGC ID# 25KE, PCGS# 7811

1870 Quarter Eagle, MS60
Generous Luster and Attractive Color

6056 1870 MS60 PCGS. CAC. A meager 4,520 circulation strikes were made of the 1870 quarter eagle, and today the issue is difficult to find in any problem-free grade. Mint State pieces are correspondingly more elusive. This example shows generous luster. A couple of large scrapes show in the left obverse field, with others on the cheek of Liberty; her profile and coronet show some radial "lathe lines," an apparent remnant of the die production. Other smaller marks appear on the reverse. The strike is nice and sharp throughout. Population: 1 in 60, 8 finer (7/15). NGC ID# 25KF, PCGS# 7811

6057 1878 MS64 PCGS. CAC. The large mintage of 286,240 pieces belies the scarcity of this issue in higher grades, although it is still a favorite date for type. A near-Gem coin such as this is perhaps the optimal Mint State grade for collectors, with full Gem and finer coins considerably more challenging. This CAC-endorsed example is frosty, lustrous, and highly attractive with a sharp strike. A few minor luster grazes are the only marks to mention. PCGS has graded just 47 coins finer (7/15). NGC ID# 25KY, PCGS# 7828

1881 Two and a Half, AU50
Only 640 Examples Struck

6058 1881 AU50 NGC. A paltry 640 quarter eagles were produced in 1881, making this issue "one of the most popular and sought-after dates in the series," per Garrett and Guth. The majority of survivors seem to grade in the AU range, though even these are seldom seen. This piece displays fully original, olive-gold color overall, with remnants of prooflike mirroring seen in the fields. Only light wear is present over the high points of the design, and surface flaws are seemingly nonexistent. Census: 4 in 50, 61 finer (6/15). NGC ID# 25L5, PCGS# 7833

1888 Quarter Eagle, MS66
Single Finest at PCGS

6059 1888 MS66 PCGS. Despite a scant mintage of only 16,001 coins, the 1888 quarter eagle is marginally plentiful in lower Mint State grades, but in Gem condition the date is rare and finer coins are exceedingly so. This Premium Gem is the sole finest at PCGS (6/15). The original frosty surfaces show warm straw-gold coloring and are devoid of obvious abrasions. A touch of striking weakness is seen on the central shield and the eagle's left (facing) leg, as usual. NGC ID# 25LC, PCGS# 7840

1893 Two and a Half, MS66

6060 1893 MS66 NGC. Despite the Panic of 1893 the mintage of the 1893 quarter eagles was far larger — about 12 times — that of the 1892s. Gem examples are nonetheless rare; perhaps because of the larger mintage, fewer were saved. This Premium Gem boasts greenish-gold and orange-gold hues competing for territory. Each side is sharply struck and shows few marks, but a small planchet lamination, as made, occurs in the obverse field above star 1. Census: 26 in 66 (1 in 66+), 4 finer (7/15). NGC ID# 25LH, PCGS# 7845

1893 Quarter Eagle, MS66
Razor-Sharp, Conditionally Rare

6061 1893 MS66 PCGS. The certified population for this date drops significantly at the Gem grade level, and even further at MS66; pieces grading finer than the present coin are extremely rare. This piece is fully struck. The surfaces are frosty and display varying orange-gold hues. There are no bothersome abrasions. Population: 24 in 66, 2 finer (7/15). NGC ID# 25LH, PCGS# 7845

6062 1895 MS64 PCGS. Excellent detail on hair and feathers alike. This near-Gem is lightly marked on its honey-gold surfaces but the luster is strong. A great 19th century type coin from a better issue of just 6,000 business strikes. Population: 32 in 64, 24 finer (7/15). NGC ID# 25LK, PCGS# 7847

**1898 Two and a Half, Fully Defined MS66+
Seemingly Pristine, Just 24,000 Coins Struck**

- 6063 1898 MS66+ PCGS. CAC.** Light lemon-gold coloration throughout with coruscating mint frost over each side. The devices show complete definition on the stars, hair curls, feathers, fletchings, and olive leaves. Although it is somewhat scarcer than the 1900 and 1907 quarter eagle issues, the 1898 (24,000 coins struck) is still popular for type representation, a role for which this nearly flawless Premium Gem is perfectly suited. Population: 39 in 66 (2 in 66+), 11 finer (7/15). NGC ID# 25LN, PCGS# 7850

- 6064 1903 MS66 ★ NGC. CAC.** Honey-gold patina embraces this gorgeous Premium Gem, with the obverse central device highlighted by the semiprooflike fields. The design elements are crisply defined, further enhancing the coin's outstanding eye appeal. While the 1903 is plentiful through MS66, NGC has given a mere two examples the coveted Star and assigned four finer with this designation (7/15). NGC ID# 25LU, PCGS# 7855

**1905 Two and a Half, MS67+
Superb Type Coin**

- 6065 1905 MS67+ NGC.** Any 1905 quarter eagle in MS67 is a special coin, and this piece has the added distinction of a Plus designation. Both sides are boldly struck, illuminated by luminous peach-gold luster that is devoid of abrasions. The eye appeal is exceptional. Only six coins are finer at NGC (7/15). NGC ID# 25LW, PCGS# 7857

1905 Quarter Eagle, Glowing MS67+

- 6066 1905 MS67+ NGC.** A spectacular type coin, aglow in luminous orange-gold luster that rolls over each side in frosty shimmers. The strike is fully executed. Occasional lilac and coppery hues attest to the originality of the surfaces, but are only discernible with a glass. A tiny planchet lamination near star 3 should not be mistaken for an abrasion, as there are none detectable. Only six coins are finer at NGC (7/15). NGC ID# 25LW, PCGS# 7857

**1905 Quarter Eagle, MS67+
A Favorite Among Type Enthusiasts**

- 6067 1905 MS67+ PCGS.** The 1905 is a favorite among type enthusiasts because of its availability up to and including MS67 condition. Superb Gems with a Plus designation are rarely encountered, however, and finer examples consistently fetch many times that of an MS67, making this an ideal collectible grade. This is an essentially perfect coin with pinpoint strike definition. Gorgeous sun-gold surfaces lack copper alloy spots that typically plague the issue. Population: 78 in 67 (4 in 67+), 3 finer (7/15). NGC ID# 25LW, PCGS# 7857

**1905 Quarter Eagle, High-End MS67+
Impeccable Type Representative**

- 6068 1905 MS67+ PCGS. CAC.** A plentiful late-series date, the 1905 is available in grades through MS67. However, finer examples are extremely rare, making this Plus-graded piece a must-have item for the advanced type or date collector. Heavily frosted luster blankets green-gold surfaces on each side. The design elements are fully struck. Close examination fails to find any noteworthy flaws. NGC has certified only six finer representatives (7/15). NGC ID# 25LW, PCGS# 7857

- 6069 1906 MS65 PCGS Secure.** This late-date Coronet quarter eagle Gem is light yellow-gold with a handful of coppery flecks. Well-struck and well-suited to a type or date set.
From The College Collection, Part Two. NGC ID# 25LX, PCGS# 7858

- 6070 1906 MS65 NGC. CAC.** Boldly impressed with effusive luster, yellow-orange and honey-gold with a few touches of green. A carefully preserved Gem ideal for the type collector.
From The Glacier Collection. NGC ID# 25LX, PCGS# 7858

- 6071 1906 MS66 PCGS.** The well-preserved orange-gold surfaces of this delightful Premium Gem radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. Eye appeal is extraordinary. NGC ID# 25LX, PCGS# 7858

**1906 Quarter Eagle, Fully Struck MS67+
Just Two Submissions Finer at PCGS**

- 6072 1906 MS67+ PCGS. CAC.** This is one of the more plentiful issues in the series with thousands of coins certified through the Premium Gem grade level. The 1906 (176,330 pieces struck) becomes very scarce in MS67 and extremely rare in MS68. The surfaces of this high-end Superb Gem are virtually perfect with only a handful of microscopic specks in the upper reverse field that prevent a full MS68 grade. Frosty luster rolls over light peach-gold surfaces with fully struck design features. A tiny planchet flake appears above star 8. Population: 58 in 67 (1 in 67+), 2 finer (7/15). NGC ID# 25LX, PCGS# 7858

PROOF LIBERTY QUARTER EAGLES

**1890 Quarter Eagle, PR63 Ultra Cameo
Small Proof Mintage, Few Survive**

- 6073 1890 PR63 Ultra Cameo NGC.** Just 93 proofs were struck in 1890 with perhaps 50 to 60 surviving examples. Of these, only a few Deep or Ultra Cameos can lay claim to the rich, orange-gold color and the high-contrast frosted, devices of this deep-mirrored Select Proof. The strike is pinpoint-sharp, while a random scattering of hair-thin lines determine the assigned grade. Census: 1 in 63 Ultra Cameo, 22 finer (6/15). NGC ID# 288D, PCGS# 97916

**1894 Two and a Half, PR63 Cameo
Collector-Grade Proof**

- 6074 1894 PR63 Cameo PCGS.** From a mintage of 122 proof quarter eagles in 1894, likely no more than 80 survive in all grades. This Select Cameo is a delightful example for the budget-conscious collector, showing stark field-motif contrast and deep mirrors. The strike is full and the grade is determined by a few light, scattered marks in the fields, none of which are singularly bothersome. Population: 2 in 63 Cameo, 0 finer (7/15). NGC ID# 288H, PCGS# 87920

**Proof 1898 Quarter Eagle, Unc Details
Stark Field-Device Contrast**

- 6075 1898 — Altered Surfaces — PCGS Genuine. Proof, Unc Details.** From a proof mintage of just 165 coins, this starkly contrasted, yellow-gold example offers the budget-conscious collector with a still-pleasing entry into 19th century proof gold. Full struck with deeply mirrored fields. Light, scattered ticks in the fields on each side are accompanied by a few light hairlines on the reverse, the latter likely from an attempt to soften the former. The eye appeal is only marginally affected. NGC ID# 288M, PCGS# 7924

- 6076 1902 — Cleaning — PCGS PR Genuine. AU Details.** A lightly circulated example of this turn-of-the-century proof, with just a trace of wear on the high points of the design elements and lightly marked fields that retain much of their original reflectivity, despite the noted cleaning. NGC ID# 288S, PCGS# 7928

INDIAN QUARTER EAGLES

**1908 Indian Quarter Eagle, MS65
Gleaming Gold Type Coin**

- 6077 1908 MS65 PCGS.** The obverse is smooth and impressive — sharply struck and nearly mark-free. Flashy mint luster radiates from beneath the honey-gold coloration. The reverse is equally lustrous, with a few light field lines and the characteristic soft strike on the eagle's upper top-most wing feathers, the result of poor die preparation for this first-year issue. A great type coin, truly Gem condition. NGC ID# 288Y, PCGS# 7939

**1908 Quarter Eagle, MS65
First-Year Type Example**

- 6078 1908 MS65 PCGS.** Primarily light yellow-gold with areas of deep lemon. Minor die erosion at the margins and a degree of central striking softness have little influence on the Gem grade, which is warranted for the relative smoothness of the interior surfaces. This first-year Indian quarter eagle is ideal for a type set. NGC ID# 288Y, PCGS# 7939

**1908 Quarter Eagle, MS65+
Strong Definition and Eye Appeal**

6079 1908 MS65+ NGC. CAC. A razor-sharp Gem, the only area of softness occurs on the eagle's upper wing, as always. David Akers notes that the typical incompleteness "is not the result of a weak strike but rather stems from a lack of die detail." Orange-gold colors each side with intermittent glints of mint-green. The 1908 is one of the most available issues in the series in high grades, making this a suitable representative for type purposes. This is one of just seven Plus-designated Gems at NGC (6/15). NGC ID# 288Y, PCGS# 7939

**1908 Two and a Half Dollar, MS66
Virtually Unseen in Higher Grades**

6082 1908 MS66 PCGS. The 1908 was heavily saved as a first-year issue, but few survivors are of Premium Gem quality. In fact, examples are very scarcely seen at this grade level, and finer coins are extremely rare with no more than five pieces extant. Marvelous orange-gold surfaces display strong detail on the obverse, while the well-defined reverse features a degree of incompleteness on the tip of the eagle's wing — a hallmark of the issue, which was struck from improperly prepared dies. PCGS reports only two finer submissions (7/15). NGC ID# 288Y, PCGS# 7939

**1908 Indian Quarter Eagle, MS65+
First-Year Type Coin**

6080 1908 MS65+ PCGS. CAC. The 1908 Indian quarter eagle was heavily saved as a first-year memento and is thus the most available date in the series in high grade. Its popularity as a type coin is rivaled by few. This Plus-designated Gem example is well-struck, with satiny orange-gold luster and fairly clean surfaces. The softness on the eagle's wing is diagnostic of this issue, a product of insufficient engraving of the die rather than striking deficiency. NGC ID# 288Y, PCGS# 7939

**1908 Indian Quarter Eagle, MS66
Only Two Finer at PCGS**

6083 1908 MS66 PCGS. CAC. This is the first year of issue of Bela Lyon Pratt's distinctive Indian head design with the details sunk below the level of the field. The design met with mixed reviews at the time of issue, although it is extremely popular today. This Premium Gem has a bold strike and frosty luster with brilliant yellow surfaces. PCGS has only certified two finer examples (7/15). NGC ID# 288Y, PCGS# 7939

**1908 Indian Head Quarter Eagle, MS66
Important First-Year Issue**

6081 1908 MS66 PCGS. This was the first year for Bela Lyon Pratt's Indian Head design, which was not received with great enthusiasm by the general public. Despite being well-saved, the number of high-grade survivors is not great. The present lovely Premium Gem shows only minor incompleteness on the eagle's shoulder and breast feathers, yet it is boldly struck on the obverse. Light mint-green and deeper peach-gold hues are attractively blended over both sides. PCGS reports just two coins in a numerically finer grade (6/15). NGC ID# 288Y, PCGS# 7939

6084 1909 MS63 PCGS. Greenish-gold and apricot patina compete for territory on the lustrous surfaces of this Select quarter eagle. The design features are well-struck throughout. Some minute marks determine the grade. The 1909 quarter eagle is readily obtainable through MS64.

From The Badger Collection. NGC ID# 288Z, PCGS# 7940

6085 1909 MS63 PCGS. The attractive orange-gold surfaces of this impressive Select example show the minimum number of minor contact marks for the grade, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is strong. NGC ID# 288Z, PCGS# 7940

**1909 Indian Quarter Eagle
Exceptional Gem Surfaces**

6086 1909 MS65 PCGS. CAC. Our consignor has assembled an outstanding set of Gem Indian quarter eagles, and this conditionally scarce Philadelphia issue fits right in. Satiny and extremely attractive, the surfaces and strike are beyond reproach. The medium-gold surfaces are tinged with orange and lilac with brilliant mint luster shining through. This is arguably one of the scarcer dates in the series in terms of grading service submissions and high-grade rarity. PCGS has certified no coins finer than MS66, with just 18 pieces so-graded (6/15). NGC ID# 288Z, PCGS# 7940

6087 1910 MS64 NGC. This near-Gem exhibits excellent definition throughout. Pretty peach-gold color adorns lustrous surfaces, and minor marks in the fields limit the grade. The 1910 is collectible through MS64, but examples are scarcely seen finer.
Ex: Central States Signature (Heritage, 5/2007), lot 3429. NGC ID# 2892, PCGS# 7941

**1910 Indian Two and a Half, MS65
Lovely Coloration**

6088 1910 MS65 NGC. This is a beautiful Gem. In addition to the outstanding surface quality that comes with the grade, this piece showcases frosty luster in attractive variations of apricot, rose, bronze, and lilac-gold hues. The strike is a trifle soft above the Indian's brow and on the eagle's left (facing) talons, but this is only detected with a loupe. NGC lists just 15 MS66 coins finer (7/15). NGC ID# 2892, PCGS# 7941

**1910 Two and a Half, MS65
Satin-Smooth, Green Label Holder**

6089 1910 MS65 PCGS. The sharp strike and satiny, honey-gold luster set this Gem quarter eagle apart from all others. The obverse eye appeal suggests an even finer grade, while the reverse is equally appealing to the unaided eye. A few microscopic marks in the upper-left reverse field are widely scattered and of little impact. Housed in a green label holder. Just 11 coins are certified numerically finer by PCGS (6/15). NGC ID# 2892, PCGS# 7941

**1911 Quarter Eagle, Sharp MS65
Just One Finer at PCGS**

6090 1911 MS65 PCGS. Brilliant and frosty, the surfaces of this Gem quarter eagle lack the overt granularity often seen for the issue. Rather, the finely textured fields and deeply impressed devices capture and project blazing rich-gold luster. A few widely scattered, microscopic marks are minor in the context of the coin's overall radiance and eye appeal. PCGS has certified only a single numerically finer example (6/15). NGC ID# 2893, PCGS# 7942

**1911 Quarter Eagle, MS65
Only One Finer PCGS Coin**

6091 1911 MS65 PCGS. CAC. The 1911 had the second highest mintage of any Indian quarter eagle, yet it is a popular date due in part to the rarity of its Denver-Mint brother. This lovely Gem has brilliant orange gold surfaces, exhibiting a sharp strike and frosty luster. PCGS has only certified one finer example (7/15). NGC ID# 2893, PCGS# 7942

6092 1911-D Strong D — Mount Removed — PCGS Genuine. AU Details. The edge is filed near 6 o'clock, presumably to remove evidence of a mount. The apricot-gold fields are glossy. The mintmark is well defined, and the devices show only slight wear. A low mintage series key. NGC ID# 2894, PCGS# 7943

**1911-D Strong D Quarter Eagle, AU53
Popular Collector Grade**

6093 1911-D AU53 PCGS. Strong D. The 1911-D quarter eagle is the sole series key in all grades to the Indian Head series, although there are a couple of conditional rarities in Mint State. This is a nice collector-grade example of the issue, showing most of the original luster over khaki-gold surfaces with a few minor surface ticks and great eye appeal. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, AU58
Sought-After Key Issue**

- 6094 1911-D AU58 NGC.** The 1911-D Indian quarter eagle has long been acknowledged as the low-mintage key to the series and one of the most sought-after 20th century U.S. coins. This attractive near-Mint example displays sharply detailed design elements with just a trace of high-point wear, and lightly abraded orange-gold surfaces. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, AU58
Strong D**

- 6095 1911-D AU58 PCGS. CAC. Strong D.** For the collector avoiding the pricey Mint State grades, this Borderline Uncirculated 1911-D quarter eagle is a suitable candidate. Unlike many of its comparably graded counterparts, this piece shows original orange-gold patina with hints of mildly granular luster remaining in the recesses. The mintmark is clearly defined. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, Unc Details
Low-Mintage Series Key**

- 6096 1911-D — Improperly Cleaned — NGC Details. Unc.** Still attractive, despite the noted cleaning, this unworn specimen exhibits razor-sharp definition on all design elements and the light greenish-gold surfaces show only minor signs of contact. From a mintage of 55,600 pieces, the 1911-D is the acknowledged key to the Indian series. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS61
High-End Eye Appeal, Strong D**

- 6097 1911-D Strong D, MS61 NGC.** While the 1911-D is the undisputed key to the Indian Head quarter eagle series, there are many opportunities at this grade level to acquire a Mint State example. This coin rates above many in eye appeal and surface quality. Attractive orange-gold patina covers both sides, and a strong loupe is needed to identify any marks. Slight blending at the eagle's shoulder contradicts an otherwise sharp strike, but the Strong D mintmark provides additional allure. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS62
Pleasing Patina**

- 6098 1911-D MS62 PCGS. Strong D.** This is a well-struck, satiny example of this key Denver issue, showing yellow-gold luster with deeper coppery overtones on portions of the reverse. Lightly abraded, as the grade suggests, but without any individually significant distractions. A collectible Mint State example of this sought-after series key. *From The Badger Collection.* NGC ID# 2894, PCGS# 7943

**1911-D Two and a Half, MS63
Pleasing Mint State Example**

- 6099 1911-D MS63 NGC. Strong D.** An impressive, apricot-gold Mint State example of this series key date. Were it not for a thin scratch in the field near star six, this piece might have garnered a finer grade; the reverse is devoid of mentionable abrasions. This piece shows a sharp mintmark and excellent detail throughout the headdress and eagle. As is diagnostic of this issue, the luster has a slightly granular appearance. NGC ID# 2894, PCGS# 7943

**1913 Quarter Eagle, MS65
Seldom Seen Finer**

6100 1913 MS65 PCGS. The high fields are remarkably unmarked for this technically challenged issue, which is often found with many abrasions. Just a few tiny marks and hair-thin lines are confined mostly to the reverse, where they are widely separated and minuscule. Stately satin luster emanates from the sharply struck surfaces amid wheat-gold coloration. Just seven examples are numerically finer at PCGS (6/15). NGC ID# 2897, PCGS# 7945

6101 1914 MS62 PCGS. Reddish-gold patination adorns both sides of this quarter eagle. The design features are sharply struck, including the shoulder feathers of the eagle. A few grease streaks are visible on the reverse.
From The Badger Collection. NGC ID# 2898, PCGS# 7946

6102 1914 MS63 NGC. The 1914 Indian quarter eagle claims a low mintage of 240,000 pieces, and the date ranks second behind only the 1911-D in terms of scarcity. This attractive Select coin offers sharply detailed design elements and vibrant mint luster with lightly marked greenish-gold surfaces and outstanding eye appeal. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS64
Attractive, Rich-Gold Color**

6103 1914 MS64 NGC. One of the eagerly sought issues of the quarter eagle series, trailing only the 1911-D in high-grades — a fact that makes this Philadelphia date particularly attractive to collectors and gold specialists in the present near-Gem grade. The bonnet is a trifle soft on the lower-most feathers, and a few shallow marks are distributed over the exposed fields. That said, the coin's attractive rich-gold coloration and abiding mint luster provide the main attraction, and this example is sure to entice a strong bid. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle
Appealing Near-Gem Example**

6104 1914 MS64 PCGS. A low-mintage issue for the series, this Philadelphia date seldom displays both attractive mint luster and rich orange-gold color, yet the current coin has both attributes. A sharp strike on the headdress and on the eagle's upper wing add to the appeal. Numerous small marks are visible with a glass — typical for the issue, accounting for the assigned near-Gem grade. NGC ID# 2898, PCGS# 7946

6105 1914-D MS63 PCGS. The yellow-gold surfaces of this Select quarter eagle display good luster and sharply struck design elements, including excellent detail on the eagle's shoulder. A few moderate marks in the upper-right reverse field preclude a finer grade. MS63- and MS64-graded coins are in high demand due to the rarity of Gem and finer pieces.
From The Badger Collection. NGC ID# 2899, PCGS# 7947

6106 1914-D MS63 PCGS. This is an appealing orange-gold representative of one of the more challenging issues in the Indian Head quarter eagle series behind the 1911-D and the 1914. The headdress feathers, eagle's shoulder, and leg exhibit crisp detail for the date. Wispy scattered marks preclude a near-Gem assessment. NGC ID# 2899, PCGS# 7947

6107 1914-D MS64 NGC. This better-date Indian Head two and a half features deep orange-gold color over both sides with occasional blushes of light rose. The devices are well-struck with trivial softness on the lower headdress feathers and the eagle's shoulder. NGC has only seen 44 examples finer (7/15). NGC ID# 2899, PCGS# 7947

**1915 Quarter Eagle, Pleasing MS65
Nicely Preserved, Coppery-Gold Highlights**

6108 1915 MS65 PCGS. A captivating combination of lilac, orange, and coppery-gold accents enhance the medium-gold coloration of this smoothly lustrous Gem quarter eagle. The strike is uniformly bold except at the lowest bonnet feathers, which show slight blending. A trio of tiny contacts near the eagle's wing are the sole marks to mention. Gem or finer examples are the exception for this Philadelphia issue, with both services combined reporting just a dozen numerically finer coins (6/15). NGC ID# 289A, PCGS# 7948

6109 1925-D MS65 PCGS. This impressive Gem displays pleasing orange-gold surfaces that are free of mentionable distractions and radiate vibrant mint luster on both sides. Sharply detailed design elements add to the ample eye appeal. PCGS has graded 34 numerically finer examples (7/15). NGC ID# 289B, PCGS# 7949

6110 1925-D MS65 PCGS. This impressive Gem displays sharply detailed design elements and vibrant mint luster throughout. The pleasing lemon-yellow surfaces are free of all but the most insignificant signs of contact.
From The College Collection, Part Two. NGC ID# 289B, PCGS# 7949

6111 1925-D MS65 PCGS. The 1925-D, one of three Denver issues in the series, is one of the most frequently seen Indian quarter eagles in Gem condition, popular among type collectors. This glowing orange-gold example is devoid of major abrasions and highly eye-appealing. The lower portion of the Indian's headdress shows considerable striking weakness. Housed in a green label holder. NGC ID# 289B, PCGS# 7949

6112 1925-D MS65 NGC. CAC. The third and final Indian Head quarter eagle struck at the Denver Mint, the 1925-D is an ideal type coin for Denver collectors. This sharply detailed example has frosty straw-gold luster. Although plentiful at this grade level, finer examples are extremely hard to locate.
From The Glacier Collection. NGC ID# 289B, PCGS# 7949

6113 1926 MS65 PCGS. The vivid orange-gold surfaces of this delightful Gem are well-preserved and brightly lustrous, to complement the sharply detailed design elements. Eye appeal is outstanding. PCGS has graded 42 numerically finer examples (7/15). NGC ID# 289C, PCGS# 7950

1926 Quarter Eagle, MS65+ Dramatic Coloration

6114 1926 MS65+ PCGS. CAC. Orange-gold color yields to olive and pale rose highlights over the dramatically toned surfaces of this high-end Gem quarter eagle. While the 1926 issue is readily available in grades up to MS65, few coins can pass muster for a higher designation. The present coin exceeds the norm with flying colors, while only a scattering of tiny field ticks prevent an even finer grade. Population: 11 in 65+, 42 finer (7/15). NGC ID# 289C, PCGS# 7950

6115 1927 MS65 PCGS. The mint bloom is full and displays fragile variegated patina that adds an extra dimension of visual interest to this solid Gem type coin. Crisply detailed with superior luster characteristics, this is a Gem Indian Quarter Eagle to remember. PCGS has graded 21 numerically finer examples (6/15). NGC ID# 289D, PCGS# 7951

6116 1927 MS65+ PCGS. This frosty Gem has bold design motifs and brilliant light yellow luster with bluish overtones. An exceptional example for a type set or advanced collection. NGC ID# 289D, PCGS# 7951

6117 1928 MS65 PCGS. This spectacular Gem offers sharply detailed design elements and vibrant mint luster throughout, with well-preserved orange-gold surfaces that add to the ample visual appeal. PCGS has graded 11 numerically finer examples (7/15). NGC ID# 289E, PCGS# 7952

1929 Two-and-a-Half, Exceptional MS65 Ex: Benson, Stunning Coloration

6118 1929 MS65 PCGS. Both sides of this memorable coin offer exceptional color and luster for an Indian quarter eagle. Lilac and rose accents intersperse the ample areas of vivid, orange-gold coloration and vibrant mint luster. Sharply struck, and the few surface contacts are entirely secondary to the stunning visual impact of this radiant Gem.
Ex: Ira S. Reed (2/1944); Benson Collection Part III (Superior, 2/2003), lot 1976. NGC ID# 289F, PCGS# 7953

1929 Quarter Eagle, MS65 Glimmering Peach-Gold Example

6119 1929 MS65 PCGS Secure. CAC. This late-date Indian Head quarter eagle issue is readily accessible through MS64, but Gems are surprisingly scarce. Advanced collectors with sights set on a Premium Gem or better example will have to wait for an opportunity to procure one of the eight pieces at PCGS and NGC combined. This glimmering peach-gold example exhibits strongly struck devices. The only notable impairment is a tiny struck-in grease mark on the necklace. PCGS reports only four examples finer (7/15).
From The College Collection, Part Two. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

6120 1854 AU55 NGC. This attractive Choice AU specimen shows just a trace of wear on the high points of the well-detailed design elements and the lightly abraded greenish-gold surfaces retain most of their original mint luster. NGC ID# 25M3, PCGS# 7969

6121 1854 AU55 PCGS. Peach-gold and olive-green toning graces this briefly circulated but partly lustrous first-year three dollar type coin. Smooth aside from moderate field marks near the date and denomination. Certified in a green label holder. NGC ID# 25M3, PCGS# 7969

6122 1854 AU58 NGC. Traces of luster reside in the recesses of this honey-gold near-Mint three dollar that exhibits well-defined design features. A few minute marks are in concert with the designated grade.
From The Badger Collection. NGC ID# 25M3, PCGS# 7969

**1854-O Three Dollar Gold, XF45
Collector-Grade Example**

- 6123 1854-O XF45 PCGS. Variety 2.** The 1854-O gold three dollar piece is a major rarity in Mint State, nearly to the same extent as the 1854-D, even though the Dahlonega issue is far rarer overall. This Choice XF 1854-O offers a collectible, well-detail option for the New Orleans gold enthusiast on a budget. The surfaces show original olive-gold patina with coppery overtones in the protected areas. Eye appeal is pleasing. NGC ID# 25M5, PCGS# 7971

- 6124 1854-O — Improperly Cleaned — NGC Details. AU. Variety 2.** Relatively free from bagmarks, but rotation beneath a light reveals patches of hairlines on both sides. Liberty's curls display moderate wear. Luster outlines the letters, wreath, and other protected areas. The usual lapped die state of this scarce and low mintage issue. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold, AU50
Low New Orleans Mintage**

- 6125 1854-O AU50 NGC. Variety 2.** The availability of the 1854-O begins to decline at the AU50 grade level, and it is a major rarity in Mint State. This piece shows bright yellow-gold surfaces, with a touch of high-point wear over the well-struck design elements. As the only New Orleans issue in the series, the 1854-O three dollar gold (24,000 pieces struck) appeals to a wide range of 19th century gold enthusiasts. NGC ID# 25M5, PCGS# 7971

**1854-O Gold Three Dollar, AU55
Sole New Orleans Issue**

- 6126 1854-O AU55 PCGS. Variety 2.** The 1854-O three dollar gold is challenging in all grades, but essential for a complete New Orleans gold collection. This Choice AU representative displays medium green-gold patina with hints of luster in the recesses. A lapped reverse die makes the strike look weaker than it actually is, as the obverse portrait is sharp. Population: 48 in 55, 21 finer (6/15). NGC ID# 25M5, PCGS# 7971

- 6127 1855 AU55 NGC.** Considerable luster remains on each side of this lightly worn yellow-gold three dollar piece. The surfaces are pleasing with only scattered and trivial handling marks. NGC ID# 25M6, PCGS# 7972

- 6128 1855 AU58 NGC.** Traces of luster reside in the recessed areas of this near-Mint three dollar piece. Well-struck design elements and minimally abraded surfaces round out the coin's pleasing eye appeal.
From The Badger Collection. NGC ID# 25M6, PCGS# 7972

1855-S Three Dollar, Seldom-Seen XF45

- 6129 1855-S XF45 PCGS.** The low-mintage 1855-S three dollar, struck in the amount of 6,600 pieces, is about as rare as the better-known 1854-D issue. This Choice XF example is a tad finer than the typical survivor, as the coins circulated extensively until the Civil War. This piece shows orange fields predominating against ice-blue high points, a beautiful coin with the expected wear, scattered marks, and some buildup in a couple of the letters. Population: 39 in 45, 41 finer (7/15). NGC ID# 25M7, PCGS# 7973

- 6130 1856 AU58 NGC.** The yellow-gold surfaces of this near-Mint three dollar are imbued with hints of soft rose color, and reveal just the expected number of marks associated with the grade designation. The design elements are well-struck.
From The Badger Collection. NGC ID# 25M8, PCGS# 7974

- 6131 1856 AU58 NGC.** Light wear is noted on the highest design points of this attractive near-Mint example. The satiny surfaces have nearly full luster and inconsequential marks. Faint field reflectivity is evident on each side. NGC ID# 25M8, PCGS# 7974

**1862 Gold Three Dollar, AU53
Original Patina**

- 6132 1862 AU53 PCGS.** The 1862 three dollar gold is a better date, boasting a low mintage of just 5,750 pieces and a fairly low survival rate in high grade. This AU representative shows original olive-gold patina with golden luster in the protected regions of the fields. The strike is well-executed and the devices show little evidence of circulation. NGC ID# 25MH, PCGS# 7983

1862 Three Dollar Gold, Near-Mint

- 6133 1862 AU58 NGC.** This is an attractive collector-grade example of this better three dollar gold issue, struck to the limited extent of only 5,750 pieces. The devices are sharply rendered and the surfaces yield original green-gold coloration. Faint, vertical die striations in the fields are as struck and denote unworn, Mint surface. Just a touch of friction appears over the high points of the devices. Census: 50 in 58, 45 finer (6/15). NGC ID# 25MH, PCGS# 7983

- 6134 1866 — Improperly Cleaned — NGC Details. AU.** The apricot-gold surfaces lack noticeable hairlines, but appear wavy above Liberty's bust tip and the upper left portion of the wreath. The curls display slight wear, but luster emerges from design recesses. The reverse exhibits a wire rim near 12 o'clock. One of only 4,000 pieces struck. NGC ID# 25MM, PCGS# 7987

1868 Gold Three Dollar, MS62 Semiprooflike Fields

- 6135 1868 MS62 PCGS.** Few Mint State examples of the 1868 gold three dollar are available, and rarely is a piece offered that is finer than the current example. Both sides show well-struck devices with semiprooflike fields and rich apricot-orange color. Abrasions are surprisingly minimal for the grade, and the eye appeal is correspondingly high. Population: 43 in 62 (1 in 62+), 42 finer (6/15).
From The Badger Collection. NGC ID# 25MP, PCGS# 7989

1873 Closed 3 Three Dollar XF Sharpness, Rare Variety

- 6136 1873 Closed 3 — Repaired — PCGS Genuine. XF Details.** The business mintage of the 1873 Closed 3 is unknown but undoubtedly very low. The PCGS Population report lists at least one example in each grade between XF45 and MS64, but the combined total is just 69 pieces. The present piece has unusual olive-green color. Obverse smoothing affects the peripheries of several letters in UNITED STATES OF AMERICA, and the dentils near 8:30 have a blurry appearance. NGC ID# 25MW, PCGS# 7995

- 6137 1874 AU58 PCGS.** Ample luster is apparent over the honey-gold surfaces of this near-Mint three dollar gold piece. The design features are well defined except for the often-seen softness in the hair at Liberty's forehead and above the ear. Neither side reveals significant marks. This is an excellent type coin.
From The Badger Collection. NGC ID# 25MX, PCGS# 7998

1874 Gold Three Dollar, MS62 Prooflike Cameo Contrast

- 6138 1874 MS62 Prooflike NGC.** NGC lists 29 Prooflike 1874 three dollar gold pieces, but almost half of them are in AU grades; this piece is one of only four Prooflike coins in MS62 and there are just two MS63 examples finer (7/15). Gleaming yellow-gold fields provide stark cameo contrast without any significant abrasions. The wreath bowknot is soft, but the obverse portrait is well-defined. PCGS# 77998

- 6139 1878 AU58 NGC.** A trace of high-point wear is noted on each side of this pleasing piece that retains nearly full luster. A few scattered marks are inconsequential. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS63 Partially Prooflike Fields

- 6140 1878 MS63 PCGS.** Satiny orange-gold luster illuminates the minimally abraded surfaces of this Select three dollar gold type coin, while the only noticeable striking weakness is seen on the reverse bowknot, as usual. The 1878 is by far one of the most plentiful issues in the series in Mint State, and is also widely known for its typically excellent eye appeal. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, Frosty MS63

- 6141 1878 MS63 PCGS.** A well-struck type coin from one of the few issues in the series that is readily available in Mint State. This Select 1878 three dollar gold piece shows frosty peach-gold luster, with a few light, scattered abrasions as allowed for by the grade. The surfaces display a modest shimmer when tilted beneath a light. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64+
Perfect for Type**

- 6142 1878 MS64+ PCGS.** A combination of availability and strong eye appeal makes this issue an ideal type coin candidate. A few light marks and some roughness at the bow knot preclude a full Gem designation, but this high-end near-Gem is otherwise well-preserved and brilliantly lustrous over gleaming, medium-gold surfaces. An extremely Choice example for the gold specialist. NGC ID# 25MZ, PCGS# 8000

**1882 Gold Three Dollar, MS61
Semiprooflike Fields**

- 6143 1882 MS61 NGC.** This 1882 three dollar gold piece exhibits lovely semiprooflike fields behind modestly contrasted, well-struck devices. There are no individually obtrusive abrasions, and we instead note only light chatter in the fields that limits the grade. Medium wheat-gold color encompasses each side. The 1882 had a scant mintage of 1,500 pieces, but enough Uncirculated coins were set aside by contemporary numismatists that the issue is moderately collectible today. NGC ID# 25N5, PCGS# 8004

- 6144 1886 — Improperly Cleaned — NGC Details. Unc.** A well defined but slightly subdued example. Open areas are butter-gold, but the obverse legends exhibit orange toning. No marks are consequential. A tiny mintage of 1,000 pieces ensures that survivors are elusive.

**1886 Gold Three Dollar, MS61
Better Late-Series Issue**

- 6145 1886 MS61 NGC.** The devices are boldly rendered and the fields exhibit noticeable semiprooflike mirroring. A few light abrasions determine the grade, but none are overly obtrusive. This honey-gold 1886 three dollar piece is one of only a limited number of Mint State survivors from a mintage of just 1,000 coins. Census: 18 in 61, 20 finer (6/15). NGC ID# 25N9, PCGS# 8008

**1888 Three Dollar, MS64
Mostly Prooflike**

- 6146 1888 MS64 PCGS.** The three dollar gold pieces in the 1880s became more of a novelty than a serious circulating coin. Tiny mintages were the rule, while jewelers and speculators tucked away most available examples. Many high-grade coins survive of most issues from the decade. The 1888 issue had a comparatively generous mintage of 5,000 pieces. Most display some degree of prooflikeness, although not all are as attractive and well-made as this glittering example. The fields are almost entirely prooflike and the surfaces radiate rich, honey-gold luster. A near-Gem, with no meaningful distractions. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

**1803/2 Half Eagle, BD-3, XF45
Imperfect T, 3 Free of Bust**

- 6147 1803/2 BD-3, R.4, XF45 NGC.** Bass-Dannreuther Die State e/b. A yellow-gold example with bits of mint luster still in evidence. The T in LIBERTY is missing its right foot — an imperfection that helps distinguish the BD-3 variety from the more-available BD-4, since both varieties share the same reverse. The surfaces are uniformly abraded on both sides but escape major marks. A few adjustment marks angle downward from the left edge through the clouds, left wing, and shield. PCGS# 504950 Base PCGS# 8084

1803/2 BD-4 Half Eagle, AU58
Middle Die State

- 6148 1803/2 BD-4, R.4, AU58 NGC. Bass-Dannreuther Die State c/c. An almond-gold representative of this scarce Jefferson-era date. The forehead curl displays minor wear, but luster illuminates the stars, plumage, legends, and portrait. Abrasions are unobtrusive and chiefly confined to obverse field, the U in UNITED, and the reverse rim at 1 o'clock. PCGS# 504951 Base PCGS# 8084

1804 Half Eagle, AU Sharpness
Small Over Large 8, BD-7

- 6149 1804 Small Over Large 8, BD-7, R.4 — Repaired, Whizzed — NGC Details. AU. Bass-Dannreuther Die State c/c. This sharply detailed early half eagle is microgranular from whizzing, and shows smoothing on the field near the date and bust tip. Nonetheless, a bold example of an infrequently encountered variety. The Small Over Large 8 obverse die was paired with three different reverses. BD-7 was the final die marriage of the date. PCGS# 519897 Base PCGS# 8086

1804 Half Eagle, Unc Sharpness
BD-7, Small Over Large 8

- 6150 1804 Small Over Large 8, BD-7, R.4 — Obverse Improperly Cleaned — NGC Details. Unc. Bass-Dannreuther Die State b/b. A scarce variety, showing a small 8 punched over a previous large 8 in the date. Only 100 to 150 examples are believed known. This piece is sharply struck with complete border dentils and bold interior motifs. The reverse fields are fully prooflike, although the obverse is slightly subdued in that regard due to a light cleaning. Bright yellow-gold in color. PCGS# 519897 Base PCGS# 8086

1806 Knob 6, 7x6 Stars Half Eagle, BD-6, XF40

- 6151 1806 Knob 6, 7x6 Stars, BD-6, R.2, XF40 ANACS. Bass-Dannreuther Die State a/b, showing light clash marks from star 7 to the left (facing) eagle's wing. This variety is more commonly referred to these days as Round Top 6, as in its *Guide Book* listing. This piece shows honey-gold surfaces that retain considerable appeal despite the expected wear and some pitting in the obverse fields. PCGS# 45620 Base PCGS# 8089

1806 Half Eagle, AU Details
7x6 Stars, Knob 6, BD-6

- 6152 1806 Knob 6, 7x6 Stars, BD-6, R.2 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State d/e. BD-6 is the only die marriage with an unbalanced obverse arrangement of 7x6 stars. LIBERTY and the right-side stars are crowded, while the left-side stars allow open space near the curl and cap. This moderately circulated sun-gold representative is mildly luminous, but the surfaces are smooth save for a cluster of individually minor abrasions on the left obverse field. PCGS# 45620 Base PCGS# 8089

1807 Half Eagle, BD-1, AU50 Details

- 6153 1807 Bust Right, BD-1, High R.4 — Repaired — ANACS. AU50 Details. Small Date, Small Obverse Stars, Small Reverse Stars. Some luster glimmers from the devices and legends, and little actual wear is apparent. Both sides are glossy from a cleaning, and repairs are evident left of the L in LIBERTY, where the piece may have had an attempted puncture at one time. A pair of minor pinscratches cross right side reverse stars. Ex: *Dallas Signature* (Heritage, 10/2006), lot 2701. PCGS# 519898 Base PCGS# 8092

1807 Half Eagle, AU55
Small Reverse Stars, Scarce BD-1

- 6154 1807 Bust Right, BD-1, R.4, AU55 NGC.** Possibly from the terminal die state of this reverse die, with a heavy rim cud above T in UNITED. This Choice AU example is lightly worn across both sides, with bold striking details and deep green-gold and red-orange toning. A scarce die marriage that is seldom seen at any grade level.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2854. PCGS# 519898 Base PCGS# 8092

1811 Capped Head Half Eagle, Unc Details
Tall 5, BD-1 Variety

- 6155 1811 Tall 5, BD-1, High R.3 — Tooled — PCGS Genuine. Unc Details.** Bass-Dannreuther Die State c/c. The 1811 Capped Head half eagle claims a substantial mintage of 99,581 pieces, with two die varieties known for the date. This coin represents the BD-1 variety, with a Tall 5 in the denomination. The BD-1 has a surviving population of 175-250 pieces in all grades and conditions.

This coin traces its history to lot 213 in the Titus, Johnson and Reamer Collections (B. Max Mehl, 12/1928) where it was described as:

“1811 Large 5 on reverse. Uncirculated; frosty mint surface. Very scarce so choice. With record of \$35.00 for an equal specimen.”

We agree with Mehl’s assessment of this attractive coin except for some tooling on the eagle’s left (facing) wing. Today, Mint State specimens of this date sell for around \$10,000 at auction. The original envelope from Mehl’s sale accompanies the lot.
Ex: Titus, Johnson and Reamer Collections (B. Max Mehl, 12/1928), lot 213. PCGS# 8110

CLASSIC HALF EAGLES

1834 Plain 4 Half Eagle, MS61
McCloskey 3-B, Semiprooflike Fields

- 6156 1834 Plain 4, Breen-6501, McCloskey 3-B, R.1, MS61 NGC.** An affordable Mint State Classic Head type coin, this Plain 4 half eagle shows uncommonly well-struck design elements set against semiprooflike fields and illuminated by rich orange-gold and peach luster. Trivial surface contact in the fields limits the grade, as there are no singularly significant abrasions. Housed in a prior generation holder. NGC ID# 25RR, PCGS# 8171

- 6157 1834 Crosslet 4 — Obverse Tooled — NGC Details. AU.** Garret and Guth (2006) note that the 1834 Crosslet 4 half eagle is 10 times rarer than its Plain 4 counterpart, and the census data bears that out. This bright green-gold example retains considerable luster in the recesses. Tooling on the obverse does not diminish the appeal of this Classic Head rarity. PCGS# 8172

- 6158 1835 AU53 PCGS. Breen-6504, McCloskey 1-A, R.2.** First Head, Block 8. Peach-gold luster lingers in recessed areas of this moderately circulated and inoffensively abraded type representative. Seven die marriages are confirmed for the 1835, although M. 1-A constitutes about half of the known examples. NGC ID# 25RV, PCGS# 8173

- 6159 1836 AU53 NGC. Breen-6508, McCloskey 5-D, R.3.** Second Head, Small Date. McCloskey 5-D is a scarce Classic Head half eagle variety. This example displays rich violet and blue toning over lustrous yellow-gold surfaces. NGC ID# 25RY, PCGS# 8174

- 6160 1838 AU58 NGC. Breen-6515, McCloskey 2-B, R.1.** Two varieties of 1838 Classic half eagles are known and the McCloskey 2-B is more frequently encountered. This lovely near-Mint example has brilliant greenish yellow-gold luster with satin surfaces and excellent eye appeal. NGC ID# 25S4, PCGS# 8176

1838-D Half Eagle, Choice XF
McCloskey 1-A

- 6161 1838-D McCloskey 1-A, R.3, XF45 PCGS Secure.** The 1838-D half eagle is an important issue, being the first of the denomination struck at the Dahlonega Mint and the only D-mint issue in the Classic Head half eagle type. This Choice XF example shows medium green-gold patina, with minor wear over the high points of the devices. An old, vertical scratch on Liberty’s cheek, visible with a loupe, is the only mentionable surface flaw. NGC ID# 25S6, PCGS# 8178

LIBERTY HALF EAGLES

1839 Liberty Half Eagle, AU58 Excellent Luster

- 6162 1839 AU58 PCGS.** The 1839 half eagle issue marks the first of the Liberty Head design by Christian Gobrecht, and it is a one-year-only type. Mint State survivors are quite rare, and the average certified survivor is XF45 to AU50. This near-Mint State example boasts great eye appeal on mellow orange-gold surfaces with excellent luster and minimal marks. Population: 14 in 58, 20 finer (7/15). NGC ID# 25S7, PCGS# 8191

- 6163 1840 Narrow Mill AU58 NGC.** The yellow-gold surfaces of this near-Mint five dollar are imbued with soft mint-green and display traces of luster in the recessed areas. The design elements are well-struck save for the typical softness in the eagle's leg feathers and claws. A few minute marks are consistent with the grade. Census: 59 in 58, 28 finer (7/15). NGC ID# 25SA, PCGS# 8194

1840-C Five Dollar, AU50 Challenging Charlotte Issue

- 6164 1840-C AU50 PCGS Secure. Variety 2.** The 1840-C half eagle is one of the scarcer issues in the Charlotte series. From a mintage of 18,992 pieces, it is doubtful that more than 125 to 150 survive in all grades. This AU representative is finer than the typically seen example, showing well-struck motifs with light wear. The surfaces exhibit original olive-gold patina with hints of coppery-red in the peripheral recesses. No major abrasions are present. Population: 11 in 50, 36 finer (7/15). NGC ID# 25SD, PCGS# 8196

- 6165 1843-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 10-G.** Patches of hairlines emerge when this Dahlonega type coin is rotated beneath a light. Careful examination reveals unobtrusive scuffs on the eagle's beak and the upper portion of the left (facing) wing. NGC ID# 25T4, PCGS# 8215

- 6166 1849-C XF45 PCGS. Variety 2.** The scarcer of the two die marriages for the '49-C, identified by parallel vertical die lines behind Liberty's neck. This Charlotte type coin has noticeable luster and moderately marked honey-gold surfaces. The central strike is incomplete, typical for the issue. NGC ID# 25TW, PCGS# 8241

- 6167 1850-C VF35 NGC. Variety 1.** Four die marriages are known for the '50-C, despite a small mintage of 63,591 pieces. This lightly abraded and luminous straw-gold Charlotte representative has flat curls from a combination of strike and wear, but the eagle's left (facing) wing is richly detailed. NGC ID# 25TZ, PCGS# 8244

1850-C Five Dollar, AU50 Variety 4 With Weak Mintmark

- 6168 1850-C AU50 PCGS. Variety 4.** This variety has the date and mintmark positioned furthest right of the four die pairings known. This is a later die state with just the top of the C mintmark barely visible. The substantial mintage of 63,591 pieces ensures a generous number of survivors and this issue's availability as a type coin. The surfaces are choppy with numerous small abrasions scattered over each side, as usually found. Just a bit weakly defined over the high points of the design. NGC ID# 25TZ, PCGS# 8244

- 6169 1850-D — Obverse Scratched — NGC Details. AU. Variety 27-U.** Rich orange and sea-green toning embraces this lightly circulated Dahlonega half eagle. The strike is usual for the remote branch mint facility. A fairly deep abrasion on Liberty's forehead accounts for the NGC designation. NGC ID# 25U3, PCGS# 8245

1852 Half Eagle, MS62 Luminous, Original Surfaces

- 6170 1852 MS62 PCGS. CAC.** Half of the stars on the obverse are flat on this Mint State piece, although the balance of the design motifs on both sides are boldly detailed. The surfaces display frosty yellow-gold mint luster and excellent eye appeal. The 1852 is one of the more readily obtainable half eagle issues from the 1850s, but is still itself scarce in Mint State, and rare above the MS62 grade level. Population: 40 in 62 (1 in 62+), 30 finer (7/15). NGC ID# 25UA, PCGS# 8250

1852-D Five Dollar, AU53

- 6171 1852-D AU53 NGC. Variety 33-V.** This yellow-gold Dahlonega example lacks mentionable marks and has a good strike on the wings and borders. The curls, claws, and fletchings are typically brought up. Three die marriages exist for the '52-D. Variety 32-V is most often seen, while Variety 33-V is rare and Variety 33-W is very rare. The pick-up point is the 2 in the date, which is distant from the bust on the "common" Variety 32-V but nearly touches the bust on Varieties 33-V and 33-W. NGC ID# 25UC, PCGS# 8252

1856-D Half Eagle, AU53
Pleasing Color and Surfaces

- 6172 1856-D AU53 PCGS. Variety 39-FF.** One of the scarcer Dahlonega half eagles, with a mintage of 19,786 pieces (for comparison, less than half the mintage of the 1854-D half eagles). This pleasing example displays medium-gold color with orange highlights within the protected areas. Abrasions are less than expected for the issue — especially on the obverse, which shows only minor marks. Sharp detail and considerable mint luster remain for the grade. Population: 8 in 53, 45 finer (7/15). NGC ID# 25UX, PCGS# 8268

1857-C Half Eagle, MS61
Rare in Mint State

- 6173 1857-C MS61 PCGS. CAC. Variety 1.** A single die variety is known for the 1857 Charlotte half eagles. Claiming a mintage of 31,360 pieces, this is one of the more available Charlotte issues in circulated grades. Mint State coins are rare, however. PCGS and NGC have certified 45 examples in Mint State, primarily MS60 through MS62.

The yellow-gold surfaces of the present MS61 offering are imbued with whispers of olive-green and orange, and exhibit sharply struck design features. Scattered marks limit the grade. Population: 10 in 61, 7 finer (7/15). NGC ID# 25V3, PCGS# 8272

1858 Five Dollar, MS62+
Seldom Seen in Uncirculated

- 6174 1858 MS62+ NGC.** The 1858 half eagle is somewhat underrated. Its mintage of just 15,136 coins is comparable to that of the 1858-D, and the date is scarcer overall than any of its branch mint counterparts. Mint State examples are especially rare, regardless of grade. This Plus-graded MS62 coin shows a sharp strike with some semiprooflike reflectivity in portions of the fields and rich orange-gold color overall. No major abrasions are present, and we instead note only faint lines in the surfaces that limit the grade. Census: 1 in 62 (1 in 62+), 8 finer (7/15). NGC ID# 25V7, PCGS# 8276

1859 Half Eagle, AU58
Rare Any Finer

- 6175 1859 AU58 PCGS.** The scarcity of this Philadelphia half eagle belies its mintage, which at 16,734 pieces is not large, but about average for the period. Few Mint State coins are known, suggesting this lightly abraded AU58 example is a viable alternative. Yellow-gold surfaces retain mint luster at the margins, and abrasions are limited to light lines and some busyness in the fields. The coin is sharply struck on both sides. Population: 9 in 58, 2 finer (7/15). NGC ID# 25VB, PCGS# 8280

- 6176 1871-S AU50 PCGS.** The orange-gold surfaces of this half eagle display traces of luster in the protected areas of the well-defined design elements. The few scattered marks are within the confines of a lightly circulated coin. From a mintage of 25,000 pieces, the 1871-S half eagle is very rare in Mint State, where PCGS and NGC have seen only seven examples. Population: 8 in 50, 21 finer (7/15). NGC ID# 25WE, PCGS# 8324

1874-S Half Eagle, Choice AU
No Mint State Survivors

- 6177 1874-S AU55 PCGS.** The *Encyclopedia of U.S. Gold Coins* notes that “in About Uncirculated condition the 1874-S half eagle is very rare, and most of the known survivors that have graded About Uncirculated are on the low end of the scale.” The bright yellow and green-gold surfaces of this Choice AU example retain partial mint luster within the protected regions of the design. Myriad abrasions are scattered throughout. A great example from this low-mintage West Coast issue (16,000 coins struck). Population: 7 in 55, 1 finer (7/15). NGC ID# 25WR, PCGS# 8335

**1876 Half Eagle, Sharply Struck MS62+
A Low-Mintage, Low-Population Issue**

6178 1876 MS62+ NGC. The 1876 half eagle has a very low circulation-strike mintage of 1,432 pieces and an extremely low population figure. Indeed, NGC and PCGS combined report only 48 submissions in all grades (7/15), and the PCGS website estimates only 40 to 50 known examples. Moreover, perusal of the Heritage Auctions Archives lists only 76 appearances over the last 20 or so years, several of which are known to be multiple appearances.

The present high-end MS62 offering is the third finest example seen at NGC. The obverse displays light yellow-gold patination while the reverse shows deeper reddish-gold color. The design elements are sharply struck except for the typical softness in the eagle's neck feathers. Distributed marks, mostly on the obverse, preclude a higher grade. This is an infrequent opportunity to acquire this classic rarity. NGC ID# 25WW, PCGS# 8339

6179 1877 — Cleaning — PCGS Genuine. AU Details. The rare date 1877 has a business mintage of only 1,132 pieces. The PCGS Population is 34 examples in all grades, although that roster excludes the present coin, as it is moderately bright from a wipe. Generally orange-gold, although the portrait displays lavender shades. NGC ID# 25WZ, PCGS# 8342

**1877-CC Five Dollar, AU Details
Challenging Carson City Emission**

6180 1877-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-B. The 1877-CC has a scant production of 8,680 pieces, yet little regard was given the issue until a number of years later. Most of the 200 to 300 survivors are in VF to AU grades. The present yellow-gold example is moderately glossy from a wipe, and the field beneath the date appears smoothed. Surprisingly free from marks aside from a diagonal line within the shield. NGC ID# 25X2, PCGS# 8343

**1880 Half Eagle, Sharp MS65+
Far Finer Than Normal**

6181 1880 MS65+ PCGS. Even though nearly 3.2 million examples of the 1880 half eagle were struck, few survive anywhere near as nice as the present MS65+ PCGS representative. The honey-gold centers cede to deep caramel-gold near the rims on the obverse, while the reverse is a more consistent orange-gold. The strike is sharp but not absolute. A few dark flecks occur near star 11 and on the reverse rim at 7:30. Population: 15 in 65 (1 in 65+), 1 finer (7/15). NGC ID# 25XA, PCGS# 8351

6182 1881/0 FS-301 MS63 NGC. Traces of the overdate are visible under all four digits of the 1881 date, with the final 1 punched over a 0. This scarce overdate variety is extremely popular and has been listed in the Guide Book for many years. This Select Mint State piece has frosty yellow luster with rich peripheral orange toning. Census: 6 in 63 (1 in 63 ★), 5 finer (7/15). PCGS# 145714 Base PCGS# 8355

**1883-CC Five Dollar, AU58
Rarely Seen This High Grade**

6183 1883-CC AU58 NGC. Variety 1-A. With a mintage of only 12,598 pieces, the 1883-CC half eagle is challenging in all grades, but is extremely rare in Mint State. This Borderline Uncirculated example displays sharp detail with honey-gold luster in the protected areas and pleasantly smooth surface overall. A couple ticks below Liberty's chin are the only mentionable abrasions. Census: 20 in 58, 7 finer (7/15). NGC ID# 25XL, PCGS# 8362

**1891-CC Half Eagle, MS63
Late Carson City Issue**

- 6184 1891-CC MS63 NGC. Variety 2-A.** The large production exceeding 200,000 pieces for this late-series CC-mint half eagle issue makes examples available up to the Select grade of the present piece and upwards to the occasional Gem (one at PCGS, eight at NGC) (6/15). Scattered, mostly light abrasions and a moderately bold strike make for good eye appeal on the orange-gold surfaces of this piece. A few larger marks appear on the reverse, under the eagle's left (facing) wing. NGC ID# 25Y5, PCGS# 8378

1891-CC Five Dollar, Top-Notch MS63

- 6185 1891-CC MS63 PCGS. CAC. Variety 1-A.** Copious luster abounds on the sumptuous orange-red surfaces of this highly appealing 1891-CC half eagle, separating this coin from most survivors of the issue. The strike is sharp front and back and marks are few, further distinguishing this piece from its cohort. The CAC population in this MS63 grade is 26 with 14 finer (6/15). NGC ID# 25Y5, PCGS# 8378

- 6186 1893-CC AU55 PCGS. Variety 1-A.** The borders display ample bright luster, and the moderately marked lemon-gold surfaces are well defined. The 1893-CC has a mintage of only 60,000 pieces, and is scarcer than either the 1891-CC or 1890-CC. NGC ID# 25YB, PCGS# 8384

**1896-S Half Eagle, MS63
Lightly Patinated and Attractive**

- 6187 1896-S MS63 PCGS.** A fair mintage of 155,400 coins makes this an available San Francisco issue, but it becomes rare in Select Mint State or finer. Some chatter and minor abrasions in the left obverse field and on the portrait limit the grade of this boldly struck half eagle, which has splendid eye appeal and bountiful mint luster. Rich, honey-gold surfaces have a Mint-fresh quality. Rare this nice. Population: 7 in 63, 5 finer (6/15). NGC ID# 25YL, PCGS# 8393

- 6188 1897 MS64 PCGS.** The lustrous surfaces of this near-Gem display yellow-gold color imbued with hints of light green on the obverse and reddish-gold patina on the reverse. The design elements are sharply struck and each side reveals a few minor marks that prevent Gem classification. PCGS has certified only 30 pieces finer (7/15). NGC ID# 25YM, PCGS# 8394

**1901-S/S Half Eagle, MS66+
Intense Luster and Eye Appeal**

- 6189 1901-S/S FS-501 MS66+ NGC.** This *Cherrypickers'* variety is not as well-known as the overdate of this year, but is nonetheless intriguing. The mintmark is plainly punched over a previous, smaller S. As a date, the 1901-S half eagle is scarce in MS66, and anything finer is rare. This Plus-designated coin displays sharp detail and frosty yellow-gold luster. There are no mentionable abrasions. Census: 63 in 66 (6 in 66+), 11 finer (7/15). From *The College Collection, Part Two*. PCGS# 145025 Base PCGS# 8404

**1902 Half Eagle, MS65+
Conditionally Rare**

- 6190 1902 MS65+ PCGS.** The Mint State availability of the 1902 half eagle peaks in MS62 and MS63, and quickly begins to decline in finer grades. In MS65, this issue is rare and finer representatives are exceedingly so. This plus-graded Gem is sharply struck, with frosty orange-gold luster. Population: 24 in 65 (1 in 65+), 8 finer (7/15). NGC ID# 25YY, PCGS# 8405

**1904 Liberty Five, MS66+
Glowing Luster**

- 6191 1904 MS66+ PCGS.** A conditional rarity, among the finer-known 1904 Liberty half eagles. This Plus-designated Premium Gem exhibits bold design elements amid vibrant, frosty luster that enlivens each side in deep orange-gold hues. As the grade suggests, the surfaces are free of any mentionable imperfections. Population: 17 in 66 (1 in 66+), 5 finer (7/15). NGC ID# 25Z4, PCGS# 8409

**1906 Half Eagle, MS66
Exceptional Type Coin**

- 6192 1906 MS66 PCGS.** A bold strike and undisturbed mint luster combine for outstanding eye appeal, while only the occasional minuscule mark exists on the smoothly glowing surfaces. A short scrape beneath the eagle's left wing is the sole abrasion of note. The 1906 issue is an exceptional type selection in Premium Gem because so few examples are any finer — a fact that eludes many collectors. Population: 28 in 66 (1 in 66+), 4 finer (6/15). NGC ID# 25Z9, PCGS# 8413

**1906 Half Eagle, MS66+
Among the Finest Known**

- 6193 1906 MS66+ PCGS. CAC.** The 1906 issue is an unrecognized condition rarity among the late-date Liberty fives. Remarkably few high Mint State coins are known from the moderate mintage of 348,735 pieces. This satiny, highly lustrous example is among the finest seen by PCGS. Only a few minor marks are dispersed over the brilliant-gold surfaces. Fully struck, the present example is the sole MS66 coin to receive the PCGS Plus designation. Population: 1 in 66+, 4 finer (7/15). NGC ID# 25Z9, PCGS# 8413

**1907 Half Eagle, MS66
Few Known Finer**

- 6194 1907 MS66 NGC.** A beautifully preserved Premium Gem example of this late-series Liberty half eagle, ideal for type representation. The strike is sharply rendered throughout the stars and central devices, and the frosty yellow-gold surfaces are free of distracting abrasions. Census: 40 in 66 (3 in 66+, 2 in 66 ★), 12 finer (6/15). NGC ID# 25ZC, PCGS# 8416

- 6195 1908 MS65 NGC. CAC.** The final year of issue for the Liberty half eagle, and the only example of James Longacre's design that was minted that year as the other denominations were discontinued in 1907. This lovely Gem has frosty orange-gold luster and bold design motifs.
From The Glacier Collection. NGC ID# 25ZE, PCGS# 8418

PROOF LIBERTY HALF EAGLE

**1890 Liberty Half Eagle, PR62 Cameo
Ex: Trompeter**

- 6196 1890 PR62 Cameo NGC. Ex: Trompeter.** The 1890 proof Liberty half eagle is even more elusive than its reported mintage of 88 pieces would suggest. Probably no more than 20-25 examples are extant in all grades, including three coins in institutional collections. In addition, the Philadelphia Mint business-strike mintage of half eagles was a paltry 4,240 pieces in 1890, putting significant pressure on the small supply of proofs from date collectors.

The present coin is an attractive proof, with frosty, sharply detailed design elements throughout. The date is diagnostically positioned to the left, with the left edge of 1 over the left edge of a dentil. The fields are deeply mirrored, providing desirable cameo contrast with the devices. A few minor hairlines and contact marks are evident, but the overall presentation is most appealing. Census: 1 in 62 Cameo, 14 finer (5/15).

Ex: Ed Trompeter Collection; Heritage Auctions, circa 1998; private collection.

From The Ed Trompeter Collection of Proof \$5 Liberties. NGC ID# 28CU, PCGS# 88485

INDIAN HALF EAGLES

- 6197 1908 MS63 PCGS.** The lustrous surfaces of this Select half eagle display greenish-gold patina. The design features are well-struck, including fairly strong detail in the eagle's shoulder feathers. There are fewer and less severe marks than what might be expected for the grade designation. This will be a great coin for a type collection.
From The Badger Collection. NGC ID# 28DE, PCGS# 8510

6198 1908 MS64 NGC. The vivid orange-gold surfaces of this attractive Choice specimen show a few highlights of rose, with vibrant mint luster on both sides. The design elements are well-detailed and a few scattered contact marks are not distracting. NGC ID# 28DE, PCGS# 8510

6199 1908 MS64 PCGS. The 1908 Indian half eagle is moderately available, as numerous pieces were set aside at the time of issue as first-year mementos. This Choice example is suitable for date or type purposes, and is sharply struck with satiny yellow-gold luster. A few light, scattered abrasions are in keeping with the grade. NGC ID# 28DE, PCGS# 8510

**1908 Five Dollar, MS64
High-End Introductory Representative**

6200 1908 MS64 PCGS. CAC. The heavily minted and saved 1908 half eagles are collectible through the Choice grade level. Gems are scarce and can easily realize five figures at auction, placing them out of the reach of most enthusiasts. This delightful near-Gem offers attractive orange-gold surfaces with a fully struck obverse and boldly detailed reverse that shows the usual incompleteness on the eagle's shoulder. Minimally marked and high-end for the grade. NGC ID# 28DE, PCGS# 8510

6201 1909 MS64 NGC. This sharply detailed Choice specimen offers vivid greenish-gold surfaces with vibrant mint luster and just a few minor signs of contact. Eye appeal is outstanding. NGC has graded 59 numerically finer examples (7/15). NGC ID# 28DH, PCGS# 8513

6202 1909 MS64 NGC. CAC. Sharply detailed design elements and vibrant mint luster are the calling cards of this attractive Choice specimen, with pleasing orange-gold surfaces that show few signs of contact. NGC has graded 59 numerically finer examples (7/15). *From The Badger Collection.* NGC ID# 28DH, PCGS# 8513

**1909-S Five Dollar, MS62
Seldom Seen in Mint State**

6203 1909-S MS62 NGC. Despite a mintage of nearly 300,000 coins, the 1909-S half eagle is a better date in Uncirculated grades, particularly above MS62. This piece is lightly abraded, but displays satiny olive-gold luster with hints of peach in the recesses. The strike is well-executed and the overall eye appeal is pleasing for the grade. Census: 73 in 62, 18 finer (6/15). NGC ID# 25ZL, PCGS# 8516

6204 1910 MS63 PCGS. Orange-gold dominates, but sea-green toning emerges throughout. This nicely struck representative is essentially unabraded except for a thin mark on the lowest headdress feather. Housed in a green label holder. *From The Badger Collection.* NGC ID# 28DK, PCGS# 8517

**1910-S Half Eagle, MS62
Better San Francisco Issue**

6205 1910-S MS62 NGC. The 1910-S Indian five is similar in Mint State rarity to its 1909-S counterpart, seldom seen finer than MS62. Most of the 770,200-coin mintage experienced light circulation, with the result that a significant number of XF and AU coins are known today. This Mint State piece is lightly abraded, but shows sharp detail and satiny olive-gold luster. NGC lists 34 numerically finer examples (6/15). NGC ID# 28DM, PCGS# 8519

6206 1911 MS64 NGC. This attractive Choice example offers sharply detailed design elements and vibrant mint luster on both sides, with bright orange-gold surfaces that show a few scattered minor contact marks. NGC ID# 28DP, PCGS# 8520

**1911 Half Eagle, Choice MS64
Notably Smooth Fields**

6207 1911 MS64 PCGS. CAC. An exceptionally clean coin for the grade, this Choice 1911 Indian half eagle is completely devoid of distracting abrasions. The only grade-limiting factors appear to be a few faint lines in the reverse fields and evidence of light contact on the Indian's cheek. The strike is sharp and the frosty surfaces showcase warm straw-gold luster. Few pieces are certified finer. NGC ID# 28DP, PCGS# 8520

6208 1911-D AU50 NGC. The 1911-D half eagle is grade far rarer than its quarter eagle counterpart, although it is less celebrated since it shares "key status" with other issues in its series. This piece is housed in a "no line fatty" old-style NGC holder, showing good eye appeal. The wheat-gold surfaces show the light wear expected, but most of the abrasions are confined to the reverse. NGC ID# 28DR, PCGS# 8521

1911-D Half Eagle, AU55
Lightly Abraded for the Issue
Difficult to Locate in Mint Condition

- 6209 1911-D AU55 PCGS. CAC.** The 1911-D half eagle comes from a low mintage of 72,500 pieces. It is not particularly scarce in circulated grades but Mint State examples are difficult to come by, and are very elusive above MS62. This Choice AU offering displays wheat-gold surfaces with traces of luster in the recessed areas of the well-defined design features. Minute marks are within the parameters of the grade designation, and are fewer and less severe than normally seen on this heavily abraded issue. NGC ID# 28DR, PCGS# 8521

1912-S Indian Half Eagle, MS62
Seldom Encountered in High Grade

- 6210 1912-S MS62 PCGS.** A moderate mintage of 392,000 Indian half eagles was accomplished at the San Francisco Mint in 1912, but few examples were saved by contemporary collectors. As a result, the 1912-S is one of the most difficult issues of the series to locate in high grade. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. Population: 92 in 62 (1 in 62+), 34 finer (7/15). NGC ID# 25ZN, PCGS# 8524

1913-S Half Eagle, Strong MS62
Better Date in the Series

- 6211 1913-S MS62 NGC.** The Bela Lyon Pratt design for quarter and half eagles is notoriously difficult to grade and collect due to the uniqueness of the sunken-relief design. At first glance this sharply struck 1913-S coin appears too good to be an MS62, though close inspection of the reverse shows the shallow marks that prevent a higher grade. Still a great coin for arm's-length eye appeal. NGC ID# 25ZP, PCGS# 8526

1913-S Half Eagle, MS62
Ex: Richmond Collection

- 6212 1913-S MS62 NGC.** The 1913-S has a reasonable mintage of 408,000 pieces, but like other San Francisco Indian five dollar issues, is surprisingly scarce in Mint State. A majority of certified examples are in XF and AU grades, since the hard money tradition of the West Coast continued into World War I. This coruscating apricot-gold representative displays scattered small abrasions, though only a graze on the upper lip merits mention. *Ex: Richmond Collection, Part 1 (David Lawrence, 7/2004), lot 1544, which realized \$2,415.* NGC ID# 25ZP, PCGS# 8526

- 6213 1914 MS63 PCGS.** Bright orange-gold luster endows both sides of this Select half eagle. The design elements are sharply struck throughout and the few scattered marks are within the parameters of the grade designation. *From The Badger Collection.* NGC ID# 28DU, PCGS# 8527

1914 Five Dollar, High-End MS64+

- 6214 1914 MS64+ PCGS. CAC.** The Philadelphia and Denver Mints each coined 247,000 Indian Head half eagles in 1914. The 1914-D is scarcer in high grades, but both issues are among the more available in the series. Only in Gem condition does the 1914 become rare. This Plus-designated near-Gem is sharply struck with frosty rose and orange-gold surfaces. Minimally marked with phenomenal eye appeal. PCGS reports just 32 finer submissions. NGC ID# 28DU, PCGS# 8527

- 6215 1915 MS63 PCGS. CAC.** This pleasing Select specimen displays sharply detailed design elements and vibrant mint luster throughout. The orange-gold surfaces show a few minor signs of contact that do not detract from the outstanding eye appeal. *From The College Collection, Part Two.* NGC ID# 28DX, PCGS# 8530

**1915 Half Eagle, Sharply Struck MS65
No Examples Certified Finer**

6216 1915 MS65 PCGS. The 1915 half eagle is a readily available issue through near-Gem, after which the population declines significantly. PCGS and NGC have certified a total of 89 Gem examples and none finer. The current MS65 offering displays yellow- and orange-gold surfaces that give off intense luster. Sharply struck design elements and impeccable preservation further enhance the coin's pleasing eye appeal. Population: 50 in 65 (5 in 65+), 0 finer (7/15). NGC ID# 28DX, PCGS# 8530

6217 1915-S AU58 PCGS. Wheat-gold with honey accents and pale sparkling beauty. Though a touch of rub affects the surfaces, the overall visual appeal remains strong on this late-date five. *From The College Collection, Part Two.* NGC ID# 25ZR, PCGS# 8531

EARLY EAGLES

**1797 Large Eagle Ten, BD-2, VF Details
Well-Detailed**

6218 1797 Large Eagle, BD-2, High R.4 — Tooled — PCGS Genuine. VF Details. Bass-Dannreuther Die State b/b, cracked through the final 7 in the date. BD-2 is a scarce variety with fewer than 100 examples believed known in all grades. This piece shows bright green-gold patina with sufficient detail for the VF level. The fields on each side show extensive tooling, and there are several curving scratches on the obverse through the upper hair curls and in the field right of the nose. An affordable Large Eagle type coin. PCGS# 45717 Base PCGS# 8559

**1801 BD-2 Eagle, Unc Details
Rare Early Die State**

6219 1801 BD-2, R.2 — Repaired — PCGS Genuine. Unc Details. The vast majority of 1801 BD-2 eagles have prominent vertical lines in Liberty's cap, while only a few examples like the present piece were struck before the accident creating those lines. This is an extremely important opportunity for the advanced variety and die state specialist. The surfaces are brilliant green-gold with light hairlines and other impairments of little concern. An attractive and highly important early eagle. PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

**1838 Liberty Eagle, XF40
Scarce First-Year Issue**

6220 1838 XF40 PCGS. The introduction of Gobrecht's Liberty Head motif on gold coinage in 1838, was also the reintroduction of the eagle denomination, coinage of which had been suspended since 1804. The 1838 Liberty eagle had a mintage of only 7,200 coins, and it is believed that fewer than 100 pieces are extant in all grades. This collector-grade example retains sharp detail with small tinges of luster in the protected areas near the rims. Both sides are otherwise consistently toned in original green-gold hues. Population: 13 in 40, 49 finer (6/15). NGC ID# 262D, PCGS# 8575

**1839 Liberty Eagle, AU50
Two-Year Type of 1838**

6221 1839/8 Large Letters AU50 NGC. The "Type of 1838" Liberty eagle is identified by the more scalloped appearance of the bust truncation and subtle differences in Liberty's hair. The type was only struck during 1838 and 1839, with the 1839 mintage reported as 25,801 pieces. This lightly circulated yellow-gold example displays lustrous, minimally abraded surfaces. NGC ID# 262E, PCGS# 8576

**1839/8 Liberty Ten, AU55+
Head of 1838**

- 6222 1839/8 Large Letters AU55+ NGC.** The Large Letters 1839 Liberty ten is more easily differentiated from its Small Letters counterpart by the obverse portrait. The stylized, artistic rendering of Liberty seen on the 1838 issue was employed for the first 25,801 eagles coined in 1839, after which the final 12,447 pieces were struck with the modified portrait that would endure until 1907. This Head of 1838 example displays sharp detail with the appropriate high-point wear for the grade. Bright yellow-gold surfaces yield hints of luster in the protected areas. Census: 17 in 55 (1 in 55+★), 40 finer (6/15). NGC ID# 262E, PCGS# 8576

**1841 Eagle, Appealing AU58
Reflective Surfaces**

- 6223 1841 AU58 NGC.** Although more than 63,000 examples of the 1841 eagle were struck, Mint State examples are seldom seen, and to a lesser degree than the inflated population data might imply. This AU58 piece displays splendid, somewhat prooflike reflectivity on lemon-yellow surfaces that show mostly light field chatter with a few scattered larger marks. Extremely appealing. Census: 16 in 58, 14 finer (7/15). NGC ID# 262H, PCGS# 8582

1842-O Eagle, Lustrous AU53

- 6224 1842-O AU53 PCGS. Variety 2.** Orange-gold surfaces exhibit lots of lively luster on this 1842-O eagle, a rarity in AU or finer grades. Only 27,400 were struck, and most survivors today are VF to low XF. A loupe reveals scattered small to medium marks that account for the grade, but there are none worthy of singling out. Population: 12 in 53, 20 finer (7/15). NGC ID# 262N, PCGS# 8587

- 6225 1843 AU50 PCGS.** Bright, almost flashy surfaces show pale lemon-gold and straw-gold shadings. Well-defined with faint abrasions and wear largely concentrated at the high points. Population: 20 in 50, 10 finer (7/15). NGC ID# 262P, PCGS# 8588

**1843 Liberty Eagle, AU53
Surprisingly Elusive Issue**

- 6226 1843 AU53 PCGS.** Despite an adequate mintage of 75,462 pieces, the 1843 Liberty eagle is surprisingly difficult to locate, especially in high grade. This impressive AU53 example is lightly worn and moderately abraded, with light greenish-gold surfaces that retain traces of original mint luster. Population: 5 in 53, 5 finer (7/15). NGC ID# 262P, PCGS# 8588

- 6227 1843/1843 AU53 NGC. Breen-6861, VP-001.** The entire date was lightly repunched north of the initial impression, identifying this NGC Variety Plus variant. This lightly worn AU53 specimen retains much of its original mint luster and shows only minor signs of contact. Census for VP-001: 3 in 53, 3 finer (7/15). NGC ID# 262P, PCGS# 8588

- 6228 1847-O AU58 PCGS. Variety 2.** Scattered abrasions are mostly minor, save for one larger hit under the eagle's beak. The surfaces host much luster and lively reflectivity under the light field chatter. A nice example of this early O-mint ten. Population: 13 in 58 (1 in 58+), 12 finer (7/15). NGC ID# 2632, PCGS# 8598

- 6229 1849 AU55 NGC. Breen-6867, VP-002.** The entire date was repunched northeast of the initial impression, identifying the NGC Variety Plus-002 variant. This Choice AU specimen is lightly worn and lightly abraded, with still-lustrous yellow and greenish-gold surfaces. Census for VP-002: 2 in 55, 3 finer (7/15). NGC ID# 2635, PCGS# 8601

**1849-O Ten Dollar, AU55
Elusive New Orleans Issue**

- 6230 1849-O AU55 NGC. Variety 2.** A better grade orange-gold example. Lightly abraded aside from a thin mark below the T in UNITED. Despite a scant mintage of 23,900 pieces, two die marriages exist for the 1849-O, with or without a circular "ring" atop the second vertical shield stripe. The present piece is the sans ring variety. Census: 17 in 55, 8 finer (6/15). Ex: FUN Signature (Heritage, 1/2009), lot 5521, which realized \$8,050. NGC ID# 2636, PCGS# 8602

- 6231 1850 Large Date AU53 NGC.** The Large Date is the usual variety of 1850 eagles, seen about three times as often as the Small Date. Distinct green-gold surfaces retain traces of luster on this pleasing, lightly worn gold piece. NGC ID# 2637, PCGS# 8603

1850 Small Date Eagle, MS61
Rare in Mint State

6232 1850 Small Date MS61 NGC. A “very scarce and under-appreciated, major variety” according to Garrett and Guth, who highlight the Small Date variant of the 1850 eagle as “an apparent mistake,” by claiming “the Small Date punch was intended for large cents and half eagles.” Indeed, on this MS61 example, the date seems small and lost in the roomy exergue. The present moderately abraded example displays radiant yellow-gold color with softness on most of the peripheral stars but better definition at the central devices. Mint luster flows across both sides. A minor alloy spot appears over the eagle’s left (facing) wing. For the variety, Census: 4 in 61, 0 finer (7/15).

Ex: *Boston Signature (Heritage, 8/2010)*, lot 3549. NGC ID# 2638, PCGS# 8604

1852-O Liberty Eagle, AU55
Undervalued Branch Mint Rarity

6233 1852-O AU55 PCGS. Variety 2. The 1852-O Liberty eagle is an underrated issue from a small mintage of 18,000 pieces. Probably no more than 80-90 examples are extant in all grades and Mint State coins are very rare. This Choice AU example shows just a trace of wear on the well-detailed design elements and the lightly abraded greenish-gold surfaces show traces of prooflike reflectivity in sheltered areas. Population: 13 in 55, 4 finer (7/15). NGC ID# 263D, PCGS# 8609

1853/2 Liberty Head Ten, MS60
FS-301, Mint State Rarity

6234 1853/2 MS60 PCGS. FS-301. A *Cherrypickers'* variety, recognized by both PCGS and NGC, and a listed *Guide Book* entry. Some numismatists question whether the slender curved lines that appear near the lower ball of the 3 is actually an underdigit 2, but the presence of something there is undeniable and for now the accepted theory is the overdate. The present coin displays attractive medium-gold color and bright mint luster throughout both sides. Sharply struck, although scattered light abrasions determine the grade. Extra metal beneath the date on the rim suggests the coin was struck with a loose collar. Examples are rare in Uncirculated condition, with both PCGS and NGC reporting two Mint State examples. Population: 1 in 60, 1 finer (6/15). NGC ID# 263E, PCGS# 8611

1854 Eagle, AU58
Seldom Encountered Finer

6235 1854 AU58 PCGS. From a mintage of 54,250 pieces, the 1854 Liberty eagle is a scarce date in all grades, and high-grade examples are very rare. This attractive near-Mint piece shows just a touch of friction on the well-detailed design elements and the pleasing peach-gold surfaces are lightly abraded. Population: 15 in 58, 8 finer (7/15). NGC ID# 263G, PCGS# 8613

6236 1854-S AU50 PCGS. Light wear on the yellow-gold surfaces of this S-mint ten dollar does little to diminish the detail of the design elements. Numerous distributed light marks are apparent on each side. The 1854-S eagle is the first coin of this denomination struck at the San Francisco Mint, and is a major rarity in mint condition. Population: 63 in 50, 82 finer (7/15). NGC ID# 263K, PCGS# 8615

**1854-S Eagle, Choice AU
Popular First-Year Issue**

6237 1854-S AU55 NGC. After years of demand for a branch mint on the West Coast, the San Francisco facility opened in April 1854 and coined 123,826 eagles in its first year of operation. Examples are relatively available in circulated grades, but they become scarce in AU and very rare in Uncirculated condition. This Choice AU example offers bright yellow-gold surfaces with well-struck devices. Die cracks connect the reverse legends, and abrasions are peppered throughout. NGC ID# 263K, PCGS# 8615

6238 1855 AU58 PCGS. The yellow-gold surfaces of this near-Mint ten dollar display luster in the protected areas. The design features are well-defined save for the usual softness in some of the star centers. What few marks that are present are within the confines of the grade designation and do not detract. The 1855 ten dollar is elusive in mint condition. Population: 25 in 58, 21 finer (7/15). NGC ID# 263L, PCGS# 8616

6239 1857 AU50 PCGS. CAC. Breen-6925. Housed in a PCGS Regency holder. A bold, thin, and slightly curved raised line connects the 5 in the date to the bottom of the crosslet of the 7. Breen considered this to be an overdate, but was uncertain of what digit this errant die line represented. Regardless of its overdate status, the 1857 is a much better date. Only 16,606 pieces were struck. This problem-free piece has bold details and ample radiant luster. Population: 22 in 50, 17 finer (7/15).
Ex: FUN Signature Sale (Heritage, 1/2004), lot 7780. NGC ID# 263T, PCGS# 8622

**1858-O Eagle, Near-Mint
Low-Mintage New Orleans Issue**

6240 1858-O AU58 PCGS. Variety 1. A mintage of just 20,000 pieces confirms the scarcity of the 1858-O. Most certified examples are in XF or AU grades. The present Borderline Uncirculated No Motto New Orleans ten has a bold strike and minimally marked caramel-gold surfaces. Thorough rotation reveals minor hairlines. Population: 13 in 58 (1 in 58+), 7 finer (6/15). NGC ID# 263X, PCGS# 8626

1861 Eagle, Appealing MS62

6241 1861 MS62 PCGS. A large mintage of 113,164 Liberty eagles was accomplished in 1861, the first year of the Civil War. Most coins seen today are heavily circulated, and Mint State examples are rare. This sharply detailed MS62 specimen is a pleasing exception, displaying strong mint luster and appealing green and rose-gold surfaces. Population: 10 in 62 (1 in 62+), 4 finer (6/15).
Ex: Summer FUN Signature (Heritage, 7/2012), lot 4995. NGC ID# 2647, PCGS# 8633

**1861-S Ten Dollar, AU53
Heavily Circulated S-Mint Issue**

6242 1861-S AU53 PCGS. The California mint increased eagle production by 10,500 coins or 210% between 1860 and 1861. Garrett and Guth suggest the increase likely reflects increased demand for smaller denomination gold coins, which were in short supply compared to the mass-produced S-mint double eagles. The 1861-S was a commercial workhorse and is usually seen in VF to XF condition. About Uncirculated survivors are rare. This is a lightly abraded example with partial luster remaining in the recesses. Light green-gold surfaces show well-struck devices with minor friction. Population: 6 in 53, 9 finer (7/15). NGC ID# 2648, PCGS# 8634

**1865-S Liberty Eagle, VF35
Elusive Low-Mintage Issue**

6243 1865-S VF35 PCGS. Only 16,700 Liberty eagles were struck at the San Francisco Mint in 1865, making the issue quite elusive in all grades. This pleasing Choice VF specimen shows some light wear on the hair above the coronet and the curl beneath the ear is worn but well-defined. The lightly abraded surfaces retain traces of original mint luster. Population: 3 in 35, 9 finer (7/15). NGC ID# 264G, PCGS# 8642

1866 With Motto Ten, AU50
First Year of Issue

- 6244 1866 AU50 PCGS.** The first-year 1866 With Motto eagle has a low mintage of only 3,750 circulation-strike coins, and it is a rarity in all grades. This pleasing AU50 example has light yellow surfaces with faint field reflectivity on both sides. An exceptional opportunity. Population: 10 in 50, 8 finer (7/15). NGC ID# 264J, PCGS# 8649

1869-S Ten Dollar, AU55
Scarce in All Grades

- 6245 1869-S AU55 PCGS. CAC.** From a mintage of 6,430 coins, perhaps only 60 to 75 pieces survive in all grades. Mint State examples of this San Francisco issue are extremely rare with the finest grading only MS61. This Choice AU representative is among the finest typically seen. Both sides retain excellent detail and display hints of luster in the protected regions. Deep olive-gold patina show coppery overtones around the borders. Population: 5 in 55, 5 finer (6/15). NGC ID# 264S, PCGS# 8656

1871-CC Ten Dollar, VF35
Challenging Early CC Issue

- 6246 1871-CC VF35 PCGS. Variety 1-A.** The 1871-CC is a sought-after early Carson City issue, boasting an enticingly low mintage of 8,085 coins. Perhaps only about 100 examples survive in all grades. This Choice VF example shows moderate detail, with bright yellow-gold patina on both sides. A few light marks and abrasions are as expected for the grade. Population: 5 in 35, 50 finer (7/15). NGC ID# 264X, PCGS# 8661

1876-S Liberty Eagle, XF45
Low-Mintage Branch Mint Issue

- 6247 1876-S XF45 PCGS.** The 1876-S Liberty eagle boasts a low mintage of just 5,000 pieces, making it scarce-to-rare in all grades. This attractive Choice XF specimen retains most of its interior design detail and the lightly abraded greenish-gold surfaces show traces of original mint luster. Population: 21 in 45, 18 finer (7/15). NGC ID# 265E, PCGS# 8676

1880-O Eagle, Reflective AU55
Rare in Mint State

- 6248 1880-O AU55 NGC. Variety 1.** A meager 9,200 1880-O eagles were struck, and today Mint State examples are quite elusive. This Choice AU coin shows considerable luster remaining on wheat-gold surfaces. Some reflectivity shows in the fields, amid scattered marks that explain the grade but do not defeat the strong eye appeal. NGC ID# 265U, PCGS# 8689

1881-O Eagle, MS60
Low-Mintage New Orleans Issue

- 6249 1881-O MS60 PCGS. Variety 1.** A meager mintage of 8,350 pieces ensures the rarity of the 1881-O. All examples entered commerce, since the few gold collectors of the day purchased proofs. As of (6/15), PCGS has certified only four examples as Mint State, including the present lemon-gold example. It has a bold strike, substantial luster, and the expected number of abrasions on the left obverse field. NGC ID# 265Y, PCGS# 8693

- 6250 1882-S MS62 PCGS.** Yellow-gold and rose patina bathes both sides of this S-mint eagle, and some interruptions in the luster flow are evident due to scattered abrasions. The design elements are sharply defined. A squiggly lintmark extends from Liberty's chin into the field. MS62 is the highest grade that most collectors will encounter, and even that will require diligent searching. Population: 80 in 62, 15 finer (7/15). NGC ID# 2665, PCGS# 8698

- 6251 1883-S MS61 PCGS.** The 1883-S ten dollar from a production of only 38,000 pieces is an underrated date in the Liberty Head eagle series. The orange-gold surfaces of this offering are imbued with traces of soft green, and the design elements are well-impressed. Distributed marks determine the grade. This issue is very difficult to locate in Mint State grades. Population: 23 in 61, 24 finer (7/15). NGC ID# 2669, PCGS# 8702

**1884-CC Eagle, Choice AU
Only 9,925 Pieces Coined**

- 6252 1884-CC AU55 ANACS. Variety 1-A.** A minimally marked and mildly glossy lemon-gold example of this rare Carson City issue. All '84-CC tens have bold die lines on Liberty's neck and coronet, perhaps from damage to the obverse die during its cross-country shipment from Philadelphia. Just 9,925 pieces were issued. In a small-sized holder.

Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 2086, which realized \$2,760. NGC ID# 266B, PCGS# 8704

- 6253 1888 MS62 PCGS.** Trivial marks are consistent with the grade of this scarce issue. This piece is far finer than the average certified example that grades AU58. Both sides have frosty luster and brilliant yellow-gold surfaces. Population: 39 in 62, 8 finer (7/15). NGC ID# 266K, PCGS# 8712

- 6254 1888-S MS63+ PCGS. CAC.** The 1888-S Liberty eagle is very rare in grades above the MS63 level. This high-end Select example displays lustrous orange-gold surfaces with a few scattered minor contact marks and sharply defined design elements. PCGS has graded three numerically finer examples (7/15). NGC ID# 266M, PCGS# 8714

**1889 Ten Dollar, MS61
Semiprooflike Fields**

- 6255 1889 MS61 NGC.** The 1889 eagle had a scant mintage of only 4,440 pieces, of which few survive in Mint State. This MS61 coin is lightly abraded, but only a couple marks on the cheek are worthy of mention. The strike is bold and the fields exhibit gleaming semiprooflike reflectivity. Census: 27 in 61, 8 finer (7/15). NGC ID# 266N, PCGS# 8715

**1890-CC Eagle, Red-Orange MS62
Seldom Seen in Higher Grades**

- 6256 1890-CC MS62 PCGS. Variety 1-A,** the sole dies known for the small mintage of 17,500 coins, showing the first C in the mintmark noticeably higher than the second C. Lovely reddish-orange color highlights the surfaces throughout, amid scattered, mostly light abrasions that determine the grade. The MS62 level is the highest at which this low-mintage issue is readily available. Population: 51 in 62 (1 in 62+), 6 finer (6/15). NGC ID# 266S, PCGS# 8718

- 6257 1891-CC AU55 NGC. Variety 1-A.** An attractive Choice AU specimen of this popular branch mint type coin, with lightly abraded greenish-gold surfaces and well-detailed design elements that show just a touch of high-point wear. NGC ID# 266U, PCGS# 8720

**1892-CC Ten Dollar, AU58
Scarce Carson City Issue**

- 6258 1892-CC Tripled Die Reverse, FS-801, AU58 NGC.** A crisply struck canary-gold Liberty ten with moderate obverse marks. Luster is abundant throughout the peripheries and motifs. IN GOD WE TRUST is die tripled, as always for this penultimate Carson City issue. Just 40,000 pieces were struck.
Ex: Long Beach Signature (Heritage, 5/2012), lot 5152. PCGS# 511600 Base PCGS# 8722

- 6259 1892-O MS62 PCGS. Variety 1.** The 1892-O has a low mintage of 28,688 pieces. Approximately 1,000 pieces were exported to foreign banks and survived the U.S. gold recall, but those coins are abraded from indifferent storage. The issue is rare above the MS62 level. The present sun-gold example has good luster and moderate field marks. The strike is sharp except on star 13. NGC ID# 266X, PCGS# 8723

- 6260 1892-O MS62 PCGS. Variety 1.** As of (6/15), NGC and PCGS combined have certified 934 '92-O tens in Mint State. Of those, just 8 are graded MS63 or MS63+ with none finer. Thus, the MS62 grade is the highest that most collectors can hope to obtain. The present lustrous pumpkin-gold example has a narrow band of aquamarine on the obverse margin. Small marks below the hairbun and near the bust tip decide the grade. NGC ID# 266X, PCGS# 8723

- 6261 1892-O MS62 PCGS. Variety 1.** The low mintage 1892-O is collectible in introductory Mint State grades, but becomes a formidable condition rarity above the MS62 level. A radiant pumpkin-gold example with scattered field marks. The later die state with delicate cracks between the 92 in the date, and across much of the reverse periphery. NGC ID# 266X, PCGS# 8723

- 6262 1893 MS64 NGC.** It is our opinion that this Choice Mint State 1893 eagle should be awarded the PL or Prooflike designation at NGC. Both sides of this sharply detailed and brilliant yellow-gold example have fully mirrored fields and lustrous devices that display excellent contrast. NGC ID# 266Z, PCGS# 8725

1897 Ten Dollar, MS65
Lustrous, Fresh Mint Frost

- 6263 1897 MS65 NGC.** Known as an available Philadelphia date, but the 1897 becomes notably scarce in Gem condition and rare any finer. This sharply struck example traps strong mint luster beneath shimmering mint frost on both sides. There are no objectionable marks on the fields or central devices, although the rims show some tiny nicks. Census: 22 in 65 (1 in 65+), 6 finer (6/15). NGC ID# 267D, PCGS# 8737

- 6264 1898 MS64 PCGS. CAC.** Delicate pink accents visit the yellow-gold surfaces of this near-Gem eagle from the later 19th century. A few light marks are no obstacle to the grade and the strike is solid. Population: 68 in 64 (1 in 64+), 11 finer (7/15). NGC ID# 267G, PCGS# 8740

1898 Liberty Ten, MS65
High-Grade Rarity

- 6265 1898 MS65 PCGS.** Whether some of the mintage was lost to the decades-later Gold Recall, or if a large hoard remains undiscovered either here or in Europe (doubtful), the scarcity of this issue in high grades has never been explained. The present example is an unquestioned Gem, with frosty, honey-gold surfaces and virtually no marks to be seen. The strike is full. PCGS has certified just 10 coins — this one included — in Gem condition, with one finer coin. Population: 10 in 65, 1 finer (7/15). NGC ID# 267G, PCGS# 8740

1901-S Liberty Ten, MS65
Vivid Color, Vibrant Luster

- 6266 1901-S MS65 PCGS. CAC.** From a mintage of 2.8 million pieces, this delightful Gem exhibits razor-sharp definition on all design elements and the well-preserved orange-gold surfaces radiate vibrant mint luster, with attractive hints of rose patina. Eye appeal is terrific.

From The Glacier Collection. NGC ID# 267S, PCGS# 8749

1904-O Ten Dollar, MS63
Conditionally Scarce

- 6267 1904-O MS63 PCGS. Variety 1.** Mint State 1904-O eagles exist largely in the MS60 to MS62 grade range. This Select example is above-average in quality, and finer pieces are rare. Satiny orange-gold luster illuminates minimally abraded surfaces and sharp central devices. Several obverse stars are weakly defined, not unusual for this New Orleans issue. Population: 81 in 63, 19 finer (7/15). NGC ID# 267Z, PCGS# 8756

- 6268 1906-D MS64 PCGS. CAC.** Frosty pinkish yellow-gold luster appears on both sides of this first-year Denver Mint eagle. Delicate peripheral green accents heighten the eye appeal. PCGS has only certified 28 finer examples (7/15). NGC ID# 2685, PCGS# 8760

- 6269 1907-D MS64 PCGS.** This is the second of just two Denver Mint Liberty eagles, and it is a condition rarity despite a mintage of just over 1 million coins. A few scattered marks are evident, with a thin scratch across part of the shield that prevents a higher grade and finest known status. Brilliant yellow-gold surfaces exhibit wisps of pale blue and orange color. Population: 55 in 64 (1 in 64+), 0 finer (7/15). NGC ID# 2689, PCGS# 8764

- 6270 1907-S MS62 PCGS.** The yellow-gold surfaces of this S-mint ten dollar gold piece retain a considerable amount of luster and exhibit sharply struck design elements. Distributed light marks determine the grade. The MS62 grade level is desirable for this issue as examples in finer grades are very challenging. Population: 49 in 62 (1 in 62+), 29 finer (7/15). NGC ID# 268A, PCGS# 8765

INDIAN EAGLES

- 6271 1907 No Periods MS62+ NGC.** The 1907 No Periods Indian eagle is always in demand as a first-year type coin. This high-end MS62 example offers well-detailed design elements and vibrant mint luster on lightly marked greenish-gold surfaces. NGC ID# 28GF, PCGS# 8852

**1907 Ten Dollar Gold, MS63
Without Motto or Periods**

6272 1907 No Periods MS63 PCGS. Charles E. Barber's (and Henry Hering's) changes to the Saint-Gaudens ten dollar gold design were a combination of legitimate production concerns and simple differences in design preference. Still, the 1907 No Period tens were generally well-produced although less artistic than the original design. This Select example is frosty and lustrous. A few tiny rim nicks are the most noticeable marks. The strike is bold on the eagle, although the lower headdress details are less pronounced. The attractive rich, yellow-gold color flashes green highlights amid the bright luster. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS63
Rich Original Color**

6273 1907 No Periods MS63 PCGS. Deep apricot-gold luster glows over the satiny surfaces of this Select No Periods Indian ten, revealing only light, scattered abrasions. The strike is sharp and the eye appeal is satisfactory for the grade. The 1907 No Periods eagle is the most plentiful No Motto issue in Mint State, ideal for type representation.
From The Badger Collection. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Eagle, MS64
Satiny and Well-Preserved**

6274 1907 No Periods MS64 NGC. Suitable for type purposes, this boldly struck, satiny No Motto Indian eagle shows smooth lemon-gold luster, devoid of all but a few trivial grazes on Liberty's cheek. The No Periods variety was the last of three different Indian eagle types for the year, and is also the most plentiful No Motto issue overall, benefiting from a mintage of nearly 240,000 pieces.
From The Badger Collection. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Indian Eagle, MS64
First Year of Design**

6275 1907 No Periods MS64 PCGS. An attractive Choice example of this popular first-year type coin, with well-detailed design elements and vibrant mint luster on both sides. The smooth orange-gold surfaces show highlights of rose and a few minor contact marks on the portrait. The fields are remarkably free of distractions and eye appeal is outstanding. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS64
Bright, Lustrous No Motto Type Coin**

6276 1907 No Periods MS64 PCGS. Three distinct types of the 1907 Indian eagle were struck as the Mint experimented with perfecting the design for mass production. The No Periods variant, offered here, is the most plentiful, being the final product of the engraving department's efforts. This Choice example is well-struck and displays deep apricot-gold patina. NGC ID# 28GF, PCGS# 8852

**1907 Indian Ten, MS65
No Motto, No Periods**

6277 1907 No Periods MS65 NGC. CAC. A beautiful lemon-gold and olive-green Gem. Lustrous and well struck. The fields are immaculate, as is the eagle, and only minor marks on the cheek prevent an even finer grade. The "No Periods" name is something of a misnomer, since periods separate the country name and denomination, though are absent between E PLURIBUS UNUM. Encapsulated in a prior generation holder. NGC ID# 28GF, PCGS# 8852

**1908 No Motto Eagle, MS63
Better Philadelphia Issue**

6278 1908 No Motto MS63 PCGS. The 1908 No Motto Indian eagle had a mintage of only 33,500 pieces and is proportionately scarce in the finer Mint State grades. This Select example is well-struck and displays original honey-gold luster with hints of lilac throughout. A few scattered abrasions are not bothersome.

From The Badger Collection. NGC ID# 28GH, PCGS# 8853

6279 1908-D No Motto AU58 PCGS. CAC. Just a touch of rub visits the high points of this yellow-gold No Motto ten. Ample luster remains in the well-protected, pleasingly preserved fields.
From The College Collection, Part Two. NGC ID# 28GH, PCGS# 8854

6280 1908-D No Motto AU58 PCGS. CAC. Considerable luster remains on the yellow-gold surfaces of this minimally abraded near-Mint No Motto ten dollar. The design elements are well-impressed. This is a nice-looking coin overall. This issue is most frequently seen in AU55 to MS62 grades. It is scarce to rare any finer (Fuljenz, 2010). NGC ID# 28GH, PCGS# 8854

**1908-D No Motto Ten, MS63
Seldom Seen Finer**

6281 1908-D No Motto MS63 NGC. The 1908-D ranks as the only No Motto branch mint issue. It is more plentiful in Mint State than its Philadelphia counterpart, benefiting from a production of 210,000 coins, but high-end examples are scarcer than are those of the 1907 No Periods issue. This Select representative exhibits satiny yellow-gold luster and well-defined relief elements. Scattered light abrasions are not individually significant. Census: 35 in 63, 50 finer (6/15).
From The Badger Collection. NGC ID# 28GH, PCGS# 8854

6282 1908 Motto MS63 PCGS. The orange-gold surfaces of this Select ten dollar are laced with hints of mint-green. The design features are well-struck, though the eagle's shoulder is a tad soft as typically seen. Some minute marks limit the grade.
From The Badger Collection. NGC ID# 28GJ, PCGS# 8859

**1908 With Motto Ten, MS64
Rich Original Luster**

6283 1908 Motto MS64 PCGS. Original, satiny surfaces yield shades of sun and lilac-gold luster, while the design elements are boldly rendered and the surfaces are free of any major abrasions. The 1908 With Motto Indian eagle is infrequently seen finer, making this Choice example an attractive acquisition for the budget-conscious collector. This outstanding coin is housed in a green label holder.
From The Birmingham Collection. NGC ID# 28GJ, PCGS# 8859

1908 With Motto Ten, Satiny MS64

6284 1908 Motto MS64 NGC. Superb original luster sets this straw-gold With Motto type coin aglow on each side, revealing only a few trivial abrasions limited to the high points of the motifs. The strike is well-executed and the eye appeal is excellent. This first-year With Motto issue is marginally available in this grade, but finer examples are elusive. NGC ID# 28GJ, PCGS# 8859

**1908 Motto Eagle, MS64+
Smooth, Minimally Marked Surfaces**

6285 1908 Motto MS64+ PCGS. The omission of IN GOD WE TRUST from the Saint-Gaudens ten and twenty dollar gold coins of 1907 and early 1908 was considered by prominent media outlets and religious organizations to be an act of blasphemy. Its elimination generated a year-long controversy that was only resolved when Congress passed a law mandating the motto's restoration on May 13, 1908. This With Motto ten dollar gold piece has smooth, orange-gold surfaces with hints of lavender coloration. Crisply impressed aside from minor softness on the lower headdress feathers and the eagle's wing. NGC ID# 28GJ, PCGS# 8859

6286 1908-D Motto MS62 NGC. Lustrous surfaces are somewhat fine grained, and exhibit sharply impressed design features, including good delineation on the Indian's hair. Peach-gold color enriches both sides, each of which reveals a few minute surface and rim marks.
Ex: Summer FUN (Heritage, 7, 2007), lot 2755.
From The Badger Collection. NGC ID# 28GK, PCGS# 8860

**1909 Indian Ten, MS63
Better Date in High Grade**

6287 1909 MS63 NGC. A pleasing, satiny example of this Philadelphia issue which is seldom seen finer. The devices are sharp and the bright, yellow-gold surfaces reveal minimal abrasions. The 1909 Indian eagle is infrequently seen in this grade and Choice examples are scarce; at the Gem level, this date becomes genuinely rare. *From The Badger Collection.* NGC ID# 28GM, PCGS# 8862

6288 1909-D MS62 PCGS. The orange-gold surfaces of this D-mint ten dollar display considerable luster and exhibit well-struck design features, save for the often-seen weakness in the hair above the Indian's forehead. Scattered minute marks determine the grade. The 1909-D is one of the most undervalued Indian Head eagles (Fuljenz, 2010). *From The Badger Collection.* NGC ID# 28GN, PCGS# 8863

**1909-D Eagle, Lustrous MS62
Attractive Rose and Khaki-Gold Color**

6289 1909-D MS62 PCGS. CAC. This is a lustrous, high-end Denver representative with wonderful aesthetic appeal. Rose hues complement khaki-gold coloration overall. Moderately granular surfaces show well-struck design elements with minor high-point incompleteness. Lightly abraded, as expected for the grade. The 1909-D has a low-mintage of just 121,540 coins, and examples are scarcely seen in higher grades. NGC ID# 28GN, PCGS# 8863

6290 1909-S — Altered Surfaces — PCGS Genuine. Unc. Details. The 1909-S can be located with little difficulty in AU grades, but is scarce in Mint State. This caramel-gold example is lustrous and nicely struck. Practically unabraded, and the eye appeal is excellent. The mintmark is nicely repunched, one of at least three different RPM varieties known for the issue. NGC ID# 28GP, PCGS# 8864

6291 1910 MS63+ NGC. The availability of this Philadelphia issue drops significantly between MS63 and MS64, and again at MS65. This Plus-graded Select example offers a sharp strike and satiny yellow-gold luster combined with surface quality that is nearly as appealing as that of its MS64 counterparts. NGC ID# 28GR, PCGS# 8865

6292 1910-D MS64 PCGS. This attractive Choice specimen displays sharply detailed design elements and well-preserved orange-gold surfaces with just a few scattered minor contact marks on both sides. Eye appeal is outstanding. NGC ID# 28GS, PCGS# 8866

**1910-S Indian Eagle, MS62
Scarce Issue in Higher Grades**

6293 1910-S MS62 PCGS. The 1910-S Indian eagle claims a substantial mintage of 811,000 pieces, but few high quality examples were saved and the issue is scarce in grades above the MS62 level. This attractive piece offers well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 268D, PCGS# 8867

**1910-S Ten Dollar, MS62
Frosty Green and Rose Surfaces**

6294 1910-S MS62 PCGS. CAC. The San Francisco facility manufactured 811,000 eagles in 1910, and examples are much scarcer in Uncirculated condition than their Philadelphia and Denver counterparts. Beautiful green and rose coloration adorns this frosty example. Well-detailed motifs exhibit trivial blending over Liberty's hair strands and the eagle's breast feathers. The green CAC sticker affirms the quality of this minimally abraded 1910-S ten dollar gold coin. NGC ID# 268D, PCGS# 8867

1910-S Ten Dollar, Well-Struck MS63

6295 1910-S MS63 PCGS. The 1910-S Indian Head ten dollar can be located with minimal difficulty through the MS62 level of preservation. The population drops to about 130 coins in MS63 and fewer than 60 pieces in higher grades. The lustrous peach and yellow-gold surfaces of the present Select offering display some hints of light green and yield well-struck devices. A few darker-green toning spots are also noted. PCGS has seen 32 coins finer (7/15). NGC ID# 268D, PCGS# 8867

6296 1911 MS64 PCGS. Mass exportation makes the 1911 an obtainable issue through MS64. This Choice example displays luminous sun-gold color with exceptionally well-preserved fields. Only the exposed areas show small grade-limiting abrasions. Crisply struck with minor softness over the lower headdress and eagle's shoulder. NGC ID# 28GT, PCGS# 8868

6297 1911 MS64 PCGS. The orange-gold surfaces of this near-Gem display whispers of rose and possess strong luster. The design elements are well-struck, and the few marks that are present just barely preclude a Gem classification. This is the highest grade that can be encountered with minimal difficulty; finer pieces are challenging. *From The Badger Collection.* NGC ID# 28GT, PCGS# 8868

6298 1911-D AU50 PCGS. This challenging Denver issue remains collectible in AU condition, and this piece is pleasant for the grade. The strike is sharp and the devices show minimal wear. Both sides are deeply orange-gold and the only mentionable abrasion is an old scratch on Liberty's cheek. A bit of verdigris is tucked away near the eagle's right (facing) talon. Housed in a green label holder. NGC ID# 28GU, PCGS# 8869

6299 1911-D AU50 PCGS. Brilliant lemon-yellow surfaces show minimal handling marks on either side. An attractive, lightly circulated example housed in a green-label PCGS holder. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, MS61
Scarcely Seen Finer**

6300 1911-D MS61 NGC. Gold production at the Denver Mint in 1911 was primarily focused on the double eagle, with the result that this issue is either a key or semikey date in every Indian Head gold series. This 1911-D eagle is a seldom seen Mint State survivor from a mintage of only 30,100 coins. The strike is sharp and the surfaces yield satiny yellow-gold luster with scattered abrasions called for by the grade. NGC ID# 28GU, PCGS# 8869

6301 1911-S AU53 NGC. A luminous orange-gold example with considerable luster shining in the protected areas. Wear appears mostly on the high points and the overall eye appeal is pleasing for the AU53 grade. NGC ID# 28GV, PCGS# 8870

6302 1914 MS63 NGC. The pleasing orange-gold surfaces of this attractive Select example radiate vibrant mint luster and show just a few scattered contact marks on both sides. The design elements are well-detailed and eye appeal is quite strong. *From The Badger Collection.* NGC ID# 28H2, PCGS# 8875

6303 1914-D MS63 PCGS. A pumpkin-gold and apple-green Select example. Crisply struck and lustrous with a modicum of marks. The final Denver Mint issue of the denomination until the 1984 Olympic commemorative. Encapsulated in a green label holder. *From The Badger Collection.* NGC ID# 28H3, PCGS# 8876

1914-S Indian Eagle, MS62

6304 1914-S MS62 NGC. From a mintage of 208,000 pieces, the 1914-S Indian eagle is of only median rarity in the series, making it equally suitable for series specialists and type collectors. This attractive MS62 example exhibits well-detailed design elements and vivid orange and rose-gold surfaces that show some scattered minor contact marks on both sides. NGC ID# 28H4, PCGS# 8877

**1914-S Indian Ten, MS63
Better San Francisco Issue**

6305 1914-S MS63 PCGS. The 1914-S is a slightly better Indian eagle issue, coming from a mintage of only 208,000 coins. Examples grading finer than this MS63 coin are scarce. This piece is well-struck, with satiny orange-gold luster. A few small abrasions are primarily restricted to Liberty's cheek and pose little distraction. NGC ID# 28H4, PCGS# 8877

6306 1915 MS63 NGC. The lustrous surfaces of this Select ten dollar display honey-gold color and well-struck design features, though the eagle's shoulder is a tad soft, as typically seen. Scattered marks determine the grade. The 1915 is available in MS63 and MS64; Gems are challenging and higher-grade pieces are rare. *From The Badger Collection.* NGC ID# 28H5, PCGS# 8878

**1915 Indian Ten, MS65
Lovely Original Color**

6307 1915 MS65 NGC. The Gem surfaces of this 1915 Indian eagle are aglow with wonderful rose, lilac, and sun-gold hues, heightening the visual impact of the frosty cartwheel effect. The strike is well-executed and there are no significant abrasions. This Philadelphia issue is available in lower grades, but Gems are scarce and anything finer is rare. NGC lists 28 numerically finer examples (6/15). NGC ID# 28H5, PCGS# 8878

**1915-S Indian Ten, MS61
Low-Mintage Issue**

- 6308 1915-S MS61 NGC.** All San Francisco Indian ten issues are scarce in Mint State, but the 1915-S ranks among the semikeys, since only 59,000 pieces were struck. The present lustrous lemon-gold example has no obvious abrasions and the designs are sharp despite minor incompleteness on the forehead curl and the left wing border.
Ex: *FUN Signature* (Heritage, 7/2011), lot 4964. NGC ID# 28H6, PCGS# 8879

**1915-S Indian Ten, MS62
Better San Francisco Issue**

- 6309 1915-S MS62 PCGS.** A slightly better date, the 1915-S eagle had a mintage of only 59,000 coins. Uncirculated survivors are highly sought-after but are only infrequently seen. Above the MS62 level, the date is borderline rare. This piece is well-struck and aglow in satiny straw-gold luster. Light, scattered abrasions limit the grade but none are singularly obvious. Population: 63 in 62 (1 in 62+), 58 finer (6/15). NGC ID# 28H6, PCGS# 8879
- 6310 1916-S AU58 PCGS.** Orange-gold and mint-green coloration adorns both sides of this near-Mint ten dollar, each of which retains luster in the recessed areas. Relatively strong definition characterizes the design elements, and the distributed marks are what would be expected for a lightly circulated, large gold coin. NGC ID# 28H7, PCGS# 8880
- 6311 1916-S AU58 PCGS.** The yellow-gold surfaces of this near-Mint ten dollar are laced with soft olive-green and retain considerable luster in the recessed areas. The design features are well-struck though the eagle's shoulder feathers are a tad soft as often seen. Distributed small marks are in line with a large gold coin that has seen brief circulation. NGC ID# 28H7, PCGS# 8880

**1916-S Ten Dollar, MS63
Challenging in Select Condition or Better**

- 6312 1916-S MS63 PCGS. CAC.** Green and rose shades accent orange-gold color over each side. Liberty's hair strands, the lower headdress feathers, and the eagle's right leg are a touch soft, but the overall impression is bold. Radiant luster rolls over minimally bagmarked surfaces, furthering the eye appeal of this Select example. This was the only ten dollar gold issue in 1916 (138,500 pieces struck) and the final issue until 1920. The population of certified 1916-S eagles declines precipitously in MS63 condition or better. NGC ID# 28H7, PCGS# 8880
- 6313 1926 MS62 PCGS.** Rich orange toning embraces this lustrous and well struck Indian gold type coin. Abrasions are lesser than expected for the MS62 level. Encapsulated in an old green label holder. NGC ID# 28H9, PCGS# 8882
- 6314 1932 MS64 NGC.** An impressive Choice example of this popular type issue, this coin displays well-detailed design elements and vibrant mint luster on both sides. Only minor signs of contact are evident and eye appeal is outstanding. NGC ID# 28HB, PCGS# 8884
- 6315 1932 MS64 NGC.** Vibrant luster graces the peach-gold surfaces of this well struck near-Gem eagle, just a few minute marks away from an even higher grade. An excellent type set candidate.
Ex: *Long Beach Signature* (Heritage, 2/2012), lot 5012. NGC ID# 28HB, PCGS# 8884
- 6316 1932 MS64 NGC.** A frosty near-Gem, this 1932 is the only readily collectible U.S. gold piece struck during the Great Depression, and these coins did not actually circulate, as nearly every surviving example is Mint State. This pleasing piece has brilliant yellow-gold luster and excellent eye appeal. NGC ID# 28HB, PCGS# 8884
- 6317 1932 MS64+ NGC. CAC.** This honey-gold eagle on the cusp of a Gem grade has warm, shimmering luster and good all-around eye appeal. A touch of central striking softness is noted on each side. NGC ID# 28HB, PCGS# 8884

**1932 Indian Eagle, MS65+
Popular Late-Series Type Coin**

- 6318 1932 MS65+ PCGS. CAC.** Lime-green margins bound the peach-gold fields and devices. Evenly struck and lustrous with attractive preservation and suitable eye appeal. Only scattered minor surface grazes determine the grade. The 1932 ten is the only readily collected gold issue from its decade.
From *The Glacier Collection*. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Liberty Double Eagle, AU55 Important First-Year Type Coin

- 6319 1850 AU55 NGC. CAC.** Ex: Duquesne. Its status as the first year of the design and denomination makes the 1850 Liberty double eagle an extremely popular issue with type collectors. This impressive Choice AU specimen displays well-detailed design elements with just a trace of high-point wear and lustrous green and orange-gold surfaces with a scattering of minor abrasions on both sides.
From *The Duquesne Collection*. NGC ID# 268F, PCGS# 8902

1850 Liberty Head Double Eagle, AU58 Attractive Type One Twenty

- 6320 1850 AU58 NGC. CAC.** The Liberty Head double eagle design was accepted in 1849, but the first mintage for circulation was in 1850. As a result, examples of the first-year twenties are always in demand. This near-Mint representative is lightly abraded as expected, but less-so than many Mint State coins in terms of bagmarks and large abrasions. The fields retain some prooflike flash and the rims are sharp and bold. A bold strike remains on the natural, medium-gold surfaces. CAC endorsed. NGC ID# 268F, PCGS# 8902

1850-O Double Eagle, VF25 First Branch Mint Issue

- 6321 1850-O VF25 PCGS. CAC. Variety 1.** A collector grade peach-gold and olive-green example of the introductory New Orleans double eagle issue. The surfaces display moderate wear and delicate hairlines but the only mentionable mark is an old pinscratch through the T in LIBERTY which cannot be clearly seen without a loupe. NGC ID# 268G, PCGS# 8903

1850-O Liberty Twenty, XF45 First New Orleans Double Eagle

- 6322 1850-O XF45 NGC. Variety 2.** Always popular as the first double eagle struck at a branch mint, the 1850-O Liberty twenty is a scarce issue in high grade. This attractive Choice XF specimen exhibits some light wear on the prongs of Liberty's crown, and the hair lines also show some rub, but most interior detail remains intact. The still-lustrous surfaces are lightly abraded, as well.
From *The Duquesne Collection*. NGC ID# 268G, PCGS# 8903

1851 Liberty Twenty, AU55 Large Mintage, Low Survival Rate

- 6323 1851 AU55 NGC.** Fueled by the massive influx of gold from California, the mintage of 1851 Liberty double eagles soared above 2 million pieces. Unfortunately, the issue circulated heavily and the survival rate was unusually low, especially for high-grade examples. This attractive Choice AU specimen is lightly worn and lightly abraded, with still-lustrous yellow and greenish-gold surfaces.
From *The Duquesne Collection*. NGC ID# 268H, PCGS# 8904

1851 Double Eagle, Reflective AU55

- 6324 1851 AU55 PCGS.** Glowing orange-gold luster and good preservation and strike are hallmarks of this eye-appealing Choice AU early Liberty twenty, certified in a PCGS green-label holder. A thin radial scrape inside of stars 1-4 is scarcely seen without a loupe but the only mentionable mark. The surfaces retain some nice prooflike reflectivity. NGC ID# 268H, PCGS# 8904

**1851 Double Eagle, Near-Mint
Perfect Type One Representative**

6325 1851 AU58 PCGS. Attractive khaki-gold surfaces feature fully defined radials on the stars, bold hair curls, and crisp feather detail. Minimal high-point rub is virtually invisible without the aid of a lens, and scattered abrasions are of little importance. This offering presents a prime opportunity to acquire a partly lustrous and nearly Uncirculated Type One representative from the denomination's second year of issue. NGC records only 74 examples rated higher (7/15). NGC ID# 268H, PCGS# 8904

**1851 Double Eagle, AU58
Elusive in Finer Grades**

6326 1851 AU58 NGC. CAC. Ex: "Col." E.H.R. Green. With large quantities of gold arriving from San Francisco to be converted into coins, double eagle production in Philadelphia exceeded 2 million pieces in 1851, nearly double the number produced the year before. Despite this high mintage, Mint State survivors are decidedly scarce, and none have been certified finer than MS64. This nearly Uncirculated piece displays luminous apricot-gold luster in the recesses, with unusually smooth surfaces and proportionately high eye appeal. A trace of friction is detected upon close examination, though the detail remains virtually complete. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$90.00; Eric P. Newman Numismatic Education Society; Newman Part V (Heritage, 11/2014), lot 3338. NGC ID# 268H, PCGS# 8904

**1851-O Double Eagle
AU Sharpness**

6327 1851-O — Removed From Jewelry — NGC Details. AU. Variety 1. The apricot-gold surfaces are unnaturally prooflike and appear polished, but noticeable marks are confined to a small reverse rim nick at 3 o'clock. A small rectangular lamination is noted on Liberty's neck. An always-popular New Orleans type issue. NGC ID# 268J, PCGS# 8905

**1852 Liberty Twenty, AU55
Lustrous and Lightly Abraded**

6328 1852 AU55 PCGS. With a reported mintage of more than 2 million pieces, the 1852 Liberty double eagle is one of the more available Type One issues. Most examples circulated extensively near the time of issue, however, making high-grade specimens elusive in today's market. This Choice AU example shows just a touch of wear on the well-detailed design elements and the lustrous surfaces are free of significant distractions. Housed in a green label holder. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU58
Popular Issue for Type Purposes**

6329 1852 AU58 NGC. CAC. Ex: Duquesne. With a reported mintage in excess of 2 million pieces, the 1852 Liberty double eagle is an available issue in lower grades, but Mint State examples are very scarce. This sharply detailed near-Mint example shows just a trace of friction on the high points of the design elements, and the lustrous orange-gold surfaces display a few minor abrasions. From *The Duquesne Collection*. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU58
Gold Rush-Era Type Coin**

6330 1852 AU58 NGC. CAC. The 1852 double eagle boasts a mintage of more than 2 million pieces, but as intended, the issue was a workhorse in commerce and the foreign trade. Few Uncirculated examples survive. This near-Mint piece is sharply detailed and retains hints of luster in the protected areas of the fields. The green-gold surfaces exhibit only a few scattered abrasions, as expected for the grade. NGC ID# 268K, PCGS# 8906

**1852/1852 Repunched Date Twenty, AU58
FS-301 Cherrypickers' Variety**

- 6331** 1852/1852 Repunched Date, FS-301, AU58 PCGS. The first date is visibly punched north of the second punch, so that the tops of each digit poke out above the final date. Adding further to the interest, a lazily looping die crack connects the left obverse field to the bottoms of all four digits and the right field. Only the most minor hint of high-point rub separates this lustrous yellow-gold coin from Mint State. For the variety, Population: 2 in 58, 4 finer (7/15). PCGS# 145729 Base PCGS# 8906

- 6332** 1853 XF40 NGC. A pleasing XF specimen from a mintage of 1.2 million pieces, this coin displays light wear on the prongs of the coronet and hair strands and lightly abraded greenish gold surfaces with traces of original mint luster.
From The Duquesne Collection. NGC ID# 268M, PCGS# 8908

- 6333** 1853 — Cleaning — Genuine PCGS. AU Details. Ex: Saddle Ridge Hoard. This piece has a special gold label PCGS Saddle Ridge label where they mention a Repunched Date and call it a minor variety. Slight recutting is evident within the 3, but is different than the so-called “1853/2” overdate (FS-301) or Breen-7161. Prominent cleaning lines are evident on the light yellow-gold obverse with considerable luster on the reverse.

- 6334** 1853 AU53 NGC. Myriad surface marks are present on both sides of this twenty dollar gold piece that was struck in Philadelphia during the height of the California Gold Rush. Traces of luster remain in the protected areas of this pleasing yellow-gold double eagle. NGC ID# 268M, PCGS# 8908

**1853 Double Eagle, MS61
Challenging in Mint State**

- 6335** 1853 MS61 PCGS. Doug Winter's online reference for Type One double eagles estimates that only 30 to 40 Mint State 1853 twenties survive, most in MS61 and MS62. This is one such example with attractive pale orange-gold coloration. The stars show full centers, and Liberty's curls are well-detailed. Each side exhibits subdued mint luster and a number abrasions. A small dark incrustation occurs above star 6. Population: 16 in 61, 25 finer (7/15). NGC ID# 268M, PCGS# 8908

**1853/2' Liberty Double Eagle, AU53
Popular FS-301 Variant**

- 6336** 1853/2' FS-301 AU53 NGC. Ex: Duquesne. The remains of an underdigit, most often called a 2, are evident below the final digit in the date. The 1853/2" variety is most easily recognized by the die lump below the R in LIBERTY. This lightly worn example offers pleasing orange-gold surfaces that show a few minor abrasions and retain considerable amounts of original mint luster. Census: 46 in 53 (1 in 53+), 73 finer (5/15).
From The Duquesne Collection. PCGS# 145730 Base PCGS# 8909

**1853-O Double Eagle, XF45
Scarce Low-Mintage Issue**

- 6337** 1853-O XF45 NGC. **Variety 1.** Mintage of Liberty double eagles was drastically reduced at the New Orleans Mint in 1853, to a mere 71,000 pieces, making the issue somewhat scarce in all grades today. This attractive Choice XF specimen shows lightly worn design elements and lustrous, lightly abraded greenish-gold surfaces.
From The Duquesne Collection. NGC ID# 268N, PCGS# 8910

- 6338** 1854 Small Date VF30 NGC. This is the more available of two varieties for the date. The 1854 Small Date is about on par with the 1852 and 1853 in terms of relative rarity despite a smaller mintage of 757,899 coins. This example features deep reddish-gold color and full centers on the stars. Myriad abrasions from circulation occur throughout. NGC ID# 268P, PCGS# 8911

**1854 Liberty Twenty, AU50
Scarcer Large Date Variant**

- 6339** 1854 Large Date AU50 NGC. CAC. Ex: Duquesne. The 1854 Large Date Liberty double eagle is much more elusive than its Small Date counterpart. This pleasing AU example displays lightly worn sharply detailed design elements, with lustrous yellow and greenish-gold surfaces that show some scattered minor abrasions on both sides. Census: 7 in 50, 83 finer (5/15).
From The Duquesne Collection. PCGS# 98911

1854-S Twenty, Unc Sharpness
First Double Eagle Issue of San Francisco

- 6340 1854-S — Smoothed — PCGS Genuine. Unc Details.** And the fields on each side appear to have been just that, smoothed or buffed, likely to efface abrasions. Quite a bit of eye appeal nonetheless remains on this first-year S-mint twenty, a historic issue in American numismatics that marks the long-awaited (and long-delayed, due to the faraway but meddlesome Washington bureaucracy) opening of the San Francisco Mint, five years after the California Gold Rush got seriously under way. This piece shows no mentionable high-point wear and offers a decent strike. There is an extensive network of die cracks on the reverse that many numismatists will find interesting and adding to the appeal. NGC ID# 268U, PCGS# 8913

1855 Twenty Dollar, AU53
Better Date in High Grade

- 6341 1855 AU53 PCGS.** The 1855 is one of the more challenging Philadelphia issues from the 1850s, especially in high grade. AU examples are elusive and Mint State coins are rare. This piece shows brief circulation, but retains luster in the protected regions of the fields and possesses well-detailed devices. A few linear marks below the eagle and another in the field near Liberty's eye are the only mentionable abrasions. NGC ID# 268V, PCGS# 8914

1855 Liberty Twenty, AU55
Lightly Abraded Example

- 6342 1855 AU55 NGC. CAC. Ex: Duquesne.** From a reported mintage of 364,666 pieces, the 1855 Liberty double eagle is a condition rarity in high grade. This attractive Choice AU specimen displays well-detailed design elements, with just a trace of wear, and pleasing orange-gold surfaces with a minimum number of minor contact marks for the grade. Census: 82 in 55 (1 in 55+★), 86 finer (5/15). From *The Duquesne Collection*. NGC ID# 268V, PCGS# 8914

- 6343 1855-S XF45 NGC. CAC. Ex: Duquesne.** Medium S. The availability of the 1855-S Liberty double eagle has been greatly augmented by recent shipwreck finds, as more than 300 examples were recovered from the wreck of the S.S. *Central America*. This well-detailed Choice XF specimen shows just a touch of actual wear and the pleasing surfaces are free of large or distracting abrasions. From *The Duquesne Collection*. NGC ID# 268X, PCGS# 8916

1856 Double Eagle, AU50
Elusive Type One Issue

- 6344 1856 AU50 NGC. CAC. Ex: Duquesne.** From a nominal mintage of 329,878 pieces, the 1856 Liberty double eagle is surprisingly difficult to locate, especially in high grade. Only a few examples have surfaced in recent shipwreck finds. This well-detailed, lightly worn AU example offers pleasing orange-gold surfaces that are remarkably free of large or distracting abrasions. From *The Duquesne Collection*. NGC ID# 268Y, PCGS# 8917

1856-S Double Eagle, AU55

- 6345 1856-S AU55 PCGS.** Scattered handling marks are mostly insignificant on this Choice AU S-Mint double eagle. Light yellow-gold surfaces retain noticeable luster in the protected areas. The actual S mintmark is weakly defined and only partially visible. Small splashes of coppery-orange toning appear on the reverse. NGC ID# 2692, PCGS# 8919

1856-S Twenty Dollar, AU58
Ex: S.S. *Central America*

- 6346 1856-S AU58 PCGS. Variety 17J. Ex: S.S. *Central America*, SSCA 5882. Split Serif.** From one of the most famous sunken treasure hoards ever discovered, this 1856-S double eagle is just a brush of friction shy of a Mint State designation. The design elements are boldly rendered and the fields display frosty orange-gold luster. No major abrasions are present. NGC ID# 2692, PCGS# 8919

1856-S Liberty Double Eagle, AU58
Excellent Type Coin

- 6347** 1856-S AU58 NGC. CAC. Ex: Duquesne. More than 1,000 examples of the 1856-S Liberty double eagle were recovered from the wreck of the S.S. *Central America*, making it one of the most available issues of the Type One design. This attractive near-Mint specimen is lustrous and lightly abraded, with well-detailed design elements that show just a trace of wear.

From *The Duquesne Collection*. NGC ID# 2692, PCGS# 8919

1857 Twenty, AU55
A Relatively Scarce Issue

- 6348** 1857 AU55 PCGS. Although the population of the 1857 Philadelphia Mint double eagle remained constant when the S.S. *Central America* treasure was recovered, the vast influx of S-Mint coins gave an appearance of rarity to the P-Mint issue. This Choice AU example has brilliant yellow surfaces with minimal marks and nearly full luster. NGC ID# 2693, PCGS# 8920
-

1857 Liberty Twenty, AU55
Elusive Issue Any Finer

- 6349** 1857 AU55 NGC. CAC. Ex: Duquesne. Unlike its San Francisco Mint counterpart, the 1857 Liberty double eagle from the Philadelphia Mint was not heavily represented in recent shipwreck finds. As a result, Mint State examples remain quite scarce. This Choice AU example displays lightly abraded lustrous surfaces, with well-detailed design elements that show just a trace of wear.

From *The Duquesne Collection*. NGC ID# 2693, PCGS# 8920

1857-S Liberty Double Eagle, AU55
Extremely Popular Type Coin

- 6350** 1857-S AU55 NGC. Medium S. Ex: Duquesne. The sharply detailed design elements of this attractive Choice AU specimen show just a trace of friction on the high points and the vivid orange-gold surfaces are remarkably free of large or distracting abrasions. Vibrant mint luster adds to the outstanding eye appeal. The 1857-S Liberty double eagle was rare in high grade before the discovery of the S.S. *Central America*.

From *The Duquesne Collection*. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, AU55
Smooth, Lustrous Surfaces

- 6351** 1857-S AU55 PCGS. Brief circulation is evident on the devices and in the open areas of the fields on this Choice AU 1857-S twenty, although there is not any noticeable loss of detail and the fields retain substantial luster. Rich straw-gold luster glows on each side and the eye appeal is outstanding. A popular date, made famous by the S.S. *Central America* shipwreck which yielded a few thousand examples. NGC ID# 2696, PCGS# 8922
-

1857-S Twenty Dollar, AU58
Original Orange-Gold Color

- 6352** 1857-S AU58 NGC. Breen-7189. Large S, which Breen called "very rare." All of the 1857-S double eagles recovered during the late 1980s from the S.S. *Central America* had Medium S mintmarks. This implies that the Large S variety was delivered after the S.S. *Sonora* left San Francisco for Panama on August 20, 1857. The present dusky, orange-gold near-Mint example is well-struck and exhibits the expected number of small to moderate obverse abrasions. It displays no overt seawater effects. NGC ID# 2696, PCGS# 8922
-

1857-S Double Eagle, AU58
Ex: S.S. Central America

- 6353 1857-S AU58 PCGS. CAC. Variety 20B.** Ex: S.S. Central America. SSCA 3085. Variety 20B has a Bold S mintmark, and the center portion of the top horizontal stroke in the E of AMERICA is broken. This nearly Uncirculated shipwreck coin has typically orange and rose-gold surfaces with bold design definition and lightly peppered marks. A numismatically and historically significant Type One twenty dollar gold coin. NGC ID# 2696, PCGS# 8922

1857-S Twenty, Narrow Serif, MS64
S.S. Central America Recovery Coin

- 6354 1857-S MS64 PCGS. Variety 20C.** Ex: S.S. Central America. SSCA 1449. This variety shows a repaired left serif on the U in UNITED, with narrow, straight sides and a blunt terminus. The center of the top horizontal stroke in ER in AMERICA is repaired, tapering to the left. This near-Gem shows a "typical" S.S. Central America look (meaning top-notch), with great luster on orange-gold to yellow-gold surfaces amid excellent preservation. A great example of this historic shipwreck coin and a nice alternative to the ubiquitous Spiked Shield variety. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, Frosty MS64
Ex: S.S. Central America

- 6355 1857-S MS64 PCGS. Variety 20A.** Ex: S.S. Central America, SSCA 3609. Spiked Shield. 1857-S double eagles recovered from the Central America shipwreck have a distinct, frosty glow not seen on other examples of the issue, one which many collectors find especially attractive. This piece is beautiful in that regard, warmed by rose-gold centers and deeper apricot color around the peripheries. The strike is tack-sharp and the surfaces are free of any major abrasions. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, XF45
Better Type One Date

- 6356 1858 XF45 NGC. CAC.** Ex: Duquesne. According to Mint records, 211,714 Liberty double eagles were struck at the Philadelphia Mint in 1858. Few examples were saved by contemporary collectors and the date is scarce-to-rare in all grades today. This Choice XF example exhibits light wear on the design elements and the antique-gold surfaces are lightly abraded. From The Duquesne Collection. NGC ID# 2697, PCGS# 8923

1858 Twenty Dollar, AU50
Scarcely Seen in High Grades

- 6357 1858 AU50 NGC.** A lightly circulated No Motto coin from a mintage of 211,714 pieces, this About Uncirculated twenty has partial luster in the recesses that illuminates well-detailed motifs with expected high-point blending. Rose and khaki-gold surfaces show scattered abrasions on each side. The 1858 is conditionally scarce at this grade level, though it is more available than its low-mintage New Orleans counterpart. NGC ID# 2697, PCGS# 8923

1858 Liberty Double Eagle, AU55
Elusive Issue in High Grade

- 6358 1858 AU55 NGC. CAC.** Ex: Duquesne. The 1858 Liberty double eagle is seldom encountered in Mint State grades, although a few nice coins were recovered from the wreck of the S.S. Republic. This attractive Choice AU specimen offers well-detailed design elements, with just a trace of high-point wear, and lustrous greenish-gold surfaces that show only minor abrasions. From The Duquesne Collection. NGC ID# 2697, PCGS# 8923

**1858-O Twenty, AU Details
Blundered Date, Breen-7192**

- 6359 1858-O Blundered Die — Harshly Cleaned — NCS. AU Details. Breen-7192.** “1858-O Blundered die. Very rare. Part of a third 8 protrudes from lower curl into field.” That is all Walter Breen said in his 1988 *Complete Encyclopedia* regarding this variety. In 1992, Doug Winter wrote “I have never personally seen or heard of such a piece and if this variety does exist it is extremely rare.” A decade later, Winter along with Adam Crum stated that “there do not appear to be any significant die varieties.” In 2004 Dave Bowers repeated the earlier 1988 information from Breen, adding nothing new. And in 2006 Doug Winter claimed that “there is just a single variety known.” Subsequent research by Heritage has identified three 1858-O die varieties. Breen-7192 is our Variety 2, and it remains rarer than Variety 1. The present example is richly detailed and retains glimpses of bright luster. Both sides display many fine hairlines.
Ex: *Deadwood Gulch Collection* (Heritage, 12/2008), lot 2256. NGC ID# 2698, PCGS# 8924

**1858-S Double Eagle, AU53
Pleasing Original Color**

- 6360 1858-S AU53 NGC.** The 1858-S had by far the highest double eagle mintage of the year, totaling nearly 850,000 coins. Yet, AU and Mint State pieces are nearly as scarce as are those of its Philadelphia counterpart. This example is only briefly circulated, with original olive-gold patina that retains hints of luster in the protected regions. There are no singularly obvious abrasions. NGC ID# 2699, PCGS# 8925

**1858-S Double Eagle, AU58
Rare Any Finer**

- 6361 1858-S AU58 PCGS.** The 1858-S Liberty Head twenty is rare in Mint State and only infrequently seen in the upper AU grades. This Borderline Uncirculated example is sharply detailed and held from a Mint State designation only by trivial friction over the high points of the design. Lightly abraded, but with significant luster remaining in the protected areas of the fields. Population: 46 in 58, 14 finer (7/15). NGC ID# 2699, PCGS# 8925

**1858-S Liberty Twenty, AU58
Scarcer Type One Double Eagle**

- 6362 1858-S AU58 NGC.** Ex: Duquesne. The 1858-S Liberty double eagle was struck too late to be included (and preserved) in the cargo of the S.S. *Central America*, and few examples were saved by contemporary collectors. As a result, the issue is scarce in AU58 condition, and finer examples are rare. This attractive near-Mint specimen shows just a trace of high-point wear and the lustrous surfaces show only minor abrasions. NGC has certified 19 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 2699, PCGS# 8925

1858-S Twenty, Eye-Appealing AU58

- 6363 1858-S AU58 PCGS.** Fantastic eye appeal is the byword for this early Type One S-mint double eagle in near-Mint State condition. Deep, mellow reddish-orange surfaces show minimal marks and retain most of their original luster. Mint State examples of this issue are quite elusive. Certified in a green-label holder. Population: 46 in 58, 14 finer (7/15). NGC ID# 2699, PCGS# 8925

1858-S Double Eagle, MS60
Scarce in Mint State

6364 1858-S MS60 NGC. The S.S. *Republic* yielded a few seawater salvage coins, but none were recovered from the S.S. *Central America*, and this San Francisco issue remains a Mint State rarity. The present coin shows strong mint luster and a relatively sharp strike, with numerous small abrasions across the frosty surfaces. Attractive, rich-gold color enhances the appeal. Census: 2 in 60, 17 finer (7/15). NGC ID# 2699, PCGS# 8925

1859 Liberty Double Eagle, AU50
Low-Mintage Philadelphia Issue

6365 1859 AU50 NGC. Ex: Duquesne. In addition to having a remarkably low Philadelphia business-strike mintage of 43,597 pieces, the 1859 Liberty double eagle was largely neglected by contemporary collectors. Few examples were saved and the 1859 is scarce-to-rare in all grades today. This attractive AU example is lightly worn and lightly abraded, with vivid orange-gold surfaces and vibrant mint luster. Census: 22 in 50, 67 finer (5/15).
From The Duquesne Collection. NGC ID# 269A, PCGS# 8926

1859-S Liberty Double Eagle, AU58
Rare in Finer Grades

6366 1859-S AU58 NGC. Ex: Duquesne. Like most double eagles of this era, the 1859-S is not difficult to locate in most circulated grades, but Mint State examples are rare. This attractive near-Mint example was sharply struck and shows just a trace of actual wear. The lightly abraded orange-gold surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC has graded 20 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 269C, PCGS# 8928

1860 Double Eagle, MS61
Lustrous, Colorful Surfaces

6367 1860 MS61 NGC. Ex: Duquesne. From a mintage of 577,670 pieces, the 1860 Liberty double eagle is easily located in lower circulated grades and a number of nicer coins were recovered from the wreck of the S.S. *Republic*. Still, the 1860 is an elusive issue in Mint State. This impressive MS61 example is well-struck, lustrous, and lightly marked for the grade. Census: 26 in 61, 17 finer (5/15).
From The Duquesne Collection. NGC ID# 269D, PCGS# 8929

1860-S Double Eagle, AU53
Attractive Type One Example

6368 1860-S AU53 NGC. CAC. Ex: Duquesne. The 1860-S Liberty double eagle follows the usual scenario for Type One twenties, the issue is common in VF-XF grades and difficult to locate finer, outside of a few examples from recent shipwreck finds. This lightly worn greenish-gold example retains some of its original mint luster and shows only minor abrasions.
From The Duquesne Collection. NGC ID# 269F, PCGS# 8931

1861 Double Eagle, Attractive AU55
Great Color and Luster

6369 1861 AU55 PCGS. Although minor wear is perceptible on the high points, the fields show only a slight thinning of the luster but few singular marks on this attractive Choice AU Type One twenty. Great orange color and generous luster produce broad eye appeal on this piece, certified in a green-label holder. NGC ID# 269G, PCGS# 8932

**1861 Liberty Double Eagle, AU55
In Demand for Type Purposes**

- 6370** 1861 AU55 NGC. CAC. Ex: Duquesne. A large mintage of nearly 3 million pieces makes the 1861 Liberty double eagle one of the most available Type One twenties and a popular choice of type collectors. This attractive Choice AU example shows just a touch of wear on the well-detailed design elements and the lightly abraded surfaces retain much original mint luster.

From The Duquesne Collection. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, Lustrous AU58

- 6371** 1861 AU58 NGC. For the grade, this near-Mint 1861 double eagle is unusually eye-appealing, with significant cartwheel luster illuminating warm yellow-gold surfaces. The coin is sharp, and the most obvious sign of brief circulation is light chatter in the fields on both sides. An outstanding Type One representative. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, Golden-Orange AU58

- 6372** 1861 AU58 NGC. Golden-orange surfaces host generous cartwheel luster on both sides and show light high-point wear. A few heavy abrasions appear scattered about, including a few on Liberty's cheek, but this piece retains good eye appeal through its decent strike, good color and luster. The 1861 double eagle had the largest mintage until the 1904. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, AU58
Appealing Type One Representative**

- 6373** 1861 AU58 PCGS. CAC. For type purposes, few Type One double eagles are as suitable as the 1861. This date had a mintage of nearly 3 million coins, and until the discovery of the S.S. *Central America* treasure, was the most plentiful Type One issue. This CAC-endorsed Borderline Uncirculated example is well-detail, with frosty green-gold patina that retains soft luster in the fields. There are no bothersome abrasions and the eye appeal is outstanding. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, MS60
Ideal No Motto Type Coin**

- 6374** 1861 MS60 NGC. In 1861, the issuance of Demand notes to raise funds for the war effort necessitated increased gold reserves, explaining the high mintage of double eagles in that year. This MS60 coin is a perfect entry point for collectors in search of an Uncirculated Type One twenty. Lustrous, rose and green-gold surfaces exhibit strong detail on the stars and hair curls with an expected number of abrasions scattered over each side. The reverse is comparatively clean. NGC ID# 269G, PCGS# 8932

- 6375** 1861-S XF45 NGC. A substantial quantity of large gold double eagles were coined in San Francisco in 1861. The year started out with production of Paquet double eagles, and continued using reverse dies of the standard design. This pleasing honey-gold example retains traces of luster with delicate rose color in the protected areas. NGC ID# 269K, PCGS# 8935

1861-S Liberty Twenty, AU55
Sharply Struck and Lightly Worn

6376 1861-S AU55 NGC. Ex: Duquesne. Produced in large numbers and widely circulated at the time of issue, the 1861-S Liberty double eagle conforms to the usual pattern of availability: lower circulated examples are common, high-grade pieces are rare. This sharply struck AU55 example exhibits just a touch of wear on the design elements and the lustrous yellow-gold surfaces show a scattering of minor abrasions on both sides.
From The Duquesne Collection. NGC ID# 269K, PCGS# 8935

6377 1862-S XF45 NGC. Traces of mint luster remain in the protected areas of this Type One S-Mint double eagle. The surfaces exhibit scattered marks that are consistent with the grade. NGC ID# 269N, PCGS# 8938

1862-S Double Eagle, AU50
Survivor of West Coast Commerce

6378 1862-S AU50 NGC. While West Coast commercial interests operated well-removed from the turmoil of the Civil War and somewhat insulated from its effects, the rest of the country nervously hoarded coinage from circulation. The 1862-S double eagles remained a stalwart of commerce in the West, and the coins circulated heavily. Those that did not were largely recovered from the bottom of the ocean. This About Uncirculated example shows no seawater characteristics, with natural orange-gold color and most abrasions softened by visible circulation. Nice mint luster remains across the attractive surfaces. NGC ID# 269N, PCGS# 8938

1862-S Liberty Twenty, AU53
Lightly Worn Type One Double Eagle

6379 1862-S AU53 NGC. CAC. Ex: Duquesne. Produced in large numbers, the 1862-S Liberty double eagle circulated heavily in both domestic economic circles and foreign trade. Before some recent shipwreck finds, the 1862-S was very rare in high grade, and the issue remains scarce at the AU53 level today. This attractive example is lightly worn and lightly abraded and retains traces of original mint luster.
From The Duquesne Collection. NGC ID# 269N, PCGS# 8938

1862-S Liberty Double Eagle, AU58
Lustrous, Lightly Worn Example

6380 1862-S AU58 NGC. Ex: Duquesne. Although the 1862-S Liberty double eagle was well-represented in recent shipwreck finds, the issue remains rare in Mint State grades. This attractive near-Mint example exhibits lightly abraded orange-gold surfaces with much original mint luster and just a trace of wear on the well-detailed design elements. NGC has graded 34 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 269N, PCGS# 8938

6381 1863-S XF45 NGC. Breen-7216. Medium S. Liberty's coronet and hair show minor high-point wear but the light orange-gold surfaces of this Choice XF specimen are lightly abraded and retain a few traces of original mint luster. NGC ID# 269R, PCGS# 8940

1863-S Twenty Dollar, AU55
Smooth Surfaces

6382 1863-S AU55 PCGS. The 1863-S double eagle had a mintage of nearly 1 million coins, but these experienced moderate to extensive circulation. The scarcity and cost of Mint State examples moves many collectors to seek high-end AU coins for their sets. This Choice AU representative displays uncommonly smooth surfaces for the grade, with luster remaining in the protected regions of the fields. NGC ID# 269R, PCGS# 8940

1863-S Double Eagle, AU58
Lightly Worn, Lustrous Surfaces

- 6383 1863-S AU58 NGC.** Ex: Duquesne. Recent shipwreck finds have greatly augmented the supply of high-grade 1863-S Liberty double eagles, which were always available in circulated condition, but almost never seen in Mint State before the new discoveries. This attractive near-Mint representative shows just a trace of wear on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded. NGC has graded 72 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 269R, PCGS# 8940

1863-S Double Eagle, AU58
Remarkably Appealing

- 6384 1863-S AU58 NGC. CAC.** This is an attractive example, showing sharp detail and remarkably smooth surfaces. Rose and honey-gold luster resides in the protected areas, illuminating soft overtones of olive-gold on the relief elements. The eye appeal rivals that of many lower-grade Uncirculated coins. NGC ID# 269R, PCGS# 8940

1864 Double Eagle, XF40

- 6385 1864 XF40 NGC.** The caramel-gold surfaces show some luster remaining despite 20 points of wear, and the high points display a smoke-gray haze no doubt created by long-term bag storage of this piece. Extensive abrasions of varying sizes are as expected for the grade on this Civil War date. NGC ID# 269S, PCGS# 8941

1864 Double Eagle, AU53
Vivid Color, Nice Luster

- 6386 1864 AU53 NGC. CAC.** Ex: Duquesne. From a nominal mintage of 204,235 pieces, the 1864 Liberty double eagle has a low survival rate, like many Type One twenties. Outside of some recent shipwreck finds, the issue is rarely seen in high grade. This attractive AU53 example is lightly worn and lightly abraded, with lustrous orange-gold surfaces and strong eye appeal.
From The Duquesne Collection. NGC ID# 269S, PCGS# 8941

- 6387 1864-S XF40 PCGS.** This is a lovely example for the grade, housed in an older green-label PCGS holder. Smooth and attractive with traces of luster on the orange-gold surfaces. NGC ID# 269T, PCGS# 8942

- 6388 1864-S XF45 NGC.** Ex: Duquesne. This attractive orange-gold representative shows some light wear on Liberty's crown and hair, but most interior detail remains intact. The pleasing orange-gold surfaces are lightly abraded. The 1864-S Liberty double eagle was seldom seen in high grade before the recoveries of the S.S. *Brother Jonathan* and the S.S. *Republic*.
From The Duquesne Collection. NGC ID# 269T, PCGS# 8942

1865 Double Eagle, Lustrous XF45

- 6389 1865 XF45 NGC.** The wheat-gold surfaces show scattered extensive marks but none of them are individually significant, appearing more as field chatter without magnification. Much reflectivity radiates from beneath the surfaces, safeguarding the eye appeal. The 1865 is the last P-mint Type One issue in the series. NGC ID# 269U, PCGS# 8943

**1865 Liberty Twenty, AU55
Colorful, Lustrous Example**

6390 1865 AU55 NGC. CAC. Ex: Duquesne. Although the issue is still scarce in Mint State grades, the supply of high-grade 1865 Liberty double eagles was increased dramatically by the discovery of the *S.S. Republic*. This impressive Choice AU example shows a touch of high-point wear on the well-detailed design elements and the lustrous greenish-gold surfaces are lightly abraded on both sides. From *The Duquesne Collection*. NGC ID# 269U, PCGS# 8943

6391 1865-S XF45 NGC. CAC. Ex: Duquesne. Small S. From a substantial mintage of just over 1 million pieces, the 1865-S Liberty double eagle was a heavily circulated issue that was seldom encountered in high grade before it surfaced in recent shipwreck finds. This lightly worn Choice XF example offers lightly abraded orange-gold surfaces with traces of original mint luster. From *The Duquesne Collection*. NGC ID# 269V, PCGS# 8944

**1865-S Twenty Dollar, MS62
Ex: S.S. Brother Jonathan**

6392 1865-S MS62 PCGS. Ex: *S.S. Brother Jonathan*, #834. The sidewheel steamship *S.S. Brother Jonathan* wrecked off the coast of Crescent City, California, on July 30, 1865. More than a thousand gold coins were recovered from the shipwreck in 1997, including many Uncirculated 1865-S twenties. The present caramel-gold representative is well struck and lustrous with clean fields and only minor facial marks. Ex: *S.S. Brother Jonathan Treasure Coins (Bowers and Merena, 5/1999)*, lot 720. NGC ID# 269V, PCGS# 8944

**1866 With Motto Twenty, AU58
Deep, Original Patina**

6393 1866 Motto AU58 PCGS. The scarcity of Mint State 1866 double eagles heightens demand for high-end AU examples such as the present coin. Both sides yield undeniably original orange and green-gold color with luster remaining the protected areas of the fields. Brief circulation is evident on the high points of the portrait and in the open regions of the fields. Population: 63 in 58, 41 finer (6/15). From *The Badger Collection*. NGC ID# 269X, PCGS# 8949

**1866 Liberty Twenty, AU58
First Type Two Double Eagle**

6394 1866 Motto AU58 NGC. CAC. Ex: Duquesne. The motto *IN GOD WE TRUST* was added to the design of the double eagle in 1866, introducing the popular Type Two design. From an adequate mintage of 698,745 pieces, the 1866 Liberty double eagle is not difficult to locate in most circulated grades, but Mint State examples are rare. This attractive near-Mint example exhibits well-detailed design elements with just a trace of friction on the high points. The lustrous orange-gold surfaces are pleasing and lightly abraded. NGC has graded 45 numerically finer examples (5/15). From *The Duquesne Collection*. NGC ID# 269X, PCGS# 8949

**1866-S Motto Double Eagle, XF40
Gold CAC Approved**

6395 1866-S Motto XF40 PCGS. Gold CAC. The first year of the Type Two With Motto double eagle is represented by a spectacular gold-CAC approved example that is housed in a green-label PCGS holder. Traces of delicate orange toning appear in the protected areas with dark high-point toning. Only 21 Type Two double eagles have been rewarded with a gold-CAC sticker (7/15). NGC ID# 269Y, PCGS# 8950

1866-S Twenty Dollar, AU50
Nice Luster Remains

- 6396 1866-S Motto AU50 NGC.** Double eagles were struck at the San Francisco Mint both Without Motto and With Motto in 1866, a function of when the dies were received with the motto added. While the S-Mint Without Motto twenties are far scarcer than the first-year With Motto coins, both varieties circulated heavily in the West. This medium-gold example of the Motto type retains considerable mint luster for the AU50 grade. The surfaces are expectedly busy with small bagmarks and minor evidence of circulation. NGC ID# 269Y, PCGS# 8950

1867 Liberty Double Eagle, AU58
Lightly Marked, Lustrous Surfaces

- 6397 1867 AU58 NGC. CAC.** Ex: Duquesne. The reported mintage of 1867 Liberty double eagles was 251,015 pieces, relatively modest in the context of the series. Fortunately for present-day collectors, a number of coins have surfaced in European holdings over the years. This attractive near-Mint specimen features sharply detailed design elements with just a trace of wear, and lightly marked orange-gold surfaces with vibrant mint luster.
From *The Duquesne Collection*. NGC ID# 269Z, PCGS# 8951

1867 Twenty Dollar, MS61
Smoothly Lustrous Surfaces

- 6398 1867 MS61 NGC.** A favored Philadelphia issue for its Type Two reverse and generally high quality color and luster, this gleaming Mint State example displays remarkably few abrasions for the grade. The smooth surfaces are brilliantly lustrous with the preferred sun-gold coloration and Mint-fresh appeal. Sharply struck. NGC ID# 269Z, PCGS# 8951

1867 Double Eagle, MS61
Radiant, Original Luster

- 6399 1867 MS61 PCGS.** Typical of the issue, the surfaces are noticeably abraded, and yet the comprehensive luster brings out considerable eye appeal. The 1867 twenty was struck too late to participate in shipwreck hoards, yet coined too early to be exported to foreign banks in large number. As a result, Uncirculated examples are scarce.
Ex: *Baltimore ANA (Heritage, 8/2008)*, lot 3302; *Pittsburgh Signature (Heritage, 10/2011)*, lot 5119. NGC ID# 269Z, PCGS# 8951

- 6400 1867-S XF45 NGC.** Small Squat S. The 1867-S Liberty double eagle claims a large mintage of 920,750 pieces, but few examples were saved from the rigors of circulation and high-grade pieces are seldom encountered. This lightly worn and lightly abraded Choice XF specimen retains much original mint luster.
From *The Duquesne Collection*. NGC ID# 26A2, PCGS# 8952

1867-S Liberty Twenty, AU55
Scarce in High Grade

- 6401 1867-S AU55 NGC.** Bright, yellow-gold surfaces retain hints of luster in the protected regions, giving this Choice AU 1867-S double eagle pleasing eye appeal. About Uncirculated examples of this issue are marginally available, but Mint State coins are rare and almost all show extensive abrasions. This coin is lightly circulated but exhibits fairly smooth surfaces.
From *The Badger Collection*. NGC ID# 26A2, PCGS# 8952

1868 Liberty Twenty, AU58
Elusive Low-Mintage Issue

- 6402 1868 AU58 NGC. CAC.** Ex: Duquesne. With a reported mintage of 98,575 pieces, the 1868 Liberty double eagle is a scarce-to-rare issue in all grades. This impressive near-Mint specimen shows just a touch of friction on the high points of the well-detailed design elements and the brightly lustrous yellow-gold surfaces display well-scattered minor abrasions. Census: 43 in 58, 8 finer (5/15).
From *The Duquesne Collection*. NGC ID# 26A3, PCGS# 8953

1868-S Double Eagle, AU58
Few Survive Finer

- 6403 1868-S AU58 NGC.** Medium green-gold patina shows hints of rose-gold luster in the peripheral recesses, giving this near-Mint 1868-S double eagle pleasing eye appeal. AU examples of this San Francisco issue are usually available, but Mint State coins are seldom seen in any grade. The present piece offers an affordable, yet, well-detailed alternative to a bagmarked Mint State representative. NGC lists 38 Uncirculated coins finer (6/15).
From *The Badger Collection*. NGC ID# 26A4, PCGS# 8954

1868-S Liberty Double Eagle, AU58
Seldom Encountered Finer

- 6404 1868-S AU58 NGC. CAC.** Ex: Duquesne. Like most Type Two Liberty double eagles, the 1868-S is easily located in lower circulated grades but rare in Mint State. This attractive near-Mint representative exhibits well-detailed design elements that show just a trace of wear and lustrous yellow and orange-gold surfaces with a scattering of minor abrasions. NGC has graded 38 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 26A4, PCGS# 8954

- 6405 1869 AU50 NGC. CAC.** Ex: Duquesne. This popular Type Two double eagle shows minimal wear on the design elements and lightly abraded orange-gold surfaces that retain significant amounts of original mint luster. From a mintage of 175,155 pieces, the 1869 Liberty twenty is a scarce issue in high grade.
From *The Duquesne Collection*. NGC ID# 26A5, PCGS# 8955

1869-S Liberty Twenty, AU55
Popular Type Two Issue

- 6406 1869-S AU55 NGC.** Ex: Duquesne. The 1869-S Liberty double eagle enjoyed a substantial mintage of 686,750 pieces, making it reasonably available in most circulated grades. As is typical of Type Two twenties, few examples have survived in Mint State condition. This Choice AU specimen shows light wear on the well-detailed design elements and the lustrous orange-gold surfaces exhibit scattered minor abrasions.
From *The Duquesne Collection*. NGC ID# 26A6, PCGS# 8956

1869-S Double Eagle, Lovely AU58

- 6407 1869-S AU58 PCGS.** A lovely example with pinkish-gold luster and only a trace of wear on the high points. The surfaces on both sides show numerous tiny abrasions, most visible only with magnification. This is quite a scarce coin in the high AU or Mint State grades. Population: 86 in 58 (2 in 58+), 53 finer (6/15).
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 5001.
From *The Badger Collection*. NGC ID# 26A6, PCGS# 8956

1869-S Liberty Double Eagle, AU58
Popular Type Two Issue

- 6408 1869-S AU58 PCGS.** Like most Type Two double eagles, the 1869-S is not difficult to locate in average circulated grades, but high-grade specimens are rare. This attractive near-Mint example exhibits well-detailed design elements with just a trace of wear on the high points, and lustrous, lightly abraded surfaces. Housed in a green label holder. PCGS has graded 53 numerically finer examples (7/15). NGC ID# 26A6, PCGS# 8956

1870 Liberty Double Eagle, AU55
Scarcer Philadelphia Issue

- 6409** 1870 AU55 NGC. Ex: Duquesne. From a nominal mintage of 155,150 pieces, the 1870 Liberty double eagle is surprisingly elusive in all grades. This impressive Choice AU specimen offers well-detailed design elements with just a touch of rub on the high points. The colorful orange-gold surfaces show some scattered minor abrasions and vibrant mint luster adds to the considerable eye appeal.

From The Duquesne Collection. NGC ID# 26A7, PCGS# 8957

1870 Twenty Dollar, Lustrous AU55

- 6410** 1870 AU55 NGC. Somewhat overshadowed by its more famous Carson City counterpart, the 1870 double eagle is itself scarce in the finer AU grades and is seldom seen in Mint State. This Choice AU representative is pleasantly original with blended rose and yellow-gold hues that exhibit radiant luster in the fields. Trivial wear accompanies a scattering of minor abrasions, as expected for the grade. Housed in a prior generation holder.

From The Badger Collection. NGC ID# 26A7, PCGS# 8957

1870 Double Eagle, AU55
Choice Original Surfaces

- 6411** 1870 AU55 PCGS. The 1870 Liberty double eagle is a better Philadelphia issue with a notably small Mint State population. This Choice AU example is a well-detailed, still-lustrous representative of the date that is somewhat more affordable than the heavily abraded Uncirculated pieces. Both sides show medium orange-gold patina, with a few scattered abrasions as allowed by the grade. Population: 19 in 55, 74 finer (7/15). NGC ID# 26A7, PCGS# 8957

1870 Double Eagle, AU58
Preferred Philadelphia Issue

- 6412** 1870 AU58 PCGS. Although not nearly as rare or celebrated as its Carson City counterpart, the 1870 Philadelphia issue is squarely in the crosshairs of gold specialists who realize the scarcity of the issue in Mint State. This near-Mint example provides many of the attributes usually seen only in higher grades. Much mint luster remains over the impressive orange-gold surfaces. Marks are minimal in severity and frequency. The frosty surfaces reveal a sharp strike and few signs of wear or handling. An opportunity for the astute bidder. Population: 30 in 58 (1 in 58+), 44 finer (7/15). NGC ID# 26A7, PCGS# 8957

1870-S Twenty Dollar, AU58
Lustrous and Original

- 6413** 1870-S AU58 NGC. The S-mint silver dollar of this year is a major rarity, but the double eagle is collectible through the AU grade levels. This original example displays medium green-gold patina with hints of luster in the protected regions. Minor friction leaves the surfaces lightly abraded, but without any individually significant distractions. Seldom found finer.

From The Badger Collection. NGC ID# 26A9, PCGS# 8959

1871 Liberty Twenty, AU55
Better P-Mint Type Two Issue

- 6414** 1871 AU55 PCGS. A rather limited mintage of 80,120 double eagles was accomplished in Philadelphia in 1871. Mint State survivors are rare, and high-end AU coins are only occasionally seen. This Choice About Uncirculated example displays lustrous yellow-gold surfaces with just a touch of wear over the high points of the design. Light, scattered abrasions accompany the grade, as usual. Population: 26 in 55, 27 finer (7/15). NGC ID# 26AA, PCGS# 8960

**1871 Liberty Twenty, AU55
Better Philadelphia Date**

- 6415 1871 AU55 NGC.** Ex: Duquesne. The 1871 Liberty double eagle is a better date from a low Philadelphia mintage of 80,120 pieces. This impressive Choice AU example displays lightly worn, well-detailed design elements, and lustrous surfaces with a scattering of minor abrasions. Census: 54 in 55, 88 finer (5/15).
From *The Duquesne Collection*. NGC ID# 26AA, PCGS# 8960

- 6416 1871-S AU55 NGC.** Micro S. From a substantial mintage of 928,000 pieces, the 1871-S Liberty double eagle is a relatively plentiful issue that has surfaced in European holdings over the years. Like all Type Two issues, the 1871-S is elusive in high grade. This lustrous Choice AU example is well-detailed, lightly worn, and lightly abraded.
From *The Duquesne Collection*. NGC ID# 26AC, PCGS# 8962

- 6417 1871-S AU58 NGC.** Micro S. This honey-gold Type Two twenty displays substantial luster but has a few too many bagmarks to be regarded as Mint State. Most '71-S examples served in West Coast commerce, given the rarity of the issue in Uncirculated grades.
From *The Badger Collection*. NGC ID# 26AC, PCGS# 8962

**1871-S Double Eagle, MS60
Scarce in Mint State**

- 6418 1871-S MS60 PCGS.** Micro S, one of three mintmark sizes known for the issue. Like all Type Two twenties, the 1871-S is scarce in Uncirculated grades. The present apricot-gold example displays relatively few abrasions. Cartwheel luster dominates the reverse and illuminates generous portions of the obverse. NGC ID# 26AC, PCGS# 8962

- 6419 1872 AU53 PCGS.** Nearly full satin luster is apparent on both sides of this lovely double eagle that is housed in a green-label PCGS holder. Hints of prooflike surface on both sides add to its eye appeal. NGC ID# 26AD, PCGS# 8963

- 6420 1872 AU58 NGC.** CAC. Ex: Duquesne. The 1872 Liberty double eagle is very scarce in Mint State grades. This attractive near-Mint example shows just a trace of high-point wear and the vivid orange-gold surfaces retain almost all of their original mint luster. NGC has graded 82 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 26AD, PCGS# 8963

- 6421 1872-S AU58 NGC.** Small Squat S, the most available of three mintmark sizes found on '72-S twenties. Luster illuminates the borders and motifs of this yellow-gold representative. The scattered moderate marks are characteristic of the grade and denomination.
From *The Badger Collection*. NGC ID# 26AF, PCGS# 8965

- 6422 1873-S Closed 3 AU58 NGC.** Small S. The Type Two design is known for its elusiveness in Uncirculated grades. While the present piece shows slight wear on the obverse field, it is also valued at only about half the price of an MS61 example. The obverse displays the expected number of small marks, though only a short line on the chin merits mention.
From *The Badger Collection*. NGC ID# 26AL, PCGS# 8969

**1873-S Liberty Twenty, MS61
Popular Closed 3 Variant**

- 6423 1873-S Closed 3 MS61 NGC.** CAC. Ex: Duquesne. The 1873-S Liberty double eagle with a Closed 3 in the date is not too difficult to locate in circulated grades, but Mint State examples are quite scarce. This attractive MS61 specimen exhibits well-detailed design elements and vivid orange-gold surfaces with a scattering of minor contact marks that explain the grade. NGC has graded 28 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 26AL, PCGS# 8969

1873-S Closed 3 Twenty, Appealing MS61

- 6424 1873-S Closed 3 MS61 PCGS.** CAC. The Closed 3 variety of the 1873-S Liberty Head double eagle is more available than its Open 3 counterpart, but examples in Mint State are scarce. The present coin is a well-detailed MS61 specimen, with slightly reflective yellow-gold surfaces. Strong rose-gold highlights are noted on both sides, and the coin possesses considerable eye appeal.
Ex: *Sacramento Signature* (Heritage, 3/2011), lot 4948. NGC ID# 26AL, PCGS# 8969

- 6425 1873-S Open 3 AU55 NGC.** Small Squat S. Nearly full luster remains on this Choice AU S-Mint double eagle with brilliant light yellow surfaces and dark high-point toning. Scattered handling marks on each side are trivial and insignificant. NGC ID# 26AM, PCGS# 8979

- 6426 1873-S Open 3 AU55 NGC.** CAC. Ex: Duquesne. Small S. The 1873-S Liberty double eagle with an Open 3 in the date is more difficult to locate than its Closed 3 counterpart. This impressive Choice AU specimen exhibits just a trace of wear on the strongly impressed design elements and the colorful orange-gold surfaces are lightly abraded, with vibrant mint luster on both sides.
From *The Duquesne Collection*. NGC ID# 26AM, PCGS# 8979

**1873-S Double Eagle, AU58
Scarcer Open 3 Variant**

- 6427 1873-S Open 3 AU58 NGC.** The Open 3 1873-S double eagle is notably scarcer than its Closed 3 counterpart, and Mint State examples are seldom seen. This Borderline Uncirculated coin exhibits medium yellow-gold patina with luster shining in the protected regions of the fields. Scattered abrasions are present, the most noticeable being a thin scratch in the left obverse field near Liberty's nose.
From The Badger Collection. NGC ID# 26AM, PCGS# 8979

**1874-CC Double Eagle, AU50
Popular Mintmark Type Issue**

- 6428 1874-CC AU50 NGC. Variety 1-A. Ex: Duquesne.** An unusually large mintage of 115,085 Liberty double eagles was accomplished at the Carson City Mint in 1874, making the issue one of the more available dates from this popular mint. This attractive AU example shows light wear on the design elements and the lightly abraded orange-gold surfaces retain significant amounts of original mint luster.
From The Duquesne Collection. NGC ID# 26AP, PCGS# 8971

**1874-S Liberty Twenty, MS61
Attractive Type Two Double Eagle**

- 6429 1874-S MS61 NGC. Ex: Duquesne.** The 1874-S Liberty double eagle was produced in large numbers, but the issue circulated widely and few examples were saved. Accordingly, the 1874-S is very scarce in grades above the MS61 level. This attractive Mint State example is well-detailed and brightly lustrous, with scattered minor contact marks that explain the grade. NGC has graded 34 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26AR, PCGS# 8972

**1874-S Double Eagle, MS61
Attractive Original Toning**

- 6430 1874-S MS61 PCGS. Block S.** Rich lemon-gold toning consumes this lustrous Type Three twenty. The fields and cheek display the expected number of small to moderate marks. Very scarce any finer, since Uncirculated survivors were loosely stored by banks. At least three different mintmark sizes exist on 1874-S double eagles, an underappreciated topic of research.
From The Badger Collection. NGC ID# 26AR, PCGS# 8972

- 6431 1875 MS60 PCGS.** Housed in a green-label PCGS holder, this frosty Mint State double eagle displays impressive eye appeal with brilliant and fully lustrous surfaces. While scattered hairlines prevent a higher grade, no distracting marks are apparent on either side. NGC ID# 26AS, PCGS# 8973

**1875-CC Liberty Double Eagle, AU55
Type Two Branch Mint Issue**

- 6432 1875-CC AU55 NGC. CAC. Variety 2-B. Ex: Duquesne.** The 1875-CC Liberty double eagle is one of the more available Type Two issues from the Carson City Mint, making it a popular choice with mintmark type collectors. This attractive Choice AU specimen is lightly worn and lightly abraded, with pleasing orange-gold surfaces that retain much original mint luster in sheltered areas.
From The Duquesne Collection. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty, Borderline Uncirculated

- 6433 1875-CC AU58 NGC. Variety 1-A.** A butter-gold example that approaches Mint State, although luster is incomplete across the left obverse field. Liberty's jaw and the field beneath the wings show unobtrusive abrasions. 13 die marriages are confirmed for '75-CC double eagles. Variety 2-B appears to be most often encountered, while the other varieties range from scarce to rare. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, AU58
Lustrous Fields

6434 1875-CC AU58 PCGS. Variety 4-B. One of the more available Type Two Carson City issues, ideal for type representation. This near-Mint example is sharply detailed and retains significant amounts of orange-gold luster in the protected areas of the fields. A few scattered abrasions are not detracting and the strike is bold. NGC ID# 26AT, PCGS# 8974

6435 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. This impressive double eagle is an important entry in the Type Two design. The lightly hairlined obverse retains full luster while the frosty reverse is fully brilliant. NGC ID# 26AT, PCGS# 8974

6436 1875-S MS61 NGC. Yellow-gold surfaces display hints of light rose. Distributed marks, primarily on the obverse, impede the luster flow. The design elements are well-struck throughout. The 1875-S is readily obtainable through MS61, after which the population declines considerably.
From The Badger Collection. NGC ID# 26AU, PCGS# 8975

1875-S Twenty Dollar, MS62
Appealing Type Two Representative

6437 1875-S MS62 PCGS. CAC. The fate met by most 1875-S double eagles included circulation on the West Coast, exportation overseas for international trade, or both. Coins found in foreign holdings usually grade between AU and MS60 to MS61 with heavy bagmarks. This MS62 representative is cleaner than the typical survivor, though small abrasions and grazes are scattered throughout. Moderate softness occurs over a few stars and the hair curls, while frosty S-mint luster and peach-gold color combine to give this coin excellent eye appeal. PCGS reports 22 finer submissions (7/15). NGC ID# 26AU, PCGS# 8975

1875-S Twenty, Frosty MS63
Seldom Seen So Fine

6438 1875-S MS63 PCGS. Highly lustrous, frosty surfaces set this gleaming Select Uncirculated double eagle apart. Captivating overtones of copper-red, lime-green, and olive-gold appear amid richly flowing, orange-gold luster. Only scattered, minor abrasions touch the satin-smooth surfaces. An area of alloy toning on the reverse above the eagle's head as well as a small accent by star 5 on the obverse add interest to the lush toning.

The 1875-S issue belies its 1.2 million-piece mintage with the availability of Uncirculated examples abruptly ending at the MS62 level. Most collections (including many of the finest) lack a Select example of this date. Population: 16 in 63 (2 in 63+), 6 finer (6/15). NGC ID# 26AU, PCGS# 8975

6439 1876 MS61 PCGS. Light Motto. The ephemeral Light Motto is found only on a portion of 1876 Philadelphia twenties. It appears on no other issue, probably because the reverse was modified in 1877 to spell out DOLLARS. The layout of the rays differs from the usual Heavy Motto variety. This apricot-gold example is lustrous and well struck. Slender marks on the cheek and chin determine the grade.
From The Badger Collection. NGC ID# 26AV, PCGS# 8976

1876-CC Double Eagle, AU58
Colorful and Lustrous

6440 1876-CC AU58 NGC. Variety 1-A. Ex: Duquesne. From a series-high mintage of 138,441 pieces, the 1876-CC Liberty double eagle is relatively easy to locate in circulated grades, but Mint State specimens are still elusive. This well-detailed near-Mint example shows just a trace of high-point wear, and the lustrous orange-gold surfaces are free of large or distracting abrasions.

From The Duquesne Collection. NGC ID# 26AU, PCGS# 8977

1876-CC Liberty Twenty, AU58
Some Semiprooflike Surface

- 6441 1876-CC AU58 NGC. Variety 3-A.** A popular Carson City issue, moderately available for the budget-conscious collector seeking a single coin from this mint. The present example is nearly Mint State, showing only trivial friction over the sharply rendered motifs. Bright yellow-gold patina is highlighted by semiprooflike mirroring in the protected regions of the fields.

From The Badger Collection. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU58
Great Color and Surfaces

- 6442 1876-CC AU58 NGC. Variety 2-C,** showing the second C in the mintmark left of the second T in TWENTY and the 1 in the date a bit further from the bust than on the 1-C variety. A die lump appears in Liberty's hair over the R in LIBERTY. This near-Mint State example offers great eye appeal on reddish-orange surfaces that show a few scattered ticks but no singular marks on either side. The large mintage of the 1876-CC, more than 138,000 coins, makes it a great choice for a Type Three Carson City representative.

NGC ID# 26AW, PCGS# 8977

- 6443 1876-S MS61 PCGS.** An attractive Mint State example of this popular type issue, with vibrant mint luster and well-detailed design elements. The bright orange-gold surfaces show the minimum number of minor contact marks for the grade. *NGC ID# 26AX, PCGS# 8978*

1876-S Double Eagle, MS62
Excellent Type Coin

- 6444 1876-S MS62 NGC.** Ex: Duquesne. With a mintage of nearly 1.6 million pieces, the 1876-S Liberty double eagle is one of the most available Type Two twenties, and a popular choice of type collectors. This attractive MS62 example displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster on both sides.

From The Duquesne Collection. NGC ID# 26AX, PCGS# 8978

1876-S Twenty Dollar, Satiny MS62

- 6445 1876-S MS62 PCGS.** A satiny and crisply struck piece with pleasantly unmarked surfaces. A popular issue from the final year of the Type Two design; the denomination would be spelled out beginning in 1877. Clash marks (as made) surround the ear. The mintmark is placed further right than usual, nearly centered above the first T in TWENTY.

Ex: Meads Point Collection / Dallas Signature (Heritage, 12/2005), lot 1729.

From The Badger Collection. NGC ID# 26AX, PCGS# 8978

1877-CC Double Eagle, AU Details
Popular as the First Type Three CC-Mint Issue

- 6446 1877-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** The second C in the mintmark higher than the first, the die line from the rim to star 10, and the clashmarks above Liberty's earlobe confirm the variety. The orange-gold surfaces of this AU Details example display whispers of yellow-gold. The few minute marks are in concert with a lightly circulated large gold coin. The 1877-CC is popular as the first issue of the Type Three design type struck at the Carson City Mint.

1877-CC Double Eagle, AU50
First Type Three CC-Mint Issue

- 6447 1877-CC AU50 NGC. Variety 1-A.** Ex: Duquesne. The 1877-CC Liberty double eagle is always popular as the first Type Three twenty from the Carson City Mint. This attractive AU specimen features sharply struck design elements that show just a trace of wear on the high points. The vivid orange-gold surfaces are lustrous and lightly abraded and overall eye appeal is quite strong.

From The Duquesne Collection. NGC ID# 26AZ, PCGS# 8983

1877-CC Twenty, Lustrous AU55

- 6448 1877-CC AU55 PCGS. Variety 1-A.** The obverse is in a later die state, showing clash marks within Liberty's ear from the shield crossbars on the reverse. Three obverse dies and four reverse dies were combined into five die combinations for the 1877-CC double eagles. This Choice AU example displays frosty yellow-gold surfaces with nearly full luster and minor traces of wear on each side.
Ex: FUN Signature (Heritage, 1/2012), lot 6686. NGC ID# 26AZ, PCGS# 8983

1877-CC Twenty Dollar, Choice AU
Conditionally Scarce Carson City Issue

- 6449 1877-CC AU55 PCGS. Variety 2-C.** The first 7 in the date is centered over a dentil, and both Cs in the mintmark are level. This is the first year of implementation for the Type Three design, and CC-mint output amounted to just 42,565 double eagles in that year. Orange-gold surfaces feature boldly rendered relief elements with moderate blending over Liberty's hair strands. The detail is otherwise crisp, and small scattered abrasions are undistracting. NGC ID# 26AZ, PCGS# 8983

1877-S Twenty Dollar, MS62
Radiant Orange-Gold Luster

- 6450 1877-S MS62 PCGS.** The inaugural Type Three San Francisco issue, the 1877-S double eagle had a substantial mintage of more than 1.7 million coins, however, pieces surviving finer than the present MS62 example are genuinely rare. This coin displays sharp devices and frosty orange-gold luster. Light, scattered abrasions limit the grade, yet only 32 pieces are numerically finer at PCGS (6/15).
From The Badger Collection. NGC ID# 26B2, PCGS# 8984

1877-S Twenty, Sharp MS62

- 6451 1877-S MS62 PCGS.** The 1877-S is the most plentiful double eagle of this year, and the first San Francisco issue of the Type Three design which shows the denomination spelled out on the reverse, rather than abbreviated. This Uncirculated example is sharply struck, with frosty yellow-gold luster. Light, scattered abrasions are as expected for the grade. PCGS lists 32 numerically finer coins (7/15). NGC ID# 26B2, PCGS# 8984

1877-S Double Eagle, MS62
First Type Three Twenty

- 6452 1877-S MS62 NGC. CAC.** Ex: Duquesne. The 1877-S Liberty twenty represents the first year of the Type Three design, an important consideration for type purposes. The 1877-S was produced in large numbers, but relatively few were saved by contemporary collectors, making the issue rare in grades above the MS62 level. The present coin offers well-detailed design elements and vivid, lustrous orange-gold surfaces with some scattered minor contact marks. NGC has graded nine numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26B2, PCGS# 8984

1878 Liberty Twenty, MS62
Seldom Encountered Any Finer

- 6453 1878 MS62 NGC.** Ex: Duquesne. Although the 1878 Liberty double eagle is plentiful in lower Mint State grades, the population drops off dramatically at the MS62 level, and finer examples are rare. This sharply detailed example possesses vibrant mint luster and lightly marked yellow-gold surfaces with strong eye appeal. NGC has graded 28 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26B3, PCGS# 8985

**1878-CC Liberty Double Eagle, XF45
Elusive Low-Mintage Issue**

- 6454 1878-CC XF45 NGC. Variety 1-A.** Ex: Duquesne. The 1878-CC Liberty double eagle is a scarce issue in all grades, from a low mintage of 13,180 pieces. This Choice XF example offers sharply struck design elements that show a trace of wear on the coronet and Liberty's hair, but retain most interior detail intact. The lustrous yellow and rose-gold surfaces are lightly abraded. From *The Duquesne Collection*. NGC ID# 26B4, PCGS# 8986

**1878-S Twenty, Vibrant MS62
Warm Coloration**

- 6455 1878-S MS62 PCGS.** A small number of 1878-S double eagles were among the coins discovered in the Saddle Ridge Hoard, but the availability of Mint State coins was largely unaffected. This MS62 example exhibits sharp motifs and rich orange-gold luster. A scattering of minor abrasions limits the grade but poses minimal distraction. Only nine coins are numerically finer at PCGS (6/15). From *The Badger Collection*. NGC ID# 26B5, PCGS# 8987

1879-CC Double Eagle, AU Details.

- 6456 1879-CC — Obverse Damage — NGC Details. AU. Variety 1-A.** Variety 1-A, the only known dies for the 1879-CC double eagle. The mintage was an impressively low 10,708 coins, and examples are rarely encountered today. The Obverse damage is apparently nothing more than a few small dents at the top of Liberty's head on this mostly lustrous light yellow double eagle. NGC ID# 26B7, PCGS# 8989

1879-S Twenty, Lustrous MS61

- 6457 1879-S MS61 PCGS.** Lustrous green-gold surfaces yield hints of rose and peach throughout each side of this 1879-S double eagle. The devices are sharp and abrasions are pleasantly at a minimum for the grade. This San Francisco issue is usually available in MS60 and MS61, but finer examples are seldom encountered. From *The Badger Collection*. NGC ID# 26B9, PCGS# 8991

**1879-S Twenty, Lustrous MS61
Appealing Color**

- 6458 1879-S MS61 PCGS.** Generous cartwheel luster occupies both sides of this Mint State 1879-S twenty dollar, showing appealing wheat-gold and orange-gold coloration amid abrasions that are typical for the grade but not terribly heavy. The strike is sharp throughout. Certified in a green-label holder. NGC ID# 26B9, PCGS# 8991

- 6459 1880 AU55 NGC.** The 1880 Liberty double eagle is a scarcer issue from a mintage of just 51,420 pieces. This impressive Choice AU example is lustrous, well-detailed, and lightly abraded, with just a trace of wear. From *The Duquesne Collection*. NGC ID# 26BA, PCGS# 8992

**1880-S Double Eagle, MS61
Deep Original Color**

- 6460 1880-S MS61 PCGS.** Double eagles of this issue are often sharp and attractive, and the currently offered coin does not disappoint. A scattering of minor abrasions defines the grade, but deep orange and rose-gold hues heighten the eye appeal. The 1880-S twenty is infrequently seen in finer condition. From *The Badger Collection*. NGC ID# 26BB, PCGS# 8993

**1880-S Liberty Double Eagle, MS61
Scarce in Finer Grades**

- 6461 1880-S MS61 NGC. CAC.** Ex: Duquesne. From a mintage of 836,000 pieces, the 1880-S Liberty double eagle is an available issue in circulated grades but even lower Mint State examples are scarce. This sharply detailed MS61 specimen offers brightly lustrous yellow-gold surfaces with a number of minor contact marks that explain the grade. Eye appeal is quite strong. NGC has graded 63 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 26BB, PCGS# 8993

1881-S Twenty Dollar, Lustrous MS62

- 6462 1881-S MS62 PCGS.** Apricot-gold and reddish-orange patina competes for territory on this Type Three S-mint survivor of the original issue of 727,000 coins. Scattered abrasions on the high points and fields determine the grade, but generous luster is present, producing good eye appeal. The 1881-S is seldom seen in Mint State, and the certified population at PCGS in higher grades is only 21 submissions (6/15).
From *The Badger Collection*. NGC ID# 26BD, PCGS# 8995

**1882-CC Double Eagle, AU50
Nice Color and Luster**

- 6463 1882-CC AU50 NGC. Variety 1-A.** Ex: Duquesne. Coinage of double eagles was suspended for two years at the Carson City Mint, but resumed in 1882 with a mintage of 39,140 pieces. This attractive AU specimen exhibits sharply detailed design elements, with just a trace of high-point wear, and lightly abraded orange-gold surfaces that show a few hints of green and retain much of their original mint luster.
From *The Duquesne Collection*. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, Orange-Gold AU58

- 6464 1882-CC AU58 NGC. Variety 1-B.** The second C in the CC mintmark is slightly higher than the first, and a die crack encircles all of the letter tops on the reverse periphery. Rich luster emanates from this orange-gold near-Mint example, showing scattered ticks and marks among good eye appeal. A couple of copper-colored alloy spots appear on the reverse. The 1882-CC twenties saw a production of only 39,140 pieces. NGC ID# 26BF, PCGS# 8997

**1882-S Double Eagle, MS62
Rose-Tinted Luster**

- 6465 1882-S MS62 PCGS.** Frosty original luster yields primarily green-gold hues, but is occasionally enlivened by tinges of rose-red in the protected regions. Bold design elements are illuminated by a vibrant cartwheel effect, and grade-limiting abrasions are light and evenly distributed over each side. Finer examples are rarely seen.
From *The Badger Collection*. NGC ID# 26BG, PCGS# 8998

**1883-CC Double Eagle, AU53
Surprisingly Strong Definition**

- 6466 1883-CC AU53 NGC. Variety 1-B.** This is the more elusive of two varieties for the date, attributed by the second C in the mintmark positioned left of the D in DOLLAR and die lines within the reverse shield. The 1883-CC is a lower-mintage date with a production of 59,962 pieces. Examples are available for a price through near-Mint condition, but anything finer is out of reach for most enthusiasts. This lightly circulated coin exhibits strongly defined motifs with minimal rub over attractive orange-gold surfaces. The stars show full radials and the hair curls are bold. NGC ID# 26BH, PCGS# 8999

**1883-CC Liberty Twenty, AU53
Well-Produced Carson City Issue**

- 6467** 1883-CC AU53 NGC. CAC. **Variety 2-A.** Ex: Duquesne. From a relatively generous reported mintage of 59,962 pieces, the 1883-CC double eagle was a well-produced issue, making it a popular choice with mintmark type collectors. This attractive AU53 example shows some light wear on the well-detailed design elements and the rich yellow-gold surfaces are lustrous and lightly abraded. From *The Duquesne Collection*. NGC ID# 26BH, PCGS# 8999
-

**1883-CC Double Eagle, Choice AU
Scarcer Die Pairing**

- 6468** 1883-CC AU55 NGC. **Variety 1-B.** Two die marriages exist for the 1883-CC, despite a mintage of less than 60,000 pieces. Variety 1-A is the most often encountered. Variety 1-B is considerably scarcer, and can be identified at arm's length by the mintmark placement, fully between the Y and D in TWENTY DOLLAR. The present butter-gold representative has a thin mark between obverse stars 10 and 11, but is otherwise uncommonly unabraded for the grade and denomination. NGC ID# 26BH, PCGS# 8999
-

1883-CC Double Eagle, AU58

- 6469** 1883-CC AU58 PCGS. **Variety 2-A.** A lemon-gold CC-mint twenty that boasts a bold strike and considerable bright luster. Scattered small to moderate marks correspond to the type and grade. One small spot above obverse star 10, but no abrasions merit individual mention. 1883 was the last full year of production at Carson City during the 1880s, yet fewer than 60,000 double eagles were struck. From *The Badger Collection*. NGC ID# 26BH, PCGS# 8999
-

**1884-CC Liberty Double Eagle, AU53
Vivid Color, Vibrant Luster**

- 6470** 1884-CC AU53 NGC. **Variety 1-A.** Ex: Duquesne. With a reported mintage of 81,139 pieces, the 1884-CC Liberty double eagle is one of the more available Carson City twenties. This impressive AU53 example offers sharply rendered design elements with just a trace of wear on the high points of the devices. The lustrous orange-gold surfaces show highlights of green, with vibrant mint luster on both sides. Surface marks are minimal for the grade. From *The Duquesne Collection*. NGC ID# 26BK, PCGS# 9001
-

1884-CC Double Eagle, AU55

- 6471** 1884-CC AU55 NGC. **Variety 1-A.** The shoulder curl and wingtips show light wear, but cartwheel luster crosses much of the reverse, and luster also fills Liberty's hair and surrounds individual obverse stars. Noticeable abrasions are relegated to a cluster of small marks below Liberty's eye. Just one die marriage is known for the issue. NGC ID# 26BK, PCGS# 9001
-

**1884-CC Twenty Dollar, AU58
Popular Carson City Issue**

- 6472** 1884-CC AU58 NGC. CAC. **Variety 1-A.** An original Borderline Uncirculated example with nearly complete mint luster. The obverse field has its share of moderate marks, but the portrait and the reverse are unexpectedly smooth. The '90-CC is the most available Carson City twenty in the AU58 grade, yet the '84-CC trades for close to the same price. Ex: *Long Beach Signature* (Heritage, 9/2007), lot 3865, which realized \$2,530. From *The Badger Collection*. NGC ID# 26BK, PCGS# 9001
-

6473 1884-S MS62 NGC. Reddish-gold patina resides on both sides of this S-mint twenty dollar, each of which retains most of its luster. The design elements are sharply struck, including the strands of Liberty's hair. Scattered marks, primarily on the obverse, limit the grade. The 1884-S has become more available in recent decades as hundreds of Uncirculated examples have been found in Europe (Fuljenz, 2015).

From The Badger Collection. NGC ID# 26BL, PCGS# 9002

6474 1884-S MS62 PCGS. CAC. San Francisco double eagle output amounted to 916,000 coins, while Carson City struck just 81,139 pieces, and the Philadelphia Mint manufactured a mere 92 proofs. This gorgeous rose and green-gold representative features needle-sharp detail on the stars and hair with an expected number of bagmarks scattered over each side. Bold eye appeal. NGC ID# 26BL, PCGS# 9002

6475 1885-S MS62 NGC. Honey-gold surfaces exhibit well-struck design elements, including most of the strands in Liberty's hair. Moreover, both sides retain most of their luster despite some scattered contact marks. This coin will make a good type selection. While the 1885-S is readily available through MS62, Select examples are very scarce, and higher-grade coins are rare.

From The Badger Collection. NGC ID# 26BP, PCGS# 9005

6476 1885-S MS62 PCGS. An attractive MS62 Type Three double eagle with well-detailed design elements and lustrous peach-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 26BP, PCGS# 9005

1887-S Double Eagle, MS62 Very Scarce in Finer Grades

6477 1887-S MS62 NGC. Ex: Duquesne. The 1887-S Liberty double eagle claims a mintage of 283,000 pieces, somewhat smaller than the usual S-mint production. Still, the issue is not extremely difficult to locate in lower Mint State grades. This attractive MS62 example offers sharply detailed design elements and brightly lustrous greenish-gold surfaces with a scattering of minor contact marks. NGC has graded 24 numerically finer examples (5/15).

From The Duquesne Collection. NGC ID# 26BS, PCGS# 9007

1887-S Twenty Dollar, MS62 Unusually Vibrant

6478 1887-S MS62 PCGS. The 1887-S is date that is moderately available through the MS62 grade level, but becomes conditionally scarce any finer. This piece is boldly rendered and displays radiantly frosty yellow-gold luster. Scattered, grade-limiting abrasions on the obverse pose little distraction, while the reverse shows semiprooflike mirroring in the interior fields.

From The Badger Collection. NGC ID# 26BS, PCGS# 9007

6479 1888 Doubled Die Reverse, FS-801, MS60 PCGS. An important die variety with strong doubling at the lower reverse, especially evident at the bottoms of the letters in the denomination. Housed in a PCGS Regency holder, this Mint State double eagle has frosty yellow luster and exceptional surfaces for the grade. PCGS has certified 52 examples of the doubled die, compared to 903 regular die coins. Population: 4 in 60, 39 finer (7/15). PCGS# 145738

6480 1888-S MS62 PCGS. Rich honey-gold color with coppery accents in the right obverse field. Though both sides have a number of choppy marks, the overall eye appeal is solid for the MS62 grade.

From The Badger Collection. NGC ID# 26BU, PCGS# 9009

1888-S Twenty, Sharp MS63+

6481 1888-S MS63+ PCGS. CAC. A sharp, Plus-graded example of this popular Type Three San Francisco issue. The orange-gold surfaces display satiny luster and are free of any significant abrasions. Only a few light grazes on Liberty's cheek limit the grade. Finer pieces are scarce, with just 51 encapsulated by PCGS (7/15). NGC ID# 26BU, PCGS# 9009

1889 Double Eagle, MS62 Scarce Low-Mintage Issue

6482 1889 MS62 PCGS. CAC. The 1889 double eagle mintage was a low one, at 44,070 coins, and survivors are scarce at all grade levels. This example is highly lustrous, with bright peach-gold toning and much better eye appeal than its MS62 designation might imply. It is sharply struck with grade-consistent abrasions that are mostly confined to the field areas. NGC ID# 2695, PCGS# 9010

1889-CC Twenty Dollar, AU53
Semiprooflike Fields, Clean Surfaces

- 6483 1889-CC AU53 NGC. Variety 1-A.** After a four-year slumber, the Carson City Mint resumed coinage in 1889 primarily to strike silver dollars. But 30,945 double eagles were issued that year from the facility, approximately 4% of the production of its San Francisco counterpart. Half eagles and eagles were not coined until 1890. The present 1889-CC twenty displays substantial luster, especially on the reverse. The straw-gold surfaces exhibit scattered small marks, none of which merit further discussion. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, AU55
Sharply Struck and Lustrous

- 6484 1889-CC AU55 NGC. Variety 1-A.** Ex: Duquesne. From a mintage of 30,945 pieces, the 1889-CC Liberty double eagle is an available date in the context of the series. This attractive Choice AU specimen features sharply defined design elements that show just a touch of friction on the highest points, and lightly abraded, lustrous surfaces with strong visual appeal.
From The Duquesne Collection. NGC ID# 26BV, PCGS# 9011
- 6485 1889-S MS62 NGC.** Yellow-gold lustrous surfaces exhibit well-struck design features, including Liberty's hair, the obverse star centers, and the eagle's plumage. Distributed marks, perhaps less severe than typically seen on this heavily abraded issue, limit the grade. The 1899-S is a common date in the series through MS63, but the population drops markedly any finer to render this issue elusive.
From The Badger Collection. NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS63
Original Surfaces

- 6486 1889-S MS63 PCGS.** An original, distinct color scheme shows warm sun-gold interiors, blending to deeper green-gold margins, while retaining consistently frosted luster throughout. This 1889-S double eagle is boldly struck and shows only a few small abrasions on Liberty's cheek. PCGS has seen just 44 numerically finer representatives (6/15).
From The Badger Collection. NGC ID# 26BW, PCGS# 9012

1889-S Twenty, Conditionally Scarce MS64+
Outstanding Eye Appeal

- 6487 1889-S MS64+ PCGS. CAC.** The 1889-S double eagle can be located through the Select level of preservation with relatively little trouble thanks to the discovery of the Saddle Ridge hoard in February 2013. Near-Gems remain very scarce and higher-grade examples are rare. We believe the certified population reports to be inflated by resubmissions. Intense luster emanates from the peach-gold surfaces of this high-end MS64 offering and sharp detail is seen on the design elements. Both sides are remarkably smooth for the grade designation. These attributes add up to give this piece outstanding eye appeal. Population: 74 in 64 (18 in 64+), 5 finer (7/15). NGC ID# 26BW, PCGS# 9012

1889-S Twenty, MS62 Prooflike
Uncommon Quality

- 6488 1889-S MS62 Prooflike NGC.** In high grades, this date is frequently absent from major collections, as such coins are in limited supply. The present example combines the desirable attributes of a moderately high grade and prooflike surface to display an uncommonly strong degree of eye appeal. As such, it is a scarce coin, worthy of broad appeal and excited bidding intensity. NGC reports eight Prooflike examples, including this piece in MS62 and a single MS64+ coin finer (6/15).
Ex: Long Beach Signature (Heritage, 9/2006), lot 4201, which realized \$2,530. PCGS# 79012

1890 Double Eagle, MS62
Pleasantly Smooth Surfaces

- 6489 1890 MS62 NGC.** This Philadelphia issue is seldom seen above the MS62 level. The present example is notably appealing for the grade, showing sharp design elements and frosty green-gold luster. Scattered abrasions on Liberty's cheek and in the fields limit the grade, but there are no major distractions observed. NGC lists only 22 numerically finer examples (6/15).
From The Badger Collection. NGC ID# 26BX, PCGS# 9013

1890-CC Twenty Dollar, AU55
Great Color and Surfaces

- 6490 1890-CC AU55 PCGS. Variety 1-A.** This die pair shows the CC mintmark mostly left of the D in DOLLAR, and the early reverse die state signifies that the later lapping has not yet effaced most of the right-side tailfeathers. This Choice AU piece offers great, deep orange-reddish color and minimal wear consistent with the grade. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58
Partially Reflective Fields

- 6491 1890-CC AU58 NGC. Variety 1-A.** A typical late die state example, with the outer tailfeathers of the eagle weakened by die lapping. Nonetheless, the motifs are sharp and the bright yellow-gold fields exhibit noticeable semiprooflike mirroring. As expected for the grade, a few scattered abrasions are observed, but none are individually noteworthy.
From The Badger Collection. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58
Excellent Mintmark Type Coin

- 6492 1890-CC AU58 NGC. CAC. Variety 1-A.** Ex: Duquesne. The 1890-CC Liberty double eagle is a plentiful issue in the context of the series and a popular choice of mintmark type collectors. This attractive near-Mint specimen offers sharply detailed design elements that show almost invisible traces of wear on the highpoints. The colorful orange and greenish-gold surfaces are lustrous and lightly abraded. Eye appeal is outstanding.
From The Duquesne Collection. NGC ID# 26BY, PCGS# 9014

- 6493 1890-SMS62 PCGS.** The lustrous yellow-gold surfaces of this double eagle display whispers of rose and mint-green and exhibit sharply struck design elements. Minute marks determine the grade, but these are fewer and less severe than ordinarily found on this heavily abraded date. This issue is scarce in MS63 and rare any finer.
From The Badger Collection. NGC ID# 26BZ, PCGS# 9015

1891-S Twenty Dollar, MS62
Elusive Prooflike Representative

- 6494 1891-S MS62 Prooflike NGC.** A boldly struck and moderately abraded Liberty Head twenty, with appreciable mirrored brilliance in the fields. Quite scarce with prooflike qualities. NGC has so-designated only 16 coins in all grades, with five in MS62 and none finer (6/15).
Ex: *New York Signature* (Heritage, 6/2005), lot 6755; *Long Beach Signature* (Heritage, 9/2005), lot 5097. PCGS# 79018

1892-CC Twenty, Sharp AU58

- 6495 1892-CC AU58 PCGS.** Both sides of this near-Mint State CC-mint example retain considerable luster on the reddish-gold surfaces. The design elements are sharply struck, including Liberty's hair and the beads on the crown, star centers, and the eagle's plumage. The few minute marks present are less than might be expected for a coin having seen brief circulation. Mint State pieces are difficult to come by, making AU58s an excellent alternative.
Ex: New York Signature (Heritage, 11/2013), lot 3914. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty, Near-Mint Attractive Peach Patina

- 6496 1892-CC AU58 NGC. CAC.** Pleasing peach-gold patina accompanies the legends and stars of this better-date Carson City double eagle. The cartwheel luster is substantial, and the surfaces are less abraded than is customary for the designated grade. CAC is finicky with the issue, and shows only an AU58 population of 13 pieces (6/15).
*Ex: West Palm Beach FUN Signature (Heritage, 7/2007), lot 3004.
 From The Badger Collection. NGC ID# 26C6, PCGS# 9020*

1892-CC Twenty, Unc Details Good Remaining Eye Appeal

- 6497 1892-CC — Improperly Cleaned — NGC Details. Unc. Variety 1-A.** The 1892-CC double eagle saw a remarkably small mintage of 27,265 pieces, and most are circulated to some degree. This example shows some prooflike reflectivity, as might be expected on such a low-mintage issue, but the fields are rather extensively hairlined on top, indicative of cleaning. The golden-orange surfaces nonetheless still exhibit good eye appeal and a nice sharp strike. NGC ID# 26C6, PCGS# 9020

- 6498 1892-S MS63 NGC.** The 1892-S Liberty double eagle is very scarce in grades above the MS63 level. This attractive Select example exhibits well-detailed design elements and lustrous green and rose-gold surfaces with scattered minor contact marks. NGC has graded 72 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26C7, PCGS# 9021

- 6499 1892-S MS63 NGC.** This attractive Select specimen exhibits well-detailed design elements and vibrant mint luster throughout. The orange-gold surfaces display a scattering of minor contact marks that explain the grade. NGC ID# 26C7, PCGS# 9021

1892-S Twenty Dollar, MS64 Great Luster and Color

- 6500 1892-S MS64 PCGS. CAC.** This high-grade Type Three S-mint Liberty twenty is certified in a PCGS small-size green-label holder and shows the CAC green approval sticker in addition to its own broad eye appeal, a coin that should find a spate of willing bidders. Beautiful orange-gold color and top-notch cartwheel luster that would not be out of place on a Morgan dollar are hallmarks of this coin. A small scrape below star 13 is the only mentionable contact. NGC ID# 26C7, PCGS# 9021

- 6501 1893 MS63 PCGS. CAC.** This attractive Select specimen offers well-detailed design elements and brightly lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 26C8, PCGS# 9022

- 6502 1894-S MS63 NGC.** The pleasing original orange-gold surfaces of this impressive Select example are lightly marked and display ample mint luster on both sides. The design elements are well-detailed and overall visual appeal is quite strong.
From The Duquesne Collection. NGC ID# 26CC, PCGS# 9026

1897-S Double Eagle, MS61 Prooflike

- 6503 1897-S MS61 Prooflike NGC.** Seldom encountered with prooflike surfaces. Struck from Klondike gold, this readily available San Francisco date shows numerous friction-like marks that interrupt the mirrored fields, but is devoid of major abrasions. The coin displays a bold strike and flashy, medium-gold color. PCGS# 79032

- 6504 1898 MS62 NGC. CAC.** *Ex: Duquesne.* The vivid orange-gold surfaces of this attractive MS62 double eagle show a few highlights of lilac and vibrant mint luster on both sides, with a moderate number of minor contact marks for the grade. The design elements are well-detailed and eye appeal is quite strong.
From The Duquesne Collection. NGC ID# 26CK, PCGS# 9033

**1900 Double Eagle, MS65+
Copious Cartwheel Luster**

6505 1900 MS65+ PCGS. At one time, the mintage for the 1900 double eagle, exceeding 1.8 million coins, appeared large. Then the 1904 and 1904-S issues came along, more than 11 million pieces between them. The 1900 double eagle can nonetheless be obtained up to the Gem grade (beyond is harder) for a price. This is a lovely orange-gold example sporting copious cartwheel luster and a bold strike. One thin mark crosses Liberty's face, and a small luster graze is just right of 1 in the date. Population: 10 in 65+, 2 finer (7/15). NGC ID# 26CP, PCGS# 9037

6506 1901 MS64+ PCGS. Crisply struck at the centers, this high-end Liberty double eagle has vibrant frosty luster over minimally abraded lavender and peach-gold surfaces. Several minor copper alloy spots occur on each side, as usual. An ideal type representative. NGC ID# 26CS, PCGS# 9039

**1901-S Twenty Dollar, MS63
Rich Luster**

6507 1901-S MS63 PCGS. Rich reddish-orange luster is the calling card of this 1901-S double eagle, showing some scattered abrasions on each side, mostly minor, that account for the grade. The eye appeal is good overall, despite a strike that is somewhat blunt on some of the high points and some parallel planchet striations appearing on both sides but more prominent on the obverse. NGC ID# 26CT, PCGS# 9040

6508 1902 MS61 NGC. CAC. Ex: Duquesne. An attractive Mint State double eagle, with sharply detailed design elements and bright orange-gold surfaces that show a number of minor contact marks on both sides, with ample mint luster and eye appeal. From *The Duquesne Collection*. NGC ID# 26CU, PCGS# 9041

6509 1902-S MS63 NGC. Ex: Duquesne. Like most coins in this collection, this attractive MS63 double eagle displays vibrant mint luster and vivid orange-gold surfaces, with a scattering of minor contact marks that explain the grade. The design elements are well-detailed and eye appeal is quite strong. From *The Duquesne Collection*. NGC ID# 26CV, PCGS# 9042

6510 1903 MS64+ NGC. Although there is no designation, this Choice Mint State double eagle has mirrored fields around its boldly defined and lustrous devices. NGC has only certified 18 prooflike 1903 double eagles, and none of those are finer than this undesignated example (7/15). NGC ID# 26CW, PCGS# 9043

**1904 Twenty Dollar, Bold MS65
Generous Luster**

6511 1904 MS65 NGC. CAC. Only the huge production of more than 6.2 million pieces and their subsequent good preservation enabled the existence of coins such as this stunning NGC Gem 1904 twenty. Orange-gold surfaces show the typical bold strike, minimal abrasions, and generous luster. A great type coin. From *The Glacier Collection*. NGC ID# 26CY, PCGS# 9045

6512 1904 MS61 Prooflike NGC. Apricot-gold toning embraces both sides of this 1904 double eagle. The design features are sharply struck, including the strands of Liberty's hair. Scattered marks, especially on Liberty's cheek and in the left obverse field, account for the grade. From a mintage exceeding 6.2 million pieces, the 1904 is a readily available issue, and as such is a popular type coin. Ex: *Chicago Signature (Heritage, 8/2011)*, lot 11952. PCGS# 79045

6513 1904 MS62 Prooflike NGC. Lime-green highlights visit the warm, orange-gold surfaces of this eye-stopping, prooflike double eagle. Marks are infrequent and the strike is bold, with a mellow mirrored appeal seldom encountered at this grade level. PCGS# 79045

6514 1904 MS62 Prooflike NGC. A sharp strike and fully mirrored fields are evident on this brilliant yellow-gold prooflike 1904 double eagle. Slight field-to-device contrast heightens the eye appeal of this splendid twenty. PCGS# 79045

6515 1904 MS62 Prooflike NGC. Reflective satin devices are boldly defined on this lovely double eagle that displays brilliant mirrored fields. Scattered marks are expected at this grade level. PCGS# 79045

6516 1904 MS63 Prooflike NGC. An unusually large number (773 pieces) of this issue have been certified as Prooflike by NGC. This brassy example is superior to most of those, with moderate to deep mirrors and a sharp strike. Scattered marks are noted on both sides. PCGS# 79045

6517 1904 MS63 Prooflike NGC. Both sides of this Select Mint State double eagle display fully mirrored surfaces and bold design motifs with light cameo contrast. A sharp strike and brilliant light yellow-gold surfaces enhance the eye appeal. PCGS# 79045

6518 1904-S MS64 ★ NGC. The lightly marked orange-gold surfaces of this high-end Choice specimen show prooflike reflectivity in many areas. The design elements are well-detailed and the outstanding eye appeal is attested by the star designation. NGC ID# 26CZ, PCGS# 9046

1905 Double Eagle, MS62
Attractive for the Grade

- 6519 1905 MS62 NGC.** Appreciably vibrant, yellow-gold mint frost accentuates the sharp design elements of this 1905 Liberty double eagle. Scattered abrasions are uncommonly minor in nature and pose comparably little distraction. The 1905 is a better date in the 20th century portion of the series, boasting a mintage of only 58,919 pieces. NGC has seen just 19 coins numerically finer than the present example (6/15).
From The Badger Collection. NGC ID# 26D2, PCGS# 9047

- 6520 1905-S MS62 NGC.** Both sides of this S-mint twenty dollar display considerable luster on its honey-gold surfaces that are imbued with hints of olive-green. The design elements are well-impressed throughout, including the strands in Liberty's hair. Contact marks are more evident on the obverse.
From The Badger Collection. NGC ID# 26D3, PCGS# 9048

- 6521 1905-S MS62 NGC. CAC. Ex: Duquesne.** Vibrant mint luster and vivid orange-gold color are the outstanding visual attributes of this attractive MS62 double eagle. The design elements are well-detailed and the surfaces show a scattering of grade-consistent minor contact marks on both sides.
From The Duquesne Collection. NGC ID# 26D3, PCGS# 9048

1905-S Double Eagle, MS64+
Rarely Encountered Finer

- 6522 1905-S MS64+ NGC. CAC.** The 1905-S double eagle is usually available in lower circulated grades, but not to the extent suggested by its mintage of more than 1.8 million coins. Choice examples are more elusive than they theoretically should be, and Gems are rare. This Plus-graded MS64 example displays a bold strike and vibrant yellow-gold luster. A scattering of insignificant ticks is not bothersome to the naked eye. NGC lists only nine finer pieces (7/15). NGC ID# 26D3, PCGS# 9048

- 6523 1906 MS61 PCGS.** Beautiful deep peach-gold color and lively luster are attributes of this Mint State 1906 double eagle, certified in a green-label holder. Abrasions are as expected, but the strike is sharp. The low mintage was only 69,500 coins in this year. NGC ID# 26D4, PCGS# 9049

1906 Double Eagle, MS62
Smooth, Satiny Patina

- 6524 1906 MS62 PCGS.** For the grade, this 1906 double eagle is quite appealing, showing soft yellow-gold patina and unusually smooth surfaces that are free of distracting abrasions. Well-struck, with satiny luster illuminating the fields. This date had a limited production of just 69,596 coins, and is infrequently seen finer than MS62.
From The Badger Collection. NGC ID# 26D4, PCGS# 9049

1906 Double Eagle, Appealing MS62+
Low-Mintage Issue

- 6525 1906 MS62+ NGC.** The perception of Philadelphia as the "common double eagle producer" has perhaps led some in the numismatic community to overlook the remarkably low output of the 1906 twenty dollar issue, at around 70,000 coins. (The 1902 and 1905 are also low-mintage issues.) Most certified survivors are scarcely Mint State, if that. This appealing example boasts a sharp strike amid good luster on medium yellow-gold surfaces. Small- and medium-sized abrasions account for the grade, including some on Liberty's cheek. NGC ID# 26D4, PCGS# 9049

1906-D Twenty, Frosty MS63

- 6526 1906-D MS63 NGC.** The appeal of this coin is perhaps not so much its scarcity, but more its original luster and attractive green-gold color scheme that shows tinges of peach and rose. The strike is sharp and a few grade-limiting abrasions are restricted to the high points of the devices. The fields are largely clean.
From The Badger Collection. NGC ID# 26D5, PCGS# 9050

**1906-D Twenty Dollar, MS64+
Strong Strike, Minimally Marked**

6527 1906-D MS64+ PCGS. Mike Fuljenz writes of the 1906-D in the most recent edition of *Type Three Double Eagles 1877-1907*: "This is the better struck of the two Denver issues of this design. The quality of strike seen on most 1906-D double eagles is quite sharp with strong centers and borders." Such is the case with this amazing Plus-designated near-Gem. Moreover, while the issue typically comes heavily bagmarked, this lustrous, even reddish-gold representative is surprisingly clean aside from a few more prominent reeding marks at the lower right reverse. PCGS has seen just 13 finer examples (7/15). NGC ID# 26D5, PCGS# 9050

**1906-S Double Eagle, MS64+
Nearly Uncollectible in Better Condition**

6528 1906-S MS64+ PCGS. CAC. With a mintage of just over 2 million coins, the 1906-S is a fairly available issue through Select condition. Choice examples are scarce (rare in MS64+), while higher-graded coins are very rare. Light rose-gold color covers the radiant surfaces of this Plus-designated and CAC-endorsed near-Gem. The stars show full radials, and the hair is completely delineated. Minimally marked. PCGS records a mere four submissions finer (7/15). NGC ID# 26D6, PCGS# 9051

6529 1907 MS64 PCGS. The vivid orange-gold surfaces of this attractive Choice specimen are well-preserved and brightly lustrous, with sharply detailed design elements throughout. Always in demand as a final-date type issue. PCGS has graded 17 numerically finer examples (7/15). NGC ID# 26D7, PCGS# 9052

**1907-D Double Eagle, MS63
Final Year of Design**

6530 1907-D MS63 NGC. Ex: Duquesne. This impressive Select double eagle represents the final year of the Liberty design and just the second year of coinage at the Denver Mint. The design elements are well-detailed and the vivid orange-gold surfaces radiate vibrant mint luster, with only minor signs of contact. Eye appeal is outstanding. *From The Duquesne Collection.* NGC ID# 26D8, PCGS# 9053

**1907-D Twenty Dollar, MS63
Soft, Frosty Surfaces**

6531 1907-D MS63 NGC. Glowing, frosty surfaces yield yellow and green-gold hues on this Select 1907-D double eagle. The devices are boldly rendered and only a few minor grazes on Liberty's cheek limit the grade. This final-year Denver issue is moderately available in pleasing Mint State condition, obtainable for type purposes. *From The Badger Collection.* NGC ID# 26D8, PCGS# 9053

**1907-D Double Eagle, MS62 Prooflike
Deeply Mirrored**

6532 1907-D MS62 Prooflike NGC. Gleaming wheat-gold fields endorse the Prooflike designation on this eye-catching final-year D-mint example. The strike is sharp, and were it not for a few light lines in the fields, this piece might have garnered a higher grade. NGC has seen 16 Prooflike examples overall, including five MS62 (one MS62 ★), and seven finer (6/15). PCGS# 79053

6533 1907-S MS63 NGC. Ex: Duquesne. An attractive Select example from the final year of the Liberty design, this coin displays well-detailed design elements and vibrant mint luster on both sides. The vivid orange-gold surfaces show a scattering of minor contact marks, all consistent with the grade. *From The Duquesne Collection.* NGC ID# 26D9, PCGS# 9054

6534 1907-S MS63 PCGS. While the Philadelphia Mint was in the process of transitioning to the Saint-Gaudens design in 1907, the San Francisco branch remained completely devoted to the coinage of Liberty Head double eagles throughout the year. This issue had a mintage of more than 2.1 million pieces, and is suitable for type purposes. The present Select example shows a sharp strike and satiny orange-gold luster, with minimal abrasions. NGC ID# 26D9, PCGS# 9054

**1907-S Twenty Dollar, MS64+
Amazing Quality, Prohibitively Rare Any Finer**

- 6535 1907-S MS64+ NGC. CAC.** The 1907-S is readily collectible in lower Mint State grades with heavy bagmarks, but in Choice condition "it is the rarest of the three double eagle 1907 issues" (Garrett and Guth, 2006). This high-end near-Gem is just a half grade point from being a significant condition rarity that would fetch well into the five-figure price range. Frosty medium orange-gold surfaces feature needle-sharp design definition, and abrasions are minimally scattered. NGC reports just 17 submissions finer (7/15). NGC ID# 26D9, PCGS# 9054

HIGH RELIEF DOUBLE EAGLES

**1907 High Relief Wire Rim Twenty
VF Details**

- 6536 1907 High Relief, Wire Rim — Mount Removed — PCGS Genuine. VF Details.** An affordable example of the High Relief issue, ideal for the collector on a budget. The detail is strong for the VF level, but the sharpness of the finer elements is softened by extensive cleaning from the coin's life as part of a piece of jewelry. The mount removal noted by PCGS is evident at 10 and 2 o'clock on the rim. NGC ID# 26F2, PCGS# 9135

**1907 Saint-Gaudens Twenty, Unc Details
High Relief, Flat Rim Variant**

- 6537 1907 High Relief, Flat Rim — Improperly Cleaned — NGC Details. Unc.** An unworn and lightly marked example of this iconic issue, with sharply detailed design elements and lustrous orange-gold surfaces that display a slightly unnatural sheen. The overall presentation is quite attractive despite the noted cleaning. The scarcer Flat Rim variety. PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

- 6538 1907 Arabic Numerals MS64 NGC.** Certified in an old-style NGC "no line fatty" holder, this lovely near-Gem 1907 Arabic Numerals twenty sports luminous luster on well-preserved (and equally well-struck) surfaces. A great example for type purposes. NGC ID# 26F5, PCGS# 9141

- 6539 1908 No Motto MS65 PCGS.** Short Rays Obverse. This sun-gold Gem has a crisp strike and potent luster. Close to pristine except for a moderate field mark near Liberty's branch. A two-year design subtype. NGC ID# 26F6, PCGS# 9142

- 6540 1908-D No Motto MS64 PCGS.** Short Rays Obverse. A lustrous caramel-gold example. Only lightly abraded except for moderate scuffs on the drapery below the torch. Scarcer than the Philadelphia No Motto variety in better Mint State grades. NGC ID# 26F7, PCGS# 9143

1908-D No Motto Twenty, Top-Notch MS65

- 6541 1908-D No Motto MS65 PCGS. CAC.** This Gem 1908-D No Motto twenty virtually provides a model for what the issue should look like in this grade. Great luster runs over orange-gold surfaces with minimal abrasions and a nice sharp strike. The fields show a somewhat mattelike texture. A top-notch example, approved by CAC as well. PCGS reports only 10 in MS66 or finer (7/15). *From The Glacier Collection.* NGC ID# 26F7, PCGS# 9143

- 6542 1908 Motto MS63 PCGS.** The columns and rows on the Capitol are clear, as are the fingers on Liberty's torch hand. This Select first-year type coin has glowing luster over primarily green-gold surfaces with lightly scattered marks. The reverse is remarkably clean for the grade. All 1908 Motto twenties were struck after July 1. NGC ID# 26F8, PCGS# 9147

**1908 Twenty Dollar, MS64+
With Motto**

- 6543 1908 Motto MS64+ PCGS. CAC.** The luster on this first-year With Motto Saint-Gaudens twenty is especially attractive, showing vibrant wheat-gold hues on each side. Light, scattered grazes are not overly obtrusive and there are no singularly mentionable abrasions. Sharp detail is seen throughout the eagle's feathers and Liberty's torch hand shows well-delineated fingers. NGC ID# 26F8, PCGS# 9147

- 6544 1908-D Motto MS64 NGC.** This impressive Choice example represents the first year of the Motto design. The design elements are sharply detailed and the lustrous orange-gold surfaces are free of mentionable distractions. NGC ID# 26F9, PCGS# 9148

- 6545 1908-D Motto MS64 PCGS.** In 1908, Denver Mint production of the With Motto twenties amounted to 349,500 pieces. Coins are available in nearly any desired grade, including MS64 like this frosty and brilliant example. Both sides have wisps of rose over light yellow-gold surfaces with a few small marks.
Ex: *Central States Signature (Heritage, 4/2011)*, lot 6932. NGC ID# 26F9, PCGS# 9148

**1908-D Motto Twenty, MS64
Relatively Unabraded**

- 6546 1908-D Motto MS64 PCGS. CAC.** The wheat-gold surfaces show a thin ring of orange around parts of the periphery and some smoke-gray accents in the fields. Abrasions are minor for the assigned grade and removed from the focal points, and the luster is excellent, making this piece a great candidate for type purposes. NGC ID# 26F9, PCGS# 9148

**1908-S Twenty Dollar, VF35
Lowest Mintage in the Series**

- 6547 1908-S VF35 PCGS.** The 1908-S has the lowest mintage among regular-issue Saint-Gaudens twenties (22,000 coins minted), and it is one of the most elusive dates after the heavy melt rarities with which the series concludes. Unlike most other Saint-Gaudens double eagles, the 1908-S actually served as a medium of exchange in the West. This well-circulated, bright yellow-gold representative shows an expected amount of rub over the devices and myriad abrasions scattered over each side. An excellent capstone example for the budget-minded collector. NGC ID# 26FA, PCGS# 9149

- 6548 1909/8 AU58 NGC. FS-301.** This "slider" is oh so close to Uncirculated, showing a slightly thinned luster in the fields rather than perceptible wear. The mattelike orange-gold surfaces are quite well-preserved, sharply struck, and free of distractions. NGC ID# 26FC, PCGS# 9151

- 6549 1909 MS63 PCGS. CAC.** Satiny luster shows evidence of die erosion in the fields on this Select 1909 double eagle, but the design sharpness is unaffected. Orange-gold patina glows amid a vibrant cartwheel effect, with few noticeable abrasions. NGC ID# 26FB, PCGS# 9150

**1909-D Twenty Dollar, High-End MS63
Sharply Struck and Lustrous**

- 6550 1909-D MS63 PCGS.** The memorably low mintage of the 1909-D Saint-Gaudens was only 52,500 pieces, and few survive as nice as this Select Mint State example. Excellent luster runs over orange-gold surfaces that seem to verge on an even finer grade, were it not for a couple of stray marks, including one on Liberty's face and a patch of small luster grazes in the right obverse field. The strike is sharp throughout both sides. NGC ID# 26FD, PCGS# 9152

- 6551 1910 MS64+ PCGS.** The 1910 Saint-Gaudens twenty is an available issue through MS64, above which it becomes conditionally scarce. This typically sharp near-Gem shows swirling mint frost over orange and rose-gold surfaces, and above-average preservation with light, well-hidden marks scattered throughout. NGC ID# 26FF, PCGS# 9154

**1911 Saint-Gaudens Twenty, MS64
Scarce Any Finer**

- 6552 1911 MS64 PCGS.** The 1911 Saint-Gaudens double eagle boasts a smaller-than-average mintage of 197,250 pieces and the issue is very scarce in grades above the MS64 level. This attractive Choice example is sharply detailed, with well-preserved orange-gold surfaces and vibrant mint luster. Eye appeal is outstanding. PCGS has graded 54 numerically finer examples (7/15). NGC ID# 26FJ, PCGS# 9157

- 6553 1911-D MS65 PCGS.** This boldly defined Gem Saint-Gaudens double eagle will serve an advanced Saint-Gaudens collector or a Denver Mint type collector. This piece has frosty and fully lustrous yellow-gold surfaces with excellent eye appeal. NGC ID# 26FK, PCGS# 9158

**1911-D Saint-Gaudens Twenty, MS66
Excellent Type Selection**

- 6554 1911-D MS66 NGC.** While the Denver twenty dollar issue is generally available in Gem condition, finer coins become scarce. This MS66 example is among the increasingly challenging representatives — still available at a reasonable price for type, but virtually unavailable any finer. Sharply struck, frosty, and brightly lustrous, the coin is every bit a Premium Gem and it is highly desirable as such. NGC reports just 34 finer coins (7/15). NGC ID# 26FK, PCGS# 9158

**1911-D/D Double Eagle, MS65
FS-501 Doubled Mintmark**

- 6555 1911-D/D FS-501 MS65 PCGS.** The mintmark is boldly doubled outside the right curve on this scarce variety. The 1911-D/D is not currently listed in the popular price books such as the Guide Book, but it should be in our opinion. Such a listing would dramatically influence the valuation. This piece has muted mint frost with brilliant orange-gold luster and exceptional eye appeal. PCGS# 145010 Base PCGS# 9158

**1911-D/D Twenty Dollar, MS66
Repunched Mintmark**

- 6556 1911-D/D FS-501 MS66 PCGS.** The mintmark shows bold repunching left. This is one of the most collectible branch mint issues in the Saint-Gaudens double eagle series. The design motifs on each side exhibit pinpoint definition, while tiny marks are scant and unobtrusive. A highly lustrous orange-gold representative with no shortage of appeal. Population for the variety: 38 in 66, 0 finer (7/15). PCGS# 145010 Base PCGS# 9158
- 6557 1913-D MS64 PCGS.** This sharply struck orange-gold near-Gem boasts scintillating luster and attractively preserved surfaces. A good value relative to higher grades. Encapsulated in a green-label holder. NGC ID# 26FP, PCGS# 9162

1913-D Double Eagle, MS65

- 6558 1913-D MS65 NGC.** A sun-gold example with dynamic luster and a sharp strike. Both sides display only minor abrasions. The former generation holder has a small chip on the upper left border that does not affect its integrity. The 1913-D can be located as a Gem but it is a costly acquisition any finer. NGC ID# 26FP, PCGS# 9162

- 6559 1914 MS63 NGC.** The 1914 is one of the lowest-mintage issues in the Saint-Gaudens series (95,250 coins). Examples are typically heavily abraded and become conditionally scarce in MS64. This Select piece offers lustrous green-gold surfaces and an expected number of bagmarks. Well-struck with trivial high-point softness. NGC ID# 26FS, PCGS# 9164

- 6560 1914 MS63 PCGS.** A pleasing Select Mint State example of the scarce, low-mintage 1914 double eagle. Just 95,200 examples were minted and survivors are infrequently encountered. NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64+
Nearly Unobtainable in Higher Grades**

- 6561 1914 MS64+ PCGS. CAC.** The 1914 claims a low mintage of 95,000 coins, most of which were exported overseas and survive with heavy bagmarks. This carefully preserved near-Gem features splendid rose-gold hues centrally surrounded by pale, even reddish-gold coloration and coruscating luster throughout. The torch hand and Capitol building show delineation of the fingers and columns, and the eagle's feathers are equally bold. A marvelous representative of Saint-Gaudens' acclaimed design. Both the Plus designation and CAC endorsement speak to the quality of this Choice piece. Rare in higher grades. NGC ID# 26FS, PCGS# 9164

- 6562 1914-D MS65 PCGS.** Vibrant mint luster and vivid orange-gold surfaces are the calling cards of this delightful Gem, with sharply detailed design elements and outstanding eye appeal. PCGS has graded 65 numerically finer examples (7/15). NGC ID# 26FT, PCGS# 9165

- 6563 1914-S MS65 PCGS.** The 1914-S Saint-Gaudens double eagle becomes scarce in grades above the MS65 level. This well-detailed Gem displays well-preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 26FU, PCGS# 9166

- 6564 1916-S MS64 PCGS.** The vivid orange-gold surfaces of this attractive Choice example show only minor signs of contact, with ample mint luster on both sides. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 26FX, PCGS# 9169

6565 1920 MS63 PCGS. CAC. Just 228,250 double eagles were minted in Philadelphia in 1920 as gold production resumed following World War I. This Select Mint State example has brilliant yellow-gold surfaces with trivial, grade-consistent marks. NGC ID# 26FY, PCGS# 9170

**1920 Saint-Gaudens Twenty, MS64
Conditionally Very Rare in Higher Grades**

6566 1920 MS64 PCGS. CAC. Although the 1920 Saint-Gaudens double eagle is not difficult to locate in MS64, the issue is a prime condition rarity in finer grades. This attractive Choice specimen offers well-preserved orange-gold surfaces, with vibrant mint luster and well-detailed design elements. PCGS has certified only one coin in higher numeric grade (7/15). NGC ID# 26FY, PCGS# 9170

**1920 Saint, MS64+
Fantastic Luster and Color**

6567 1920 MS64+ PCGS. CAC. The 1920 Saint-Gaudens twenty is one of those curious issues in the series, quite available in Choice condition but virtually unknown in Gem. This lovely coin splits the difference, showing fantastic luster on surfaces that alternate between greenish-gold and orange-gold color. Minimal marks and copious luster separate this piece from most of its cohort, as does the CAC endorsement. Population: 45 in 64+, 1 finer (7/15). NGC ID# 26FY, PCGS# 9170

**1922-S Double Eagle, MS64+
Heavily Melted Branch Mint Issue**

6568 1922-S MS64+ PCGS. This San Francisco issue suffered from mass meltings after the Gold Recall of April 1933, along with many other branch mint issues from the 1920s and 1930s stored in vaults at the time the Executive Order was signed. Minor strike softness occurs at the lower obverse, but the overall impression is sharp. Butter-gold surfaces show minimally scattered marks, and three noticeable nicks on Liberty's left leg likely prohibit an even higher grade. There are only 16 finer submissions at PCGS (7/15). NGC ID# 26G4, PCGS# 9174

6569 1924 MS65 NGC. This available date is a favorite among type collectors. The present Gem is vibrantly lustrous and boldly struck. A loupe reveals light, scattered ticks, not out of line for the grade and none of which are individually bothersome. NGC ID# 26G7, PCGS# 9177

6570 1924 MS66 PCGS Secure. Despite its rank as the most plentiful issue in the entire Saint-Gaudens series, the 1924 is elusive in top grades, and PCGS has only certified 90 finer pieces (7/15). An impressive example, this 1924 is ideal for a high-grade gold type set. Both sides exhibit bold design motifs and brilliant yellow luster. NGC ID# 26G7, PCGS# 9177

6571 1924 MS66+ PCGS. Nearly the entire mintage of 4.3 million coins was exported overseas, and well-preserved examples are collectible even in this high grade. This Premium Gem features bold definition on the Liberty's torch hand, face, and leg. Highly lustrous orange-gold surfaces are astonishingly unabraded. A perfect Saint-Gaudens type coin. NGC ID# 26G7, PCGS# 9177

6572 1924-D AU53 NGC. This D-mint issue is scarce in all grades, and this lightly circulated example represents a more affordable opportunity for a collector to own an example. A few larger abrasions are present on the obverse. Most of the luster is present in the fields, with just a bit of friction over the highpoints. NGC ID# 26G8, PCGS# 9178

**1924-D Twenty Dollar, MS62+
Heavily Melted Semikey**

6573 1924-D MS62+ PCGS. The Gold Recall of 1933 saw the mass-melting of several mid-to-late date branch mint double eagle issues, the 1924-D among them. More than 3 million coins were struck, but probably only 1,000 or so examples survive. This MS62+ representative is minimally marked for the grade, though small abrasions are scattered throughout. Medium orange-gold surfaces feature well-detailed motifs and shimmering satin luster. NGC ID# 26G8, PCGS# 9178

**1924-D Saint-Gaudens Twenty, MS63+
Lustrous, Colorful Example**

6574 1924-D MS63+ PCGS. CAC. Despite the reported mintage of more than 3 million pieces, the 1924-D Saint-Gaudens double eagle is a better date in high grade. This high-end Select example exhibits sharply detailed design elements, aside from a few peripheral stars, and lightly marked orange-gold surfaces, with hints of red and vibrant mint luster. NGC ID# 26G8, PCGS# 9178

6575 1925 MS66 PCGS. The rich yellow-gold surfaces of this delightful Premium Gem radiate vibrant mint luster with a few hints of peach. The design elements are sharply detailed and no mentionable distractions are evident. PCGS has graded seven numerically finer examples (7/15). NGC ID# 26GA, PCGS# 9180

TERRITORIAL GOLD

1851 Reeded Edge Humbert Fifty, K-7, VF Details 887 Thous. Variety

- 6582** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. — **Tooled** — **PCGS Genuine. VF Details. K-7, R.4.** We would describe the surfaces of this piece not so much tooled — although they are that — as “engraved,” as someone has placed fine engraved lines throughout much of the obverse. It is, of course, now impossible to determine what is original wear versus later artistry. This is a piece that must be inspected personally, but it proves a belief we have long held — that it is impossible to erase the eye appeal and cachet these coins possess. This Reeded Edge 887 Thous. Humbert fifty dollar may form a cornerstone of some collector’s assemblage of Territorial gold. Listed on page 385 of the 2016 *Guide Book*. **PCGS# 10214**

- 6576** 1925 MS66 NGC. The grading services have seen at least 100,000 1925 double eagles, but most examples are bagmarked from indifferent storage and shipment. The present sun-gold Premium Gem has potent luster and a sharp strike, but its standout feature is its minimal evidence of abrasions.
Ex: Long Beach Signature (Heritage, 6/2005), lot 8252; Orlando FUN Signature (Heritage, 1/2008), lot 5112. NGC ID# 26GA, PCGS# 9180

1925-D Double Eagle, MS61 Elusive in Any Grade

- 6577** 1925-D MS61 NGC. While the Gold Recall wiped out much of the nearly 3 million-piece mintage, a few fortunate coins survived in private hands and others were tucked away in small European hoards, returning to the collector market over the past few decades. The issue remains scarce in all grades. This lustrous, frosty example shows no major marks and a reasonably strong strike at the centers, with just a bit of weakness at the obverse periphery. A popular mintmarked Saint, always in demand. **NGC ID# 26GB, PCGS# 9181**

1925-S Saint-Gaudens Double Eagle, AU55 Challenging Branch Mint Issue

- 6578** 1925-S AU55 NGC. CAC. Despite the ample reported mintage of 3.7 million pieces, the 1925-S Saint-Gaudens double eagle has always been a challenging date, especially in higher Mint State grades. Undoubtedly, most of the large production total was melted after the Gold Recall of 1933. This attractive Choice AU example shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain almost all of their original mint luster. **NGC ID# 26GC, PCGS# 9182**

- 6579** 1927 MS65 NGC. Sharply detailed in most areas, this attractive Gem shows just a touch of softness on the Capitol and Liberty’s torch hand. The well-preserved yellow and rose-gold surfaces radiate vibrant mint luster. **NGC ID# 26GG, PCGS# 9186**

- 6580** 1927 MS65 NGC. A common date in the Saint-Gaudens double eagle series, the 1927 is one of five issues that are frequently chosen for type sets. This Gem has frosty light yellow luster with excellent eye appeal. **NGC ID# 26GG, PCGS# 9186**

- 6581** 1927 MS66 PCGS. Potent luster sweeps this magnificently preserved Saint-Gaudens double eagle. The strike is sharp and the eye appeal is excellent. Ideal for type purposes, given the cost of an MS67. Certified in a first generation holder. **NGC ID# 26GG, PCGS# 9186**

**Miners Bank Ten Dollar, K-1
Plain Border, AU Details**

- 6583** (1849) Miners Bank Ten Dollar, Plain Border — Cleaning — PCGS Genuine. AU Details. K-1, R.6. The Miners Bank was among the early issuers of private gold coins in California. The principals were Stephen A. Wright and Samuel W. Haight. Eventually, assays confirmed that the coins were moderately underweight, and most were melted. The present apricot-gold example has an unusually sharp strike. The surfaces are somewhat bright but are refreshingly free from abrasions. Although designated as AU Details by PCGS, no wear is readily apparent. Listed on page 389 of the 2016 *Guide Book*. PCGS# 10236

**1852 Wass Molitor Five Dollar
Small Head, K-1**

- 6584** 1852 Wass Molitor Five Dollar, Small Head, PCGS Genuine. K-1, R.6. PCGS deemed this coin not gradable, without designating a reason. In our opinion, this coin has the details of a VF specimen that has been repaired and cleaned. The left obverse field, the upper right reverse field, and a portion of Liberty's neck are smoothed. Both sides are hairlined. A green-gold example of this rare Wass Molitor variety. Listed on page 393 of the 2016 *Guide Book*.

- 6585** 1860 Clark, Gruber \$20 Copper Die Trial — Environmental Damage — NGC Details. AU. K-4a, R.5. Struck in copper with a reeded edge. A copper die trial struck from dies made in Philadelphia that show Pike's Peak as a stylized triangle. This example retains almost all of its original design detail, but the olive and chocolate-brown surfaces show questionable texture and color in some areas. PCGS# 10146

**1861 Clark, Gruber & Co. Five, VF35
Copper Die Trial, K-10c**

- 6586** 1861 Clark, Gruber \$5 Copper Die Trial VF35 PCGS. K-10c, R.7. Struck in copper with a reeded edge. This coin is a die trial struck from the regular-issue dies for the 1861 five dollar gold piece of Clark, Gruber & Company. It is most unusual to find a worn specimen, since the copper composition would make it impossible for such a piece to mistakenly circulate as a gold example. This Choice VF specimen retains three quarters of its interior design detail and the olive-brown surfaces show only minor abrasions, suggesting this coin was carried as a pocket piece. Population: 1 in 35, 8 finer (7/15). PCGS# 10151

CALIFORNIA FRACTIONAL GOLD

- 6587** 1856 Liberty Octagonal 25 Cents, BG-107, Low R.4, MS66 NGC. Well-struck and semiprooflike, with moderate die polishing evident within the recesses of the obverse portrait. A scarce Period One variety, produced by Frontier, Deviercy & Co. This is the highest-graded example at NGC, although it shares an overall finest-known status with one other equally graded piece at PCGS (7/15). PCGS# 10376
- 6588** 1867 Liberty Octagonal 25 Cents, BG-709, R.4, MS67 NGC. A high-end example of this scarce period two octagonal quarter dollar, made by Frontier & Co. The strike is decidedly well-executed, and the satiny yellow-gold luster is beautifully preserved. BG-709 representatives are rarely encountered this fine. Census: 5 in 67, 0 finer (7/15). PCGS# 10536

**1870 BG-713 Octagonal Quarter
MS68, Single Finest Certified**

- 6589** 1870 Liberty Octagonal 25 Cents, BG-713, R.4, MS68 NGC. NGC has certified thousands of California fractional gold pieces, but as of (6/15), just two coins have attained the lofty MS68 grade, a BG-714 quarter and the present BG-713 example. Both pieces were struck by the same obverse die, but the reverses bear different dates. The large, crude Liberty head is associated with the output of Frontier & Co., a San Francisco jeweler. This pristine caramel-gold and lime-green quarter has a sharp strike and shimmering luster. PCGS# 10540

6590 1871 Liberty Octagonal 25 Cents, BG-718, High R.6, MS65 PCGS. Ex: Jay Roe. A lustrous and solidly struck sun-gold Gem. Die rust is apparent on the field above the fraction, the field is buckled between the first two stars, and Liberty's nose is lapped, all as made. An outstanding representative. Population: 2 in 65, 2 finer (6/15). Ex: Jay Roe Collection (Bowers and Merena, 9/2003), lot 161, which realized \$1,380. PCGS# 10545

6591 1865/4 Liberty Octagonal 25 Cents, BG-736, Low R.6, MS64 PCGS. A brightly mirrored lemon-gold representative. The portrait is lapped, the strike is blunt, the stars are blobs, and the bust tip extends to the rim, all as made and characteristic of the rare die variety. As of (6/15), the single finest PCGS-certified example. PCGS# 10563

6592 1866 Liberty Octagonal 25 Cents, BG-740, Low R.6, MS64 NGC. The reflective honey-gold surfaces are overlaid with blushes of golden-brown and cobalt-blue. A well struck and unmarked example of this rare variety. The G initial beneath the portrait represents the maker, San Francisco jeweler Robert B. Gray. Census: 1 in 64, 2 in 64 Prooflike, 0 finer (6/15). PCGS# 10567

6593 1876 Indian Octagonal 25 Cents, BG-786, Low R.6, MS65 Prooflike NGC. Among the finest graded examples of the very scarce BG-786, exceeded only by a single MS66 NGC without a Prooflike designation. The single finest at PCGS is an MS65. Boldly struck and prominently mirrored with sun-gold centers and russet-brown borders. Ex: Schaumburg Central States (Heritage, 4/2013), lot 6190, which realized \$1,762.50. PCGS# 710613

6594 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS66 Prooflike NGC. Heavy Date, Period After CAL. One of the Christoph Mohrig products. This lemon-yellow, contrasted Prooflike example shows great eye appeal on problem-free surfaces that show an obverse die state a tad later than the Breen-Gillio plate coin. This piece shows the die crack connecting the rim to stars 2-5 plus a second crack running across the neck to 72 in the date. Other minor cracks show as well. Census: 6 in 66 Prooflike, 1 finer (7/15). PCGS# 710617

**1873 Indian Octagonal Quarter Dollar
Rare BG-794 Variety, MS66**

6595 1873 Indian Octagonal 25 Cents, BG-794, High R.5, MS66 NGC. A lovely Period Two octagonal quarter dollar made by Christopher Ferdinand Mohrig of San Francisco. The BG-794 variety is rare in any condition. NGC has seen just nine pieces in all grades, with this coin tied with one other for finest; PCGS has certified 26 pieces, but none finer than MS65 (7/15). This piece is boldly rendered, with prooflike fields and warm straw-gold color. Struck with a coin-turn die alignment. Listed on page 400 of the 2016 Guide Book. PCGS# 10621

**1859 Round Liberty Quarter Dollar
BG-801, MS66 Deep Prooflike**

6596 1859 Liberty Round 25 Cents, BG-801, R.3, MS66 Deep Prooflike NGC. Produced by Frontier, Deviercy & Co., this variety is seldom seen in high grade and is rare as fine as the present piece. This deeply prooflike Premium Gem exhibits noticeable cameo contrast as allowed by sharp, frosty design elements and glass-like fields that still show remnants of circular die striae. PCGS# 710662

6597 1870 Liberty Round 25 Cents, BG-835A, R.7, MS62 PCGS. Robert B. Leece is credited with the 1991 discovery of the very rare BG-835A. Thus, the variety does not appear in any of the Lee references, or the first edition of Breen-Gillio. This flashy and sharply struck example is principally orange-gold but displays plumbed on the right reverse. As of (6/19), PCGS has certified a total of four examples, 1 in 58 and 3 in 61. PCGS# 10957

**1875 Round Indian Quarter, MS66
Single Finest Certified BG-847
Large Letters Variant**

6598 1875 Indian Round 25 Cents, BG-847, R.4, MS66 NGC. The present lot is the only example of BG-847 to attain an MS66 grade at either NGC or PCGS. It is sharply struck with smooth, flashy apricot-gold surfaces and a minor strike-through on the reverse border near 9 o'clock. BG-847 has two important die states. The early die state (as depicted in the Breen-Gillio Jay Roe plate coin) has small letters in the reverse legend. The late die state (as seen on the present coin) has a large letters reverse (compare, for example, the A in CAL) and a crack from the rim at 2:30 through the wreath. It is the cataloger's opinion that the large letters variety merits a separate Breen-Gillio listing, i.e. BG-847A. PCGS# 10708

**1874 Indian Round Quarter Dollar
BG-875, MS66 Prooflike**

6599 1874 Indian Round 25 Cents, BG-875, High R.4, MS66 Prooflike NGC. Period Two issue, made by Christopher Ferdinand Mohrig of San Francisco. A scarce variety, seldom seen this fine. NGC lists 13 Prooflike examples, with this piece as the finest. No MS67 examples are known in any contrast category. The finest at PCGS is a single MS66 (7/15). This Premium Gem is fully prooflike and well-struck, save for "ghosts" of the obverse stars seen around the reverse periphery as shallow planchet depressions. Well-preserved, with straw-gold color. Listed on page 401 of the 2016 *Guide Book*. PCGS# 710736

6600 1875 Indian Round 25 Cents, BG-877, High R.5, MS65 PCGS. Hints of cherry-red adorn the margins, but the majority of this high grade example is peach-gold. Numerous tiny die flaws near the C in CAL are all of mint origin. Population: 3 in 65, 0 finer (6/15). PCGS# 10738

6601 1880/76 Indian Round 25 Cents, BG-885, R.3, MS65 Prooflike NGC. A flashy lemon-gold Gem. Unabraded except for moderate contact near star 4. The strike is good aside from obverse incompleteness near 12 o'clock. Struck from widely rotated dies. PCGS# 710746

6602 1881 Indian Round 25 Cents, BG-887, R.3, MS66 Deep Mirror Prooflike NGC. The repunched star 7 helps attribute this late-period 1881 round quarter, as does the die flaw connecting star 13 to the feather. Lemon-yellow, reflective fields contrast nicely against frosted, wheat-gold devices, creating top-notch eye appeal. Census: 1 in 66 Deep Mirror Prooflike, 3 finer (7/15). PCGS# 910748 Base PCGS# 10748

**1874 Octagonal Half Dollar, MS64
BG-959, Tied for Finest Certified**

6603 1874 Indian Octagonal 50 Cents, BG-959, R.7, MS64 PCGS. The relief elements are thickly frosted and the fields brightly mirrored, giving each side of this near-Gem an attractive prooflike appearance. Strike incompleteness occurs on the denomination, while Liberty's portrait is crisp. Several stars are recut. PCGS has graded five BG-959 submissions and estimates that perhaps eight representatives survive in all grades. Population: 2 in 64, 0 finer (7/15). PCGS# 10817

6604 1859 Liberty Round 50 Cents, BG-1004, Low R.6, MS64 PCGS. Ex: Jay Roe. An originally toned honey-gold Choice Liberty half dollar. Freckles of golden-tan patina are scattered across minimally marked surfaces. Population: 4 in 64, 0 finer (6/15). Ex: *New England Rare Coin Gallery*, 5/1977; *Jay Roe Collection* (Bowers and Merena, 9/2003), lot 461, which realized \$1,725. PCGS# 10833

6605 1870 Liberty Round 50 Cents, BG-1023, Low R.7, MS61 PCGS. This is an extremely rare round half dollar made by Robert B. Gray & Co. The Breen-Gillio reference lists only 11 different examples known, one of which is holed. This Mint State piece shows semiprooflike fields and vivid original toning that blankets the orange-gold surfaces in amber, violet, and deep blue overtones. Slightly weak on the high points of the devices, but without any singularly bothersome abrasions. PCGS# 10852

6606 1874 Indian Round 50 Cents, BG-1053, High R.5, MS65 PCGS. Ex: Jay Roe. A splendid apricot-gold Gem that boasts glassy fields and a bold strike. No detractors are remotely consequential. Pedigreed to the best known (and most complete) collection of California fractional gold. Population: 2 in 65, 0 finer (6/15). Ex: *Jay Roe Collection* (Bowers and Merena, 9/2003), lot 516, which realized \$1,380. PCGS# 10882

6607 1869 Liberty Octagonal 1 Dollar, BG-1106, High R.4, MS62 PCGS. Die State I, with the initial G visible beneath the bust. This scarce variety, made by Robert B. Gray & Co., has the distinction of being the only octagonal gold dollar known with the date 1869. This piece is well-struck around the peripheries, but shows minor weakness in the centers. Peach overtones accent bright yellow-gold surfaces and fully prooflike fields. Population: 24 in 62, 10 finer (7/15). PCGS# 10917

6608 1876/5 Indian Octagonal 1 Dollar, BG-1128, R.5, MS62 Prooflike NGC. A flashy butter-gold example with pastel blushes of ocean-blue and lavender on the upper reverse. The centers exhibit incompleteness of strike, customary for the scarce BG-1128. Christopher Ferdinand Mohrig of San Francisco was the maker. PCGS# 710939

COMMEMORATIVE SILVER

6609 1893 Isabella Quarter MS65 PCGS. Generous luster covers each side of this Gem Isabella quarter, which boasts the usual hammered strike amid pleasing eye appeal. A couple of marks in the left obverse field and ticks on the cheek and nose account for the grade, but this piece shows much eye appeal. NGC ID# 28HR, PCGS# 9220

6610 1893 Isabella Quarter MS65 PCGS. Dusky shades of magenta and golden-brown toning blanket the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and vibrant mint luster underneath. NGC ID# 28HR, PCGS# 9220

6611 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. A brilliant near-Gem that has booming luster and a good strike. Marks are essentially confined to a tick on the nose of the conjoined Lafayette bust. An impressive example of this early silver commemorative type. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS65
First Silver Dollar Commemorative**

6612 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. Attractive shades of apple-green, violet, and lavender-gray toning blanket the surfaces of this charming Gem in a delightful play of colors. The design elements are sharply detailed throughout and the well-preserved surfaces show only insignificant signs of contact. Eye appeal is outstanding. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS66
Significant Conditional Rarity**

- 6613** 1900 Lafayette Dollar MS66 NGC. DuVall 2-C. Vibrant luster sweeps this richly patinated Premium Gem. The centers are blended dove-gray and wheat-gold, while the margins display blue-green. The reverse appears pristine, and the obverse exhibits only a couple of tiny marks. Washington's cheek retains minor planchet striae, as made. MS66 is an uncommonly high grade for the Lafayette type, which is typically encountered in AU58 through MS64. Most Lafayette dollars are either DuVall 1-B or 2-C, although three other scarce to very rare die marriages are known. Census: 65 in 66 (3 in 66+, 2 in 66 ★), 10 finer (7/15). NGC ID# 28N8, PCGS# 9222

**1921 2x2 Alabama Half Dollar, MS66
Vibrant, Frosty Luster**

- 6614** 1921 Alabama 2x2 MS66 NGC. The 1921 Alabama 2x2 represents a difficult issue to locate in MS65, and coins that grade finer are particularly elusive and desirable. This is a beautiful Premium Gem with smooth, lustrous surfaces that are well-struck and completely brilliant. The few scattered surface nicks are too trivial to be of any consequence. A bright, premium quality example, this coin has all of the eye appeal that one could ever expect from an untoned silver commemorative, and is highly desirable based upon both technical and visual considerations. Census: 94 in 66 (7 in 66+, 9 in 66 ★), 5 finer (7/15).
Ex: *Long Beach Bullet* (Heritage, 9/2002), lot 2743; *Baltimore Signature* (Heritage, 7/2003), lot 9130. NGC ID# 28HS, PCGS# 9225

**1935 Arkansas Centennial Half, MS67
Among the Finest at PCGS**

- 6615** 1935 Arkansas MS67 PCGS. CAC. Ex: Heller. A boldly struck example from the first year of the Arkansas Centennial half dollar series. The centers show dusky lavender-gray toning and the peripheries show deeper olive and gold hues. This issue is available in lower grades, but becomes rare this well-preserved. Population: 21 in 67 (3 in 67+), 0 finer (6/15). NGC ID# 28HW, PCGS# 9233

- 6616** 1936 Arkansas MS67 PCGS. Ex: Heller. A few hints of greenish-gold toning highlight the impeccably preserved surfaces of this spectacular Superb Gem, with satiny mint luster underneath. The design elements are sharply detailed and eye appeal is outstanding. Population: 15 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 28HZ, PCGS# 9237

- 6617** 1936-S Arkansas MS67 PCGS. Ex: Heller. The design elements of this impressive Superb Gem exhibit razor-sharp definition throughout and the virtually pristine surfaces radiate vibrant mint luster, with a few hints of greenish-gold and pink toning. Population: 17 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 28J3, PCGS# 9239

- 6618** 1937-D Arkansas MS67 PCGS. This delightful Superb Gem exhibits well-detailed design elements and vibrant satiny mint luster on both sides. The impeccably preserved surfaces show highlights of gold and lavender toning. Population: 32 in 67 (5 in 67+), 1 finer (7/15). NGC ID# 28J5, PCGS# 9242

**1938 Arkansas Half, MS67
Excellent Surface Quality**

- 6619** 1938 Arkansas MS67 PCGS. CAC. Ex: Heller. The 1938 Arkansas Centennial half had a distribution of just 3,156 pieces. Superb Gem survivors are rarely seen. This piece is well-struck and devoid of distracting abrasions. Iridescent pastel-champagne toning is visited by hues of olive and russet around the rims. Population: 15 in 67 (2 in 67+), 0 finer (6/15). NGC ID# 28J7, PCGS# 9245

- 6620** 1939 Arkansas MS66 PCGS. CAC. Ex: Heller. Dusky shades of lavender-gray and golden-brown toning visit the well-preserved surfaces of this impressive Premium Gem, with sharply detailed design elements and satiny luster underneath. Population: 55 in 66 (7 in 66+), 2 finer (7/15). NGC ID# 28JA, PCGS# 9249

**1939-D Arkansas Half Dollar, MS67
Only One Coin Certified Finer**

- 6621** 1939-D Arkansas MS67 PCGS. Mintages dwindled at the end of the Arkansas series, as few contemporary collectors had an interest in such pieces. Of course, that means that today's collectors are challenged to find nice examples such as this Superb Gem. Only one numerically finer example has been certified, and few others could possibly match the quality of this brilliant and highly lustrous beauty, with its delicate peripheral gold toning. Population: 10 in 67 (1 in 67+), 1 finer (7/15). NGC ID# 28JB, PCGS# 9250

1939-S Arkansas Half, MS67
Low-Mintage, None Finer

- 6622 1939-S Arkansas MS67 PCGS.** Ex: Heller. With a low distribution of just 2,105 pieces each, the 1939-PDS Arkansas commemoratives rank among the lowest-mintage issues of the entire classic series. This satiny, unmarked, and untoned Superb Gem is tied for finest-known according to both services. Delightful satiny luster covers both sides. Population: 11 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 28JC, PCGS# 9251

1939-S Arkansas Centennial Half, MS67
Softly Lustrous

- 6623 1939-S Arkansas MS67 NGC.** The 1939-S was issued in three-coin sets along with an example each of the Philadelphia and Denver issues, struck to the extent of just 2,100 pieces (plus five coins for assay purposes). Superb Gem survivors are rare and highly sought-after. This piece displays a bold strike and satiny luster with a dusting of golden-gray color. Close examination with a loupe confirms the exceptional surface quality. Census: 9 in 67, 0 finer (7/15). NGC ID# 28JC, PCGS# 9251

- 6624 1936-S Bay Bridge MS67 PCGS.** Soft silver-gray interiors with gold-orange, tan, and sage patina at the borders. This Superb Gem of the popular Bay Bridge design has few better; PCGS recognizes just 10 numerically finer pieces (7/15). NGC ID# 28JD, PCGS# 9254

- 6625 1936-S Bay Bridge MS67 PCGS.** An outstanding iridescent display masks the underlying mint luster of this Superb Gem. The surfaces are pristine and the intermingled golden-brown, rose, and violet toning enhances the eye appeal. PCGS has only certified 10 finer examples of this issue (7/15). NGC ID# 28JD, PCGS# 9254

- 6626 1935-D Boone MS67 PCGS.** Ex: Heller. This remarkable Superb Gem offers pinpoint definition on all design elements and the lustrous surfaces display no mentionable distractions. A few hints of greenish-gold toning add to the outstanding eye appeal. Population: 15 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28JG, PCGS# 9259

- 6627 1938 Boone MS67 PCGS.** Ex: Heller. Razor-sharp definition is evident on all design elements and the well-preserved surfaces of this delightful Superb Gem radiate vibrant mint luster. Eye appeal is terrific. Population: 38 in 67 (5 in 67+), 1 finer (7/15). NGC ID# 28JU, PCGS# 9274

- 6628 1938-D Boone MS67 PCGS. CAC.** The impeccably preserved surfaces of this impressive Superb Gem are blanketed in shades of greenish-gold and lavender-gray toning, with satiny mint luster underneath. The design elements are well-detailed and few examples are known in higher grade. Population: 70 in 67 (6 in 67+), 5 finer (7/15). NGC ID# 28JV, PCGS# 9275

- 6629 1938-S Boone MS67 PCGS. CAC.** This impressive Superb Gem specimen displays unusually sharp definition on all design elements and the impeccably preserved lustrous surfaces are enhanced by shades of lavender and greenish-gold toning. Population: 39 in 67 (2 in 67+), 3 finer (7/15). NGC ID# 28JW, PCGS# 9276

- 6630 1925-S California MS67 ★ NGC.** Vivid shades of lavender, blue, and greenish-gold toning blanket the impeccably preserved surfaces of this exquisite Superb Gem, with vibrant mint luster and sharply detailed design elements underneath. NGC has certified 15 numerically finer examples (7/15). NGC ID# 28JY, PCGS# 9281

- 6631 1925-S California MS67 PCGS. CAC.** A wonderful Superb Gem marking the 75th anniversary of California statehood, this piece has soft, frosty silver luster with pastel blue, green, and gold toning along the borders. PCGS has only certified six finer examples (7/15). NGC ID# 28JY, PCGS# 9281

1925-S California Diamond Jubilee Half
Glowing, Beautifully Toned MS68

- 6632 1925-S California MS68 NGC.** Jo Mora designed the iconic designs of the California Diamond Jubilee half dollar which depicts a Forty-Niner on the obverse and a grizzly bear (the state emblem) on the reverse. This Superb Gem example is among the finest certified at either service, and displays captivating eye appeal with a wide spectrum of multicolor hues accenting satiny champagne surfaces on each side. The strike is bold and there are no signs of contact present. Census: 15 in 68 (5 in 68 ★, 1 in 68+★), 0 finer (7/15). NGC ID# 28JY, PCGS# 9281

1936 Cincinnati Half, MS67
Tied for the Finest Certified

- 6633 1936 Cincinnati MS67 PCGS.** This stunning Superb Gem has distinctive peripheral gold and iridescent toning on the obverse, with mottled gold toning over much of the reverse. Both sides exhibit satiny silver luster. Tied for the finest certified with 10 others at PCGS and seven at NGC (6/15). An important opportunity for the commemorative connoisseur. NGC ID# 28JZ, PCGS# 9283

1936 Cincinnati Half Dollar, MS67
Among the Finest Certified

- 6634 1936 Cincinnati MS67 PCGS.** Satiny silver luster reveals hints of pale-gold toning near the margins, yet this smooth and problem-free Superb Gem is essentially untoned on the obverse and only lightly patinated on the reverse. The lack of all but the tiniest marks anywhere on the coin confirm the lofty grade, which is unsurpassed by any examples at either service. Few coins can equal the stately appeal of this excellent Cincinnati half. Population: 11 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 28JZ, PCGS# 9283

1936 Cincinnati Half Dollar, MS67
Touch of Iridescence

- 6635 1936 Cincinnati MS67 PCGS.** The Cincinnati half dollar was produced at all three active mints and distributed in sets. Today, the Philadelphia issue is one of the scarcer in high grade. This Superb Gem is among the finest certified and displays sharp motifs with satiny luster. Hints of iridescence appear throughout the pale champagne patina. Population: 11 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28JZ, PCGS# 9283

- 6636 1936 Cleveland MS67 PCGS.** This spectacular Superb Gem exhibits well-detailed design elements and virtually pristine lustrous surfaces under shades of greenish-gold, lavender, and amber toning. Population: 80 in 67 (9 in 67+), 1 finer (7/15). NGC ID# 28K4, PCGS# 9288

- 6637 1936-D Columbia MS67+ PCGS. CAC.** From a small distribution of 8,009 pieces, this high-end Superb Gem displays vibrant mint luster and sharply detailed design elements throughout, with impeccably preserved surfaces and incredible eye appeal. PCGS has graded 23 numerically finer examples (7/15). NGC ID# 28K6, PCGS# 9292

- 6638 1936-S Columbia MS67+ PCGS. CAC.** This high-end Superb Gem exhibits sharply detailed design elements and satiny mint luster under shades of lavender, gray, and greenish-gold toning. PCGS has graded six numerically finer examples (7/15). NGC ID# 28K7, PCGS# 9293

1893 Columbian Half Dollar, MS67
Lovely Two-Sided Toning

- 6639 1893 Columbian MS67 PCGS Secure.** A spectacularly toned example, as is characteristic of original examples of this first commemorative half dollar issue. Concentric shades of golden-violet and emerald-green iridescence adorn both sides, and the soft, frosted surfaces that rest under the toning are refreshingly smooth. Population: 19 in 67 (2 in 67+), 0 finer (7/15). Ex: *New York Signature (Heritage, 11/2003)*, lot 9098. NGC ID# 26H6, PCGS# 9297

- 6640 1935 Connecticut MS67+ NGC. CAC.** This high-end Superb Gem displays impeccably preserved surfaces with vibrant mint luster and well-detailed design elements under attractive shades of pale gold and lavender toning. Census: 96 in 67 (5 in 67+, 12 in 67 ★), 1 finer (7/15). NGC ID# 28K8, PCGS# 9299

- 6641 1936 Elgin MS67 ★ NGC. CAC.** Vivid shades of magenta and greenish-gold toning highlight the impeccably preserved surfaces of this incredible Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. Eye appeal is extraordinary. NGC has graded 11 numerically finer examples (7/15). NGC ID# 28KA, PCGS# 9303

1936 Gettysburg Half Dollar, MS67
Extremely Rare any Finer

- 6642 1936 Gettysburg MS67 PCGS. CAC.** The turning point of the Civil War, the Battle of Gettysburg, is remembered in the designs of this popular classic commemorative. The issue had a moderate distribution of 26,928 coins, but Superb Gem survivors are scarce. This piece is boldly struck and well-preserved. Champagne-gray luster reveals hints of amber, olive, and lavender around the borders. There are two MS68 coins finer at PCGS (6/15). NGC ID# 28KB, PCGS# 9305

- 6643 1922 Grant No Star MS66+ PCGS. CAC.** The pleasing lavender-gray centers of this high-end Premium Gem are surrounded by vivid rings of greenish-gold toning. The design elements are well-detailed, with ample mint luster under the patina. NGC ID# 28KD, PCGS# 9306

**1922 No Star Grant Memorial Half, MS67
Sharply Struck, Pearlescent Patina**

6644 1922 Grant No Star MS67 PCGS. More available than the scarce With Star version, the No Star variety is nonetheless conditionally rare in Superb Gem grades. A weak central strike plagues the issue, although here the strike is sharp. Hints of lilac enhance the pearlescent-gray surfaces, with vibrant mint luster shining through. Aside from some Mint-related die polishing lines, there are no notable surface irregularities or distractions. Population: 47 in 67 (2 in 67+), 0 finer (6/15). NGC ID# 28KD, PCGS# 9306

**1922 Grant No Star Half Dollar, MS67
Delightful Gold and Powder-Blue Patina**

6645 1922 Grant No Star MS67 PCGS. CAC. The No Star variety is far more available than its With Star cousin, but examples are rarely seen at this grade level. Specks of gold toning blend with pale-blue patina overall, delivering considerable visual appeal throughout this Laura Gardin Fraser-designed commemorative half dollar. Satiny surfaces are devoid of overt impairments, as the rarified Superb Gem grade suggests. Population: 48 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 28KD, PCGS# 9306

6646 1922 Grant With Star MS64 PCGS. The low mintage variety with an incused star above the N in GRANT. Lightly toned, lustrous, and smooth save for a graze above the SS in Ulysses. The dies clashed early and were lapped, leaving die polish lines throughout the obverse field. Certified in a green label holder. NGC ID# 28KC, PCGS# 9307

6647 1922 Grant With Star MS64 NGC. Well struck and carefully preserved with a hint of green-gold toning. The dies clashed early on this issue, and the Mint responded by lapping the obverse die to remove the clash marks. The obverse field displays myriad die polish lines, as made. Housed in a first generation holder. NGC ID# 28KC, PCGS# 9307

**1922 With Star Grant Half, MS66
Original Toning**

6648 1922 Grant With Star MS66 NGC. This is a satiny Premium Gem example of the scarcer of the two Grant Memorial half dollar varieties, denoted by a small incuse star in the right obverse field. Both sides are toned in olive-gold and light russet hues. The high point of Grant's hair shows minor softness, as usual. Census: 55 in 66 (1 in 66+, 2 in 66 ★), 9 finer (7/15). NGC ID# 28KC, PCGS# 9307

6649 1928 Hawaiian MS63 PCGS. Vivid shades of golden-brown, magenta, and amber toning blanket the lightly marked surfaces of this impressive Select specimen. The design elements are well-detailed and vibrant mint luster shines through the toning. *From The College Collection, Part Two.* NGC ID# 28KE, PCGS# 9309

6650 1928 Hawaiian MS64 NGC. An attractive Choice example of this key silver commemorative, with well-detailed design elements and well-preserved lustrous surfaces that show a few highlights of pale gold toning. NGC ID# 28KE, PCGS# 9309

6651 1928 Hawaiian MS64 NGC. A well-preserved Choice specimen of this silver commemorative key, with sharply detailed design elements and vibrant mint luster on both sides. From a low distribution total of 9,958 pieces. NGC ID# 28KE, PCGS# 9309

1946 Iowa Centennial Half, Outstanding MS68

6652 1946 Iowa MS68 PCGS. CAC. The 1946 Iowa Centennial half dollar is one of the more plentiful classic commemoratives is MS68, but such pieces are still scarce. This coin is among the finest at PCGS. The strike is sharp and the surfaces display satiny luster. The obverse is encompassed by gold, crimson, and forest-green toning; the reverse shows similar hues but with the addition of lilac-gray over most of the center. Population: 82 in 68 (9 in 68+), 0 finer (7/15). *From The College Collection, Part Two.* NGC ID# 28KJ, PCGS# 9316

6653 1925 Lexington MS66+ PCGS. CAC. The 1925 Lexington half dollar is not difficult to locate in MS66 condition, but the population drops off dramatically in finer grades. This high-end Premium Gem is well-detailed and lustrous, under attractive shades of greenish-gold and lavender toning. PCGS has graded 23 numerically finer examples (7/15). NGC ID# 28KK, PCGS# 9318

1918 Illinois Centennial Half, Stellar MS67+

- 6654 1918 Lincoln MS67+ PCGS. CAC.** The Plus designation sets this Superb Gem Illinois Centennial half dollar apart from most other MS67 examples, and only two MS68 coins (one MS68+) are finer at PCGS (6/15). This piece is razor-sharp and displays frosty mint radiance. Tinges of amber-gold, violet, and blue toning surround the obverse periphery, while the remainder of each side shows just a hint of light golden color. PCGS# 9320

**1921 Missouri Centennial Half
Appealing Premium Gem, None Finer at PCGS**

- 6655 1921 Missouri MS66 PCGS.** Colorful iridescent shades appear on the sloped borders of this attractive Premium Gem Missouri half. Sea-green and golden hues venture inward toward the centers, which are fully struck-up and boldly defined. Designed by Robert Aitken (who also designed the Panama-Pacific fifty dollar gold pieces), the pleasing frontier motifs are among the favorites of most commemorative collectors. PCGS has not certified any coins numerically finer than this MS66 example. Population: 42 in 66, 0 finer (6/15). NGC ID# 28KS, PCGS# 9330
- 6656 1921 Missouri 2x4 MS65 PCGS. CAC.** This Gem representative of the scarcer 2x4 variant displays crimson toning at the borders with an added sliver of color in the right obverse field. The otherwise brilliant surfaces glisten with satiny luster. Approximately 9,400 pieces were distributed, but examples finer than the coin here offered are rare. NGC ID# 28KR, PCGS# 9331

**1921 Missouri 2x4 Half Dollar, MS66
Among the Top Coins at Both Services**

- 6657 1921 Missouri 2x4 MS66 NGC.** San Francisco artist Robert Aitken, famous for his 1915 Pan-Pac \$50 gold coins, also designed the 1921 Missouri Centennial commemorative halves. Researchers have long debated the issue's distribution totals. It is certain that 50,028 coins (both varieties) were minted, and that 29,600 coins were melted. Current distribution estimates stand at 9,400 2x4 coins and 11,400 Plain representatives. This well-defined, satiny 2x4 variant has pearl-gray iridescence in the centers surrounded by golden-orange and indigo toning around the edges. Census: 39 in 66 (1 in 66 ★), 0 finer (7/15). NGC ID# 28KR, PCGS# 9331

- 6658 1923-S Monroe MS65 PCGS. CAC.** A Gem example of the notoriously challenging Monroe half dollar, mostly silver-gray with elements of peach and deep claret. A green CAC label further attests to the quality.
From The College Collection, Part Two. NGC ID# 28KT, PCGS# 9333

**1938 New Rochelle Half, SP66
One of 50 Specimens Believed Struck**

- 6659 1938 New Rochelle SP66 NGC.** According to research by noted commemorative authority, Anthony Swiatek, 50 New Rochelle half dollars were struck on polished proof planchets, and were then given to various members of the Commemorative Coin Committee. One of the earliest auction appearances of an example was in lot 1707 of the 1958 ANA sale (Kosoff, 8/1958), where a piece was described as a "Special Proof Half Dollar of the New Rochelle Commemorative issue, struck in very limited number ..." Recognized as a specimen, this Premium Gem example is boldly struck, with gleaming prooflike fields that denote its special status. Traces of gold toning appear overall.

**1938 New Rochelle Half Dollar
Specimen MS66**

- 6660 1938 New Rochelle MS66 NGC.** Both Prooflike and Specimen strikings are known and certified for the New Rochelle. The Specimen coins, such as this one, are only graded by NGC. Such pieces are presumably from the 50 coins presented to various dignitaries, members of the Coinage Committee, and selected members of the Westchester County Coin Club. This is a deeply mirrored example with only slight contrast evident between the fields and devices. There are no obvious contact marks present, and each side is primarily brilliant with a slight reddish tinge evident. NGC has only certified 13 coins as Specimen strikings, and five others have been graded the same as this coin with six finer, minus possible resubmissions (7/15). NGC ID# 28KU, PCGS# 9335

**1925 Norse Medal, MS66
Scarcer Thin Planchet Variant**

- 6661 1925 Norse Thin Planchet MS66 PCGS. CAC.** Two variants exist for the 1925 Norse commemorative medals. Thin Planchet examples were struck to the extent of 6,000 pieces, while Thick Planchet medals claim a net distribution of 31,750 pieces. This scarcer Thin Planchet representative is mostly brilliant with satiny luster and mottled violet and orange toning around the edges. Population: 7 in 66, 0 finer (7/15).
From The College Collection, Part Two. PCGS# 9451

- 6662 1933-D Oregon MS67+ PCGS. CAC. FS-801.** Satiny luster glistens over mostly brilliant, impeccably preserved surfaces with dappled blue, magenta, yellow, and orange toning around the rims. A total of 5,000 1933-D Oregon halves were struck plus eight coins for assay purposes. PCGS shows just two finer submissions (6/15). NGC ID# 28KZ, PCGS# 9343

**1938-D Oregon Half, MS68
Icy Luster**

- 6663 1938-D Oregon MS68 PCGS.** Ice-blue, frosty luster shows hints of light golden color around the peripheries on this incredible Oregon Trail half dollar, a conditionally scarce example. Close inspection with a loupe reveals bold design elements and seemingly perfect surfaces. Population: 43 in 68 (5 in 68+), 2 finer (7/15). NGC ID# 28L7, PCGS# 9349

- 6664 1939 Oregon MS67+ PCGS. CAC.** The entire obverse is veiled in mottled golden-brown, plum, and russet patina. The target-like reverse exhibits comparably toned borders that cede to frosty brilliance, culminating in a circle of color at the extreme center. The underlying surfaces are immaculate. This is one of six MS67+ coins at PCGS with four pieces finer (7/15). NGC ID# 28L9, PCGS# 9352

**1939-D Oregon Half, MS68+
Deep Tab Toning**

6665 1939-D Oregon MS68+ NGC. Boldly rendered design elements are illuminated by glowing, satiny luster on this Plus-designated MS68 example, one of the finest 1939-D Oregon Trail halves known. The reverse is tab-toned in vivid amber-russet, crimson, and sun-gold hues, with pale champagne over most of the interiors. The obverse shows similar hues but in a more intermingled pattern. Census: 33 in 68 (5 in 68+, 14 in 68 ★, 2 in 68+★), 0 finer (7/15). NGC ID# 28LA, PCGS# 9353

6666 1939-S Oregon MS67+ PCGS. CAC. A total of 3,005 S-mint examples were distributed in the series' final year. Specks of fiery orange and crimson patina overlay shimmering surfaces that appear flawless at first glance and remain so even after close inspection. There are only eight finer submissions at PCGS (7/15). NGC ID# 28LB, PCGS# 9354

6667 1939 SET Oregon PDS Set MS65 to MS66 NGC. This matched set contains a 1939 MS65, 1939-D MS66, and 1939-S MS65. All coins have brilliant satin surfaces with glimpses of pale golden toning. Certified in NGC holders with consecutive serial numbers. (Total: 3 coins) PCGS# 9355

6668 1915-S Panama-Pacific MS65 NGC. Vivid shades of greenish-gold and magenta toning highlight the well-preserved surfaces of this delightful Gem, with vibrant mint luster and sharply detailed design elements throughout. NGC ID# 26H7, PCGS# 9357

**1915-S Panama-Pacific Half Dollar
Seemingly Flawless Superb Gem**

6669 1915-S Panama-Pacific MS67 PCGS. CAC. Concentric rings of rainbow iridescence surround brilliant interiors on both sides. From a technical standpoint, this is a near-flawless Superb Gem without a single impairment that merits mention. Even close study with magnification fails to reveal where this amazing coin lost points. The obverse and reverse of the 1915 Pan-Pac half dollar were designed by Charles Barber and George T. Morgan, and 27,134 pieces were distributed in all. This is easily among the top survivors; PCGS has seen just three submissions in higher grades (7/15). NGC ID# 26H7, PCGS# 9357

6670 1915-S/S Panama-Pacific, FS-501, MS64 PCGS. CAC. A collector-grade example of this popular Panama-Pacific International Exposition commemorative. The strike is sharp and abrasions are minimal. Silvery interiors contrast sharply with vivid multicolor peripheries, which are most bold on the obverse. PCGS# 145748 Base PCGS# 9357

**1915-S/S Panama-Pacific Half, MS66
Barber-Morgan Design Collaboration**

6671 1915-S/S Panama-Pacific, FS-502, MS66 PCGS. CAC. One of two repunched mintmark varieties for the issue, showing the upper serif of an errant S in the field above the primary. The Panama-Pacific half dollar had a distribution of 27,134 pieces, and is one of the more affordable commemoratives struck for the Panama-Pacific International Exposition held in San Francisco in 1915. This Premium Gem is sharply struck, with satiny golden-gray luster. PCGS# 511601 Base PCGS# 9357

6672 1936 Robinson MS67 PCGS. This extraordinary Superb Gem is deeply toned in gold, green, and rose shades with underlying frosty mint luster. Population: 76 in 67 (1 in 67+), 2 finer (7/15). NGC ID# 28LJ, PCGS# 9369

6673 1935 Spanish Trail MS65 ★ NGC. An especially attractive Gem example of this popular silver commemorative, with sharply detailed design elements and vibrant satiny mint luster under shades of lavender-gray and greenish-gold toning. NGC ID# 28LN, PCGS# 9376

6674 1935 Spanish Trail MS66+ PCGS. CAC. A high-end Premium Gem example of this popular issue, with satiny mint luster and sharply detailed design elements throughout. The well-preserved surfaces are visited by highlights of lavender, gray, and amber toning. NGC ID# 28LN, PCGS# 9376

6675 1925 Stone Mountain MS67 PCGS. CAC. Soft orange-tan and bluish-green toning visits the radiantly lustrous surfaces of this Superb Gem commemorative half. Sharply struck design features and impeccably preserved surfaces round out the coin's outstanding eye appeal, appropriately recognized by CAC. PCGS reports just eight examples finer (7/15). NGC ID# 26H8, PCGS# 9378

**1925 Stone Mountain Half Dollar, MS67+
Amazing Array of Colors**

6676 1925 Stone Mountain MS67+ PCGS. CAC. The color palette seen on each side of this well-struck Superb Gem includes shades of fiery orange, blue, red-violet, and green when rotated under a lamp. Soft, frosty mint luster percolates through the variegated toning. The 1925 Stone Mountain half dollar is one of the most available commemoratives from the 1920s. Nevertheless, only 5% of all MS67 submissions at PCGS have received a Plus designation, and there are just eight examples rated finer at that service (7/15). NGC ID# 26H8, PCGS# 9378

6677 1936-S Texas MS67+ PCGS. CAC. This high-end Superb Gem displays sharply detailed design elements and vibrant satiny mint luster with a few hints of pale gold toning. One of 9,055 pieces struck. PCGS has graded just two coins as MS68 or better (6/15). NGC ID# 28LW, PCGS# 9388

6678 1937 Texas MS67+ PCGS. A scarce Texas Centennial issue from a mintage of just 6,571 coins, this Superb Gem exhibits delicate wisps of gold and blue toning that intensifies along the borders. PCGS has only certified four finer examples (7/15). NGC ID# 28LX, PCGS# 9390

6679 1937-D Texas MS67+ PCGS. CAC. Silver-white interiors have gold and peach toning around. The reverse adds hints of blue and violet. An impressively preserved later-date Texas half from Denver. PCGS has graded just two pieces as MS68 or better (7/15). NGC ID# 28LY, PCGS# 9391

6680 1937-D Texas MS67+ PCGS. CAC. Gold overtones grace most of this beautifully preserved later Texas half. Shades of green outline portions of Liberty on the reverse. PCGS has graded only two coins finer than this magnificent MS67+ example (6/15). NGC ID# 28LY, PCGS# 9391

6681 1938 Texas MS67 PCGS. CAC. A sharply detailed Superb Gem, with virtually pristine surfaces and satiny mint luster throughout. From a small distribution of 3,780 pieces. Population: 55 in 67 (4 in 67+), 1 finer (7/15). NGC ID# 28M2, PCGS# 9394

1938-D Texas Half, Pristine MS67+

6682 1938-D Texas MS67+ PCGS. CAC. Pale lilac, rose, and gold appear faintly on each side of this remarkably pristine 1938-D Texas half, which still presents as largely untoned. The hunt for a finer-graded example of this Texas issue would likely result in a long and futile search. Population: 13 in 67+, 1 finer (7/15). NGC ID# 28M3, PCGS# 9395

1938-D Texas Independence Half, MS67+ Exceptional Quality

6683 1938-D Texas MS67+ PCGS. CAC. A stunning representative of the Texas design, coined at the closest operating mint to the state. The distribution for this issue total just 3,775 pieces, sold in three-coin sets along with an example each of the Philadelphia and San Francisco issues. This Superb Gem exhibits satiny silver luster with wisps of delicate gold, violet, and blue peripheral toning. Population: 100 in 67 (13 in 67+), 1 finer (7/15). NGC ID# 28M3, PCGS# 9395

1938-D Texas Half Dollar, MS68 Among the Finest Known

6684 1938-D Texas MS68 NGC. The 1938-D Texas Independence Centennial half dollar had a limited distribution of only 3,775 coins. The present MS68 example is among only a handful of pieces that claim status as the finest known. The design elements are boldly defined and the satiny surfaces are devoid of abrasions. Iridescent silvery-gold surfaces show irregular splashes of olive and deep amber-orange toning. Census: 7 in 68 (3 in 68 ★), 0 finer (7/15). NGC ID# 28M3, PCGS# 9395

6685 1925 Vancouver MS66+ PCGS. CAC. Light gold and gunmetal-blue toning embraces the obverse, while the reverse maintains its brilliance. Frosty S-mint luster issues from the immaculate surfaces. Boldly rendered with a small reeding mark under the lapel. Scarcely seen at this grade level. NGC ID# 28M5, PCGS# 9399

1925 Fort Vancouver Centennial Half Satiny MS67

6686 1925 Vancouver MS67 PCGS. CAC. The 1925 Vancouver half dollar is very scarce above the MS66 grade level. Attractive toning in shades of golden-orange, cherry-red, forest-green, aquamarine, lemon-yellow, green-gray, and russet, primarily at the outer edges, adds to the visual allure of this Superb Gem. The piece displays deep satin luster that further enhances the appearance. Population: 56 in 67 (8 in 67+), 1 finer (7/15). NGC ID# 28M5, PCGS# 9399

1927 Vermont Half Dollar, MS67 Scarce This Fine

6687 1927 Vermont MS67 PCGS. The Vermont Sesquicentennial half dollar, struck as a souvenir to commemorate the 150th anniversary of Vermont's independence, is seldom seen in Superb Gem condition. This MS67 coin is boldly struck and free of major abrasions. Both sides show satiny luster and a blush of light golden toning. Population: 37 in 67 (2 in 67+), 1 finer (7/15). NGC ID# 28M6, PCGS# 9401

**1927 Vermont Half Dollar, MS67
Only One Finer at PCGS**

6688 1927 Vermont MS67 PCGS. Dusky mustard-yellow patina is typical for the Vermont half dollars. This Superb Gem exhibits that patina at the upper right obverse and lower right reverse. This piece approaches the top of the certification charts, with only three finer examples in the combined PCGS and NGC population reports. Population: 37 in 67 (2 in 67+), 1 finer (7/15). NGC ID# 28M6, PCGS# 9401

6689 1946-D Booker T. Washington MS67 PCGS Secure. CAC. The ice-blue and lavender centers of this spectacular Superb Gem yield to shades of greenish-gold at the peripheries. The design elements are sharply detailed and vibrant mint luster shines through the toning. Population: 48 in 67 (4 in 67+), 0 finer (7/15). NGC ID# 28M8, PCGS# 9405

6690 1946-D Booker T. Washington MS67 PCGS Secure. CAC. Ex: Bruce Scher. Bruce Scher's 144-piece Registry Set of classic silver commemoratives is ranked as the #1 All-Time Finest at PCGS. He sold his set to Pinnacle in 2012, and passed away late that year. The present lustrous Superb Gem has aquamarine fields and devices. The obverse margin exhibits narrow but exquisite bands of ruby-red, orange-gold, and forest-green. NGC ID# 28M8, PCGS# 9405

6691 1946-D Booker T. Washington MS67 ★ NGC. CAC. Darkly patinated in shades of green, gold, violet, and amber, this spectacular Superb Gem exhibits sharply detailed design elements, with vibrant mint luster under the toning. No mentionable surface marks are apparent. From a large distribution of 200,113 pieces. Census: 70 in 67 (1 in 67+, 21 in 67 ★, 3 in 67+★), 9 finer (7/15). NGC ID# 28M8, PCGS# 9405

6692 1946-S Booker T. Washington MS67 PCGS. Ex: Bruce Scher. Remarkable obverse toning includes arcs of cherry-red, lemon-gold, and apple-green along the left and lower margins. The reverse toning is similar but not quite as spectacular. The centers are olive-green. Bruce Scher's high grade type collection of silver commemoratives was auctioned by Heritage in February 2005, but did not include the present piece. NGC ID# 28M9, PCGS# 9406

**1951-S Washington-Carver Half, MS67
Pastel Peripheral Toning**

6693 1951-S Washington-Carver MS67 PCGS. CAC. The net distribution of this issue was a hair more than 10,000 pieces, but this piece is nonetheless one of only five Superb Gems graded at PCGS. Pale pastel rainbow iridescence appears on the right margins of each side, with pale silver-gray centers and outstanding preservation throughout. Population: 4 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28MU, PCGS# 9432

6694 1952 Washington-Carver MS67 NGC. Mottled golden-olive and violet-gray tones shroud the obverse, while the same colors adhere to the rims and centers respectively on the reverse. The only marks on this Superb Gem appear linearly on the temple of George Carver. Census: 34 in 67 (1 in 67+, 10 in 67 ★, 2 in 67+★), 1 finer (7/15). NGC ID# 28MV, PCGS# 9434

6695 1952 Washington-Carver MS67 PCGS Secure. CAC. Vivid shades of mingled magenta, violet, amber, and sea-green toning blanket the impeccably preserved surfaces of this remarkable Superb Gem, with vibrant mint luster and well-detailed design elements underneath. Population: 17 in 67 (2 in 67+), 1 finer (7/15). NGC ID# 28MV, PCGS# 9434

**1953-S Washington-Carver Half, MS67
Tied for Finest Certified**

6696 1953-S Washington-Carver MS67 PCGS Secure. Ex: Bruce Scher. The final issue in the classic commemorative series was the Washington-Carver series issued from 1951 to 1954. Authorized on September 21, 1951, these half dollars were issued to commemorate the lives and perpetuate the ideals and teachings of Booker T. Washington and George Washington Carver. Examples were coined at three mints from 1951 to 1954.

The 1952, 1953-S, and 1954-S issues had the largest mintages, including 88,020 examples of this 1953-S half dollar. This stunning example is tied for the finest certified. Both sides have deep cobalt-blue and iridescent toning with underlying frosty luster. Population: 10 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28N2, PCGS# 9440

**1936 Wisconsin Half Dollar, MS68
Delicately Toned**

6697 1936 Wisconsin MS68 PCGS. Ex: W.P.E. Collection. The Wisconsin Territorial Centennial half dollar is seldom seen in MS68, and no examples are known finer. This piece is boldly struck and seemingly pristine. Each side shows light champagne toning with glimpses of iridescence throughout. Population: 34 in 68 (5 in 68+), 0 finer (7/15). NGC ID# 28N6, PCGS# 9447

**1936 York Tercentenary Half, MS68
Intense Cartwheel Luster**

- 6698** 1936 York MS68 PCGS. The intricate details of the stockade on this York County Tercentenary commemorative half are sharply brought up, mirroring the definition of the reverse. The obverse shows warm champagne toning overall, while the reverse exhibits the same but with an additional ribbon of amber-gold around much of the periphery. The surfaces are seemingly perfect. Population: 26 in 68, 0 finer (7/15). NGC ID# 28N7, PCGS# 9449

COMMEMORATIVE GOLD

- 6699** 1903 Louisiana Purchase, Jefferson, MS65 NGC. CAC. The peach-gold surfaces reveal hints of rose on the obverse while the reverse shows slightly deeper shades of this color palette joined by whispers of lime-green and lavender. Radiant luster and impeccable preservation further contribute to the coin's pleasing eye appeal. NGC ID# 26HA, PCGS# 7443
- 6700** 1903 Louisiana Purchase, Jefferson, MS65 NGC. CAC. The orange-gold surfaces of this popular gold commemorative coin are awash with mint luster, and sharp definition characterizes the design elements. A few unobtrusive handling marks are inconsequential. The gorgeous eye appeal is affirmed by the CAC endorsement. NGC ID# 26HA, PCGS# 7443
- 6701** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. Bands of deep reddish-orange toning hug the left and right reverse borders, leaving the remaining surfaces yellow-gold with lilac hues on each side. The central motifs are strongly brought up with insignificant softness toward the upper reverse rim. A lovely example of the scarcer Jefferson type. NGC ID# 26HA, PCGS# 7443
- 6702** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. The Louisiana Purchase Exposition took place in St. Louis from April 30 to December 1, 1904, though it was intended to open in 1903. This bold orange-gold representative has magnificent eye appeal, the result of swirling mint frost and minimal abrasions. A sliver a darker patina occurs through LOUIS. NGC ID# 26HA, PCGS# 7443
- 6703** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. Sea-green and peach-gold compete for territory across this lustrous and attractive Gem. Unabraded aside from an unobtrusive graze on Jefferson's forehead. Encased in a green label holder.
Ex: Chicago Signature (Heritage, 8/2011), lot 5057, which realized \$1,610. NGC ID# 26HA, PCGS# 7443
- 6704** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. Lemon-gold color on the obverse appears lighter than the deeper shades of green-gold on the reverse, though each side shows complementary rose accents. This crisp Gem Jefferson head gold dollar is void of notable distractions. A small planchet flake occurs below D(OLLAR). NGC ID# 26HA, PCGS# 7443
- 6705** 1903 Louisiana Purchase, Jefferson, MS66 NGC. CAC. President Thomas Jefferson's portrait on this issue stems from the coin's commemoration of the 100th anniversary of the purchase of a vast tract of land from France in 1803 during his administration. Intense luster radiates from the yellow-gold of this sharply impressed and impeccably preserved Premium Gem. NGC ID# 26HA, PCGS# 7443

- 6706** 1903 Louisiana Purchase, Jefferson, MS66 NGC. CAC. Wisps of nearly imperceptible soft green are imbued within the yellow-gold toning of this lustrous Premium Gem. All design features are well-brought up. Demand is extremely high for both varieties (Jefferson and McKinley) of 1903 gold dollars. NGC ID# 26HA, PCGS# 7443
- 6707** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC. According to Dave Bowers, "[Charles] Barber copied a portrait of Thomas Jefferson from the portrait on an Indian peace medal created in three sizes in the latter part of 1801 by John Reich." This strongly struck Premium Gem is awash in glistening mint luster with pleasing lavender and yellow-gold coloration. NGC ID# 26HA, PCGS# 7443
- 6708** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC. The obverse is fully detailed with sharp denticles and portrait definition, while the equally bold reverse has a bit of softness at the lower rims. A small alloy spot occurs above HA in PURCHASE. Radiant lilac and peach-gold surfaces are undeniably appealing. NGC ID# 26HA, PCGS# 7443
- 6709** 1903 Louisiana Purchase, McKinley, MS65 NGC. CAC. The yellow-gold surfaces of this commemorative gold dollar display occasional hints of apricot and exhibit strong design detail. Both sides are virtually flawless. The present variant of the two Louisiana Purchase gold dollars shows President William McKinley, who sanctioned the Exposition held in St. Louis in 1904. NGC ID# 26HB, PCGS# 7444
- 6710** 1903 Louisiana Purchase, McKinley, MS65 NGC. CAC. Shades of orange- and yellow-gold patina adorn the highly lustrous surfaces of this Gem. The design elements are sharply impressed and both sides are well-preserved. Some mild, as-made orange-peel effect is evident around the borders. NGC ID# 26HB, PCGS# 7444
- 6711** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. A lovely and lustrous lemon-gold Gem. The strike is full on the legends and motifs, although the dentils show occasional inexactness. Virtually void of contact, and housed in an old green label holder. NGC ID# 26HB, PCGS# 7444
- 6712** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. A no-questions Gem, both the obverse and reverse are awash in orange-gold color. The smooth surfaces are attractive with crisp strike definition in all areas. A tiny alloy spot is mentioned under the U of LOUIS at the base of the reverse.
Ex: Denver Signature (Heritage, 8/2006), lot 3948. NGC ID# 26HB, PCGS# 7444
- 6713** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. Pale-lilac accents and rich tones of orange-gold account for the CAC-approved aesthetic appeal seen throughout this Gem. Swirling luster, bold design detail, and the absence of singular marks heighten the desirability. Only 35,000 coins were distributed (both variants) from a total mintage of 250,000 pieces. NGC ID# 26HB, PCGS# 7444
- 6714** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. This beautifully original olive and reddish-gold Louisiana Purchase representative features bold central definition with minor strike softness around the rims. There are no mentionable imperfections, and three small alloy spots appear below TES in STATES. NGC ID# 26HB, PCGS# 7444
- 6715** 1903 Louisiana Purchase, McKinley, MS66 PCGS. CAC. Lemon-gold color and shimmering luster blend over each side, showing glints of rose mainly on the reverse. This sharply detailed commemorative dollar is boldly struck and virtually unmarked. A small die crack connects the rim to (LOUIS)I(ANA). Scarcely seen finer. NGC ID# 26HB, PCGS# 7444

1903 McKinley Gold Dollar, MS67
Impeccable Technical and Visual Quality

6716 1903 Louisiana Purchase/McKinley, MS67 PCGS. CAC. An impeccable butter-gold representative, this Superb Gem features vibrant mint frost over rose-tinted, mark-free surfaces. A high-powered loupe fails to yield any noticeable impairments, though a tiny alloy spot occurs in the left obverse field. The distribution of Louisiana Purchase commemorative gold dollars amounted to 35,000 pieces, 17,500 each of the Jefferson and McKinley types. Coins sold for \$3 each during the Exposition, but traded at steep discounts thereafter. PCGS reports just two submissions finer (7/15). NGC ID# 26HB, PCGS# 7444

6717 1904 Lewis and Clark MS64 PCGS. This boldly defined and fully lustrous yellow-gold commemorative exhibits reflective fields that create exceptional eye appeal. Housed in an old green-label PCGS holder. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS66
Lustrous, Technically Superior Example

6718 1904 Lewis and Clark MS66 PCGS. Strike quality and eye appeal are splendid for this lustrous, Premium Gem Lewis and Clark dollar. Surprisingly little metal flow exists along the margins as normally seen on the issue. Honey-gold fields and devices display mint frost and radiantly lustrous surfaces. Just 10,025 pieces were actually distributed from a production of 25,000 pieces, with the unsold coins melted. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS66
Beautiful, Impressively Preserved Example

6719 1904 Lewis and Clark MS66 PCGS. This commemorative issue is not absolutely scarce, despite its small production of 10,025 pieces, but it is conditionally scarce at the Premium Gem level, and rare any finer. This beautiful coin exhibits luminous green-gold and peach surfaces. The strike definition across each side is exceptionally sharp, and the surfaces are pristine. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS66

6720 1904 Lewis and Clark MS66 PCGS. The Lewis and Clark Exposition gold dollars were struck dated 1904 and 1905. The earlier issue is the more available of the two, but is nonetheless rare above the MS66 level. This Premium Gem is sharply struck, with satiny yellow-gold luster. The usual die stress flow lines appear in the fields around the peripheral legends. PCGS lists 20 finer examples (7/15). NGC ID# 26HC, PCGS# 7447

1905 Lewis and Clark Gold Dollar
Satiny MS65

6721 1905 Lewis and Clark MS65 NGC. This Gem 1905 Lewis and Clark gold dollar is well-struck and shows only minimal evidence of die stress in the peripheral fields, a characteristic to which this type is usually prone. The surfaces are devoid of major abrasions and show warm straw-gold luster, with a single coppery spot seen near OF. Scarce any finer. NGC ID# 26HD, PCGS# 7448

6722 1915-S Panama-Pacific Gold Dollar MS65 PCGS. This fully brilliant Gem exhibits light greenish yellow-gold surfaces with satin luster. The central obverse is a trifle weak as usual. NGC ID# 26HE, PCGS# 7449

6723 1915-S Panama-Pacific Gold Dollar MS65 NGC. CAC. The mintmark is nicely repunched southeast, a variety presently unlisted in *Cherry-pickers*. This lustrous peach-gold Gem has a sharp strike and exemplary preservation. NGC ID# 26HE, PCGS# 7449

6724 1915-S Panama-Pacific Gold Dollar MS65 NGC. CAC. Brass-yellow patination adorns the lustrous surfaces of this well-struck Gem. The CAC sticker confirms the coin's outstanding eye appeal. This issue is one of the most available and most popular commemorative gold dollars. NGC ID# 26HE, PCGS# 7449

6725 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Both the Panama Canal and the exposition celebrating its completion were monumental in scale and significance. The 1915 commemorative gold dollar may be physically small, but its design captures the importance of two the events. This splendid Gem has vibrant luster over lavender and yellow-gold surfaces with minimal marks. NGC ID# 26HE, PCGS# 7449

6726 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Most of the 15,000 Panama-Pacific gold dollars were distributed singly for \$2 each, and only a few hundred were likely sold as part of four or five piece sets. This gorgeous Gem is awash in frosty luster, and typical orange and rose-gold shades. There are no marks of note, and the CAC sticker is well-deserved. NGC ID# 26HE, PCGS# 7449

6727 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Daubs of deep orange color appear over the rose and lemon-gold surfaces. Charles Keck's design is crisply rendered, and coruscating mint frost rolls over each side. A total of 25,034 Panama-Pacific gold dollars were struck at the S-mint in 1915 (34 coins for assaying), but only 15,000 coins were distributed and the rest melted. NGC ID# 26HE, PCGS# 7449

6728 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Deep peach patina invigorates this satiny and virtually immaculate Gem. The fully struck surfaces displays traces of gunmetal-blue at the centers. Encased in a green label holder.
Ex: Dallas Signature (Heritage, 10/2012), lot 5238, which realized \$1,351.25. NGC ID# 26HE, PCGS# 7449

6729 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. The obverse Panama Canal worker and the reverse dolphins are allegories of labor and the transportation route created by the new waterway. Light butter-gold surfaces feature radiant mint frost and fully struck devices. Marks are virtually indistinguishable. An eye-appealing Pan-Pac gold dollar. NGC ID# 26HE, PCGS# 7449

6730 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Equal parts orange and yellow-gold in color, the surfaces of this Gem feature typical S-mint frost and boast phenomenal eye-appeal. Pan-Pac gold dollars sold well in 1915. Most coins were distributed to the public rather than wholesaled to dealers in bulk, as was the case with less popular commemorative issues. NGC ID# 26HE, PCGS# 7449

6731 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Rose overtones reside on the brilliant and highly lustrous yellow-gold surfaces of this frosty Premium Gem. PCGS has only certified 64 finer examples of this issue (7/15). NGC ID# 26HE, PCGS# 7449

6732 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC. Intense luster emanates from the yellow-gold surfaces of this lovely Premium Gem commemorative. The design features are uniformly well-defined. The CAC sticker affirms the coin's outstanding eye appeal. Finer pieces become very challenging. Indeed, PCGS has graded just 64 coins finer (7/2015). NGC ID# 26HE, PCGS# 7449

6733 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC. The yellow-gold surfaces of this Premium Gem Panama-Pacific commemorative gold dollar display a splash or two of deep reddish-gold on each side. Scintillating luster and sharply struck design elements enhance the coin's marvelous eye appeal. This piece is well-deserving of the CAC endorsement. PCGS has seen only 64 coins finer (7/2015). NGC ID# 26HE, PCGS# 7449

6734 1915-S Panama-Pacific Quarter Eagle AU50 NGC. Light yellow-gold surfaces retain traces of luster on this lightly circulated Panama-Pacific quarter eagle. It might have been carried for a short time as a pocket piece, or less likely, it may have actually entered circulation for a period of time. Regardless, the grade is unusual and this piece will certainly garner interest at the sale. NGC ID# 26HK, PCGS# 7450

**1915-S Quarter Eagle, MS65
Popular Panama-Pacific Issue**

6735 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. Farran Zerbe proposed and offered an extensive series of silver and gold commemorative coins for the event, including this quarter eagle. This Gem has frosty luster on brilliant light yellow-gold surfaces. A few copper toning spots are insignificant. NGC ID# 26HK, PCGS# 7450

**1915-S Quarter Eagle, MS65
Farran Zerbe's Panama-Pacific Issue**

6736 1915-S Panama-Pacific Quarter Eagle MS65 NGC. Numismatist Farran Zerbe was the guiding light for numismatic activities at San Francisco's Panama-Pacific International Exposition in 1915. The strike is a trifle weak at the central obverse of this brilliant and fully lustrous Gem. A few scattered marks prevent a higher grade. NGC ID# 26HK, PCGS# 7450

**1915-S Pan-Pac Two and a Half, MS65
Beautiful Reddish-Orange Patina**

6737 1915-S Panama-Pacific Quarter Eagle MS65 NGC. Superlative eye appeal is the hallmark of this Gem NGC-graded 1915-S Pan-Pac quarter eagle, a coin richly layered in mint luster and covered with an even, beautiful patina of reddish-orange. Some lighter wheat-gold accents appear in the interstices on the obverse, and there are no marks of any consequence. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Lovely Gem Example**

- 6738** 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. Gem-quality surfaces yield frosty wheat-gold luster with hints of peach and rose throughout. This Panama-Pacific quarter eagle is well-struck and slightly above-average for the issue in regards to technical quality. The issue had a distribution of only 6,749 pieces, the lowest in the five-coin Pan-Pac set behind the legendary round and octagonal fifties. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Minimally Abraded for the Issue**

- 6739** 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. Luminous yellow-gold with hints of orange and a touch of duskiness. Carefully preserved and all-around appealing, if softly struck as usual on Columbia's features. The Pan-Pac is rarely seen in high grade as abrasions are a consistent problem; thus, a minimally marked piece such as this one will be of great interest to collectors. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Frosty Premium Gem**

- 6740** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. Glowing yellow-gold mint luster illuminates the sharply rendered design elements of this Premium Gem Panama-Pacific quarter eagle. Close study with a loupe confirms the outstanding surface preservation, and the corresponding eye appeal is equally excellent. Finer representatives are infrequently encountered. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Two and a Half
Eye-Appealing MS66**

- 6741** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. The visual merit of this Premium Gem Pan-Pac quarter eagle draws from a combination of sharp motifs, smooth, frosty surfaces, and delicately intermingled peach, orange, and wheat-gold hues. It is difficult to imagine an aesthetically finer example of this popular commemorative in the MS66 grade. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Exceptional High-Grade Example**

- 6742** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. Responsibility for the design of this commemorative quarter eagle issue was originally assigned to sculptor Evelyn Longman of New York, but either due to her illness or a decision by Assistant Secretary of the Treasury William Moburn (alleged by Walter Breen and Anthony Swiatek in their 1981 *Encyclopedia of United States Gold and Silver Commemorative Coins*), the designs were actually executed by Mint personnel Charles Barber and George Morgan.

This Premium Gem example of the type shows mark-free surfaces and lovely pale gold coloration. The strike definition is exceptional, fully bringing up all elements of the classically-inspired design.

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3434. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Original MS66**

- 6743** 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC. This Premium Gem Panama-Pacific quarter eagle exhibits original, frosty surfaces with medium honey-gold luster. Some minor striking softness is seen on the forward eagle's feathers, but there are no major abrasions. This issue is scarce in finer grades, with only 38 coins so-certified at PCGS (6/15). NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Eye-Appealing MS67**

6744 1915-S Panama-Pacific Quarter Eagle MS67 NGC. The Panama-Pacific quarter eagle is scarce at the MS67 level, with this grade encompassing the finest-known examples. The present piece shows sharp motifs and frosty, beautifully preserved luster. Two-toned patina consists of well-balanced yellow and apricot-gold hues which impart outstanding eye appeal. This issue's limited distribution of 6,749 coins did not allow for large quantities of high-grade survivors.

From The Badger Collection. NGC ID# 26HK, PCGS# 7450

6745 1916 McKinley MS65 NGC. CAC. Vibrant luster issues from the orange- and yellow-gold surfaces that are imbued with hints of rose. Sharply impressed devices and impeccable preservation further enhance the coin's impressive eye appeal, aptly recognized by CAC. NGC ID# 26HF, PCGS# 7454

6746 1916 McKinley MS65 NGC. CAC. Peach-gold luster embraces this impressively struck Gem. Both surfaces are free of significant marks. The 1916 McKinley Memorial gold dollar has an estimated distribution of 15,000 pieces, helping to make it more available than its 1917 counterpart with an estimated 5,000-piece distribution. NGC ID# 26HF, PCGS# 7454

6747 1916 McKinley MS65 NGC. CAC. Both sides of this Gem commemorative gold dollar are awash with frosty luster and each exhibits well-struck design features. Yellow-gold coloration assumes deeper hues on the reverse. There are no marks or spots worthy of individual mention. NGC ID# 26HF, PCGS# 7454

6748 1916 McKinley MS65 PCGS. CAC. Mint-green and reddish-violet hues complement lemon-gold color overall. The obverse appears pristine to the naked eye, and the only visible impairment on the reverse is a minuscule tick between the two columns just left of the central statue. A total of 15,000 1916 coins were distributed compared to 5,000 1917 examples. NGC ID# 26HF, PCGS# 7454

6749 1916 McKinley MS65 PCGS. CAC. Caramel-gold and lime-green toning embraces this well preserved Gem. No marks emerge beneath a lens, and the strike is intricate save for minor blending on the left-side borders. Certified in a green label holder. NGC ID# 26HF, PCGS# 7454

6750 1916 McKinley MS65 PCGS. CAC. Light orange-gold tones surround blushes of deep sunburst-gold color at the central obverse. Yellow-gold relief elements on the reverse partly stand out against rose-gold fields. Minimal abrasions generally only appear under magnification. Top-notch eye appeal. NGC ID# 26HF, PCGS# 7454

6751 1916 McKinley MS65 PCGS. CAC. A fully struck Gem bathed in orange-gold and lime-green luster. The fields are immaculate, and the portrait high points show only trivial indications of contact. Certified in a green label holder. NGC ID# 26HF, PCGS# 7454

6752 1916 McKinley MS65 PCGS. CAC. This is an excellent McKinley gold dollar type coin, as the 1916 is far more available than its 1917 counterpart. Orange-gold surfaces display faint reddish-violet accents and frosty luster. The Barber-designed obverse appears softly impressed, while the Morgan design on the reverse is much sharper, as usual. NGC ID# 26HF, PCGS# 7454

6753 1916 McKinley MS65 PCGS. CAC. The McKinley gold dollar bears a portrait of the slain president on the obverse and an image of the Niles, Ohio memorial on the reverse for which the coins raised funds. This splendid Gem has lovely rose-gold surfaces and vibrant mint frost with minimal marks and strongly detailed motifs. NGC ID# 26HF, PCGS# 7454

**1916 McKinley Memorial Dollar, MS67
Splendid, Flawlessly Preserved Example**

6754 1916 McKinley MS67 PCGS. This is a splendid Superb Gem example of the 1916 McKinley Memorial gold dollar. Fully struck with shimmering mint luster and seemingly flawless surfaces. Only one coin has received a numerically higher grade: an MS68 example at NGC. Population: 90 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 26HF, PCGS# 7454

1916 McKinley Dollar, Patinated MS67+

- 6755 1916 McKinley MS67+ NGC.** Intended to raise funds for the McKinley birthplace memorial in Niles, Ohio, this 1916 and 1917 commemorative gold dollars saw minimal distribution. This extraordinary Superb Gem displays splashes of orange and powder-blue on its bright yellow surfaces. Census: 80 in 67 (3 in 67+, 2 in 67 ★), 1 finer (7/15). NGC ID# 26HF, PCGS# 7454

**1916 McKinley Memorial Gold Dollar
High-End Superb Gem, None Finer at PCGS**

- 6756 1916 McKinley MS67+ PCGS. CAC.** While the design was a tenuous collaboration between Charles E. Barber and George T. Morgan (Barber did the obverse, Morgan the reverse), the marketing of the McKinley gold dollars was even less coordinated, with only a total of 15,000 or so pieces sold dated 1916 or 1917. The 1916 pieces outnumber the 1917 issue approximately 2 to 1. This example is one of the finest survivors. Both sides are beautifully patinated in shades of lilac and rose-red over gleaming rich-gold surfaces. The obverse is more frosty, the reverse mostly prooflike. Exceptionally struck and problem-free for the issue, this lustrous Superb Gem McKinley dollar will be the centerpiece of an advanced commemorative gold collection. Population: 90 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 26HF, PCGS# 7454

- 6757 1917 McKinley MS65 PCGS. CAC.** The yellow-gold surfaces of this Gem display ebullient luster and are free of any significant marks. All design elements are well-defined. The CAC endorsement affirms the coin's magnificent eye appeal. NGC ID# 26HG, PCGS# 7455

1917 McKinley Dollar, Yellow-Gold MS67

- 6758 1917 McKinley MS67 PCGS.** The McKinley dollars are popular as a necessary part of a commemorative gold collection. Fewer 1917-dated coins were distributed than 1916 pieces and are more difficult to locate. Lustrous yellow-gold surfaces exhibit well-struck design features and are nicely preserved. Population: 69 in 67 (3 in 67+), 0 finer (7/15). NGC ID# 26HG, PCGS# 7455

-
- 6759 1922 Grant No Star MS65 PCGS. CAC.** A beautiful orange-gold example of this low mintage issue. Lustrous and free from evident abrasion. The strike is sharp save for the usual incompleteness on the tree trunk near the frame house window. Housed in a green label holder. NGC ID# 26HJ, PCGS# 7458

- 6760 1922 Grant No Star MS65 PCGS. CAC.** Attractive orange-gold patination with occasional wisps of yellow-gold cascades over the lustrous surfaces of this Grant No Star commemorative. Well-struck design features and impeccable preservation further heighten the coin's great eye appeal. NGC ID# 26HJ, PCGS# 7458

- 6761 1922 Grant No Star MS66 PCGS. CAC.** Bright yellow-gold luster emanates from both sides of this Premium Gem, each of which exhibits sharply struck design elements. Impeccably preserved surfaces further contribute to this coin's remarkable eye appeal. NGC ID# 26HJ, PCGS# 7458

1922 Grant No Star Dollar, Sharply Struck MS67

- 6762 1922 Grant No Star MS67 PCGS. CAC.** With a limited distribution of 5,000 examples the Grant No Star commemorative is very challenging in Superb Gem. Moreover, this issue is virtually unobtainable any finer. PCGS has seen none finer and NGC has graded only five examples higher (7/15). Lustrous orange-gold surfaces exhibit sharply struck design elements and are devoid of mentionable marks. NGC ID# 26HJ, PCGS# 7458

-
- 6763 1922 Grant With Star MS65 NGC. CAC.** The Grant with Star dollar is a key issue among earlier commemorative gold issues, partly due to its low production of only 5,016 pieces. Ebullient luster radiates from the orange-gold surfaces of this Gem offering. The design elements are sharply struck, and neither side reveals mentionable marks. NGC ID# 26HH, PCGS# 7459

- 6764 1922 Grant With Star MS66 NGC. CAC.** The bright yellow-gold surfaces of this Premium Gem display pleasing luster. Sharply struck design features and impeccable preservation round out the coin's stunning eye appeal. NGC ID# 26HH, PCGS# 7459

6765 1922 Grant With Star MS66 PCGS. CAC. Orange-gold color and attractive lavender accents dominate the carefully preserved surfaces of this Premium Gem gold dollar. The Grant With Star coins were struck to the extent of 5,000 coins (plus 16 assay pieces), and they sold for a \$0.50 premium over the No Star gold dollars (\$3.50 versus \$3). NGC ID# 26HH, PCGS# 7459

6766 1922 Grant With Star MS66 PCGS. CAC. The legislation providing for the production of Grant gold dollars initially stipulated a mintage of 200,000 coins, but that was later reduced to 10,000 pieces (5,000 of each type). Coruscating frosty luster and medium yellow-gold color account for the CAC endorsement. Pristine surfaces feature sharply struck motifs. NGC ID# 26HH, PCGS# 7459

6767 1926 Sesquicentennial MS65 PCGS. CAC. Lavender and orange hues grace the obverse, while the reverse shows primarily olive and reddish-gold coloration. Minor ticks on the scroll and in the left obverse field are hardly noticeable without a lens. Sesquicentennial quarter eagle output totaled 200,226 coins, and all but 49,019 pieces were melted. NGC ID# 26HL, PCGS# 7466

6768 1926 Sesquicentennial MS65 PCGS. CAC. Unlike the 1903 Louisiana Purchase and 1922 Grant commemorative gold dollars, the 1926 Sesquicentennial quarter eagle was sold to the public in large quantities, and examples are very scarce in higher grades. This highly lustrous Gem has boldly defined legends and motifs. Green and rose-gold hues color each side. NGC ID# 26HL, PCGS# 7466

**1926 Sesquicentennial Quarter Eagle
Vibrantly Lustrous MS66**

6769 1926 Sesquicentennial MS66 NGC. The undisturbed surfaces of this charming Sesquicentennial quarter eagle are aglow with varying peach and yellow-gold hues, with design elements that sharply detailed. This is the final gold issue in the classic commemorative series, distributed to the extent of 46,019 coins. Pieces grading finer than this Premium Gem are prohibitively rare, with just three such coins certified at NGC, and none at PCGS (7/15). NGC ID# 26HL, PCGS# 7466

☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000

LOT NO.	AMOUNT

LOT NO.	AMOUNT

Last Name: _____

Bid in whole dollar amounts only.

Please print your bids.

[illegible]

Please make a copy of this bid sheet for your records.

1 Internet

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 eMail

You can also

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGELive!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

7 Easy Ways to Bid

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$4,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A

REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot

lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-23-2015

SESSION THREE

TWENTY CENT PIECES

- 4579 1875 MS64 PCGS. BF-1, R.1.** Almond-gold toning evenly embraces this coruscating and crisply struck Choice twenty cent piece. A small gray spot accompanies the final A in AMERICA. A low mintage issue, relative to the plentiful 1875-S. Encapsulated in a green label holder.
From The Birmingham Collection. NGC ID# 23R5, PCGS# 5296
- 4580 1875 MS64 NGC. BF-1, R.1.** The low mintage introductory Philadelphia issue of the short-lived denomination. Nicely struck and coruscating with light straw-gold patina. The obverse field exhibits unimportant contact. The reverse is well preserved. Census: 47 in 64, 32 finer (6/15). NGC ID# 23R5, PCGS# 5296
- 4581 1875-CC AU50 PCGS. BF-2, R.1.** Dove-gray and golden-brown toning envelops this well defined and unblemished Carson City example. Portions of the eagle are incompletely brought up, but peripheral elements are well struck. NGC ID# 23R6, PCGS# 5297
- 4582 1875-CC AU53 PCGS. BF-2, R.1.** Luster brightens design elements of this Carson City type coin. The strike is typical but the caramel-gold and pearl-white surfaces are only lightly abraded. The mintage is much lower than its San Francisco cousin. NGC ID# 23R6, PCGS# 5297
- 4583 1875-CC AU58 PCGS. BF-3, R.4.** Brunner and Frost write that "the [BF-3] die marriage represents less than 5% of the surviving 1875-CC coins." Luster dominates the margins, and the untuned surfaces lack consequential contact. The strike is typical for this Carson City type issue. NGC ID# 23R6, PCGS# 5297
- 4584 1875-CC MS62 PCGS. BF-2, R.1.** A lovely almond-gold and stone-gray representative of the popular Carson City type emission. The fields are lustrous and lack consequential abrasions. The strike shows selected blending on the eagle's breast and the top of the left (facing) wing. NGC ID# 23R6, PCGS# 5297

1875-CC Twenty Cent, MS64
Rich Multicolor Toning

- 4585 1875-CC MS64 PCGS. BF-4, R.2.** Sea-green, orange-gold, and rose-red grace this dusky and coruscating Choice Carson City type coin. The strike is crisp except on stars 8 through 10 and a portion of the eagle's right (facing) claw. Marks are inconsequential, and the sole identifier is a small spot east of Liberty's head. NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent, MS65
Gem Type Coin

- 4586 1875-S MS65 PCGS. BF-16.** The mintmark is recut and the top of a misplaced 7 is evident in the dentils beneath the primary. This piece displays satin luster with light golden toning overall. Trivial softness on the highest points of the design elements is not unusual for this issue. The 1875-S is the most plentiful date in the short-lived twenty cent series, ideal for type representation. NGC ID# 23R7, PCGS# 5298
- 4587 1875-S Misplaced Date, FS-301, BF-12, R.2, MS64 PCGS.** The top of an 8 is misplaced in the dentils. Golden-brown and blue-green toning overlies lustrous pearl-gray surfaces. Well struck except on the uppermost stars. A lint mark (as made) connects the eagle's neck with the first S in STATES. PCGS# 395943 Base PCGS# 5298
- 4588 1876 MS64 PCGS. BF-2, R.2.** Dusky caramel-gold toning drapes this lustrous and crisply struck Choice double dime. Free from detrimental contact, and superior quality for the third party grade. Housed in a green label holder.
From The Birmingham Collection. NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR63
Introductory Issue in the Series

- 4589 1875 PR63 NGC.** The introductory twenty cent proof issue amounted to 2,790 coins. According to Breen's *Proof Encyclopedia*, 1,950 examples were struck during the second quarter and 840 pieces were minted in the second half of the year. The stone-gray obverse shows blushes of golden patina around the border and within the design recesses, while the reverse is more brilliant in appearance. Wispy marks on each side define the grade. NGC ID# 27GZ, PCGS# 5303

**1875 Twenty Cent, PR65
Vivid Peripheral Toning**

- 4590 1875 PR65 NGC.** The first-year proof in the twenty cent series, the 1875 is seldom seen in Gem or finer grades. This piece exhibits bold design definition and deeply mirrored fields. The centers show warm champagne toning with modest field-device contrast, while the peripheries display deeper amber-red and ocean-blue. Census: 17 in 65 (1 in 65+, 1 in 65+★), 19 finer (7/15). NGC ID# 27GZ, PCGS# 5303

1876 Twenty Cent, Toned PR65

- 4591 1876 PR65 PCGS.** A blend of rose-gold and pale olive toning over each side of this Gem proof allows modest contrast to persist between the sharp, frosty devices and the mirrored fields. There are no contact marks present and a few light hairlines are masked by the patina. Ideal for date representation in light of the scarcity of high-end circulation strikes. Population: 26 in 65, 13 finer (6/15). NGC ID# 27H3, PCGS# 5304

**1876 Twenty Cent, PR64 Deep Cameo
Lovely Two-Toned Contrast**

- 4592 1876 PR64 Deep Cameo PCGS Secure.** The proof 1876 twenty cent piece is not known for having strong field-device contrast, so it is quite a pleasant surprise to come across a Deep Cameo example in the affordable PR64 grade. This coin is boldly struck and possesses deep mirroring in the fields. Each side is accentuated by a touch of light golden toning overall with hints of ice-blue in the fields. Population: 4 in 64 (2 in 64+) Deep Cameo, 2 finer (7/15). PCGS# 95304

**1877 Twenty Cent, PR64 Cameo
Coveted Proof-Only Issue**

- 4593 1877 PR64 Cameo NGC.** Production of circulation-strike twenty cent pieces concluded in 1876, and only 510 proofs were struck in 1877 — the lowest proof total in the series. According to Ron Guth, only 20% of coins survive with a cameo finish. Each side of this near-Gem proof is brilliant and boldly contrasted with deep, watery mirrors that frame frosty motifs. Blushes of light golden patina grace the peripheries, and grade-limiting marks occur primarily in the obverse fields. Census: 24 in 64 Cameo (1 in 64 ★ Cameo), 27 finer (7/15). PCGS# 85305

**1878 Twenty Cent Piece, PR63 Cameo
Proof-Only Final Issue**

- 4594 1878 PR63 Cameo PCGS. CAC.** According to Mint records, a small production of 600 proof twenty cent pieces was accomplished in 1878, and no business-strikes were struck. The issue is always in demand as the final issue of the denomination. This attractive Select example offers sharply detailed design elements and deeply reflective fields with strong cameo contrast. The well-preserved surfaces are enhanced by shades of champagne-gold and cerulean-blue toning. Population: 15 in 63 Cameo, 37 finer (7/15). PCGS# 85306

EARLY QUARTERS

**1804 B-1 Quarter, Fine 12
Lowest Mintage Heraldic Eagle Date**

- 4595 1804 B-1, R.3, Fine 12 PCGS.** Tompkins Die State 2/2. The die scratch between stars 8 and 9 identifies B-1, the more available of the two varieties for this desirable low mintage date. A nicely detailed tan-brown and gunmetal-gray example. Minor adjustment marks (as made) are apparent on the reverse, below the central clouds.
Ex: FUN Signature (Heritage, 1/2008), lot 1085, which realized \$10,350. PCGS# 38921 Base PCGS# 5312

**1805 B-2 Quarter, Choice AU
Substantial Luster**

- 4596** 1805 B-2, R.2, AU55 PCGS. Tompkins Die State 2/2. An intermediate die state with light clash marks near Liberty's throat and the leftmost reverse stars. Medium golden-brown toning visits the margins of this partly lustrous example. Marks are minimal, though the obverse field displays faint hairlines and is moderately granular near the I in LIBERTY. Certified in an old green label holder. PCGS# 38924 Base PCGS# 5313

**1806 B-9 Quarter, XF40
Late Die State, Minimal Marks**

- 4597** 1806 B-9, R.1, XF40 PCGS. Tompkins Die State 6/5. A pleasing and nicely defined cream-gray and steel-blue representative. The only noticeable mark is a thin line on the shield. The central reverse is lightly brought up, as usual for B-9. A late die state with cuds, clashes, and a bisecting obverse crack. PCGS# 38935 Base PCGS# 5314

**1807 B-1 Quarter, AU53
Early NGC Holder**

- 4598** 1807 B-1, R.2, AU53 NGC. Tompkins Die State 1/2. Sea-green and golden-brown toning dominates this lightly worn but partly lustrous representative. The fields are virtually unabraded, although the portrait displays a few thin and unobtrusive marks. Encapsulated in an early, pre-hologram holder. PCGS# 38939 Base PCGS# 5316

BUST QUARTERS

**1818/5 Quarter, B-1, MS62
Original Toning**

- 4599** 1818/5 B-1, R.2, MS62 PCGS. Tompkins Die State 2/2, clashed. Two die pairings employ this overdated obverse (B-1 and -3), and these represent about a third of the Mint State 1818 quarter population. This B-1 example is well-struck and minimally abraded, with satiny mint luster. Mint-gold and sea-green peripheries lighten to lavender-gray and amber hues in the central regions. PCGS# 38953 Base PCGS# 5323

1818/5 B-1 Quarter, MS64

- 4600** 1818/5 B-1, R.2, MS64 NGC. Tompkins Die State 2/2. An intermediate die state, clashed but not cracked. Sea-green, golden-brown, and gunmetal-gray toning enriches this satiny and unmarked Choice quarter. The flag of the underdigit is apparent within the upper loop of the second 8. Census: 30 in 64 (2 in 64+), 12 finer (6/15). PCGS# 38953 Base PCGS# 5323

**1818 B-2 Quarter, MS64+
Boldly Clashed Dies**

- 4601** 1818 B-2, R.1, MS64+ NGC. Tompkins Die State 4/2. Both sides exhibit a double set of bold clash marks. This satiny near-Gem is lushly patinated jade-green and tan-brown. Careful inspection reveals only a lint mark on the cap and a few faint thin abrasions on the left obverse. 1818 Census: 55 in 64 (1 in 64+), 32 finer (6/15). PCGS# 38943 Base PCGS# 5322

- 4602** 1818 B-4, R.2, XF45 NGC. Tompkins Die State 1/1. Traces of luster emerge from design crevices of this attractively detailed and evenly struck stone-gray and almond-gold Choice XF example. No marks are visible to the unaided eye, although a loupe displays faint hairlines.
Ex: Long Beach Signature (Heritage, 2/2011), lot 3533, which realized \$1,380. PCGS# 38945 Base PCGS# 5322

4603 1819 Large 9, B-2, R.3, VF35 PCGS. CAC. Tompkins Die State 3/1. Deep cream-gray fields and motifs are bounded by golden-brown and apple-green borders. The reverse is well defined, while Liberty's curls display wear appropriate for the Choice VF level. From *The College Collection, Part Two*. PCGS# 38957 Base PCGS# 5326

4604 1819 Large 9, B-2, R.3, VF35 PCGS. CAC. Tompkins Die State 4/2. Deep dove-gray toning blankets this minimally marked Choice VF example. All letters in E PLURIBUS UNUM are bold. Among 1819 quarters, the Large 9 variety is much more elusive than its Small 9 counterpart. PCGS# 38957 Base PCGS# 5326

4605 1821 B-4, R.3, AU58 NGC. Luster illuminates the devices and margins of this lightly toned and minimally abraded near-Mint Bust quarter. A die scratch from a leaf tip to the rim is a characteristic of this Browning marriage. Ex: *New York Signature (Heritage, 3/2012)*, lot 3312. PCGS# 38966 Base PCGS# 5331

4606 1825/4/2 B-1, R.5, VF25 PCGS. Rarest of the three 1825-dated die varieties, and the sole marriage for the *Guide Book* 1825, 5 Over 2 entry. The blended cream-gray and walnut-brown surfaces are smooth save for minor field marks are noted near the crest of the eagle's right (facing) wing. PCGS# 38974 Base PCGS# 5337

4607 1825/4/(2) B-2, R.2, AU50 PCGS. Peach-gold toning illuminates the margins of this otherwise stone-white example. The well defined and mildly luminous surfaces are free from any mentionable marks. Encapsulated in a green label holder. PCGS# 38975 Base PCGS# 5336

**1825/4 B-2 Quarter, MS62
Richly Toned, High-End Example**

4608 1825/4/(2) B-2, R.2, MS62 PCGS. Lovely light original toning in hues of aquamarine and azure covers the lustrous surfaces, with gold-amber peripheries. Fairly well-struck, with all star centers well defined and Liberty's hair curls sculpted, but a bit of strike bluntness shows on the eagle's wingtips. The grade would be higher except for a light scrape from star 4 upward to the Liberty cap, while a second light scrape is noted to the right of the date. Still high-end in appearance, and an affordable example of this popular type. Ex: *Central States Signature (Heritage, 4/2006)*, lot 1477. PCGS# 38975 Base PCGS# 5336

4609 1828 25 Over 50C, B-3, R.5, Good 6 PCGS. Deep lavender-gray throughout aside from lighter cream toning on the reverse high points. All legends are bold except for E PLURIBUS UNUM, which is nonetheless partly readable. A challenging *Guide Book* blundered denomination variety. Ex: *Schaumburg Central States Signature (Heritage, 4/2012)*, lot 3934, which realized \$1,006.25. PCGS# 38979 Base PCGS# 5343

4610 1828 B-4, R.3, XF40 PCGS. Chestnut-gold and stone-gray toning embraces this unblemished and nicely defined Capped Bust quarter. A number of minuscule hairs are noted near the final two stars but no abrasions are readily evident. PCGS# 38978 Base PCGS# 5342

**1831 B-2 Quarter, MS63
Small Letters, Rich Patina**

4611 1831 Small Letters, B-2, R.2, MS63 NGC. Tompkins Die State 2/4 with advanced cracks across much of the reverse border. This fully struck Select Bust quarter is deeply patinated lavender, orange, and navy-blue. Luster dominates the margins and motifs. The reverse appears unabraded, and the obverse displays only unimportant marks. PCGS# 38981 Base PCGS# 5348

**1831 B-2 Quarter, MS64
Small Letters, Late Die State**

4612 1831 Small Letters, B-2, R.2, MS64 PCGS. Tompkins Die State 2/4. Untoned, silver-white surfaces display frosty luster and a sharp strike. Only a few small marks are widely distributed across the fields and motifs. Heavy die cracks encircle the periphery — from the base of the denomination through the arrowheads and ERICA of AMERICA, and at the top of UNITED STATES where small cuds have started to form between ED and ST. This near-Gem example approaches the lower end of the Condition Census for the variety, tied with several other MS64 coins. PCGS# 38981 Base PCGS# 5348

**1831 Quarter, MS64 Prooflike
B-4, Small Letters**

4613 1831 Small Letters, B-4, R.1, MS64 Prooflike NGC. Star 13 is close to the bust, and a radial crack passes through the C in 25 C. A crisply struck caramel-gold and stone-gray Choice quarter. Lightly marked overall, although we note a faint diagonal line on Liberty's cheek. As of (6/15), NGC has certified a total of 7 coins as Prooflike, with 3 among those at the MS64 level and only 1 graded finer. PCGS# 38983 Base PCGS# 5348

4614 1832 B-2, R.2, AU58 NGC. Tompkins Die State 2/2. Lavender, walnut-brown, and jade-green blend throughout this Borderline Uncirculated Bust type coin. Well struck and only lightly abraded. The "Wide 25 C" variety, moderately scarcer than its "Narrow 25 C" B-1 alternative. PCGS# 38988 Base PCGS# 5351

1832 B-2 Quarter, Near-Brilliant MS63

- 4615** 1832 B-2, R.2, MS63 PCGS. The 1832 is one of the less often seen dates in the reduced diameter Capped Bust type, particularly in Mint State. This Select example displays near-brilliant luster and minimal abrasions, with areas of semiprooflike mirroring in the fields. The top of Liberty's cap and star 6 are a trifle soft, but the motifs are otherwise well-defined. Population: 12 in 63 (1 in 63+), 14 finer (7/15). PCGS# 38988 Base PCGS# 5351

1834 B-1 Quarter, MS64 Prooflike O Over F in OF, FS-901

- 4616** 1834 O Over F in OF, B-1, FS-901, R.1, MS64 Prooflike NGC. Tompkins Die State 1/5. The borders display cartwheel luster but the fields show substantial reflectivity. A well struck near-Gem with a lightly toned obverse and moderate tan-gold and forest-green reverse patina. The variety with a blundered OF is relatively plentiful, but examples of the present quality are elusive. PCGS# 38992 Base PCGS# 5353

- 4617** 1834 B-4, R.1, MS62 NGC. Tompkins Die State 4/4. Tompkins writes, "the latest die stage (showing the shield bars clashed at the ear) is the rarest." Chocolate-brown and gunmetal-gray toning endow this well struck and satiny Capped Bust type coin. Minimally abraded and desirable. PCGS# 38995 Base PCGS# 5353

1834 Quarter, B-4, MS63 Capped Bust Type Coin

- 4618** 1834 B-4, R.1, MS63 PCGS. The obverse shows recutting on star 10 and the reverse is extensively cracked. As a date, the 1834 quarter is one of the more plentiful issues for the type in Mint State, but is nonetheless elusive above the MS63 grade level. This Select example shows a pleasing central strike and satiny luster, with aquamarine peripheries and pale champagne-gray centers. A few light luster grazes limit the grade. Population (all varieties included): 24 in 63, 60 finer (7/15). PCGS# 38995 Base PCGS# 5353

- 4619** 1835 B-4, R.3, MS62 NGC. Tompkins Die State 4/1. Lengthy cracks across the left-side stars and Liberty's chin identify this conditionally rare Browning variety. Mottled cobalt-blue, golden-brown, and stone-gray toning confirms the originality. The surfaces are minimally marked. PCGS# 39000 Base PCGS# 5354

- 4620** 1836 B-3, R.1, MS61 NGC. Tompkins Die State 5/4 with many advanced cracks. Golden-brown and navy-blue freckles dominate design recesses. The high points are stone-gray. A few moderate marks are noted on the field near the chin. PCGS# 39007 Base PCGS# 5355

SEATED QUARTERS

- 4621** 1840-O Drapery, Large O, FS-501, VG10 PCGS. Briggs 1-A. In his 1991 *Encyclopedia*, Larry Briggs referred to the Drapery, Large O variety as "the rarest collectible Seated Liberty quarter." The reverse dentils are die doubled. This pearl-gray representative is lightly abraded for the VG10 level. Most of LIBERTY is sharp. The variety is undesignated on the PCGS insert. *From The College Collection, Part Two.* PCGS# 395925 Base PCGS# 5398

- 4622** 1841-O MS63 PCGS. A Briggs-unlisted variety with the mintmark centered over the right half of the R in QUAR. Silver-gray and autumn-gold toning encompass satiny and unabraded surfaces. The eagle's neck shows incompleteness of strike. NGC ID# 23SL, PCGS# 5400

- 4623** 1841-O Doubled Die Obverse, Briggs 2-C, FS-101, MS63+ PCGS. The first two stars are strongly die doubled, as is the base of Liberty's shield. LIBERTY is blurry from doubling. A satiny example with stone-white fields and motifs. The borders display rich cobalt-blue and russet toning. The right-side stars and portions of the devices are lightly brought up. PCGS# 395924 Base PCGS# 5400

- 4624** 1842 Large Date AU58 PCGS. Briggs 2-B. Iridescent rose-red, lime-green, and lemon-gold toning visits well struck and semiprooflike surfaces. A low mintage issue. Abrasions are inconsequential aside from minor marks near the second S in STATES. Population: 3 in 58, 12 finer (7/15). NGC ID# 23SM, PCGS# 5401

- 4625** 1842-O Small Date VG10 PCGS. CAC. Briggs 1-A. A rare variety readily attributed by the crossbar of the 4, which does not extend past the right foot. The cream-gray surfaces are refreshingly unabraded. About half of LIBERTY is clear. *From The College Collection, Part Two.* NGC ID# 23SN, PCGS# 5403

- 4626** 1842-O Small Date Fine 12 PCGS. CAC. Briggs 1-A. The Small Date 1842-O quarter is significantly scarcer than its Large Date counterpart. Most survivors are well circulated. The present Fine example shows all letters in LIBERTY, although the LI are faint. The stars and border legends are well outlined. The cream and dove-gray surfaces are free from mentionable marks. *From The College Collection, Part Two.* NGC ID# 23SN, PCGS# 5403

1847-O Seated Quarter, AU58
Better New Orleans Issue

- 4627** 1847-O AU58 NGC. Briggs 1-B. Among pre-1853 Seated quarters, the New Orleans issues are collectively scarcer and more sought-after than their Philadelphia counterparts. This 1847-O representative has few superiors in Mint State. The Borderline Uncirculated surfaces retain hints of luster enough to illuminate mottled olive-gold and lilac-gray toning. The strike is a touch soft on the eagle's left (facing) leg, but the devices are otherwise well-detailed. Census: 7 in 58, 6 finer (6/15). NGC ID# 23SY, PCGS# 5411

1849 Seated Quarter, MS65
Elusive Melt Rarity

- 4628** 1849 MS65 NGC. Although the Philadelphia Mint coined 340,000 quarter dollars in 1849, most of those coins were hoarded and eventually melted by bullion speculators because of the rise of silver prices in relation to gold because of the abundance of gold found in California. The actions of those bullion speculators created a prize for present-day numismatists as few Mint State examples of this issue survive. NGC has only certified 31 Mint State examples of this issue that range from MS61 to MS65. To explain the rarity of these silver issues in relation to gold, consider the 1849 half eagle, having a mintage of only 133,070 coins, with 30 NGC certified Mint State examples ranging from MS60 to MS64. Clearly, gold coins from that era survived in greater proportion than silver coins.

The silver centers of each side blend into russet and charcoal-gray on the reverse, and into concentric rings of pale green, gold, sky-blue, and amber on the obverse. The strike is quite sharp throughout both sides, and there are few marks for the assigned grade, with copious eye appeal. Census: 3 in 65, 0 finer (10/13).

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection Part III (Heritage, 11/2013), lot 33366. NGC ID# 23T2, PCGS# 5413

- 4629** 1849-O Fine 12 PCGS. Briggs 1-A. The mintage of the 1849-O is unrecorded. Briggs (1991) estimated the production was 16,000 pieces. LIBERTY is mostly intact on this cloudy but minimally marked cream-gray and walnut-brown example. From *The College Collection, Part Two*. NGC ID# 23T3, PCGS# 5414

**1849-O Quarter, VF35
Scarce in All Grades**

- 4630** 1849-O VF35 PCGS. Briggs 1-A. The 1849-O is a semikey date in all grades. The mintage figure is unknown, included in that of the 1850-O which is reported at 412,000 coins. It is generally accepted that likely 16,000 1849-O quarters were produced. This Choice VF example is about in the middle of the certified population figures, with few finer coins known. The strike is exact and the motifs retain substantial detail. Deep olive-gray toning is visited by tinges of gold and crimson throughout each side. Population: 3 in 35, 22 finer (6/15). NGC ID# 23T3, PCGS# 5414

**1849-O Quarter, Choice AU
Rare New Orleans Issue**

- 4631** 1849-O AU55 NGC. Briggs 1-A. A single die marriage is known for the 1849-O, which has an unrecorded (but undoubtedly low) mintage. This briefly circulated example displays richly blended steel-gray and sea-green toning. The well defined surfaces exhibit occasional moderate field marks. Census: 3 in 55, 8 finer (6/15). NGC ID# 23T3, PCGS# 5414

**1850-O Seated Quarter, MS63
Upper-End for the Issue**

- 4632** 1850-O MS63 PCGS. Briggs 1-B. Overall, pre-1853 Seated quarters from New Orleans are scarcer than their Philadelphia counterparts, and the 1850-O is especially rare in Mint State. This golden-toned MS63 example is among the finer-known, with few peers and even fewer superiors. Luster is satiny overall, and the strike is sharp. Liberty's figure shows moderate die rust, as usual. Population: 7 in 63, 1 finer (7/15). *From The College Collection, Part Two.* NGC ID# 23T5, PCGS# 5416

- 4633** 1852-O — Questionable Color — PCGS Genuine. XF Details. Briggs 1-A. All letters in LIBERTY, the scroll edges, and the shoulder clasp remain bold on this lightly worn specimen and a planchet flaw near star 4 is the only mark of note. The surfaces are blanketed in dusky shades of slate-gray and amber toning. NGC ID# 23T9, PCGS# 5420

- 4634** 1853/53 No Arrows, Briggs 1-A, FS-301, VF20 PCGS. A meager 44,200 quarters were minted at Philadelphia in 1853, prior to the advent of Arrows Seated coinage. Much of the issue was likely melted. All No Arrows pieces were struck by the same obverse die, with repunching on the 53 in the date. A problem-free Very Fine example with tan-brown and stone-gray toning. *From The College Collection, Part Two.* PCGS# 395930 Base PCGS# 5421

**1853/53 No Arrows Quarter, XF40
FS-301, Recut Date**

- 4635** 1853/53 No Arrows, Briggs 1-A, FS-301, XF40 PCGS. CAC. The double punching of the 53 in the date is not always as pronounced as this example, but the entire mintage of 44,200 pieces for the No Arrows quarter was struck from the same die pair, so all 1853 No Arrows quarters are of the recut date variety. The current coin is shows deep-gray toning with lighter central motifs. LIBERTY is bold on the obverse shield. The fields and devices show only minimal marks, while the coin displays excellent eye appeal for the grade. Population: 5 in 40, 31 finer (7/15). *From The College Collection, Part Two.* PCGS# 395930 Base PCGS# 5421

- 4636** 1853 Arrows and Rays MS63 PCGS. Primarily silver surfaces show prominent splashes of pumpkin-orange and claret at the margins. A solid Select example of this one-year type with clash marks plain on the obverse. *From The College Collection, Part Two.* NGC ID# 23U4, PCGS# 5426

**1853 Arrows and Rays Quarter, MS64
Brilliant Mint Luster**

- 4637** 1853 Arrows and Rays MS64 PCGS. CAC. An unidentified die pair from literally dozens upon dozens of possibilities, with at least 119 obverse dies and 120 reverse dies prepared for usage when more than 15 million quarters with the Arrows and Rays motifs were struck in 1853. This sharp near-Gem is well-struck and extremely lustrous. The obverse stars show detail at their centers from one extent to another, with the right-hand stars not quite as sharp as those on the left. Liberty is well-struck at the head and throughout the portrait. The eagle shows full plumage. Intermittent smoke-gray toning adds original appeal to the mostly brilliant, silver-white surfaces. CAC endorsed. PCGS reports just 28 numerically finer pieces (7/15). NGC ID# 23U4, PCGS# 5426

**1853 Arrows and Rays Seated Quarter, MS65
Vibrant, Colorful Toning**

- 4638 1853 Arrows and Rays MS65 PCGS. Briggs 3-C.** While the obverse of this vibrantly toned quarter shows shades of ocean-blue, lime-green, and lemon-gold, the reverse is even more dramatic with deep, electric-blue and violet toning at the borders around a lustrous, reddish-gold center. The strike is sharp throughout, with even the reverse legend boldly struck. More than 15 million pieces were struck, and it is amazing only 28 Gem or finer coins exist at PCGS. Population: 18 in 65 (1 in 65+), 10 finer (7/15). NGC ID# 23U4, PCGS# 5426

**1854-O Quarter, VF25
FS-501, 'Huge O' Mintmark**

- 4639 1854-O Huge O, Briggs 1-A, FS-501, VF25 PCGS.** The Huge O mintmark was presumably entered by hand on the working die, resulting in its ungainly, irregular appearance. Larry Briggs notes that not only was the crude die work performed on the reverse, but nearly the entire obverse was recut as well including the stars, Liberty, the Arrows and the date. Indeed, on a well-circulated coin such as the current example, the figure of Liberty more closely resembles the Grim Reaper than a classic symbol of freedom. This mid-grade example is problem-free with pleasing old-silver color and few abrasions of any kind. A popular *Guide Book* variety — scarce in all grades. Population: 4 in 25, 25 finer (7/15). *From The College Collection, Part Two.* PCGS# 395933 Base PCGS# 5434

**1856-S/S Quarter, FS-501, XF45
Finest Certified at PCGS**

- 4640 1856-S/S Large Over Small S, Briggs 4-E, FS-501, XF45 PCGS.** A highly desirable overmintmark, one of the most important mintmark varieties not only in the quarter series, but also among all Seated Liberty coinage. The Small S beneath the Large S is obvious and dramatic. Currently, PCGS has identified just two examples since the start of their expanded variety identification system. The present coin is a sharp and original Choice XF with light, silver-gray patina and a hint of mint luster. Nearly 25 years ago, Larry Briggs recognized the variety as rare and unknown in Mint State. Population: 1 in 45, 0 finer (7/15). *From The College Collection, Part Two.* PCGS# 395935

- 4641 1857 MS65 PCGS. Briggs 2-B.** Lustrous and crisply struck with outstanding preservation and a hint of almond-gold toning. Both sides display a partial wire rim, most prominent near 3 o'clock on the obverse. Population: 46 in 65, 45 finer (6/15). *From The College Collection, Part Two.* NGC ID# 23TE, PCGS# 5442

- 4642 1857 MS65 PCGS.** This attractive Gem exhibits well-detailed design elements, with some flatness on the peripheral elements, and lustrous surfaces with no mentionable distractions, under shades of greenish-gold and lavender-gray patina. Population: 46 in 65, 45 finer (7/15). NGC ID# 23TE, PCGS# 5442

- 4643 1857-O MS62 NGC.** Vivid shades of golden-brown and magenta toning blanket the surfaces of this lightly marked MS62 example, with well-detailed design elements that show a touch of softness on some of the stars. Census: 6 in 62, 6 finer (7/15). NGC ID# 23TE, PCGS# 5443

**1857-O Quarter, MS63
Conditionally Rare New Orleans Issue**

- 4644 1857-O MS63 PCGS. Briggs 3-B.** The 1857-O is easily located in well circulated grades, but Uncirculated examples are undeniably rare. This unworn example has pearl-gray surfaces that show only incidental contact. A tiny mahogany spot, on the drapery above the I in LIBERTY, provides an identifier. Population: 7 in 63, 6 finer (6/15). NGC ID# 23TE, PCGS# 5443

- 4645 1858-S VF35 PCGS. CAC. Briggs 1-A.** The eagle's plumage is well defined and all of LIBERTY is sharp. The stone-gray and caramel-gold surfaces are smooth save for a thin line on the drapery above the 58 in the date. A scarce low mintage issue. PCGS has yet to certify an 1858-S quarter as Mint State, an indication that none were set aside by collectors until many years after issue. *From The College Collection, Part Two.* NGC ID# 23TK, PCGS# 5447

- 4646 1859 MS64 PCGS. CAC. Briggs 3-C.** This sharply detailed Choice example shows an extensive network of die cracks between letters in the reverse legend and the arrowheads. The lustrous surfaces are lightly marked and blanketed in dusky shades of greenish-gold and magenta toning. Population: 42 in 64 (2 in 64+), 13 finer (7/15). NGC ID# 23TL, PCGS# 5448

**1860-S Seated Quarter, Fine 15
Splendid Collector Coin**

- 4647 1860-S Fine 15 PCGS.** Problem-free examples of this San Francisco date are in the distinct minority. Just 56,000 pieces were struck and poured into the Old West commerce, only to be worn smooth or lost to attrition. This two-toned example is Choice and appealing, with steel-blue fields surrounding golden-gray devices. Sharp detail remains on the the shield scroll, rims, and dentils. The eagle retains much of its plumage. Population: 7 in 15, 22 finer (7/15).
From The College Collection, Part Two. NGC ID# 23TS, PCGS# 5453

**1860-S Quarter, Toned XF40
Rare This Fine**

- 4648 1860-S XF40 NGC. Briggs 1-A.** The 1860-S is rare, even though 56,000 pieces were struck. It is usually only found in Good to Fine condition, VF pieces are scarce, and XF coins such as this one are rare. Even wear is seen over the high points of the design, and deep gray and rose toning covers both sides. Census: 3 in 40, 6 finer (6/15). NGC ID# 23TS, PCGS# 5453

- 4649 1861-S Fine 15 PCGS. Briggs 1-A.** Like all S-mint quarter issues from the 1860s, the 1861-S has a low mintage. Just 96,000 pieces were produced. This stone-gray and charcoal representative is unmarked aside from a pair of hair-thin lines on the lower right drapery. All letters in LIBERTY are crisp, and the eagle's wings show partial plumage.
From The College Collection, Part Two. NGC ID# 23TU, PCGS# 5455

- 4650 1864-S VG10 PCGS. Briggs 1-A.** A rare Civil War issue with a stingy mintage of 20,000 pieces. The unmarked surfaces are stone-white aside from hints of deeper russet near the rims. BERTY is clear, as are all peripheral legends.
From The College Collection, Part Two. NGC ID# 23TZ, PCGS# 5460

- 4651 1864-S Fine 12 PCGS. Briggs 1-A.** A cream-gray Fine example of this challenging Civil War semikey. Protected areas display charcoal toning. Devoid of remotely consequential abrasions. The College Collection dispersal provides many opportunities for the Seated quarter specialist.
From The College Collection, Part Two. NGC ID# 23TZ, PCGS# 5460

- 4652 1864-S Fine 15 PCGS. Briggs 1-A.** Rich autumn-brown, lavender, and powder-blue toning blankets this low mintage Old West quarter. Nearly all of LIBERTY is sharp. Abrasions are confined to a diagonal line west of the date and a slight edge nick on the reverse at 1 o'clock.
From The College Collection, Part Two. NGC ID# 23TZ, PCGS# 5460

**1864-S Seated Liberty Quarter, XF40
Scarce San Francisco Issue**

- 4653 1864-S XF40 PCGS. Briggs 1-A.** A scarce and challenging S-Mint quarter, struck during a period of declining quarter mintages, during a time when all coinage was extensively hoarded (but not preserved) by the public. Just 20,000 pieces were struck. Those few coins that survive often show extensive wear from West Coast circulation. In contrast, this XF40 example retains strong detail on the motifs with only moderate high point wear. Olive-brown toning covers both sides, deeper at the margins. A small rim nick at 4 o'clock on the reverse and a short field indent midway between the drapery and star 11 are the sole marks of note. The 1 of the date shows repunching south. Population: 6 in 40, 9 finer (7/15).
From The College Collection, Part Two. NGC ID# 23TZ, PCGS# 5460

- 4654 1865 MS62 NGC. Briggs 1-A.** Delicate shades of pastel lavender and pale gold toning blanket the surfaces of this low-mintage issue, with well-detailed design elements and vibrant mint luster underneath. Census: 1 in 62, 12 finer (7/15). NGC ID# 23U2, PCGS# 5461

- 4655 1866 Motto VF25 PCGS. Briggs 1-A.** Silver coins did not circulate during 1866, except in the hard money West. The 1866 Philadelphia quarter only had a token production of 16,800 pieces, since the coins would be hoarded upon issue. The present charcoal-gray example has a sharp LIBERTY and lacks relevant marks, although the upper obverse field is faintly hairlined.
From The College Collection, Part Two. NGC ID# 23UB, PCGS# 5468

- 4656 1866 Motto VF25 PCGS. CAC.** Fractional currency drove out Seated silver in 1866, and the Philadelphia mintage was just 16,800 pieces. A gunmetal-gray quarter with bold legends and partial plumage. Careful inspection reveals faded thin marks near star 2 and the eagle's shield.
From The College Collection, Part Two. NGC ID# 23UB, PCGS# 5468

- 4657 1867-S VF20 PCGS. Briggs 1-A.** A pleasing cream and charcoal-gray Very Fine example. LIBERTY is crisp. A few letters in IN GOD WE TRUST are faint, but all are readable. Another challenging San Francisco issue. From the mintage of 48,000 pieces, only a handful survive as Mint State, and even Good examples are rare.
From The College Collection, Part Two. NGC ID# 23UE, PCGS# 5471

**1871 Quarter, MS65 Prooflike
Beautifully Reflective**

- 4658 1871 MS65 Prooflike NGC. Briggs 2-B.** This Gem 1871 quarter boasts beautifully reflective fields and frosty surfaces that are well within the context of the Prooflike designation. The strike is bold but not quite absolute, and the already-high eye appeal is furthered by the lovely ring of peach-gold toning encircling each side. The 1871 quarter issue was a low 118,200 circulation strikes — even though that was the largest production since the end of the Civil War. NGC reports four MS65 of this issue and one MS66 finer, but this is the sole Prooflike in any grade (6/15). PCGS# 85478 Base PCGS# 5478

**1871-CC Quarter, Very Good 8
Full Rims, Smooth Wear**

- 4659 1871-CC VG8 PCGS. Briggs 1-A.** A combination of factors — some mechanical, some political, and some based on simple supply and demand — limited the mintages of quarters at Carson City until 1875. The early years of the mint provided only token mintages, which were soon absorbed into channels of commerce and few coins survive. This example offers smooth surfaces with full rim detail and attractive, medium-silver color. All of the letters of LIBERTY are visible to one extent or another, and the eagle's wings retain some feather detail. Just 10,8980 pieces were struck of the 1871-CC quarter, with PCGS reporting just 39 total grading events, many in lower grades than the present coin. Population: 4 in 8, 24 finer (7/15).

From The College Collection, Part Two. NGC ID# 23UN, PCGS# 5479

- 4660 1871-S VF25 PCGS. Briggs 1-A.** Half dollars were the favored silver denomination in California, prior to the advent of the Morgan dollar. Although 2,178,000 1871-S halves were coined, the quarter mintage was limited to 30,900 pieces. They were not saved, and today the issue is rare in all grades. The present gunmetal-gray example has moderately granular and displays field marks near Liberty's left (facing) shoulder. LIBERTY is bold.

From The College Collection, Part Two. NGC ID# 23UP, PCGS# 5480

- 4661 1872 MS63 NGC. Briggs 1-A.** Satiny and sharply struck with smooth fields and an unobtrusive mark on Liberty's thigh. Brilliant save for minor dashes of gray toning near stars 1 and 3. The mintage is low relative to the large production issues from the mid-1870s. NGC ID# 23UR, PCGS# 5481

**1872 Seated Quarter, MS65
Lustrous and Prooflike**

- 4662 1872 MS65 PCGS. Briggs 2-B.** Brassy gold patina displays a freckling of blue overtones with prooflike fields on both sides of the coin. The issue is scarce in all Mint State grades, but especially so in Gem or finer condition, where the issue is better described as rare. Conceivably, much of the 182,000-piece mintage was melted in 1873, when the Arrows weight change took place. An exceptional example of an overlooked date, with just one piece finer at PCGS. Population: 2 in 65, 1 finer (6/15). NGC ID# 23UR, PCGS# 5481

- 4663 1872-CC Good 6 PCGS. Briggs 1-A.** The date and mintmark are bold. Four letters in LIBERTY are clear, and nearly half of IN GOD WE TRUST is readable. The stone-gray surfaces are unblemished. A rare Carson City emission. As of (6/15), PCGS has certified a total of 67 pieces, including two pieces as Fair 2.

From The College Collection, Part Two. NGC ID# 23US, PCGS# 5482

- 4664 1872-CC Good 6 PCGS. CAC. Briggs 1-A.** An evenly circulated but problem-free example of this early and rare Carson City issue. BERT is clear, and the neighboring I and Y are partial. QUAR DOL is faint but all stars are well outlined.

From The College Collection, Part Two. NGC ID# 23US, PCGS# 5482

**1872-CC Seated Quarter, Fine 15
Original Surfaces, Pleasing Color**

- 4665 1872-CC Fine 15 PCGS. Briggs 1-A.** Full rims and dentils are seldom seen at the Fine grade level, since many lower-grade coins lack edge detail between 10 and 2 o'clock on the obverse. The reverse is likewise weak below the denomination. This Choice Fine example is an exception, with complete borders and exceptional detail for the grade. All of the raised elements show above-average definition for the grade. Rich-silver patina blankets both sides for sharp eye appeal, and there are no distracting marks or abrasions. The Motto is fully readable, quite rare this nice. Population: 4 in 15, 24 finer (7/15).

From The College Collection, Part Two. NGC ID# 23US, PCGS# 5482

1872-S Quarter, Fine 15
Elusive San Francisco Key

- 4666 1872-S Fine 15 PCGS. CAC.** A small mintage of just 83,000 pieces may not have been released into circulation promptly, and some of the mintage may have been melted as a result of the 1873 weight change. Few pieces exist today in any grade. This is one of the nicer representatives of the grade level, with only moderate wear and no problems. Deep-gray accents surround the medium-gray devices. Choice and CAC endorsed. Population: 4 in 15, 23 finer (7/15). *From The College Collection, Part Two.* NGC ID# 23UT, PCGS# 5483

1872-S Quarter, Fine 15
Rarest S-Mint, Probable Melt Issue

- 4667 1872-S Fine 15 PCGS. CAC. Briggs 1-A.** Remarkably, we have two examples of this rare San Francisco issue in this sale, both in Choice Fine condition with CAC endorsement. The present example shows reasonably strong rims and light-to-dark toning on the obverse, with an even medium-gray color on the reverse. Substantial feather detail remains on the eagle's wings, and IN GOD WE TRUST is fully readable. On the obverse, LIBERTY retains all of its letters. Population: 4 in 15, 23 finer (7/15). *From The College Collection, Part Two.* NGC ID# 23UT, PCGS# 5483

1873 No Arrows, Closed 3 Quarter, VF35
Always In Demand, Few Pieces Exist

- 4668 1873 Closed 3 VF35 PCGS.** Much as the 1872-S quarters are believed to have been melted prior to the 1873 weight change, the 1873 Philadelphia issue faced the same fate. Struck before the No Arrows dies with an Open 3 were prepared — and also before the 1873 Arrows Open 3 quarters were struck — a brief mintage of 40,000 Closed 3 quarters was produced. An unknown but apparently small number of pieces were released into circulation. This VF survivor displays smooth, partially reflective fields with Choice, well-detailed surfaces. Silver-gray toning shows deeper shades around the devices. Always in demand by type and variety collectors. Population: 5 in 35, 19 finer (7/15). *From The College Collection, Part Two.* NGC ID# 23UU, PCGS# 5484

1873 Arrows Quarter, MS65
Sharp, Frosty Luster

- 4669 1873 Arrows MS65 PCGS. Briggs 3-B.** A two-year type (1873 and 1874) with Arrows at either side of the date. More than 1.2 million pieces were struck in 1873. The slight increase in silver content helped reestablish circulating coinage in the country almost overnight. Some pieces were saved and carefully preserved, but not many — this sharply struck example is one of the few. Attractive coppery-gold toning provides a distinctive patina over the frosty, virtually unmarked surfaces. Lilac-gray overtones circulate with the cartwheel luster. Population: 12 in 65, 9 finer (7/15). NGC ID# 23VU, PCGS# 5491

**1873-CC With Arrows Quarter, Good 4
A Rare, Unimpaired Example**

4670 1873-CC Arrows Good 4 PCGS. Briggs 1-A. Carson City and Seated quarter specialists alike seldom have the opportunity to acquire an untroubled example of the 1873-CC Arrows issue. While the 12,462-piece mintage is about average for the first dates of the Carson City quarter series (1870 to 1873), problem-free examples are seldom seen and disappear quickly into collector hands. This example shows plenty of smooth wear but retains pleasing detail on the devices. The rims show wear into the reverse legend, but all letters are visible. Likewise, all stars are present on the obverse. Sporadic blue-gray toning visits the medium-silver surfaces on both sides. Population: 2 in 4, 45 finer (7/15).
From The College Collection, Part Two. NGC ID# 23VV, PCGS# 5492

4671 1875-CC — Cleaning — PCGS Genuine. UNC Details. Briggs 1-A. The first C in the mintmark is centered over the R. Bright, untuned surfaces are not overly affect the noted cleaning, and this remains a highly desirable Uncirculated example of a challenging Carson City date (only 140,000 coins). The devices are strongly defined aside from trivial softness on star 13. NGC ID# 23UY, PCGS# 5499

1876-CC Quarter, Lightly Toned MS65

4672 1876-CC MS65 PCGS. The 1876-CC is one of the most plentiful Seated Liberty quarters from Carson City, ideal for the collector seeking a single high-grade example from this mint. This Gem representative is well-struck, with frosty mint luster that displays a light blush of rose-gold toning. Population: 22 in 65, 9 finer (7/15). NGC ID# 23V3, PCGS# 5502

**1876-CC Seated Quarter, Stunning MS66
Multicolor Patina and a Bold Strike**

4673 1876-CC MS66 PCGS. CAC. Briggs 5-D. Stunning patina graces each side of this Premium Gem in shades of pearl, rose, mint, and aqua. The strike is well-impressed, considering that the dies show signs of rusting on the portrait of Liberty, and the peripheries on each side are encircled by die cracks. A beautiful and interesting coin, among the few finest from the generous mintage approaching 5 million coins. Population: 6 in 66, 3 finer (7/15). This piece is one of two in MS66 with the CAC green approval.
Ex: Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98362. NGC ID# 23V3, PCGS# 5502

4674 1876-S MS65 PCGS. Type Two Reverse. Ocean-blue and straw-gold toning visit this lustrous and sharply struck Gem. Both sides display only trivial contact, although we note a small spot above the arrow shafts near the claw. Population: 23 in 65 (1 in 65+), 5 finer (6/15). NGC ID# 23V4, PCGS# 5503

1876-S Quarter, MS66

Ex: Eliasberg

4675 1876-S MS66 PCGS Secure. CAC. Ex: Eliasberg. Type Two Reverse. Pearl-gray and pale lilac tones on the obverse show accents of orange, the latter color spreading on the reverse to dominate the color palette. Population: 5 in 66, none finer (7/15).
Ex: Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 4/1997), lot 1517; Joseph O'Connor (8/2010). NGC ID# 23V4, PCGS# 5503

**1877 Quarter, MS66
Vibrant Multicolor Patina**

4676 1877 MS66 PCGS. Forest-green, cherry-red, and sun-gold toning embrace this coruscating and crisply struck Premium Gem. Marks are mostly limited to a single thin field line near star 13. Spindly die cracks traverse the reverse periphery. All business strike 1877 quarters have a Type Two Reverse, although some proofs (Briggs 1-A) have a Type One Reverse. Population: 60 in 66 (3 in 66+), 47 finer (6/15). NGC ID# 23V5, PCGS# 5504

**1878 Quarter Dollar, MS66
Among the Finest Certified**

- 4677 1878 MS66 PCGS.** Both sides of this Premium Gem display a progression from pale yellow in the centers to gold-green and aqua. Better-defined at centers than margins, though the all-around eye appeal is uniform. Neither PCGS nor NGC has graded a Superb Gem example of the issue. Population: 9 in 66 (1 in 66+), 0 finer (7/15).
Ex: Central States Signature (Heritage, 4/2012), lot 3966. NGC ID# 23V8, PCGS# 5508

**1885 Quarter, Richly Toned Gem
Highly Prized Low-Mintage Date**

- 4678 1885 MS65 PCGS.** A small run of 13,600 coins makes the 1885 a highly prized date in all grades. Variegated shades of blue, green, violet, rose, and orange toning paint surfaces that retain considerable underlying brightness in the fields. The devices are sharply struck, save for typically incomplete stars along the right obverse. The patina subdues the semiprooflike contrast, but has the added effect of concealing grade-limiting marks. Population: 16 in 65, 23 finer (7/15). NGC ID# 23VH, PCGS# 5517

**1885 Quarter, Frosty MS66
Vibrant Mint Bloom**

- 4679 1885 MS66 PCGS. Briggs 2-A.** Radiant, frosty luster shows just a few hints of light golden toning on each side of this Premium Gem 1885 quarter, and only a few stray lines in the obverse fields preclude a full MS67 grade. The eagle is boldly defined, although the right-hand obverse stars are weak. This issue had a limited 13,600-coin mintage, and survivors are seldom seen this well-preserved. Population: 17 in 66 (2 in 66+), 4 finer (6/15).
From The Birmingham Collection. NGC ID# 23VH, PCGS# 5517

- 4680 1886 VF25 PCGS. CAC. Briggs 1-A.** The low mintage 1886 business issue is a great rarity in VF grades, since a majority of the 200 or fewer survivors are Mint State, secured by dealers local to the Philadelphia Mint. This sea-green and autumn-gold quarter has a crisp LIBERTY and GOD WE TRUST. We note a small dig between the first two stars, and a nick on the reverse rim at 1 o'clock.
From The College Collection, Part Two. NGC ID# 23VJ, PCGS# 5518

- 4681 1886 VF30 PCGS. Briggs 1-A.** A business mintage of 5,000 pieces ensures the rarity of the 1886. Midgrade examples are seldom encountered, since a majority of survivors are in Mint State. This is a well defined, minimally marked, and microgranular charcoal-gray example. A retained lamination is noted above star 8. NGC ID# 23VJ, PCGS# 5518

**1886 Quarter, Prooflike MS66
5,000 Coins Struck, Only Two Finer at PCGS**

- 4682 1886 MS66 PCGS.** There was little need, if any, for additional quarters throughout the 1880s, as the Treasury vaults contained sufficient quantities from previous years to satisfy demand. The 1886 has not only the lowest mintage of the decade, but one of the smallest productions in the entire series (5,000 coins). This prooflike Premium Gem has flashy mirrors overlaid in delicate golden patina. Sharply struck devices are lightly frosted with trivial softness on the date and olive leaves. Population: 17 in 66 (1 in 66+), 2 finer (7/15). NGC ID# 23VJ, PCGS# 5518

1887 Seated Quarter, Vibrant MS67

- 4683 1887 MS67 PCGS. Briggs 1-A.** This glowing Superb Gem is tied with just 10 others as the finest at PCGS (7/15), suitable for type purposes. The luster is frosty and undisturbed, although accented by blended olive-gray, lavender, and bluish-gold toning on each side. The strike is bold on the reverse, but several obverse stars lack full centrals. NGC ID# 23VK, PCGS# 5519

1888-S Quarter, MS65
Few High-Grade Survivors

- 4684 1888-S MS65 NGC. Briggs 4-D.** The 1888-S quarter was the sole respite from a decade-long run of tiny quarter mintages that stretched from 1879 to 1889. More than 1.2 million pieces were struck and, apparently, they were sorely needed in commerce because few high-grade coins survive. This semiprooflike representative displays areas of cerulean-blue and peach-gold toning and a sharp strike on the raised elements. LIBERTY is bold, unlike some examples of the issue. Census: 13 in 65, 7 finer (6/15). NGC ID# 23VN, PCGS# 5521

- 4685 1891 MS65+ NGC.** 1891 was the first year of significant mintages of quarters at Philadelphia since the Morgan dollar was introduced in 1878. The present Gem displays light chestnut-gold and blue-green toning, mostly along the margins. Lustrous and unabraded with heavy clash marks and several peripheral cracks. NGC ID# 23VR, PCGS# 5524

- 4686 1891-O Fine 15 PCGS. CAC. Briggs 1-A.** After a gap of 31 years, New Orleans again struck Seated quarters, just in time for the series' swan song. The mintage of 68,000 pieces is low, and examples are scarce to rare in all grades. This Choice Fine quarter has streaky silver-gray surfaces that lack mentionable abrasions. Most of IN GOD WE TRUST is readable.
From The College Collection, Part Two. NGC ID# 23VS, PCGS# 5525

1891-O Quarter, Frosty MS63
Low-Mintage Issue

- 4687 1891-O MS63 PCGS. Briggs 1-A.** A scarce New Orleans date in Mint State. Only 68,000 pieces were struck of this final-year issue in the Seated quarter series. Surviving Mint State examples are rare (we have only offered nine different Uncirculated examples in the past 15 years). This Select Uncirculated coin is more frosty than reflective, with areas of die clashing visible on both sides. The strike is sharp on the eagle but slightly weak at Liberty's head. A thin skin of bronze-gold toning covers both sides, with radiant, cartwheel mint luster adding considerable eye appeal. Population: 2 in 63, 4 finer (7/15). NGC ID# 23VS, PCGS# 5525

PROOF SEATED QUARTERS

1860 Seated Quarter, PR65
Some Field-Motif Contrast

- 4688 1860 PR65 PCGS. Briggs 9-H.** The proof 1860 Seated quarter is rare in Gem or better grades, with or without cameo contrast. This piece shows deeply mirrored fields and the only notable striking softness is seen on the left-hand obverse stars. Lavender-gold centers yield to deeper blue-gray peripheries, leaving a hint of field-device contrast on each side. Population: 18 in 65, 7 finer (7/15). NGC ID# 23WM, PCGS# 5556

1861 Seated Quarter, PR65
Lovely Multihued Patina

- 4689 1861 PR65 PCGS. CAC. Briggs 7-E.** An unmistakable combination of broad rims, sharp motifs, and gleaming mirrors confirms the proof status of this Gem 1861 Seated quarter, one of 1,000 pieces struck. The centers show warm sun-gold and lavender hues, while the peripheries exhibit deeper mint-green and ocean-blue toning. Few examples are known finer. Population: 5 in 65, 4 finer (6/15). NGC ID# 23WN, PCGS# 5557

- 4690 1862 PR64 PCGS. Briggs 5-E.** A sharply detailed Choice example from a small wartime proof mintage of 550 pieces, this coin offers deeply mirrored fields and lightly toned surfaces with only minor signs of contact. Population: 43 in 64, 21 finer (7/15). NGC ID# 23WP, PCGS# 5558

- 4691 1863 PR64 PCGS. Briggs 4-D.** A fully struck Choice Civil War quarter. The obverse displays light honey toning, while medium golden-brown patina adorns the reverse. Flashy and undisturbed. A scant 460 proofs were produced. NGC ID# 23WR, PCGS# 5559

- 4692 1863 PR64 PCGS.** A fully struck and unmarked near-Gem. The raised elements are frosty and moderately contrast with the pale straw-gold fields. The reverse die is Briggs-D, confirmed by the doubling on QUAR DOL, but the obverse die is not Briggs-4 since the date location differs. NGC ID# 23WR, PCGS# 5559

**1868 Quarter, PR65 Cameo
Intricate Strike, Reflective Fields**

- 4693** 1868 PR65 Cameo PCGS. Briggs 2-B. Rose-red and cobalt-blue embrace the margins, but the fields and motifs remain mostly brilliant. The sharply struck devices are evenly frosty, and the flashy fields appear unblemished. Population: 4 in 65 (1 in 65+) Cameo, 2 finer (6/15). PCGS# 85567

**1869 Quarter, PR65 Cameo
Attractive Toning**

- 4694** 1869 PR65 Cameo PCGS. CAC. Briggs 2-B. The proof obverse is die doubled, most noticeably on the shield lines and the lower edge of Liberty's gown. This is a beautiful Gem Cameo example with sharp, frosty devices and deeply mirrored fields. Light champagne overall, with tinges of blue, violet, and amber around the peripheries. Population: 4 in 65 Cameo, 3 finer (7/15). PCGS# 85568

**1871 Seated Quarter, PR66
Richly Toned**

- 4695** 1871 PR66 PCGS Secure. Ex: Bruce Scher. Intensely toned green, blue, and violet on the obverse with a small window of silver-frost hints at strong field-device contrast. The reverse has similar hues, better reflectivity, and additional peach color. A Premium Gem proof with great charm. Population: 5 in 66 (1 in 66+), 0 finer (7/15). NGC ID# 23X4, PCGS# 5570

- 4696** 1872 PR66 NGC. Briggs 3-C. Much of the business strike mintage of 182,000 pieces was undoubtedly melted in 1873, placing greater date pressure on the 950 proofs. This is a splendid, upper-end specimen, one of the finest known. The fields are brightly reflective and each side has a near-brilliant center that is surrounded by golden-brown and cobalt-blue toning at the rims. Census: 8 in 66, 3 finer (7/15). NGC ID# 23X5, PCGS# 5571

- 4697** 1873 No Arrows PR65 PCGS. Briggs 1-A. Lavender and olive-green toning blankets the obverse of this intricately struck and flashy Gem. The reverse shows orange-gold and lilac shades. Beautiful and undisturbed. NGC ID# 23X6, PCGS# 5572

**1873 No Arrows Quarter, PR67 Cameo
Among the Finest Certified at PCGS**

- 4698** 1873 No Arrows PR67 Cameo PCGS. CAC. Ex: Simpson. The 1873 No Arrows proof quarters were struck early in the year before the date was changed to the so-called Open 3 logotype. Only 600 pieces were produced, with some ending up in circulation. Still, this issue is available in grades through MS64, and Gems can be found with searching, but finer pieces are rare.

This piece exhibits sharply struck, satiny devices set against mirrored fields that display tinges of lavender-gold and aquamarine toning, with a few mint-green accents around the extreme outer peripheries. The preservation is exceptional, with no contact marks or discernable hairlines in the fields. Population: 4 in 67 (2 in 67+) Cameo, 0 finer (7/15). PCGS# 85572

**1879 Quarter, Colorful PR67
Blatantly Original Surfaces**

- 4699** 1879 PR67 NGC. Briggs 2-B. Briggs' reference makes the enigmatic comment: "Mint records show proof mintage of 250 while 1100 proof sets were issued. Many of the 1100 are presumed to be of other dates or business strikes." If this statement is true, it leaves us with an uncertain, but undoubtedly lower number of proofs than the official mintage of 1,100 pieces.

One would be hard-pressed to locate a more blatantly original representative of this late-date proof delivery than the current Superb Gem. The obverse is toned cobalt-blue with a swath of lilac-pink iridescence near the upper-left border. The reverse shows soft, lilac-gray patina and flickers of electric-blue and pink iridescence at the denticles. The surfaces are uniformly sharply impressed and blemish-free. A suspiciously high number of 10 Superb Gem proofs have been certified by NGC, leading us to suspect several resubmissions among that number. Contrast that to the PCGS population of a single PR67. None are finer at either service (7/15).

Ex: Long Beach (Heritage, 10/2001), lot 6323; purchased by Eugene Gardner from Ron Iskowitz (11/2001); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98391. NGC ID# 23XB, PCGS# 5580

**1882 Seated Quarter, PR66 Deep Cameo
Just One Finer at PCGS**

- 4700 1882 PR66 Deep Cameo PCGS. CAC.** The present coin is an exquisite Premium Gem, with dramatic white-on-black cameo flash. The devices display creamy mint frost, and the fields are fathomless in their depth of reflectivity. Although a generous mintage of 1,100 proof Seated Liberty quarters was accomplished in 1882, only 15,200 business strikes were produced, putting substantial date-set pressure on the supply of proofs. Population: 2 in 66 Deep Cameo, 1 finer (6/15). PCGS# 95583

- 4701 1883 PR64 PCGS. CAC. Briggs 1-A.** An intricately struck, brilliant, and flashy Choice proof. Icy motifs provide obvious contrast with glassy fields, although undesignated as Cameo due to the circa-2000 generation of the PCGS holder. NGC ID# 23XF, PCGS# 5584

- 4702 1883 PR65 Cameo NGC. Briggs 1-A.** Rose-red and aquamarine enrich this fully struck and well preserved Gem. The right obverse and upper left reverse are close to brilliant. Per Briggs, the tops of 83 digits are misplaced within the dentils beneath the date. PCGS# 85584

- 4703 1884 PR64 PCGS. CAC. Briggs 2-B.** A fully struck near-Gem with chestnut-gold and ice-blue toning. The motifs are frosty but the field reflectivity is slightly muted. Formerly lot 526 in an unknown Numismatic Gallery (Abe Kosoff) auction, held at 42nd East 50th Street in New York City. NGC ID# 23XG, PCGS# 5585

**1884 Quarter Dollar, PR67 Cameo
Excellent Contrast**

- 4704 1884 PR67 Cameo NGC.** Although technically displaying the slightest possible champagne toning, most observers would describe this Superb Gem Cameo proof as brilliant and untuned. Both sides exhibit bold design features and excellent field-to-device contrast. Census: 6 in 67 Cameo (1 in 67 ★ Cameo), 4 finer (7/15). PCGS# 85585

- 4705 1885 PR65 PCGS. Briggs 3-B.** Rich cobalt-blue, apple-green, and golden-brown toning embraces this fully struck and undisturbed Gem. Both sides exhibit a partial wire rim. One of only 930 proofs produced. From *The College Collection, Part Two*. NGC ID# 23XH, PCGS# 5586

**1886 Quarter, Lovely PR67+
Finest Non-Cameo at PCGS**

- 4706 1886 PR67+ PCGS. CAC. Briggs 2-B.** An exceptional Superb Gem proof, devoid of contact marks or hairlines and patinated in rich lavender-gray, gold, violet, and pine-green hues. The fields are deeply mirrored and the only weakness in the relief elements is trivial softness on the left obverse stars, not unusual for the issue. The obverse exhibits modest cameo contrast. Population: 10 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 23XJ, PCGS# 5587

- 4707 1887 PR64 PCGS. CAC. Briggs 2-B.** Attractive ocean-blue and olive-gold toning endows this moderately mirrored and well struck near-Gem. Impressive for the designated grade, and one of only 710 proofs produced. NGC ID# 23XK, PCGS# 5588

- 4708 1887 PR66 PCGS. Briggs 2-B.** Soft luster is overlaid by rich copper-gold and cerulean-blue patina. Generally well-struck, with no major marks to report and outstanding eye appeal. Population: 27 in 66, 4 finer (7/15). NGC ID# 23XK, PCGS# 5588

**1887 Seated Quarter, PR68
Pleasing Peripheral Patina**

- 4709 1887 PR68 NGC. Briggs 2-B.** Rich navy-blue, ruby-red, and autumn-brown toning endows the peripheries of this fully struck and flashy specimen. The motifs are icy and the glassy fields are pristine. One of only 710 proofs struck for this low mintage date. Census: 2 in 68, 1 in 68+ ★ Cameo, 0 finer (6/15). NGC ID# 23XK, PCGS# 5588

- 4710 1887 PR66 Cameo NGC. Briggs 2-B.** The frosty design elements of this spectacular Premium Gem are well-detailed and they contrast dramatically with the deeply mirrored fields. The surfaces are well-preserved and lightly toned. Census: 7 in 66 Cameo (1 in 66+ Cameo), 5 finer (7/15). PCGS# 85588

- 4711 1887 PR66 Cameo NGC.** The scintillating, mirrored fields appear exactly as struck, with a complete absence of toning. The first-glance eye appeal is enormous — especially for those collectors who favor brilliant coins. The central devices are not heavily frosted, but sufficiently to merit the Cameo appellation. A few of the obverse stars lack central definition; were it not for this minor drawback, this coin might rise to the top of both services' population data. Census: 7 in 66 Cameo (1 in 66+ Cameo), 5 finer (7/15). Ex: *Central States Signature (Heritage, 4/2006)*, lot 1543. PCGS# 85588

1888 Quarter, Rim-Toned PR66 Cameo

- 4712 1888 PR66 Cameo PCGS.** Nicely reflective surfaces show well-mirrored silver centers contrasting against copper-gold and pale blue patina at the rims on both sides. The devices display lavish mint frost, creating abundant cameo contrast. Interestingly, Walter Breen's *Proof Encyclopedia* reports 800 proofs rather than the usually given 832 pieces, noting that the others are "possibly" assay pieces. Population: 7 in 66 Cameo, 1 finer (7/15). PCGS# 85589

- 4713 1890 PR64 PCGS. CAC. Briggs 3-C.** Blue-green toning dominates this well preserved near-Gem, although ruby-red and straw-gold are also present. The strike is bold except on the uppermost stars. The fields are undisturbed and reflective beneath the rich palette of colors. NGC ID# 23XN, PCGS# 5591

BARBER QUARTERS

- 4714 1892 MS66 PCGS.** Type Two Reverse. A brilliant and lustrous first-year Barber type coin. The strike is full and the fields are nearly pristine. The portrait exhibits only delicate contact. NGC ID# 23XT, PCGS# 5601

- 4715 1892-O MS65 PCGS.** Type One Reverse. Light straw-gold toning accompanies this fully struck and lustrous Gem. Delicate grazes on the right obverse account for the grade. Population: 42 in 65 (2 in 65+), 21 finer (6/15). NGC ID# 23XU, PCGS# 5602

1892-O Barber Quarter, MS66 First-Year O-Mint Example

- 4716 1892-O MS66 PCGS. CAC.** Soft mint luster gleams through scattered taupe-gray toning over the mark-free surfaces of this original, naturally patinated quarter. The Type One reverse displays slightly deeper shades of the same toning. As the first-year Barber quarter from the New Orleans mint, the issue is always in demand and this Premium Gem is an exceptional representative. Well-struck throughout including the shield corner, CAC endorsed. Population: 18 in 66 (3 in 66+), 3 finer (6/15). NGC ID# 23XU, PCGS# 5602

1893-O Quarter, Sharp MS66 Exceptionally Frosted

- 4717 1893-O MS66 NGC.** There is a wide variance in striking definition on 1893-O quarters. Some are well brought up, such as this piece, and others are not quite as nice. The mint luster on this Premium Gem is exceptionally frosted, more suggestive of an S-mint coin than a New Orleans product. The surfaces are smooth and essentially free of abrasions. Brilliant with a ring of pale golden toning over the denticles on each side. Census: 6 in 66, 4 finer (7/15). Ex: *Santa Clara Signature* (Heritage, 11/2002), lot 7055; *FUN Signature* (Heritage, 1/2006), lot 2385; *FUN Signature* (Heritage, 1/2008), lot 1179; *Central States Signature* (Heritage, 4-5/2009), lot 451. NGC ID# 23XX, PCGS# 5605

1893-S Quarter, Toned MS65 Conditionally Rare

- 4718 1893-S MS65 NGC.** This second-year San Francisco Barber quarter issue was not saved in quantity and is a distinct condition rarity, even at the Gem level. Rich and dappled green-gold, tan, garnet, and amber toning crosses warmly lustrous surfaces. The patina on the reverse is a touch lighter. Census: 8 in 65 (1 in 65+), 2 finer (6/15). Ex: *FUN Signature* (Heritage, 1/2011), lot 3463. NGC ID# 23XY, PCGS# 5606

1893-S Barber Quarter, MS66 Exceptional Color

- 4719 1893-S MS66 NGC.** Mintmark far right, one of three different positions noted by David Lawrence. The 1893-S quarter is scarce in Mint State and most such pieces grade MS64 or lower. This Premium Gem example is far finer than most collectors will ever lay eyes on. The strike is bold throughout and the surfaces are free of distracting abrasions. Vibrant mint luster illuminates deep ocean-blue peripheral toning and warm gold and violet central hues. Census: 1 in 66, 1 finer (6/15). NGC ID# 23XY, PCGS# 5606

4720 1895-S MS64 PCGS. CAC. Shades of greenish-gold and lavender-gray toning blanket the well-preserved surfaces of This attractive Choice example, with vibrant mint luster and sharply detailed design elements underneath. Population: 16 in 64, 11 finer (7/15). *From The Birmingham Collection.* NGC ID# 23Y6, PCGS# 5612

4721 1896-O MS62 NGC. Brilliant and frosty mint luster is unbroken beneath the lovely gold and iridescent toning of this pleasing Mint State piece. The underrated 1896-O is elusive in higher grades, living in the shadow of its prized sibling, the 1896-S. Census: 7 in 62, 43 finer (7/15). NGC ID# 23Y8, PCGS# 5614

1897-O Quarter, Concentrically Toned MS65

4722 1897-O MS65 PCGS. Just as its better-known half dollar counterpart, the 1897-O Barber quarter is a semikey within its series, seldom seen in the higher reaches of Mint State despite a mintage exceeding 1.4 million pieces. This lovely Gem offers silver centers melding into concentric amber-gold, copper, lilac, and aqua toning nearer the rims. The surfaces are equally well-struck and well-preserved. Population: 11 in 65, 21 finer (6/15). NGC ID# 23YB, PCGS# 5617

1898-S Quarter, Original Near-Gem Fully Struck Throughout

4723 1898-S MS64 PCGS. CAC. CoinFacts estimates that only 80 coins survive in mint condition from a production of over 1 million pieces. The low survivorship is attributable to the issue's widespread circulation in the Philippines. This near-Gem has rarely seen original surfaces toned in blended shades of golden-russet and cobalt-blue. All devices are fully struck, including the right shield corner/wing juncture, talons, and arrow fletchings. A spectacular Barber quarter representative, and one of only two MS64s with CAC approval. Population: 10 in 64, 9 finer (7/15). NGC ID# 23YF, PCGS# 5621

1899-O Barber Quarter Conditionally Rare Premium Gem

4724 1899-O MS66 PCGS. A hint of lemon-gold on the high rims frames the brilliant-white surfaces of this New Orleans issue. Undervalued in high Mint State, the 1899-O is comparably rare in Premium Gem condition to the more highly valued 1896-S and 1896-O dates. Frosty cartwheel luster gleams from all angles, and the strike is full. There are no marks or abrasions needing mention. Population: 7 in 66, 2 finer (6/15). NGC ID# 23YH, PCGS# 5623

1900-O Barber Quarter, MS66+ Beautiful Multicolor Toning

4725 1900-O MS66+ PCGS. CAC. Mint State examples of this New Orleans issue are seldom seen, and are rare in MS66 or finer condition. This Plus-graded piece shows beautiful lemon-gold, mint, and sky-blue peripheral hues around soft lavender-gray centers. A couple trivial ticks on Liberty's lower jaw appear to be all that limit the grade. This piece is a trifle soft on the usual weak spots, namely the eagle's right (facing) shoulder and talons, as well as on several right-hand obverse stars. Population: 10 in 66 (3 in 66+), 3 finer (6/15). NGC ID# 23YL, PCGS# 5626

1900-S Quarter, Lustrous MS66 Prooflike Tendencies, Razor-Sharp

4726 1900-S MS66 PCGS. CAC. The 1900-S quarter is one of the "Philippine hoard" dates, along with the 1898-S and 1899-S. Most of this coinage went to the Philippines and few survived in the better Mint State grades. Perhaps this piece missed the boat and stayed home. The PCGS population report shows only 23 pieces in MS65 or finer, a number of which are likely resubmissions. The lustrous surfaces of this Premium Gem display soft violet color over both sides, each of which exhibits sharply struck design elements. Nicely preserved throughout, CAC endorsed. Population: 9 in 66 (1 in 66+), 4 finer (6/15). NGC ID# 23YM, PCGS# 5627

- 4727 1901-S AG3 PCGS.** The date and mintmark remain bold on this low-mintage key date, but some of the legends and rims are worn flat. No heavy abrasions or other problems are evident, just honest wear. NGC ID# 23YR, PCGS# 5630

**1901-S Quarter, Key-Date, Good 4
Remarkably Clean Surfaces**

- 4728 1901-S Good 4 PCGS. CAC.** Both sides of this key-date quarter display natural gray color that assumes a slightly darker shade in the fields, thereby highlighting the devices. The Y in LIBERTY shows, as do Liberty's ear and eye. The obverse rim is complete while that on the reverse is worn into some of the peripheral letters, especially along the right border. The eagle is completely outlined, and the left side of the shield is separate from the wing. Three or four letters show in the ribbon motto, and the surfaces are remarkably clean for a heavily circulated coin. A great looking piece for a Good 4, well deserving of the CAC endorsement. NGC ID# 23YR, PCGS# 5630

- 4729 1902-O MS64+ PCGS.** Swirling luster lights up largely silver surfaces with gold-green elements along parts of the margins. Only a handful of marks, mostly wispy, preclude an even finer grade. Population: 18 in 64 (2 in 64+), 20 finer (7/15).
From The College Collection, Part Two. NGC ID# 23YT, PCGS# 5632

- 4730 1902-O MS64 PCGS. CAC.** The silver-gray surfaces of this near-Gem display pleasing luster and are well-preserved. The design elements are well-struck save for the typical weakness in some of the star centers and the claws of the eagle. Population: 18 in 64 (2 in 64+), 20 finer (7/15).
From The Birmingham Collection. NGC ID# 23YT, PCGS# 5632

- 4731 1902-S MS64 PCGS. CAC.** Frosty surfaces are pale pearl-gray with touches of blue and faint peach overtones. Surprisingly smooth overall, though a reed mark on the cheek keeps the coin from Gem status. Population: 24 in 64, 20 finer (7/15).
From The Birmingham Collection. NGC ID# 23YU, PCGS# 5633

**1902-S Barber Quarter, MS66
Attractively Toned**

- 4732 1902-S MS66 NGC.** The scarcity of the 1902-S Barber quarter is recognized in the upper circulated grades, and Mint State examples are particularly elusive. This Premium Gem is finer than is typically available. The strike is razor-sharp throughout and the frosty surfaces are beautifully preserved. The obverse glows with original amber, gold, and olive hues, while the reverse is a little brighter, showing similar shades around the periphery but pastel lavender and turquoise in the center. Census: 3 in 66, 2 finer (6/15). NGC ID# 23YU, PCGS# 5633

- 4733 1905-O MS64 PCGS. CAC.** The 1905-O Barber quarter claims a mintage of 1.2 million pieces and the issue is quite rare in high grade. This impressive Choice example is well-detailed and brightly lustrous, under shades of lilac, magenta, and greenish-gold toning. Population: 24 in 64 (1 in 64+), 22 finer (7/15). NGC ID# 23Z3, PCGS# 5640

1905-S Quarter, Sharply Struck MS65

- 4734 1905-S MS65 PCGS.** This solidly struck Gem boasts bold luster and scattered, minimal ticks in concert with the grade. All star centers are full and the generous impression extends throughout both sides, save for the usual areas of the right claw and right shield corner. Silvery centers show a hint of gold patina only at the extreme rims. Seldom seen finer. Population: 9 in 65, 7 finer (6/15). NGC ID# 23Z4, PCGS# 5641

- 4735 1906 MS66 PCGS.** An original skin of olive-gold patina covers perhaps 85% of the obverse, relinquishing the remaining territory to attractive, lilac-silver undertones. The reverse is nearly untuned, while both sides are frosty and lustrous. This is an essentially mark-free Premium Gem, well-struck except at the eagle's right claw, arrow fletchings, and upper-right shield/wing junction. Just two numerically finer coins have been certified by PCGS. Population: 24 in 66 (1 in 66+), 2 finer (6/15). NGC ID# 23Z5, PCGS# 5642

- 4736 1906 MS66 PCGS.** Splashes of tan, orange-gold, and lime-green make occasional visits to the radiantly lustrous surfaces of this Premium Gem Barber quarter. The design features are sharply defined, including the star centers, eagle's claws and adjacent arrow feathers. Both sides have been well-cared for. The 1906 quarter is very elusive in MS66 and finer grades. Population: 24 in 66 (1 in 66+), 2 finer (7/15). NGC ID# 23Z5, PCGS# 5642

- 4737 1907-O MS65 PCGS.** Dappled reddish-gold and sky-blue hues tint the lustrous surfaces of this O-mint Gem. Well-detailed motifs show minor weakness at the upper right corner of the shield, as expected. Population: 22 in 65 (2 in 65+), 18 finer (7/15).
Ex: Baltimore Signature (Heritage, 3/2009), lot 1118. NGC ID# 23ZA, PCGS# 5647

**1907-S Quarter, MS65
Richly Patinated**

4738 1907-S MS65 PCGS. The 1907-S Barber quarter issue saw a modest mintage of 1.3 million pieces. However, it is challenging to locate in problem-free XF and AU condition, indicating the vast majority of the mintage was dropped into circulation shortly after production. Gems are rare, and PCGS has only certified 11 others as MS65 with 10 finer — population numbers that have scarcely budged since we last described this coin around seven years ago (6/15). This originally toned example displays gray-rose on the central reverse and rich sea-green toning around the outer portions of each side. The surfaces are well-preserved and show a bold strike, save for typical blending on the right shield corner.

Ex: Portland Signature (Heritage, 3/2004), lot 5683; Plymouth Collection / FUN Signature (Heritage, 1/2009), lot 2530. NGC ID# 23ZB, PCGS# 5648

4739 1908-D MS65 PCGS. CAC. Shades of sea-green and lavender-gray toning blanket the well-preserved lustrous surfaces of this impressive Gem, with well-detailed design elements underneath. Population: 23 in 65 (1 in 65+), 16 finer (7/15). NGC ID# 23ZD, PCGS# 5650

4740 1908-D MS66 NGC. The Denver facility produced 5.7 million quarters in its third year of operation. Examples are rarely encountered in MS66. Dramatic russet and slate-gray toning covers the obverse, and radiant mint brilliance illuminates the reverse. Several stars show strike softness, but the usually weak right shield corner is bold. Census: 4 in 66, 5 finer (7/15). NGC ID# 23ZD, PCGS# 5650

4741 1908-D MS66 PCGS. Satiny surfaces come alive with silver-rose and violet interior patina and gold-to-green elements at the margins. Impressively preserved and attractive. Population: 14 in 66, 2 finer (7/15). NGC ID# 23ZD, PCGS# 5650

**1911 Barber Quarter, MS66+
High Technical Merit**

4742 1911 MS66+ NGC. CAC. Deep-seated areas of amber-gold and antique-bronze toning surround the raised elements of this dramatically toned quarter. Densely patinated at the margins, the central motifs are frosted and silver-gray in color. Soft mint luster emerges through brief openings in the intense coloration. The strike is crisp as expected on this high-end Premium Gem, and only a small number of inconsequential marks are visible with a glass. The current coin is the sole NGC representative of the grade with the Plus designation. CAC endorsed. Census: 7 in 66 (1 in 66+), 2 finer (7/15). NGC ID# 23ZN, PCGS# 5659

4743 1912-S MS64 PCGS. CAC. This attractive Choice Barber quarter exhibits well-detailed design elements and vibrant mint luster throughout. The lightly marked surfaces show traces of pale gold and lavender toning. Population: 30 in 64, 34 finer (7/15). *From The Birmingham Collection.* NGC ID# 23ZT, PCGS# 5663

**1913 Barber Quarter, MS66
Rare This Well-Preserved**

4744 1913 MS66 PCGS. Uncirculated 1913 quarters can be found with little trouble through the Gem grade level, but advance beyond MS65 and this date is rare. This Premium Gem exhibits frosty original luster with dusky golden-gray toning. Lightly struck on the central eagle and the high points of Liberty's hair curls and wreath. Population: 8 in 66, 2 finer (7/15). NGC ID# 23ZU, PCGS# 5664

4745 1913-S Good 6 PCGS. The 1913-S is one of the keys to the Barber quarter series and collectors prize examples in all grades and conditions. This evenly worn example shows a few letters in LIBERTY still intact on the headband and the date and legends are legible. No large or distracting abrasions are evident. NGC ID# 23ZW, PCGS# 5666

4746 1915 MS66 PCGS. Barber half dollar output took a backseat to quarter dollar production at Philadelphia in 1915 (3.5 million quarters struck). This attractive Premium Gem offers flashes of brilliance amid variegated steel-blue, russet, and olive toning. Crisply detailed and expectedly clean. Population: 21 in 66, 0 finer (7/15). NGC ID# 2422, PCGS# 5670

4747 1915-D MS65+ PCGS. Glowing satin luster enlivens the completely untuned surfaces of this compelling Denver product. The obverse shows signs of die fatigue around the peripheries with thin die cracks throughout. Each side is devoid of any significant abrasions aside from microscopic ticks on Liberty's cheek. NGC ID# 2423, PCGS# 5671

4748 1915-D MS66+ PCGS. CAC. This blatantly original quarter is unquestionably high-end for the Premium Gem grade, hence the added recognition from PCGS and CAC. Speckled golden-gray and olive hues color the obverse, while the reverse maintains its brilliance. Satiny and crisply struck. Population: 38 in 66 (2 in 66+), 3 finer (6/15). NGC ID# 2423, PCGS# 5671

4749 1916 MS65 PCGS. CAC. The final issue of the Barber design, this Gem exhibits full cartwheel luster with brilliant silver surfaces and exceptional design definition. Population: 59 in 65 (3 in 65+), 34 finer (6/15). NGC ID# 2425, PCGS# 5673

4750 1916 MS66 PCGS. This Premium Gem shows frosty silver-gold surfaces with scattered golden-brown accents. Vertical die polishing lines are visible on each side, contributing to the frosty luster. A great-looking and well-struck example of this last-year-of-type Barber quarter. Population: 30 in 66, 4 finer (7/15). NGC ID# 2425, PCGS# 5673

4751 1916-D MS66 PCGS. Mottled toning in shades of crimson, cobalt-blue, and reddish-violet surround frosted central motifs on this flashy, boldly rendered Premium Gem. Satiny luster radiates over impeccably preserved surfaces. A final-year Denver issue with broad appeal. PCGS lists only 15 finer examples (6/15). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

- 4752 1892 PR64 NGC.** A generous proof mintage of 1,245 Barber quarters was accomplished in 1892, the first year of the design. This attractive Choice specimen exhibits sharply detailed frosty design elements and deeply mirrored fields with considerable (but unacknowledged) contrast. Hints of pale gold and blue toning add to the outstanding eye appeal. NGC ID# 2427, PCGS# 5678

1893 Barber Quarter, PR67 Cameo Exceptional

- 4753 1893 PR67 Cameo PCGS.** A delicate blush of color casts golden warmth over each side of this Superb Gem proof Cameo, accentuating the stark field-motif contrast. The strike is bold and the almost flawlessly preserved surfaces simply radiate eye appeal. The 1893 proof is only occasionally available in the upper reaches of the Cameo grade range. Population: 14 in 67 Cameo, 6 finer (7/15). PCGS# 85679

1895 Quarter Dollar, PR66 Cameo Incredible Eye Appeal

- 4754 1895 PR66 Cameo PCGS. CAC.** Bold cameo contrast captivates the eye on this Premium Gem 1895 proof quarter. The obverse is warmly hued on the portrait in light champagne, while the glass-like fields showcase vivid teal and lavender toning. The reverse shows similar colors but slightly less pronounced. Star 3 on the obverse is incomplete, but the strike is otherwise full. Population: 21 in 66 (1 in 66+) Cameo, 15 finer (7/15). PCGS# 85681

1895 Barber Quarter, PR68 Cameo Black-and-White Contrast

- 4755 1895 PR68 Cameo NGC.** This extraordinary Superb Gem Cameo proof is fully brilliant and untuned with exceptional eye appeal and a bold strike. A high degree of field-to-device contrast is evident. NGC and PCGS have each certified a single finer Cameo proof. Census: 18 in 68 Cameo (4 in 68 ★ Cameo, 1 in 68+★ Cameo), 1 finer (7/15). PCGS# 85681

- 4756 1896 PR66 PCGS.** From a proof mintage of just 762 pieces, this impressive Premium Gem displays sharply detailed design elements and deeply reflective fields under vivid shades of cerulean-blue and greenish-gold toning. Population: 23 in 66 (1 in 66+), 21 finer (7/15). NGC ID# 242B, PCGS# 5682

1896 Quarter, PR68 Ultra Cameo Starkly Contrasted

- 4757 1896 PR68 Ultra Cameo NGC.** The spectacular contrast between the icy-white devices and the deeply mirrored fields on this untuned specimen generates immense eye appeal. Meticulously struck and seemingly immaculate. A minute mint-made planchet flaw in the field below the S in PLURIBUS will identify this gorgeous piece in future auction appearances. Census: 11 in 68 Ultra Cameo (1 in 68 ★ Ultra Cameo), 3 finer (7/15). PCGS# 95682

- 4758 1898 PR66 NGC.** Vivid shades of greenish-gold, slate-gray, ice-blue, and amber toning blanket the well-preserved surfaces of this attractive Premium Gem. The design elements are sharply detailed and the fields are deeply reflective, under the patina. Census: 34 in 66, 39 finer (7/15). NGC ID# 242D, PCGS# 5684

- 4759 1898 PR64 Ultra Cameo NGC. CAC.** The design elements of this well-preserved Choice specimen exhibit razor-sharp definition throughout and all devices have a rich coat of mint frost that creates intense cameo contrast with the deeply mirrored fields. Eye appeal is terrific. PCGS# 95684

- 4760 1899 PR66 Cameo PCGS.** Lightly toned pearl-gray with glints of gold at the margins. The layer of patina scarcely dims this Premium Gem's inherent contrast, as the frost on the well-defined devices holds up without a hitch. Cameo examples of turn-of-the-century silver are elusive this fine. Population: 7 in 66 Cameo, 5 finer (7/15). PCGS# 85685

- 4761 1901 PR66 PCGS.** A mixed patina of strawberry-red, champagne-gold, and blue graces the obverse of this sharply detailed Premium Gem, while the reverse shows only a few wisps of color. The fields are deeply reflective, even through the toning. From a mintage of 813 pieces. Population: 18 in 66, 10 finer (6/15). NGC ID# 242G, PCGS# 5687

- 4762 1901 PR64 Cameo PCGS. CAC.** Greenish-blue toning with soft brownish accents covers both sides of this near-Gem, each of which displays pronounced field-device contrast. Sharply struck design features and well-preserved surfaces further contribute to the coin's pleasing eye appeal. Population: 12 in 64 Cameo, 32 finer (7/15). PCGS# 85687

- 4763 1903 PR66 PCGS. CAC.** Faintly contrasted and largely silver with areas of milky patina and golden overtones. A sharply struck Premium Gem proof housed in a second-generation holder. Population: 22 in 66, 18 finer (7/15). NGC ID# 242J, PCGS# 5689

- 4764 1906 PR66 PCGS. CAC.** Glimmering silver interiors have watery fields and hints of gold-orange at the rims. Excellent detail, if mild contrast. Housed in a green label holder. Population: 41 in 66 (2 in 66+), 25 finer (7/15). NGC ID# 242M, PCGS# 5692

1906 Quarter, PR66 Cameo
Rare with Cameo Contrast

- 4765 1906 PR66 Cameo PCGS.** Just 675 proof Barber quarters were struck in 1906, few of which display significant contrast between the reflective fields and the motifs. The current Premium Gem proof is an exception, earning the Cameo designation for a layer of thick mint frost on the raised elements, visible throughout both sides of the coin. Bronze-gold toning visits the deep-mirrored fields, with hints of blue and violet at the borders. Sharply struck, this gleaming proof is tied for the finest-known Cameo at either service. Population: 3 in 66 Cameo, 0 finer (6/15). PCGS# 85692

1915 Barber Quarter, PR67
Subtle Field-Device Contrast

- 4769 1915 PR67 NGC.** Proof quarter production amounted to only 450 pieces in the final year of the type, reflecting the rather minimal collector demand for special examples of the Barber design. This Superb Gem is among the finer-known survivors, even though olive and rose-gold toning precludes a Cameo designation. The strike is bold and each side shows modest contrast, accentuated by the rich patina. Census: 15 in 67 (2 in 67 ★), 5 finer (6/15). NGC ID# 242X, PCGS# 5701

1907 Quarter, PR67 Cameo
Boldly Contrasted Proof

- 4766 1907 PR67 Cameo PCGS. CAC.** Despite the efforts of Mint officials to minimize the cameo effect on proofs of 1907, a few high-grade, contrasted examples are known. This delightful Superb Gem proof is one of them. Pale-gold, deeply mirrored fields surround frosty, ivory-gold devices displaying bold contrast that is particularly pronounced on the obverse. The mirrored fields are free of marks, and there is no trace of even the faintest hairlines that often appear under magnification. The strike is sharp, although weakness at the shield corner and the eagle's right claw are inescapable for the issue. Even the highest-graded examples show the same incomplete strike in those areas. Population: 7 in 67 Cameo, 2 finer (6/15). PCGS# 85693

- 4767 1913 PR65 PCGS. CAC.** Golden-brown and blue-green toning graces the peripheries of this nicely struck and unblemished Gem. The icy devices show obvious contrast with the glassy fields, but the green label holder predates the Cameo designation for the Barber series. *From The Birmingham Collection.* NGC ID# 242V, PCGS# 5699

- 4768 1913 PR66 Cameo NGC.** Proof quarter dollar production totaled 613 pieces in 1913. This Premium Gem proof has marked cameo contrast with frosty devices set against deeply reflective fields. Attractive hues of rose and blue adorn each side. Census: 4 in 66 Cameo, 14 finer (7/15). PCGS# 85699

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VF35
Choice Collector-Grade Example

- 4770 1916 Standing Liberty VF35 PCGS.** About Uncirculated and Mint State examples of the 1916 Standing Liberty quarter are frequently traded at auction and the bourse is usually a magnet for low-end circulated representatives, but VF and XF coins are somewhat elusive in both settings. This Choice VF example possesses strong detail for the grade, particularly noticeable on the reverse where the eagle's feathers retain substantial delineation. Medium olive-gray patina blankets each side and the eye appeal is excellent. NGC ID# 242Y, PCGS# 5704

- 4771 1917 Type One MS65 Full Head PCGS. CAC.** A delightful Gem specimen of this short-lived design type, with razor-sharp definition on all design elements and Full Head definition. The well-preserved lustrous surfaces are blanketed in shades of pale gold toning and eye appeal is terrific. NGC ID# 242Z, PCGS# 5707

- 4772 1917 Type One MS66 Full Head PCGS. CAC.** Besides full definition on Liberty's head, the rivets, shield lines (horizontal and vertical), and feathers are also boldly rendered. Shades of olive and plum grace the edges, surrounding minimally toned interiors. A perfect Type One representative that would prove challenging in higher grades. NGC ID# 242Z, PCGS# 5707

- 4773 1917 Type One MS66+ Full Head PCGS. CAC.** Golden-tan patination at the borders frames powder-blue central areas, being somewhat more extensive and deeper on the reverse. Both sides are awash with luster and are devoid of significant marks. The design features are sharply struck. PCGS has certified fewer than 80 pieces finer (7/15). NGC ID# 242Z, PCGS# 5707

**1917 Type One Quarter, MS67 Full Head
Impressive Sharpness**

4774 1917 Type One MS67 Full Head PCGS. CAC. Unlike most later issues, a large percentage of 1917 Type One quarters exist with full head and shield details, much like the present Superb Gem. However, few of the survivors are as fine as this piece, and none have been certified in higher grades. This example is brilliant and highly lustrous with splashes of champagne and violet on the obverse. Population: 78 in 67 (4 in 67+) Full Head, 0 finer (7/15). NGC ID# 242Z, PCGS# 5707

4775 1917-D Type One MS65 Full Head NGC. Frosty silver overall with faint gold-to-gray toning outlining parts of the design. Well-struck on Liberty's head, though her shield has several soft rivets. NGC ID# 2432, PCGS# 5709

4776 1917-D Type One MS65 Full Head PCGS. CAC. Pale peach-gray on the obverse with deeper rose and violet dapples gracing the reverse. A pleasing Gem example of this elusive Type One mintmarked issue with full head detail and only minor softness on the shield.
Ex: Long Beach Signature (Heritage, 2/2001), lot 5822.
From The Birmingham Collection. NGC ID# 2432, PCGS# 5709

4777 1917-D Type One MS65+ Full Head PCGS. CAC. *Ex: Highland Collection.* The availability of the 1917-D Type One in Full Head makes this MS65+ coin a perfect candidate for a high-end type set. The rivets and vertical shield lines are clear, while the leading edge feathers are a trifle soft. Golden-orange and steel-blue toning clings to the borders and recesses. NGC ID# 2432, PCGS# 5709

4778 1917-D Type One MS66 Full Head PCGS. Soft tan and powder-blue patination runs over the lustrous surfaces of this Premium Gem. Sharply struck design elements transcend the Full Head to include the lines of the inner shield and the rivets. Excellent preservation characterizes both sides. PCGS has seen only 22 coins finer (7/15).
From The Birmingham Collection. NGC ID# 2432, PCGS# 5709

4779 1917-D Type One MS66 Full Head PCGS. Silver centers with reddish-orange peripheral toning on much of the reverse and reddish-gray outline toning on the obverse. Liberty's head is well-defined, as is most of her shield.
From The College Collection, Part Two. NGC ID# 2432, PCGS# 5709

**1917-D Type One Quarter, MS66 Full Head
Pleasingly Toned, Strongly Struck**

4780 1917-D Type One MS66 Full Head PCGS. CAC. The rivets and shield lines are fully defined on this Premium Gem, and complete detail over Liberty's head accounts for the Full Head designation. The eagle's leading edge feathers are a touch incomplete. Dappled russet, slate-blue, and violet toning overlies satiny surfaces. Only 1.5 million Type One quarters were struck at the Denver facility in 1917 compared to nearly 9 million examples at Philadelphia, and the 1917-D is considerably scarcer in Full Head. PCGS has seen just 22 finer submissions. NGC ID# 2432, PCGS# 5709

4781 1917-D Type One MS66 Full Head PCGS. CAC. This Type One Premium Gem displays well-formed feathers on the eagle's breast and complete definition on Liberty's head. Satiny surfaces show just a few wisps of gold toning. PCGS reports 22 finer Full Head coins (7/15).
Ex: FUN Signature (Heritage, 1/2012), lot 5807. NGC ID# 2432, PCGS# 5709

4782 1917-S Type One MS65 Full Head PCGS. This delightful Gem is sharply detailed throughout, with Full Head definition and all shield rivets intact. Attractive shades of pale gold toning visit the well-preserved surfaces, with hints of amber at the rims and vibrant luster underneath.
From The Birmingham Collection. NGC ID# 2433, PCGS# 5711

**1917-S Type One Quarter, MS65 Full Head
Original Toning**

4783 1917-S Type One MS65 Full Head PCGS. CAC. Variegated gold, purple, and rose toning coats both sides. Magnificent, satiny luster glistens throughout the carefully preserved surfaces. The strike is pleasing on the head and central obverse, although the leading edge of the eagle's left (facing) wing is a trifle soft, as usual. Finer Full Head examples are seldom seen.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 694. NGC ID# 2433, PCGS# 5711

1917-S Type One Quarter, MS66 Full Head
Scarcest Type One 1917 Issue

- 4784 1917-S Type One MS66 Full Head PCGS.** A sharply struck Premium Gem, this piece displays fully brilliant surfaces with satiny white luster. Only a trace of wispy champagne toning is evident on the reverse. The San Francisco Mint Type One quarter is considered the scarcest of three 1917 issues in fully struck Gem condition. Population: 84 in 66 (4 in 66+) Full Head, 12 finer (6/15). NGC ID# 2433, PCGS# 5711

1917-S Type One Quarter, MS66 Full Head
Radiant, Brilliant Surfaces

- 4785 1917-S Type One MS66 Full Head PCGS. CAC.** The mint luster on this Premium Gem Full Head Type One quarter glows with frost-white luminescence, beautifully showcasing the carefully preserved surfaces. The design elements, particularly the obverse stars and shield, are boldly rendered, completing the immense eye appeal. The San Francisco is the most challenging of the three Type One 1917 issues to locate in high-grade Full Head. Population: 84 in 66 (4 in 66+) Full Head, 12 finer (6/15). NGC ID# 2433, PCGS# 5711

- 4786 1917-D Type Two MS66 NGC. CAC.** This Premium Gem has a nice strike with about 60% of the head details and nearly all of the shield details visible on the obverse. This lovely specimen has light champagne toning with deeper gold inside the right obverse border. Census: 18 in 66 (2 in 66 ★), 1 finer (7/15). NGC ID# 2435, PCGS# 5716

1917-D Type Two Quarter, MS65 Full Head
Attractive Pastel Toning

- 4787 1917-D Type Two MS65 Full Head PCGS.** In the Full Head category, the 1917-D Type Two quarter is seen less than half as frequently as its Philadelphia counterpart, and is barely more available than the San Francisco Type Two issue of this year. This Gem example is beautifully preserved and frosty with blended shades of lavender and champagne-orange toning on each side. Sharp head detail is a hallmark attribute, although some more typical weakness is seen on the central gown lines, the date numerals, and the leading edge of the eagle's left (facing) wing. Housed in an old green label holder. Population: 63 in 65 Full Head, 20 finer (6/15).
From The Birmingham Collection. NGC ID# 2435, PCGS# 5717

1917-S Type Two Quarter, MS65 Full Head
Iridescent Toning

- 4788 1917-S Type Two MS65 Full Head NGC.** This satiny Gem Type Two representative is uncommonly well-struck for the issue, especially on Liberty's head and the shield — only the leading edge of the eagle's left (facing) wing shows noticeable softness, an area that is almost always weak. A heavy radial die crack extends inward through the first T in STATES. The surfaces are iridescently toned in pale champagne with hints of mint and lavender throughout. Census: 24 in 65 Full Head, 16 finer (6/15). NGC ID# 2436, PCGS# 5719

1917-S Type Two Quarter, MS65 Full Head
Impressive Definition

- 4789 1917-S Type Two MS65 Full Head PCGS. CAC.** The 1917-S Type Two quarter is just slightly scarcer in high grade Full Head than the 1917-D, but both are significantly more elusive than their Philadelphia counterpart. In addition to full definition over Liberty's head, the present S-mint representative displays above-average sharpness on the date and inner shield. The luster is satiny with a warmly glowing finish and the almost distraction-free surfaces exhibit dappled orange-tan patina toward the borders.
Ex: Long Beach Signature (Heritage, 9/2002), lot 6625.
From The Birmingham Collection. NGC ID# 2436, PCGS# 5719

- 4790 1918 MS65 Full Head PCGS.** Sharply defined with a few minor contact marks on Liberty's left (facing) leg. Full luster gleams beneath an overlay of light golden toning. Population: 78 in 65 (2 in 65+) Full Head, 56 finer (7/15).
From The Birmingham Collection. NGC ID# 2437, PCGS# 5721

**1918 Quarter, MS66 Full Head
Delicate Pastel Toning**

- 4791 1918 MS66 Full Head PCGS.** This is an outstanding 1918 quarter, showcasing not only smooth, frosty surfaces but also razor-sharp detail throughout the head, shield, stars, and gown lines. The eagle's left (facing) wing is also crisp along its leading edge. Pastel lavender, gold, and mint-green hues encompass each side, giving this coin exceptional eye appeal. Population: 44 in 66 (1 in 66+) Full Head, 12 finer (7/15). NGC ID# 2437, PCGS# 5721

1918 Quarter, Lightly Toned MS66 Full Head

- 4792 1918 MS66 Full Head PCGS. CAC.** The 1918 is one of the more plentiful issues in Full Head (relatively speaking), but such pieces achieving the Premium Gem grade level are scarce, and finer coins are genuinely rare. Small, scattered splashes of toning are present over both sides of this Premium Gem, primarily on the obverse, including shades of bluish-gray and light russet toning. Attractively lustrous, with a pleasing full head and above-average detail overall. One of 16 stickered in this grade at CAC. Population: 43 in 66 (1 in 66+) Full Head, 12 finer (6/15). NGC ID# 2437, PCGS# 5721

- 4793 1918-D MS64 Full Head PCGS.** Soft gray luster has hints of gold at parts of the margins. Though weakly struck on Liberty's shield and body, her topmost part meets the Full Head criteria. NGC ID# 2438, PCGS# 5723

- 4794 1918-D MS64 Full Head PCGS.** Fully struck and satiny with lovely mauve-gray and purple-rose toning, and excellent surface preservation. A handful of well-scattered contact marks reside on the lower half of each side, and there is a small patch of powdery green verdigris near the lower right reverse rim.
Ex: Long Beach Signature (Heritage, 9/2003), lot 6787. NGC ID# 2438, PCGS# 5723

1918-D Quarter, Impressive MS65 Full Head

- 4795 1918-D MS65 Full Head PCGS.** This impressive Gem 1918-D Standing Liberty quarter displays a touch of softness on the central obverse devices and the eagle's breast, but this coin exhibits Full Head definition. Both sides show vibrant mint luster under attractive champagne-gold patina. Housed in a green-label holder. Population: 52 in 65 (2 in 65+) Full Head, 21 finer (6/15).
Ex: Dr. John Y. Harper, Jr. Collection / New York Signature (Heritage, 3/2012), lot 3367. NGC ID# 2438, PCGS# 5723

**1918/7-S Quarter, Collectible VF20
An Outstanding Coin for the Grade**

- 4796 1918/7-S FS-101 VF20 PCGS.** The 1918/7-S Standing Liberty quarter is a difficult issue to locate in the VF to XF grade range, particularly with original coloration. For the VF20 grade, this example offers a significant amount of interior detail, with much of the softness on the figure of Liberty due more to this date's characteristically weak strike than to actual wear. Both sides display original gunmetal-gray color and are free of problems. The date is worn but clear, with the overdate feature plain. Housed in a green label holder. PCGS# 395949 Base PCGS# 5726

1918/7-S Quarter, XF45

- 4797 1918/7-S FS-101 XF45 PCGS.** The downstroke of the underdigit 7 can be seen with the unaided eye, inside the lower loop of the 8. The flat top of the 8 is also diagnostic. The present unmarked and partly lustrous Choice XF key date example displays light to medium autumn-brown and dove-gray toning. PCGS# 395949 Base PCGS# 5726

**1918-S Quarter, Strong MS66
A Stand-Out Representative**

- 4798 1918-S MS66 PCGS. CAC.** Definition at the upper obverse falls just short of a Full Head designation, but the shield lines, rivets (aside from numbers 3 and 4), and eagle's feathers are strongly impressed. The carefully preserved surfaces display swirling luster and glimpses of orange, gold, and green toning throughout, accounting for the CAC-recognized aesthetic appeal. A stand-out representative. Population: 15 in 66, 2 finer (7/15). NGC ID# 2439, PCGS# 5724

**1918-S Standing Liberty Quarter, MS67
Blindingly Vibrant Luster**

- 4799 1918-S MS67 PCGS. CAC.** An exceptional example of this better San Francisco issue, with gleaming mint-fresh luster and just a hint of golden toning around the peripheries. Close study with a loupe finds the surfaces seemingly pristine. Liberty's head shows partial detail, and there is significant sharpness on the shield lines, stars, and date. A couple shield rivets show the only mentionable softness. CAC-approved, this magnificent 1918-S is tied with one other for the finest at PCGS (6/15). NGC ID# 2439, PCGS# 5724

- 4800 1918-S MS63 Full Head PCGS.** This early series Select example is sharply detailed, with Full Head definition and just a touch of softness on the shield rivets. The well-preserved mostly brilliant surfaces radiate vibrant mint luster, with a few hints of ice-blue and greenish-gold toning. NGC ID# 2439, PCGS# 5725

- 4801 1918-S MS64 Full Head PCGS.** Golden-amber patina embraces thickly frosted, minimally marked surfaces. The rivets and shield lines are mostly well-defined, as is the leading edge of the eagle's left wing. The only notable flaw is a tick on Liberty's cheek. This S-mint issue is scarce in Choice Full Head and rare any finer. NGC ID# 2439, PCGS# 5725

- 4802 1919 MS65 Full Head PCGS.** Silver-white overall with rose-gray dapples at the margins of both sides. Excellent luster and detail, not only on Liberty's head but her shield.
From The Birmingham Collection. NGC ID# 243B, PCGS# 5729

- 4803 1919 MS66 Full Head NGC.** Brilliant surfaces show blushes of almond-gold color at the lower right obverse and upper reverse. This brightly lustrous Premium Gem has fully defined rivets, bold shield lines and chain mail, and sufficient portrait detail for a Full Head designation. Impeccably preserved. Census: 48 in 66 Full Head, 16 finer (7/15). NGC ID# 243B, PCGS# 5729

**1919 Standing Liberty Quarter, MS67
Full Head, Complete Rivets**

- 4804 1919 MS67 Full Head PCGS. CAC.** This magnificent Superb Gem displays razor-sharp definition on all design elements, including Liberty's head and the shield rivets. The impeccably preserved surfaces radiate vibrant mint luster and show a few delicate hints of pale gold toning. Population: 27 in 67 (1 in 67+) Full Head, 2 finer (7/15). NGC ID# 243B, PCGS# 5729

**1919-D Quarter, Satiny MS66
Conditionally Rare**

- 4805 1919-D MS66 PCGS.** The 1919-D is well-known as one of the semikey dates in the series, but it is somewhat underappreciated in the upper Mint State grades, even without Full Head detail. This coin is devoid of obvious abrasions and displays satiny golden-gray luster. Liberty's head is weakly struck, but the remainder of the coin — including the date numerals, stars, and shield — show above-average sharpness. Population: 28 in 66, 0 finer (7/15). NGC ID# 243C, PCGS# 5730

**1919-S Quarter, Vibrant MS66
High-End Semikey**

- 4806 1919-S MS66 PCGS.** A combination of a limited 1.8 million-coin mintage and high attrition guarantees the scarcity of this semikey San Francisco issue. This Premium Gem example is uncommonly well-preserved and beautifully lustrous with light golden toning. A touch of striking softness visits Liberty's head and a couple shield rivets, but the overall sharpness is above-average for the issue. Population: 12 in 66 (1 in 66+), 0 finer (6/15).
Ex: New York Signature (Heritage, 11/2003), lot 6299. NGC ID# 243D, PCGS# 5732

- 4807 1920 MS65 Full Head PCGS. CAC.** Pastel caramel-gold and ice-blue toning adorns this lustrous Gem. Smooth except for subtle grazes beneath the right (facing) wing. The strike is especially strong on the shield. Encased in a green label holder.
From The Birmingham Collection. NGC ID# 243E, PCGS# 5735

**1920 Quarter, MS66 Full Head
Great Type Coin**

- 4808 1920 MS66 Full Head NGC.** No more than a blush of golden-rose patina (with one small charcoal patch on the reverse) appears on the well-preserved surfaces of this Premium Gem 1920 Standing Liberty quarter. Lively mint luster roils around each side, and the sharp strike goes further than Full Head designation to bring into relief each rivet in the shield. An extremely attractive example of this date and a great type-coin candidate. Census: 16 in 66 (2 in 66 ★) Full Head, 4 finer (6/15). NGC ID# 243E, PCGS# 5735

**1920-D Quarter, MS66
Softly Lustrous and Pleasing**

- 4809 1920-D MS66 PCGS.** In Gem or finer grades, the 1920-D Standing Liberty quarter is scarce, with or without a Full Head designation. This frosty MS66 example shows pale champagne-gray luster with tinges of amber and olive-gold in portions of the recesses. The date is bold and the shield rivets show above-average definition, even while the head is a trifle soft. Population: 30 in 66, 3 finer (7/15). NGC ID# 243F, PCGS# 5736

**1920-D Standing Liberty Quarter
Pristine MS65 Full Head**

- 4810 1920-D MS65 Full Head PCGS.** Three olive sprigs, an earhole, and a full hairline are visible on Liberty, but the sharp Full Head strike also encompasses full shield rivets and full chain mail on Liberty. This gold-tinged Gem offers satiny luster and excellent preservation. A small scuff on Liberty's left (facing) forearm is the only mentionable abrasion. Population: 32 in 65 Full Head, 15 finer (6/15). NGC ID# 243F, PCGS# 5737

- 4811 1920-S MS65 PCGS.** The 1920-S Standing Liberty quarter is an underrated issue in the series, despite the substantial reported mintage of nearly 6.4 million pieces. This well-detailed Gem displays completely brilliant surfaces with vibrant mint luster and no mentionable signs of contact. Population: 49 in 65, 18 finer (7/15). NGC ID# 243G, PCGS# 5738

- 4812 1920-S MS65 PCGS. CAC.** An attractive Gem with well-detailed design elements and vibrant mint luster, under shades of silver-gray and greenish-gold toning. No mentionable distractions are present. Population: 49 in 65, 18 finer (7/15). NGC ID# 243G, PCGS# 5738

1920-S Quarter, Lightly Toned MS64 Full Head

- 4813 1920-S MS64 Full Head NGC.** The lightly toned surfaces present bold luster and excellent eye appeal. Abrasions are fewer than might be expected for the grade, although a couple of key small ones — in the center eagle's breast, one above the R in TRVST, a couple on Liberty's left (facing) thigh — likely account for the near-Gem grade. An elusive issue with the Full Head designation, and seldom seen finer. Census: 23 in 64 Full Head, 11 finer (6/15). NGC ID# 243G, PCGS# 5739

- 4814 1921 MS64 PCGS. CAC.** Ex: Norweb. Medium wheat-gold and steel-gray toning visits lustrous and moderately abraded surfaces. The strike is bold except on the leaf sprig. Encapsulated in an old green label holder.
Ex: *Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 1797.*
From *The Birmingham Collection*. NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS66
Better Philadelphia Issue**

- 4815 1921 MS66 PCGS. CAC.** The low mintage 1921 ranks among the scarcest Philadelphia issues of the series. Undoubtedly, the huge production of silver dollars that year drew Mint resources from other denominations. Lustrous and beautifully preserved with minor incompleteness of strike on the sprig. Certified in a green label holder. NGC ID# 243H, PCGS# 5740

**1921 Standing Liberty Quarter
Elusive P-Mint Issue, MS64 Full Head**

- 4816 1921 MS64 Full Head PCGS.** The 1921 Standing Liberty quarter is a well-known better date from the Philadelphia Mint, elusive in all grades and little-saved in Uncirculated, a low-mintage issue of 1.9 million pieces. The strike on the date can be phenomenal, however, and this excellent Full Head near-Gem proves the point, showing three olive sprigs, a full hairline and earhole, and even full shield rivets. The satiny silver-white surfaces show tinges of pale color near the rims, a beautiful coin save for a few ticks on Liberty's midsection that determine the grade. Population: 73 in 64 Full Head, 71 finer (6/15). NGC ID# 243H, PCGS# 5741

**1921 Quarter, MS65 Full Head
Sharp Centers**

- 4817 1921 MS65 Full Head PCGS.** The key date status of the 1921 Standing Liberty quarter heightens demand for high-end Full Head examples, although few are available at any given time. This Gem representative shows bold shield elements and razor-sharp head detail, with strong definition relayed to the eagle's feathers on the reverse. The date numerals are weak at the bottom, but are clear. Well-preserved and satiny with a light golden hue. Population: 51 in 65 (1 in 65+) Full Head, 20 finer (6/15).
From The Birmingham Collection. NGC ID# 243H, PCGS# 5741

**1923 Standing Liberty Quarter, MS65
Sharply Detailed Full Head Example**

- 4818 1923 MS65 Full Head PCGS.** This delightful Gem exhibits sharply detailed design elements, with complete shield rivets and Full Head definition. The lightly toned surfaces radiate vibrant mint luster and no mentionable distractions are evident. Eye appeal is terrific. Population: 42 in 65 Full Head, 39 finer (7/15). NGC ID# 243J, PCGS# 5743

**1923 Quarter, MS65 Full Head
Warm Champagne Toning**

- 4819 1923 MS65 Full Head PCGS. CAC.** The 1923 is among the more carefully produced issues in the Standing Liberty quarter series, although Gem Full Head survivors are rare relative to the number of specialists in today's hobby; J.H. Cline estimates that even before attrition, just 10% of the total mintage left the dies with full definition. This piece shows crisp head detail and there are no areas of bothersome weakness. The smooth, Gem-quality surfaces ripple with frosty luster, and the lightly patinated features are devoid of distracting abrasions. Where eye appeal is concerned, few examples of the 1923 quarter will be able to compete with the currently offered representative. Population: 43 in 65 Full Head, 39 finer (6/15).
*Ex: Baltimore Signature (Heritage, 7/2003), lot 7121.
From The Birmingham Collection. NGC ID# 243J, PCGS# 5743*

1923 Quarter, Sharp, Frosty MS66 Full Head

- 4820 1923 MS66 Full Head NGC.** Both sides of this remarkable Premium Gem are awash in frosty luster and devoid of toning. The strike is amazing, displaying fullness in the chain mail, rivets, and stripes of the inner shield, as well as Liberty's head. A few trivial obverse handling marks may well preclude an even higher grade. Census: 13 in 66 Full Head, 3 finer (6/15).
*Ex: Hoffy Collection / FUN Signature (Heritage, 1/2008), lot 1274.
NGC ID# 243J, PCGS# 5743*

1923-S Quarter, Satiny MS65

- 4821 1923-S MS65 PCGS.** This Gem 1923-S quarter is sharply rendered on the shield lines and rivets, the stars, and the eagle's feathers, and also shows nearly complete head detail. Yet, the prevailing visual attribute is the soft, satiny luster which is almost completely undisturbed as it glows beneath pale lavender-gray and champagne toning. A high-quality coin for the grade. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, Brilliant MS66
Radiant Mint Bloom**

- 4822 1923-S MS66 PCGS. CAC.** The vibrant, untoned mint luster of this Premium Gem makes this coin stand out from most other examples of this key San Francisco issue. Close study with a loupe finds the surfaces beautifully preserved and the strike well-executed, save for on the head and a couple shield rivets which show the usual softness. Housed in a green label holder. Population: 34 in 66 (1 in 66+), 5 finer (6/15). NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS63 Full Head
Popular Semikey Date**

- 4823 1923-S MS63 Full Head PCGS. CAC.** The 1923-S is a popular semikey date that is rarely seen as a Full Head. Liberty's head is well-defined on this Select example, with an incompleteness of strike noticed at several of the rivets in the shield. Both sides exhibit a slightly frosty luster. Small areas of toning appear, primarily at the outer edges. NGC ID# 243K, PCGS# 5745

**1923-S Quarter, MS65 Full Head
Lightly Toned and Lustrous**

- 4824 1923-S MS65 Full Head PCGS.** Surprisingly, in Gem or finer Full Head grades, the 1923-S appears at auction at about the same frequency as its Philadelphia counterpart, but the demand for this date is significantly higher in this grade range due to its status as a series key. This Gem representative displays a sharp Full Head and above-average detail on the shield and stars; the top of the date numerals are a trifle weak, while the extreme outer peripheries show mild die erosion — not unusual for the issue. This piece is lightly toned golden with occasional hints of lavender and lilac throughout. Population: 53 in 65 (2 in 65+) Full Head, 42 finer (6/15). From The Birmingham Collection. NGC ID# 243K, PCGS# 5745

- 4825 1924 MS65 Full Head PCGS.** Sharply detailed, with a Full Head designation, this impressive Gem exhibits well-preserved surfaces with attractive shades of golden-brown and lavender toning and vibrant mint luster underneath. Population: 84 in 65 Full Head, 58 finer (7/15).

From The Birmingham Collection. NGC ID# 243L, PCGS# 5747

- 4826 1924 MS65 Full Head PCGS.** A delightful Gem, this softly frosted Full Head quarter is boldly struck with light powder-blue and champagne-gold patina. A great example from the final Philadelphia issue with an exposed date.

Ex: Long Beach Signature (Heritage, 5-6/2007), lot 988. NGC ID# 243L, PCGS# 5747

**1924 Quarter, Golden MS66 Full Head
Sharp Interiors**

- 4827 1924 MS66 Full Head PCGS.** The 1924 is fairly elusive in Full Head grades, particular Gem or finer. This Premium Gem representative is boldly rendered, with sharp shield rivets, a Full Head, and crisp feathers along the leading edge of the eagle's left (facing) wing. No abrasions detract from the eye appeal, and each side shows warm golden toning that deepens to amber around the peripheries. Population: 47 in 66 (6 in 66+) Full Head, 11 finer (7/15). NGC ID# 243L, PCGS# 5747

- 4828 1924-D MS64 Full Head PCGS.** The 1924-D Standing Liberty quarter is scarce in Choice condition with Full Head definition. This impressive example displays sharply detailed devices, vibrant mint luster, and wisps of light gold toning.

Ex: New York Signature (Heritage, 3/2012), lot 3370. NGC ID# 243M, PCGS# 5749

**1924-D Quarter, MS65 Full Head
Advanced Die State**

- 4829 1924-D MS65 Full Head PCGS. CAC.** Worn dies produce radiant, frosty luster on this Gem 1924-D quarter, the surfaces lightly toned in warm golden hues and devoid of major abrasions. Extensive cracks are evident around the obverse margins. This issue is fairly available in the absolute sense, but it typically comes with one of the weakest heads in the series; many examples show Liberty's head almost dished-out, similar in appearance to that seen on most 1926-D examples. A Gem Full Head coin, such as is currently offered, is a scarce acquisition. Population: 52 in 65 Full Head, 19 finer (6/15).

From The Birmingham Collection. NGC ID# 243M, PCGS# 5749

- 4830 1924-S MS64 NGC.** A few hints of gold and violet toning visit the lightly marked surfaces of this attractive Choice example. Vibrant mint luster and well-detailed design elements add to the overall appeal. NGC ID# 243N, PCGS# 5750

- 4831 1924-S MS63 Full Head PCGS.** The 1924-S is among the most elusive issues in Full Head. This frosty Select representative has variegated iridescent toning over gray-gold surfaces with well-struck devices. An attractive example for the toning enthusiast. Ex: *New York Signature (Heritage, 3/2012)*, lot 3371. NGC ID# 243N, PCGS# 5751

**1925 Quarter, Frosty MS67
A Beautiful Coin**

- 4832 1925 MS67 PCGS.** On the balance, this is a well-defined 1925 quarter; while the head details are a trifle weak at the temple, all shield rivets are discernible and the eagle shows strong feather detail. Pale lavender, blue, and canary-gold patina embraces amply lustrous and exquisitely preserved surfaces. Housed in a green label holder. Population: 2 in 67, 0 finer (7/15). Ex: *FUN Signature (Heritage, 1/2012)*, lot 5836. NGC ID# 243P, PCGS# 5752
- 4833 1925 MS66 Full Head PCGS.** Soft golden-tan and sky-blue patination adorns the lustrous surfaces of this Premium Gem. In addition to Liberty's Full Head, the chain mail is sharp, as are the rivets save for the the typical weakness in the three adjacent to Liberty's hip. Both sides are devoid of mentionable marks. Population: 66 in 66 (1 in 66+) Full Head, 10 finer (6/15). NGC ID# 243P, PCGS# 5753
- 4834 1925 MS66 Full Head PCGS.** A trace of champagne toning is noted on each side of this highly lustrous and fully brilliant Premium Gem. The surfaces are exquisite with brilliant mint frost. Population: 66 in 66 (1 in 66+) Full Head, 10 finer (7/15). NGC ID# 243P, PCGS# 5753
- 4835 1925 MS66 Full Head PCGS. CAC.** The typical 1925 quarter in Full Head has strike incompleteness on the shield lines, and rivets two through four. Such is the case with this coin, but it is extraordinary in terms of its impeccable preservation. Whispers of gold patina are the only suggestions of color. Population: 66 in 66 (1 in 66+) Full Head, 10 finer (7/15). NGC ID# 243P, PCGS# 5753
- 4836 1926 MS65 Full Head PCGS.** Liberty's head is fully detailed and only a few shield rivets are incomplete on this remarkable Gem. The well-preserved surfaces are brightly lustrous and show a few hints of pale gold toning. Population: 93 in 65 (1 in 65+) Full Head, 42 finer (7/15). Ex: *The Birmingham Collection*. NGC ID# 243R, PCGS# 5755
- 4837 1926 MS65 Full Head PCGS.** Delicate almond-gold toning tints this mostly brilliant, nearly unabraded Gem. The shield lines are indistinct, but the eagle's leading edge feathers are bold. The 1926 is surprisingly scarce in this grade, since a majority of certified examples cannot qualify for a Full Head designation. Ex: *FUN Signature (Heritage, 1/2012)*, lot 5837. NGC ID# 243R, PCGS# 5755

**1927 Standing Liberty Quarter, MS67
Among the Finest Certified**

- 4838 1927 MS67 PCGS. CAC.** The 1927 is an available issue in most grades, but Full Head and non-Full Head examples become collectively rare at the Superb Gem level. This piece is nearly a candidate for a Full Head designation, but lacks just a touch of the hairline definition. The shield rivets are all present and the stars are sharp. Beautifully preserved, satiny surfaces yield iridescent champagne-gold toning in the centers with pastel rainbow color around the peripheries. Population: 4 in 67, 0 finer (7/15). NGC ID# 243U, PCGS# 5760
- 4839 1927 MS66 Full Head PCGS.** Aside from two incomplete rivets and softness on the shield, this is a sharply defined Premium Gem with full detail on Liberty's head. Glowing luster emanates from untuned, scantily marked surfaces. Population: 55 in 66 (4 in 66+) Full Head, 5 finer (6/15). NGC ID# 243U, PCGS# 5761
- 4840 1927 MS66 Full Head PCGS. CAC.** An impressive piece with bold design motifs, this Premium Gem exhibits full head details and nearly complete shield details. Both sides are highly lustrous with frosty silver surfaces beneath dappled gold and violet toning. Population: 55 in 66 (4 in 66+) Full Head, 5 finer (7/15). NGC ID# 243U, PCGS# 5761
- 4841 1927-D MS65 Full Head PCGS. CAC.** The '27-D is a very elusive issue in Gem condition and with full detailing on Liberty's head. In fact, along with the 1926-S, the '27-D is one of the poorest produced issues from the 1920s in the Standing Liberty quarter series. This piece is sharply defined on Liberty's head and shows radiant, satin-like luster beneath an even layer of pale rose toning. Population: 85 in 65 (4 in 65+) Full Head, 15 finer (6/15). Ex: *The Birmingham Collection*. NGC ID# 243V, PCGS# 5763

1927-D Quarter, Vibrant MS65+ Full Head

- 4842 1927-D MS65+ Full Head PCGS. CAC.** This high-end Gem 1927-D Standing Liberty quarter displays sharp strike details in most areas, including Full Head definition, but the shield rivets are a little soft. Vibrant mint luster is evident on both sides, with attractive shades of champagne-gold toning. Population: 85 in 65 (4 in 65+) Full Head, 15 finer (6/15). Ex: *New York Signature (Heritage, 3/2012)*, lot 3373. NGC ID# 243V, PCGS# 5763
- 4843 1928 MS65 Full Head PCGS.** Olive-green and lavender shades enrich this well struck and lustrous Gem. Unabraded save for subtle marks on the field near the eagle's breast. Encapsulated in a green label holder. Ex: *The Birmingham Collection*. NGC ID# 243X, PCGS# 5767

- 4844 1928 MS65 Full Head PCGS.** A wheat-gold and olive-green Gem that boasts booming luster and an exceptionally preserved obverse. The reverse is only lightly abraded. The date is fully struck, the head is well defined, and the eye appeal is impressive. Encapsulated in an old green label holder.
Ex: Dr. John Y. Harper, Jr. Collection (Heritage, 3/2012), lot 3374, which realized \$2,070. NGC ID# 243X, PCGS# 5767

**1928-D Quarter, MS65 Full Head
Mint-Fresh Luster**

- 4845 1928-D MS65 Full Head PCGS. CAC.** The 1928-D is more elusive in Full Head grades than many novices realize. This Gem example shows the appropriate detail on Liberty's head, and is also above-average — although not sharp — on the shield and stars. Both sides show frosty champagne-tinted luster and are devoid of distracting abrasions. Population: 28 in 65 (1 in 65+) Full Head, 20 finer (6/15).
From The Birmingham Collection. NGC ID# 243Y, PCGS# 5769

- 4846 1929 MS66 Full Head PCGS. CAC.** Occasional whispers of gold and bluish-green appear on each side. This lustrous Premium Gem is practically devoid of blemishes, and strike softness is restricted to the shield lines and first few rivets. PCGS reports seven Full Head coins finer (7/15).
Ex: FUN Signature (Heritage, 1/2012), lot 5847. NGC ID# 2442, PCGS# 5773
- 4847 1929-D MS64 Full Head PCGS.** The J.H. Cline reference (2007) estimates only 2% of the 1.3 million quarters struck at Denver in 1929 qualify for a Full Head designation. This near-Gem is strongly detailed with a bit of high-point incompleteness. Brilliant with shimmering satin luster and pale khaki-tan patina around Liberty's head. NGC ID# 2443, PCGS# 5775
- 4848 1929-D MS64 Full Head PCGS.** Rich gold-to-orange patina overall with splashes of rose and violet. Strong luster lights up each side and Liberty's figure checks off all the Full Head boxes. NGC ID# 2443, PCGS# 5775

**1929-D Quarter, MS65 Full Head
Uncommonly Well-Struck**

- 4849 1929-D MS65 Full Head PCGS. CAC.** This final D-mint Standing Liberty Quarter issue often displays a substandard strike and is quite challenging with full head detail and in Gem condition. Both sides of this satiny, high-quality survivor are boldly defined throughout and display pale champagne toning with bits of speckled charcoal color here and there at the borders. Population: 42 in 65 Full Head, 12 finer (6/15).
*Ex: Baltimore Signature (Heritage, 7/2003), lot 7171.
From The Birmingham Collection. NGC ID# 2443, PCGS# 5775*

- 4850 1929-S MS67 PCGS. CAC.** Gold and crimson at the borders with soft silver and pale champagne shadings through the interiors. Softness at Liberty's head and shield, as often seen on this challenging later issue. Population: 12 in 67 (1 in 67+), 0 finer (7/15).
Ex: Central States Signature (Heritage, 4-5/2010), lot 798. NGC ID# 2444, PCGS# 5776

- 4851 1930 MS67 PCGS. CAC.** Housed in a green-label PCGS holder, this Superb Gem is highly lustrous with a hint of champagne toning over frosty silver surfaces. The strike is precise except on the center of Liberty's head and the usual two shield rivets.
Ex: Houston Signature (Heritage, 12/2008), lot 1341, which realized \$2,530. NGC ID# 2445, PCGS# 5778

- 4852 1930-S MS66 Full Head PCGS Secure.** The 1930-S is an available issue in Full Head, though it is much scarcer than the 1930. This frosty Premium Gem has a veil of light golden patina over well-preserved surfaces. The head detail is complete, while a couple of rivets, the shield lines, and the breast feathers are indistinct. PCGS shows just 21 finer coins (7/15). NGC ID# 2446, PCGS# 5781

- 4853 1930-S MS66 Full Head PCGS. CAC.** The 1930-S was generally a well-produced issue and a number of high-grade examples exist with the Full Head designation, like this coin. This attractive Premium Gem exhibits vibrant mint luster and outstanding eye appeal. Population: 93 in 66 (2 in 66+) Full Head, 21 finer (7/15). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

- 4854 1932-D MS63 PCGS.** Some mottled original toning has gathered over each side. A well-defined example of this first-year key date Washington quarter, with lightly marked surfaces and vibrant mint luster. NGC ID# 2448, PCGS# 5791

- 4855 1932-D MS64 PCGS.** An example of the 1932-D can be found at the top of most collectors' want lists, as this key date claims a low mintage of 436,800 coins. Mottled khaki-tan and crimson toning embraces each side, and satiny luster radiates from minimally marked surfaces. Very scarce and largely out of reach in higher grades. NGC ID# 2448, PCGS# 5791

- 4856 1932-D MS64 PCGS.** Issued near the bottom of the Great Depression, the 1932-D quarter has the second-lowest mintage of the series and is regarded as the key regular issue. This lustrous and well struck near-Gem has light lime-green toning and pleasing preservation. Encased in an old green label holder. NGC ID# 2448, PCGS# 5791

- 4857 1932-D MS64 PCGS.** Lovely golden-brown and powder-blue toning endows this lustrous and well preserved near-Gem. An uncommonly pleasing example of the coveted series key. Certified in a green label holder.
From The Birmingham Collection. NGC ID# 2448, PCGS# 5791

- 4858 1932-D MS64 PCGS.** *Ex: Monge Collection.* With its low mintage of 436,800 pieces, the 1932-D is the undisputed key to the series. This coin displays bright original surfaces with the slightest hints of gold toning. A sharp strike augments the considerable eye appeal. Free of any serious distractions.
Ex: Summer FUN Signature (Heritage, 7/2010), lot 3910. NGC ID# 2448, PCGS# 5791

- 4859 1932-D MS64 PCGS. CAC.** An attractive Choice example of this first-year key, with lightly marked lustrous surfaces that show highlights of lavender and gray toning. The design elements are sharply detailed throughout. NGC ID# 2448, PCGS# 5791

- 4860 1932-D MS64 PCGS. CAC.** Caramel-gold toning adheres to the upper obverse margin and most of the reverse. Satin luster dominates each side, and a loupe reveals only inconsequential contact. The 1932-D is the rarest regular issue of the series, and is a prize even in well-worn condition.
Ex: Summer FUN Signature (Heritage, 7/2010), lot 3908. NGC ID# 2448, PCGS# 5791

**1932-D Quarter, MS65
Registry Set Potential**

- 4861 1932-D MS65 PCGS.** Always a popular coin and the true key to the series, especially at this lofty grade level, the low-mintage 1932-D Washington quarter is a rarity in Gem preservation. Finer examples are prohibitively rare, and few Gem examples are likely to compare to the present piece. Light silver-gray patina is present on both sides, more so on the obverse, and there are no mentionable abrasions on either side. Here is an excellent opportunity for the advanced Set Registry collector working on the Washington series. Population: 79 in 65 (2 in 65+), 2 finer (6/15).
Ex: Long Beach Signature (Heritage, 2/2005), lot 6777; Long Beach Signature (Heritage, 9/2010), lot 4046. NGC ID# 2448, PCGS# 5791

- 4862 1932-S MS64 PCGS Secure. CAC.** An attractive Choice specimen of this first-year, low-mintage key, with sharply detailed design elements and lightly marked lustrous surfaces. A few hints of golden-tan toning are evident. NGC ID# 2449, PCGS# 5792

- 4863 1932-S MS65 NGC.** The 1932-S is an important key date to the Washington quarter series. MS65 is the finest grade most collectors can expect to encounter. NGC and PCGS have seen a mere nine pieces finer. Lustrous surfaces display splashes of deep russet at the obverse border and lighter freckles of this color on the reverse. The design elements are well-impressed. Census: 70 in 65 (1 in 65 ★), 5 finer (7/15). NGC ID# 2449, PCGS# 5792

**1932-S Washington Quarter, MS65
Softly Luminous**

- 4864 1932-S MS65 PCGS. CAC.** A high-grade 1932-S can provide security for the high ranking of a competitive Registry Set, and thus such coins are in constant demand. This Gem example is second only to four Premium Gems at PCGS (7/15). The strike is bold, and the well-preserved, frosty surfaces display shades of ice-blue and champagne toning. NGC ID# 2449, PCGS# 5792

- 4865 1934 Medium Motto, FS-402, MS67+ PCGS.** This brilliant Superb Gem has shades of powder-blue on the reverse and features a Medium Motto, listed in *Cherrypickers'* "for informational purposes only." The fields are impeccably preserved, and a few tiny grazes on the cheek prevent an MS68 assessment. PCGS reports a single coin finer, all varieties included (7/15). PCGS# 146002 Base PCGS# 5793

- 4866 1934 Medium Motto, FS-402, MS67+ PCGS. CAC.** Beautiful fire-red, sun-gold, and jade-green toning graces the borders of this lustrous and crisply struck quarter. The usually encountered Motto subtype for the issue, although listed in *Cherrypickers'* for comparison with the scarcer Light and Heavy Motto varieties. PCGS has certified only a single example any finer (6/15). PCGS# 146002 Base PCGS# 5793

- 4867 1934-D Heavy Motto MS66 PCGS.** Fire-red and forest-green endow the obverse periphery, while the reverse border displays rich peach and lemon shades. The centers are pearl-gray. The sharply struck surfaces are smooth and lustrous. The low mintage 1934-D ranks among the scarcest Washington issues. Population: 33 in 66 (3 in 66+), 4 finer (6/15).
Ex: J&A Collection Registry Set (Heritage, 3/2003), lot 5793, which realized \$5,290. PCGS# 85796

- 4868 1935-D MS67 PCGS.** This is one of the finer examples certified of this scarcer D-mint quarter. The mint luster is surprisingly bright for a Denver coin, and each side is covered with light gray toning that deepens to golden around the peripheries. An exceptional, nearly perfect coin. Population: 21 in 67 (1 in 67+), 0 finer (7/15).
Ex: Baltimore Signature (Heritage, 7/2003), lot 7207. NGC ID# 244E, PCGS# 5798

- 4869 1935-S MS67 PCGS.** The satiny, well frosted surfaces are essentially free from marks and bathed in speckled golden-rose, lemon-yellow, violet, and greenish-gray toning. The design elements are sharply impressed. A simply spectacular coin that is highly elusive at this level. Population: 38 in 67, 0 finer (6/15).
Baltimore Signature (Heritage, 7/2003), lot 7211. NGC ID# 244E, PCGS# 5799

- 4870 1936-D MS66 PCGS.** The original mintage of this issue is 5.3 million coins—a total that is not unusually low for a branch mint Washington quarter from this era. Nevertheless, the 1936-D is a well known semi-key date that becomes progressively more difficult to locate with grade. Golden tinged, both the obverse and reverse are awash in scintillating mint luster. There do not appear to be any abrasions that would bar this coin from an even higher grade. A Gem that is sure to delight the specialist. PCGS has graded only 17 pieces finer (6/15).
Ex: ANA Signature (Heritage, 3/2003), lot 5798. NGC ID# 244H, PCGS# 5801

**1936-D Quarter, MS67
Registry Set Contender**

- 4871 1936-D MS67 NGC.** Unquestionably original, each side has light silver-gray patina with a dark rim of color encircling the periphery; a small amount of the lighter russet tone appears in the obverse fields. The surfaces are nearly flawless with just two or three tiny tick marks seen on the obverse. A wispy die crack, as struck, extends along Washington's scalp, along with a few die polish lines, also as made. A conditional rarity with well-balanced eye appeal. Census: 11 in 67 (1 in 67+), 0 finer (6/15).
Ex: Central States Signature (Heritage, 5/2003), lot 6328. NGC ID# 244H, PCGS# 5801

- 4872 1936-S MS67 PCGS.** Fulsome mint luster shimmers over both sides in the absence of distracting bagmarks. The reverse is golden tinged, whereas the obverse displays streaks of orange-tan color around the periphery. The sharp strike is free of criticism. Population: 39 in 67 (2 in 67+), 0 finer (7/15).
Long Beach Signature (Heritage, 2/2003), lot 6833. NGC ID# 244J, PCGS# 5802

- 4873 1936-S MS67 PCGS.** The 1936-S, with a mintage of 3,828,000 pieces, boasts the eleventh lowest mintage in the Washington quarter series. Silver-gray surfaces display soft luster, and occasional whispers of orange-gold, rose-pink, powder-blue, and faint green coloration. The design features are adequately impressed, and just a few unimpressive marks are located on Washington's neck and the eagle's legs. Population: 39 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 244J, PCGS# 5802
- 4874 1937-D MS67 PCGS.** Blazing luster emanates from the silver-white surfaces of this gorgeous Superb Gem. Well-struck design features and impeccably preserved surfaces round out its outstanding eye appeal. The 1937-D is a significant condition rarity in this level of preservation. Population: 55 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 244L, PCGS# 5804
- 4875 1937-D MS67 PCGS.** Ex: Omaha Bank Hoard. Brilliant and lustrous with good strike and exemplary surfaces. An early branch issue seldom seen in the present quality. Population: 55 in 67 (1 in 67+), 0 finer (7/15).
Ex: *Orlando FUN Signature (Heritage, 1/2008)*, lot 2055. NGC ID# 244L, PCGS# 5804
- 4876 1937-D MS67 PCGS.** A blazing Superb Gem that boasts thick luster and a strong strike. The surfaces are close to pristine, and only lemon-lime tints here and there deny full brilliance. Like all branch mint Washington quarters from the 1930s, the 1937-D is challenging to find at the MS67 level. Population: 55 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 244L, PCGS# 5804
- 4877 1937-D MS67 NGC. CAC.** Ex: Eric P. Newman Collection. Frosty luster and pastel shades of peach, gold, and blue create lovely eye appeal for this Superb Gem example. A few tiny flecks of deeper color also appear. Census: 27 in 67 (2 in 67+, 2 in 67 ★), 0 finer (6/15).
Ex: *Eric P. Newman Collection, Part II (Heritage, 11/2013)*, lot 33273. NGC ID# 244L, PCGS# 5804
- 4878 1937-D MS67 PCGS. CAC.** Frosty silver with hints of slate and blue-gray along the rims. Though softly struck as usual in the centers, this Superb Gem is carefully preserved and gorgeous. Population: 55 in 67 (1 in 67+), 0 finer (7/15).
From *The College Collection, Part Two*. NGC ID# 244L, PCGS# 5804
- 4879 1937-S MS67 NGC.** Booming luster and exemplary preservation confirm the quality of the present Superb Gem. Faintly toned olive-gold and russet. Among the lowest mintage issues of the series. Housed in a former generation holder. Census: 28 in 67, 0 finer (6/15). NGC ID# 244M, PCGS# 5805
- 4880 1939 MS68 NGC.** Glints of gold, powder-blue, and rose grace the brilliant surfaces of this pristine Washington quarter. The strike is bold, and the preservation is unsurpassed. From a mintage of 33.5 million coins, this is among the 14 finest survivors at both services combined. Census: 6 in 68, 0 finer (7/15). NGC ID# 244R, PCGS# 5808

**1939-D Quarter, MS67+
Tied for Finest Certified**

- 4881 1939-D MS67+ PCGS. CAC.** Out of a population of 64 MS67 coins at PCGS, this premier Registry Set candidate is one of only two awarded a Plus designation, and none are finer (7/15). The strike is bold and the frosty surfaces show irregular areas of amber toning on otherwise brilliant luster. A single small tick on Washington's eyebrow appears to be all that precludes a full MS68 grade. NGC ID# 244S, PCGS# 5809

- 4882 1940 MS67+ PCGS. CAC.** Near-silver at the interiors on both sides with copper, mocha, and gold peripheral toning on the obverse. Seldom found any finer, with just two such pieces known to PCGS (7/15). NGC ID# 244U, PCGS# 5811
- 4883 1940-D MS67 PCGS. CAC.** Varying shades of reddish-tan patination hug the borders of this lustrous Superb Gem D-mint Washington quarter. The design elements are well-struck and there are no mentionable marks. This piece yields impressive eye appeal. An important condition rarity at this level of preservation. Population: 45 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 244V, PCGS# 5812
- 4884 1941 MS67+ PCGS. CAC.** Colorful crescents of purple, orange, and blue toning hug most of the obverse periphery, and the lower right margin on the reverse. The centers are brilliant with radiant frost that illuminates nearly unmarked surfaces. The Plus designation and CAC approval sticker affirm the high quality of this Superb Gem. Just one coin finer at PCGS (7/15). NGC ID# 244X, PCGS# 5814
- 4885 1941 MS67+ PCGS. CAC.** Vivid shades of sea-green and magenta toning blanket the impeccably preserved surfaces of this spectacular high-end Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. PCGS has graded one numerically finer example (7/15). NGC ID# 244X, PCGS# 5814
- 4886 1941 MS67+ PCGS. CAC.** This high-end Superb Gem Washington quarter exhibits sharply detailed design elements and vibrant mint luster throughout, with hints of greenish-gold and magenta toning at the peripheries. PCGS has graded one numerically finer example (7/15). NGC ID# 244X, PCGS# 5814
- 4887 1941-S MS67 PCGS. CAC.** Despite a mintage exceeding 16 million pieces, the 1941-S quarter is extremely scarce in Superb Gem, and virtually unobtainable any finer. A melange of orange-gold, gray, light green, yellow-gold, and crimson toning cascades over the lustrous surfaces of this outstanding, CAC-endorsed example. Sharply struck design elements and impeccable preservation further enhance the coin's eye appeal. Population: 60 in 67 (4 in 67+), 0 finer (6/15). NGC ID# 244Z, PCGS# 5816

**1941-S Quarter MS67+
None Finer at PCGS**

- 4888 1941-S MS67+ PCGS. CAC.** This Registry Set essential is one of the finest at PCGS, and ranks nearly half a grade point above the coin in the current highest-rated Registry Set. The strike is bold and the surfaces display vibrant, satiny luster. Brilliant centers yield to deeper sun-gold, amber, and aquamarine borders, with the colors slightly more intense on the obverse. Population: 60 in 67 (4 in 67+), 0 finer (7/15). NGC ID# 244Z, PCGS# 5816
- 4889 1942-D Doubled Die Obverse, FS-101, AU55 PCGS.** The date is extremely thick, as is LIBERTY, which also shows separation of letters. Doubling is even more dramatic on the motto, especially the G in GOD and the R in TRUST. This untoned example displays cartwheel luster and minimal marks. The portrait has only a whisper of wear. Population: 18 in 55, 24 finer (6/15).
Ex: *Patrick Mullen Collection (Heritage, 1/2004)*, lot 6389, which realized \$1,495. PCGS# 145011 Base PCGS# 95818

4890 1942-D Doubled Die Obverse, FS-101, AU55 PCGS. All obverse legends are extremely thick, especially LIBERTY. The die doubling is sufficiently dramatic for the variety to attain a separate *Guide Book* listing. An untoned, lightly marked, and partially lustrous example. PCGS# 145011 Base PCGS# 95818

4891 1943-D MS67 PCGS. CAC. Mottled violet and turquoise peripheries frame the surfaces with just a faint trace of gold. This Superb Gem has no noticeable defects save for a few scattered minor planchet flaws. Population: 58 in 67 (7 in 67+), 1 finer (7/15). NGC ID# 2456, PCGS# 5821

**1943-S Quarter, MS67+
One Submission Finer at PCGS**

4892 1943-S MS67+ PCGS. CAC. This S-mint issue enjoys a mintage of 21.7 million pieces, comparing favorably to its Philadelphia counterpart. The 1943-S is about as challenging in the upper levels of Mint State as the lower-mintage 1943-D. Brilliant centers turn to wisps of golden-orange, magenta, and forest-green toning around the borders, with the effect being more pronounced on the obverse. Design definition is strong centrally, and marks are virtually non-existent. Population: 55 in 67 (3 in 67+), 1 finer (7/15). NGC ID# 2457, PCGS# 5822

4893 1943-S Doubled Die Obverse, FS-101, MS65 W NGC. All obverse legends are strongly die doubled, especially IN GOD WE TRUST. This brilliant and lustrous Gem appears conservatively graded, since contact is confined to an inconsequential tick on the eagle's left (facing) leg. Census: 12 in 65 (1 in 65+), 7 finer (6/15). PCGS# 145154 Base PCGS# 5823

4894 1943-S Doubled Die Obverse, FS-101, MS65 PCGS. An obvious *Guide Book* doubled die with all obverse legends affected. IN GOD WE TRUST shows the most prominent spread. An essentially brilliant Gem with potent luster and undisturbed surfaces. Population: 22 in 65 (1 in 65+), 13 finer (6/15). Ex: *Orlando FUN Signature (Heritage, 1/2012)*, lot 5875. PCGS# 145154 Base PCGS# 5823

4895 1948 MS67+ PCGS. CAC. Freckles of orange-gold, russet, lime-green, and rose toning gravitate to the margins of this high-end Superb Gem. Sharply struck and immaculately preserved, lustrous surfaces round out the coin's marvelous eye appeal. Population: 93 in 67 (6 in 67+), 1 finer (7/15). NGC ID# 245L, PCGS# 5836

**1948-D Quarter, MS67+
Registry Set Quality**

4896 1948-D MS67+ PCGS. CAC. Vibrant, satiny luster cartwheels freely around each side of this Superb Gem Registry coin, illuminating near-brilliant centers and deep amber, olive, gold, and midnight-blue peripheral toning. The strike is bold, and close study with a loupe reveals just a few trivial grazes which preclude a full MS68 grade. Population: 42 in 67 (4 in 67+), 0 finer (7/15). NGC ID# 245M, PCGS# 5837

4897 1950-S/D FS-601 MS66 NGC. The upper right curve of the Denver mintmark is irrefutable. This lustrous and high grade representative is brilliant aside from a band of autumn-brown and aquamarine toning along the lower obverse margin. Ex: *Orlando FUN Signature (Heritage, 1/2002)*, lot 6891, which realized \$1,782.50. PCGS# 145639 Base PCGS# 5845

4898 1950-S/D FS-601 MS66 PCGS. Dazzling luster illuminates dappled sea-green and tan-gold surfaces. Well struck save for the centers of a few peripheral letters, and contact is minimal across each side. A beautiful example of this interesting variety, created the same year (and perhaps by the same mint worker) as the 1950-D/S. Population: 37 in 66 (3 in 66+), 5 finer (6/15). Ex: *Dallas Signature (Heritage, 12/2005)*, lot 746. PCGS# 145639 Base PCGS# 5845

**1950-S/D Washington Quarter, MS66
Intense Cartwheel Luster**

4899 1950-S/D FS-601 MS66 PCGS. CAC. This *Guide Book* variety is seldom seen in Premium Gem condition, and finer representatives are rare. This piece is sharply struck and awash in vibrant, frosty luster that shows just a touch of light golden toning. Highly eye-appealing, suitable for Registry purposes. Population: 37 in 66 (3 in 66+), 5 finer (7/15). PCGS# 145639 Base PCGS# 5845

**1951-D Quarter, MS67+
Beautifully Toned Registry Coin**

- 4900 1951-D MS67+ PCGS. CAC.** Blended rainbow hues encircle the peripheral regions of this Plus-graded Superb Gem Registry coin, while the centers show warm banana-gold color. The strike is bold and a few trivial surface grazes are almost indistinguishable amid the vibrant, frosty luster. Only a single coin is finer at either leading service. Population: 40 in 67 (2 in 67+), 1 finer (6/15). NGC ID# 245X, PCGS# 5847

- 4901 1954-D MS67 PCGS. CAC.** One of the finest examples extant, this amazing Superb Gem has crimson, rose, and russet patina along the upper obverse, while the remaining areas are largely brilliant. Shimmering luster graces each side, enhancing the aesthetic quality. Population: 14 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 2468, PCGS# 5856

**1954-S Quarter, MS67+
Only One Coin Finer at PCGS**

- 4902 1954-S MS67+ PCGS. CAC.** The Plus designation separates this 1954-S Washington quarter from the majority of its peers at the MS67 grade level and distinguishes it as a suitable candidate for Registry purposes. The strike is bold and each side shows mottled olive toning over powder-blue luster, with the obverse also showing deeper rainbow colors around the periphery. Population: 69 in 67 (5 in 67+), 1 finer (7/15). NGC ID# 22FU, PCGS# 5857

**1955-D Quarter Dollar, MS66+
Only Two Finer at PCGS**

- 4903 1955-D MS66+ PCGS. CAC.** An impressive Denver Mint quarter dollar, this Premium Gem exhibits brilliant mint frost beneath delicate champagne toning. The surfaces are pristine and highly lustrous. PCGS has only certified two finer examples of this issue (7/15), and this nearly equal example will make a nice addition to a Registry set. NGC ID# 246A, PCGS# 5859

- 4904 1955-D MS67 NGC.** Dappled golden-brown, apple-green, and cream-gray iridescence bathes this lustrous and practically pristine Superb Gem. Housed in a prior generation holder. Census: 33 in 67 (1 in 67 ★, 1 in 67+★), 0 finer (6/15). NGC ID# 246A, PCGS# 5859

PROOF WASHINGTON QUARTERS

- 4905 1936 PR65 PCGS. CAC.** Dappled olive-green and rose-red toning endows this coruscating and fully struck Gem. The first proof issue of the series, and the rarest as well, since only 3,837 pieces were produced. Certified in an old green label holder. *From The College Collection, Part Two.* NGC ID# 27HN, PCGS# 5975

- 4906 1936 PR66 NGC.** The first proof issue in the Washington quarter series is represented by this lovely Premium Gem with fully brilliant silver surfaces, reflective devices, and mirrored fields. NGC has only certified 25 finer examples (7/15). NGC ID# 27HN, PCGS# 5975

- 4907 1936 PR66 PCGS.** A spectacular Premium Gem example of the first proof Washington quarter, with sharply detailed design elements and deeply reflective fields. Shades of greenish-gold toning add to the outstanding eye appeal. PCGS has graded 10 numerically finer examples (7/15). NGC ID# 27HN, PCGS# 5975

- 4908 1937 PR67 PCGS. CAC.** A dramatically toned Superb Gem proof with a pale gray base and bold dots and dashes in blue-green, gold, peach, and related colors. PCGS has graded just three numerically finer pieces (7/15). *From The College Collection, Part Two.* NGC ID# 27HP, PCGS# 5976

- 4909 1940 PR68 NGC.** Pale ice-blue toning delicately blankets this near-flawless Washington quarter proof. Each side shows moderate field-motif contrast and profound reflectivity. Among the finest representatives from a mintage of 11,246 specimens. Census: 30 in 68, 0 finer (7/15). NGC ID# 27HT, PCGS# 5979 Base PCGS# 5972

- 4910 1955 PR68 ★ Ultra Cameo NGC.** A virtually pristine specimen of this popular proof date, with razor-sharp definition on all design elements and deeply mirrored fields that contrast profoundly with the frosty devices. Census: 32 in 68 Ultra Cameo (1 in 68 ★ Ultra Cameo), 12 finer (7/15). NGC ID# 27HZ, PCGS# 95987

**1974-S Quarter, PR70 Deep Cameo
Important Registry Set Candidate**

- 4911 1974-S PR70 Deep Cameo PCGS.** At most recent count, PCGS has identified just 19 examples of this proof-only issue in the ultimate PR70 Deep Cameo grade, a scant amount for an issue that was minted to the extent of 2.8 million pieces more than 40 years ago. The surfaces of the present example appear flawless and unimprovable. Population: 19 in 70 Deep Cameo, (7/15). NGC ID# 27JE, PCGS# 96006

EARLY HALF DOLLARS

1794 O-101 Flowing Hair Half, Fine Details America's First Half Dollar

- 4912** 1794 O-101, High R.3 — Tooled — PCGS Genuine. Fine Details. Star 13 is tucked further beneath the bust point than on any other 1794 variety, and star 1 pierces the midpoint of the lowest curl. On the reverse, a die crack runs from the rim to the leaf base below the first S of STATES, confirming the die pair. This net-graded example retains a measure of visual appeal despite the noted handwork by PCGS. The fields are busy with many small marks and a subtle attempt was made to minimize them. Nevertheless, the coin retains an “old silver” look, with deeper silver-gray toning near the rims and around the outer devices. The central elements display a light-gray coloration and adequate appeal for the perceptive bidder looking for an example of America's first half dollar.

1795 2 Leaves Half, O-105, XF40 Deeply Toned Fields

- 4913** 1795 2 Leaves, O-105, High R.3, XF40 NGC. The die marriage is easily recognized by the two points of star 1 solidly touching the lowest curl, and the reverse showing 10 berries left, seven right. This evenly worn and relatively unmarked example shows deep-gray fields and silver high points with good overall eye appeal. PCGS# 39220 Base PCGS# 6052

1795 O-110 Half Dollar, Very Fine Two Leaves Reverse

- 4914** 1795 2 Leaves, O-110, R.3, VF20 PCGS. Deeply blended walnut-brown and sea-green toning blankets both sides. A few of the peripheral letters are faint, such as the L in LIBERTY, but the wings and curls are nicely detailed. Minimally abraded despite a single hair-thin line on Liberty's neck. Encapsulated in a green label holder. PCGS# 39228 Base PCGS# 6052

- 4915** 1795 2 Leaves, O-115, R.5, VG10 NGC. Stone-gray motifs are surrounded by golden-brown, aquamarine, and plum-red patina. All legends are bold, and some plumage detail is apparent. The eagle and portrait exhibit moderate hairlines, and a small lamination is noted near star 14. PCGS# 39231 Base PCGS# 6052

1795 Flowing Hair Half, XF40 S Over D Variety, O-129

- 4916** 1795 2 Leaves, Second S Over D, O-129, R.5, XF40 NGC. The well-known S Over D variety is mentioned in the *Guide Book*, although it does not receive a separate line listing. A similar variety exists on 1795 half eagles (BD-5 and BD-6). The present example of O-129 has Condition Census quality. The surfaces are evenly patinated deep gunmetal-gray, and are surprisingly free from post-strike contact. Light to moderate adjustment marks (as struck) are noted near Liberty's hair. PCGS# 39259 Base PCGS# 6052

1801 O-101 Half Dollar, VF25 Better Heraldic Eagle Date

- 4917** 1801 O-101, R.3, VF25 PCGS. O-101 can be attributed at arm's length, due to the die breaks above the arrowheads. A pearl-gray example of this early and scarce Heraldic Eagle date. All letters in E PLURIBUS UNUM are readable, and most are bold. The obverse is minimally abraded, and the reverse displays moderate marks near the uppermost clouds and AMERICA. PCGS# 39267 Base PCGS# 6064

1802 Draped Bust Half, VF20 O-101, Richly Toned

- 4918** 1802 O-101, R.3, VF20 PCGS. A thick olive-brown patina covers both sides, with pleasing golden highlights that help define the devices and add life to the richly toned surfaces. The obverse appears to be about five points finer than the reverse, but both sides are remarkably free of large marks. A pair of criss-crossing lines is noted on the reverse (possibly adjustment marks) as well as a shallow scrape in the field stars above the right wing. Just 29,890 half dollars were produced in 1802, resulting in one of the most-sought dates of the early Bust half series. PCGS# 39269 Base PCGS# 6065

**1803 Draped Bust Half Dollar, AU58
O-104, Scarce Small 3 Variant**

- 4919** 1803 Small 3, Large Reverse Stars, O-104, R.3, AU58 NGC. The sole die pair for 1803 with a Small 3 in the date, easily identified for the lack of a top serif on the 3. This is a minimally worn example, with extremely sharp hair detail and only slight wear on the eagle. Feather detail above the shield is bold for the grade. Iridescent shades form a rich patina on both sides, with lilac, blue, and reddish-gold hues combining for a pleasing melange. Mint luster remains plentiful beneath the toning. Only minor ticks and marks exist from contact or circulation. As normally seen for the Small 3 variety, die clashing is prominent above the date and to a lesser extent on the reverse. Census (all varieties): 14 in 58, 7 finer (7/15). PCGS# 39274 Base PCGS# 6067

- 4920** 1805 O-111, R.2, XF40 PCGS. A gunmetal-gray and chestnut-brown example. Liberty's cheek and shoulder show moderate wear, and thorough evaluation reveals occasional minor marks. The usual die state without the radial crack between the AM in AMERICA. From *The College Collection, Part Two*. PCGS# 39285 Base PCGS# 6069

- 4921** 1805 O-112, R.2, VF35 PCGS. CAC. Ex: The Agora Collection. Sharp for the VF grade level, showing nearly XF detail. Significant delineation remains in Liberty's hair curls and the eagle's feathers and shield are sharp. Both sides show uniform olive-gray patina that is fully original and there are no significant surface flaws. The reverse is heavily cracked through STATES. This break becomes a heavy cud in a later die state. Examples with the cud are rarely seen. PCGS# 39286 Base PCGS# 6069

- 4922** 1806 Knob 6, Small Stars, O-105a, R.2, XF40 PCGS. CAC. Sharply detailed, save for the upper-right reverse which is weak on the clouds below OF, with original gunmetal-gray toning. Scattered portions of each side also show lighter tan-gray color, mostly around the peripheries. This is the late die state variant of O-105, showing a crack from the date, through the left-hand stars, to the LIB in LIBERTY. In a later stage, this late die state variety shows a rim cud over the LIB. The Overton book lists this variety as a Large Stars obverse, but this distinction is no longer recognized by PCGS, which lists O-105 and -105a as a Small Stars die pairing. PCGS# 39305 Base PCGS# 6074

1806 Pointed 6, No Stem Half, O-109, AU50

- 4923** 1806 Pointed 6, No Stem, O-109, R.3, AU50 NGC. The sole die pairing for this *Guide Book* variety, although there is a later O-109a die state. Medium blue and copper-gold intermingle and compete for territory on the obverse, with the latter color winning the battle on the reverse. Considerable luster shines underneath the moderate patina. PCGS# 39310 Base PCGS# 6073

- 4924** 1806 Pointed 6, Stem, O-116, R.3, XF45 NGC. A crack from the left base of the date through the stars, and another through the top of UNITED attribute the variety. The T in LIBERTY is boldly recut. Pleasing steel-gray and golden patina blankets smooth surfaces that show substantial design detail. An ideal Draped Bust half dollar for type purposes. PCGS# 39319 Base PCGS# 6071

**1806 Pointed 6, Stem Half, O-119, AU55
Vivid Patina on Both Sides**

- 4925** 1806 Pointed 6, Stem, O-119, R.3, AU55 PCGS. Weakness on the rear hair curls and the eagle chomping down on a star point help in attribution. This piece displays stunning toning in shades of burnt orange, olive, gold, and blue on both sides that should have Bust half specialists in a lather. Ample luster percolates from beneath, despite the vivid color. PCGS# 39323 Base PCGS# 6071

- 4926** 1807 Draped Bust, O-103, R.3 — Improperly Cleaned — NGC Details. AU. Although this stone-gray Bust half has been dipped, luster still shimmers from the curls, borders, and eagle. No marks are noticeable and the strike is exceptionally crisp for the type. PCGS# 39340 Base PCGS# 6079

BUST HALF DOLLARS

**1807 Capped Bust Half Dollar, VF20
O-111b, 'Bearded Goddess' Die Break**

- 4927** 1807 Capped Bust, Bearded Goddess, O-111b, R.5, VF20 NGC. Always a collector favorite, this example of the John Reich two-year design is a microcosm of all that is appealing about collecting early Bust halves. The mid-die state O-111b variety features the 50/20 overdenomination plus the diagnostic die crack from chin-to-chest that earns the popular numismatic nickname of the Bearded Goddess. This example displays smooth, virtually abrasion-free surfaces and fantastic old-time album toning with glints of golden luster still visible. It is the NGC VARIETYPLUS plate coin for the variety. Census: 18 in 20, 8 finer (6/15). PCGS# 39358 Base PCGS# 39357

**1807 Capped Bust Half, AU55
50 Over 20, Large Stars, O-112**

4928 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU55 PCGS. The 50/20 die cutter error is obvious beneath the 5 of the denomination on this Choice, frosty About Uncirculated half. Just a whisper of gold toning sits at the rims of the otherwise brilliant, untuned surfaces. Sharp strike detail and considerable mint luster remain despite brief circulation, with only minor abrasions determining the grade. Die clashing is noted on both sides. Population (Large Stars varieties): 36 in 55, 52 finer (7/15). PCGS# 39356 Base PCGS# 6086

4929 1807 Capped Bust, Small Stars, O-113, R.2, XF40 NGC. Cross lines or "ribs" through the letters in E PLURIBUS UNUM are the most interesting feature of O-113, though the small obverse stars secure its separate *Guide Book* listing. A glossy and moderately abraded cream-gray, ice-blue, and almond-gold example. A small lamination and edge depression are noted near the 0 in 50 C. PCGS# 39359 Base PCGS# 6087

4930 1809 III Edge, O-111a, R.2, MS62 NGC. A distinctive die defect on the base of the bust truncation below the clasp identifies this variety, while a faint die crack from the rim near the final A in AMERICA denotes the late die state variant. This piece is boldly struck, with satiny luster and dusky lavender-gray and gold toning. A few light abrasions on the obverse are all that limit the grade. Census (All varieties included): 22 in 62, 37 finer (6/15). PCGS# 39389 Base PCGS# 6094

4931 1810 O-102, R.1, AU55 PCGS. Glimpses of orange-red toning visit the margins, but most of this Choice AU half dollar is olive-green. Luster illuminates protected areas, and evident abrasions are confined to a couple of hair-thin obverse lines. PCGS# 39406 Base PCGS# 6095

4932 1810 O-103, R.2, AU55 PCGS. Sea-green and rose-gold toning consumes this partly lustrous half dollar. Well defined except on the neck curls and drapery clasp. Virtually unabraded aside from a slender diagonal mark on Liberty's chin and neck. PCGS# 39408 Base PCGS# 6095

**1810 O-105 Bust Half, Near-Mint
Unblemished Surfaces**

4933 1810 O-105, R.2, AU58 PCGS. CAC. Golden-brown and navy-blue toning graces the margins, but the majority of this satiny half dollar is stone-gray. Attractive and free from apparent abrasions. Overton-105 is readily attributed by the first line of the sixth vertical shield stripe, since it extends deep into the horizontal lines. PCGS# 39411 Base PCGS# 6095

**1811/10 Half Dollar, Near-Mint
O-101, Late Die State**

4934 1811/10 O-101, R.1, AU58 PCGS. Ocean-blue and sun-gold toning graces this satiny and minimally abraded Borderline Uncirculated half dollar. One small spot is noted behind the cap. An unlisted late die state with peripheral elements drawn to the rims. O-101 is identified by the lump between the 81 in the date, and a spike from the top of Liberty's cap. PCGS# 39421 Base PCGS# 6099

1811 Half Dollar, O-105, Satiny MS62

4935 1811 Small 8, O-105, R.4, MS62 PCGS. A scarce Small 8 variety, this example lightly clashed on each side. Luster is satiny and free of major abrasions. Both sides show a blush of light golden toning, although the reverse also has a few small brass-colored overtones. Some striking weakness is noted along the top of Liberty's cap, on stars 9 and 10, and along the corresponding portion of the lower reverse periphery. PCGS# 39427 Base PCGS# 6097

4936 1811 Small 8, O-105a, R.2, AU53 PCGS. This late die state of O-105 has a die crack along the top of UNITED STAT down through ES. A decent strike shows softness on the stars, olive leaves, and eagle's feathers. Bright silver surfaces exhibit a couple of darker toning spots and partial luster. There is a small planchet flaw below C in the denomination. PCGS# 39428 Base PCGS# 6097

4937 1811 Small 8, O-109, R.2, AU55 PCGS. The heavy radial die crack at 10:30 on the reverse confirms the variety. This dusky charcoal-gray example displays ample luster and is unabraded save for thin lines that pass through the M in UNUM. A narrow streak of deeper toning accompanies the fletchings and left shield border. PCGS# 39433 Base PCGS# 6097

**1811 O-109 Half Dollar, MS62
Small 8, Bold Die Crack at Wing**

- 4938** 1811 Small 8, O-109, R.2, MS62 PCGS. A distinctive die break displaces the scroll into two sections and readily identifies the Overton-109 variety. The crack originates from the edge and just brushes the first S in STATES before passing through the scroll near P of PLURIBUS and continuing deep into the left wing. This lustrous MS62 example displays partial tan-gold toning with faint blue accents at the borders. The strike is sharp with strong eye appeal throughout. Population (all Small 8 varieties): 25 in 62 (1 in 62+), 54 finer (7/15). PCGS# 39433 Base PCGS# 6097

**1812/1 O-101 Half, Very Fine
Large 8, Key Guide Book Variety**

- 4939** 1812/1 Large 8, O-101, Low R.5, VF20 PCGS. Deep cream-gray toning blankets this evenly circulated and lightly abraded Very Fine Bust half. The obverse displays light die cracks, but lacks those of O-101a. A much better die marriage, given its own *Guide Book* listing due to the overdate and Large 8 combination. PCGS# 39441 Base PCGS# 6102

**1812/1 Half Dollar, O-102, MS63
Small 8, Guide Book Overdate**

- 4940** 1812/1 Small 8, O-102, R.2, MS63 PCGS. Overton-102 and the later die state Overton-102a represent the sole Small 8 examples of the overdate, although they appear far more frequently than the rare Large 8 with the overdated 2/1. This example is lustrous and attractive, with a sharp strike except on star centers 3 through 7. Reddish-gold and gunmetal-blue accents enliven lustrous silver-gray surfaces. Population (Small 8 variety): 8 in 63, 7 finer (6/15). PCGS# 39443 Base PCGS# 6101

**1812 Large Date Half Dollar
O-103, Sharply Defined MS64+**

- 4941** 1812 Large 8, O-103, R.1, MS64+ PCGS. CAC. Vertical die lines above the eagle's left (facing) shoulder attribute this lustrous steel-gray and caramel-gold near-Gem. The centers and left borders are fully struck, although the right-side stars are softly impressed. No marks are readily apparent beneath a loupe. Triple clashed, most prominently beneath the scroll. PCGS# 39446 Base PCGS# 6100

**1813 O-105 Half Dollar, MS64
Golden Toning, Unabraded**

- 4942** 1813 O-105, R.1, MS64 PCGS. Multiple sets of clash marks and weak horizontal shield lines attribute the collectible Overton-105. A late die state with border elements drawn toward the rims, although the O-105a crack is not apparent. Lustrous and unabraded with a sharp strike and blushes of golden-brown toning on both sides. Likely within the O-105 Condition Census. *From The College Collection, Part Two.* PCGS# 39463 Base PCGS# 6103

**1813 O-107 Capped Bust Half
Attractive, Near-Mint Condition**

- 4943** 1813 O-107, R.4, AU58 PCGS. The Overton-107 variety is considerably scarcer in the early die state than the O-107a later die state, which shows an extensively cracked reverse through the top of the 50 C. denomination. Here, die clashing appears in the same area (and is often mistaken for a die break) but the crack has not yet developed. This sharp and attractive half displays smooth, hard surfaces with lilac, blue, and golden toning that deepens at the borders. Much silver luster remains, shining through the natural patina. Few marks of any kind interrupt the excellent eye appeal of this scarce, near-Mint prize. *From The College Collection, Part Two.* PCGS# 39467 Base PCGS# 6103

- 4944** 1814 O-105, R.2, AU58 NGC. An early die state despite extensive clash marks on both sides. Later states, known as the Single Leaf, have the reverse die lapped, removing the leaf just above the upper berry. This frosty near-Mint example has considerable mint luster with splashes of grayish-gold patina. A trace of wear prevents a higher grade.
Ex: The JG Collection (Heritage, 4/2012), lot 4397. PCGS# 39480 Base PCGS# 6105

**1815/2 Half Dollar, XF40
O-101, Low Mintage Key**

- 4945** 1815/2 O-101, R.2, XF40 PCGS. The eagle's plumage is well defined, and both sides are free from abrasions apparent to the unaided eye. The slate-gray surfaces display vertical hairlines. Struck from multiply clashed dies, as usual for this Capped Bust key date. The *Guide Book* mintage is approximately half that of the 1815 quarter, but the latter issue is much more prevalent, perhaps due to saving by the Economite commune. PCGS# 39491 Base PCGS# 6108

**1815/2 Half Dollar, O-101, XF45
Important Capped Bust Issue**

- 4946** 1815/2 O-101, R.2, XF45 PCGS. The fact that no dies were produced for the 1815 issue, and that an 1812-dated die was overdated with a 5, helps this issue maintain its importance in the series. The moderate mintage of 47,150 pieces is another unavoidable reason for the popularity of the date, since Bust half mintages were routinely in the 1 to 2-million piece range from 1808 through 1823. Even so, the issue is available for a price. This richly toned gunmetal-gray example exhibits the sharp strike and crisp remaining definition expected for the Choice XF grade. Die clashing is faintly visible below the ear and around the eagle. Abrasions or marks are virtually nonexistent.
From The College Collection, Part Two. PCGS# 39491 Base PCGS# 6108

**1815/2 Half Dollar, O-101a, AU50
Sole Die Pair of the Year**

- 4947** 1815/2 O-101a, R.2, AU50 PCGS. This is the only die pair known for the 1815 half dollar, showing the remnants of an underlying 2 beneath the primary 5 in the date. The current coin is from a late die state, with a heavy peripheral crack extending from the E in AMERICA, through the arrowheads and 50 C., to the rim below the olive leaves. Sky-blue and olive-gold hues highlight dusky lavender-gray patina on each side. The strike is sharp and only moderate wear is evident over the high points of the design. Clash marks are prominent on the reverse. PCGS# 39491 Base PCGS# 6108

- 4948** 1817/3 O-101a, R.2, AU55 ANACS. Golden-brown and forest-green toning adorns the margins of this partly lustrous example. Abrasions are limited to minor hairlines and a small dig beneath the second U in PLURIBUS. PCGS# 39512 Base PCGS# 6111

**1817 Bust Half Dollar, AU53
O-103, Punctuated Date**

- 4949** 1817 181.7, O-103, R.2, AU53 PCGS. The presence of a prominent die dot about midway up between the 1 and 7 in the date confirms the famous "Punctuated Date" variety, the earliest die state of Overton-103. The die pair is confirmed by the missing lower right serif of the I in UNITED and AMERICA. This About Uncirculated example displays well-struck, minimally abraded surfaces with ample mint luster. Amber-gold and blue album toning surrounds brilliant, silver-white centers. The early die state represented by this coin is preferred by collectors, because the diagnostic die dot fades in later die states. Population (for the variety): 7 in 53, 17 finer (7/15). PCGS# 39510 Base PCGS# 6110

**1818/7 Bust Half, MS62
O-101a, Large 8, Bold Overdate**

- 4950 1818/7 Large 8, O-101a, R.1, MS62 NGC.** Struck from a late state of the dies, with the diagnostic reverse die crack through 50 C, the olive leaves, and UNI of UNITED. Bold die clashing at Liberty's ear shows double rows of vertical shield lines and a faint die crack runs from star 11 to the hair. The overdate is clear, with prominent "ears" of a 7 beneath the primary second 8. A Large 8 was used for the first 8 in the date. This is a lustrous and minimally marked example, with translucent russet-red toning at the margins. The strike is sharp except slight blending at the eagle's talons and the left wing shoulder. A few light lines are visible on Liberty's cheek. Census (for the variety): 1 in 62, 2 finer (7/15). PCGS# 39541 Base PCGS# 6115

**1818/7 Bust Half Dollar, AU58
Small 8, O-102a**

- 4951 1818/7 Small 8, O-102a, R.2, AU58 PCGS.** Overdates sprinkle the Bust half series, prominently so in the present case as the corners of the underdate protrude from the final digit. Gray toning presents pleasing contrast with lighter shades in the protected areas. There are hints of russet at the peripheries, especially on the reverse. The O-102 variety is distinguished by the small 8 and the overdate, and the partially filled loop of the last digit characterizes the die state. PCGS# 39537 Base PCGS# 6114

- 4952 1818 O-105, R.3, AU55 PCGS.** A telltale die crack from the rim, through star 12, to the hair curls denotes this obverse which is shared by O-106. This reverse is in its third use, having been previously used for O-103 and -104. This O-105 representative shows bold clash marks on each side, with significant luster residing beneath a hint of light champagne toning. The stars are well-defined, but the central hair curls are a trifle soft, partially due to brief circulation. An old, thin scratch in the left obverse field is the only mentionable surface flaw. PCGS# 39519 Base PCGS# 6113

- 4953 1818 O-111, R.1, AU55 PCGS. CAC.** Impressive peach, purple, and green toning dominates both sides. Minimally abraded and attractive. The curls and claws show minor wear. A late, clashed die stage with peripheral elements drawn toward the rims. PCGS# 39528 Base PCGS# 6113

- 4954 1819/8 Large 9, O-102, R.2, AU58 PCGS.** Straw-gold toning graces both sides of this coruscating and moderately abraded Borderline Uncirculated representative. The shield exhibits light gunmetal-gray patina. Incorrectly designated as a Small 9 variety by PCGS. PCGS# 39556 Base PCGS# 6119

- 4955 1819/8 Large 9, O-103a, R.4, AU58 PCGS. CAC.** Lustrous and well struck with brilliant centers and peripheral plum-red, golden-brown, and blue-green toning. The field below the right scroll end exhibits unobtrusive contact. Numerous interesting die cracks throughout the reverse confirm the later Overton subvariety. Within the Condition Census for O-103a. *From The College Collection, Part Two.* PCGS# 39558 Base PCGS# 6119

**1820 O-103 Half Dollar, MS62
Curl Base 2, Small Date**

- 4956 1820 Curl Base 2, Small Date, O-103, R.1, MS62 NGC.** Iridescent aquamarine toning invigorates the margins of this satiny and sharply struck half dollar. The fields and motifs display dusky chestnut-gold patina. Refreshingly free from abrasions. An early die state without any cracks across the lower obverse. O-103 Census: 2 in 62, 0 finer (6/15). PCGS# 39563 Base PCGS# 6121

**1820 Half, Borderline Uncirculated
Square Base 2, Knob, O-105**

- 4957 1820 Square Base 2, Large Date, Knob, O-105, R.1, AU58 PCGS.** Ample luminous luster emerges from the dusky gunmetal-gray surfaces. Marks are minimal and the eye appeal is original. The strike is sharp except for the D in UNITED, which is opposite the bust tip. O-105 is one of only two Square Base, Knob 2 1820 marriages. PCGS# 39567 Base PCGS# 6122

- 4958 1820 Square Base 2, Large Date, No Knob, O-106, R.1, AU58 NGC.** The high points are cream-gray, while the fields are wheat-gold and the borders display apple-green. A partly lustrous representative without any detrimental abrasions. *Ex: Schaumburg Central States (Heritage, 4/2012), lot 4411, which realized \$1,380.* PCGS# 39569 Base PCGS# 6123

1821 Half Dollar, O-106, MS63
Lovely Concentric Toning

- 4959** 1821 O-106, R.1, MS63 NGC. This readily available variety is attributed by the 21 in the date lower than the 18, while on the reverse, a straight, horizontal die defect joins two of the vertical shield stripes near their bottom. This Select example displays beautiful concentric toning on both sides, rose in the centers radiating outward to jade, aqua, and gold. PCGS# 39584 Base PCGS# 6128

1822 Half Dollar, O-110a, MS64+
Lustrous and Delicately Toned

- 4960** 1822 O-110a, R.2, MS64+ PCGS. Vibrant luster and lovely original toning are the chief attributes of this Select O-110a representative, although sharp definition on the stars and pleasing hair detail contribute to the broad eye appeal. Some faint grazes on the obverse portrait preclude a finer technical grade, but for the Choice level, the quality is nonetheless excellent.

The 1822 half dollar survives in slightly larger quantities than many other issues from this period, having a substantial mintage of more than 1.5 million coins. As a result, this date is often encountered in type specialists' cabinets. Of the 21 known varieties for this issue, O-110a is one of the more plentiful in high grades. Population: 47 in 64 (6 in 64+), 12 finer (7/15).

Ex: Purchased by Eugene H. Gardner from Sheridan Downey (1/2001); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98454. PCGS# 39598 Base PCGS# 6129

1823 O-101 Half Dollar, AU53
Scarce Broken 3 Variety

- 4961** 1823 Broken 3, O-101, R.3, AU53 PCGS. The obverse is primarily brilliant despite peripheral ocean-blue and autumn-brown toning. The reverse displays dappled gunmetal and russet patina. The borders retain substantial luster and neither side shows any remotely consequential marks. Liberty's jaw is prominently strike doubled. A popular and scarce *Guide Book* variety featuring an awkwardly formed 3 in the date. PCGS# 39620 Base PCGS# 6132

- 4962** 1823 O-104, R.3, AU58 PCGS. Liberty's profile is strike doubled, as is much of the eagle and shield. This is seen to some extent on many examples of this variety, suggesting that the dies were not properly secured in the press. The stars show above-average definition but are not quite full, while the central motifs are sharp. Each side exhibits nearly full luster with olive-gold toning. PCGS# 39607 Base PCGS# 6131

- 4963** 1824 O-104, R.2, MS61 NGC. Rich wheat-gold and powder-blue compete for territory across this sharply detailed and unblemished half dollar. O-104 is identified by a die lump on the field beneath the left upright of the second U in PLURIBUS. Star 7 nearly touches the cap, to confirm the attribution. A rare variety in Uncirculated grades, and possibly within the Condition Census. PCGS# 39624 Base PCGS# 6137

1824/4 Half Dollar, O-110, MS64+
Lightly Toned and Lustrous

- 4964** 1824/4 O-110, R.2, MS64+ NGC. This *Guide Book* variety is easily attributed by the recut 4 in the date, showing the upper peak of the underlying numeral in the field to the left of the primary, and a small die lump in the reverse field below the UN in UNUM. This Plus-graded near-Gem shows soft, frosty surfaces with dusky lavender-gray and gold toning. The eagle's right (facing) talons and a few obverse stars are weakly defined, but the overall sharpness is pleasing. No major abrasions detract from the eye appeal. Census: 7 in 64 (1 in 64+), 3 finer (6/15). PCGS# 39644 Base PCGS# 6140

1824 O-115 Half Dollar, MS64
Medium Silver-Gray Toning

- 4965** 1824 O-115, R.2, MS64 PCGS. Dusky silver-gray, forest-green, and walnut-brown toning embrace this lustrous and lovely Choice half dollar. The strike shows incompleteness on the RIB in PLURIBUS and the fletchings, but the stars are fully impressed. Refreshingly unabraded. A small die lump between the left scroll end and the eagle's wing provides the pick-up point for Overton-115. PCGS# 39637 Base PCGS# 6137

1825 O-103 Bust Half, MS64+
Scarce Die Marriage, Condition Census Coin

- 4966** 1825 O-103, Low R.4, MS64+ PCGS. CAC. Rich sea-green and wheat-gold toning endows this well-struck half dollar. A few wispy field marks are noted behind Liberty's cap. The profile is lightly strike doubled and faint die clashing is visible beneath the chin. A Condition Census example of this very scarce die marriage. O-103 can be attributed by the engraver's slip near the left corner of the shield. The 5 in the date is right-aligned with the shoulder curl. A single MS65 example exists above this coin in the Condition Census according to the Spring, 2015 Census reported by Steve Herrman. PCGS# 39649 Base PCGS# 6142

1826 O-108' Half Dollar, MS65
Vibrant Earliest Die State

- 4967** 1826 O-108', R.3, MS65 PCGS. Highly lustrous and sharply struck in all areas, this prime Bust half displays translucent orange-gold patina over both sides in splashes of coppery color. A series of die scratches to the left of the date can be seen on most examples of this Overton die pair. Uncirculated examples of the O-108 are often from a later die state, but the current vibrant Gem shows none of the peripheral die cracks characteristic of such specimens and qualifies for the scarcer O-108' designation. At the forefront of the Condition Census for the variety by die state.
Ex: Baltimore Signature (Heritage, 7/2003), lot 7457. PCGS# 39676 Base PCGS# 6143

1826 O-111 Half Dollar, MS64
Lustrous, Light Gold Patina

- 4968** 1826 O-111, R.2, MS64 PCGS. Splashes of peach-gold enrich this lustrous and impressively unabraded near-Gem. A few stars lack intricate centrils, but the strike is otherwise excellent. The usual intermediate die state with a crack through the cap but no crack near AMERICA.
Ex: Dallas Signature (Heritage, 11/2006), lot 814, which realized \$3,220. PCGS# 39680 Base PCGS# 6143

1826 O-112a Half Dollar, MS64
Exceptional Eye Appeal

- 4969** 1826 O-112a, R.2, MS64 PCGS. A die chip above the diagonal of the N in UNITED confirms the later die state. Honey-gold borders cede to pearl-gray fields and motifs. Lustrous and uncommonly smooth with superior eye appeal for the MS64 level. Generally well struck, although the left (facing) claw and star 7 show inexactness. PCGS# 408532 Base PCGS# 6143

1827 O-106 Half Dollar, MS64
Square Base 2, Original Toning

- 4970** 1827 Square Base 2, O-106, R.2, MS64 PCGS. Tan-brown, dove-gray, and ice-blue toning enriches this satiny and lightly abraded Choice Capped Bust type coin. Several of the stars are inexactlly impressed, but the major devices are crisply struck. The vertical shield lines are key to attributing O-106. Several vertical lines extend slightly into the horizontal lines, and most of the vertical lines are partly merged, as made. PCGS# 39698 Base PCGS# 6144

1827 O-114 Bust Half, MS64+
Die Defect in Y of LIBERTY

- 4971** 1827 Square Base 2, O-114, R.3, MS64+ NGC. With 49 different die pairs for the issue, a single pick-up point such as the die defect in Y of LIBERTY makes the die pair identification much easier. The O-114 variety confirms with multiple crossbars and shield stripes that extend beyond the shield border. The final A in AMERICA touches the top arrowhead. On the obverse, the 7 is noticeably recut at the stand. This attractive example is brilliant and untuned with frosty silver luster over both sides. A high-end near-Gem, it ranks at the lower end of the Condition Census for the variety. PCGS# 39709 Base PCGS# 6144

4972 1827 Square Base 2, O-141, R.3, MS62 NGC. This early die state does not show the line joining the serifs of the C, as seen on later die states. The lowest vertical shield lines extends left, protruding through a feather. The 2 is lower than the tops of 187. This lustrous golden-gray example has strong central detail with typical peripheral incompleteness. PCGS# 39741 Base PCGS# 6144

4973 1827 Curl Base 2, O-147, R.4, AU55 PCGS. The scarcer of the two Curl Base 2 Overton marriages. Pearl-gray and almond-gold shades endow partly lustrous and unmarked surfaces. A clashed late die state with minimal obverse dentils and the stars drawn to the rim. PCGS# 39750 Base PCGS# 6145

4974 1828 Square Base 2, Large 8s, O-108, R.3, MS61 NGC. This Overton variety is easily distinguished by recutting inside the loops of the first 8 in the date. Delicate lavender-gray patina veils this Uncirculated Capped Bust half dollar, and minimally marked surfaces are awash in shimmering luster. The central motifs are sharply detailed, while the stars and olive leaves are a touch soft. PCGS# 39762 Base PCGS# 6150

**1828 O-110 Half Dollar, MS65
Square 2, Small 8, Large Letters**

4975 1828 Square Base 2, Small 8s, Large Letters, O-110, R.2, MS65 PCGS. Apple-green, dove-gray, and russet-brown toning endow this lustrous Gem half dollar. Marks are confined to a minor cluster above the eagle's head. The strike is good, although a few stars and the base of the eagle are incomplete. This example is tied with one other MS65 coin at the top of the Condition Census for the variety according to the Spring, 2015 Stephen Herrman report by Overton number. PCGS# 39764 Base PCGS# 6151

4976 1828 Square Base 2, Small 8s, Large Letters, O-112, R.3, AU58 PCGS. CAC. This is a late die state example, with the die lines in the lower-left obverse field no longer visible. The stars show incomplete centers, but the interior devices are sharp and show just brief circulation. Hints of luster remain beneath a blanket of original olive-gold and gunmetal-gray toning which lightens toward the centers. PCGS# 39766 Base PCGS# 6151

4977 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2, MS62 NGC. Autumn-brown and gunmetal-gray embrace this satiny and lightly abraded representative. Several stars are soft but the remainder of the strike is bold. Die lines above and beneath the bust aid the attribution. PCGS# 39770 Base PCGS# 6151

4978 1828 Square Base 2, Small 8s, Small Letters, O-119, R.3, AU55 PCGS. CAC. O-119 is the sole Square 2, Small 8, Small Letters marriage, and is identified by recutting on STATES. This partly lustrous example has olive-brown and gunmetal toning. The left obverse field and the portrait have a few thin marks.
Ex: *Houston Signature* (Heritage, 11/2007), lot 60622, which realized \$1,150. PCGS# 39780 Base PCGS# 6152

**1830 O-104 Capped Bust Half, MS64
Small O, Virtually Unmarked Surfaces**

4979 1830 Small O, O-104, R.3, MS64 PCGS. CAC. Rich apple-green and golden-brown toning graces this lustrous and impressively unabraded Choice Capped Bust half. Most of the star centers are incomplete, but the strike is otherwise intricate. A visually pleasing near-Gem half, tied at the lower end of the Condition Census for the die pair.

Ex: *Houston Signature* (Heritage, 12/2010), lot 3659. PCGS# 39813 Base PCGS# 6156

**1830 Half Dollar, Toned MS64
Small O, Overton-117**

4980 1830 Small O, O-117, R.2, MS64 PCGS. CAC. Repunching on the 5 in the denomination helps attribute this Overton pairing. Rose-red, ocean-blue, and dove-gray toning blankets the lustrous and mark-free surfaces. Well struck and pleasing with exceptional eye appeal for the designated grade. Struck from moderately clashed dies. PCGS# 39828 Base PCGS# 6156

**1830 Half Dollar, MS65 Large O, O-122
Lustrous and Nicely Toned**

4981 1830 Large O, O-122, R.1, MS65 PCGS. CAC. Although a plentiful variety, few Gem specimens exist of the O-122. The fourth edition of the Overton reference records a single MS65, while Stephen Herrman records two high-grade pieces, one MS65 and one MS66, both from the Newman Collection. This piece remains unpedigreed, but it is among the finest known 1830 O-122, and we suggest that it is a Census-level specimen. Both sides exhibit thick, frosty mint luster beneath gold and iridescent toning with sharp central details. Flowlines draw the stars and letters to the border, diminishing their strength of detail. Population: 7 in 65, 2 finer (7/15), for all 1830 Large O varieties.

Ex: *Chicago Signature* (Heritage, 8/2011), lot 7154; *FUN Signature* (Heritage, 1/2012), lot 3520. PCGS# 39833 Base PCGS# 6157

- 4982 1831 O-108, R.1, MS62 PCGS.** Rich cherry-red and navy-blue toning embraces portions of both sides, but a majority of the coin is straw-gold and dove-gray. A satiny, colorful, and unblemished Capped Bust half dollar.
From *The College Collection, Part Two*. PCGS# 39844 Base PCGS# 6159

**1831 O-111 Bust Half, MS64
Die Crack at Base of Date**

- 4983 1831 O-111, R.1, MS64 PCGS.** A brilliant and untuned representative of this relatively available Overton-111 variety. Most examples display a die crack at the base of the date and through stars 1 through 7, as well as a faint crack through stars 8 through 10. A very few examples of the die marriage are uncracked, newly-identified as O-111' (prime) — believed to be R.7 in the pristine, uncracked state. This coin is of the more readily obtainable die state, with the diagnostic cracks and weakness at the scroll beneath STA of STATES. Stripe 1 of the vertical shield lines appears to be a 2-line stripe, where lines 2 and 3 of the stripe are merged at the bottom. Brilliant silver luster covers both sides of this near-Gem half. PCGS# 39848 Base PCGS# 6159

1832 Small Letters Half, O-102, MS64

- 4984 1832 Small Letters, O-102, R.1, MS64 PCGS.** The crudely engraved, joined arrowheads and the tine from the eagle's right (facing) wingtip aid variety attribution, as does the "laced lips" obverse. This satiny cream-gray representative is refreshingly unabraded, and the strike is penetrating aside from variety-specific bluntness on the right claw.
Ex: *Central States Signature* (Heritage, 4/2009), lot 729. PCGS# 39858 Base PCGS# 6160

1832 Half Dollar, O-103, MS66

Ex: Eliasberg

- 4985 1832 Small Letters, O-103, R.1, MS66 NGC.** Ex: Eliasberg. The Eliasberg catalog called this piece a "splendid gem, a coin that will satisfy the type set collector seeking a high-level specimen of this design or, equally, be a delight to the die variety specialist." O-103 is identified by recutting on the upright of the 5 in 50C. and by a small die lump on Liberty's drapery below the clasp. This Premium Gem is devoid of abrasive marks and displays softly frosted luster with golden-gray and pale lilac toning. The stars and eagle's talons are sharp. Census (all varieties included): 7 in 66 (1 in 66 ★), 5 finer (7/15). PCGS# 39860 Base PCGS# 6160

1832 Small Letters Half, O-108a, MS64

- 4986 1832 Small Letters, O-108a, R.3, MS64 PCGS. CAC.** A hair curl rises and pierces the Liberty band on this obverse, shared with the O-107. In this late state of the obverse, the stars are all drawn to the edge and there is scarcely a trace of the milling. The reverse shows a "stair-step" left serif on the A in STATES. Stripes 4-6 are partially filled. Great luster and minimal marks show on this satiny, unabraded coin. A bit of charcoal patina shows on the obverse at star 10. This piece may lie within the Condition Census. PCGS# 39866 Base PCGS# 6160
- 4987 1832 Small Letters, O-110, R.1, MS63 PCGS. CAC.** The tine from the top of Liberty's cap is the pick-up point for Overton-110. A dove-gray, cobalt-blue, and wheat-gold Select representative with a satiny and unblemished appearance.
From *The College Collection, Part Two*. PCGS# 39868 Base PCGS# 6160
- 4988 1832 Small Letters, O-112, R.2, MS62 NGC.** This obverse shows a distinct dash in the field to the left of the date, believed to have been caused by a misplaced 1, and was employed for O-112 and -123. The O-112 reverse shows a pair of small dots in the horizontal shield lines. This piece is boldly struck and satiny, with aquamarine peripheries surrounding pale lavender-gray centers. PCGS# 39870 Base PCGS# 6160

**1832 Bust Half, MS64
O-118, Small Letters, 'Laced Lips'**

- 4989 1832 Small Letters, O-118, R.1, MS64 PCGS.** A sharp near-Gem half, with lustrous, iridescent surfaces that display shades of lemon-gold, tan, and pistachio-green across both sides. This is the "Straight Laced Lips" variety, one of three 1832 die pairs with tiny die lines through the lower lip of Liberty to the chin. The reverse die is confirmed by a double corner on the upper left shield point. Only a few minor marks are visible with a glass, widely distributed over the smooth fields and crisply struck devices. Tied near the top of the Condition Census for the variety according to the Spring 2015 Stephen Herrman report.
From The College Collection, Part Two. PCGS# 39877 Base PCGS# 6160

**1833 Half Dollar, O-102', MS65
Early Die State Example**

- 4990 1833 O-102', R.2, MS65 NGC.** This early die state coin shows the diagnostic die line from the 0 in 50C. to the rim. This die line is no longer present on later stages of this die pair's usage. Both sides of this piece show intense luster shining through deep lavender-gray, olive, and gold toning. No distracting abrasions are present. The horizontal shield lines lack full definition, but the remainder of the devices are well-struck. Census (all varieties included): 23 in 65 (1 in 65+, 1 in 65 ★), 5 finer (7/15). PCGS# 39888 Base PCGS# 6163
- 4991 1833 O-102, R.1, MS62 NGC.** Star 1 is repunched, the pick-up point for the Overton-102 marriage. A satiny and unmarked dove-gray and wheat-gold representative. Evenly struck and attractive. Although outside the Condition Census, the present piece would please any collector. PCGS# 39888 Base PCGS# 6163
- 4992 1833 O-114, R.2, MS63+ PCGS. CAC.** Lustrous and nearly brilliant with smooth surfaces. The borders are lightly brought up but the major devices are bold. Likely within the O-114 Condition Census, which is topped by the "Gem Uncirculated" John Jay Pittman example.
From The College Collection, Part Two. PCGS# 39903 Base PCGS# 6163
- 4993 1834 Small Date, Small Letters, O-109, R.1, MS62+ PCGS.** Stars 8, 9, and 10 are recut. A veil of delicate golden-gray patina overlays lustrous surfaces with grade-limiting abrasions effectively hidden beneath the toning. The stars and curls show good definition, while the eagle's feathers, fletchings, and olive leaves are crisp. PCGS# 39913 Base PCGS# 6166

- 4994 1834 Small Date, Small Letters, O-117, R.2, MS62 NGC.** Repunching below the crossbar of the A in STATES provides the attribution marker for Overton-117. The smooth and coruscating surfaces are deeply patinated dove-gray, sea-green, and tan-brown. Likely within the Condition Census for the variety, which is seldom seen in Mint State. PCGS# 39922 Base PCGS# 6166

- 4995 1835 O-107, R.1, AU58 PCGS. CAC.** The right-side shield border extends north into the eagle's shoulder. That feature, and the shape of the 5 in the date, combine to attribute O-107. The present partly lustrous example displays rich ocean-blue and golden-brown toning. The left obverse displays individually unobtrusive abrasions.
From The College Collection, Part Two. PCGS# 39933 Base PCGS# 6168

- 4996 1836 Lettered Edge, O-109, R.3, MS62 PCGS.** Star 7 is recut with a thick tine on the upper-outer point. The olive stem above C is also recut. Glistening luster emanates from minimally marked surfaces, shining through a thin layer of golden-gray patina. This well-struck half is tied for second on the Condition Census for the variety. PCGS# 39945 Base PCGS# 6169

**1836 O-115 Half Dollar, MS64
Lettered Edge, Recut 8 in Date**

- 4997 1836 Lettered Edge, O-115, R.3, MS64 PCGS.** Housed in a green label holder, this attractive near-Gem Lettered Edge half is a textbook example of Overton-115. The 8 is notably recut south, with the remnants of an underdigit 8 visible above the top loop. On the reverse, a long diagonal die line runs bottom to top through stripes 3 to 6. The legend is close the milling and the scroll is abnormally close to the legend. As always for the variety, some weakness in PLURIBUS affects UR1. The pearlescent surfaces display light-gray and gold toning and pleasing mint luster. Only a few light abrasions mark the smooth surfaces, and a Mint-made flat spot in the dentils is noted between stars 1 and 2 on the obverse and at the corresponding position between D and S of UNITED STATES on the reverse. Likely Condition Census for the variety. Population (all varieties): 50 in 64 (2 in 64+), 16 finer (6/15). PCGS# 39950 Base PCGS# 6169

- 4998 1836 Lettered Edge, O-122, R.2, AU58 PCGS. CAC.** The obverse border and the reverse are richly patinated tobacco-brown and lavender. The portrait and obverse field display lighter stone-white and steel-gray shades. Refreshingly unabraded. The strike shows moderate incompleteness.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 8007.
From The College Collection, Part Two. PCGS# 39963 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

- 4999 1837 GR-3, R.2, MS61 PCGS.** For the grade, this Reeded Edge half dollar is outstanding. The strike is razor-sharp throughout and both sides exhibit vibrant luster beneath attractive mint-gold, aquamarine, and lilac-gray toning, the latter color occupying the central regions. The reverse is extensively cracked around the periphery, with a couple radial cracks also extending inward from the R in AMERICA and the D in UNITED. PCGS# 531049 Base PCGS# 6176

**1838 Reeded Edge Half, MS64+
GR-9 Variety, Sharply Struck, Light Toning**

5000 1838 GR-9, R.3, MS64+ PCGS. CAC. A thin veil of golden toning is barely visible over the predominantly brilliant-silver surfaces of this lustrous Reeded Edge half. Struck from an early state of the dies, with no die cracks visible on the obverse and numerous die lines behind angled from the rim behind UNITED STATES. Diagonal lines appear in the shield. Sharply struck, this is a challenging coin to find in this VEDS and at the top of the Condition Census for the GR-9 variety. Population (all varieties): 57 in 64 (3 in 64+), 9 finer (7/15). PCGS# 531090 Base PCGS# 6177

SEATED HALF DOLLARS

**1839 No Drapery Half Dollar, AU58
Magnificent Rainbow Toning, First-Year Issue**

5001 1839 No Drapery, WB-101, AU58 PCGS. Magnificent rainbow toning progresses from orange and yellow at the borders to green, blue and violet at the centers. The resulting eye appeal heightens the overall desirability of this coveted first-year No Drapery representative from a mintage of 100,000 coins. A trace of wear appears over the highest points of the sharply struck motifs. Many coins from this issue come weakly struck in the centers, but not so with this minimally marked near-Mint example. Population: 20 in 58, 34 finer (7/15). PCGS# 572000 Base PCGS# 6230

**1840 Small Letters Half, MS65
Reverse of 1839, WB-102**

5002 1840 Small Letters, Repunched Date, WB-102, FS-301, MS65 NGC. The 1840 Reverse of 1839 half dollars are common in lower grades but seldom appear in Gem condition. This example shows repunching, faint on the 4 and much bolder on the 0, which is repunched southeast. Some curious die defects appear in the spaces between vertical shield stripes 5 and 6 on the reverse. This piece shows a satiny texture amid minimal marks and nicely lustrous, reflective surfaces lightly toned in copper-gold. Census: 13 in 65 (1 in 65 ★), 3 finer (7/15). PCGS# 392647 Base PCGS# 6234

**1842 WB-101 Half Dollar, MS64
Small Date, Large Letters Reverse of 1842**

5003 1842 Small Date, Large Letters, WB-101, MS64 PCGS. The obverse die is perfect, and the reverse die is cracked from the border to the O in DOL, continuing faintly through the eagle to the second T in STATES. Additional cracks connect the tops of UNITED STATES O. This elusive variety is rarely seen in high grades as the PCGS population data reveals. Both sides display satin luster with ivory surfaces and attractive peripheral gold toning. A sharp strike enhances the considerable eye appeal. Population: 6 in 64, 2 finer (6/15). PCGS# 572011 Base PCGS# 6240

**1845 Seated Half, Prooflike MS63
Low Mint State Population**

5004 1845 WB-101 MS63 PCGS. CAC. The 1845 half dollar had a limited mintage of 589,000 coins, one of the lower production totals for this decade. Mint State coins are rare today. This Select example is fully prooflike, with light champagne toning overall and tints of ocean-blue around portions of the peripheries. A deep green toning speck appears below the date. Liberty's figure is sharply struck, but the right-hand stars and the eagle's left (facing) leg lack full detail. Population: 6 in 63, 3 finer (7/15). PCGS# 572035 Base PCGS# 6248

**1846 Seated Half, Sharp MS64
Medium Date**

5005 1846 Medium Date, WB-101, MS64 PCGS. This lovely coin is well-detailed beneath mottled russet and mint-green toning. Faint die striations in the obverse fields and a smaller network of peripheral die cracks than is normally seen indicate this Choice example is from an early die state. As a date, the 1846 Seated half is scarce in Mint State, and is rarely seen this sharp and well-preserved. Population: 5 in 64, 2 finer (7/15).

Ex: *Central States Signature* (Heritage, 5/2004), lot 7402; *FUN Signature* (Heritage, 1/2005), lot 7245. PCGS# 572041 Base PCGS# 6251

**1846-O Seated Half, MS64
WB-103, Medium Date, 18 Repunched**

5006 1846-O Medium Date, Repunched Date, WB-103, Die Pair 5, R.4, MS64 PCGS. The 1 and 8 of the date are repunched north. A Medium Date variety, often overshadowed by the scarce and popular Tall Date varieties and other more-dramatic date repunchings, yet all Mint State examples of this New Orleans issue are rare. The current coin is a remarkably well-preserved near-Gem — among the finest known for the issue — with prooflike fields and attractive sea-green, azure-blue, and violet toning. Soft mint luster shines through the rich patina. The strike is close to full, with sharp definition on the raised elements despite numerous die cracks that run through the legends and stars. Population (all 1846-O varieties): 3 in 64, 1 finer (7/15).

From *The College Collection, Part Two*. PCGS# 572050 Base PCGS# 6255

5007 1849 WB-101 MS62 NGC. Star 8 is a bit flat and the eagle's left (facing) talon shows minor incompleteness, but overall this is a sharply struck coin. Golden luster peaks through the even, lilac-gray toning. Like most Seated halves from the 1840s and 1850s, few Mint State coins survive in relation to the mintage, a fact that is clearly evident in the population reports. Census: 7 in 62, 32 finer (7/15). PCGS# 572069 Base PCGS# 6262

5008 1849 WB-101 MS62 NGC. Semiprooflike fields accentuate well-struck design elements on this deeply toned 1849 half. The majority of the interiors show warm sun-gold toning that lightens toward the centers, while the peripheries exhibit bands of violet and deep navy blue. This issue is scarce in Mint State. Census: 7 in 62, 32 finer (7/15). PCGS# 572069 Base PCGS# 6262

**1851-O WB-101 Half Dollar, MS64
Scarce O-Mint Issue, Splendid Natural Appeal**

5009 1851-O WB-101, Die Pair 3, R.4, MS64 PCGS. With the market value of silver climbing, the influx of gold from the Californian gold fields upset the silver-to-gold ratio and silver coinage disappeared from circulation. The melt value of most silver coinage exceeded its face value, and the Mint made only half-hearted efforts to ease the lack of coinage in face of such economic realities. Just 402,000 half dollars were struck in 1851 at the New Orleans Mint. This near-Gem survivor displays prooflike aspects across the fields, with smoky blue and gold toning amid strong silver luster. Sharply struck except at a few of the star centers, the coin offers splendid natural appeal and high quality for the assigned grade. Population (all varieties): 10 in 64, 6 finer (7/15).

From *The College Collection, Part Two*. PCGS# 572082 Base PCGS# 6267

**Seldom-Seen 1852 Half Dollar, MS62
A Melt Rarity**

5010 1852 WB-101, R.5, MS62 PCGS. The 1852 half dollar, struck in the meager amount of 77,130 coins at a time when the issue's melt value as silver exceeded its monetary worth of fifty cents, when found, is "high grade, very well struck, lustrous, and expensive," according to the Wiley-Bugert reference. This piece fits that description to a T, showing great luster on lightly toned silver-gold surfaces with a bold strike and excellent preservation. Despite a few minor field hairlines, we could easily imagine this piece being in a higher-grade holder. A few small ticks show on Liberty's left (facing) arm. For the date, Population: 11 in 62, 27 finer (7/15). PCGS# 572083 Base PCGS# 6268

5011 1853 Arrows and Rays, WB-101, AU58+ PCGS. CAC. This one-year type is always in high demand. The present Plus-graded near-Mint example shows significant, frosty luster with just a hint of light golden toning. The strike is sharp and the only discernible evidence of wear is a small flat spot on Liberty's breast and knee. PCGS# 572085 Base PCGS# 6275

**1853 Arrows and Rays Seated Half, MS64
WB-101, Frosty Full Strike**

- 5012** 1853 Arrows and Rays, WB-101, MS64 PCGS. CAC. Soft silver luster shines beneath the thickly frosted surfaces of this extremely sharp Arrows and Rays half. The star centers and Liberty's portrait are complete and fully brought up, as is the eagle with full details on the talons and arrow fletchings. More than 3.5 million pieces were struck, yet PCGS has seen just 26 numerically finer pieces than this CAC-endorsed, attractive near-Gem (6/15). PCGS# 572085 Base PCGS# 6275

**1853-O Arrows and Rays Half, AU58
Scarce, Close to Full Mint State**

- 5013** 1853-O Arrows and Rays, WB-101, Die Pair 21, R.3, AU58 PCGS. The weight reduction of approximately 7% dropped the intrinsic silver value of half dollars to about 97 cents, encouraging large mintages from both the Philadelphia and New Orleans mints. The addition of Arrows and Rays to the design made the new standard easily recognizable to the public, which discouraged hoarding and melting. This O-Mint example shows an early die state of Die Pair 21, with several of the diagnostic die cracks barely visible or missing altogether. Nice mint luster remains over the lightly abraded surfaces, with sharp detail on the central motifs and star centers. Amber-gold and gunmetal-blue toning deepens at the margins. Population (all varieties): 15 in 58, 30 finer (7/15). *From The College Collection, Part Two.* PCGS# 572086 Base PCGS# 6276

- 5014** 1855-O Arrows, WB-101, Die Pair 11, R.3, MS63 PCGS. Multiple faint die cracks encircle the obverse, with a diagnostic diagonal crack angling up from the rock support through Liberty's foot to a dentil at the right. The reverse die was new and used for the first time in the die marriage, and it is uncracked. Wonderful steel-blue, olive-green, and tangerine-gold patina covers both sides of this lustrous, well-struck Select half. The strike is nearly full and the eye appeal is exceptional. *From The College Collection, Part Two.* PCGS# 572090 Base PCGS# 6283

- 5015** 1859-S Large S, WB-101, Die Pair 1, R.3, AU58 PCGS. Attractive sunset-gold toning with ruby-red highlights provide a splash of color beneath the umber-gray patina of this original and very scarce S-Mint half. Most of the 566,000-piece mintage circulated heavily in the specie-starved West and few Uncirculated coins were saved. This near-Mint example is retains the benefits of a full strike and a moderate amount of mint luster remains. Abrasions are few and far between on the reflective surfaces, with a pair of minor obverse rim nicks the only marks of note — one beneath 85 of the date, the other above star 9. Population (all varieties): 15 in 58, 28 finer (6/15). PCGS# 524237 Base PCGS# 6298

**1859-S Half Dollar, Frosty MS64
Better Date in Mint State**

- 5016** 1859-S Large S, WB-101, Die Pair 3, R.3, MS64 NGC. In circulated grades, the 1859-S Seated half dollar is available, but in Mint State this issue becomes conditionally scarce and is genuinely rare as fine as the Choice level. This piece is high-end for the grade, showing exceptionally clean, frosty fields. Both sides are essentially frost-white, save for the lower-right obverse margin which shows deep midnight-blue toning. Despite the advanced die state, the stars and central devices are sharply rendered. Census: 10 in 64 (2 in 64+), 6 finer (7/15). PCGS# 524237 Base PCGS# 6298

- 5017** 1859-S Medium S, WB-102, Die Pair 6, R.3, MS62 NGC. CAC. Medium S. Honey-tan and slate-gray hues embrace this luminous and surprisingly unabraded No Motto half dollar. An early San Francisco issue that is very scarce in Mint State despite a reasonable mintage of 566,000 coins. Strong strike and eye appeal. Census (all varieties): 3 in 62, 25 finer (7/15). PCGS# 524239 Base PCGS# 6298

**1859-S Half Dollar, MS64
WB-102, Natural Appeal**

- 5018** 1859-S Medium S, WB-102, Die Pair 6, R.3, MS64 PCGS. Two out of eight die pairs for the issue feature the Medium S mintmark (all others display a Large S). Both Medium S varieties share the same reverse die, although one of the marriages reveals a slightly repunched date to differentiate the varieties. This Die Pair 6 example has the normal date, with few distinguishing characteristics other than its normalcy. Struck from an early die state, the coin shows interspersed areas of deep toning on the reverse but lustrous, light silver-gray surfaces on the obverse. A strong strike adds to the natural appeal. Population (all varieties): 12 in 64 (1 in 64+), 4 finer (7/15). PCGS# 524239 Base PCGS# 6298

**1859-S Seated Liberty Half, MS65
WB-102, Ex: Highland Collection**

- 5019 1859-S Medium S, WB-102, Die Pair 6, R.3, MS65 NGC.** Medium S mintmark. A scarce and desirable San Francisco issue, seldom seen in Gem condition. The coin is exceptionally sharp and frosty, with full details on the central motifs and only minor weakness on two or three star centers. Mint luster shines boldly through a thin patina of golden-gray toning. An unusual V-shaped mark appears to the right of the eagle's head — an old inventory marker, one of two such examples we are aware of on 1859-S Seated halves that were part of the Highland Collection (the other piece was marked with an 'X'). Census: 3 in 65, 3 finer (7/15). PCGS# 524239 Base PCGS# 6298

**1861-O Half, Bright, Lustrous MS64
State of Louisiana Striking**

- 5020 1861-O WB-101, W-4, MS64 PCGS. CAC.** Struck while the New Orleans Mint was under the authority of the State of Louisiana. This particular piece is highly lustrous and mostly brilliant, with a few abrasions scattered over each side that limit the upside potential of the grade. The striking details are strong in all areas except for the uppermost stars on the obverse and the top of Liberty's head, a common trait on Seated halves. *From The College Collection, Part Two.* PCGS# 572146 Base PCGS# 6303

**1861-O Seated Half, AU58
Well-Known CSA Issue, WB-102, FS-401**

- 5021 1861-O CSA Obverse, FS-401, WB-102, W-11, R.3, AU58 ANACS.** Perennially in demand as the obverse die that was also used to mint the four known original Confederate half dollars, the W-11 die pair was the initial use of this obverse die. While not extremely rare in this die marriage, the unobtainable nature of the genuine W-12 Confederate issue makes the variety among the most-desired halves struck under CSA authority. The present coin is housed in an early-generation ANACS holder with a well-deserved AU58 grade. Natural gunmetal-blue and tan-gold toning surrounds the smooth-silver central motifs. Marks are of minimal size and help define the assigned grade. The famous CSA die crack is especially strong on this example, and runs from a dentil at the right of star 7 through Liberty's nose, mouth, chin, and shoulder to the base of the neck. Worth a substantial bid for its visual and historical significance. PCGS# 390906 Base PCGS# 39968

- 5022 1864 WB-101 AU58 PCGS.** Hoarded during the final years of the Civil War, few examples of this issue returned to circulation even after the end of hostilities or later, when the intrinsic value of silver prompted many to be melted. The current coin survived with only minor evidence of circulation. A thin patina of golden-gray toning adds to its original appeal. Minor signs of friction and wear do not diminish the strong strike or considerable remaining mint luster. Population: 8 in 58, 60 finer (7/15). PCGS# 572158 Base PCGS# 6311

- 5023 1864 WB-101 MS61 PCGS.** An original B. Max Mehl kraft envelope suggests this coin comes from the Maurice A. Ryan Collection as lot 777 of sale #106 (6/1945), where it is described as "Uncirculated with frosty mint surface." A faint hint of golden toning yields to bright silver luster, with scattered light marks and lines in the field that account for the assigned grade. The star centers and eagle are boldly struck. Population: 6 in 61, 52 finer (6/15). PCGS# 572158 Base PCGS# 6311

**1864 Seated Liberty Half Dollar, MS64
WB-101, Elusive Wartime Issue**

- 5024 1864 WB-101 MS64 PCGS.** Influenced not only by wartime concerns, the Mint recognized that silver coinage simply did not circulate other than on the West Coast, and any half dollars issued served primarily as bank reserves. Just 379,100 pieces were struck. This example is one of a limited number of near-Gem survivors. Essentially full details exist in all areas, and each side is covered with even golden-olive and rose toning with problem-free surfaces. Population: 15 in 64 (1 in 64+), 11 finer (7/15). *Ex: Santa Clara Signature (Heritage, 11/2001), lot 5892.* *From The College Collection, Part Two.* PCGS# 572158 Base PCGS# 6311

**1864 WB-102 Seated Half, MS64
Challenging Philadelphia Issue**

5025 1864 Repunched Date, WB-102 MS64 PCGS. CAC. A war-weary nation was hoarding coinage and the Philadelphia Mint responded with its second-lowest half dollar mintage of the Civil War era, trailing only the 1862 issue for low-mintage honors. The date is faintly repunched, most visibly above the crossbar of 4. Wiley-Bugert notes, "Very scarce and currently underrated in all grades." This lustrous example is CAC-endorsed, with light, silver-gray patina and a sharp strike throughout. Die cracks encircle the reverse legend and appear less prominently near the date and among stars 1 through 3. Population (all varieties): 15 in 64, 11 finer (6/15). PCGS# 572159 Base PCGS# 6311

5026 1865 WB-101 MS61 PCGS. This end-of-war issue is scarcer than its mintage of 511,400 pieces might indicate. While several light abrasions are distributed over the surfaces of this stark-white coin, the flashy silver luster commands greater attention. Sharply struck, with a high date and nearly full details on all of the elements. Population (all varieties): 1 in 61, 36 finer (7/15). PCGS# 572164 Base PCGS# 6313

**1865 Half Dollar, Satiny MS64
Seldom Seen This Fine**

5027 1865 WB-101 MS64 NGC. CAC. Half dollar production topped 511,000 coins in 1865 at Philadelphia, but surprisingly few examples are known in Mint State today. The issue is scarce at the Choice grade level and anything finer is rare. This piece displays crisp detail amid satiny, luminous luster. Hints of amber and violet intrude from the peripheries, leaving the centers mostly brilliant. There are no significant abrasions present. Census: 8 in 64 (1 in 64+), 12 finer (6/15). PCGS# 572164 Base PCGS# 6313

**1866-S Half Dollar, XF45
Elusive No Motto Variant**

5028 1866-S No Motto, Small Thin S, WB-101, XF45 PCGS. This is the usual late die state example, with a heavy clash mark in the lower-right reverse shield. The San Francisco Mint struck only 60,000 No Motto half dollars in 1866, and this issue is somewhat scarcer than its With Motto counterpart in high grades. This representative exhibits only slight wear over the high points of the design, with mottled olive-gray and dusky silver toning over each side. The strike is sharp and there are no obtrusive abrasions. Population: 16 in 45, 14 finer (7/15). PCGS# 572170 Base PCGS# 6315

5029 1870 WB-101 MS63 NGC. Deep gunmetal-blue toning at the margins surrounds gentle bronzelike hues that cover the silver centers of this attractive Philadelphia half. Well-struck devices on both sides suggest a higher grade, although a pair of short scrapes in the right obverse field define the Select Uncirculated level. The date is a notably scarce in Mint State despite a moderate mintage of 633,900 pieces. Census: 6 in 63, 9 finer (6/15). PCGS# 572188 Base PCGS# 6327

**1871-CC WB-101 Seated Half, XF45
Scarce Second-Year Carson City Issue**

5030 1871-CC WB-101, Die Pair 6, R.4, XF45 PCGS. CAC. Glimpses of mint luster remain across the natural golden-gray surfaces of this well-preserved Carson City scarcity. Die Pair 6 features a slightly repunched 1 in the date, and it is the only use of the reverse with a Large CC widely spaced, sloping up. The surfaces are nearly mark-free except for a shallow, shiny rim nick near star 1. Sharp detail remains across the motifs to justify the Choice XF grade, confirmed by minimal wear for the grade and CAC endorsement. Bits of deeper toning and slight build-up in recessed areas indicate long-term removal from circulation and speak to the coin's originality. Population (all varieties): 17 in 45, 24 finer (6/15). PCGS# 572196 Base PCGS# 6331

5031 1872-CC WB-101, Die Pair 2, R.4, XF40 PCGS. Golden-brown and olive-gray toning reveals faint blue accents over the richly toned surfaces of this solid XF Carson City example. Mint luster remains at the margins. Just over 250,000 half dollars were struck in the third year of operation at the Mint, a big step up for the new facility, yet a small number in the context of the hard-money hungry commerce of the West. This example is strongly struck with only moderate wear for the grade. The original surfaces and blatant eye appeal makes the coin a great addition for any circulated set. Population (all varieties): 25 in 40, 48 finer (6/15). PCGS# 572203 Base PCGS# 6334

**1872-S WB-102 Half Dollar
Sharp and Attractive Near-Gem**

- 5032 1872-S Medium Small S, WB-102, Die Pair 4, High R.3, MS64 PCGS.** The Medium Small S was a new introduction for the San Francisco Mint, entered strangely low and leaning left on this scarce die pair. Just 580,000 pieces were struck, with four die pairs sufficient to do the job. A challenging issue in all grades, but especially in Mint State. Bright silver luster flows across lightly iridescent surfaces of the current near-Gem coin, with a borderline full strike and tremendous eye appeal. A few minor field marks do not disturb the overall Choice surfaces. Just four pieces are numerically finer at PCGS. Population (all varieties): 3 in 64, 4 finer (7/15). PCGS# 572205 Base PCGS# 6335

1873 No Arrows, Closed 3 Half, MS65

- 5033 1873 No Arrows, Closed 3, Misplaced Date, WB-103, MS65 PCGS. CAC.** The surfaces are rather satiny on the obverse and more frosty on the reverse, with the obverse showing a bit of grayish-gold patina and the reverse pale lilac. The strike is sharp throughout both sides, and scattered abrasions are minimal. This piece is certified in an old PCGS small-size green holder with dot-matrix-printed label, a piece that has clearly resided in its slab for many years. Among the finest graded at either service. Population: 2 in 65, 0 finer (7/15). PCGS# 572208 Base PCGS# 6336

- 5034 1873-CC Arrows, Small CC, WB-102, Die Pair 3, R.4, XF40 PCGS.** Pleasing light-gray toning and hints of pale champagne grace each side of this scarce Carson City half. Variety specialists will appreciate the Small CC mintmark that appears on this With Arrows die pair. An attractive, sharply detailed example — one that is always highly desired by collectors who specialize in the historical importance of Carson City coinage. A few insignificant surface marks are consistent with the grade.
Ex: Dallas Signature (Heritage, 11/2006), lot 836. PCGS# 572215 Base PCGS# 6344

**1873-CC With Arrows Seated Half, XF45
Recut '1' in Date**

- 5035 1873-CC Arrows, Large CC, WB-Unlisted, Die Pair 7, R.4, XF45 NGC.** The 1 of the date is repunched slightly south, with a corner of the underdigit 1 showing above the right base. The date is farther right on this variety compared to the WB-103 cross reference, with “haywire die scratches” in the rock support and among Liberty’s lower gown folds. It is the With Arrows obverse paired with a Large CC reverse, with the mandated Open 3. This Choice XF example is deeply toned with intense gunmetal-blue toning at the margins surrounding amber-gold centers. Hints of mint luster remain near the central motifs. Slightly more available than the surrounding Carson City dates, yet still challenging even when circulated. NGC Census (all varieties): 15 in 45, 40 finer (6/15). PCGS# 572216 Base PCGS# 6344

**1875-CC Half Dollar, MS64
Rarely Seen Finer**

- 5036 1875-CC WB-101, Die Pair 2, R.4, MS64 PCGS. CAC.** Half dollar production in Carson City just edged over 1 million coins in 1875, but few examples are known to survive in high grades. This Choice representative is boldly struck, with frosty luster and light golden toning overall. A loupe reveals are few trivial grazes in the obverse fields, but none are singularly obvious and the eye appeal is uncommonly high for the grade. Population: 27 in 64, 7 finer (6/15).
From The Birmingham Collection. PCGS# 572227 Base PCGS# 6350

**1875-S Seated Half, MS65
WB-101, Pleasing Luster**

- 5037 1875-S Very Small S, WB-101, Die Pair 6, R.3, MS65 PCGS.** The large mintage of 3.2 million pieces makes the issue more available than earlier San Francisco issues. Mint State 1875-S half dollars are found on occasion through MS65, but they are a significant condition scarcity any finer. Rich luster remains beneath a patina of gray-green, golden-brown, rose-pink, and orange-gold on this pleasing Gem example. The design elements display strong detail. Population (all varieties): 57 in 65 (2 in 65+), 21 finer (7/15). PCGS# 572229 Base PCGS# 6351

**1875-S Seated Half, MS66
WB-101, Unlisted Obverse Die**

- 5038 1875-S Very Small S, WB-101, Unlisted Die Pair, MS66 PCGS.** Not surprisingly, a large number of die pairs were required to strike 3.2 million pieces at the San Francisco Mint for the year. The latest Wiley-Bugert reference identifies 21 die pairs. While the reverse die is identifiable as a late die state of Reverse N, in our opinion the obverse die does not match any of those pictured (particularly when paired with Reverse N), making this a 22nd variety for the issue. Specialists will find the die news of interest, while all Seated half enthusiasts will be impressed with the high quality of the present coin. The surfaces are satin-smooth, lustrous, and lightly toned in hues of lilac and gold. The strike is sharp except at the center of star 8 and the highest strands of Liberty's hair. PCGS has seen just a single coin numerically finer for all varieties. Population (all varieties): 20 in 66 (1 in 66+), 1 finer (7/15). PCGS# 572229 Base PCGS# 6351

**1876-CC Seated Half, Semiprooflike MS65 ★
Brilliant White-on-Black Contrast**

- 5039 1876-CC Small CC, WB-101, Die Pair 33, R.4, MS65 ★ NGC.** High-grade coins from this die marriage are often prooflike or nearly so, an attribute which drives this sharp Gem example's intense eye appeal. The frost-white design elements deliver modest cameo contrast against the mirrored fields, and grade-limiting abrasions are remarkably few. A visually finer 1876-CC half dollar would be challenging to locate, if one exists. Census: 13 in 65 (1 in 65+, 1 in 65 ★), 4 finer (7/15). PCGS# 572238 Base PCGS# 6353

- 5040 1876-CC Misplaced 8 in Dentsils, Medium CC AU55 PCGS.** WB Cross Reference Unlisted, Die Pair 35, R.4. Medium-to-light toning ranges from reddish-gold to shades of light olive-gold over silver surfaces that retain a nice amount of mint luster. Well-struck for the issue, several light abrasions throughout the fields determine the Choice AU designation. The coin is a perfect match to the current Wiley-Bugert reference for Die Pair 35, which displays a Medium CC mintmark placed low beneath the feather tip. An errant 8 is clearly visible in the dentsils below the 87 in the date. The WB cross reference is technically unlisted because of the Misplaced 8, although the current PCGS holder mistakenly calls it WB-101 with a Small CC mintmark. PCGS# 572239 Base PCGS# 6353

- 5041 1876-CC Large CC, WB-103, Die Pair 2, R.3, AU58 PCGS.** Pastel iridescence complements peach-gold and warm-gray toning across both sides of this pleasingly original Carson City half. The near-Mint surfaces retain a sharp strike, while soft mint luster remains prominent beneath the colorful toning. Incorrectly identified as a Medium CC mintmark on the PCGS holder. PCGS# 572240 Base PCGS# 6353

**1879 Half Dollar, Prooflike Gem
Just 4,800 Coins Minted**

- 5042 1879 Closed Bud, WB-102, MS65 PCGS. CAC.** All circulation strikes have a Type Two reverse with a Closed Bud. Blatant prooflike contrast is one of the defining features of this Gem representative. Just 4,800 pieces were coined in 1879, and cameo finish is a common trait among coins from this popular issue. Full strike definition and a thin layer of golden-olive patina over lustrous, minimally marked surfaces complete the appeal. PCGS# 572260 Base PCGS# 6361

**1888 Seated Half, MS66+
Toned and Frosty**

- 5043 1888 WB-101 MS66+ PCGS. CAC.** The 1888 Seated half dollar is more available than its mintage of 12,001 coins would suggest, but it is still scarce as fine as the Premium Gem grade level. This Plus-graded piece shows frosty luster, with blue and gold peripheral toning surrounding dusky lavender-gray centers. The very top of Liberty's head and the adjacent star 8 show the only mentionable striking weakness. Population: 31 in 66 (3 in 66+), 6 finer (7/15). PCGS# 572273 Base PCGS# 6370

PROOF SEATED HALF DOLLARS

**1859 Half Dollar, Toned PR64
Popular No Motto Proof Issue**

- 5044 1859 PR64 NGC. CAC.** The 1859 half dollar's mintage of 800 coins was the highest in the series up to that point, but compared to later issues it is notably small. Few examples of the 1859 survive above the PR64 grade level. This Choice representative is fully struck with gleaming fields. Sky-blue and navy hues in the margins soften to gold and lavender in the centers, giving this sharp proof outstanding eye appeal. Census: 30 in 64, 30 finer (6/15). NGC ID# 27TJ, PCGS# 6413
- 5045 1865 PR63 Cameo NGC. CAC** A beautiful proof Cameo showcasing the razor-sharp detail imparted by two die impressions. Hints of amber-gold color intrude from the peripheries but do little to hinder the field-device contrast. Light hairlines limit the grade but are not detracting to the unaided eye. Census: 6 in 63 Cameo (1 in 63+ Cameo), 30 finer (6/15). PCGS# 86419

1868 Half Dollar, Colorful PR65

- 5046 1868 PR65 PCGS.** The 1868 has a total mintage of 417,600 business strikes plus 600 proofs. The vast majority of proofs survive in PR63 to PR64 condition, and Gems such as this are decided rarities. A medley of blue, violet, rose, yellow, and orange tones drape each side, generating excellent visual appeal in-hand. Light wispy marks in the fields fail to diminish the desirability of this delightful example. Population: 10 in 65, 6 finer (7/15). NGC ID# 27U3, PCGS# 6426

**1868 Half Dollar, PR66
Appealing Multicolor Toning**

- 5047 1868 PR66 PCGS.** The availability of lower-grade proof 1868 half dollars leaves the rare high-grade pieces, such as this coin, seemingly underappreciated. A thin veil of dusky golden-gray patina graces more vivid hues of ocean-blue, violet, sun-gold, and mint-green. The strike is razor-sharp, and the fields are highly reflective, despite the rich patina. Only six other non-Cameo PR66 examples are certified at PCGS, and none are finer. Population: 6 in 66, 0 finer (7/15). NGC ID# 27U3, PCGS# 6426

1872 Half Dollar, Beautifully Toned PR66

- 5048 1872 PR66 NGC.** Deep rose and cobalt-blue hues occupy the obverse, while the reverse toning is more demure, reflective silver-gray in the center with copper-gold and blue at the rims. The proof strike is full throughout, and contact marks are a nonissue on this beautifully toned coin. Census: 9 in 66, 3 finer (7/15). NGC ID# 27U7, PCGS# 6430

**1873 No Arrows Half, PR66
WB-102, Closed 3, First Generation Holder**

- 5049 1873 No Arrows, Closed 3, WB-102, PR66 PCGS.** A gorgeous Premium Gem proof, attractively toned at the obverse margin in swirling circles of steel-blue and violet, surrounding a brilliant-silver porthole where the coin is without toning and deeply contrasted on the frost-white figure of Liberty. The reverse is more entirely toned in the same lovely shades, and both sides display glassy-deep mirrors. Certainly, the obverse would qualify as Cameo by today's standards, while the contrast on the reverse is minimized by the toning. The surfaces are remarkably untroubled, with a small cluster of lint marks beneath the bottom arrow shaft visible with a glass but of no real significance. The 1873 No Arrows proofs all show the Closed 3 date logotype. Population: 12 in 66 (1 in 66+), 5 finer (7/15). NGC ID# 27U8, PCGS# 6431

**1873 No Arrows, Closed 3 Half, PR66 Cameo
Only One Finer Coin at PCGS**

- 5050 1873 No Arrows, Closed 3 PR66 Cameo PCGS. CAC. Ex:** Stokely Collection. The obverse die shows a small lump in Liberty's lap, and the knobs of the 3 digit nearly touch. This lovely coin has bull's-eye toning on each side, with silver centers that deepen to amber-gold, copper, magenta, and steel-blue at the rims. A couple of dark toning flecks, including one near the 7 in the date, are small and unimportant, but mentioned for pedigree purposes. The profoundly mirrored fields provide stark contrast to the frosty devices, and the coin is free of mentionable impairments. A couple of light die lines join the eagle's right (facing) wing to the scroll end beneath ST in TRUST. CAC endorsed. PCGS has graded two pieces in PR66 Cameo, with one finer (7/15).
Ex: Denver Signature (Heritage, 8/2006), lot 3390. PCGS# 86431

**1873 Arrows Half Dollar, PR64 Cameo
Well-Contrasted**

- 5051 1873 Arrows PR64 Cameo PCGS. WB-106.** Boldly struck, frosty design elements are set against a mirrored backdrop that is devoid of discernible toning, save for a tinge of amber-gold around the date. A few stray hairlines preclude a Gem grade but hardly inhibit the eye appeal. Only 500 With Arrows proofs were struck in 1873, all with the Open 3 logotype in the date. Population: 10 in 64 Cameo, 6 finer (7/15). PCGS# 86434

- 5052 1874 Arrows PR62 PCGS.** This is an untoned, silver-white proof with flashy mirrors and a deep, full strike. There are no untoward marks or flaws to distract the eye. Numerous angled, delicate lines are visible when the coin is viewed other than head-on, and they define the assigned grade. The reverse is noticeably finer. NGC ID# 27UV, PCGS# 6435

**1876 Seated Half, PR66
None Finer at PCGS**

- 5053 1876 PR66 PCGS. CAC.** Richly toned throughout, the deep-mirrored fields reveal complex and beautiful shades of sea-green, ocean-blue, violet, and gold, with flashes of forest-green. Both the business strike and proof mintages were large for the issue, yet few high-grade coins survive. This Premium Gem proof is one of 1,150 struck, and it is tied for the finest at PCGS. NGC reports one finer at PR67. PCGS Population: 9 in 66, 0 finer (7/15). NGC ID# 27UA, PCGS# 6437

- 5054 1878 WB-101, PR64+ Cameo PCGS.** An essentially brilliant, deep-mirrored proof with nicely frosted motifs and a full strike. The strong eye appeal and razor-sharp central devices suggest an even higher grade, limited only by some wispy lines visible under magnification. An underrated Philadelphia date in both circulation strikes and proofs, as confirmed by the population data. Population: 16 in 64 (2 in 64+) Cameo, 11 finer (6/15). PCGS# 86439

- 5055 1879 WB-101, PR64 PCGS.** A scarce and desirable year with a low business strike production. Some dusky blue-gray toning covers each side of this lightly hairlined example. The near-Gem elements are flattered by the surrounding mirrored fields and show a bold strike everywhere but the eagle's left talon. NGC ID# 27UE, PCGS# 6440

- 5056 1879 WB-101, PR63 Cameo PCGS. CAC.** A yellowing Abe Kosoff Numismatic Gallery envelope suggests this coin was lot 653 in one of his combined sales (probably from the mid-to-late 1940s) but no further information is available. A highly original-looking proof with faint golden toning and an overall speckling of deeper blue patina. Silver surfaces show thickly frosted, fully struck central elements surrounded by glassy, deep mirrors. Magnification reveals only a few random, delicate lines. CAC endorsed. Population: 11 in 63 Cameo, 41 finer (6/15). PCGS# 86440

**1880 Seated Half, PR66+ Cameo
None Finer at PCGS**

- 5057 1880 Closed Bud, WB-102, PR66+ Cameo PCGS. CAC.** A vibrant crescent of electric-blue merges into violet and peach-gold shades on the obverse of this high-end Premium Gem half. The reverse coloration consists of reddish and peach-gold hues around the silver center, with the toning deepest at the margin. The fields on both sides show only a few random, microscopic lines that do not distract in the slightest from the mirrorlike sheen. Thickly frosted motifs display a sharp strike throughout. Struck from the Type Two Closed Bud reverse with an obvious die lump on the eagle's left (facing) wing. Population: 11 in 66 (2 in 66+) Cameo, 0 finer (7/15). PCGS# 86441

- 5058 1882 WB-102, PR63 Deep Cameo PCGS.** This is a brilliant, white-on-black Deep Cameo with fully mirrored fields and sharp, frosty design elements. Light, scattered marks limit the grade, but the eye appeal is exceptional for the PR63 level. This die pairing shows a misplaced 88 in the dentils below the date. Population: 1 in 63 Deep Cameo, 15 finer (7/15). PCGS# 96443

- 5059 1884 WB-101, PR64 NGC. CAC.** The untoned, predominantly brilliant fields of this deeply reflective near-Gem proof contrast nicely with frosted central devices, but apparently not enough for cameo recognition. Fleeting freckles of blue and gold toning congregate primarily on the reverse, creeping from the margins toward the silver-white centers. Great eye appeal, CAC endorsed. *From The Birmingham Collection.* NGC ID# 27UK, PCGS# 6445

**1884 Half Dollar, PR65
Attractively Toned Peripheries**

- 5060 1884 WB-101 PR65 PCGS.** A popular late-series issue, the proof 1884 Seated half dollar is only occasionally encountered in Gem condition. This piece shows well-struck devices and deeply mirrored fields, the latter showing warm sun-gold margins with blue and violet around the peripheries. Modest, undesignated contrast highlights both sides. There is a short blue toning streak connecting the top of the eagle's head to the ribbon between the TR in TRUST. Minute recutting at the base of the 1 in the date is diagnostic of proofs, per Breen. Population: 22 in 65, 16 finer (7/15). NGC ID# 27UK, PCGS# 6445

**1884 Seated Half, PR66 Cameo
Gleaming Late-Series Proof**

- 5061 1884 PR66 Cameo PCGS.** Peripheral shades of azure-blue, amber-gold, and magenta frame the frost-white central elements of this attractive Premium Gem Cameo proof. A few delicate lines are visible with a glass, but there are no real problems across the deeply mirrored fields, and the strike is sharp for the issue. PCGS has certified just one numerically finer proof. Population: 9 in 66 (1 in 66+) Cameo, 1 finer (7/15). PCGS# 86445

- 5062 1886 WB-101, PR63 PCGS. CAC.** An old B. Max Mehl kraft envelope suggests this coin comes from the Fred E. Olsen Collection as lot 1172 of sale #104 (11/1944), where it is described as "Brilliant light purple proof." We describe the original, glassy proof surfaces as cerulean blue with patchy reddish-gold overtones. A razor-sharp strike complements the nearly mark-free fields and lightly frosted motifs. A few hazy toned areas underscore the coin's natural surfaces and do not lessen the appeal. NGC ID# 27UM, PCGS# 6447

**1886 Half Dollar, PR67 ★ Cameo
Lovely Toning**

- 5063 1886 PR67 ★ Cameo NGC.** This is a boldly struck, deeply mirrored proof from the heavily collected late dates in the Seated half dollar series. The mirrored fields are free of distractions and both sides exhibit pleasing cameo contrast. The obverse is light golden over the figure of Liberty with vivid rainbow hues in the margins and deeper russet and olive hues around the periphery. The reverse shows deep rose-gold in the margins with aquamarine in the center. An eye-catching Registry coin. Census: 4 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (6/15). PCGS# 86447

**1887 Seated Half, PR66
Prismatic Toning**

- 5064 1887 WB-101, PR66 PCGS.** The mirrored fields of this Premium Gem proof project prismatic, concentric colors when viewed at the optimal light-catching angle. The central motifs are lightly frosted with complementary toning, muting any cameo effect but reinforcing the originality of the rich patina. The fields display deep-mirror reflectivity with no more than a few stray delicate lines. Slight loss of detail at the eagle's talons and arrow fletchings is the only weakness of strike. Population: 10 in 66 (1 in 66+), 2 finer (6/15). NGC ID# 27UN, PCGS# 6448

1888 Half Dollar, Toned PR65

- 5065 1888 PR65 NGC.** This lovely Gem proof exhibits razor-sharp detail with gleaming mirrors in the fields. Both sides are dusted with smoky-gold toning which shows undertones of rainbow color in the left obverse field and hints of olive and amber on the reverse. A few stray lines are all that limit the grade. Census: 21 in 65, 19 finer (6/15). NGC ID# 27UP, PCGS# 6449

**1889 Seated Half, PR66
Excellent Original Toning**

- 5066 1889 PR66 PCGS. WB-101.** Gradually declining proof half dollar production in the latter half of the 1880s resulted in a mintage of only 711 coins in 1889. This Premium Gem survivor is well-struck, with deep mirroring in the fields. The reverse shows lovely sun-gold central hues surrounded by peripheral violet and ocean-blue, while the obverse exhibits similar colors but in a more dispersed pattern. Population: 22 in 66 (1 in 66+), 3 finer (7/15). NGC ID# 27UR, PCGS# 6450

BARBER HALF DOLLARS

- 5067 1892 MS65 PCGS.** Unimportant softness on the right shield corner is the only area of weakness on this nearly fully struck Gem. Frosty, brilliant surfaces show a ring of pale gold toning around the rims. The 1892 claims a mintage of 934,000 pieces. Many coins were saved, but the issue is seldom seen finer. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

- 5068 1892-O MS62 PCGS.** Of primary importance on this Uncirculated O-mint Barber half is the exceptionally bold strike throughout, including the right corner of the shield. Lustrous, essentially untuned surfaces have faint blushes of gold patina around the margins, and each side shows minor ticks that do not detract. NGC ID# 24LG, PCGS# 6462

- 5069 1892-O MS63 PCGS.** The 1892-O has the highest *Guide Book* price in Good of any Barber half issue except the rare Micro O variety. The '92-O is even more elusive in Mint State, particularly with the clean and lustrous surfaces of the present coin. The borders exhibit chestnut-gold toning. Housed in a green label holder. *From The Birmingham Collection.* NGC ID# 24LG, PCGS# 6462

- 5070 1892-O MS64 PCGS.** First-year New Orleans Barber halves (390,000 coins minted) are seldom seen in Uncirculated condition, and Choice representatives comparable to this piece are very scarce. The design features are typically struck with attractive sea-green, cobalt-blue, and crimson toning that frames partly brilliant, softly frosted centers. The fields are deeply prooflike. Population: 46 in 64 (3 in 64+), 21 finer (6/15). NGC ID# 24LG, PCGS# 6462

**1892-O Half Dollar, Sharp MS65
Popular First-Year Issue**

- 5071 1892-O MS65 PCGS.** The 1892-O half dollar claims a low mintage of 390,000 pieces, and the issue enjoys some popularity with mintmark type collectors as the first date of the Barber design. This delightful Gem displays vibrant mint luster and well-detailed design elements, with a touch of softness on the eagle's right (facing) claw. Population: 15 in 65 (1 in 65+), 6 finer (6/15). *Ex: New York Signature (Heritage, 3/2012), lot 3443.* NGC ID# 24LG, PCGS# 6462

**1892-O Barber Half, VG8
Collectible Micro O Variety**

5072 1892-O Micro O, FS-501, VG8 PCGS. CAC. The Micro O 1892-O Barber half has proven elusive in all grades, with fewer than 100 examples believed known. This collector-grade VG example displays beautifully original golden-gray patina with tinges of olive, amber, and gunmetal-blue in the fields. The L and Y in LIBERTY are clear, as well as the upper halves of the I and T. Population: 2 in 8, 23 finer (7/15). PCGS# 391216 Base PCGS# 6463

5073 1892-S MS62 PCGS. This untoned silver-white S-mint Barber half dollar is sharply struck save for the upper-right shield corner and boasts few marks for the grade, which is determined by the somewhat thin luster. Nevertheless, this piece is quite appealing. Population: 28 in 62, 78 finer (6/15). NGC ID# 24LJ, PCGS# 6464

**1893 Half Dollar, MS65
Conditionally Rare in Gem or Better**

5074 1893 MS65 PCGS. Nearly twice as many P-mint Barber halves were coined in 1893 compared to 1892, but examples were saved to a far lesser extent. Variegated olive, red-violet, and ice-blue patina graces the obverse peripheries, leaving the centers mostly brilliant. The color scheme is similar on the reverse, although the toning is more uniform with occasional flashes of brilliance. This is a well-struck Gem with moderate incompleteness confined to stars 3 and 11, the right shield/wing juncture, and the arrow fletchings. Population: 19 in 65 (1 in 65+), 11 finer (7/15). NGC ID# 24LK, PCGS# 6465

**1893 Half Dollar, MS65
Attractively Patinated**

5075 1893 MS65 PCGS. Beautiful antique-copper toning envelops both sides with blue and gold shades on the reverse. Sharply detailed surfaces are thickly frosted and blemish-free. This second-year issue was not saved as extensively as the 1892. Population: 19 in 65 (1 in 65+), 11 finer (7/15).
Ex: *Long Beach Signature* (Heritage, 10/2000), lot 6268; *Central States Signature* (Heritage, 4/2012), lot 4570. NGC ID# 24LK, PCGS# 6465

5076 1893-O MS64 PCGS. Razor-sharp for an O-mint Barber half with silver-gray centers that yield to bands of gold and green near the rims. This sharply struck Choice survivor is well-preserved with only a handful of stray marks on each side. PCGS counts 11 finer coins (7/15).
Ex: *Dallas Signature* (Heritage, 10/2008), lot 945. NGC ID# 24LL, PCGS# 6466

5077 1893-S AU58 PCGS. The 1893-S Barber half dollar is a semikey issue in the series with a relatively low mintage of 740,000 pieces. Examples are very scarce in Mint State, and this near-Mint coin would be perfect for the collector on a budget. The forecurls are a touch soft, but the right shield corner has fully defined horizontals. High-point rub is essentially indiscernible, and light olive-toned, partly reflective surfaces show minimal marks. NGC ID# 24LM, PCGS# 6467

**1893-S Barber Half Dollar, MS63
Sharp and Lustrous**

5078 1893-S MS63 PCGS. This well-struck piece shows pretty amber-gold and steel-blue coloration near the peripheries on each side, with moderate luster visible in the silvery centers. There are a few slide marks on Liberty's cheek, but this coin is nice for the grade. A desirable series key, produced to the extent of only 740,000 coins. Population: 21 in 63 (1 in 63+), 24 finer (7/15). NGC ID# 24LM, PCGS# 6467

1896 Barber Half, Toned MS65

5079 1896 MS65 PCGS. Most Mint State 1896 Barber halves are located in MS64 or lower grades, and Gem representatives are only infrequently encountered. This piece displays bold definition on the stars and the eagle's right (facing) talons and wing junction, with satiny luster that is free of major distractions. Both sides show uniformly mottled russet-gray toning. Population: 14 in 65, 5 finer (7/15). NGC ID# 24LV, PCGS# 6474

5080 1896-S XF45 PCGS. CAC. The 1896-S is a challenging date in all grades, far more so than its mintage of more than 1.1 million coins would suggest. This Choice XF example offers a well-detailed option for the budget-conscious collector. Both sides show original olive-gray patina. Population: 9 in 45, 87 finer (7/15). NGC ID# 24LX, PCGS# 6476

5081 1897 MS64 NGC. The frosty surfaces on this near-Gem have generous luster, a razor-sharp strike, and excellent eye appeal. Color is largely gray-white. An appealing near-Gem despite small marks. Census: 43 in 64 (1 in 64+), 26 finer (7/15).
Ex: The Estate of John C. Hugon (Heritage, 4/2012), lot 4584. NGC ID# 24LY, PCGS# 6477

1897 Half Dollar, MS65 Frosty and Fully Struck

5082 1897 MS65 PCGS. CAC. Barber half dollar representatives from any issue are apt to be found with some degree of strike softness, be it on the headband, right shield corner, talons, or fletchings. This thickly frosted and entirely brilliant CAC-approved Gem avoids such pitfalls. The devices are fully struck, the preservation is extraordinary, and the visual appeal is unsurpassed for those who appreciate original mint brilliance. Population: 25 in 65, 14 finer (7/15).
From The College Collection, Part Two. NGC ID# 24LY, PCGS# 6477

1897-S Half Dollar, AU58 Seldom Seen Finer

5083 1897-S AU58 PCGS. CAC. The 1897-S Barber half is a slightly better date, benefiting in that regard from a mintage of just less than 1 million coins. Mint State survivors are scarce and out of reach for budget-conscious collectors. This Borderline Uncirculated representative exhibits sharp detail with just a trace of friction over the high points of the devices. The obverse shows pale champagne toning with midnight-blue around the borders. The reverse shows the same colors, but in a more distinctive pattern — the blue forms a perfect crescent moon over the left two-thirds of the coin, and the champagne occupies the remainder. Population: 5 in 58, 51 finer (7/15). NGC ID# 24M2, PCGS# 6479

1898-O Half Dollar, Sharp MS63 Captivating Multihued Toning

5084 1898-O MS63 PCGS. Glistening mint luster underlies intermixed shades of orange, red, yellow, lavender, and blue. The effect immediately captivates the viewer, whose attention is then drawn to the equally impressive, nearly fully struck devices. The combination of vibrant luster, strong definition, and excellent eye appeal is atypical for a New Orleans representative, and this Select example is deserving of serious consideration. Population: 11 in 63, 34 finer (7/15). NGC ID# 24M4, PCGS# 6481

1898-O Barber Half Dollar, MS64 Lightly Patinated, Needle-Sharp Obverse

5085 1898-O MS64 PCGS. This near-Gem is strongly impressed with particularly bold definition on the obverse motifs. The reverse displays typical softness at the juncture of the right shield corner and the eagle's wing. Light lavender and rose tones provide color to the partly brilliant, shimmering surfaces with blue accents at the upper reverse. A wonderful example of this better-date issue with a mintage of 874,000 coins. Population: 22 in 64, 12 finer (7/15).
From The College Collection, Part Two. NGC ID# 24M4, PCGS# 6481

**1898-S Barber Half, Impressive MS64
First Generation Holder, Sharp Appeal**

5086 1898-S MS64 PCGS. CAC. The 1898-S is a scarcer issue than its relatively high mintage of 2.3 million coins would suggest. This is a pleasing example with sharp strike definition and smoky silver-gray toning over the obverse, complemented by slight gold-tan and olive peripheral accents. The reverse displays slightly deeper golden-gray coloration. Both sides are lustrous and well-preserved. Housed in a first-generation PCGS holder with a green label and CAC endorsement. Population: 14 in 64, 13 finer (6/15). NGC ID# 24M5, PCGS# 6482

5087 1899 MS64 PCGS. A fully brilliant and untoned Choice Mint State example, this lovely Barber half dollar exhibits satin mint luster with excellent eye appeal. The devices are sharply defined and contrast nicely with the semi-reflective fields. Population: 56 in 64 (1 in 64+), 40 finer (7/15). NGC ID# 24M6, PCGS# 6483

1899-O Barber Half, Toned MS65

5088 1899-O MS65 PCGS. Considerable luster manages to penetrate the deep patina of rose, lilac, cobalt-blue, and copper-gold on this Gem 1899-O Barber half. The strike is sharp, and abrasions are minimal. The 1899-O is a better date, seldom available in Gem grade and quite elusive in finer condition, where the population data are skewed by resubmissions and duplicates. Population: 8 in 65, 8 finer (6/15). NGC ID# 24M7, PCGS# 6484

1899-S Half Dollar, Fully Struck MS65

5089 1899-S MS65 PCGS. Frosty luster greets the viewer on each side of this lovely Gem 1899-S half dollar, an exceptionally well-made and well-preserved example. The surfaces show only minimal, grade-consistent ticks, and the full strike extends even to the challenged right shield corner on the reverse. A great example of this difficult date. Population: 9 in 65 (1 in 65+), 8 finer (6/15). NGC ID# 24M8, PCGS# 6485

1901-O Half Dollar, Dusky MS64

5090 1901-O MS64 PCGS. CAC. The 1901-O Barber half is a better date, commanding a premium in the upper circulated grades, as well as the Mint State level. This Choice example displays satiny golden-gray luster with overtones of olive and amber-red in portions of the fields. Well-struck on the obverse, but weak over the central eagle on the reverse. Population: 10 in 64 (2 in 64+), 7 finer (7/15). NGC ID# 24MD, PCGS# 6490

**1901-S Half Dollar, MS63
Better Date**

5091 1901-S MS63 PCGS. The 1901-S is one of the more sought-after issues in the Barber half series in Mint State, as such pieces are scarce in any grade. This Select example is a trifle weak on the eagle's right (facing) talons and wing junction, but otherwise shows crisp detail. Satiny luster is accented by shades of pale lavender-gray toning, while a few scattered abrasions determine the grade. Population: 9 in 63, 18 finer (7/15). NGC ID# 24ME, PCGS# 6491

5092 1902-O AU58 PCGS. CAC. This 1902-O Barber half is deficiently struck on both sides, but actual wear is almost nonexistent. Close study with a lens reveals only a few faint slide marks on the high points of the obverse portrait which limit the grade. Satiny with a touch of light golden toning. Population: 17 in 58, 45 finer (7/15). NGC ID# 24MG, PCGS# 6493

**1902-S Half Dollar, MS65
Elusive in Mint State**

5093 1902-S MS65 PCGS. This early 20th century San Francisco issue is scarce in all Mint State grades, and is rarely seen finer than MS63. This Gem representative shows deep olive, russet, and forest-green toning around portions of the peripheries, with pale champagne color elsewhere. The high points of the eagle, particularly the right (facing) talons and wing junction, are weakly defined. The obverse is well-struck. Population: 6 in 65, 11 finer (7/15). NGC ID# 24MH, PCGS# 6494

1903-O Half Dollar, Elusive MS65

- 5094 1903-O MS65 PCGS.** The 1903-O Barber half issue is scarce in Mint State and rare as a Gem, despite a mintage of more than 2 million pieces. Golden-brown and teal colors appear on large portions of both sides, accented by a few splashes of plum. Pleasing satin luster adds to the eye appeal. Population: 8 in 65 (2 in 65+), 6 finer (6/15). NGC ID# 24MK, PCGS# 6496

**1904 Half Dollar, MS66
Conditionally Rare**

- 5095 1904 MS66 NGC.** In determining the rarity of just about any issue in the Barber half series in Gem grades, mintage figures can be disregarded. This was a commercial workhorse series, heavily circulated and little collected; even common dates become rare in the upper Mint State levels. The 1904 is a prime example. This Philadelphia issue had a mintage of nearly 3 million coins, but is genuinely rare at the MS65 grade level and anything finer is exceedingly so. In MS66, the currently offered coin is tied with just two others for the finest at NGC (6/15). This piece is boldly struck, draped in milky golden and lilac patina. The underlying surfaces display a hard, satiny brilliance with just a few inconsequential marks on Liberty's cheek and neck.
Ex: FUN Signature (Heritage, 1/2005), lot 4235.
From The Greensboro Collection, Part V. NGC ID# 24MM, PCGS# 6498

1904-S Barber Half, Choice VF

- 5096 1904-S VF35 PCGS. CAC.** The 1904-S Barber half is a better date in all grades, boasting a limited mintage of barely more than half a million coins. This Choice VF example is well-detailed for the middle circulated grade range, and displays uniform army-green patina on each side with bits of russet in the crevices.
From The College Collection, Part Two. NGC ID# 24MP, PCGS# 6500

-
- 5097 1905-O AU58 PCGS.** Richly toned gold-orange and medium-gray with considerable luster remaining on each side. A shallow scrape is noted behind Liberty's eye and a few other light marks are scattered on both sides. NGC ID# 24MS, PCGS# 6502

**1907 Barber Half, MS66
Few Peers, Ex: Friend**

- 5098 1907 MS66 PCGS. Ex: Friend.** For such a high-mintage issue (more than 2.5 million coins struck), the 1907 Barber half has an extremely low population in Premium or Superb Gem quality. In MS66, PCGS lists only four coins and NGC just six; an MS67+ PCGS coin is the only finer example (6/15). The Friend coin is a splendid Premium Gem with frosty ivory luster, enhanced by lilac and rose at the upper-left obverse, and with additional iridescent splashes. The reverse is a trifle weak at the junction of the right (facing) wing and the shield, a point of weakness on many different issues, perhaps because it is exactly opposite the highest point of Liberty's cheek. Population: 4 in 66, 1 finer (6/15).
Ex: U.S. Coins, Inc.; Dale Friend; FUN Signature (Heritage, 1/2009), lot 2947.
From The Greensboro Collection, Part V. NGC ID# 24MY, PCGS# 6508

-
- 5099 1907-D MS64 PCGS.** The deep satin surfaces have a silver-white glow over both sides. The only place of color is a burnt-orange toning spot in the field adjacent to the middle featherhead. Two shallow marks on Liberty's cheek are the only barriers to an even higher grade. Population: 55 in 64 (2 in 64+), 38 finer (6/15).
Ex: CSNS Signature (Heritage, 4/2012), lot 4614. NGC ID# 24MZ, PCGS# 6509

- 5100 1907-D MS64 NGC.** This 1907-D Barber half dollar is free of major abrasions, but a few light grazes on Liberty's cheek preclude a Gem grade. The surfaces show satiny luster with just a hint of light golden toning. Minor softness on the eagle's right (facing) wing junction is the only such occurrence on the coin. Census: 37 in 64 (1 in 64+), 25 finer (7/15). NGC ID# 24MZ, PCGS# 6509

**1908-S Half Dollar, MS66
Frosty and Toned, Ex: Friend**

- 5101 1908-S MS66 PCGS. CAC. Ex: Friend.** The 1908-S Barber half is a condition rarity in Gem or finer grades. In top condition, the issue compares favorably to the 1907-S, one of the most important dates in the entire Barber half dollar series in regards to high-grade rarity. The Friend Premium Gem coin is similar to the Hugon coin sold in January 2005, and is one of only seven different MS66 examples that have appeared in any of our auctions over the last 20+ years. While the strike is somewhat indistinct, especially on the reverse, the surfaces are pristine with few marks of any kind. Faint roller striae can be seen on the obverse, remaining from the original planchet. Satiny and lustrous surfaces are visible through splendid gold and iridescent toning. Population: 4 in 66 (1 in 66+), 2 finer (6/15).
Ex: FUN Signature (Heritage, 1/2009), lot 3902.
From The Greensboro Collection, Part V. NGC ID# 24N7, PCGS# 6515

**1909 Half Dollar, MS66
Conditional Rarity**

- 5102 1909 MS66 PCGS. CAC.** Among 1909-dated Barber halves from the three mints, this Philadelphia issue is the most available in absolute terms with a mintage approaching 2.4 million coins. Nevertheless, examples are scarce in Gem condition and very rare in this lofty grade. In fact, PCGS reports only 14 pieces in MS66 (three in MS66+) and none finer (7/15). This carefully preserved and well-struck representative features delicate russet and purple toning toward the margins, while the centers remain largely brilliant. NGC ID# 24N8, PCGS# 6516

**1909-O Half Dollar, MS66
Only One Finer PCGS Example**

- 5103 1909-O MS66 PCGS Secure. Ex: Duckor/Emery-Nichols.** The New Orleans Mint stopped minting coins for good in 1909, marked by a final mintage of 925,400 half dollars. The building then served several years as an Assay Office. (Today, the New Orleans Mint houses the Louisiana State Museum and Historical Center, along with a world famous jazz exhibit and numismatic displays.)

This radiant example of the final-year production is a fitting representative of the final O-Mint half dollars. The strike is above-average for this New Orleans issue, especially on the well-detailed reverse. Both sides display satiny silver luster beneath champagne toning, with peripheral reddish-gold, sea-green, and iridescent shades. The obverse is cracked through the bust tip, with a continuation across the truncation to the back of the neck.

The die shows erosion from long use, and minor die bulging on Liberty's neck extends upward across the draw, giving rise to the issue's "Mumps" nickname. A shallow scrape on Liberty's cheek is the only blemish of any consequence on this Premium Gem. Only a single example is certified finer by either service. PCGS Population: 3 in 66, 1 finer (6/15).

Ex: The Emery and Nichols Collections (Bowers and Merena, 11/1984), lot 847; Dr. Thaine B. Price (David Akers, 5/1998), lot 179; The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3228.

From The Greensboro Collection, Part V. NGC ID# 24N9, PCGS# 6517

**1910 Half Dollar
Lustrous, Frosty Gem**

- 5104 1910 MS65 PCGS. CAC.** One of the scarcer Philadelphia Mint Barber halves in Gem condition, with few pieces certified finer by either service. Less available at this grade level than the highly-touted 1915-P. Pearlescent lilac-gray surfaces project vibrant bursts of silver mint luster. Sharply struck except on the arrow fletchings and the top-right shield corner. CAC endorsed with terrific eye appeal. Population: 23 in 65 (1 in 65+), 7 finer (6/15). NGC ID# 24NB, PCGS# 6519

**1910 Barber Half, Frosty MS66
Among the Finest Certified**

- 5105 1910 MS66 PCGS.** This Philadelphia issue is marginally available in grades through MS64, but Gems are scarce and anything finer is rare. This Premium Gem exhibits frosty mint luster with unabraded surfaces. The obverse shows pale champagne color in the center and deeper mint-green and lilac hues around the periphery. The reverse is uniformly light golden. Some of the usual striking softness is observed on the eagle's right (facing) wing junction. Population: 7 in 66 (1 in 66+), 0 finer (7/15). NGC ID# 24NB, PCGS# 6519

**1910 Half Dollar, MS66
Outstanding, Shimmering Luster**

- 5106 1910 MS66 PCGS. CAC.** The 1910 Barber half dollar is one of the less recognized, but more important Philadelphia Mint issues in the series, with a mintage of only 418,000 coins. With just six similarly graded pieces at PCGS and none finer (6/15), the present example is of great importance to Registry Set competitors. Aside from the usual weakness at the junction of the shield and right (facing) wing, the motifs are well-defined. This piece is fully lustrous with frosty surfaces that exhibit a faint trace of speckled gold toning. Ex: FUN Signature (Heritage, 1/2009), lot 3905. From The Greensboro Collection, Part V. NGC ID# 24NB, PCGS# 6519

1910-S Half Dollar, Stunning MS65

- 5107 1910-S MS65 PCGS.** The silver centers on each side of this stunning Gem Barber half cede to sunset-orange, cinnamon, and lilac hues near the rims. The strike is uniformly bold save for a touch on the right shield corner and the eagle's right (facing) claw. There are no visible marks of consequence. Population: 8 in 65, 20 finer (6/15). NGC ID# 24NC, PCGS# 6520

**1911 Half Dollar, Resplendent MS66
None Finer at PCGS, Ex: Duckor-Price**

- 5108 1911 MS66 PCGS Secure. CAC. Ex: Duckor/Price.** The strike is solid on this outstanding Registry coin, although slightly shy of full. Both sides are highly lustrous, with satiny mint brilliance shining through incredible orange-gold, violet, and iridescent toning. A few specks attest to the originality of the surfaces, and a couple field nicks near the chin are the only consequential marks. The Price-Duckor specimen is numerically equal to the piece in the current highest-rated Registry Set, and the Duckor Collection still ranks as the all-time finest Registry Set at PCGS. David Akers wrote in the Price catalog: "This is not a rare issue at all, but rather a fairly common one in all mint state grades, including Gem condition, something that cannot be said for very many Barber Half Dollar issues." Given its moderate availability in MS66, the 1911 is also a candidate for a high-grade type collection of U.S. coins. Population: 12 in 66, 0 finer (6/15). Ex: Dr. Thaine B. Price (David Akers, 5/1998), lot 183; The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3232. From The Greensboro Collection, Part V. NGC ID# 24ND, PCGS# 6521

1911-S Barber Half, Sharp MS65

- 5109 1911-S MS65 PCGS.** Largely untuned silver-gray surfaces boast generous luster and cede at the lower reverse to a small patch of cinnamon patina. The sharp strike extends even to the right shield corner. This late-series S-mint is more elusive in Gem and finer grades than might be thought. Population: 11 in 65, 7 finer (6/15). NGC ID# 24NF, PCGS# 6523 Base PCGS# 6523

**1912 Barber Half, MS65
Original Luster and Toning**

- 5110 1912 MS65 PCGS. CAC.** With a large mintage of 1.5 million pieces, the 1912 Barber half dollar is readily available in lower grades, but it is one of the more difficult issues of the series to locate at the Gem level. The present coin is well-preserved, with seemingly pristine fields. The surfaces are graced by iridescent shades of crimson, gray, and blue toning in the recesses, while the motifs remain untuned. Population: 22 in 65 (3 in 65+), 3 finer (6/15).
Ex: Houston Signature (Heritage, 12/2009), lot 783.
From The Greensboro Collection, Part V. NGC ID# 24NG, PCGS# 6524

- 5111 1912-D MS64+ PCGS.** Brilliant, frosty luster is the hallmark of this Plus-graded Choice 1912-D half dollar. The eagle's right (facing) talons are slightly soft, but the strike is otherwise sharp throughout. Light contact marks on Liberty's cheek limit the technical grade. NGC ID# 24NH, PCGS# 6525

- 5112 1913-D MS64 PCGS. CAC.** Dusky golden-gray toning blankets the satiny surfaces of this 1913-D Barber half, with few noticeable abrasions in evidence. Several obverse stars mirror the striking softness seen on the right side of the eagle's body. Population: 53 in 64 (1 in 64+), 18 finer (7/15).
From The Birmingham Collection. NGC ID# 24NL, PCGS# 6528

**1913-D Barber Half, Phenomenal MS66
Tied for Finest at PCGS**

- 5113 1913-D MS66 PCGS Secure.** *Ex: Duckor/Akers.* The Denver Mint coined 534,000 half dollars in 1913, the seventh-lowest mintage in the entire Barber series. Overshadowed by the lower-mintage 1913 and the higher-mintage 1913-S, this Denver issue is an undeserved "poor stepchild" of the date. Even so, connoisseurs of the series know to give this issue great respect in high grades.

The sharp strike and full mint brilliance provide this coin with a high degree of aesthetic desirability. The surfaces exhibit faint silver-gray toning and a few freckles of deeper iridescence. Slight weakness visits the upper right shield junction, a characteristic that is unavoidable even on the highest-graded coins of the issue. PCGS has yet to grade a finer example, emphasizing the importance of the present opportunity. This beautiful Premium Gem is destined for a remarkable date or type collection. Population: 6 in 66, 0 finer (6/15).

Ex: David Akers (6/15/1992); The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3239.

From The Greensboro Collection, Part V. NGC ID# 24NL, PCGS# 6528

- 5114 1914 MS63 PCGS.** From a low-mintage of 124,230 pieces, this attractive Select specimen exhibits well-detailed design elements and lustrous brilliant surfaces with a few scattered minor contact marks. Population: 40 in 63, 57 finer (7/15). NGC ID# 24NN, PCGS# 6530

- 5115 1914-S MS64 PCGS.** The 1914-S is only marginally more available than the 1914 in MS64 or better despite the significant mintage differential. This frosty, golden-gray near-Gem features boldly impressed motifs with minor incompleteness on the right shield corner and arrow fletchings. Population: 40 in 64, 23 finer (7/15). NGC ID# 24NP, PCGS# 6531

1914-S Barber Half, Brilliant MS65

- 5116 1914-S MS65 PCGS.** Brilliant silver-gray surfaces show effulgent luster and little trace of other color on this sharp Gem 1914-S Barber half. The strike is bold over most of each side, save for a couple of star centers and no more than a trace of weakness on the upper-right shield corner. Population: 15 in 65 (2 in 65+), 8 finer (6/15). NGC ID# 24NP, PCGS# 6531

1915 Barber Half, MS65 Pastel Toning

- 5117 1915 MS65 PCGS.** This final Philadelphia Barber half is scarce in Mint State and is rarely seen in Gem or better condition. This piece shows rich, satiny luster with faint, parallel die striae evident in the fields, as-struck. Faint silvery-lilac hues encompass much of each side, but yield to deeper gold, olive, and amber around portions of the periphery. The eagle's right (facing) wing junction is a trifle soft, but the strike is otherwise satisfactory. Population: 17 in 65 (1 in 65+), 4 finer (7/15). NGC ID# 24NR, PCGS# 6532
- 5118 1915-D MS65 PCGS.** Strongly detailed devices exhibit a trace of softness on stars 3 and 11, and on the right shield/wing juncture. Each side features an eye-catching combination of uninhibited brilliance and luminous satin luster. A few shallow grazes on the obverse define the grade. Population: 59 in 65, 19 finer (6/15). NGC ID# 24NS, PCGS# 6533
- 5119 1915-S MS64 PCGS. CAC.** Wispy champagne toning appears on both sides of this Choice Mint State Barber half dollar, with charcoal patina along the right obverse and reverse border. NGC ID# 24NT, PCGS# 6534

1915-S Half Dollar, MS67 Significant Condition Rarity

- 5120 1915-S MS67 NGC.** This S-mint issue claims a mintage of 1.6 million coins, and it is far more available than its key date Philadelphia counterpart, which boasts a production less than one-tenth the size. However, the 1915-S becomes a major condition rarity in MS67, where NGC and PCGS have seen only five examples collectively. Occasional faint blushes of golden-tan patina appear over frosty and brilliant surfaces that are virtually without fault. Only star 11 and the arrow fletchings are trivially incomplete. Census: 3 in 67 (1 in 67 ★), 0 finer (7/15).
From *The Greensboro Collection, Part V*. NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

- 5121 1892 PR64 NGC.** This is a boldly struck Choice proof from the inaugural Barber half dollar issue. Tinges of violet and blue appear around the peripheries, while the interiors show light champagne color and modest, undesignated contrast. Housed in a prior generation holder. NGC ID# 24NU, PCGS# 6539

1892 Barber Half, PR67 Cameo Popular First-Year Proof

- 5122 1892 PR67 Cameo NGC.** This delightful Superb Gem exhibits sharply detailed design elements throughout. The devices have a frosty texture that contrasts boldly with the deeply reflective fields, creating an intense cameo effect. A few hints of pale gold toning add to the terrific eye appeal. From a first-year mintage of 1,245 pieces. Census: 26 in 67 Cameo (2 in 67 ★ Cameo), 3 finer (6/15). PCGS# 86539

1892 Barber Half, PR67 Cameo
Obvious Originality

- 5123 1892 PR67 Cameo NGC.** Beautiful, wide mattelike rims display a tinge of blue and frame the gleaming, glassy-mirrored fields and frosted central devices of this contrasted Superb Gem proof. A splendid first-year representative of the type, the coin features clear, reddish-gold patina on both sides and attractive, coppery highlights for amazing original appeal. There are no disturbances or distractions to report. Census: 26 in 67 Cameo (2 in 67 ★ Cameo), 3 finer (6/15). PCGS# 86539

- 5124 1892 PR64+ Deep Cameo PCGS.** A slight hint of clear, russet-red toning at the margins and a whisper of almond-gold color on Liberty's portrait confirm the originality of this glittering proof half dollar. Strong contrast separates the motifs from the glassy-deep mirrored fields. This coin is extremely close to full Gem quality, a scarce coin as a first-year proof in this grade. Population: 3 in 64 (1 in 64+) Deep Cameo, 17 finer (7/15). PCGS# 96539

1894 Half Dollar, PR66
Variegated Colors, Repunched Date

- 5125 1894 PR66 PCGS. CAC.** Rotation beneath a light exhibits splendid navy-blue, jade-green, peach-gold, and slate-gray toning. The strike is bold except on the right shield corner, and the surfaces are immaculate aside from a slender mark on the shield. Breen describes this repunched date variety as "extra outlines within triangle of 4." Despite a proof mintage of just 972 pieces, at least two obverse dies were used, and each displays a slightly different date position. CAC endorsed. Population: 26 in 66, 10 finer (6/15). NGC ID# 24NW, PCGS# 6541

1895 Half Dollar, PR65 Cameo
Scarcely Seen With Bold Contrast

- 5126 1895 PR65 Cameo NGC.** Ex: Highland Collection. The proof mintage of 880 pieces is one of the larger productions in the Barber half dollar series, but only 20% to 30% of survivors are found with Cameo contrast. This brilliant Gem features tinges of powder-blue and gold that are more noticeable on the reverse. Bold contrast between the thickly frosted design elements and the reflective, almost jet-black fields captures the gaze of the viewer. Census: 11 in 65 Cameo, 44 finer (7/15). PCGS# 86542

1895 Barber Half, PR67 Cameo
Lightly Toned

- 5127 1895 PR67 Cameo PCGS.** Cameo examples of the proof 1895 Barber half dollar are rare as fine as the Superb Gem grade level. This piece is toned on both sides in sun-gold and amber hues, but the field-device contrast persists. The strike is bold close study with a loupe fails to reveal any noteworthy surface flaws. Population: 5 in 67 Cameo, 4 finer (7/15). PCGS# 86542

- 5128 1896 PR64 PCGS.** A vividly toned near-Gem with red-violet, lemon-yellow, and electric grape patina over the highly reflective surfaces. Faint obverse hairlines define the grade. Population: 65 in 64, 51 finer (6/15). NGC ID# 24NY, PCGS# 6543

1898 Barber Half, PR67+ Cameo
Beautiful Surfaces

- 5129 1898 PR67+ Cameo PCGS. CAC.** This is a superbly preserved, boldly struck 1898 proof half, exhibiting incredible eye appeal. The obverse shows stark white-on-black contrast accentuated by a hint of light golden toning. The reverse shows medium amber-gold toning in the fields with a splash of soft lavender in the center — the visual effect is lovely purple-on-gold contrast. Population: 7 in 67 (3 in 67+) Cameo, 2 finer (7/15). PCGS# 86545

**1899 Half Dollar, PR66
A Top Rarity in Gem or Better**

- 5130 1899 PR66 NGC.** Ex: Highland Collection. This proof issue has one of the highest mintages in the Barber half dollar series (846 coins), yet it is one of the most elusive dates in Gem condition or finer. Subtle orange centers progress to cobalt-blue and violet hues around the edges on each side. Glassy fields with minimal contact surround moderately frosted devices. Census: 23 in 66, 12 finer (7/15). NGC ID# 24P3, PCGS# 6546

**1899 Half, PR67 Ultra Cameo
Visually As-Struck**

- 5131 1899 PR67 Ultra Cameo NGC.** The sharpness of strike on this Superb Gem Ultra Cameo is almost as impressive as the stark nature of the field-device contrast. Traces of pale champagne toning are almost irrelevant, overwhelmed by the depth of the mirroring and the thickness of the frost. A stray lines are discernible with 10x magnification. The finest of just three Ultra Cameos at NGC (6/15). PCGS# 96546

**1900 Barber Half, PR67 Cameo
Tied for Finest at PCGS**

- 5132 1900 PR67 Cameo PCGS.** Unquestionably among the finest-known Cameo proofs of the issue, and a candidate for even higher recognition. Remarkably well-preserved — likely with the original proof set toning — this Superb Gem half exudes eye appeal. Gunmetal-blue and amber-gold shades grace the margins, while lighter gold patina flirts with the frosted silver central motifs. A razor-sharp proof throughout, with virtually no distractions of any kind. Population: 7 in 67 Cameo, 0 finer (7/15). PCGS# 86547

**1901 Barber Half Dollar, PR65 Cameo
Attractive Multicolor Toning**

- 5133 1901 PR65 Cameo NGC.** The Mint switched to an all-brilliant finish for proof coins in 1902, so the 1901 issue was the last to include a large number of Cameo specimens. This delightful Gem exhibits razor-sharp definition on all design elements and the deeply reflective fields contrast boldly with the frosty devices. Attractive shades of greenish-gold and cobalt-blue toning enhance the outstanding eye appeal. Census: 7 in 65 Cameo (1 in 65 ★ Cameo), 16 finer (7/15). PCGS# 86548

**1901 Half Dollar, PR66 Cameo
All-Brilliant, Stark White-on-Black Contrast**

- 5134 1901 PR66 Cameo PCGS.** The issue's mintage of 813 proofs and its survival rate in high grades are about on par with most other dates in the series, but the radiant brilliance of this Premium Gem inarguably distinguishes it from its peers. The surfaces appear virtually as-struck without any mentionable flaws and dramatic white-on-black cameo contrast. Population: 17 in 66 (3 in 66+) Cameo, 12 finer (7/15). PCGS# 86548

1902 Barber Half, Pastel-Toned PR67

- 5135 1902 PR67 PCGS.** Splendid eye appeal is created by the pastel patina — concentric on the obverse and variegated on the reverse — but largely featuring rose, orange, blue, and jade on both sides against intense luster. The surfaces are well-preserved and show a sharp strike save for the usual trivial area on the reverse. Population: 8 in 67, 0 finer (7/15). NGC ID# 24P6, PCGS# 6549

1909 Barber Half, Toned PR65

5136 1909 PR65 PCGS. A seldom seen Gem proof Barber half, suitable for type or date purposes. This piece is boldly struck and displays gleaming mirrorlike fields. A vivid swath of pine-green, violet, and amber toning encompasses the right obverse field, leaving the remainder of that side light golden. The reverse is uniformly toned in pastel hues. Population: 24 in 65, 39 finer (7/15). NGC ID# 24PD, PCGS# 6556

5137 1910 PR64 PCGS. Irregular lilac-gray toning appears on each side in scattered splashes of color over an underlying field of light champagne. The strike is well-executed and the fields are deeply mirrored. The obverse shows modest field-device contrast. Population: 58 in 64 (2 in 64+), 43 finer (7/15). NGC ID# 24PE, PCGS# 6557

5138 1910 PR64 PCGS. Only 551 proof Barber half dollars were struck in 1910, this being one of the lower production figures in the series; only the 1908, 1911, 1914, and 1915 have lower total proof mintages, and these only by a small margin. This Choice example is well-struck with a hint of contrast. Lilac-gray, lavender, gold, and pale blue hues appear in the fields when tilted beneath a light. Population: 58 in 64 (2 in 64+), 43 finer (7/15). NGC ID# 24PE, PCGS# 6557

1910 Half Dollar, Untoned PR66 Stunning Eye Appeal

5139 1910 PR66 PCGS. The mirrored fields and frosted devices on this stunning, untoned Premium Gem proof certainly seem worthy of a Cameo designation, although none is forthcoming. Mentionable contact is absent throughout both sides, creating excellent eye appeal heightened by the absence of toning. Population: 14 in 66, 15 finer (7/15). NGC ID# 24PE, PCGS# 6557

5140 1913 PR64 PCGS. Intermixed hues of olive, russet, blue, and sea-green blanket the obverse. The reverse is largely light-golden and partly contrasted with glints of amber rim toning. This near-Gem, from a mintage of 627 proofs, has deep mirrors and minimal contact marks. NGC ID# 24PH, PCGS# 6560

1913 Barber Half, Golden PR66 Cameo

5141 1913 PR66 Cameo PCGS. Cameo examples of the proof 1913 Barber half dollar are rare. Only 22 such pieces are graded at PCGS, with five in this grade and five finer (7/15). This coin is boldly struck, with deep mirrors and strong contrast. A few stray lines are barely discernible upon close examination. This representative is toned light golden on each side. PCGS# 86560

5142 1915 PR64 PCGS. Intense cobalt-blue and lilac-gray hues tint each side of this near-Gem proof. The reverse is a touch lighter in tone than the obverse, but both sides are equally reflective and appealing. This would make an ideal circulation-strike alternative for the collector on a budget. From a small mintage of just 450 proofs. NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

5143 1916 MS65 PCGS. This first year Walker claims a relatively low mintage of 608,000 pieces. Lustrous surfaces display russet patina gravitating to the borders, somewhat more extensive and deeper on the obverse. The design features are well-struck, including Liberty's head and branch hand. Both sides are well-preserved. Finer-grade examples are considerably more difficult to locate. NGC ID# 24PL, PCGS# 6566

1916 Half Dollar, MS66 Lightly Toned First-Year Walker

5144 1916 MS66 PCGS. Amber and crimson hues thinly coat otherwise brilliant surfaces awash in softly frosted luster. Liberty's thumb is fully visible, while the central skirt lines and the eagle's leg are moderately indistinct. Mentionable marks are at a minimum on each side. The supply of 1916 representatives through Premium Gem condition is enough to satisfy most collector demand, as this first-year issue (608,800 coins struck) was well-saved by the public. Finer examples, however, are very rare. Population: 93 in 66 (6 in 66+), 5 finer (7/15).
From The College Collection, Part Two. NGC ID# 24PL, PCGS# 6566

**1916 Half Dollar, MS66
Low Mintage Philly Issue**

- 5145 1916 MS66 PCGS. CAC.** Dappled olive-green, golden-brown, and steel-gray toning deepens moderately toward the rims. A coruscating and crisply struck example; close to pristine except for unobtrusive contact on the eagle's rock above the R in DOLLAR. The first-year 1916 is seldom regarded as a key issue, but it does possess the second-lowest Philadelphia mintage of the series, trailing only the 1921. Encapsulated in an old green label holder. Population: 93 in 66 (6 in 66+), 5 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24PL, PCGS# 6566

**1916-D Half Dollar, MS66
Ex: Ally Collection**

- 5146 1916-D MS66 PCGS.** Light chestnut-gold toning adorns this nicely struck first-year representative. Booming luster sweeps unblemished surfaces. The low mintage 1916-D is one of only four issues with an obverse mintmark. Certified in a green label holder. Population: 62 in 66 (1 in 66+), 3 finer (6/15).
Ex: Ally Collection (Heritage, 7/2002), lot 8510, which realized \$3,565.
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1916-D Half Dollar, MS66+
Freckled Gold and Green Toning**

- 5147 1916-D MS66+ NGC.** Original dappled chestnut-gold and forest-green patina endows the borders of this lustrous first-year Walking Liberty half. Lustrous and beautifully preserved with an exemplary strike on Liberty's head and branch hand. Census: 40 in 66 (2 in 66+, 2 in 66 ★), 9 finer (6/15). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1916-D Half Dollar, MS66
First-Year Branch Mint Issue**

- 5148 1916-D MS66 PCGS. CAC.** Although the Denver issue was heavily saved in its first year of production, few examples survive in Premium Gem condition or finer. This lovely MS66 coin is satiny and lustrous, with faint sunset-gold toning that sweeps across the obverse from left to right. Complementary toning is a fraction deeper on the attractive reverse. The strike is uniformly sharp on the central motifs for outstanding eye appeal. CAC endorsed. Population: 62 in 66 (1 in 66+), 3 finer (6/15). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

- 5149 1916-S AU58 PCGS. CAC.** Just the slightest trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen and the brilliant well-preserved surfaces retain almost all of their original mint luster. NGC ID# 24PN, PCGS# 6568

**1916-S Half Dollar
Textured Near-Gem Surfaces**

- 5150 1916-S MS64 PCGS.** The central details of this S-Mint issue are the normal deterrents to a high grade, since normally the issue averages no more than 60% of full details in key areas of the design. This near-Gem example is perhaps a bit bolder than that, although the head, branch hand, and the eagle's trailing leg lack the benefit of a full strike. The surfaces are lightly textured and brilliantly lustrous. A hint of powder-gray toning adds original appeal to the otherwise brilliant silver surfaces. Of the 1916 P-D-S mintages, the San Francisco issue is the scarcest. NGC ID# 24PN, PCGS# 6568

1916-S Half Dollar
Frosty Near-Gem

- 5151 1916-S MS64 PCGS.** The 1916-S has the lowest mintage of the three 1916 issues and it is notorious for its softly struck central details. This piece displays an above-average strike, yet it is still far from complete with slight softness on all the central design elements. The luster, however, is superlative with swirling mint frost that is uninterrupted by any mentionable abrasions.
Ex: Long Beach Signature (Heritage, 6/2010), lot 991. NGC ID# 24PN, PCGS# 6568

1917 Walking Liberty Half, MS66
Glowing Golden Patina

- 5152 1917 MS66 PCGS. CAC.** Although more than 12 million half dollars were coined in 1917, few survive finer than MS65, and MS66 examples are about the finest that most collectors will be able to acquire. This piece is boldly struck, with thick, matte-like luster and warm champagne toning. A few minute grazes are restricted to the highest points of Liberty's figure and do not pose a distraction. Population: 89 in 66 (1 in 66+), 3 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24PP, PCGS# 6569

1917-D Obverse Half Dollar, Toned MS65

- 5153 1917-D Obverse MS65 NGC.** A Gem example of the Obverse Mintmark variety, boldly struck and devoid of any significant abrasions. Both sides show satiny mint luster beneath a dusting of champagne and sea-green toning. This issue is scarce in MS65, and finer examples are rare. Census: 53 in 65, 5 finer (7/15). NGC ID# 24PR, PCGS# 6570

1917-D Walking Liberty Half, MS65
Obverse Mintmark

- 5154 1917-D Obverse MS65 NGC.** In Gem condition, the 1917-D Obverse Mintmark half dollar is slightly more plentiful than its Reverse Mintmark counterpart, but both issues are scarce at this level. The Obverse Mintmark example is boldly struck, with satiny luster and light golden toning. A few small, scattered ticks preclude a finer grade. Census: 53 in 65, 5 finer (7/15). NGC ID# 24PR, PCGS# 6570

- 5155 1917-D Reverse MS62 PCGS.** The lustrous surfaces of this D-mint Walker display whispers of rainbow toning at the obverse periphery. The design elements are sharply struck, including the branch hand. A few obverse marks determine the grade. NGC ID# 24PS, PCGS# 6571

1917-D Half Dollar, MS65
Reverse Mintmark Semikey

- 5156 1917-D Reverse MS65 NGC.** A fully struck Gem that boasts smooth surfaces and vibrant luster. Hints of butter-gold toning are confined to the borders. The *Guide Book* mintage for the reverse mintmark '17-D is more than double its obverse mintmark counterpart, yet the reverse mintmark is decidedly rarer, especially in better Mint State grades. Census: 25 in 65 (1 in 65+), 4 finer (6/15). NGC ID# 24PS, PCGS# 6571

- 5157 1917-S Reverse MS63 PCGS.** Both sides of this Select Walker display strong luster exuding from silver-white surfaces. The design elements are well-impressed. A few inconsequential rim marks are visible on each side. NGC ID# 24PU, PCGS# 6573

1918 Half Dollar, Frosty MS65

- 5158 1918 MS65 PCGS.** The 1918 Walking Liberty half is scarce in Gem condition, and anything finer is a significant condition rarity. This example shows vibrant, frosty luster with hints of gold throughout. The eagle's trailing leg feathers exhibit some of the expected striking softness, but Liberty's head and branch hand are well-defined. PCGS has seen only nine MS66 coins finer (7/15). NGC ID# 24PV, PCGS# 6574

1918-D Half Dollar, Satiny MS64

- 5159 1918-D MS64 PCGS.** Smooth surfaces display medium golden toning on each side of this Choice 1918-D half. The dies are lightly clashed and show a few peripheral cracks. The eagle's central feathers and Liberty's leg and branch hand are deficiently struck, as is typical of this Denver issue. PCGS has seen 31 numerically finer submissions (6/15). NGC ID# 24PW, PCGS# 6575

**1918-D Walking Liberty Half, MS64
Elusive Any Finer**

- 5160 1918-D MS64 PCGS.** The frosty, lustrous surfaces of this Choice 1918-D half dollar reveal remarkably few abrasions — only a small tick on Liberty's neck and another between the TY in LIBERTY are worthy of mention. Both sides show a hint of iridescence throughout pale champagne-gray toning, with lightly mottled russet overtones also evident around the obverse margins. Striking weakness in the centers is typical of this Denver issue. PCGS lists 31 Gem or finer representatives (7/15). NGC ID# 24PW, PCGS# 6575

**1918-D Walking Liberty Half, MS64
Seldom Seen Finer**

- 5161 1918-D MS64 PCGS. CAC.** This early Denver issue is one of the more challenging Walking Liberty half issues to locate well-struck, as this Choice example illustrates. Liberty's head is sharp, but minor weakness is seen on the branch hand and the eagle's central feathers. The surfaces show few abrasions and instead yield vibrant luster and touch of light golden toning. There 31 numerically finer coins at PCGS (6/15). NGC ID# 24PW, PCGS# 6575

- 5162 1918-S MS63 NGC.** Most examples of the 1918-S half come softly struck on the head, branch hand, skirt lines, and eagle's leg, as is the case with this Select representative. Light gold-toned surfaces are aglow with softly frosted luster. Small scattered marks are minimal, and the grade is likely impeded by only the incomplete strike. NGC ID# 24PX, PCGS# 6576

1918-S Half Dollar, Near-Brilliant MS64

- 5163 1918-S MS64 PCGS.** The 1918-S is known as one of the more challenging dates in the series to acquire with sharp detail, and the currently offered Choice example is typical in this regard. Yet, the surfaces are free of any major abrasions, and only touch of light golden toning affects the mint brilliance. PCGS lists 36 pieces finer (7/15). NGC ID# 24PX, PCGS# 6576

1919-D Half Dollar, Golden MS63

- 5164 1919-D MS63 NGC.** The 1919-D Walker, while considered a semikey in comparison to the 1921 trio, is actually the most challenging date in the series in pleasing Mint State condition. This Select example shows light, scattered abrasions, masked by medium gold toning. The usual striking weakness is evident along Liberty's figure and on the eagle's central feathers. NGC ID# 24PZ, PCGS# 6578

- 5165 1919-S AU50 NGC.** Both sides retain considerable satin luster with light gray surfaces that exhibit gold and iridescent toning. This issue is scarce and highly popular in higher circulated grades. NGC ID# 24R2, PCGS# 6579

**1920 Walking Liberty Half, MS65
High-Luster Surfaces**

- 5166 1920 MS65 PCGS.** A hint of almond-gold toning does little to diminish the incredible mint luster that flows across the satin-smooth surfaces of this resplendent Gem half dollar. The strike is slightly above average, but the eye appeal is off the charts thanks to the outstanding surface quality and Mint-fresh bloom. The 1920 issue is deceptively scarce in full Gem condition, with a mere 24 pieces graded finer by PCGS (7/15). NGC ID# 24R3, PCGS# 6580

**1920 Walking Liberty Half, MS65
Rich Border Toning**

- 5167 1920 MS65 PCGS.** In Mint State, the 1920 half dollar is most often seen in MS64 and lower grades; Gems, such as this delightfully toned example, are scarce. This piece shows light lavender-gold centers with vivid multicolor peripheral toning. The figure of Liberty is well-struck and abrasions are at a minimum. PCGS lists 24 Premium Gems finer (7/15). NGC ID# 24R3, PCGS# 6580

1920 Walking Liberty Half, Toned MS65

- 5168 1920 MS65 PCGS. CAC.** This Philadelphia issue is more difficult to locate in high grade than some collectors realize. The present Gem is beautifully preserved and frosty beneath mottled olive-gold and russet toning. A few amber tinges appear near the borders. There are no areas of mentionable striking weakness. PCGS lists 24 Premium Gems finer (7/15). NGC ID# 24R3, PCGS# 6580

**1920 Half Dollar, MS66
None Certified Finer**

- 5169 1920 MS66 PCGS. CAC.** Ex: G B W. The majority of known Mint State 1920 half dollars grade in the MS63 to MS64 range, and seldom is a Gem encountered. This Premium Gem is among the finest certified. Both sides display frosty golden-toned luster and delicately preserved fields. A touch of softness along Liberty's leg is apparent, but the branch hand is well-delineated. Population: 24 in 66 (1 in 66+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24R3, PCGS# 6580

**1920-S Half Dollar, MS63
Lustrous, Lightly Toned**

- 5170 1920-S MS63 NGC.** The original surfaces of this scarce, Select Uncirculated San Francisco issue display a faint, olive-gold patina that covers both sides. The toning is marginally deeper at the rims. Typical for the '20-S, the strike is meek through the middle, although a glass reveals some facial definition and a glimpse of detail on the branch hand. Tiny marks on the high points and blending on the eagle's trailing leg confirm the usual light strike. Even so, the coin has nice luster and considerable eye appeal for the grade. NGC ID# 24R5, PCGS# 6582

- 5171 1921 VF35 PCGS. CAC.** This is a collector-grade example of this key Philadelphia issue, slightly sharper than the typical VF coin. Both sides show uniform battleship-gray patina with a hint of gold tinting. The surfaces are free of major faults and the eye appeal is pleasing for the grade. NGC ID# 24R6, PCGS# 6583

**1921 Half Dollar, MS64
Favorite Philadelphia Issue**

- 5172 1921 MS64 PCGS.** A remarkable near-Gem with extraordinary eye appeal for the grade, this piece has frosty silver luster with splashes of gold and iridescent toning, a shade or two deeper on the obverse. Struck from mildly eroded dies, but none the worse for detail. Few survivors from the mintage of 246,000 coins can equal this piece for its desirability. The PCGS population data shows that just 61 numerically finer pieces (6/15).
Ex: Dallas Signature (Heritage, 11/2007), lot 853; ANA Signature (Heritage, 3/2011), lot 3724. NGC ID# 24R6, PCGS# 6583

- 5173 1927-S MS63 PCGS.** The 1927-S is known to have issues with striking sharpness, something to which the present coin falls victim; the central portion of Liberty's figure and the corresponding part of the eagle's plumage are weak. Nonetheless, the surfaces are uncommonly well-preserved for the grade and exhibit original, satiny luster. The obverse is light golden and the reverse shows deeper olive toning in mottled hues. NGC ID# 24RA, PCGS# 6587

**1928-S Half Dollar, MS64
Golden-Olive and Russet Patina**

- 5174 1928-S MS64 PCGS.** Like the 1923-S and 1927-S preceding it, the 1928-S stands as the only half dollar issue of the year, boasting a mintage of 1.9 million coins. The 1928 *Mint Director's Report* explains that the year saw "reduced requirement of coins below the dollar for home circulation ..." Demand would decrease even further in the years to come. This softly frosted near-Gem exhibits mottled golden-olive and russet patina minimally marked surfaces. Typically struck with incomplete centers. NGC ID# 24RB, PCGS# 6588

- 5175 1929-D MS65 PCGS.** The 1929-D Walking Liberty half is elusive in Gem condition, and finer pieces are genuinely scarce. This lustrous example shows well-preserved surfaces and just a hint of light golden color. Liberty's branch hand shows partial thumb separation, although the thigh and the upper edge of the eagle's right (facing) wing are weakly defined. NGC ID# 24RC, PCGS# 6589

- 5176 1929-D MS65 PCGS.** A lustrous and well-preserved example with just a hint of light golden toning overall. The central regions are better-defined than is typical for this Denver issue. Finer examples are scarce.
Ex: FUN Signature (Heritage, 1/2003), lot 7348. NGC ID# 24RC, PCGS# 6589

**1929-D Walker, MS66
Frosty Original Luster**

- 5177 1929-D MS66 PCGS. CAC.** Despite a limited original mintage of 1 million coins, the 1929-D is the most common Walker from the late 1920s and early 1930s in Mint State. It is probable that a decent percentage of the coins produced never entered circulation. On the other hand, Bruce Fox (*The Complete Guide to Walking Liberty Half Dollars*) states that "fully struck Gems are not common."

This is a simply gorgeous representative that should have little trouble finding its way into a PCGS Registry Set. The powerfully impressed features are full in most areas with emerging definition over the all-important central highpoints. The luster is rich and frosty, and the originality is confirmed by dappled orange and/or russet shadings at the left obverse border and the right reverse border. Population: 67 in 66 (2 in 66+), 1 finer (6/15).
Ex: Santa Clara Signature (Heritage, 11/2002), lot 6192. From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RC, PCGS# 6589

**1929-S Walking Liberty Half, MS66
Gleaming Luster**

- 5178 1929-S MS66 PCGS. CAC.** Few 1929-S halves survive in Premium Gem condition, and finer representatives are extremely rare and proportionately costly. This example is aglow with mint-fresh, satiny luster that yields warm champagne toning overall with dashes of amber around the peripheries. A complete lack of distracting abrasions accounts for the grade and eye appeal. Population: 47 in 66 (1 in 66+), 1 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RD, PCGS# 6590

**1933-S Half Dollar, MS66
Fully Struck, Old Green Holder**

- 5179 1933-S MS66 PCGS. CAC.** Lovely golden-brown toning dominates the margins, while the fields and motifs are nearly brilliant. A narrow arc of sky-blue is noted above AMERICA. Highly lustrous and fully struck. Encapsulated in an old green label holder. Population: 95 in 66 (6 in 66+), 13 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RE, PCGS# 6591

- 5180 1934 MS67 PCGS. CAC.** Lustrous silver fields alternating with slight yellow patination over the central devices and around the reverse periphery. This coin is sharply struck throughout with smooth fields devoid of all but the most minor distractions. PCGS has graded eight numerically finer examples (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RF, PCGS# 6592

- 5181 1934-D MS66 PCGS. CAC.** Fully struck on the branch hand and skirt lines, although Liberty's head shows minor blending. This lower mintage Premium Gem displays light wheat-gold toning except on the powder-blue lower reverse. Lustrous and carefully preserved. Housed in a green label holder.
Ex: St. Louis Collection (Heritage, 1/2003), lot 7362, which realized \$2,875. From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RG, PCGS# 6593

- 5182 1934-S MS64 PCGS.** Vigorous mint frost cascades over the untuned surfaces of this Choice Walker half. The skirt lines and branch hand are well-defined, while the eagle's leg feathers show a degree of softness. The 1934-S is considerably scarcer in high grades than the Philadelphia and Denver issues of the same year. NGC ID# 24RH, PCGS# 6594

1935 Half Dollar, MS67**Ex: Dr. Frank Lanza**

5183 1935 MS67 PCGS. CAC. Only a whisper of green-gold toning graces this lustrous and nicely struck Superb Gem. Pristine aside from a tick or two near the eagle's beak. Housed in a green label holder. Population: 48 in 67 (5 in 67+), 1 finer (6/15).

Ex: Dr. Frank Lanza Collection (Heritage, 8/2004), lot 6529, which realized \$4,140.

From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RJ, PCGS# 6595

5184 1935-D MS65 PCGS. Regarded as one of the rarest issues to find sharply struck, this Gem 1935-D exhibits typical incompleteness of strike on the branch hand, upper skirt lines, and eagle's leg feathers. Nevertheless, the preservation is excellent, and the brilliant, lustrous surfaces offer abundant eye appeal. NGC ID# 24RK, PCGS# 6596

5185 1935-D MS65 PCGS. This is an instantly appealing, hands-down Gem, with brilliant cartwheel luster radiating from the frosty, untuned surfaces. Eye appeal is superb. Finer examples are seldom seen.

Ex: Dallas Signature (Heritage, 10/2006), lot 2082. NGC ID# 24RK, PCGS# 6596

1935-D Half Dollar, MS66**Among the Finest Certified**

5186 1935-D MS66 PCGS. CAC. Although the 1935-D half dollar is fairly plentiful in the absolute sense, the availability of Premium Gem examples is rather slim and none are known finer than this level(6/15). This CAC-endorsed example displays frosty ice-blue luster with warm olive-gold overtones that deepen over the lower-left obverse and upper-left reverse borders. The central high points are a touch soft, but the surfaces are free of major abrasions.

From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RK, PCGS# 6596

1935-S Half Dollar, MS66**Lightly Toned**

5187 1935-S MS66 PCGS. A well-struck, carefully preserved example of this conditionally challenging San Francisco issue. Both sides exhibit satiny yellow-gold luster with a hint of iridescence. There are no distracting abrasions, although a small planchet lamination (as struck) is seen on Liberty's head with a loupe. PCGS lists only three Superb Gems finer (6/15).

From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RL, PCGS# 6597

5188 1936 MS67 PCGS. CAC. Razor-sharp definition is evident on all design elements of this delightful Superb Gem and the impeccably preserved surfaces radiate vibrant mint luster, with delicate hints of pale gold toning.

From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RM, PCGS# 6598 Base PCGS# 6598

1936-D Walking Liberty Half, MS67**Crescent Toning Both Sides**

5189 1936-D MS67 PCGS. CAC. A crescent of rainbow toning appears on both sides of this otherwise brilliant-white Superb Gem half. The frosty surfaces show few marks and strong silver luster. As always with this Denver issue, strike is the concern but the current coin is bolder than most. The eagle's trailing leg is well-feathered, and a faint outline of the thumb is visible on the branch hand. CAC endorsed. No pieces are graded numerically finer at PCGS. Population: 35 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

**1936-D Walking Liberty Half, Radiant MS67
Doubled Die Obverse**

- 5190 1936-D Doubled Die Obverse, FS-101, MS67 PCGS. CAC.** The obverse is plainly die doubled on the date and IN GOD WE TRUST, as well as on the lower hem of Liberty's gown and the sandals — the product of a doubled master die. Frosty, beautifully preserved surfaces yield icy-blue luster with hints of champagne throughout. Partial thumb separation on Liberty's branch hand confirms the quality of the strike. One of the finest 1936-D half dollars certified. Population: 35 in 67 (1 in 67+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RR, PCGS# 6601

- 5191 1936-S MS66 PCGS. CAC.** A virtually brilliant Premium Gem with shimmering eye appeal. Though the usual striking softness appears on the high points, Liberty's thumb has a faint outline. NGC ID# 24RP, PCGS# 6600

**1936-S Half Dollar, MS67
None Known Finer**

- 5192 1936-S MS67 PCGS. CAC.** This gleaming Superb Gem is tied with just 10 others as the finest 1936-S half at PCGS (6/15). Liberty and the eagle are fully brought up, and the frosty surfaces are devoid of any discernible abrasions, save for a single small tick in Liberty's gown above the date. Traces of light golden toning appear throughout, warming the cartwheel effect.
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RP, PCGS# 6600

- 5193 1937 MS67 PCGS. CAC.** Sharply detailed design elements and virtually pristine surfaces are the calling cards of this delightful Superb Gem. Satiny mint luster shines through delicate highlights of pale gold toning. PCGS has graded five numerically finer examples (7/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RR, PCGS# 6601

**1937-D Half Dollar, MS67
Superb Registry Coin**

- 5194 1937-D MS67 PCGS. CAC.** This frosty Superb Gem is among the finest 1937-D half dollars obtainable in a PCGS holder. The strike is impressively bold throughout Liberty's figure and the eagle's feathers, and the surfaces are free of noteworthy imperfections. Each side is dusted in pale golden toning. Population: 53 in 67 (1 in 67+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RS, PCGS# 6602

**1937-S Walking Liberty Half, MS67
Unavailable in a Finer Grade**

- 5195 1937-S MS67 PCGS.** Faint traces of the thumb and index finger on the branch hand and the appreciably strong head and gown line details represent a sharp obverse strike, while the eagle's trailing leg shows only minor blending of the feather details. Light iridescence complements golden toning on both sides of this scarce middle-date San Francisco issue. Frosty mint luster gleams across the nearly unmarked Superb Gem surfaces. Significantly, neither service reports a numerically finer 1937-S half. Population: 35 in 67 (2 in 67+), 0 finer (6/15). NGC ID# 24RT, PCGS# 6603

**1937-S Walking Liberty Half, MS67
Exemplary Eye Appeal**

- 5196 1937-S MS67 NGC.** Available in lower grades, the 1937-S half dollar becomes conditionally scarce at the MS67 level, and no examples are certified finer. This piece is brilliant and frosty, devoid of distractions. Significant thumb separation appears on Liberty's branch hand, and the head detail is sharp. Census: 14 in 67, 0 finer (7/15). NGC ID# 24RT, PCGS# 6603

1937-S Half Dollar, MS67

Ex: Jack Lee

- 5197 1937-S MS67 PCGS. CAC.** Ex: Jack Lee. Jack Lee was best known for his fabulous Morgan dollar collections, but he also owned an important Walking Liberty half dollar PCGS Registry Set, still ranked #4 All-Time Finest despite its dispersal in 2000, near the advent of Registry collecting. Lustrous, smooth, and nicely struck with a hint of olive-gold toning. Housed in a green label holder. Population: 35 in 67 (2 in 67+), 0 finer (6/15). Ex: *Long Beach Signature* (Heritage, 10/2000), lot 6305; *Ally Collection* (Heritage, 7/2002), lot 8546, which realized \$6,037.50. From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 24RT, PCGS# 6603

- 5198 1938 MS67 PCGS.** Available in lower grades, the 1938 half dollar becomes scarce at the MS67 level and is almost unobtainable finer. This lovely example shows partial thumb separation and smooth, satiny surfaces. Both sides are light golden in color, with the obverse showing some deeper olive hues around the periphery. Population: 83 in 67 (1 in 67+), 1 finer (7/15). From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 24RU, PCGS# 6604

1938 Walking Liberty Half, MS67+ Border-Toned Beauty

- 5199 1938 MS67+ NGC.** Lustrous silver centers are frosty and brilliant, while a splendid, original patina of ruby-red and golden-umber colors appear as thin crescents near the rims of this exceptional Superb Gem. High-end for the grade — as confirmed by the NGC Plus designation — the surfaces are essentially unmarked and satin-smooth, with just a few high-point ticks noted on the devices. The strike, while not full, is bold and deserving of the lofty grade. Very few coins are finer. Census: 1 in 67+, 1 finer (7/15). NGC ID# 24RU, PCGS# 6604

- 5200 1938 MS67 PCGS. CAC.** A sharp Superb Gem, this piece displays smooth and carefully preserved surfaces beneath a layer of patina that includes yellow-tan and icy blue-green color. Small splashes of golden-brown are also present. Population: 83 in 67 (1 in 67+), 1 finer (7/15). NGC ID# 24RU, PCGS# 6604

- 5201 1938-D MS65 PCGS.** A low mintage of just 491,600 coins makes the 1938-D an ever-popular date in the Walking Liberty series. This satiny, untuned Gem is sharply defined and minimally abraded. The sole mark of note is a small tick on the sun. NGC ID# 24RV, PCGS# 6605

- 5202 1938-D MS66 PCGS.** The 1938-D is the key issue in the latter half of the Walking Liberty half dollar series, boasting a low mintage of only 491,600 coins. This Premium Gem example shows extensive die striae in the fields, a product of die lapping, with light golden toning overall. Liberty's figure is well-defined, save for the branch hand which is a trifle soft. Housed in a green label holder. Scarcely seen finer. NGC ID# 24RV, PCGS# 6605

1938-D Walking Liberty Half, MS66+ Vibrant Mint Bloom

- 5203 1938-D MS66+ PCGS. CAC.** A frosty, brilliant silver example of the low mintage key to the late-date Walking Liberty half dollar series, this 1938-D features a sharp strike and seemingly pristine surfaces. Gleaming mint-fresh luster heightens the eye appeal. PCGS has only certified 41 finer examples of this issue (6/15). NGC ID# 24RV, PCGS# 6605

1938-D Half Dollar, MS66+ Luminous Surfaces

- 5204 1938-D MS66+ PCGS. CAC.** This outstanding example exhibits light gold, rose, and violet interior toning with an arc of deeper orange at the top left obverse. The surfaces are luminous with decent detail on Liberty's head, though her branch hand is more typically soft. The 1938-D is an under-the-radar half dollar issue despite a mintage of fewer than half a million pieces. PCGS has graded just 41 examples as MS67 or finer (6/15). NGC ID# 24RV, PCGS# 6605

1938-D Half Dollar, MS67 Popular Low Mintage Issue

- 5205 1938-D MS67 PCGS. CAC.** Recognized early for its low mintage, the 1938-D was saved in substantial quantity. Nonetheless, few survivors can match the pristine preservation of the present Superb Gem. The strike is bold and the lustrous cream-gray surfaces exhibit dappled tan and aqua freckles. The obverse was struck from a lightly but evenly rusted die, unusual for the series. Encapsulated in a green label holder. Population: 41 in 67 (3 in 67+), 0 finer (6/15). From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 24RV, PCGS# 6605

5206 1939 MS67+ PCGS. CAC. This is beautiful coin, devoid of any perceptible abrasions and aglow in frosty luster that shows just a hint of iridescence. The strike is razor-sharp throughout the relief elements and the eye appeal is exceptional. PCGS lists only 24 finer representatives (7/15). NGC ID# 24RW, PCGS# 6606

5207 1939 MS67+ PCGS. CAC. Largely gold-toned surfaces display smaller areas of silver-pink and magenta. Impressively preserved and radiantly lustrous, a touch of the usual softness affects the high points. Distinct thumb separation occurs on the branch hand. PCGS shows just 24 pieces rated finer (7/15). NGC ID# 24RW, PCGS# 6606

1939 Half Dollar, MS68 CAC-Approved Registry Coin

5208 1939 MS68 PCGS. CAC. A rarely offered MS68 example of this otherwise plentiful Philadelphia issue, essential for a competitive Registry Set. The strike is bold and the frosty surfaces are attractively toned in light golden hues. Close study with a 10x loupe reveals very minute die doubling on the upper loop of the 3 in the date, as well as on select letters of IN GOD WE TRUST. Population: 24 in 68 (3 in 68+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RW, PCGS# 6606

5209 1939-D MS67 PCGS. CAC. This Superb Gem is among the finest examples of the 1939-D most collectors can hope to procure. Each side is fully brilliant and well-struck with just a bit of softness at the centers. Two ticks on the branch and another on the breast are the only flaws. PCGS has certified just two finer coins (7/15). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

1939-D Half Dollar, MS67 Exemplary Preservation

5210 1939-D MS67 PCGS. CAC. A magnificent Superb Gem that features light olive-green and straw-gold toning. Well struck except on the branch hand. The obverse is virtually immaculate, and the reverse displays only minimal contact. Certified in a green label holder. Population: 83 in 67 (4 in 67+), 2 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

1939-D Half Dollar, MS67+ Registry Set Quality

5211 1939-D MS67+ NGC. CAC. The 1939-D Walking Liberty half is scarce in MS67 and finer coins are rare. This Plus-graded example seems to increase in eye appeal the longer it is studied, showing unabraded, satiny surfaces with just a hint of champagne toning. The strike is bold on the branch hand and head, and the eagle's trailing leg shows above-average sharpness, as well. Census: 77 in 67 (1 in 67+, 1 in 67 ★, 1 in 67+★), 2 finer (6/15). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

5212 1939-S MS67 PCGS. Ex: Jack Lee. The lustrous olive-green surfaces exhibit glimpses of lavender patina. Sharply struck and with virtually unimprovable preservation. Housed in a green label holder.
Ex: Long Beach Signature (Heritage, 2/2003), lot 6999, which realized \$2,185.
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RY, PCGS# 6608

5213 1939-S MS67 PCGS. The soft, frosty silver surfaces of this Superb Gem shine brightly through delicate champagne toning on each side. Slight central weakness is typical of this issue. The present piece is tied for the finest that PCGS has certified (7/15). NGC ID# 24RY, PCGS# 6608

5214 1939-S MS67 PCGS. CAC. The 1939-S is more elusive in high grades than its P or D-mint brethren, yet the issue is still collectible in this lofty grade. Pristine, wholly brilliant surfaces have a freshly minted look that collectors will appreciate. Well-struck with a bit of central softness. None finer at PCGS (7/15). NGC ID# 24RY, PCGS# 6608

5215 1939-S MS67 PCGS. CAC. This Superb Gem is among the finer-known representatives of this San Francisco issue, and its eye appeal is outstanding. Frosty, mint-fresh luster illuminates a light golden veil over each side, while the surfaces are devoid of bothersome abrasions. Liberty's branch hand shows partial thumb separation. None are finer at PCGS (7/15). NGC ID# 24RY, PCGS# 6608

1940 Walking Liberty Half, MS68 Impeccably Smooth Surfaces

5216 1940 MS68 PCGS. CAC. A complete lack of abrasions and the possession of vibrant, satiny luster confirms the lofty grade of this high-end Superb Gem. The motifs are sharply rendered, highlighted by soft champagne and lavender-gray hues. This piece is among the finest seen by PCGS, an essential Registry Set acquisition. Population: 24 in 68, 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24RZ, PCGS# 6609

5217 1940-S MS66 PCGS. CAC. The impeccably preserved brilliant surfaces of this spectacular Premium Gem radiate vibrant mint luster, with the slightest hint of pale gold toning. The design elements are well-detailed, with just a touch of the usual softness on Liberty's wreath hand. PCGS has graded 12 numerically finer examples (7/15).

From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24S2, PCGS# 6610

5218 1940-S MS66 PCGS. CAC. Rich mint luster and virtually untuned surfaces provide this Premium Gem representative with strong visual appeal. Well-struck aside from moderate incompleteness on the branch hand and eagle's leg. PCGS reports just 12 finer submissions (7/15). NGC ID# 24S2, PCGS# 6610

5219 1940-S MS66+ PCGS. CAC. This attractive Premium Gem exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's hand and the eagle's leg. The well-preserved surfaces display satiny mint luster and traces of greenish-gold toning at the rims. PCGS lists just 12 finer examples (7/15). NGC ID# 24S2, PCGS# 6610

1941 Half Dollar, MS68 Multicolor Iridescent Patina

5220 1941 MS68 PCGS. Iridescent fire-red, apple-green, and pumpkin-gold adorn the margins of this lustrous high grade type coin. The strike is full on Liberty's face, branch hand, and skirt lines, and the sole imperfection is minor die ejection flatness on the eagle's head. Population: 20 in 68, 0 finer (6/15).

Ex: Long Beach Signature (Heritage, 2/2003), lot 7004, which realized \$6,325.

From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24S3, PCGS# 6611

5221 1941-S MS66 NGC. Glimpses of forest-green, ruby-red, and lemon-gold toning invigorates the borders of this lustrous and essentially immaculate example. Liberty's cheek and branch hand show inexactness of strike. The traditional key to the 1941 to 1947 "short set." Encased in a former generation holder. NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

5222 1941-S MS66+ PCGS. CAC. This Plus-graded Premium Gem offers the budget-conscious collector a superb level of quality, with brilliant, frosty luster and well-struck design elements. Finer pieces are rare, with only seven certified by PCGS (7/15). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

1941-S Walker, MS67 Outstanding Eye Appeal

5223 1941-S MS67 NGC. A noted strike rarity of the series, this San Francisco date is all but impossible to find with a sharp strike. The present coin is a vibrant, beautifully toned example that shows minor incompleteness through the centers, but bold details elsewhere. The eye appeal is outstanding, with rich gold, blue, and violet toning at the margins surrounding untuned, satin-silver centers. There are no marks of any significance to report. Tied for the finest certified at either service. Census: 23 in 67, 0 finer (6/15). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

1942 Walking Liberty Half, MS67+ Near-Flawless Surfaces

5224 1942 MS67+ PCGS. CAC. With more than 47.8 million pieces struck, there is no shortage of Gem examples to go around, but in high-end Superb Gem condition the issue is surprisingly scarce. This example offers creamy silver-white surfaces bursting with Mint-fresh luster. The strike is sharp across both sides, with only a few pinprick marks at the highest points where the strike is not 100% complete. The eye appeal and technical quality are remarkable. Population: 15 in 67+, 6 finer (6/15). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

5225 1942-S MS66+ PCGS. CAC. Trumpet tail S. Brilliant and lustrous with an essentially immaculate obverse. The reverse is smooth aside from subtle contact on the eagle. The strike is typical on the cheek and branch hand. NGC ID# 24S8, PCGS# 6617

5226 1942-S MS66+ PCGS. CAC. Were this coin a little sharper along Liberty's thigh and on the eagle's central plumage, it might have garnered a full MS67 grade. The surfaces are beautifully preserved and frosty, with warm sun-gold toning around the peripheries. Dashes of crimson and forest-green also appear along the lower obverse and reverse rims. PCGS lists eight coins finer (7/15). NGC ID# 24S8, PCGS# 6617

1942-S Walker Half Dollar, MS67
Among the Finest Survivors

- 5227 1942-S MS67 NGC.** Small S. The dies were spaced widely apart and used for long periods of time, making the 1942-S virtually impossible to find sharply struck. This nearly unimprovable Superb Gem has above-average definition aside from typical incompleteness on the branch hand and right (facing) leg feathers. Brilliant surfaces feature dapples of russet toning around the borders. The only flaw is a small tick on Liberty's extended forearm. Census: 10 in 67, 0 finer (7/15). NGC ID# 24SC, PCGS# 6617

1943 Walking Liberty Half, MS68
Unsurpassed Quality and Eye Appeal

- 5228 1943 MS68 PCGS. CAC.** The 1943 Walking Liberty half dollar is readily available in grades through MS67, but in MS68 only a couple dozen are known with none finer. This stellar coin showcases intense, mint-fresh luster glowing beneath beautifully iridescent lavender and lilac hues with occasional hints of gold and cottonwood-green. The strike is boldly rendered and the exceptionally clean surfaces radiate eye appeal. Population: 6 in 68, 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24S9, PCGS# 6618

1943-S Half Dollar, MS67
Outstanding Preservation

- 5229 1943-S MS67 PCGS. CAC. FS-101.** Trumpet tail S. Delicate tan-gold toning adorns this lustrous and immaculate Superb Gem. The strike is fairly sharp on the skirt lines, but Liberty's head and branch hand show softness. As seen on most if not all 1943-S half dollars, the present example shows die doubling on IN GOD WE TRUST, the sun's rays, and the base of the Liberty's dress. Population: 38 in 67 (1 in 67+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SB, PCGS# 6620

- 5230 1944 MS67 PCGS. CAC.** This Superb Gem is undeniably at the upper end of the spectrum in terms of strike quality and eye appeal. Liberty's branch hand shows clear thumb separation, and the skirt lines are well-delineated. Coruscating mint frost radiates over light golden surfaces. PCGS records a single example finer (6/15). NGC ID# 24SC, PCGS# 6621

- 5231 1944 MS67 PCGS. CAC.** A lustrous butter-gold Superb Gem. The strike is exceptionally sharp on the high points of Liberty, and a loupe reveals only trivial imperfections. Certified in a green label holder.
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SC, PCGS# 6621

- 5232 1944-D Hand-Engraved Initials, FS-901, MS66 PCGS.** The discoverer of this interesting and seldom-encountered variety was Heritage cataloger Brian Koller, who wrote the cover story announcing the discovery that appeared in the February 2, 2004 issue of *Coin World*. The designer's monogram was inadvertently lapped from the working die, and a hand-engraved "replacement" monogram was added to the die at the Mint. This lustrous and sharp Premium Gem example is a nearly brilliant example with a few speckles of olive-gray toning on the reverse. The Mint's faux pas is clearly visible. Population: 38 in 66, 11 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. PCGS# 145790 Base PCGS# 6622

1944-S Half Dollar, MS66+
Outstanding Preservation

- 5233 1944-S MS66+ PCGS. CAC.** Large S. Lustrous, brilliant, and essentially pristine aside from minor contact on the eagle's neck. The skirt lines and Liberty's head are well struck, although the branch hand has a typical impression. As of (6/15), PCGS has certified just eight pieces in higher grades. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

1945-D Walking Liberty Half, MS67+
Tied for Finest at PCGS

- 5234 1945-D MS67+ PCGS. CAC.** Pleasingly detailed with a touch of gold in the fields. The brightly lustrous surfaces are silver-white otherwise. This short-set Superb Gem possesses tremendous eye appeal to complement the highest available technical quality. PCGS has graded no coins in higher numeric grades (7/15). NGC ID# 24SG, PCGS# 6625

1946 Half Dollar, MS67
Ideal for Registry Purposes

- 5235 1946 MS67 PCGS. CAC.** Clearly among the finest known of this late-series Philadelphia issue, this Superb Gem 1946 Walking Liberty half displays radiant, satiny luster with warm golden toning over each side. The strike is bold and close study with a glass discerns only a few insignificant luster grazes on the high points of the motifs. Population: 57 in 67 (4 in 67+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627

- 5236 1946 Doubled Die Reverse, FS-801, MS65 PCGS.** Blatant die doubling on the wings and E PLURIBUS UNUM ensures that FS-801 secures a separate *Guide Book* listing. Lustrous and nicely struck with mottled russet-brown and stone-gray toning. The right obverse field displays minor grazes. PCGS# 145152 Base PCGS# 6632

1946 Walking Liberty Half, MS66
Doubled Die Reverse, FS-801

- 5237 1946 Doubled Die Reverse, FS-801, MS66 PCGS. CAC.** E PLURIBUS UNUM, the eagle's wings, and the sapling exhibit strong die doubling. The key die variety of the series. A lightly toned later die state example that shows glimpses of russet along the reverse periphery. Lustrous and well struck with contact confined to a solitary faint reed impression beneath the flag. Population: 12 in 66 (1 in 66+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. PCGS# 145152 Base PCGS# 6632

- 5238 1946-D MS67 PCGS.** This remarkable Superb Gem exhibits well-detailed design elements, with just a touch of softness on Liberty's wreath hand. The impeccably preserved brilliant surfaces radiate vibrant mint luster throughout. Population: 77 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 24SK, PCGS# 6628

- 5239 1946-D MS67 PCGS. CAC.** Medium autumn-brown and jade-green toning encompass this lustrous and nicely struck high grade half dollar. Smooth save for a small mark on the throat. Housed in an old green label holder. Population: 76 in 67 (1 in 67+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SK, PCGS# 6628

- 5240 1946-D MS67 PCGS. CAC.** This superb 1946-D Walker exhibits frosty, undeniably original luster shining through soft champagne-gray and lilac patina. The design elements are pleasantly well-defined and close study with a loupe confirms the outstanding level of preservation. Population: 77 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 24SK, PCGS# 6628

1946-D Half Dollar, Golden MS67+
Tied for Finest Certified

- 5241 1946-D MS67+ NGC. CAC.** The well-deserved Plus designation sets this magnificent 1946-D above all but one other MS67 example at NGC (6/15), and CAC endorsement confirms the outstanding preservation. The strike is bold and the frosty surfaces emit glowing golden luster with iridescence in the margins. A true Registry-grade coin in every sense. NGC ID# 24SK, PCGS# 6628

1946-D Half Dollar, MS67+
Tied for Finest at NGC

- 5242 1946-D MS67+ NGC. CAC.** Although MS67 examples of this Denver issue are occasionally available, this piece is one of only two Plus-graded representatives at NGC, with none finer (7/15). The strike is bold and the surfaces display vibrant, frosty luster. Both sides are encompassed in vivid sunburst-gold toning. Census: (2 in 67+, 1 in 67 ★, 0 finer (7/15). NGC ID# 24SK, PCGS# 6628

1946-S Half Dollar, MS67
Nearly Immaculate

- 5243 1946-S MS67 PCGS. CAC.** Ex: G B W. Knob S. A brilliant and coruscating Superb Gem. Remarkably devoid of contact. San Francisco Walkers from the 1940s are notoriously elusive with a full strike. On the present piece, the skirt lines show only slight blending, although Liberty's cheek and branch hand are incomplete. Both sides display prominent vertical die lines throughout the fields, as coined. Population: 60 in 67 (3 in 67+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SL, PCGS# 6629

**1946-S Half Dollar, Superb Gem
Above Average S-Mint Strike**

- 5244 1946-S MS67 PCGS. CAC.** Knob S. Most San Francisco quarters from the 1940s are weakly struck on the high points of Liberty. However, the 1946-S was a better produced issue, and examples with good strikes are obtainable. The present Superb Gem has a sharp strike on the skirt lines and Liberty's head. The branch hand shows blending, although the thumb is separated. The powder-blue and wheat-gold surfaces are lustrous and smooth. NGC ID# 24SL, PCGS# 6629

**1947 Half Dollar, MS67
Pristine Philadelphia Example**

- 5245 1947 MS67 PCGS. CAC.** A whisper of sea-green patina adorns this thoroughly lustrous and pristine representative. The eagle's breast displays ice-blue toning. The thumb of the branch hand is well defined, and Liberty's head and skirt lines show precise detail. An outstanding type coin. Certified in a green label holder. Population: 58 in 67 (4 in 67+), 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SM, PCGS# 6630

**1947-D Half Dollar, MS67
Lightly Toned Throughout**

- 5246 1947-D MS67 PCGS.** The final Walking Liberty half produced in the Denver mint, the 1947-D is a little more difficult to locate in the finer Mint State grades than many of the 1941-1945 issues. This is a beautifully toned Superb Gem with competing swirls of honey-gold and orange-olive obverse toning. The reverse is less extensively patinated with a mostly silver-gray appearance, although we do note a few splashes of pale golden color toward the right rim. Fully defined in all but one or two isolated areas, the surfaces are richly frosted and free of bothersome abrasions. Population: 25 in 67, 0 finer (6/15).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6603.
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SN, PCGS# 6631

**1947-D Walker, Superb MS67
None Finer at PCGS**

- 5247 1947-D MS67 PCGS. CAC.** This final-year Denver issue is inherently difficult to locate in Superb Gem condition. The present piece is delightfully toned and vibrantly frosted, showcasing shades of olive-green, gold, and amber-gray on each side. The strike is boldly rendered and the surfaces are devoid of abrasions. Population: 25 in 67, 0 finer (6/15). NGC ID# 24SN, PCGS# 6631

**PROOF WALKING LIBERTY
HALF DOLLARS**

- 5248 1936 PR64 PCGS.** There is not a true key date in the proof Walking Liberty half series, but the 1936 is by far the scarcest, due to its low mintage of 3,901 pieces. This Choice example is sharp and deeply reflective, with warm golden toning overall. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, Near-Brilliant PR66

- 5249 1936 PR66 NGC.** The 1936 proof Walker boasts the lowest mintage of the seven-coin series, and is the scarcest proof issue in high grade. This Premium Gem example shows razor-sharp detail and deeply reflective fields. The coin appears brilliant at first glance, but closer inspection reveals traces of golden toning. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, Toned PR67

- 5250 1936 PR67 NGC.** Among the finest certified at NGC, this Superb Gem 1936 proof Walker exhibits fully struck design elements set against mirrored fields. Both sides show an array of deep amber, crimson, olive, and gold toning, without any distracting contact marks. Census: 89 in 67 (1 in 67+, 5 in 67 ★), 0 finer (7/15). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR67
Brilliant First-Year Proof**

- 5251 1936 PR67 PCGS Secure.** The 1936 is the only issue in the proof Walking Liberty half dollar series that is genuinely scarce at the Superb Gem grade level, partly due to its low mintage of only 3,901 pieces. This coin is brilliant with gleaming mirrors and sharp, satiny devices. A lack of contact marks delivers exceptional eye appeal. Population: 36 in 67, 1 finer (7/15). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR67
Bold Peripheral Toning**

- 5252 1936 PR67 PCGS. CAC.** This first proof Walking Liberty half dollar issue becomes conditionally rare at this lofty Superb Gem grade level. This piece is fully struck. The interiors display dusky champagne and pale lilac color, while the peripheries exhibit more vivid olive and crimson hues. Population: 36 in 67, 1 finer (7/15). From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 27V4, PCGS# 6636

- 5253 1937 PR67 PCGS. CAC.** Shades of greenish-gold toning visit the pleasing surfaces of this spectacular Superb Gem, with a few specks of amber at the peripheries. The design elements are sharply detailed and the well-preserved surfaces are deeply reflective. PCGS has graded 10 numerically finer examples (7/15). From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 27V5, PCGS# 6637

- 5254 1938 PR67 PCGS. CAC.** The virtually pristine surfaces of this remarkable Superb Gem are enhanced by a vivid patch of emerald-green toning in the exergue. The design elements are sharply detailed and the fields are brightly reflective. PCGS has graded 14 numerically finer examples (7/15). From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 27V6, PCGS# 6638

- 5255 1939 PR67+ PCGS. CAC.** Medium champagne toning overall is visited by tinges of autumn-red at the right obverse border, warming the deep reflectivity of the fields. The strike is full and there are no discernible contact marks. PCGS has seen just 34 finer proofs (7/15). NGC ID# 27V7, PCGS# 6639

- 5256 1939 PR67+ NGC. CAC.** This high-end Superb Gem exhibits razor-sharp devices and immaculately preserved surfaces. Its stunning eye appeal is appropriately recognized by CAC. A total of 8,808 proof Walkers were produced in 1939. NGC ID# 27V7, PCGS# 6639

**1939 Walking Liberty Half, PR68
Tied for Finest at PCGS**

- 5257 1939 PR68 PCGS.** This is a stunning specimen, tied for finest at PCGS. A single coin has been rated one point higher, by NGC. The design motifs are fully struck on both sides of this brilliant proof, and the figure of Walking Liberty displays appealing icy-white mint frost. Close examination with a loupe fails to reveal even the tiniest mentionable surface flaw on either side of this amazing example. Population: 34 in 68, 0 finer (7/15). From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 27V7, PCGS# 6639

**1939 Half Dollar, PR68
Delicately Toned**

- 5258 1939 PR68 NGC.** This piece displays sharply struck, satiny devices set against watery fields that are seemingly devoid of flaws. Vivid sun-gold and amber peripheral hues yield to lighter pastel shades of lavender and ice-blue in the centers, granting this high-end Superb Gem impeccable visual appeal. Census: 100 in 68 (21 in 68 ★), 1 finer (7/15). NGC ID# 27V7, PCGS# 6639

**1940 Walker, Lightly Toned PR68
Conditionally Rare**

- 5259 1940 PR68 PCGS. Ex: Charles Schultz.** Although available in the absolute sense, the 1940 proof Walker is a conditional rarity at the PR68 grade level. This representative is fully struck, with highly polished fields that display a uniform golden hue. The 1940 is one of the less often seen proof issues in the series, with the 1941 and 1942 dates being the most frequently encountered. Population: 34 in 68 (2 in 68+), 0 finer (7/15). From *The Eric Lane Collection of Walking Liberty Half Dollars*. NGC ID# 27V8, PCGS# 6640

5260 1941 PR68 PCGS. CAC. The AW monogram is faint but evident. Gorgeous orange-red toning occupies the obverse margin between 11 and 5 o'clock. The reverse has peripheral patina between 11 and 8 o'clock in iridescent green, gold, and red shades. Fully struck and flashy with imposing eye appeal. Population: 20 in 68, 0 finer (6/15).
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 24SP, PCGS# 6641

5261 1942 PR67+ PCGS. This Superb Gem proof is fully brilliant, showcasing deep mirrors and razor-sharp, satiny devices. The obverse has a suggestion of subtle cameo contrast, although only revealed at certain angles. A visually finer example of this final-year proof is hard to imagine. NGC ID# 27V9, PCGS# 6642

5262 1942 PR67+ PCGS. CAC. This high-end Superb Gem represents the final proof issue of the Walking Liberty half dollar series. The design elements are strongly impressed but there is some incomplete detail on Liberty's hands and the eagle's leg due to die polishing. The mostly brilliant surfaces are brightly reflective, with a few hints of greenish-gold toning.
From The Eric Lane Collection of Walking Liberty Half Dollars. NGC ID# 27V9, PCGS# 6642

5263 1942 PR67+ PCGS. CAC. Soft lavender, gold, and powder-blue toning takes on deeper shades on the reverse of this high-end Superb Gem. The design features are sharply impressed, including Liberty's branch hand and gown lines. The 21,120-piece production was the largest in the series. NGC ID# 27V9, PCGS# 6642

5264 1942 PR68 PCGS. CAC. This high-end Superb Gem is among the finest 1942 proof Walkers certified by PCGS, and the eye appeal is equally impressive. Wine-red, pine-green, and sun-gold ribbons encircle portions of the extreme outer peripheries, leaving the interiors with a dusky champagne-gray hue that fails to hinder the gleaming reflectivity of the fields. Population: 52 in 68 (1 in 68+), 1 finer (7/15). NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

5265 1948-D MS66+ Full Bell Lines PCGS. CAC. Orange, crimson, and magenta toning covers the reverse, while the obverse shows similar hues around the borders and lighter silvery-gray patina centrally. Fully struck with a few hardly noticeable marks on the head that prevent an MS67 designation. There are only four coins finer at PCGS (7/15). NGC ID# 24SS, PCGS# 86652

5266 1949-D MS66 Full Bell Lines PCGS. Shades of amber, golden-brown, and lavender-gray toning blanket the well-preserved surfaces of this impressive Premium Gem, with well-detailed design elements and the coveted Full Bell Lines designation. Population: 58 in 66 (4 in 66+) Full Bell Lines, 0 finer (7/15).
From The College Collection, Part Two. NGC ID# 24SU, PCGS# 86654

5267 1949-D MS66 Full Bell Lines PCGS. The 1949-D Franklin half dollar is scarce at the Premium Gem grade level and is unknown finer. This Registry-grade Full Bell Lines example is boldly struck without bothersome surface abrasions. The frosty surfaces yield just a hint of champagne toning. Population: 58 in 66 (4 in 66+) Full Bell Lines, 0 finer (7/15). NGC ID# 24SU, PCGS# 86654

5268 1949-D MS66 Full Bell Lines PCGS. Brilliant surfaces show dapples of crimson patina near the rims on each side. The devices are fully struck, and small marks are inconsequential. The 1949-D is a prime rarity in MS66, and virtually all Premium Gems have Full Bell Lines. Population: 58 in 66 (4 in 66+) Full Bell Lines, 0 finer (7/15). NGC ID# 24SU, PCGS# 86654

5269 1949-S MS67 PCGS. Light sunburst-orange coloration adorns the obverse, while the reverse is frosty with a light champagne hue. The 1949-S typically comes softly struck, but this Superb Gem has above-average detail and falls just shy of a Full Bell Lines designation. Population: 7 in 67, 0 finer (6/15). NGC ID# 24SV, PCGS# 6655

5270 1953 Obverse Die Clash, FS-402, MS64 Full Bell Lines PCGS. Better known as the "Bugs Bunny" variety, clash marks from the eagle are faint but apparent on Franklin's mouth. These were first publicized on the 1955 issue, although several other dates and mintmarks show similar clashes. Lustrous, smooth, and well struck with occasional splashes of gold patina. PCGS# 515813 Base PCGS# 86664

1957-D Half Dollar, MS67 Full Bell Lines Registry Set Quality, None Certified Finer

5271 1957-D MS67 Full Bell Lines PCGS. Crescents of plum, crimson, green, gold, and blue toning hug the upper right obverse and lower reverse rims of this Registry-quality Superb Gem Franklin half. The remaining surfaces are virtually brilliant aside from scattered specks of multicolor patina. Satiny luster completes the appeal of this sharply struck Full Bell Lines representative. Population: 15 in 67 Full Bell Lines, 0 finer (6/15). NGC ID# 24TF, PCGS# 86673

5272 1959 MS66 Full Bell Lines PCGS. Type One Reverse. A hint of golden toning graces lustrous and nearly mark-free surfaces. The strike is good and the eye appeal is exceptional. Population: 49 in 66 (3 in 66+) Full Bell Lines, 0 finer (7/15). NGC ID# 24TJ, PCGS# 86676

1961-D Half Dollar, MS66 Full Bell Lines One of the Finest Examples Extant

5273 1961-D MS66 Full Bell Lines PCGS. This Premium Gem Full Bell Lines representative is one of the finest 1961-D Franklin halves extant, making this an important offering for advanced series specialists. Light green and yellow hues cling to the rims, surrounding brilliant centers that show fully struck devices. According to Rick Tomaska: "This is a very, very rare coin in either MS66 or MS66 FBL, and demand greatly exceeds the minuscule supply of these coins." Population: 20 in 66 (1 in 66+) Full Bell Lines, 0 finer (7/15). NGC ID# 24TP, PCGS# 86681

5274 1962 MS65 Full Bell Lines PCGS. In the Full Bell Lines category, the 1962 Franklin half becomes scarce at the MS65 level, and finer representatives are extremely rare. This Gem is boldly struck and vibrantly lustrous, with light golden toning that shows dashes of russet periodically around the peripheries. PCGS lists only six MS66 coins finer (7/15). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

1951 Franklin Half, PR67 Cameo Mint-Fresh

5275 1951 PR67 Cameo PCGS. This Registry-grade proof Cameo exhibits intense eye appeal as a result of stark white-on-black contrast and seemingly perfect surfaces. The strike is razor-sharp and the surfaces are devoid of perceptible toning. Non-Cameo proofs are occasionally seen in this lofty grade, but Cameos are rare and Deep Cameos are almost unobtainable. Population: 15 in 67 Cameo, 0 finer (7/15). NGC ID# 27VB, PCGS# 86692

1951 Franklin Half, Untoned PR66 Deep Cameo Seldom Seen With Such Profound Contrast

5276 1951 PR66 Deep Cameo PCGS. The silver-on-black surfaces typify the desired appearance of these coveted Deep Cameo Franklin halves, seldom seen with the excellent preservation and intense contrast seen on this Premium Gem proof. Any PR66 example of the 1951 is rare, and Deep Cameo examples far more so. The last example in this exact grade and service brought \$7,405 as lot 4590 in our Long Beach Signature (Heritage, 6/2013), although that was a rim-toned coin. NGC ID# 27VB, PCGS# 96692 Base PCGS# 96690

1952 Half Dollar, PR67+ Cameo Scarce With a Cameo Designation

5277 1952 PR67+ Cameo PCGS. CAC. Many 1952 Franklin half proofs exhibit boldly contrasted obverses, while the reverses are undeserving of a Cameo designation. As a result, locating Cameo examples can prove challenging. This Superb Gem is entirely brilliant, deeply mirrored, and immensely appealing. Population: 45 in 67 (3 in 67+) Cameo, 2 finer (6/15). NGC ID# 27VC, PCGS# 86693

1953 Half Dollar, PR68 Cameo Registry Set Essential

5278 1953 PR68 Cameo NGC. The proof 1953 Franklin half dollar is conditionally scarce in PR68, the grade most often chosen by Registry collectors. Cameos are particularly elusive this fine, and an Ultra Cameo coin in this grade is almost unknown. This brilliant, boldly contrasted Cameo is devoid of surface flaws and showcases impressively deep mirroring in the fields. Census: 33 in 68 Cameo (1 in 68 ★ Cameo), 0 finer (7/15). NGC ID# 27VD, PCGS# 86694

5279 1957 PR67+ Deep Cameo PCGS. CAC. Outstanding frost with only tiny breaks on the high points of the portrait. The fields have little toning outside the margins and the contrast is marvelous. Population: 75 in 67 (3 in 67+) Deep Cameo, 75 finer (7/15). From *The College Collection, Part Two*. NGC ID# 24TX, PCGS# 96698

1961 FS-801 Half Dollar, PR67 Doubled Die Reverse

5280 1961 Doubled Die Reverse, FS-801, PR67 NGC. Remarkable die doubling on E PLURIBUS UNUM and UNITED identifies this significant *Guide Book* variety. STATES OF and HALF DOLLAR have thick letters with a noticeable spread. Aside from a blush of tan toning on the top of Franklin's head, the remainder of the Superb Gem is virtually brilliant. PCGS# 145292 Base PCGS# 6689

KENNEDY HALF DOLLARS

1966 Kennedy Half, Sharp MS67 Few Known This Fine

5281 1966 MS67 PCGS. Registry Set collectors will find this 40% silver Kennedy half issue a challenge to locate in high grade. The certified population at PCGS declines significantly in MS66, and Superb Gems are extremely rare. This MS67 example boasts a sharp strike and unabraded surfaces. Amber and sun-gold hues appear around portions of the peripheries, leaving the interiors with just a glint of champagne color. Population: 4 in 67, 1 finer (7/15). NGC ID# 24U5, PCGS# 6709

5282 2010-D MS68 PCGS. This D-mint Kennedy half yields unbelievable technical quality and aesthetic appeal. Its silver-gray surfaces are awash with mint luster, and crisp definition is apparent on the design elements. Kennedy's hair in particular exhibits razor-sharp detail. The surfaces are nearly flawless. We mention a minute mark on Kennedy's neck below the ear solely for identification purposes. PCGS reports this as the single finest, while NGC shows two pieces in this grade and none finer (7/15). NGC ID# 27WF, PCGS# 416786

SMS KENNEDY HALF DOLLARS

1966 SMS Kennedy Half, MS67 Deep Cameo Exceptional Field-Device Contrast

5283 1966 SMS MS67 Deep Cameo PCGS. This fantastic Superb Gem is minimally toned save for a few touches of pearl-gray patina close to the rims. Mirrors are attractive, and the frost, especially on the portrait, is notably intense. One of the few coins that can suggest how a proof 1966 Kennedy half might have looked. Population: 30 in 67 Deep Cameo, 5 finer (7/15).
From The Basque Guy #1 All-Time PCGS Registry Set / Long Beach Signature (Heritage, 2/2011), lot 3850. NGC ID# 24WH, PCGS# 96846

1967 SMS Half, Elusive SP68 Deep Cameo

5284 1967 SMS SP68 Deep Cameo PCGS. 1967 saw the last of the three Special Mint Sets, before the Mint resumed adding mintmarks to coinage and shifted production of proof sets to San Francisco, where it remains to this day. The elusive deep cameo 1967 Kennedy halves are somewhat more available than the 1965s and 1966s. The present piece offers an awesome strike with jet-black fields and nicely frosted devices, virtually indistinguishable from a true proof. A small mark on Kennedy's nose is the only discernible flaw. Population: 7 in 68 Deep Cameo, 0 finer (7/15).
Ex: Long Beach Signature (Heritage, 9/2003), lot 7406; FUN Signature (Heritage, 1/2008), lot 2231; Fort Worth Signature (Heritage, 3/2010), lot 1161. NGC ID# 24WJ, PCGS# 96847

PROOF KENNEDY HALF DOLLARS

1964 Kennedy Half, Pristine PR70

5285 1964 PR70 PCGS. If this coin had a Deep Cameo designation added to it, it would probably fetch a price well up into the five figures, but as usual for the 1964 Kennedy half, this untuned coin has little to no contrast between fields and devices. What is uncommon, however, is the immaculate preservation: There are actually far fewer of these certified at PCGS than there are of the 1964 in PR69 Deep Cameo. Population: 29 in 70 (7/15). NGC ID# 24WF, PCGS# 6800

5286 1964 PR69 Deep Cameo PCGS. Type Two Reverse. Radiant white motifs contrast with deeply reflective fields. A lens reveals a few pinpoint obverse tan freckles. A pristine example of this popular 90% silver proof issue. Population: 79 in 69 Deep Cameo, 0 finer (6/15). NGC ID# 24WF, PCGS# 96800

1968-S Kennedy Half, PR70 Deep Cameo
Key 40% Issue in This Grade

5287 1968-S PR70 Deep Cameo PCGS. The 1968-S 40% silver proof is a key issue among the early Kennedy halves, as most grade no better than PR67 or PR68, and many lack deep cameo contrast. This pristine PR70 Deep Cameo is a winner on both counts, showing impeccable preservation and optimally contrasted surfaces. Population: 16 in 70 Deep Cameo (7/15). NGC ID# 24WK, PCGS# 96804 Base PCGS# 999132

5288 1971-S PR69 Deep Cameo PCGS. Lightly gold-toned at the rims, though the interiors have absolute black-and-white contrast. A gorgeous coin from the first cupronickel clad proof half dollar issue, and a coin that is just one or two pinpoint flaws away from perfection. Population: 66 in 69 Deep Cameo, 0 finer (7/15). Ex: *The Basque Guy #1 All-Time PCGS Registry Set* (Heritage, 2/2011), lot 3853. NGC ID# 24WM, PCGS# 96807

1973-S Kennedy Half, PR70 Deep Cameo
First Year in the Clad Series for
Perfect Deep Cameo Proofs

5289 1973-S PR70 Deep Cameo PCGS. Clad Kennedy half proofs get little respect — many later-date such pieces graded PR69DCAM are available for only a few dollars — so it may come as a surprise to collectors that some of the earliest clad proof issues are a far different story. PCGS has certified only 66 1971-S half dollars in PR69DCAM, with none in PR70DCAM. For 1972 there are 642 PR69DCAM pieces, but none in PR70DCAM. 1973 is the first year that PR70DCAM pieces exist, 26 to be precise, with nearly 7,000 pieces in PR69DCAM. A close examination of the surfaces expectedly fails to reveal even the most minute distraction, although bidders might appreciate the mention of a touch of gold color on the neck. A must-have acquisition for the Registry Set collector or investor. Population: 26 in 70 Deep Cameo, (7/15). From *The Kallenberg #1 PCGS Registry Set Of Proof Half Dollars / FUN Signature* (Heritage, 1/2008), lot 2244. NGC ID# 27WM, PCGS# 96809

5290 1974-S PR70 Deep Cameo PCGS. This early clad issue is among the most elusive Kennedy proofs in this perfect grade. The present piece boasts a light golden patina over deeply frosted devices and well-mirrored fields, the surfaces uniformly trouble-free. Population: 40 in 70 Deep Cameo (7/15). NGC ID# 27WN, PCGS# 96810

1974-S Kennedy Half, PR70 Deep Cameo
Scarce Perfectly Preserved

5291 1974-S PR70 Deep Cameo PCGS. Another of the clad issues from early in the Kennedy half dollar series that is all but unobtainable in the top PR70 Deep Cameo grade, the 1974-S as of (6/15) shows only 40 pieces so graded at PCGS. The arctic-frosted devices show glints of gold coloration against the pitch-black fields. Interestingly for a proof coin, the reverse die is rotated about 5 degrees counterclockwise.

From *The Kallenberg #1 PCGS Registry Set Of Proof Half Dollars / FUN Signature* (Heritage, 1/2008), lot 2245. NGC ID# 27WN, PCGS# 96810

1976-S Clad Kennedy Half, PR70 Deep Cameo

5292 1976-S Clad PR70 Deep Cameo PCGS. Fewer examples of the clad 1976-S proof half are certified in the perfect PR70 Deep Cameo grade than are of its silver counterpart. This piece is one of 70 so-graded examples at PCGS, while none are this fine at NGC (6/15). This Registry coin is fully struck and starkly contrasted with just a hint of light golden toning. NGC ID# 27WP, PCGS# 96811

1976-S Clad Half, PR70 Deep Cameo
Golden-Toned

5293 1976-S Clad PR70 Deep Cameo PCGS. Though the revival of the silver Kennedy half was popular in 1976, it is the clad proof variant that has proven more elusive in perfect condition today. This is a deeply gold-toned example that offers essentially undisturbed surfaces and is housed in a green label holder. Population: 70 in 70 Deep Cameo (7/15). From *The Basque Guy #1 All-Time PCGS Registry Set / Long Beach Signature* (Heritage, 2/2011), lot 3856. NGC ID# 27WP, PCGS# 96811

5294 1976-S Silver PR70 Deep Cameo PCGS. Pure pristine 90% silver perfection is on display here, not only one of the top-grade examples for Registry Set purposes but also the popular Bicentennial one-year type. A small lintmark above the 7 provides a pedigree identifier. NGC ID# 27WR, PCGS# 96812

5295 1976-S Silver PR70 Deep Cameo PCGS. The contrast is absolute and the preservation flawless. The faintest hint of golden patina visits the (90%) silver surfaces of this Bicentennial half dollar proof. NGC ID# 27WR, PCGS# 96812

5296 1981-S Type 2 PR70 Deep Cameo PCGS. Fully struck with attractive copper-gold toning and intense Deep Cameo contrast on both sides. The bulbous upper serif distinguishes the Type Two mintmark from its Type One counterpart. Population: 63 in 70 Deep Cameo (7/15).

Ex: *Long Beach Signature* (Heritage, 9/2007), lot 1845. NGC ID# 24WS, PCGS# 96822

EARLY DOLLARS

1795 B-4, BB-14 Dollar, Fine Details Mint Silver Plug

5297 1795 Flowing Hair, Two Leaves, B-4, BB-14, Silver Plug — Obverse Graffiti — NGC Details. Fine. An obvious Mint-inserted silver plug is visible on the obverse of this early silver dollar. The natural deep gray-brown surfaces exhibit minor obverse graffiti. This is an important piece to illustrate early minting technology, an experiment that only lasted for part of the year in 1795. PCGS# 39992 Base PCGS# 6854

1795 Flowing Hair Dollar, Fine 12 Three Leaves, B-5, BB-27 Crown-Sized Early Type Coin

5298 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 12 PCGS. Dusky steel-gray and tan-brown toning blankets this charming Flowing Hair type coin. Unimportant adjustment marks (as struck) are relegated to the reverse border near UNITED. Surprisingly free from abrasions for the Fine level, though we note a minor rim knock near the 7 in the date. Encapsulated in an old green label holder. PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Flowing Hair Dollar XF Details, Three Leaves

5299 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Improperly Cleaned — NGC Details. XF. Gunmetal-blue and caramel-gold toning drapes this impressive Flowing Hair dollar. The wings display considerable plumage detail, and hints of luster emerge from design elements. The surfaces are mildly glossy but lack any evident abrasions. Minor adjustment marks, as made, are on the obverse near the center and the lower right border. PCGS# 39977 Base PCGS# 6852

1796 Draped Bust Dollar, VF25 B-5, BB-65, Large Date, Small Letters

5300 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF25 PCGS. Bowers Die State IV. Mottled blue and olive-gold toning is prominent on both sides of this smoothly worn early dollar. Easily identified by a die lump between I and C of AMERICA, the BB-65 variety is the sole 1796 dollar with a Large Date and therefore a necessity for early dollar type. The surfaces show only minor, unimportant nicks and ticks, although a few angled adjustment marks are hidden in the toning through Liberty's lower curls and below the bust. The date is slightly repunched as always seen on the variety. PCGS# 40002 Base PCGS# 6861

1796 B-5, BB-65 Dollar, XF40 Large Date, Small Letters

5301 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF40 NGC. Bowers Die State IV. A die break joins the IC in AMERICA. B-5 is easily recognized as the lone Large Date die pair for the year. The present wheat-gold, steel-blue, and pearl-gray silver dollar is refreshingly unabraded despite moderate wear on Liberty's cheek and shoulder.

Ex: *Baltimore ANA Signature* (Heritage, 7/2008), lot 738; *Long Beach Signature* (Heritage, 6/2012), lot 3911, which realized \$8,050. PCGS# 40002 Base PCGS# 6861

**1797 B-3, BB-71 Dollar, VF25
10x6 Stars, Large Letters Reverse**

- 5302** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 PCGS. Bowers Die State III. The sole die marriage with a 10x6 star arrangement, which causes LIBERTY to appear uncentered over the bust. A stone-gray example with partial plumage on the wings. Lightly abraded aside from short marks on the rims near the Y in LIBERTY and the final A in AMERICA. Minor adjustment marks (as issued) are noted on the reverse along the border and below the right (facing) wing. PCGS# 40004 Base PCGS# 6865

**1798 B-4, BB-92 Dollar, Choice AU
Heraldic Eagle, Knob 9, 5-Line Stripes**

- 5303** 1798 Large Eagle, Knob 9, 5 Vertical Lines, B-4, BB-92, R.4, AU55 NGC. Bowers Die State II. A very scarce Bolender variety, identified by the five-line vertical stripes in the shield and a repunched obverse star 4. The eagle's breast and Liberty's shoulder exhibit moderate wear, but luster illuminates protected areas beneath the blanket of autumn-brown, sea-green, and gunmetal-gray toning. Minimally abraded, and adjustment marks are confined to the E in LIBERTY. PCGS# 40010 Base PCGS# 6874

**1798 Draped Bust Dollar, XF40
Knobbed 9, 10 Arrows, B-6, BB-96**

- 5304** 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, XF40 NGC. Bowers-Borckardt Die State IV. The position of the 8 in the date nearly touching the bust, with the line star pattern on the reverse, and the bases of the first A in AMERICA joined together identifies the BB-96 variety. This attractive XF piece retains traces of original mint luster under shades of gold, gray, and blue-steel patina. The central motifs show a light strike like many examples of this variety, and some adjustment marks are visible on the reverse across the eagle's breast and upper shield.
Ex: *Central States Signature (Heritage, 4/2012), lot 4853*. PCGS# 40011 Base PCGS# 6876

**1798 Heraldic Eagle Silver Dollar, XF40
Wide Date, Pointed 9, B-23, BB-105**

- 5305** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, XF40 NGC. Bowers Die State III with lapping apparent at the shoulder curl. A nicely defined Heraldic Eagle dollar. Stone-white high points contrast with dusky olive-green, cobalt-blue, and golden-brown fields. No marks are remotely worthy of mention, save for a minor reverse rim knock at 5 o'clock. PCGS# 40022 Base PCGS# 6877

**1798 B-13, BB-108 Dollar, AU53
Heraldic Eagle, Pointed 9**

- 5306** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, AU53 PCGS. Bowers Die State II. Telltale radial die crumbling near the L in LIBERTY identifies this collectible Bolender variety. Light to medium walnut-brown toning embraces both sides of this partly lustrous Draped Bust dollar. The only reportable abrasion is a narrow scrape near the D in UNITED. The central obverse retains adjustment marks, as issued by the Philadelphia Mint. PCGS# 40025 Base PCGS# 6876

**1798 Heraldic Eagle Dollar, XF45
Pointed 9, B-15, BB-112**

- 5307** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, XF45 NGC. Bowers Die State III. A crack from the top left shield corner to the ribbon on the reverse and a spindly star 13 from die lapping suggest the die state of this Wide Date Heraldic Eagle dollar. Deep toning disguises underlying iridescence, with battleship-gray and gunmetal-blue shades mixing with olive-brown surfaces. Sharp detail on Liberty and a general lack of significant marks characterizes the obverse, while the reverse shows weakness on three field stars and a few minor rim nicks. PCGS# 40029 Base PCGS# 6877

- 5308** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, VF30 NGC. Bowers Die State II. Die cracks are confined to a slender arc near the STA in STATES. A midgrade pearl-white representative with good eye appeal and lightly abraded surfaces. The obverse has a few tiny gray spots. PCGS# 40037 Base PCGS# 6877

**1798 Pointed 9 Draped Bust Dollar, VF25
Heraldic Eagle, B-14, BB-122**

- 5309** 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, VF25 PCGS. Bowers Die State IV. Traces of mint luster remain in protected areas of this attractive mid-grade early dollar. Moderate wear and a few small marks determine the assigned grade, although the surface quality and visual appeal suggest an even higher level. Olive-gold surfaces display ocean-blue overtones. Sharp detail remains on the motifs throughout both sides. The olive leaves are complete, confirming a middle die state before some of the reverse sharpness was lapped away. PCGS# 40039 Base PCGS# 6873

- 5310** 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, VF25 PCGS. Bowers Die State IV. The popular "Irregular Date" variety with awkwardly entered date digits. This evenly circulated steel-gray representative is free from consequential abrasions, although thorough inspection reveals faint hairlines. All letters in E PLURIBUS UNUM are at least partially present. PCGS# 40045 Base PCGS# 6879

**1799 Draped Bust Dollar, AU Details
7x6 Stars, B-5, BB-157**

- 5311** 1799 7x6 Stars, B-5, BB-157, R.2, — Tooled — PCGS Genuine. AU Details. Bowers-Borckardt Die State III. A sharply detailed example of this popular variety, with just a trace of high-point wear and lightly abraded lavender-gray surfaces that show a few highlights of champagne-gold on the reverse. The reverse die cracks identify this often-seen later die state. The noted surface irregularity is confined to the area around BE in LIBERTY. PCGS# 40049 Base PCGS# 6878

**1799 7x6 Stars Dollar, AU55
B-16, BB-158, Lush Patina**

- 5312** 1799 7x6 Stars, B-16, BB-158, R.2, AU55 PCGS. Bowers Die State III. An early to intermediate die state with "wave" clash marks above the date, but no sign of the eventually extensive obverse cracks. Golden-brown and gunmetal toning drapes minimally marked and partially lustrous surfaces. The strike is good and the eye appeal is impressive. PCGS# 40050 Base PCGS# 6878

**1799 Bust Dollar, XF45+
7x6 Stars, B-11, BB-161**

- 5313** 1799 7x6 Stars, B-11, BB-161, R.3, XF45+ PCGS. Bowers-Borckardt Die State III. No berries in the branch on the reverse. Shades of slate-gray, blue-steel, and golden-brown toning blanket the lightly abraded surfaces of this attractive XF45+ specimen. The design elements are well-detailed, with just a trace of actual wear on the high points, and an extensive network of die cracks on the reverse confirms the late die state. Population (for the variety): 1 in 45+, 1 finer (7/15). PCGS# 40052 Base PCGS# 6878

**1799 Silver Dollar, Choice AU
7x6 Stars, B-10, BB-163**

- 5314** 1799 7x6 Stars, B-10, BB-163, R.2, AU55 PCGS. Bowers Die State III-IV. Dusky chestnut-brown and silver-gray toning embraces satiny surfaces. A well struck and minimally circulated example. Marks are minor overall, though we note a small obverse rim nick at 12 o'clock. Bolender-10 is available in Very Fine, but becomes very scarce at the Choice AU level. PCGS# 40054 Base PCGS# 6878

- 5315** 1799 7x6 Stars, B-17, BB-164, R.2, VF30 NGC. Bowers Die State IV. A walnut-brown and olive-gray Heraldic Eagle dollar. No marks are apparent and the eye appeal is pleasing. The eagle's head and neck display wear commensurate with the grade. PCGS# 40055 Base PCGS# 6878

- 5316** 1799 7x6 Stars, B-8, BB-165, R.3, VF30 PCGS. Bowers-Borckardt Die State I. The die flaw at the top of the final S in STATES indicates the BB-165 variety. Pleasing gray, gold, and blue-steel patina covers the problem-free surfaces of this attractive Bust dollar, with no adjustment marks and only minor abrasions. The striking details on the central devices show a touch of softness.
Ex: CSNS Signature (Heritage, 4/2012), lot 4859. PCGS# 40056 Base PCGS# 6878

**1799 Draped Bust Dollar, XF40
7x6 Stars, B-9, BB-166**

- 5317** 1799 7x6 Stars, B-9, BB-166, R.1, XF40 PCGS. Bowers-Borckardt Die State V. Only light wear shows on the high points of the design elements and almost all interior detail remains intact on this attractive XF specimen. The pleasing gray and blue-steel surfaces are lightly abraded and the obverse shows the extensive network of die cracks that identifies the late die state. Population (for the variety): 3 in 40, 6 finer (7/15). PCGS# 40057 Base PCGS# 6878

- 5318** 1799 7x6 Stars, B-22, BB-168, R.4, VF20 PCGS. Bowers Die State III. Bolender-22 is scarce, presumably due to the heavy horizontal crack across the central reverse. The present example is well defined for the VF20 grade. Gunmetal-blue fields contrast with cream-gray high points. Minimally abraded, although the centers display faint hairlines. PCGS# 40059 Base PCGS# 6878

**1800 Silver Dollar, VF30
Richly Toned B-16, BB-187**

- 5319** 1800 B-16, BB-187, R.2, VF30 PCGS. Bowers-Borckardt Die State III. A repunched T in UNITED aids attribution of this early dollar. The mid-die state shows a pronounced die break to the left of the second S in STATES. Apple-green and rose-red toning embraces the well defined surfaces, with a lighter silver-gray color on the raised elements. Both sides lack any consequential marks, though for pedigree purposes we note a tiny obverse rim nick at 5 o'clock, where two of the dentils are a bit flat and shiny at the outer edge.
Ex: Central States Signature (Heritage, 4/2012), lot 4862. PCGS# 40073 Base PCGS# 6887

**1800 Draped Bust Dollar, AU55
Popular AMERICA! Variety, B-19, BB-192**

- 5320** 1800 AMERICA!, B-19, BB-192, R.2, AU55 PCGS. Bowers-Borckardt Die State I. An early die state that displays heavy parallel die lines on the border near the date. Originally toned golden-brown, ruby-red, and stone-gray. Luster fills design elements, and the high points display only slight wear. Distributed minor field marks are characteristic of brief circulation. A lovely representative of this distinctive and popular *Guide Book* reverse. Population (for the variety): 2 in 55, 1 finer (7/15). PCGS# 40082 Base PCGS# 6892

**1800 'Dotted Date' Dollar, VF30
B-14, BB-194**

- 5321** 1800 Dotted Date, B-14, BB-194, R.3, VF30 PCGS. CAC. Bowers Die State IV. Several curious small die breaks near the first 0 in the date are the source of the "Dotted Date" nickname. The variety is relatively scarce, and listed in the *Guide Book*. This is a charming midgrade example with deep dove-gray fields and lighter stone-white high points. A pair of brief, narrow marks are noted on the left obverse field near the ribbon. Encapsulated in an old green label holder. PCGS# 40078 Base PCGS# 6889

- 5322** 1800 10 Arrows, B-15, BB-195, R.4 — Polished — NGC Details. VF. Bowers-Borckardt Die State I. A one-die-pair-only *Guide Book* variety that is always in demand. Though obviously polished with the resulting flattening of grays in the patina, this is a significant opportunity for the right collector.

**1801 B-1, BB-211 Draped Bust Dollar, AU Details
Substantial Appeal Remains**

- 5323** 1801 B-1, BB-211, R.3 — Cleaning — PCGS Genuine. AU Details Bowers Die State IV. There are no overt signs of cleaning, but a glass reveals some delicate lines in the right obverse field when angled in light. They are well hidden in the seemingly original iridescent patina, and mint luster remains among the devices. Lilac, rose, and light olive-gold toning covers both sides. An opportunity for the discerning bidder despite the net grade.

**1801 Draped Bust Dollar, AU50
Popular B-1, BB-211 Variety**

- 5324** 1801 B-1, BB-211, R.3, AU50 NGC. Bowers-Borckardt Die State IV. This attractive AU specimen shows the descending die crack through STA in STATES that identifies Die State IV. The lightly abraded lavender-gray surfaces show highlights of champagne-gold in places and the well-detailed design elements show just a trace of actual wear. The 1801 Draped Bust dollar is one of the more difficult dates of the series to locate, and the BB-211 variety is especially challenging in high grade. Census (for the variety): 1 in 50, 6 finer (7/15). PCGS# 40083 Base PCGS# 6893

- 5325** 1802/1 Narrow Date, B-1, BB-231, R.4 — Cleaning — PCGS Genuine. VF Details. Bowers Die State II. Light wheat-gold toning embraces this nicely defined and attractive Heraldic Eagle dollar. Both sides display glints of luster, and marks are confined to the inner points of obverse stars 2 through 6. PCGS# 40091 Base PCGS# 6898

**1802/1 Silver Dollar, Choice VF
Narrow Date, B-1, BB-231**

- 5326** 1802/1 Narrow Date, B-1, BB-231, R.4, VF35 PCGS. CAC. Bowers Die State II. Clashed near Liberty's throat, as always seen on this scarce Bolender variety. Light to medium steel-gray toning evenly adorns the fields. The portrait high points are pearl-white. The only mentionable marks are relegated to the upper right shield corner. PCGS# 40091 Base PCGS# 6898
- 5327** 1802/1 Wide Date, B-3, BB-234, R.3 — Cleaning — PCGS Genuine. XF Details. Bowers Die State II. This stone-gray and almond-gold early dollar has hairlined surfaces from an ill-advised wipe, but both sides display ample luster. The only mark worthy of mention is a faded vertical pinscratch near the profile. PCGS# 40094 Base PCGS# 6899
- 5328** 1803 Large 3, B-6, BB-255, R.2, VF20 PCGS. CAC. Bowers Die State II. A dusky silver-gray type representative. Fairly well defined, and surprisingly unabraded aside from a few small rim nicks and a scuff on the reverse rim at 4 o'clock. PCGS# 40101 Base PCGS# 6901

**1803 B-6, BB-255 Dollar, VF30
Large 3, Midgrade Type Coin**

- 5329** 1803 Large 3, B-6, BB-255, R.2, VF30 PCGS. Bowers-Borckardt Die State III. The thick top of the 3 in the date indicates the most available variety of the year, BB-255. This coin shows the thin die break that connects the obverse stars on the right in the scarce final die state. A midgrade steel-gray and stone-white example. Abrasions are chiefly confined to the leftmost clouds. Ex: *Schaumburg Central States Signature (Heritage, 4/2012)*, lot 4874. PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

- 5330** 1841 AU58 PCGS. Richly toned blue-to-gray with the brightest color in the still-lustrous fields. Just a touch of rub crosses the high points of the devices and marks are few. NGC ID# 24YB, PCGS# 6927
- 5331** 1842 AU55 PCGS. Untoned surfaces are silver-white and show good contrast and luster, despite minor wear and the expected trivial signs of contact. Better than usually seen for this well-circulated issue. One dark spot shows on the reverse, under the eagle's left wing. NGC ID# 24YC, PCGS# 6928
- 5332** 1843 AU55 PCGS. This Choice AU specimen shows just a trace of wear on the well-detailed design elements, and the lightly abraded surfaces are toned in dappled shades of gray and amber. Population: 69 in 55, 93 finer (7/15). NGC ID# 24YD, PCGS# 6929
- 5333** 1846 AU55 PCGS. The 1846 is one of the more plentiful Seated dollar issues from the 1840s, though it is seen less often than the more-popular type dates from 1841 to 1843. This boldly detailed Choice AU representative shows subtle semiprooflike mirroring beneath a thin veil of light golden color. Slight high-point friction precludes a Mint State grade. NGC ID# 24YG, PCGS# 6932
- 5334** 1847 AU58+ NGC. CAC. This boldly struck 1847 Seated dollar exhibits just a trace of friction over the high points of the devices, with semiprooflike mirroring evident in the fields. Both sides show iridescent champagne and pale lavender hues, with lightly mottled grayish overtones, the latter primarily over the devices. There are no major abrasions. This issue is one of the more often seen dates from this decade, suitable for type representation. NGC ID# 24YJ, PCGS# 6934

**1854 Seated Dollar, VF35
High Attrition Rate**

- 5335 1854 VF35 NGC.** The 1854 Seated dollar is a scarce issue that started with a low-mintage of 33,140 coins, and then followed with a significant attrition rate. Perhaps only a couple hundred piece survive in all grades. This one shows considerable wear as the grade suggests. The obverse has substantial gray-gold patina with lighter silver at the center. The reverse has delicate gold toning across the entire surface. Census: 2 in 35, 44 finer (7/15). NGC ID# 24YT, PCGS# 6942

**1855 Seated Dollar, Choice XF
Among the Rarest Issues in the Series**

- 5336 1855 XF45 PCGS.** Only 26,000 dollars were struck in 1855, and most of them were exported, melted, or lost through some other form of attrition. In terms of relative rarity, PCGS ranks the date 10th out of 45 issues in the Seated dollar series. This Choice XF survivor has light steel-gray surfaces with faint traces of golden and powder-blue patina. Sharply rendered devices display a normal degree of friction, and the only marks that merit mention are a couple of small digs below the date and the O in OF. NGC ID# 24YU, PCGS# 6943

**1855 Seated Dollar, AU Details
Elusive Philadelphia Issue**

- 5337 1855 — Improperly Cleaned — NGC Details. AU.** The 1855 is a scarce issue in *all grades*. The luster of this piece is muted by deep pinkish-gray coloration that obscures the hairlines which denote light cleaning. A few stray abrasions and light wear are present as expected from a brief period in circulation. The strike is boldly impressed, with good detailing on all star centrils and Liberty's head.
Ex: Dallas Signature (Heritage, 10/2009), lot 848. NGC ID# 24YU, PCGS# 6943

**1857 Seated Dollar, AU50
Lightly Toned and Partly Lustrous**

- 5338 1857 AU50 PCGS.** From a mintage of 94,000 coins, the 1857 is a medium-availability date among No Motto Seated dollars. Examples are elusive in all grades, and About Uncirculated coins are very scarce. Each side of this lightly circulated, mostly brilliant representative shows blushes of golden-russet coloration and partial luster in the hidden areas. The design detail is sharp with an expected amount of blending, and lightly scattered marks appear throughout. NGC ID# 24YW, PCGS# 6945

- 5339 1859-S VF20 PCGS.** An unusual survivor as a pre-Civil War San Francisco Seated dollar, this midrange example has a mix of blue and gold overtones against a light gray base. The letters LI-RTY show, while BE are partially clear. Several moderate contact marks are noted in the fields, though the devices are relatively clean. NGC ID# 24YZ, PCGS# 6948

- 5340 1859-S VF20 PCGS.** Large S. For a coin with 40 points of wear, this piece presents a pleasing appearance and will undoubtedly bring out the color aficionados, showing lovely multicolor concentric toning on both sides. Abrasions are few for the grade. NGC ID# 24YZ, PCGS# 6948

**1860 Seated Dollar, MS64
Seldom Seen in Mint State**

- 5341 1860 MS64 PCGS.** The 1860 Seated Liberty dollar was circulated heavily in trade with China, and examples in Mint State grades are scarce today. The present coin is an exceptional specimen, with sharp definition on the devices and lightly abraded surfaces. Traces of satiny luster are evident under silver-gray and steel-blue toning. Population: 26 in 64, 6 finer (6/15).
Ex: FUN Signature (Heritage, 7/2010), lot 3833. NGC ID# 24Z2, PCGS# 6949

**1860-O Seated Dollar, MS63
Radiant No Motto Type Coin**

- 5342 1860-O MS63 NGC.** The 1860-O is one of the only No Motto Seated dollar issues that is usually affordable in Mint State, much to the advantage of budget-conscious type collectors. The present coin displays a touch of golden toning around the rims, but is otherwise brilliant — and not in a bright, dipped-out sense, but in a vibrant, mint-fresh sense. The motifs are sharp and frosty and the fields emit semiprooflike reflectivity. A few light abrasions are hardly noticed as the luster cartwheels around each side. Census: 60 in 63 (5 in 63+), 41 finer (6/15). NGC ID# 24Z3, PCGS# 6950

**1863 Seated Dollar, MS64
Delightful Original Toning**

- 5343 1863 MS64 NGC. CAC.** A Civil War issue, many 1863 Seated Liberty dollars suffered the ravages of exportation and/or melting. An important Uncirculated survivor, this coin is richly toned in smoky-gray shades with cobalt-blue and peach highlights intermingled throughout. Fully defined in all areas, the surfaces are smooth and premium quality for the grade. Elusive as a business strike and rare so fine. Census: 24 in 64, 5 finer (7/15). Ex: *Central States Signature (Heritage, 5/2000)*, lot 5016. NGC ID# 24Z6, PCGS# 6953

- 5344 1866 Motto AU50 PCGS.** Predominantly steel-gray surfaces show subtle copper-colored hints amid good remaining luster on this lightly circulated and sharply struck With Motto Seated dollar. NGC ID# 24Z9, PCGS# 6959

- 5345 1868 Misplaced Date, FS-301, AU58 NGC.** This *Cherrypickers'* variety shows the top of an errant 8 within the denticles below the 6 in the date. The surfaces of this near-Mint Seated dollar are bright and untuned with myriad abrasions scattered throughout. Razor-sharp motifs exhibit trace amounts of high-point rub. Census (all varieties): 15 in 58, 16 finer (7/15). PCGS# 416927 Base PCGS# 6961

- 5346 1871 MS61 PCGS.** A few noticeable digs on Liberty's arms and torso largely account for the grade on this Mint State high-mintage Seated dollar, but they fail to defeat the overall good eye appeal generated by ample luster, a sharp strike, and light golden-copper patina. NGC ID# 24ZG, PCGS# 6966

- 5347 1872-CC — Improperly Cleaned — NGC Details. Fine.** With a mintage of just 3,150 coins, many of which have been lost through attrition, it is little wonder the 1872-CC is one of the most highly coveted dates in the Seated dollar series. This well-worn example shows signs of an old cleaning, but the smooth surfaces are retoned in pleasing battleship-gray patina. NGC ID# 24ZK, PCGS# 6969

1872-CC Dollar, Collectible VF20

- 5348 1872-CC VF20 NGC.** Carson City issues are among the most sought-after dates in the Seated dollar series. This 1872-CC representative is well-detailed for the VF level, with medium battleship-gray patina and relatively smooth surfaces. With a mintage of only 3,150 pieces, this issue is in constant demand, even in middle to lower circulated grades. NGC ID# 24ZK, PCGS# 6969

**1872-CC Seated Dollar, XF45
Attractive Patina**

- 5349 1872-CC XF45 PCGS.** This is an impressively well-detailed and problem-free Choice XF example of this sought-after Carson City issue. Both sides show medium golden-gray patina with hints of iridescence in the fields. Remnants of semiprooflike mirroring are revealed when tilted beneath a light. The strike is sharp and the eye appeal is outstanding compared to what is usually seen on the 1872-CC. Population: 15 in 45, 61 finer (6/15). NGC ID# 24ZK, PCGS# 6969

**1872-CC Seated Dollar, AU Details
Rare Carson City Issue, 3,150 Pieces Struck**

- 5350 1872-CC — Stained — NGC Details. AU.** Whatever dollars were struck in 1872 at the Carson City Mint were likely held back until 1873, when silver prices moderated and the melt value of silver dollars no longer exceeded their face value. After the 1873 mintage, the Seated dollar series would be abolished. While the 1872-CC is somewhat more available than the surrounding Carson City dates (1871-CC and 1873-CC), it is a rare issue as well. This example is identified as "Stained" by NGC, with an unnatural cloudiness over prooflike fields and devices — particularly on the obverse. The coin is otherwise sharply struck and without meaningful abrasions. NGC ID# 24ZK, PCGS# 6969

**1872-CC Silver Dollar, AU Details
Hint of Golden Toning**

- 5351 1872-CC — Improperly Cleaned — NGC Details. AU.** A sharply rendered example with minimal wear over the devices. This light golden 1872-CC Seated Liberty dollar shows semiprooflike fields with the expected scattering of abrasions, few of which are individually noticeable. The scarcity of this date in AU or better condition makes a lightly cleaned example such as this an attractive prospect for the budget-conscious collector seeking sharp detail. NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

**1858 Seated Dollar, PR62
Proof-Only Series Key**

- 5352 1858 PR62 PCGS.** Wide, square rims surround the richly toned surfaces of this 1858 dollar. One of the 300 or so estimated proofs produced in the sole proof-only year of the entire Seated dollar series, this example finds its visual appeal well-hidden beneath the toning. Only when viewed at the precise optimal angle do the rich colors and mirrored surfaces reveal themselves, as if the coin had long storage in a kraft envelope. Even so, it is a rare issue and a rare opportunity for date collectors to fill the slot in their collections, which makes it one of the most-desired dates in the series. Population: 28 in 62, 43 finer (7/15). NGC ID# 252C, PCGS# 7001

**1863 Seated Dollar, PR62 Cameo
Just 460 Proofs Struck**

- 5353 1863 PR62 Cameo PCGS.** The suspension of specie payments in 1862 put a premium on ownership of proofs, although the Mint's pricing and payment requirements made buying a proof challenging. This example offers nice eye appeal despite a number of field abrasions that account for the grade. Nice contrast remains and the frosty devices are sharply struck. Azure-blue and russet-gold toning surrounds the reflective fields. Population: 6 in 62 Cameo, 29 finer (7/15). PCGS# 87006

**1864 Seated Liberty Dollar, PR64
Only 470 Pieces Struck**

- 5354 1864 PR64 PCGS.** Only 470 proof Seated Liberty dollars were struck in 1864, as the financial stresses of the Civil War discouraged collector interest. This attractive Choice specimen offers sharply detailed design elements and deeply mirrored fields under shades of champagne-gold and cerulean-blue toning. Population: 34 in 64 (1 in 64+), 21 finer (7/15). NGC ID# 252J, PCGS# 7007

**1865 Seated Dollar, PR63 Cameo
Deeply Mirrored and Toned**

- 5355 1865 PR63 Cameo PCGS.** The low proof Seated dollar mintages of the Civil War period persisted in 1865, when only 500 pieces were reportedly struck. Few examples of this issue survive in Cameo grades, these being highly sought-after. This Select example displays a dusky gray overlay of toning but when tilted beneath a light reveals vivid underlying sun-gold color in the interiors with deeper violet and blue around the peripheries. The strike is full and there are no major marks. Light hairlines in the fields limit the grade. Population: 18 in 63 Cameo, 25 finer (7/15). PCGS# 87008

**1868 Seated Dollar, PR62
Collectible Proof**

- 5356 1868 PR62 PCGS.** The mirrored fields of this fully struck proof are slightly muted by dusky lavender-gray and golden toning, but rotation beneath a light causes the fields to gleam once again. There are no contact marks or obvious hairlines. Overall, this is a highly pleasing example of this scarce proof issue, struck to the extent of only 600 coins. NGC ID# 252P, PCGS# 7016

**1870 Seated Dollar, PR64 Cameo
Delicately Toned**

- 5357 1870 PR64 Cameo NGC.** A beautifully contrasted representative of this later proof Seated dollar issue, faintly toned golden over the impressively reflective fields. Substantial frost across the sharply struck devices completes the notable cameo effect. Aside from a few faint hairlines in the fields, this is a delightfully preserved specimen. Census: 11 in 64 Cameo, 15 finer (6/15).
Ex: Dallas Signature (Heritage, 10/2008), lot 1126; FUN Signature (Heritage, 7/2009), lot 782. PCGS# 87018

**1872 Seated Dollar, PR65
Flashy, Multicolor Surfaces**

- 5358 1872 PR65 PCGS.** Most 1872 Seated dollars were sold as part of proof sets, but some were likely melted as unsold at the end of the year. Survivors are fairly available in the absolute sense, but the certified population is extremely limited at the MS65 grade level and finer examples are rare.

This Gem representative offers frosty motifs on glassy-smooth proof surfaces, although the fields and devices are toned to an extent that limits cameo contrast. The obverse displays central hues of lavender-gray and aquamarine with vivid sun-gold around the peripheries, while the reverse shows deeper shades of the same along with tinges of violet and amber. The upper edge of the eagle's left (facing) wing is slightly soft, but the strike is otherwise sharp throughout. Population: 23 in 65 (1 in 65+), 1 finer (7/15).

Ex: Public Auction Sale (Stack's, 10/1996), lot 408; The Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98585. NGC ID# 252U, PCGS# 7020

**1872 Seated Dollar, PR64+ Cameo
Pleasing Contrast**

- 5359 1872 PR64+ Cameo PCGS.** The proof 1872 Seated dollar is marginally available in grades through PR64, but only in the non-Cameo category. Cameo examples are scarce across the board, and rare in PR64 or finer grades. This Plus-designated Choice example displays medium contrast beneath uniform golden toning. The strike is bold throughout. Die doubling on much of the reverse is characteristic of this proof issue. Population: 14 in 64 (1 in 64+) Cameo, 9 finer (7/15). PCGS# 87020

**1873 Seated Dollar, PR64
Obvious Contrast, Gold CAC**

- 5360 1873 PR64 PCGS. Gold CAC.** Ice-white devices and legends suggest a Cameo designation is in order, but the age of the first-generation holder precludes any such insert notation. The strike is crisp save for slight blending on Liberty's knees. The borders possess orange-gold toning. IN GOD WE TRUST is die doubled, as often seen on Motto proofs. Final year for the series.

From The Dr. John Y. Harper, Jr. Collection / New York Signature (Heritage, 3/2012), lot 3560. NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

**1873 Trade Dollar, MS64
Light Champagne Toning**

- 5361 1873 MS64 NGC.** This first-year Trade dollar is marginally available in the MS62 to MS64 range, but anything finer is rare and out of reach for budget-conscious collectors. This Choice example shows satiny luster on the devices with semiprooflike reflectivity in the fields. The strike is sharp throughout. Census: 34 in 64 (1 in 64+), 7 finer (7/15). NGC ID# 252W, PCGS# 7031

- 5362 1874-CC AU58 NGC.** Micro CC. Period after FINE. A well struck lightly circulated chestnut-brown and steel-gray Carson City representative. The reverse is refreshingly unabraded while the obverse displays distributed small marks. NGC ID# 2532, PCGS# 7035

**1874-CC Trade Dollar, MS63
Partially Prooflike Fields**

- 5363 1874-CC MS63 NGC.** Micro CC, no period after FINE. The 1874-CC Trade dollar is an elusive issue in pleasing Mint State condition, and is genuinely rare finer than MS63. This piece is outstanding for the grade, with a few stray lines and ticks being all that limit the grade. The strike is a trifle soft on Liberty's foot support, but is otherwise crisp. Semiprooflike mirroring is seen in the reverse fields and both sides show light golden toning. Census: 27 in 63, 17 finer (6/15). NGC ID# 2532, PCGS# 7035

1875 Trade Dollar, Prooflike MS63

- 5364 1875 Type Two Reverse MS63 PCGS Secure.** The chief attribute of this Select 1875 Trade dollar is the deep prooflike reflectivity of the fields that illuminates blended rose-gold and olive-green toning over each side. The coin might have had claims to proof status were it not deficiently struck around both peripheries and on the high points of the central devices. Evidently one of the first strikes from a fresh die pair, before the die spacing was fully fine-tuned. Population: 13 in 63, 26 finer (7/15). PCGS# 40107 Base PCGS# 7037

**1875-S Trade Dollar, MS64
Large S Mintmark, Type One Reverse**

- 5365 1875-S Type One Reverse MS64 PCGS.** Because of its availability through the Choice grade level, the 1875-S Trade dollar is often encountered in type collectors' cabinets. This piece is a lovely example for the grade, with fully original, frosty luster that shows just a hint of light golden toning that deepens slightly around the borders. Liberty's head is not fully defined, but the strike is otherwise pleasing. Housed in an old green label holder. PCGS has seen 40 numerically finer submissions (7/15). PCGS# 510101 Base PCGS# 7039

**1875-S Trade Dollar, MS64
Type One Reverse, Lightly Toned**

- 5366 1875-S Type One Reverse MS64 NGC.** Large S. The delicate almond-gold toning is moderately more apparent on the reverse. A lustrous, luminous, and well preserved near-Gem. The strike shows selected incompleteness on the left obverse border and the right claw. Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1252; Pittsburgh Signature (Heritage, 10/2011), lot 3892, which realized \$2,645. PCGS# 510101 Base PCGS# 7039

**1875-S Dollar, MS64
Thickly Frosted and All-Brilliant**

- 5367 1875-S Type One Reverse MS64 PCGS. CAC.** Large S. This is the more available of two varieties with the berry below the eagle's claw. The 1875-S claims one of the largest mintages in the series (4.4 million coins), and despite widespread circulation on the West Coast and abroad, examples can still be located with minimal searching through MS64. This is a frosty, untuned Choice example with faint diagonal roller marks across the centers on each side. Softness occurs over the right (facing) leg and claw. Housed in a green label holder. From The College Collection, Part Two. PCGS# 510101 Base PCGS# 7039

**1876 Trade Dollar
Untoned MS65 Example**

- 5368 1876 Type One Obverse, Type Two Reverse, MS65 NGC.** The fields on both sides of this untuned, silver-white Trade dollar are prooflike with medium reflectivity. The strike is razor-sharp throughout. A slight haziness covers the surfaces, yet mint luster shines through and the fields are mostly without distractions. A few faint lines appear, most notably below the eagle's left wing. Census: 15 in 65, 5 finer (6/15). PCGS# 40111 Base PCGS# 7041

**1876-CC Trade Dollar, MS61
Vibrant Luster**

- 5369 1876-CC Type Two Reverse MS61 NGC.** Tall CC. This mostly brilliant Carson City Trade dollar has bright, semireflective fields, ample luster, and is void of distracting marks. The devices are nicely brought up despite slight incompleteness of detail on Liberty's cheek, shoulder, chest, and ear. Much scarcer in Mint State than its San Francisco counterpart. Census: 24 in 61, 25 finer (7/15).
Ex: FUN Signature (Heritage, 7/2009), lot 793; ANA Signature (Heritage, 3/2010), lot 1254. PCGS# 40113 Base PCGS# 7042

- 5370 1876-S Type One Obverse, Type One Reverse, MS62+ PCGS Secure.** Large S. Exquisite peach-gold, rose-red, ocean-blue, and cream-gray shades emerge when this sharply struck type coin is rotated beneath a light. Satiny and inoffensively abraded. PCGS# 40114 Base PCGS# 7043

- 5371 1876-S Type One Obverse, Type One Reverse, MS63 NGC.** Large S. Dusky cream-gray patina dominates both sides, although the borders display sky-blue, lemon-gold, and sunset-orange. The surfaces are nicely struck and minimally abraded, showing luster illuminating the design elements.
Ex: Central States Signature (Heritage, 4/2012), lot 4937. PCGS# 40114 Base PCGS# 7043

**1877 Trade Dollar, MS64
Doubled Die Obverse**

- 5372 1877 MS64 NGC.** The obverse is noticeably die doubled, although this is not the FS-101 variety listed in the *Cherry-pickers'* reference — the shift is to the upper-left, rather than down. Doubling is visible on every elements of the central device, but is plainest on LIBERTY, the wheat stalks, and Liberty's upper gown folds. The left-hand stars are noticeably doubled, as are the olive leaves. As a date, the 1877 Trade dollar is scarce in MS64 and Gems are rare. This piece displays satiny luster and medium olive, gold, lavender, and aquamarine toning. Liberty's head and the adjacent stars are weakly defined. Census: 66 in 64 (3 in 64+), 12 finer (6/15). NGC ID# 253C, PCGS# 7044

- 5373 1877-S MS63 PCGS. CAC.** Large S. A pleasing silver type coin that displays vibrant cartwheel luster and a full strike. Light wheat-gold toning adorns inoffensively marked surfaces. Certified in a green label holder.
From The Birmingham Collection. NGC ID# 253E, PCGS# 7046

**1878-S Trade Dollar, MS64
Impressive Visual and Technical Quality**

- 5374 1878-S MS64 PCGS. CAC.** The San Francisco Mint struck 4.1 million Trade dollars from the start of the year to February 22, when Treasury Secretary John Sherman suspended Trade dollar production. Thus, the 1878-S is both an available issue through mid-Uncirculated grades and a popular final-year coin for type purposes. This near-Gem displays mottled golden-olive, russet, and violet patina that combines with glistening mint luster, lending fantastic eye appeal to each side. The upper stars, olive branch, and eagle's claws are notably sharp.
From The College Collection, Part Two. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

- 5375 1874 — Scratch — PCGS Genuine. Proof, Unc. Details.** The obverse is mostly golden-brown but has an apple-green border. On the reverse, the field is brilliant, the eagle is frosty, and the periphery displays autumn-brown, ruby-red, and cobalt-blue. The PCGS designation is confirmed by a pair of pinscratches from star 3 to the rim near 7 o'clock. Just 700 proofs were issued. NGC ID# 27YK, PCGS# 7054

- 5376 1874 PR61 PCGS.** This bright, completely untuned Trade dollar proof shows myriad handling marks on each side, but they do not detract from the overall appeal. The surfaces display moderate white-on-black contrast with significant reflectivity in the fields. This is one of 700 proof dollars minted in 1874. NGC ID# 27YK, PCGS# 7054

1874 Trade Dollar, Gem Proof

- 5377 1874 PR65 PCGS. CAC.** Dusky lavender-gray toning with peripheral overtones of deep olive mask any grade-limiting hairlines on this Gem proof, and the mirrored fields are revealed when tilted beneath a light, uncovering hidden pastel hues. The obverse is boldly struck throughout, the reverse is weak only on the eagle's right (facing) talons. Population: 10 in 65, 3 finer (7/15). NGC ID# 27YK, PCGS# 7054

1874 Trade Dollar, PR64 Cameo
Full Design Sharpness

- 5378 1874 PR64 Cameo NGC.** A lovely proof Cameo, surviving from a mintage of only 700 pieces. Cameo examples of this issue are scarce in any grade but become genuinely rare in Gem condition. This near-Gem example is a needle-sharp, deeply mirrored coin with warm violet-gold toning that cedes to deep purple around the peripheries. Census: 20 in 64 Cameo (2 in 64+ Cameo), 12 finer (6/15). PCGS# 87054

1875 Trade Dollar, PR65
Untoned With Compelling Contrast

- 5379 1875 PR65 PCGS.** Type Two Reverse. Most of the 700 proofs struck in 1875 are of this variety without the berry below the claw. This Gem proof Trade dollar displays compelling field-device contrast unmentioned on the holder. Glassy, reflective fields surround frosty devices on each side, and minor contact marks are hardly apparent without a loupe. An ideal alternative for the collector seeking a high-grade example of this conditionally challenging date. Population: 10 in 65, 7 finer (7/15). NGC ID# 27YL, PCGS# 7055

1875 Trade Dollar, PR64 Deep Cameo
Warm Golden Contrast

- 5380 1875 PR64 Deep Cameo PCGS.** Frosty, creamy-gold luster glows on the relief design elements, while the fields show similar color over glass-black mirrors, and a warm amber halo surrounds the periphery. The eagle's right (facing) talons show the only discernible striking weakness, hardly worthy of mention. PCGS has certified just 10 Deep Cameo examples of the 1875 proof Trade dollar, including two PR63, five PR64 (one PR64+), and three PR65 (7/15). PCGS# 97055

1876 Trade Dollar, PR64 Cameo
Medium Gold Toning

- 5381 1876 PR64 Cameo PCGS. CAC.** Type One Obverse, Type Two Reverse. Medium peach-gold toning graces this beautiful Choice proof. The motifs are frosty and the fields are glassy. The strike is crisp, although the right (facing) claw shows minor blending. An impressive specimen, possibly sold from the Mint exhibit at the Centennial Exposition in Philadelphia. Population: 21 in 64 Cameo, 11 finer (7/15). PCGS# 87056

1876 Trade Dollar, PR63 Deep Cameo
Stark White-on-Black Contrast

- 5382 1876 PR63 Deep Cameo PCGS. CAC.** Type One Obverse, Type Two Reverse. The 1876 proof Trade dollar enjoyed a substantial mintage of 1,150 pieces, but high quality examples are more difficult to locate than the mintage would suggest. This specimen exhibits deeply mirrored fields with boldly contrasting frosty devices. The surfaces are mostly brilliant, with subtle hints of gold toning at the peripheries. A few hairlines in the obverse field explains the grade. Select proof examples, with the Deep Cameo designation are extremely rare. Population: 3 in 63 Deep Cameo, 4 finer (7/15). Ex: *Stamford Coinfest Signature* (Heritage, 10/2010), lot 3828. PCGS# 97056

1876 Trade Dollar, PR64 Ultra Cameo
Gold-Accentuated Contrast

- 5383 1876 PR64 Ultra Cameo NGC.** Stark white-on-black contrast gives this Choice Ultra Cameo proof exceptional eye appeal. The visual impact is accentuated by a halo of gold peripheral toning which leaves similar traces of color on the frosty motifs. A few stray hairlines limit the grade, although the strike is sharp. Census: 5 in 64 Ultra Cameo, 3 finer (7/15). PCGS# 97056

**1878 Trade Dollar, PR63 Cameo
Sharply Struck, Frosted Motifs**

5384 1878 PR63 Cameo NGC. The fields are a bit hazy with soft golden-gray toning over this Select Cameo proof, but impressive mirroring remains beneath the vague patina. A sharp strike covers the frosted motifs to earn the Cameo designation. A glass reveals inconspicuous delicate lines across the reflective surfaces, but they do not diminish the in-hand appeal. Rather, overall fogginess of the fields is the sole limiting factor to an even higher grade. Census: 20 in 63 Cameo, 52 finer (7/15). PCGS# 87058

5385 1880 PR20 PCGS. CAC. This proof-only Trade dollar clearly got out into circulation, perhaps spent by some collector down on his luck. The dove-gray surfaces show deeper charcoal device edges and the expected texture for the grade. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, Toned PR65

5386 1880 PR65 PCGS. CAC. The rich amber-gray centers are framed by peripheral jade-green and orange-gold. Sharply struck and essentially pristine aside from a brief hair-thin mark near star 3. This proof-only issue is infrequently seen at the Gem level and finer pieces are scarce. Population: 60 in 65 (1 in 65+), 31 finer (6/15). Ex: *Central States Signature (Heritage, 4/2012)*, lot 4982. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR64 Cameo
Touch of Golden Color**

5387 1880 PR64 Cameo NGC. Icy devices provide obvious contrast with the glassy fields. This Choice example of the proof-only 1880 Trade dollar issue has a well-preserved reverse and only incidental contact on the right obverse field. Most design elements are bold, although Liberty's hair and the right-side stars incomplete. Ex: *FUN Signature (Heritage, 1/2009)*, lot 4406. PCGS# 87060

**1880 Trade Dollar, PR65 Cameo
Multicolor Toning**

5388 1880 PR65 Cameo PCGS. CAC. Regular Trade dollar coinage was ceased in 1878, replaced by the standard Morgan dollar, but proof coinage of this series continued on an official basis through 1883. This 1880 representative displays Gem-grade surfaces with areas of ocean-blue, violet, and gold appearing on most of the mirrored surfaces. Modest Cameo contrast is present. Population: 22 in 65 Cameo, 23 finer (7/15). From *The College Collection, Part Two*. PCGS# 87060

5389 1881 PR62 NGC. From a proof mintage of 960 pieces, this attractive Trade dollar exhibits sharply detailed design elements and deeply reflective fields that show a few minor hair lines on close inspection. NGC ID# 27YT, PCGS# 7061

1881 Trade Dollar, Lightly Toned PR63

5390 1881 PR63 PCGS. CAC. This is a highly attractive and original proof Trade dollar with sharp design elements and gleaming mirrors. Dusky pastel toning blankets each side, prohibiting a Cameo designation, but allowing some contrast to appear on the obverse. Faint hairlines are barely visible beneath the patina, although they do limit the grade. From *The Birmingham Collection*. NGC ID# 27YT, PCGS# 7061

**1882 Trade Dollar, PR65
Subtle Contrast on Both Sides**

5391 1882 PR65 PCGS. The availability of this proof-only Trade dollar issue declines significantly above the Choice grade level, with or without cameo contrast. This Gem example shows modest contrast between the devices and the mirrored fields, but the cameo effect is not quite stark enough to gain a Cameo designation from PCGS. The strike is sharp throughout each side. Mottled gold and amber toning blanket each side, with tinges of olive-gray also evident around the peripheries. Population: 38 in 65 (1 in 65+), 25 finer (7/15). NGC ID# 27YU, PCGS# 7062

1882 Trade Dollar, PR63 Cameo
Starkly Contrasted

- 5392 1882 PR63 Cameo PCGS.** Lovely white-on-black contrast draws the viewers eye on this deeply mirrored Select proof Cameo. Traces of light golden toning grace the peripheries, but leave the central regions brilliant. The top of Liberty's head and several adjacent stars are softly struck, but the definition is otherwise pleasing and the recesses yield only grade-consistent hairlines when viewed with a loupe. PCGS# 87062

1882 Trade Dollar, Sharp PR64 Cameo

- 5393 1882 PR64 Cameo PCGS.** Cameo examples of this proof-only Trade dollar issue are rare finer than the currently offered PR64 coin, making this piece among the finest many collectors will be able to acquire. This coin is sharp throughout the relief elements and displays deep, glassy mirroring in the fields. Both sides are toned in mottled cream-gold, russet, and pale gray toning. Population: 51 in 64 (5 in 64+) Cameo, 18 finer (7/15). PCGS# 87062

1883 Trade Dollar, Sharp PR65

- 5394 1883 PR65 NGC. CAC.** The obverse of this final-year official proof Trade dollar displays a bold toning pattern of blended blue and violet margins surrounding a hard-outlined champagne center which is a trifle offset toward 8 o'clock. The reverse shows the same hues but in a lighter, mottled appearance. A bold strike is evident throughout. Housed in a prior generation holder. Census: 58 in 65 (1 in 65+), 44 finer (7/15). NGC ID# 27YV, PCGS# 7063

1883 Trade Dollar, PR63 Cameo
A Proof-Only Issue

- 5395 1883 PR63 Cameo PCGS.** The proof-only 1883 is the final date of the regular-issue Trade dollar, and is popular and highly desirable as such. The sharply struck devices of this Select offering are highlighted by the mirrored fields, producing strong cameo contrast. Brilliant throughout, a few minute marks do not detract. Population: 28 in 63 (1 in 63+) Cameo, 65 finer (7/15). PCGS# 87063

EARLY PROOF SETS

1878 Indian Cent, PR65 ★ Red Cameo

- 5396 1878 Cent PR65 ★ Red Cameo NGC.** The Star designation is rare on proof 1878 cents. Probably, the dazzling field reflectivity is the reason for the Star notation. In addition, the strike is intricate and the pumpkin-gold color shows only occasional mellowing to purple. Census: 11 in 65 Cameo (1 in 65 ★ Cameo), 2 finer (7/15). PCGS# 82323

1878 Three Cent Nickel, PR67 Cameo
Proof-Only Issue

- 5397 1878 Three Cent Nickel PR67 Cameo PCGS. CAC.** A proof-only issue from a reported mintage of 2,350 coins, this Superb Gem Cameo proof is an amazing survivor, one of just 20 similarly graded examples. Only one finer Cameo proof 1878 three cent piece has been examined at PCGS (7/15). This boldly defined specimen has light gold toning over its deeply mirrored fields and lustrous devices. PCGS# 83774

**1878 Shield Nickel, PR67
Low-Mintage, Proof-Only Date**

- 5398 1878 Nickel PR67 PCGS Secure.** This satiny Superb Gem exhibits faint field reflectivity, reminiscent more of a Mint State coin except it is a proof-only issue. A bold strike and delicate champagne toning enhance the eye appeal. Per the *Guide Book*, only 2,350 pieces were struck. Population: 16 in 67, 0 finer (7/15). NGC ID# 276V, PCGS# 3832

1878 Dime, Multicolor PR66 Cameo

- 5399 1878 Dime PR66 Cameo NGC.** Type Two Reverse. Magnificent cherry-red, navy-blue, and autumn-gold toning endows the present high grade proof. Only the central reverse remains brilliant. Despite the colorful patina, frost is evident on both motifs. Nicely struck and pristine with exceptional eye appeal. Census: 3 in 66 Cameo, 2 finer (7/15).
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3212, which realized \$2,232.50. PCGS# 84775

**1878 Twenty Cent, PR65 Cameo
Borderline Ultra Cameo**

- 5400 1878 Twenty Cent PR65 Cameo NGC. CAC.** This is the final year of the denomination and a proof-only issue with a mintage of only 600 coins. Rarely found as fine as this piece, the fields are deeply mirrored with extraordinary contrast. In fact, we are uncertain why this beauty is not designated as an Ultra Cameo proof. Census: 16 in 65 Cameo, 7 finer (7/15). PCGS# 85306

**1878 Seated Quarter, PR66 Cameo
Richly Toned and Appealing, Only One Finer**

- 5401 1878 Quarter PR66 Cameo NGC.** Glorious concentric bands of navy-blue, plum, gold, and ruby color invigorate this well-struck Premium Gem. Despite the blanket of dramatic patina, the icy frost on the devices is undeniable. The fields exhibit wispy Mint-made striations from die polish, but are exceptional from a technical perspective. A stingy production of 800 proofs ensures a paucity of high-grade survivors. Census: 7 in 66 Cameo, 1 finer (7/15).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5587. PCGS# 85579

**1878 Cameo PR65 Half Dollar
Noticeably Frosted Devices**

- 5402 1878 Half Dollar PR65 Cameo NGC.** Only 800 proof halves were struck in 1878. When one subtracts the pieces that have been lost through attrition over the years, there are surprisingly few proofs left, especially in high grade. The fields on this example are flashy and brightly mirrored with a significant presence of mint frost over the devices. The centers are almost brilliant and surrounded by a ring of deep golden-brown at the margins. Census: 13 in 65 Cameo, 15 finer (7/15).
Ex: Long Beach Signature (Heritage, 5/2012), lot 3847, which realized \$3,737.50. PCGS# 86439

1878 Trade Dollar, PR65 Cameo
First Proof-Only Issue

5403 1878 Trade Dollar PR65 Cameo NGC. Circulation-strike Trade dollars were discontinued at the Philadelphia Mint following the 1877 production, and later years from 1878 to 1885 were only coined in proof format, the last two issues in extremely limited quantities. This impressive Gem has delicate champagne toning on both sides, with frosty devices that stand boldly on the deep mirrored fields. Census: 25 in 65 Cameo (3 in 65 ★ Cameo), 7 finer (7/15). PCGS# 87058

1878 Morgan Dollar, PR63 Cameo
Scarce 7TF Reverse of 1878

5404 1878 7TF Reverse of 1878 Morgan Dollar PR63 Cameo ANACS. The parallel top arrow feather identifies the Reverse of 1878. Probably no more than 250 proof Morgan dollars were struck with the 7 Tailfeathers Reverse of 1878. This attractive Select example exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. The mostly brilliant centers yield to vivid rings of greenish-gold at the borders. Eye appeal is outstanding. NGC ID# 2573, PCGS# 7312

End of Session Three

Morgan with plaster model

SESSION FOUR

GSA DOLLARS

1880-CC VAM-5 Silver Dollar, MS66+ 8 Over High 7

- 5405 1880-CC GSA, 8 Over High 7, VAM-5, MS66+ NGC.** A Top 100 Variety. The second 8 in the date is punched over a high 7 on this important silver dollar variety. The 1880-CC had a limited mintage of only 495,000 coins, and there are eight different VAM varieties known today. Seven of the eight known die varieties are overdates. This lovely Premium Gem has virtually flawless surfaces with reflective fields and frosty devices. PCGS# 518854 Base PCGS# 407100

- 5406 1882-CC GSA MS66 NGC.** The 1882-CC Morgan dollar had a mintage of 1,133,000 coins, and more than half of those coins were preserved in Mint and Treasury vaults until the early 1970s. This example displays soft, frosty mint luster and lovely iridescent toning over a little more than half of the obverse. The reverse remains untuned. PCGS# 518866 Base PCGS# 407134

- 5407 1884-CC GSA MS66 NGC.** Nearly 1 million 1884-CC Morgan dollars were sold to collectors and non-collectors alike during the GSA Morgan distribution of the 1970s. This lovely Premium Gem was one of those coins, exhibiting a bold strike and frosty silver luster with untuned surfaces. PCGS# 518872 Base PCGS# 407152

- 5408 1885-CC GSA MS65 NGC.** When the GSA sales of Carson City Morgan dollars took place in the 1970s, the organization distributed 148,285 examples of the formerly rare 1885-CC. That quantity was 65% of the 228,000 coin mintage. Among those preserved coins was this Gem that exhibits frosty mint luster and brilliant, untuned silver surfaces. PCGS# 518875 Base PCGS# 407160

1885-CC VAM-4 Morgan Dollar, MS66 Doubled Dash Obverse

- 5409 1885-CC GSA, Doubled Dash, VAM-4, MS66 NGC.** The Doubled Dash variety has a small doubled projection below the lower curve of the second 8 in the date. This impressive example has fully brilliant silver luster and semi-reflective obverse and reverse fields. An outstanding strike and untuned silver surfaces are noted. Census: 3 in 66, 1 finer (7/15), for the VAM-4 die combination. PCGS# 518875 Base PCGS# 407160

MORGAN DOLLARS

- 5410 1878 8TF Spiked Eye, VAM-3, MS65 NGC.** A die chip beneath the eyelid, and several lines on the bridge of the nose, combine to attribute VAM-3. A thoroughly lustrous Gem with only a whisper of golden patina. The reverse is essentially pristine, and the obverse is nearly as nice. PCGS# 133786 Base PCGS# 7072

- 5411 1878 8TF Alligator Eye, VAM-14.1A, MS64+ PCGS.** The usual clashed die state of the "Alligator Eye" 8TF VAM. Crisply struck and essentially brilliant with booming luster and pleasing surfaces. The reverse is especially smooth. PCGS# 133796 Base PCGS# 7072

- 5412 1878 8TF Alligator Eye, VAM-14.1A, MS65 PCGS.** Light gold toning adorns this otherwise brilliant Gem. Potent luster sweeps splendidly smooth surfaces. The strike is intricate and the eye appeal is exquisite. It would likely prove impossible to obtain a finer example of the variety.
From The College Collection, Part Two. PCGS# 133796 Base PCGS# 7072

1878 Eight Tailfeather Dollar, MS66 VAM-14.1A, 'Alligator Eye' Variety

- 5413 1878 8TF Alligator Eye, VAM-14.1A, MS66 PCGS.** Numerous 8TF VAMs are known, and a majority are very scarce to rare. VAM-14.1A is somewhat scarce but readily collectible. The left border of the eye is die doubled, hence the "Alligator Eye" nickname. The present sharply struck Premium Gem offers light wheat-gold toning and exemplary preservation.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133796 Base PCGS# 7072

1878 8TF Morgan Dollar, XF40 Rare VAM-14.17, Chip in Ear

- 5414 1878 8TF VAM-14.17, Chip in Ear XF40 PCGS.** VAMWorld.com calls this variety "an extreme ultra rarity with perhaps 5 or 6 known. It is among the most difficult of all the ultra-rare 8 tail feather coins to locate." Die markers include minute doubling of the date and hair curls, as well as a small die chip inside Liberty's ear. This XF example displays pleasing detail with medium olive-gray patina. Population: 1 in 40, 5 finer (7/15). PCGS# 133812 Base PCGS# 7072

- 5415 1878 8TF Doubled Date, VAM-18, MS65 PCGS. CAC.** The date and STATES OF are die doubled. Pumpkin-gold, powder-blue, and olive-green toning endow this lustrous and crisply struck Gem. The fields are well preserved and the cheek shows only unimportant marks.
From The College Collection, Part Two. PCGS# 133819 Base PCGS# 7072

**1878 7 Over 8 Tailfeathers Dollar, MS65+
VAM-37, 7/4 Strong**

- 5416 1878 7/8TF 7/4 Strong, VAM-37, MS65+ PCGS.** Hints of tan toning visit this thoroughly lustrous and precisely struck silver dollar. The middle tail feathers are doubled south. The reverse is well preserved, and the obverse displays only scattered wispy marks. The doubled tailfeathers seen on several 1878 die varieties were caused by hubbing a Type Two reverse over a Type One reverse.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 134034 Base PCGS# 7078

- 5417 1878 7TF Reverse of 1878 MS65 PCGS. VAM-114-2.** Remarkable lime-green, cherry-red, honey-gold, and powder-blue consume nearly all of the reverse, although a small arc of brilliance is centered at 4:30. The die doubled obverse is brilliant save for a blush of golden patina near the LUR in PLURIBUS. Lustrous and well struck with a minor mark noted above the TR in TRUST. NGC ID# 253K, PCGS# 7074

- 5418 1878 7TF Reverse of 1878 MS65+ PCGS.** A crescent of magnificent toning in shades of electric-blue, forest-green, magenta, and orange swathes the upper obverse. The remaining surfaces are brilliant with blushes of golden patina. Sharply struck and minimally abraded for the Gem grade. Rarely seen finer. NGC ID# 253K, PCGS# 7074

- 5419 1878 7TF Reverse of 1878 MS65 Prooflike PCGS.** Super contrast appears on well-preserved surfaces with a light ring of copper-gold patina near the rims on each side. Extensive die lapping shows on the lower tailfeathers of the eagle. A great-looking example of this first-year variety. Population: 35 in 65 (1 in 65+) Prooflike, 3 finer (7/15). NGC ID# 253K, PCGS# 7075

**1878 7 Tailfeathers Dollar, MS66
Reverse of 1878, VAM-79**

- 5420 1878 7TF Reverse of 1878, VAM-79, MS66 PCGS.** A Hot 50 Variety. A long neck variety identified by minor die doubling and lapping on both sides. Light golden toning near the date denies full brilliance, but this lustrous first-year Morgan dollar has a virtually pristine obverse field. A small reed impression below the left wing corresponds to the grade.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133973 Base PCGS# 7074

- 5421 1878 Reverse of 1878, Tripled Eye, VAM-166, XF45 PCGS.** A Hit List 40 Variety. Described by VAMWorld as "very rare in any grade," this variety shows abnormalities on E, P, U, and R in the motto, a notch at the top of the 1, and shallow spikes from front of the eye under the lid. This battleship-gray example has good detail, partial luster, and is free of singularly distracting abrasions. PCGS# 134045 Base PCGS# 7074

- 5422 1878 7TF Reverse of 1879 MS65+ NGC.** The slanting top arrow feather identifies the Reverse of 1879. This high-end Gem offers sharply detailed design elements and well-preserved lustrous surfaces with hints of greenish-gold and violet toning. NGC has graded 16 numerically finer examples (7/15). NGC ID# 253L, PCGS# 7076

1878 7TF Morgan, Reverse of 1879, MS65+

- 5423 1878 7TF Reverse of 1879 MS65+ PCGS. CAC.** The frosty silver-white surfaces show only a minor trace of color at the lower obverse, but excellent preservation is blatant throughout both sides. Liberty's cheek is distraction-free, as is the eagle's breast on the reverse. PCGS reports only 25 submissions in MS65+ with 20 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 253L, PCGS# 7076

**1878 Morgan Dollar, Frosty MS66
Reverse of 1879**

- 5424 1878 7TF Reverse of 1879 MS66 PCGS. VAM-201.** The cotton leaves are minutely doubled on this 1878 7TF variety. The present example is boldly struck, with frosty mint luster that remains brilliant over much of each side, save for a crescent of blue and amber around the obverse periphery from 6 to 10 o'clock. No Major abrasions are present. Population: 20 in 66, 0 finer (7/15). NGC ID# 253L, PCGS# 7076

- 5425 1878-CC MS65 PCGS.** Blended fiery-orange, sun-gold, and magenta toning encircles brilliant centers throughout this Gem first-year Carson City dollar. Sharp strike definition with moderate incompleteness over the eagle's breast is typical of the issue. The semiprooflike fields add considerable appeal. NGC ID# 253M, PCGS# 7080

- 5426 1878-CC MS65 NGC.** The highly lustrous obverse and reverse surfaces of this Gem exhibit fully brilliant surfaces without toning. An impressive representative of the first Morgan dollar issue from the Carson City Mint. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, VAM-9, MS66

- 5427 1878-CC MS66 PCGS. VAM-9, CC Tilted Right**, showing extensive die polishing lines on the reverse, the heaviest of which (in the late die state seen here) is a straight, thick one from the tip of the lower-left-center olive leaf to and through the O in ONE. The second C in the mintmark tilts to the right. This is an untoned (largely), solid Premium Gem example of this popular first-year Carson City issue, showing excellent preservation. Essentially the finest grade obtainable, as PCGS reports only six in MS67 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 253M, PCGS# 7080

**1878-CC Silver Dollar, MS66
Outstanding Cartwheel Luster**

- 5428 1878-CC MS66 PCGS. Radiant**, frosty luster illuminates boldly struck design elements on this Premium Gem 1878-CC Morgan, while hints of gold, amber, and sky-blue toning appear around the peripheries. This issue is moderately available in this grade, but finer pieces are rare enough so as to be prohibitive for many collectors. PCGS lists six numerically finer coins (6/15). NGC ID# 253M, PCGS# 7080

- 5429 1878-CC Lines in Wing, VAM-11, MS65 NGC. A Top 100 Variety.** Numerous broad die lines within the eagle's wings identify this memorable VAM variety. A highly lustrous, well struck, and nearly brilliant Gem. Shallow strike-throughs on the portrait, mostly west of the ear, are of Mint origin. PCGS# 133843 Base PCGS# 7080

- 5430 1878-S MS66 PCGS. CAC. Intense shades of turquoise, gray and greenish-gold toning** blanket the well-preserved surfaces of this first-year branch mint Premium Gem. The design elements are sharply detailed and vibrant mint luster shines through the toning. PCGS has graded 33 numerically finer examples (7/15). NGC ID# 253R, PCGS# 7082

- 5431 1878-S MS66+ PCGS. CAC. This fully brilliant Premium Gem** 1878-S dollar has a prooflike obverse exhibiting cameo contrast, with a frosty and fully lustrous reverse. There is no toning present on either side of this first year Morgan dollar. NGC ID# 253R, PCGS# 7082

- 5432 1878-S MS66+ PCGS. CAC. This high-end Premium Gem** displays sharply detailed design elements throughout, with vibrant mint luster and virtually flawless brilliant surfaces. PCGS has graded 33 numerically finer examples (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 253R, PCGS# 7082

- 5433 1878-S Long Arrow Shaft, VAM-59, AU53 PCGS Secure.** Die Clash Line Eye, S Set Slightly Left. A Top 100 Variety and a Top 30 1878-S Variety. VAMworld.com ranks this variety as R.7. The diagnostic for this Long Nock variety is a subtle die clash mark extending left from near the eyelid tip. This lightly circulated coin is untuned and shows lots of lively silver luster remaining. Population: 4 in 53, 1 finer (7/15). PCGS# 133850 Base PCGS# 7082

- 5434 1879 MS66 PCGS. The silver-white surfaces** of this gorgeous Premium Gem are sharply struck on the devices and radiant in the fields. A quality second-year coin. PCGS has graded just four coins as MS67 or better (6/15). NGC ID# 253S, PCGS# 7084

- 5435 1879 MS66 PCGS. Fantastic pale blue, gold, and rose tones** enliven the obverse of this nicely preserved Premium Gem Morgan dollar. The reverse shows toning a bit more on the demure side, but this piece should be eagerly contested by color aficionados. PCGS reports only four finer in MS67 (7/15). NGC ID# 253S, PCGS# 7084

- 5436 1879 MS66 NGC. The 1879 is scarce** at this grade level, and rare in finer grades. This frosty Premium Gem exhibits fully brilliant silver surfaces and above average design definition, showing only slight weakness over Liberty's ear. Census: 76 in 66 (2 in 66+, 3 in 66 ★), 5 finer (7/15). NGC ID# 253S, PCGS# 7084

**1879 Morgan, Cameoed MS66
Dazzling Vibrancy**

- 5437 1879 MS66 PCGS. CAC. This is a stellar example** of this early Philadelphia Morgan dollar issue, showcasing sharp, frosty motifs and gleaming, semiprooflike fields. Warm golden toning deepens toward the peripheries and a ribbon of midnight-blue stretches along the border from 9 to 12 o'clock on the reverse. Bold and beautiful, devoid of significant abrasions. Housed in an old green label holder. Only four coins grade numerically finer at PCGS (7/15). NGC ID# 253S, PCGS# 7084

1879 Morgan Dollar, High-End MS66

- 5438 1879 MS66 PCGS Secure. CAC. The frosty surfaces** are untuned silver-white and show generous luster on each side. The 1879 Morgan dollar becomes scarce at the Premium Gem level, despite an enormous mintage of nearly 15 million pieces. This piece shows only a single mentionable mark on Liberty's forehead, but it is nonetheless high-end for the grade. PCGS reports only four finer, all MS67 (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 253S, PCGS# 7084

**1879 Silver Dollar Premium Gem
High-End, Silver-White Example**

- 5439 1879 MS66+ PCGS. CAC.** A white blaze of silver luster rolls across the coin in flashy cartwheels, while the frosty-smooth surfaces are entirely untoned. The fields show only a few isolated abrasions and Liberty's cheek reveals only tiny blemishes. A bit of softness over the ear does not diminish the appeal of this well-produced, high-end Premium Gem. Just four pieces are certified finer at PCGS. Population: 19 in 66+, 4 finer (6/15). NGC ID# 253S, PCGS# 7084

**1879 Silver Dollar, Exceptional MS66+
Beautiful Surfaces**

- 5440 1879 MS66+ PCGS. CAC. VAM-12.** VAM-12 shows the date lightly doubled. Even with a loupe, it is difficult to discern what kept this magnificent 1879 Morgan dollar from achieving a Superb Gem grade, save for a few faint lines on Liberty's cheek. The luster is frosty and vibrant, untuned save for a tinge of gold around the extreme outer periphery. The 1879 is seldom seen in Premium Gem condition, and PCGS lists only four coins finer (6/15). NGC ID# 253S, PCGS# 7084
- 5441 1879 MS65 Prooflike PCGS.** Bright silver interiors show considerable reflectivity and contrast. On the obverse a delicate gold-green arc of rim toning visits the upper obverse. Population: 18 in 65 Prooflike, 2 finer (7/15). NGC ID# 253S, PCGS# 7085
- 5442 1879 MS64 Deep Mirror Prooflike PCGS.** This attractive Choice example exhibits well-detailed frosty design elements and deeply reflective prooflike fields. The mostly brilliant surfaces display traces of golden-tan toning and some scattered minor contact marks. Population: 67 in 64 (1 in 64+) Deep Mirror Prooflike, 11 finer (7/15). NGC ID# 253S, PCGS# 97085

1879-CC Silver Dollar, MS62

- 5443 1879-CC MS62 PCGS.** The 1879-CC Morgan is one of the most challenging dates in the Carson City collection, second only to the 1889-CC in high grade. This MS62 example is lightly abraded on Liberty's cheek, consistent with the grade, but is otherwise quite eye-appealing with frosty, brilliant luster and well-struck design elements. NGC ID# 253T, PCGS# 7086

1879-CC Silver Dollar, Toned MS64

- 5444 1879-CC MS64 PCGS. CAC.** For the grade, this Choice 1879-CC Morgan dollar displays outstanding eye appeal. A few small abrasions on Liberty's cheek preclude a Gem assessment from PCGS, but these are almost undetectable beneath a blanket of sun-gold and lavender toning that overlies each side, allowing occasional glimpses of blue around the peripheries. The design elements are well-struck and the fields show a glint of semiprooflike mirroring when tilted beneath a light. NGC ID# 253T, PCGS# 7086

**1879-CC Silver Dollar, MS64
VAM-3, 'Capped Die'**

- 5445 1879-CC Capped Die, VAM-3, Top 100, MS64 PCGS.** A Top 100 Variety, showing numerous small die chips around the mintmark on the reverse and minor doubling of the date numerals. This piece displays vibrant, frosty luster and reveals only a few trivial, scattered abrasions. Slight striking weakness is seen on the eagle's breast and the hair above Liberty's ear. This "Capped Die" variety is seldom available finer. PCGS# 133869 Base PCGS# 7088

**1879-CC Capped Die Morgan, MS64
Excellent Eye Appeal**

- 5446 1879-CC Capped Die, VAM-3A, MS64 PCGS.** A Top 100 Variety. The first of the three great (although there are lesser, conditionally speaking) Carson City keys in the Morgan dollar series, the 1879-CC VAM-3 in the near-Gem condition of the present coin is in the finest condition practically obtainable: PCGS reports only 13 in higher grade levels, and they will be far more pricey, even assuming one can be found (5/15). Generous cartwheel luster complements untuned silver-white surfaces with plenteous eye appeal and a paucity of mentionable marks, consistent with the high Mint State grade. One thin but longer scrape appears on Liberty's cheek. *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* PCGS# 133869 Base PCGS# 7088

- 5447 1879-O MS64+ PCGS. CAC.** The resumption of coining operations at the Southern branch mint resulted in a production of 2.8 million Morgan dollars in 1879. Pinpoint strike detail at the centers is arguably this near-Gem's most redeeming feature, while its brilliant and lustrous surfaces are sure to catch the eye of potential bidders. NGC ID# 253V, PCGS# 7090

- 5448 1879-O MS65 NGC.** This nearly brilliant Gem has a sharp strike and exemplary luster. Splendidly bereft of marks, and among the nicer examples of this issue, struck during the first year of New Orleans' return to coinage. NGC has graded only seven pieces in higher grades (6/15). NGC ID# 253V, PCGS# 7090

**1879-O Morgan Dollar, MS65+
Few Certified Finer**

- 5449 1879-O MS65+ PCGS.** Slight glimpses of gold toning surround brilliant-silver surfaces of this uncommonly well-produced New Orleans dollar. The strike is a mere touch short of full, with nice hair details and sharp plumage on the eagle. The few abrasions are distributed infrequently over the semiprooflike fields, and dazzling mint luster accounts for much of the PCGS Plus designation. Minor scuffs around IN GOD WE TRUST present no real distraction. Population: 16 in 65+, 18 finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 253V, PCGS# 7090

**1879-O Silver Dollar, MS65
Semiprooflike Fields**

- 5450 1879-O MS65 PCGS. CAC.** Though not strictly Prooflike, owing to the prominent cartwheels and uneven reflectivity of the silver-white fields, the overall appearance of this Gem is suggestive. Solidly struck central devices offer delightful mint frost. The eye appeal is outstanding for this New Orleans issue. PCGS has certified just 18 numerically finer examples (6/15). *Ex: Long Beach Signature (Heritage, 2/2010), lot 521.* NGC ID# 253V, PCGS# 7090

- 5451 1879 Reverse of 1878, VAM-4, MS64+ PCGS. CAC.** A brilliant and sharply struck near-Gem of the popular Second Reverse variety. The obverse displays potent cartwheel luster. The reverse is moderately prooflike. Wispy marks on the left obverse determine the grade. *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* PCGS# 133856 Base PCGS# 7094

- 5452 1879 Reverse of 1878, VAM-39, MS64+ PCGS. CAC.** A Top 100 Variety. Potent luster illuminates this untuned and sharply struck near-Gem. Well preserved. A small strike-through (as coined) is near the mouth. Lapping on the eagle's plumage helps attribute the VAM variety. *From The College Collection, Part Two.* PCGS# 133862 Base PCGS# 7094

- 5453 1879-S MS67+ PCGS. CAC.** Amazing magenta and emerald toning provides the obverse with simply unparalleled eye appeal. The frosty reverse is almost all-brilliant with blushes of gold, rose, and blue patina along the left-hand border. Sharply struck and practically unabraded. An ideal example for the type enthusiast or toning connoisseur. NGC ID# 253X, PCGS# 7092

- 5454 1879-S MS67+ PCGS. CAC.** This high-end Superb Gem exhibits needle-sharp definition on all design elements and the impeccably preserved brilliant surfaces radiate vibrant mint luster on both sides, creating terrific eye appeal. NGC ID# 253X, PCGS# 7092

1879-S Dollar, Silver-White MS68

- 5455 1879-S MS68 PCGS.** Untuned silver-white surfaces are virtually free of mentionable marks, although Liberty's upper hair shows a couple of small luster grazes. The obverse on its own would likely garner a Deep Mirror Prooflike designation, but the reverse, while untuned, shows only moderate contrast between fields and devices. This piece is nonetheless tied with a few dozen other submissions for finest certified of the issue. A top-quality coin. NGC ID# 253X, PCGS# 7092

**1879-S Morgan Dollar, MS68
Fully Struck, Among the Finest Extant**

- 5456 1879-S MS68 NGC.** Struck to the extent of 9.1 million coins and safely stored for decades, the 1879-S is readily available even at this seemingly impossible grade level. The issue's accessibility through MS68, however, in no way affects the appeal and desirability of this flawless and fully struck representative. Attractive rose, orange, and pale-blue iridescence covers each side. Among the finest examples extant. NGC ID# 253X, PCGS# 7092

**1879-S Morgan Dollar, MS68
Exemplary Type Coin**

- 5457 1879-S MS68 NGC.** The 1879-S is an available date, but this example is an uncommonly well-preserved and eye-appealing example. The semiprooflike fields are pristine and the sharp, frosty devices captivate the eye. Hints of golden toning appear only briefly around the outer peripheries. None are numerically finer at either service (6/15). NGC ID# 253X, PCGS# 7092

- 5458 1880 MS66 PCGS.** The highly lustrous silver-white surfaces of this Premium Gem display whispers of gold around the reverse margin. The design elements are well-defined, including a fair amount of detail in the hair over Liberty's ear. This is a difficult coin in this level of preservation and virtually unobtainable any finer. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 253Y, PCGS# 7096

- 5459 1880 MS66 PCGS.** Ex: Jackson Hole. This untuned silver-white example (save for three tiny obverse toning flecks) shows brilliant luster cascading from the surfaces, with a remarkable lack of mentionable abrasions, large or small. A hint of striking weakness shows on the hair over Liberty's ear. Despite the generous mintage exceeding 12 million pieces, Premium Gems are surprisingly elusive. PCGS has graded no coins in finer numeric grades (6/15). NGC ID# 253Y, PCGS# 7096

**1880 Morgan Dollar, MS66+
None Certified Finer**

- 5460 1880 MS66+ PCGS.** The 1880 Morgan dollar was produced in large quantities and the issue is readily available in grades up to the MS65 level. MS66 specimens are scarce, however, and neither grading service has certified any coins at the MS67 level or above (7/15). This high-end Premium Gem exhibits sharply detailed design elements and well-preserved surfaces with vibrant mint luster on both sides. NGC ID# 253Y, PCGS# 7096

- 5461 1880 8 Over 7 Stem, VAM-9, MS64 PCGS. CAC.** Ex: Jeffrey M. Cohen. A Top 100 Variety. The "Stem" 8 Over 7 overdate that exhibits traces of the crossbar and downstroke within the loops of the second 8 in the date. A scarce VAM in such a high grade. Dazzling luster, a good strike, and smooth surfaces confirm the quality. Lightly toned in gray and gold with a subtle obverse fingerprint at 2 o'clock. Ex: Jimmy G. PCGS Registry Collection (*Heritage*, 2/2008), lot 1117, which realized \$920. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. PCGS# 133874 Base PCGS# 41097

- 5462 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. This lustrous silver-gray Carson City Gem shows smooth fields and only wispy grazes on the portrait. An undeniable overdate with substantial remnants of the 79 underdigits. PCGS# 133876 Base PCGS# 7108

**1880/79-CC Dollar, MS66
Reverse of 1878, Top 100 VAM-4**

- 5463 1880/79-CC Reverse of 1878, VAM-4, MS66 PCGS.** A Top 100 Variety. A memorable die marriage that pairs the obsolete Type Two reverse with the most prominent overdate of the Morgan dollar series. The present lustrous Premium Gem has a wisp of sun-gold toning, although many observers would call it brilliant. Crisply struck and carefully preserved. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. PCGS# 133876 Base PCGS# 7108

**1880/79-CC Dollar, MS64+ Prooflike
Reverse of 1878, VAM-4**

- 5464** 1880/79-CC Reverse of 1878, VAM-4, MS64+ Prooflike NGC. CAC. A Top 100 Variety. This dramatic overdate variety shows the underlying 79 within the loops of 80 in the date, and the parallel arrow feather reverse of 1878 is a more desirable variant. Brilliant surfaces display marked contrast between reflective fields and frosted, exceedingly sharp devices. Even the hair over Liberty's ear and the eagle's breast feathers feature bold definition. Grazes on Liberty's cheek and in the lower reverse fields preclude a full Gem assessment. Census: 9 in 64 (3 in 64+ Prooflike, 1 in 64 ★), 3 finer (7/15). PCGS# 41131 Base PCGS# 7109

**1880/79-CC Morgan Dollar
MS64 Deep Mirror Prooflike**

- 5465** 1880/79-CC Reverse of 1878, VAM-4, MS64 Deep Mirror Prooflike PCGS. CAC. A Top 100 Variety, with a clearly visible overdate. This variety is usually available in most grades, but not with a Deep Mirror Prooflike designation. The present piece exhibits strong cameo contrast with heavily frosted devices amid deeply mirrored fields. The surfaces exhibit scattered, light, grade-limiting grazes, but the visual appeal is balanced by a needle-sharp strike. Just a tint of golden peripheral toning surrounds otherwise brilliant luster. Population: 17 in 64 Deep Mirror Prooflike, 3 finer (6/15). PCGS# 41132 Base PCGS# 97109

**1880-CC Silver Dollar, MS66
8 Over High 7 Overdate, VAM-5**

- 5466** 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. A Top 100 Variety. Although the reverse remains brilliant, the obverse is richly patinated wheat-gold, lavender-red, and steel-blue. Well struck and splendidly preserved with sweeping cartwheel luster. The VAM-4, VAM-5, and VAM-6 1880-CC overdates are so prominent that the Philadelphia Mint probably selected those dies for shipment to Carson City to minimize distribution of the error. From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133877 Base PCGS# 7102

- 5467** 1880-CC 8 Over High 7, VAM-5, MS65 Prooflike PCGS. A Top 100 Variety. Among the most obvious silver dollar overdate varieties. Almond-gray toning colors impressively smooth surfaces. The fields are unabraded and flashy, particularly on the reverse. Population: 17 in 65 Prooflike, 1 finer (7/15). Ex: Long Beach Signature (Heritage, 2/2010), lot 526. PCGS# 41133 Base PCGS# 7103

- 5468** 1880-CC 8 Over Low 7, VAM-6, MS66 PCGS. A Top 100 Variety. The 7 underdigit is obvious within and beneath the second 8 in the date. This minimally toned Premium Gem has a good strike and only minor grazes. Dazzling luster contributes further to the eye appeal. Ex: Houston Signature (Heritage, 11/2012), lot 4152, which realized \$2,585. From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133878 Base PCGS# 7104

- 5469** 1880-CC 8 Over Low 7, VAM-6, MS64 Deep Mirror Prooflike PCGS. CAC. A Top 100 Variety. Ex: Texas Coins. Frosty motifs contrast with glassy mirrored fields. A brilliant and nicely struck Choice Carson City overdated dollar with scattered minor contact. Population: 23 in 64 (1 in 64+) Deep Mirror Prooflike, 8 finer (7/15). PCGS# 41136 Base PCGS# 97105

**1880-CC 8 Over Low 7 Dollar
MS65 Deep Mirror Prooflike**

- 5470** 1880-CC 8 Over Low 7, VAM-6, MS65 Deep Mirror Prooflike PCGS. A Top 100 Variety. The diagnostics listed by www.vamworld.com are clearly displayed on this straw-gold Gem. The 8 repunched over the 7 shows strongly. The mintmark confirms with a dot of metal within each C, and the eagle's left wing shows a bold polishing line through the bottom wing junction. The portrait is unblemished, and the strike is exceptionally bold on Liberty's hair. It will be difficult to improve on this VAM-6 Carson City dollar. Population: 7 in 65 Deep Mirror Prooflike, 1 finer (6/15). PCGS# 41136 Base PCGS# 97105

**1880-CC Dollar, MS66
Dash Beneath Second 8, VAM-7A**

- 5471** 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 PCGS. A Hit List 40 Variety. The remnant of an underlying 7 is seen in the form of a small dash in the field below the second 8 in the date. Clash marks in the field near Liberty's throat identify the VAM-7A variety, a late die state of VAM-7. This piece shows radiant, frosty mint luster and beautifully preserved surfaces. The strike is sharp and the coin is essentially brilliant, providing for excellent visual appeal. Population of all 8/7 Reverse of 1878 varieties: 36 in 66 (6 in 66+), 2 finer (6/15). From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 134049 Base PCGS# 7110

5472 1880-CC 8/7, Reverse of 1878, VAM-7A, MS65 PCGS. A Hit List 40 Variety. The parallel top arrow feather indicates the obsolete Second Reverse subtype, a popular *Guide Book* variety. A diagonal line in the lower loop of the second 8, and a double set of clash marks, confirm the VAM designation. Lustrous and lightly toned with a bold strike and a smooth reverse. PCGS# 134049 Base PCGS# 7110

5473 1880-CC MS65 PCGS. VAM-8. Tiny die chips within both Cs in the mintmark attribute the VAM pairing. The centers are incompletely brought up, but peripheral design elements are well struck. Faint olive-gold toning visits this lustrous and carefully preserved Carson City Gem. NGC ID# 2542, PCGS# 7100

5474 1880-CC MS66 PCGS. VAM-3. A thoroughly lustrous and essentially brilliant high grade Carson City Morgan. The strike shows only minor blending at the centers. VAM-3 is attributed by die crumbling atop the O in DOLLAR.
Ex: Rosemont Central States (Heritage, 4/2011), lot 5627, which realized \$1,955. NGC ID# 2542, PCGS# 7100

5475 1880-CC MS66 PCGS. VAM-3A. A lustrous and lightly toned high grade Carson City Morgan. A whisper of tan toning adorns essentially pristine fields. The portrait shows only trivial contact. A good strike despite minor blending at the centers.
Ex: West Palm Beach FUN Signature (Heritage, 7/2009), lot 832, which realized \$2,070. NGC ID# 2542, PCGS# 7100

**1880-CC Dollar, MS66+
Delicate Gold Patina**

5476 1880-CC MS66+ PCGS. VAM-3. Only a trace of golden toning adorns this lustrous high grade silver dollar. Uncommonly free from contact, and a desirable addition to a Carson City holding. The hair above the ear shows minor inexactness. VAM-3 is among the several 1880-CC die varieties with a "dash" below the second 8 in the date, formerly believed to be the remnant base of an underdigit 7.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2542, PCGS# 7100

**1880-CC VAM-3A Dollar, MS66+
Smooth Cheek, Booming Luster**

5477 1880-CC MS66+ PCGS. CAC. VAM-3A. A wisp of tan toning adorns lustrous and exceptionally smooth surfaces. The centers exhibit moderate merging, although peripheral elements are well struck. The late die stage for VAM-3 shows chips within IN GOD WE TRUST, among other interesting features. A popular low mintage Carson City issue. NGC ID# 2542, PCGS# 7100

5478 1880-CC MS65 Prooflike PCGS. VAM-10. The second 8 has a dash below the lower loop, and a vertical die scratch appears on the upper lip. A thick layer of frost covers the relief elements, producing bold cameo contrast against mirrored fields. Splashes of tan patina are confined to the borders with lighter blushes of champagne-gold centrally. PCGS lists 11 pieces finer (7/15). NGC ID# 2542, PCGS# 7101

5479 1880-O MS64 PCGS. Strong cartwheel luster is among this New Orleans dollar's greatest assets. Hints of toning visit the margins, though the centers are largely silver. Minor softness affects the hair over the ear. NGC ID# 2543, PCGS# 7114

5480 1880-O MS64 PCGS. This near-Gem has largely silver centers with faint gold-gray and golden-brown elements at the margins, most visibly at the bottom of the reverse. A mark between Liberty's eye and nose largely accounts for the grade. PCGS has graded 38 pieces as MS65 or finer (6/15). NGC ID# 2543, PCGS# 7114

**1880-O Silver Dollar, MS64+
Seldom Available Any Finer**

5481 1880-O MS64+ PCGS. CAC. Medium O mintmark. A high-end example for the grade, earning the desirable PCGS Plus designation thanks to its overall quality of strike, vibrant luster, and a noticeable lack of marks. A cloudy gray area between the U and R of PLURIBUS and a small toning spot beneath M of AMERICA are minor but mentioned as the only interruptions to the untuned, silver-white surfaces. NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, MS64+
Elusive Issue in Higher Grades**

5482 1880-O MS64+ PCGS. CAC. Small or Micro O. The 1880-O is an available date in lower grades, but it is quite elusive at the MS65 level, making this high-grade Choice specimen a good balance of quality and value. This coin displays sharply detailed design elements and vibrant mint luster with outstanding eye appeal.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, MS64+
High-Quality Branch Mint Example**

- 5483 1880-O MS64+ PCGS. CAC.** The 1880-O Morgan dollar is seldom encountered in grades above the MS64 level. This high-end Choice specimen exhibits sharply detailed design elements and lightly marked surfaces that radiate vibrant mint luster. Eye appeal is outstanding. PCGS has graded 38 numerically finer examples (7/15). NGC ID# 2543, PCGS# 7114

**1880/79-O Morgan Dollar, MS64+
Lustrous, High-End VAM-4 Overdate**

- 5484 1880/79-O Crossbar, VAM-4, Top 100, MS64+ PCGS.** A Top 100 Variety. Micro O. Pleasing orange, ruby-red, and jade-green toning endows the borders of this lustrous and well preserved overdated New Orleans dollar. The high points are cream-gray. A high-end near-Gem example, seldom seen any finer. Population (for the variety): 10 in 64+, 0 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133880 Base PCGS# 7116

- 5485 1880-O 80/79 Crossbar, VAM-4, MS63 Prooflike PCGS.** A Top 100 Variety. Small or Micro O. The crossbar of an underdigit 7 is obvious within the upper loop of the second 8 in the date. The variety is undesignated on the PCGS insert. This well struck, flashy, and high-end New Orleans dollar is brilliant except for glimpses of orange toning near PLURIBUS and DOLLAR.
From The College Collection, Part Two. PCGS# 41287 Base PCGS# 7117

- 5486 1880-O 8 Over 7 Ear, VAM-6A, MS64 PCGS.** Small or Micro O. The second 8 in the date has a left "ear," the remnant of the left edge of the crossbar of an underdigit 7. A lustrous and lightly toned Choice silver dollar with pleasing surfaces and a crisp strike. PCGS# 133883 Base PCGS# 7114

- 5487 1880-S MS67+ PCGS.** Medium S. A essentially brilliant Superb Gem that boasts a precise strike and booming cartwheel luster. A loupe reveals only trivial imperfections. A high grade silver dollar, ideal for type purposes. NGC ID# 2544, PCGS# 7118

- 5488 1880-S MS67+ PCGS. CAC.** Splendid cartwheel luster and untuned silver-white surfaces send this sharply struck coin to the head of the pack. Liberty's cheek is smooth, rounded, and trouble-free, as is the eagle's breast. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68
Nearly Flawless Preservation**

- 5489 1880-S MS68 PCGS.** Medium S. A needle-sharp, lustrous, and virtually immaculate Morgan type coin. Delicate almond-gold toning evenly adorns both sides. It is remarkable that so many high grade 1880-S dollars have survived, when the coins were presumably bag-stored for many years. During all steps of storage and transportation, both at the Mint and the Treasury, one or more bags must have received an unusual degree of care in handling. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68
Outstanding Type Coin**

- 5490 1880-S MS68 NGC.** Medium S. One expects above-average eye appeal on an 1880-S dollar, and this coin certainly delivers. There is no hint of color, and the mint luster rolls around the coin unimpeded by only trivial surface imperfections. The striking details are complete on both sides.
Ex: West Palm Beach Signature (Heritage, 7/2009), lot 847. NGC ID# 2544, PCGS# 7118

- 5491 1880/9-S VAM-11 MS67 PCGS.** A Hot 50 Variety. Traditionally regarded as an overdate variety, VAM-11 exhibits "the remains of the 9 within the top of the opening of the 0," per VAMworld.com. The present high grade example has only a wisp of golden-gray toning. Lustrous and boldly struck with smooth fields and minor grazes on the portrait.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133988 Base PCGS# 7122

- 5492 1880/9-S VAM-11 MS67 PCGS.** A Hot 50 Variety. The 0 in the date exhibits interesting die fill. The Medium S mintmark is repunched within the loops, and a J-shaped die scratch is present on Liberty's neck. Brilliant and well struck with potent luster and a nearly mark-free obverse.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133988 Base PCGS# 7122

- 5493 1881 MS66 PCGS.** While the 1881 Morgan dollar is an available date in general, Premium Gems such as the present coin are challenging. The coin offered here is sharply struck, with crisp detail on all design elements. The surfaces are untuned and fully lustrous, with spectacular eye appeal. Only nine coins have been certified finer by NGC and PCGS combined (6/15).
Ex: FUN Signature (Heritage, 1/2009), lot 4490.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2546, PCGS# 7124

5494 1881 MS66 PCGS. Although the 1881-S is common in MS66, its Philadelphia counterpart is far scarcer at that level. The 1881 is regularly encountered in Mint State, but usually as MS63 or MS64. The present lightly toned and impressive Premium Gem is nicely struck and exhibits only a few delicate luster grazes. PCGS has graded five numerically finer examples (6/15). NGC ID# 2546, PCGS# 7124

5495 1881-CC MS66 PCGS. Frosty and mostly untoned, this brilliant Premium Gem has faint swirls of blue-tinged toning on the obverse. Boldly detailed and attractive.
Ex: CSNS Signature (Heritage, 4/2012), lot 5497. NGC ID# 2547, PCGS# 7126

5496 1881-CC MS66 PCGS. An impressive example, this lovely Premium Gem is fully brilliant and untuned with exceptional eye appeal. Both sides have satin fields and frosty devices that create light cameo contrast. NGC ID# 2547, PCGS# 7126

5497 1881-CC MS66 PCGS. CAC. Attractive rainbow toning appears across the left obverse field and combines with otherwise brilliant surfaces to create fantastic eye appeal. A sharp strike and frosty mint luster further enhance this Premium Gem Carson City Morgan dollar. NGC ID# 2547, PCGS# 7126

1881-CC Dollar, Superb Gem Exemplary Carson City Type Coin

5498 1881-CC MS67 PCGS. VAM-2. Carson City dollars are often found nicked from decades of storage and transport in canvas bags. Undoubtedly this was a former GSA dollar, but this is one of the nicest we have seen in some time. Both sides are virtually brilliant, and smooth, creamy luster flows over the surfaces uninterrupted by the usual abrasions. Fully struck.
Ex: Rosemont Central States Signature (Heritage, 4/2011), lot 5650.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2547, PCGS# 7126

1881-CC Silver Dollar, MS67 Frosty Mint Luster

5499 1881-CC MS67 PCGS. Ex: Jackson Hole. Vibrant, frosty luster is devoid of distracting abrasions, and only a hint of light golden toning is observed, this primarily around the peripheries. The strike is sharp and the eye appeal is excellent. The 1881-CC Morgan is among the more highly sought-after issues from the GSA sales, although it is not as rare in high grade as the 1879-CC and 1889-CC. PCGS shows only four numerically finer examples (6/15). NGC ID# 2547, PCGS# 7126

1881-CC Morgan, MS67 Semiprooflike and Radiant

5500 1881-CC MS67 NGC. The low mintage of the 1881-CC (296,000 pieces) has long enticed collectors, and although the GSA hoard has ensured reasonable supplies, most are clustered in MS62 to MS66 grades. Superb Gems, such as the present lightly toned and well-struck example, remain very scarce. NGC has certified only four coins above the MS67 level (6/15).
Ex: FUN Signature (Heritage, 7/2009), lot 854. NGC ID# 2547, PCGS# 7126

1881-O Dollar, Untoned MS65+ Rarely Found Finer Than Gem Condition

5501 1881-O MS65+ PCGS. CAC. The surfaces of this Gem New Orleans dollar appear as fresh as the day they were struck. Each side is devoid of toning with vibrant frosty luster throughout — a rare quality for an O-mint coin. The devices are crisply impressed, and Liberty's cheek is clean. Uncirculated 1881-O representatives were distributed en masse through the mid-20th century, yet PCGS has only seen 28 coins rated higher (7/15). NGC ID# 2548, PCGS# 7128

5502 1881-O MS64+ Deep Mirror Prooflike PCGS. The frosty devices show stark contrast against reflective fields that easily fade to black, providing the desired silver-on-black contrast. The untuned surfaces are nicely struck, but the deep contrast is more perceptible on the reverse. Population: 31 in 64+ Deep Mirror Prooflike, 16 finer (7/15). NGC ID# 2548, PCGS# 97129

5503 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. The sharply detailed frosty design elements of this high-end Choice example stand out boldly against the deep prooflike reflectivity of the fields. The surfaces show a few minor contact marks that do little to detract from the outstanding eye appeal. PCGS has graded 16 numerically finer examples (7/15). NGC ID# 2548, PCGS# 97129

5504 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. A high-end Choice example of this popular branch mint issue, with sharply detailed frosty design elements and deeply reflective fields. The surfaces are mostly brilliant but a few hints of greenish-gold toning highlight certain areas. Only a few minor hair lines and contact marks are present. PCGS has graded 16 numerically finer examples (7/15). NGC ID# 2548, PCGS# 97129

5505 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. Reflective silver-white fields contrast against nicely frosted devices on this near-Gem 1881-O Morgan. The strike above Liberty's ear is far above average, and the high points largely free of mentionable marks. Population: 31 in 64+ Deep Mirror Prooflike, 16 finer (7/15). NGC ID# 2548, PCGS# 97129

5506 1881-S MS66 Deep Mirror Prooflike NGC. Well preserved and fully struck, from one of the best-produced issues in the series. Great prooflikeness in the fields and lovely golden-coral peripheral toning ensure the visual allure of this Premium Gem. The '81-S is much less common with Deep Mirror Prooflike surfaces, compared to the ubiquitous non-prooflike pieces. NGC ID# 2549, PCGS# 97131

5507 1882 MS66 PCGS. Over 11.1 million Morgan dollars were struck at the Mint in 1882. Examples are collectible through Premium Gem condition, though they are conditionally scarce at that grade level. Gleaming brilliant surfaces with cartwheel luster show crisp detail centrally. PCGS reports only nine coins finer (7/15). NGC ID# 254A, PCGS# 7132

5508 1882 MS66 PCGS. The silver-white surfaces of this Premium Gem Morgan yield pleasing luster and sharply struck design elements, including the hair over Liberty's ear and the eagle's breast feathers. The few light marks are consistent with the grade designation. PCGS has seen only nine pieces finer (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 254A, PCGS# 7132

5509 1882 MS66 PCGS. Immensely lustrous with a hint of pink as the only color on the otherwise silver-white surfaces. Boldly impressed devices are carefully preserved. PCGS has graded a mere nine finer pieces (6/15). NGC ID# 254A, PCGS# 7132

5510 1882 MS66 ★ NGC. Shades of plum, magenta, and green progress to fiery orange and powder-blue across the obverse from left to right, while the reverse exhibits the same hues intermixed. Booming luster shines through the toning, illuminating pristine surfaces with sharp motifs. NGC reports eight examples finer (7/15). NGC ID# 254A, PCGS# 7132

5511 1882 MS66 PCGS. CAC. An amazing Premium Gem, this conditionally scarce Morgan dollar exhibits medium-intensity gold toning with lovely peripheral iridescence. PCGS has only certified nine finer examples (7/15). NGC ID# 254A, PCGS# 7132

1882 Silver Dollar, Frosty MS66+

5512 1882 MS66+ PCGS. CAC. The focal points of each side are nicely preserved and free of any mentionable marks; in fact, there are few marks of any import appearing on either side, other than a couple of reeding marks and luster grazes in the reverse field, both inside the wreath. The frosty surfaces are untoned and show a high degree of eye appeal. Population: 24 in 66+, 9 finer (7/15). NGC ID# 254A, PCGS# 7132

1882 Morgan Dollar, Untoned MS66 Prooflike

5513 1882 MS66 Prooflike PCGS. Reflective fields and frosted devices receive an emphatic boost from the untoned silver-white surfaces (save for a tiny hint of rim color) on this nicely preserved Premium Gem. Mostly trivial luster grazes rather than mentionable marks account for the high grade and good eye appeal. Population: 2 in 66 Prooflike, 0 finer (7/15). NGC ID# 254B, PCGS# 7133

5514 1882-CC MS66+ NGC. Soft aqua-blue, lavender, and orange-gold patination runs over the obverse of this high-end Premium Gem Morgan dollar, while the reverse is untoned. Lustrous surfaces are devoid of mentionable marks and exhibit well-struck design features. The 1882-CC is plentiful in Premium Gem but becomes elusive in higher grades. NGC ID# 254B, PCGS# 7134

1882-CC Morgan, Frosty MS67

5515 1882-CC MS67 PCGS. The 1882-CC and 1883-CC Morgan dollar issues were the most prevalent among the millions of coins released from Treasury hoards during the 1960s and 1970s, but most of those coins were around MS62-MS62 quality. Few can compare with this gleaming Superb Gem, an untuned silver example with thick mint frost and great cartwheel luster. Population: 72 in 67 (2 in 67+), 1 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 254B, PCGS# 7134

1882-CC Dollar, MS67 Prooflike None Finer in Prooflike

5516 1882-CC MS67 Prooflike NGC. Available in the absolute sense, the 1882-CC Morgan dollar is conditionally scarce in the finer Prooflike grades. This piece is tied for the finest at NGC in this category. Both sides yield sharp, frosty design elements and brilliant, gleaming fields. There are no distracting abrasions and the eye appeal is heightened by modest cameo contrast. Census: 4 in 67 (1 in 67 ★) Prooflike, 0 finer (6/15). NGC ID# 254B, PCGS# 7135

**1882-O Dollar, Radiant MS66
Extraordinary New Orleans Example**

- 5517 1882-O MS66 PCGS.** The 1882-O usually comes softly struck with dull, lackluster surfaces, but this extraordinary Premium Gem is atypical in those respects. In fact, locating a better-struck example will require patience. Liberty's hair, the eagle's feathers, and even the talons are sharply detailed. Each side has vibrant mint frost and a notable lack of marks, even for the high grade. Rarely seen as fine, and out of reach for all but the most well-heeled specialists in higher grades. Population: 43 in 66 (3 in 66+), 6 finer (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 254C, PCGS# 7136

**1882-O Dollar, MS65 Deep Mirror Prooflike
Conditionally Rare**

- 5518 1882-O MS65 Deep Mirror Prooflike PCGS.** Deep Mirror Prooflike examples of the 1882-O Morgan dollar are usually available, but only in MS64 and lower grades. At the Gem level, such coins are rare. This piece is brilliant, with modest cameo contrast imparted by frosty motifs and highly reflective fields. The strike is above-average for the issue and there are only a few minor marks in the delicate mirrors. Population: 20 in 65 Deep Mirror Prooflike, 1 finer (7/15). NGC ID# 254C, PCGS# 97137

**1882-O/S Dollar, MS64+
VAM-4 Strong, Top 100 Variety**

- 5519 1882-O/S Recessed, Strong, VAM-4, MS64+ PCGS.** A Top 100 Variety. The O/S mintmark comes in three different VAM varieties with Early Die State and Late Die States that often confuse the collector. The fact that the EDS variants are less prominent than the LDS overmintmarks can be equally confounding. This example is a Late Die State (called "Strong" by PCGS) of the VAM-4 variety. Untoned and razor-sharp, silver luster flows across the smooth, minimally marked surfaces. Among the finest known of this Guide Book type. Population: 59 in 64+, 0 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
PCGS# 133891 Base PCGS# 7138

- 5520 1883 MS67 PCGS.** The 1883 Morgan dollar is scarce at the Superb Gem level, despite the lofty mintage of more than 12 million pieces. The present lightly toned coin is sharply detailed and boasts dynamic cartwheel luster. The devices exhibit distributed die rust, as seen on many 1883-dated silver dollars. Housed in a green label holder.
Ex: Rosemont Central States Signature (Heritage, 4/2011), lot 5674, which realized \$2,300.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 254G, PCGS# 7142

- 5521 1883 MS67 PCGS.** Fresh, original surfaces boast a clean cheek on Liberty and unperturbed texture throughout both sides. An untuned silver-white Superb Gem, this piece sports thick mint frost on the devices and great cartwheel luster. NGC ID# 254G, PCGS# 7142

**1883 Morgan Dollar, MS67+
Only Three Finer Coins at PCGS**

- 5522 1883 MS67+ PCGS. CAC.** A high-end Superb Gem example of this popular Morgan dollar issue, with well-detailed design elements and virtually pristine surfaces that radiate vibrant mint luster on both sides. Delicate hints of pink toning visit the centers, with a vivid ring of sea-green and violet at the rims. Eye appeal is extraordinary. PCGS has graded three numerically finer examples (7/15). NGC ID# 254G, PCGS# 7142

**1883-CC Dollar, MS67
Conditionally Rare**

- 5523 1883-CC MS67 PCGS. VAM-5A.** The N in IN is strongly clashed in front of Liberty's neck. A virtually brilliant Superb Gem that has a good strike, potent luster, and exceptionally clean surfaces. The 1883-CC emerged in quantity from the GSA auctions but rarely in the present magnificent quality.
Ex: New York Signature (Heritage, 12/2011), lot 3964, which realized \$3,239.55.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 254H, PCGS# 7144

**1883-CC Silver Dollar, MS67
Exceptional Quality**

5524 1883-CC MS67 PCGS. For the branch mint type collector or the enthusiast assembling a Carson City short set, this 1883-CC Morgan is rivaled by few others for visual and technical merit. Vibrant, frosty luster is seemingly devoid of abrasions and grants just a hint of light golden color around the extreme outer peripheries. PCGS awards a finer numeric grade to just five pieces (6/15). NGC ID# 254H, PCGS# 7144

5525 1883-CC MS66 Prooflike PCGS. VAM-5. Dazzling luster and a powerful strike only begin to describe the desirable attributes of this high grade CC-mint dollar. The fields are unabraded, and the eye appeal is exemplary. NGC ID# 254H, PCGS# 7145

5526 1883-CC MS66 Prooflike NGC. CAC. Impressive field reflectivity accompanies frosty devices. Highly lustrous and nearly brilliant with minimal marks and minor inexactness of strike at the centers. Census: 76 in 66 (1 in 66+ Prooflike, 1 in 66 ★). Ex: *Summer FUN Signature (Heritage, 7/2009)*, lot 869. NGC ID# 254H, PCGS# 7145

**1883-CC VAM-5 Silver Dollar
MS66 Deep Mirror Prooflike**

5527 1883-CC MS66 Deep Mirror Prooflike PCGS. VAM-5. A brilliant Premium Gem with frosty motifs and flashy fields. A well preserved Carson City type coin that will impress even the jaded specialist. Nearly unobtainable any finer in Deep Mirror format. VAM-5 has a die scratch on the eagle's right wing but lacks the various clashes and breaks of later die states. NGC ID# 254H, PCGS# 97145

1883-O Silver Dollar, Untoned MS67

5528 1883-O MS67 PCGS. Flowing luster runs over each side of this untuned and pristine Superb Gem 1883-O Morgan dollar, an available issue in lower grades but a conditional rarity at the MS67 grade level. Liberty's cheek and the reverse high points are abrasion-free, and ample eye appeal prevails throughout both sides. Population: 47 in 67 (1 in 67+), 0 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 254J, PCGS# 7146

5529 1883-S MS61 NGC. Lively, thickly frosted mint luster glistens over brilliant surfaces that show a number of small abrasions peppered over each side. While previous San Francisco Morgan dollar issues remained largely in storage, the 1883-S circulated widely. Mint condition examples survive mostly in lower Uncirculated grades. NGC ID# 254K, PCGS# 7148

5530 1883-S MS61 PCGS. The untuned surfaces show generous cartwheel luster and considerable field-device contrast only on the reverse, but the grade is limited by quite a few small and a couple of large abrasions, most notably a curving scrape through Liberty's cheek, jawline, and neck. A better date, and certified in a green-label holder. NGC ID# 254K, PCGS# 7148

5531 1883-S MS63 NGC. The 1883-S (6.2 million coins minted) often comes sharply struck, though bagmarks tend to be problematic from improper handling. This Select piece is typical with respect to its strike, but abrasions are minimally scattered. Radiant mint frost combines with fully brilliant surfaces, furthering the appeal. NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, Brilliant MS64
Rarely Encountered Finer**

5532 1883-S MS64 PCGS. Radiant mint frost cartwheels over surfaces that feature well-defined motifs with blending over Liberty's ear, as usual. Grade-limiting marks appear throughout this brilliant near-Gem. The 1883-S was distributed for circulation in large quantities, unlike the S-mint issues before it. Mint State survivors are generally found heavily bagmarked, suggesting improper handling while in storage. Just 18 submissions are reported finer at PCGS (7/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 254K, PCGS# 7148

**1883-S Silver Dollar, Vibrant MS64
In an Old Green Holder**

- 5533 1883-S MS64 PCGS. CAC.** This incredible 1883-S Morgan is arguably one of the most eye-appealing examples known in the MS64 grade level. The frosty surfaces produce an exceptional cartwheel effect with even the slightest tilt to the coin. The strike is sharp and abrasions are pleasantly few. CAC-endorsed in an old green label holder. PCGS has seen 18 Gem or finer representatives (7/15). NGC ID# 254K, PCGS# 7148

**1883-S Silver Dollar, MS64+
Eye-Catching Radiance**

- 5534 1883-S MS64+ PCGS. CAC.** Although just shy of an MS65 grade, this 1883-S Morgan exhibits a degree of eye appeal that easily matches its more expensive Gem counterparts. In addition to a bold strike and a lack of major abrasions, the gold-tinted surfaces radiate intense mint bloom with a semiprooflike glint in the fields. PCGS lists only 18 finer coins (7/15). NGC ID# 254K, PCGS# 7148

**1883-S Morgan, MS63 Prooflike
Bold Cameo**

- 5535 1883-S MS63 Prooflike PCGS. CAC.** The 1883-S is one of the rarest dates in the Morgan dollar series in Prooflike grades. PCGS lists only 23 examples in this category, and just two Deep Mirror Prooflike examples. The present coin is arguably a bold Deep Mirror Prooflike cameo on the obverse, but the reverse fields are not quite as reflective, and thus the Prooflike designation. The strike is sharp and the motifs are heavily frosted. Scattered abrasions limit the grade. Population: 8 in 63 Prooflike, 3 finer (6/15). NGC ID# 254K, PCGS# 7149

1884 Morgan, Impeccable MS67

- 5536 1884 MS67 PCGS.** Impeccable surface preservation and generous luster on untuned silver-white surfaces are the hallmarks of this splendid Superb Gem 1884 Morgan dollar. Despite the prodigious mintage exceeding 14 million coins, PCGS reports only 48 in this grade level (including seven in 67+) and only three finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 254L, PCGS# 7150

**1884 Silver Dollar, MS67
Vibrantly Lustrous**

- 5537 1884 MS67 NGC.** A conditionally rare Superb Gem example of this otherwise available Philadelphia issue. This brilliant Morgan dollar exhibits bold design definition which is accentuated by subtle semiprooflike reflectivity in the fields. Both sides are seemingly pristine, delivering the strong eye appeal expected for the grade. Census: 36 in 67 (3 in 67 ★), 2 finer (7/15). NGC ID# 254L, PCGS# 7150

**1884-CC Morgan, MS67
Vibrant, Frosty Surfaces**

- 5538 1884-CC MS67 PCGS. VAM-4A.** Spiked Date, Pinned Wing Gouge. Most 1884-CC dollars never circulated, but gathered dust in the Treasury vaults until the GSA distributions in the 1970s. Almost 85% of the mintage reached collector's hands (almost 1 million coins) — all in Brilliant Uncirculated condition. Even so, Superb Gems are rare. This frosty, silver-white coin is fully struck and lustrous with essentially mark-free fields and devices. PCGS has seen just three numerically finer examples (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 254M, PCGS# 7152

1884-CC Morgan, MS67
Extremely Rare Finer

5539 1884-CC MS67 NGC. NGC and PCGS have certified a voluminous amount of 1884-CC dollars, particularly through the MS65 level. Premium Gems are generally available with a little patience and searching, but MS67 examples are elusive. Dazzling luster rests on the well-preserved surfaces of this gorgeous Superb Gem, and all of the design elements are well brought up, as is usually the case. Nearly untoned, save for some faint light gray streaks on the upper reverse. Only a single coin is numerically finer at NGC (6/15). NGC ID# 254M, PCGS# 7152

5540 1884-CC MS66 Prooflike PCGS. VAM-2. Certified in an old green label holder. Both the date and mintmark are lightly repunched. Blushes of lemon-gold toning grace the obverse of this thoroughly lustrous, fully struck, and beautiful Carson City type coin. Contact is confined to Liberty's chin and the field near the profile. NGC ID# 254M, PCGS# 7153

5541 1884-CC MS65 Deep Mirror Prooflike NGC. VAM-4. VAM-4 shows a vertical spike from the top of the 1 in the date, and die gouges through the E in STATES. The present Carson City dollar is a business strike but closely resembles a proof, since the motifs are thickly frosted and contrast with glassy fields. The borders display hints of pumpkin-gold toning. NGC ID# 254M, PCGS# 97153

5542 1884-CC MS66 Deep Mirror Prooflike PCGS. This spectacular Premium Gem displays razor-sharp definition on all design elements and the deeply reflective fields contrast boldly with the frosty devices. The brilliant surfaces are well-preserved and eye appeal is terrific. PCGS has graded three numerically finer examples (7/15). NGC ID# 254M, PCGS# 97153

5543 1884-O MS67 PCGS. Ex: The Shrike Set. A narrow arc of golden patina graces the upper reverse margin of this otherwise brilliant New Orleans dollar. Pristine aside from a brief line behind Liberty's mouth.

Ex: Karschner Collection of Morgan Dollars (Heritage, 1/2011), lot 5942, which realized \$2,530.

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 254N, PCGS# 7154

5544 1884-O MS67 NGC. The untuned silver-gray surfaces show soft luster and no mentionable marks, with the strike on the high points typical of this O-mint issue. Virtually unobtainable finer. NGC ID# 254N, PCGS# 7154

5545 1884-S AU58 PCGS. Radiant silver-gray surfaces retain considerable luster. Though both sides show scattered reed marks, evidence of actual wear is scant. An important coin for collectors who would find a Mint State example out of reach. NGC ID# 254P, PCGS# 7156

5546 1884-S AU58 NGC. Great cartwheel luster and gold-tipped surfaces create great eye appeal on this better-date Morgan dollar, showing minimal wear and only trivial marks consistent with the grade. An extremely appealing coin. NGC ID# 254P, PCGS# 7156

5547 1884-S AU58 PCGS. A light wash of golden patina enlivens the otherwise-untuned surfaces on this lustrous Borderline Uncirculated better-date Morgan. A loupe shows scattered minor abrasions, but all but a couple are unseen with the unaided eye, and none are overt. NGC ID# 254P, PCGS# 7156

5548 1884-S AU58 PCGS. Just a whisper of high-point rub and minor luster thinning in the fields indicates the slight wear. One large nick shows on Liberty's jawline. Generous luster remains on both sides of this better-date dollar. NGC ID# 254P, PCGS# 7156

5549 1884-S AU58 PCGS. CAC. The reverse is largely untuned while the obverse shows a moderate golden cast. A couple of noticeable marks show at Liberty's mouth, neck, and ear, but the surfaces otherwise exhibit just a whisper of high-point wear consistent with the grade. Intense luster is a plus.

From The College Collection, Part Two. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, MS61
Better Date in Mint State

5550 1884-S MS61 NGC. The 1884-S Morgan dollar is definitely a better date in high grade. Most of the reported mintage of 3.2 million pieces was released into circulation in the 19th century, so circulated examples are not difficult to locate, but Mint State pieces are elusive. This pleasing MS61 example offers well-detailed design elements and lustrous surfaces with hints of champagne-gold and lavender toning and a scattering of minor contact marks. NGC ID# 254P, PCGS# 7156

5551 1885 MS67 PCGS. A delightful Superb Gem Morgan dollar, with sharply detailed design elements and impeccably preserved brilliant surfaces. PCGS has graded two numerically finer examples (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 254R, PCGS# 7158

1885 Dollar, MS67 Deep Mirror Prooflike
Stark Cameo Contrast

5552 1885 MS67 Deep Mirror Prooflike NGC. The 1885 is a collectible Morgan dollar issue in Deep Mirror Prooflike grades, but coins in this category become extremely rare at the Superb Gem level. This cameoed example shows just a hint of light golden toning which accentuates the contrast. The motifs are sharp and frosted, while the fields show deep reflectivity. Devoid of mentionable imperfections. Census: 5 in 67 Deep Mirror Prooflike, 1 finer (6/15). NGC ID# 254R, PCGS# 97159

5553 1885-CC MS66 NGC. Tens of thousands of 1885-CC dollars were distributed through the 1960s and 1970s, and the availability of coins in MS66 makes this low-mintage issue ideal for type purposes. This lovely example shows parallel striae from the draw bench across the colorfully toned obverse. The reverse is thickly frosted with a band of color along the left border. NGC ID# 254S, PCGS# 7160

5554 1885-CC MS66 PCGS. The draw of the CC mintmark and low 228,000-coin mintage places ever-strong demand on the 1885-CC, but the Treasury release of the 1960s and 1970s ensures an adequate supply of high-grade survivors. The obverse is richly toned in blended rainbow iridescence, while the reverse is frosty and brilliant. Razor-sharp and unabraded. NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS66+
Few Known Finer**

5555 1885-CC MS66+ PCGS. CAC. This Carson City issue had a limited mintage of only 228,000 coins, but nearly 65 percent of these survived in Treasury vaults and were dispersed to collectors in the GSA sales of the early 1970s. This Plus-designated Superb Gem is second to few, showing crisp detail illuminated by vibrant, frosty luster. Essentially untuned and beautifully preserved. NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS66+
Intense Cartwheel Effect**

5556 1885-CC MS66+ PCGS. CAC. A few hair-thin wisps on Liberty's cheek appear to be all that kept this beautiful 1885-CC Morgan dollar from a full Superb Gem grade. The strike is well-executed, save for a touch of softness on the hair above Liberty's ear, and the surfaces show intense, frosty mint luster. Traces of light golden toning reside around the extreme outer peripheries. NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS67
Exuberant Luster**

5557 1885-CC MS67 PCGS. The exuberant, all-encompassing mint luster this popular Carson City date is well-known for covers both sides of this untuned silver-white Superb Gem example. The surfaces throughout and Liberty's cheek in particular are free of even the most picayune marks. Some unstruck roller marks do show in the hair above the ear and lightly on the cheek, but they are non-grade-affecting. A great example of this Treasury hoard date, difficult to find in *circulated* grades. Population: 68 in 67 (1 in 67+), 1 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS67
Conditionally Scarce**

5558 1885-CC MS67 NGC. Due to its small 228,000-coin mintage, the 1885-CC is a favorite date in the series. Superb Gem examples are infrequently seen, and only a handful grade finer than the present coin. This piece is boldly struck and vibrant with frosty gold-tinted luster. There are no abrasions of note. Census: 86 in 67 (5 in 67 ★), 5 finer (6/15). NGC ID# 254S, PCGS# 7160

5559 1885-CC MS65 Prooflike PCGS. This sharply struck and low mintage Carson City dollar displays delicate golden patina. The fields are unabraded and the cheek exhibits only minor contact. Housed in a green label holder. NGC ID# 254S, PCGS# 7161

**1885-CC Morgan Dollar, Prooflike
Brilliant-White Premium Gem**

5560 1885-CC MS66 Prooflike PCGS. Markedly prooflike fields surround the nicely frosted devices of this brilliant-white Premium Gem dollar. Liberty's cheek is clean, and the obverse shows just one or two minor field abrasions. The reverse is equally reflective, where the sole mark is a scuff beneath the eagle's left wing. Sharply struck throughout. Population: 48 in 66 (4 in 66+) Prooflike, 2 finer (6/15). NGC ID# 254S, PCGS# 7161

1885-CC Dollar, MS66 Prooflike
Pristine Fields

- 5561 1885-CC MS66 Prooflike PCGS.** A brilliant and flashy representative of this popular and low mintage Carson City issue. The fields appear pristine and the portrait exhibits only delicate contact. Housed in an old green label holder. Population: 48 in 66 (4 in 66+) Prooflike, 2 finer (6/15).
Ex: Long Beach Signature (Heritage, 6/2010), lot 1108, which realized \$3,220. NGC ID# 254S, PCGS# 7161

1885-CC Dollar, MS66 Prooflike
Elusive in This Condition

- 5562 1885-CC MS66 Prooflike PCGS. CAC.** The 1885-CC Morgan is readily available in mint condition through Premium Gem. Indeed, the population reports show tens of thousands through this level of preservation. Prooflike specimens are another matter. PCGS reports 49 examples in MS66 Prooflike and a mere two examples finer (7/15).

The silver-gray surfaces of the current offering exhibit strong definition, including the hair over Liberty's ear (despite roller marks in this area) and the feathers on the eagle's breast. Both sides are well-preserved. NGC ID# 254S, PCGS# 7161

1885-CC Morgan, MS66 Deep Mirror Prooflike
Stark Cameo Contrast

- 5563 1885-CC MS66 Deep Mirror Prooflike PCGS.** The story of the 1885-CC is a small mintage but large survival, due to preservation of massive amounts in the Treasury hoards. But its story continues as a much in-demand CC-mint issue, and one that is gloriously well-produced, making it equally a target of type and date collectors. This Premium Gem piece sports the excellent preservation and deep contrast expected. The paucity of abrasions and high eye appeal add to the allure. Population: 46 in 66 (5 in 66+) Deep Mirror Prooflike, 2 finer (6/15).
Ex: ANA Signature (Heritage, 3/2010), lot 1440; Long Beach Signature (Heritage, 6/2010), lot 1109. NGC ID# 254S, PCGS# 97161

1885-CC Silver Dollar, MS66
Contrasted Deep Mirror Prooflike Example

- 5564 1885-CC MS66 Deep Mirror Prooflike PCGS Secure.** The 1885-CC Morgan is a favorite issue in the Carson City short set, and is most highly sought-after in the upper range of the Deep Mirror Prooflike category. This Premium Gem example displays full cameo contrast with a blush of light golden toning around the peripheries in the central reverse. The strike is bold and the eye appeal is excellent. Population: 46 in 66 (5 in 66+) Deep Mirror Prooflike, 2 finer (7/15). NGC ID# 254S, PCGS# 97161

- 5565 1885-O MS67 PCGS.** Bowers writes that "1885-O dollars were among the bonanza delights of the 1962 through 1964 Treasury releases." Although examples are collectible through MS67, few coins are as sharp as this piece. Entirely brilliant with scintillating luster. PCGS reports a single submission finer (7/15). NGC ID# 254T, PCGS# 7162

- 5566 1885-O MS67 PCGS. CAC.** A coin with strong visual appeal, this Superb Gem boasts lovely silver-white color, frosty luster, and few marks, all of them minuscule. The piece exhibits a sharp strike, even at the centers. PCGS has graded a single example in higher numeric grade (7/15). NGC ID# 254T, PCGS# 7162

- 5567 1885-O MS67 PCGS. CAC.** An untuned Superb Gem with CAC approval, this untuned coin boasts a clean cheek on Liberty, satiny surfaces, and excellent preservation. The strike is sharp, far better than usually seen. A common issue, but Superb Gems are among the finest available — fewer than a dozen at PCGS and NGC combined make the cut for MS68 (7/15). NGC ID# 254T, PCGS# 7162

- 5568 1885-O MS67 PCGS Secure. CAC.** Strong luster issues from the untuned surfaces of this Superb Gem. The design elements are well-impressed, including partial detail in the hair over Liberty's ear. Both sides have been well-cared for. The 1885-O, from a mintage exceeding 9 million pieces, is conditionally rare above MS67. Indeed, PCGS has seen a solitary example finer (7/15)!
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 254T, PCGS# 7162

- 5569 1885-O MS66 Deep Mirror Prooflike NGC.** A brilliant and brightly mirrored New Orleans silver dollar. The strike is intricate and the eye appeal is pleasing. A lens reveals scattered tiny strike-throughs and incidental marks. Census: 22 in 66 Deep Mirror Prooflike, 1 finer (7/15).
Ex: New York Signature (Heritage, 7/2002), lot 6894; Rosemont Central States (Heritage, 4/2008), lot 2718. NGC ID# 254T, PCGS# 97163

- 5570 1885-S MS65 PCGS.** This attractive Gem Morgan dollar exhibits sharply detailed design elements and well-preserved lustrous surfaces with a few delicate hints of golden-tan toning. PCGS has graded 43 numerically finer examples (7/15). NGC ID# 254U, PCGS# 7164

- 5571 1885-S MS65+ PCGS. CAC.** This frosty, untuned Gem displays well-preserved surfaces with minimal marks and outstanding eye appeal. The 1885-S usually has below-average sharpness, but this piece is an exception. Only a touch of softness is noted at the extreme centers. The 1.5 million-coin mintage is low within the context of the series, and finer examples are rare. NGC ID# 254U, PCGS# 7164

**1885-S Silver Dollar, Pastel-Toned MS66
Well-Preserved and Lustrous**

- 5572 1885-S MS66 PCGS.** Softly glowing luster emanates from beneath a light layer of multicolor pastel patina on each side of this well-preserved Premium Gem 1885-S dollar. Pale rose predominates against mint and lilac hues. Liberty's cheek and the eagle's breast are free of major marks, although a small quadruplet of reeding marks shows under the eagle's left (facing) wing. Gems of this issue are available in the hundreds at PCGS, but Premium Gems are another matter entirely. Population: 41 in 66 (1 in 66+), 2 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 254U, PCGS# 7164

**1885-S Dollar, MS66
Old Green Holder**

- 5573 1885-S MS66 PCGS.** Most Mint State 1885-S Morgans seen grade only in the MS62 to MS64 range; the certified population declines significantly in MS65 and anything finer is rare. This Premium Gem example displays a bold strike and frosty, radiant luster. Hints of gold toning appear around the extreme outer peripheries. Housed in an old green label holder. Population: 41 in 66 (1 in 66+), 2 finer (6/15). NGC ID# 254U, PCGS# 7164

- 5574 1886 MS67 PCGS. CAC.** The 1886 Morgan dollar, approaching a mintage of 20 million pieces, can be located in MS67 with a degree of searching. Higher-grade specimens, however, are significant condition rarities. The untuned obverse cedes to russet, greenish-blue, and orange toning on the reverse. Well-struck design elements include a good amount of detail in the hair over Liberty's ear. Lustrous surfaces have been well-cared for. PCGS has graded six examples finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 254V, PCGS# 7166

- 5575 1886-O MS62 PCGS.** Pale silver-blue overall with a few dots of intense orange-to-rose color. Despite an eight-figure mintage the 1886-O dollar poses a surprising challenge in Mint State. NGC ID# 254W, PCGS# 7168

- 5576 1886-O MS62 NGC.** Well-struck overall, if soft in the usual trouble-spots, with bright silver luster. Though moderately abraded on the portrait, this coin has considerable eye appeal for the MS62 grade. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63
Frosty, Silver-White Surfaces**

- 5577 1886-O MS63 PCGS.** Brief silver-gray accents and a fleeting glimpse of gold in Liberty's hair add natural appeal to the otherwise frosty, silver-white surfaces of this conditionally scarce New Orleans dollar. Slight weakness above the ear and at the eagle's talons are normal for the issue, offset by fewer marks and abrasions than expected for the Select Uncirculated grade. NGC ID# 254W, PCGS# 7168

**1886-O Morgan Dollar, MS64
Vibrant Luster on This Condition Rarity**

- 5578 1886-O MS64 PCGS.** The 1886-O is famous for its status as the rarest Morgan dollar issue in Gem condition, though VF and XF examples are plentiful, and even AU coins are readily available. The present silver-gray near-Gem boasts vibrant luster on silver-white surfaces that are untuned, save for a mere hint of gold. The strike is above-average for the New Orleans Mint. The reverse is well-preserved, and the obverse displays only wispy grazes. PCGS reports three submissions in Gem or higher grades (5/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 254W, PCGS# 7168

**1886-O Morgan, MS64
None Finer at NGC**

- 5579 1886-O MS64 NGC.** The 1886-O Morgan is only marginally scarce in Choice condition, but the extreme rarity of finer examples makes this MS64 coin among the finest most collectors will be able to acquire. Satiny luster is golden-toned in the margins and exhibits only a few light abrasions. Trivial striking softness is seen on the eagle's breast and the hair above Liberty's ear. None are finer at NGC (6/15). NGC ID# 254W, PCGS# 7168

- 5580 1886-O Clashed E, VAM-1A2, AU58 PCGS.** A Top 100 Variety. The E in LIBERTY is strongly clashed northwest of the wreath bow. The strongest such clash of the Morgan dollar series. This lustrous and lightly toned near-Mint example has a double clash, intermediate between the single-clash (VAM-1A1) and seven-clash (also VAM-1A2) die states. The lower cheek has a strike-through and a small spot is noted above the cheek. PCGS# 133905 Base PCGS# 7168

**1886-S Silver Dollar, MS66
Conditionally Rare This Nice**

- 5581 1886-S MS66 PCGS Secure.** Given the legions of Morgan dollar collectors, it is time to sit up and take serious note of any coin with a PCGS population of fewer than 50 coins in MS66 or finer. The 1886-S qualifies for such a distinction. This blaze-white example is brilliant and untuned, with flashy cartwheel luster over semiprooflike fields and a far sharper strike than usually seen on the motifs. A mere half dozen coins are certified numerically finer by both services combined. PCGS Population: 45 in 66 (2 in 66+), 4 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 254X, PCGS# 7170

**1886-S/S Morgan Dollar, MS65
Repunched Mintmark, Top 100 Variety**

- 5582 1886-S/S VAM-2, Top 100, MS65 PCGS. CAC.** A Top 100 Variety. A portion of the underlying S is apparent in front of the upper serif of the repunched S mintmark. This Gem is all-brilliant aside from golden toning along the left obverse and reverse borders. Each side features crisply rendered devices, and marks are minimal even for this impressive grade. Population: 15 in 65, 1 finer (7/15). PCGS# 133906 Base PCGS# 7170

- 5583 1887 MS67 PCGS.** The silver-white, lustrous surfaces of this Superb Gem display a swath of gold toning around the lower obverse margin. The design elements exhibit a better strike than usually encountered on this issue. Specifically, relatively strong detail is apparent in the hair over Liberty's ear and on the eagle's breast feathers. Both sides are well-preserved. PCGS and NGC have graded only four examples finer (7/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 254Y, PCGS# 7172

- 5584 1887 Partial E Reverse, VAM-1B, AU50 PCGS.** A Hot 50 Variety. The clashed reverse die shows a partial E below the left tailfeathers. The acquisition of a Partial E Reverse dollar is "considered a landmark event by most variety specialists," per VAMWorld.com. This lightly circulated example has light golden-gray patina over each side and minimally scattered abrasions. PCGS# 134003 Base PCGS# 7172

**1887/6 Overdate Morgan Dollar, MS65+
VAM-2, Conditionally Rare**

- 5585 1887/6 VAM-2, Top 100, MS65+ PCGS. CAC.** A Top 100 Variety. This recognized *Guide Book* variety never fails to attract collector interest as one of the VAM varieties that has become "mainstream" in most dollar collections. The current high-end Gem shows hints of gold toning near the rims and across the eagle, but for all purposes the coin is silver-white, frosty, and attractive. The underdigit six is clearly visible curving upward from the bottom stand of the primary 7. Sharply struck everywhere except at the talons and arrow fletchings, which are slightly weak. Population: 13 in 65+, 12 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. PCGS# 133908 Base PCGS# 7174

**1887 Morgan Dollar, MS63
VAM-25A, 'Donkey Tail'**

- 5586 1887 Donkey Tail, VAM-25A, MS63 PCGS.** A Top 100 Variety. The so-called "Donkey Tail" VAM shows a large die chip protruding from the lower-right corner of the D in DOLLAR. VAM-25A and VAM-1A are both designations of this same die pairing. This variety is most frequently seen in VF or XF grades; VAMWorld.com calls this variety "ultra rare" in Mint State. This MS63 example shows satiny luster with traces of gold throughout. Abrasions are minimal, but noticeable striking deficiency is evident on the eagle's breast and the hair above Liberty's ear. Population: 2 in 63, 0 finer (7/15). PCGS# 133907 Base PCGS# 7172

- 5587 1887/6-O VAM-3 MS63 PCGS. CAC.** A Top 100 Variety. A satiny, untuned Select example of this popular overdate variety, showing good eye appeal with nice luster and scattered, minimal marks for the grade. This strike is fairly flat through the central high points. PCGS# 133912 Base PCGS# 7178

1887/6-O Dollar, MS64
Popular New Orleans Overdate

5588 1887/6-O VAM-3 MS64 PCGS. A Top 100 Variety. The curve of the base of an underdigit 6 extends from the southeast corner of the 7. A lightly toned and lustrous near-Gem that lacks any mentionable marks. The hair above the ear and the eagle's breast show blending customary for New Orleans silver dollar issues. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. PCGS# 133912 Base PCGS# 7178

5589 1887-O MS65 PCGS. Reddish-gold toning clings to the margins of this highly lustrous Morgan Gem. A modicum of detail occurs in the hair above Liberty's ear and on the eagle's breast feathers. Well-preserved surfaces contribute to the coin's pleasing eye appeal. PCGS has certified only 10 examples finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2552, PCGS# 7176

5590 1887-O MS64 Deep Mirror Prooflike PCGS. CAC. Dazzling luster and a hint of gold toning confirm the originality of this nicely struck and lightly abraded near-Gem. Housed in a first generation holder. Ex: Ft. Lauderdale FUN Signature (Heritage, 1/2005), lot 11395. From *The College Collection, Part Two*. NGC ID# 2552, PCGS# 97177

5591 1887-S MS65 PCGS. This attractive Gem Morgan dollar exhibits well-detailed design elements, with just a trace of the usual softness on the hair strands above Liberty's ear. Vibrant mint luster shines through delicate shades of pale gold toning and eye appeal is outstanding. NGC ID# 2554, PCGS# 7180

5592 1887-S MS65 PCGS. A Gem that must be seen to be believed, the obverse features a panoply of electric-blue, purple, jade-green, and olive tones. Similar hues drape the reverse, though the patina is lighter and allows vibrant mint luster to percolate through. Well-struck and immensely appealing. This is an essential coin for the toning enthusiast. NGC ID# 2554, PCGS# 7180

1887-S Silver Dollar, Untoned MS66

5593 1887-S MS66 PCGS. Somewhat elusive but obtainable even in Gem grade, the 1887-S Morgan dollar shows a population of only 27 in the MS66 grade of the present piece (one MS66+, with a single MS67 finer (6/15)). The frosty surfaces show excellent preservation and a bold strike with nary a mentionable mark. A small planchet flaw shows on Liberty's neck. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2554, PCGS# 7180

5594 1888 MS66+ PCGS. CAC. Flashy mint brilliance and lively cartwheel luster are the defining features of this Plus-designated Premium Gem with CAC endorsement. Minor grazes barely prevent a Superb Gem assessment. Despite a mintage of 19.1 million coins, PCGS shows just 31 pieces in MS67 (6/15). NGC ID# 2555, PCGS# 7182

1888 Silver Dollar, MS67
None Finer at PCGS

5595 1888 MS67 PCGS. The 1888 Morgan silver dollar is readily available in grades through MS66, but at MS67, the certified population thins considerably. The present Superb Gem displays bold definition on the relief elements and virtually flawless fields. Both sides are set aglow by frosty, near-brilliant luster that shows just hints of light golden toning around the extreme outer peripheries. Population: 31 in 67, 0 finer (7/15). NGC ID# 2555, PCGS# 7182

1888 Morgan Dollar, Top-Grade MS67

5596 1888 MS67 PCGS. From a huge mintage of more than 19 million pieces, the 1888 Morgan dollar is a plentiful issue in lower grades, but Superb Gems are very scarce, and finer specimens are virtually unobtainable. This magnificent example is sharply detailed throughout, showing vibrant mint luster and brilliant unmarked surfaces. Population: 31 in 67, 0 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2555, PCGS# 7182

5597 1888 MS66 Prooflike PCGS. The well-preserved surfaces of this delightful Premium Gem show a few traces of golden-tan toning, with mirrored prooflike reflectivity in the fields. The design elements are sharply detailed and eye appeal is terrific. Population: 13 in 66 (1 in 66+) Prooflike, 0 finer (7/15). NGC ID# 2555, PCGS# 7183

5598 1888-O MS66 PCGS. The well-preserved surfaces of this delightful Premium Gem are brightly lustrous, with just a few touches of light gold toning. The design elements are well-detailed and eye appeal is quite strong. PCGS has graded no coins in MS67 or finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2556, PCGS# 7184

5599 1888-O MS66 PCGS. A fully brilliant and untuned Premium Gem, this example is tied for the finest that PCGS has certified (7/15). An exceedingly sharp strike is evident, with virtually full detail over Liberty's ear and on the eagle's breast. NGC ID# 2556, PCGS# 7184

5600 1888-O MS66 PCGS. This vibrantly lustrous Premium Gem is tied for finest certified by PCGS (12/08). Crisply struck and essentially untuned with great eye appeal. NGC ID# 2556, PCGS# 7184

- 5601 1888-O MS66 PCGS. CAC. Ex: The Shrike Set.** Delicate caramel-gold toning visits this highly lustrous and beautifully preserved Premium Gem. The hair above the ear shows the usual blending, characteristic of the New Orleans issue. PCGS has graded no coins in numerically finer grades (6/15). NGC ID# 2556, PCGS# 7184

**1888-O Dollar, MS65 Deep Mirror Prooflike
Stark Field-Device Contrast**

- 5602 1888-O MS65 Deep Mirror Prooflike PCGS.** The marginal availability of Deep Mirror Prooflike 1888-O Morgan dollars declines significantly at the Gem grade level, and such coins are prohibitively rare any finer. This piece is well-struck, with light golden toning accentuating the pleasing cameo contrast. A few small ticks on Liberty's cheek limit the grade. Population: 63 in 65 Deep Mirror Prooflike, 4 finer (7/15). NGC ID# 2556, PCGS# 97185

**1888-O Morgan Dollar, MS62
Sought-After "Scarface" Variety, VAM-1B4**

- 5603 1888-O Scarface, VAM-1B4, MS62 PCGS. CAC.** A Top 100 Variety. An elusive MS62 specimen of the VAM-1B4, the famous "Scarface" variety, with one of the most dramatic die breaks of the series stretching from the rim, across Liberty's cheek, and into the lower hair. The VAM-1B4 is one of the most sought-after Morgan varieties and examples always command high premiums. This attractive specimen exhibits well-detailed design elements and lustrous surfaces with highlights of pale gold toning and a scattering of minor contact marks. Population: 32 in 62 (3 in 62+), 11 finer (7/15). PCGS# 133918 Base PCGS# 87184
- 5604 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 PCGS.** A Top 100 Variety. A dove-gray example of this popular variety with steel and golden accents near the rims. There are few marks, but the luster is a bit muted. Nonetheless quite attractive, and accompanied by an AU55 NGC tag identifying the Hot Lips/DDO and VAM variety. PCGS Population: 50 in 55, 22 finer (7/15). PCGS# 133919 Base PCGS# 7308

**1888-O 'Hot Lips' Dollar, AU58
VAM-4 Guide Book Variety**

- 5605 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU58 PCGS.** A Top 100 Variety. Liberty's profile is boldly die doubled on this popular Guide Book variety. The present example is softly lustrous beneath faint golden-gray toning, and the high points of the design display only minor friction. This variety is elusive in AU condition, and Mint State pieces are very rare. This near-Mint representative will be an a desirable selection for the VAM specialist. Population: 7 in 58, 4 finer (12/14).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
PCGS# 133919 Base PCGS# 7308

**1888-O 'Hot Lips' Dollar, MS61
VAM-4, Guide Book Variety**

- 5606 1888-O Hot Lips, Doubled Die Obverse, VAM-4, MS61 NGC.** A Top 100 Variety. This famous and desirable Morgan dollar is popular not only because of its listing as a Guide Book variety, but also because of the dramatic die doubling visible at the mouth, chin, nostrils, profile, and leaves. A notorious conditional rarity, the Hot Lips variety is always obtainable for a price in circulated grades, but Uncirculated examples are very rare. The present lustrous piece has light straw-gold toning and only minimal marks for the designated grade. A small nick on the reverse rim at 1 o'clock provides an identifier. Census: 3 in 61, 1 finer (6/15).
Ex: Denver Signature (Heritage, 8/2006), lot 5355, which realized \$8,050. PCGS# 133919 Base PCGS# 7308
- 5607 1888-S MS65 PCGS.** Lightly frosted on the devices, supplying slight contrast with the swirling luster around. Well-struck overall and as smooth as a Gem should be. PCGS has graded just 31 pieces as MS66 or better (6/15). NGC ID# 2557, PCGS# 7186
- 5608 1888-S MS65 PCGS.** Moderate rose-gold patina accented by pale blue enlivens each side of this better-date S-mint Morgan dollar, one seldom seen at the Premium Gem level, where PCGS reports only 28 submissions (7/15). Generous luster percolates upward despite the layer of color. NGC ID# 2557, PCGS# 7186

**1888-S Silver Dollar, Brilliant MS66
Virtually Unobtainable Any Finer**

- 5609 1888-S MS66 PCGS.** Repunched Mintmark. A stark silver-white and brilliantly lustrous Premium Gem, sharply struck with few marks and clear fields. A smallish mintage of 657,000 pieces translates to extreme scarcity at the MS66 level, and the issue is a prohibitive series rarity any finer. This example shows the typical merging of hair strands over the ear, but only to a minor degree. Population: 28 in 66 (2 in 66+), 3 finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 2557, PCGS# 7186

**1889 Morgan Dollar, Silver-White MS66+
High-End Condition Rarity**

- 5610 1889 MS66+ PCGS. CAC.** Ex: NFL Set. With a massive mintage of nearly 22 million pieces, the Philadelphia Mint stretched its dies to the limit and only a total of five Superb Gem dollars are certified by both services combined. High-end Premium Gem coins are similarly scarce, and this coin is among the finest of those. Wonderful, satin-smooth surfaces are virtually unmarked and display a frosty silver-white luster seen only on the finest Morgan dollars. Sharply struck for the issue, the coin traces back to the notable Gerry Bingham NFL Set. Population: 24 in 66+, 4 finer (6/15).
Ex: Gerry Bingham NFL Set (Heritage, 1/2001), lot 7949; FUN Signature (Heritage, 1/2007), lot 7129.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 2558, PCGS# 7188

- 5611 1889-CC VF35 PCGS.** Dove-gray interiors are accented against charcoal-gray margins with overall good eye appeal on this midgrade key-date Morgan. A long, straight scrape runs through the eagle's left (facing) wing, another through the right wing and rear of the neck. NGC ID# 2559, PCGS# 7190
- 5612 1889-CC — Cleaned, Rim Filing — NGC Details. XF.** From the same die pair as VAM-2A, but an earlier die state without the crack through the S in PLURIBUS. This dusky almond-gold and stone-gray key date dollar is moderately hairlined and mildly glossy but lacks any mentionable marks. NGC ID# 2559, PCGS# 7190
- 5613 1889-CC — Improperly Cleaned — NGC Details. XF. VAM-2A.** This stone-gray key date Carson City dollar has been overdipped, but luster nonetheless emerges from the borders and devices. Small marks are evident but do not distract. The centers display light wear. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, XF40
Well-Detailed CC Survivor**

- 5614 1889-CC XF40 PCGS.** Only around 5% to 30% of the original 350,000-coin mintage is thought to have avoided the melting pot, explaining why this coveted Carson City key date proves challenging across the board. The surfaces show evidence of a short stay in circulation with even blending and scattered abrasions throughout. Abundant design detail remains despite the light friction. Battleship-gray patina and faint rose accents grace each side. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, Choice XF

- 5615 1889-CC XF45 PCGS.** A collectible example of this key Carson City issue, displaying strong detail and uniform battleship-gray patina. Tinges of deeper olive color reside against the edges of the relief elements. The 1889-CC is not the lowest-mintage date in the Carson City short set with 350,000 coins produced, but it has one of the lowest survival rates overall, with the majority of known examples in lower circulated grades. NGC ID# 2559, PCGS# 7190
- 5616 1889-CC — Polished — PCGS Genuine. AU Details. VAM-2A.** A bright, untoned, and unnaturally prooflike example. A few moderate marks near Liberty's jaw provide identifiers. A lightly circulated and double-clashed key date Carson City dollar. NGC ID# 2559, PCGS# 7190
- 5617 1889-CC — Improperly Cleaned — NGC Details. AU.** This rare date Carson City dollar has cloudy stone-white fields and devices. The margins offer charcoal-gray toning. Hints of luster accompany protected areas. Mildly glossy, but will satisfy many collectors in search of an affordable sharp example.

1889-CC Silver Dollar, AU50
Some Luster Remains

5618 1889-CC AU50 PCGS. The 1889-CC is the king of the Carson City Morgans. Most examples were either released into circulation in the 19th century or were later melted. Only a single piece was represented in the GSA sales of the early 1970s. This AU coin yields original golden-gray patina with hints of luster peeking through in the peripheral recesses. Well-struck with just a brush of wear. NGC ID# 2559, PCGS# 7190

5619 1889-CC — Repaired, Damaged, Cleaned — ANACS. AU55 Details. The upper reverse field is smoothed beneath STATES. The pearl-white surfaces are hairlined, and small digs are noted on the eagle's breast and the base of Liberty's eye. The key to a set of CC-mint Morgan dollars. NGC ID# 2559, PCGS# 7190

5620 1889-CC — Rims Filed, Cleaned — ANACS. AU55 Details. A stone-white representative of the rarest Carson City Morgan dollar issue. The high points display only light wear, but the surfaces are lackluster and mildly granular. A pinscratch crosses Liberty's jaw. The obverse rim is filed throughout. NGC ID# 2559, PCGS# 7190

1889-O Morgan Dollar, MS65
Conditionally Rare in Finer Grades

5621 1889-O MS65 PCGS. A delightful Gem specimen of this popular branch mint issue, with sharply detailed design elements and vibrant mint luster throughout. The mostly brilliant surfaces show a few hints of lavender and golden-tan toning, with no mentionable distractions. PCGS has graded 10 numerically finer examples (7/15). NGC ID# 255A, PCGS# 7192

1889-O Morgan Dollar, MS65
Rich Mint Luster

5622 1889-O MS65 PCGS. The 1889-O, when found in Mint State, usually grades in the MS62 to MS64 range. The certified population declines significantly at the Gem level, and anything finer is a major rarity. This piece is delightfully lustrous and free of significant abrasions. The obverse displays mottled aquamarine toning, while the reverse shows a light champagne hue that is deepest around the periphery. The eagle's breast and the hair above Liberty's ear show trivial softness, as expected. Only 10 coins are numerically finer at PCGS (6/15). NGC ID# 255A, PCGS# 7192

1889-O Morgan, Silver-White Gem
Frosty and Unabraded

5623 1889-O MS65 PCGS Secure. Top-notch mint frost appears throughout on untuned silver-white surfaces that show only a few scattered, minimal marks rather than blatant abrasions. Some roller marks on Liberty's cheek as well as the softness in the hair over the ear are both typical of a middling O-mint strike, but the eye appeal is nonetheless quite high here. PCGS data show 10 in MS66 and none finer (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255A, PCGS# 7192

1889-O Silver Dollar, Brilliant-White
Impressive High-End Gem

5624 1889-O MS65+ PCGS. The PCGS Plus designation is of great significance to the grade of this brilliant-smooth and lustrous Gem dollar. While more than 200 pieces have achieved the MS65 level, relatively few can claim the Plus identifier of high-end quality. This example is particularly well-struck for the O-Mint issue — untuned, with cartwheel silver luster throughout. Population: 12 in 65+, 10 finer (7/15). NGC ID# 255A, PCGS# 7192

5625 1889-O Clashed E, VAM-1A, MS61 PCGS Secure. A Top 100 Variety. According to the VAMWorld.com website, the VAM-1A has been renamed the VAM-1A2 variety, which is still valid. This piece shows many of the clash marks that characterize the VAM-1A2, most clearly the bold L clash beneath the eagle's tail, although that beneath Liberty's neck and right of the corn leaf on the obverse is also perceptible. This piece is untuned save for a golden tinge at the extreme rim and shows excellent preservation, seemingly on the cusp of an even finer grade. PCGS# 133930 Base PCGS# 7192

5626 1889-S MS65 NGC. This richly toned Gem exhibits attractively blended lilac and gold toning over frosty silver luster. A highly appealing example that is elusive in finer grades. NGC ID# 255B, PCGS# 7194

1889-S Dollar, Radiant MS66 Underappreciated Low-Mintage Issue

5627 1889-S MS66 PCGS. The handful of issues in the Morgan series with six-figure mintages tend to be highly coveted, but the 1889-S (only 700,000 coins struck) is generally overlooked in favor of its famous Carson City counterpart. Examples are very scarce in Premium Gem condition, and there is only a single submission finer between the two leading certification services. Uninhibited brilliance characterizes each side. Radiant luster, excellent preservation, and sharply struck devices complete the appeal. Population: 81 in 66 (6 in 66+), 1 finer (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255B, PCGS# 7194

5628 1890 MS65 PCGS. The supply of Gem 1890 dollars is enough to satisfy most Morgan dollar specialists, but finer coins are within the reach of only the most well-resourced collectors. This brilliant example is strongly defined with trivial grazes. A dark fleck occurs above (DO)L(LAR). PCGS shows just four finer submissions (7/15). NGC ID# 255C, PCGS# 7196

5629 1890 MS65 PCGS. Ex: NFL Set. Lustrous with light olive-gold toning and exemplary surfaces. The centers are incompletely brought up. The 1890 is a high mintage issue plentiful in scuffy Mint State grades, but surprisingly scarce as a Gem.
Ex: Gregg Bingham NFL Collection (Heritage, 1/2001), lot 7953, which realized \$2,760. NGC ID# 255C, PCGS# 7196

5630 1890 MS65 PCGS. CAC. The design elements of this attractive Gem are sharply detailed with light doubling showing on many devices on the reverse. The surfaces radiate vibrant mint luster and no mentionable distractions are evident. PCGS has certified four numerically finer examples (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255C, PCGS# 7196

5631 1890 MS65 Prooflike PCGS. Looking-glass fields provide a mirrored backdrop to frosty devices on this untuned Gem, showing great contrast and only a couple of mentionable marks, one on Liberty's neck and one on the lower eagle breast. Seldom seen with the Prooflike designation. Population: 16 in 65 Prooflike, 1 finer (7/15). NGC ID# 255C, PCGS# 7197

5632 1890 MS64 Deep Mirror Prooflike NGC. The mirrored fields of this near-Gem accentuate the well-defined motifs. Silver-gray surfaces reveal just a few minute marks that preclude Gem classification. Nevertheless, this piece exhibits pleasing overall eye appeal. The 1890 is challenging in this grade and very rare any finer. NGC ID# 255C, PCGS# 97197

1890-CC Dollar, MS65 Better Carson City Issue

5633 1890-CC MS65 PCGS. VAM-7. The mintmark is lightly repunched, noticeable along the inside curve of the first C. Faint honey-gold and ice-blue toning visits the obverse, while the reverse is essentially brilliant. Lustrous and nicely struck with a nearly pristine reverse. Delicate parallel roller marks on the lower cheek are as issued.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255D, PCGS# 7198

5634 1890-CC MS64 Prooflike PCGS. An attractive Choice Morgan dollar from the famous Carson City Mint, with well-detailed frosty design elements and mirrored prooflike reflectivity in the fields. Only minor signs of contact are evident. PCGS has graded 15 numerically finer examples (6/15). NGC ID# 255D, PCGS# 7199

1890-CC Morgan Dollar, MS63 VAM-4, 'Tail Bar' Variety

5635 1890-CC Tail Bar, VAM-4, MS63 PCGS. A Top 100 Variety. The "Tail Bar" VAM variety gets its moniker from a thick, heavy die gouge that connects the eagle's tailfeathers to the wreath left of the bow. This variety is quite popular as the die flaw is plain to the naked eye. The current coin is vibrantly lustrous and brilliant, with grade-consistent abrasions primarily restricted to Liberty's cheek. A trifle lightly struck, showing faint remnants of parallel roller marks in the center on each side. PCGS# 133934 Base PCGS# 87198

**1890-CC 'Tail Bar' Dollar, MS64
Well Known Carson City Variety**

- 5636 1890-CC Tail Bar, VAM-4, MS64 PCGS.** A Top 100 Variety. The straight die gouge beneath the fletchings can be identified at arm's length with the unaided eye, and makes the "Tail Bar" VAM the most easily attributed of the Morgan dollar series. The "Tail Bar" comprises approximately 10% of all Uncirculated 1890-CC dollars, a better Carson City issue. This lustrous and essentially brilliant near-Gem has a good strike and a clean obverse. Nearly unobtainable any finer.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
PCGS# 133934 Base PCGS# 87198

- 5637 1890-O MS65 PCGS.** A vibrant, wholly original example, typically softly struck in the centers and virtually untuned, with very few marks on either side. This issue is surprisingly scarce at the Gem grade level, considering how many thousands of coins are known at MS63 and MS64. NGC ID# 255E, PCGS# 7200

**1890-O Dollar, MS65+
Lightly Repunched Date**

- 5638 1890-O MS65+ PCGS. VAM-31.** The top of the 9 is repunched. Light honey-gold patina adorns this lustrous and clean-cheeked Gem. The eagle's breast and the hair above the ear display unimportant incompleteness. Minor grazes near AMERICA determine the grade. Despite a generous mintage, the 1890-O is a challenging issue to locate any finer.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255E, PCGS# 7200

- 5639 1890-S MS66 PCGS.** A lovely Premium Gem with frosty silver luster, this brilliant and untuned Morgan dollar has an exceptional strike and outstanding eye appeal. PCGS has only certified seven finer examples (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255F, PCGS# 7202

- 5640 1890-S MS66 PCGS.** The brilliant centers of this delightful Premium Gem yield to rings of greenish-gold at the rims. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. PCGS has graded seven numerically finer examples (7/15). NGC ID# 255F, PCGS# 7202

**1891 Dollar, Frosty Gem
Just Three Coins Finer at PCGS**

- 5641 1891 MS65 PCGS.** Unlike so many other Morgan dollar issues, the 1891 actually circulated extensively. Mint State examples are still plentiful through MS64, while comparable Gems are conditionally scarce. PCGS and NGC have only seen three finer representatives apiece (7/15). This coin is frosty and brilliant with well-detailed motifs. Faint blushes of rose at the upper right reverse are the only indications of color. Light chatter in the field above the eagle and a couple of small marks on Liberty's portrait preclude an even higher grade.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255G, PCGS# 7204

**1891 Silver Dollar
Lustrous, Frost-White Gem**

- 5642 1891 MS65 PCGS.** A deeply lustrous and visually impressive dollar with spectacular eye appeal — not often in evidence for this P-Mint issue, as confirmed by just six pieces graded numerically finer by the two services combined (6/15). Slight blending of the hair strands above the ear is unavoidable for the issue. Only a tiny scattering of insignificant marks is seen, suggesting this frosty Gem is close to an even finer grade. NGC ID# 255G, PCGS# 7204

- 5643 1891-CC MS64 PCGS.** A well struck near-Gem that has original, somewhat frosty luster. Pale blue toning appears at the reverse periphery, as does a small spot of dark gray between the AT of STATES, but the rest of the piece is virtually untuned. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, Brilliant MS65

5644 1891-CC MS65 PCGS. A shining Gem with delightful frosty whispers across the well-defined high points. Faint hints of milky toning in the fields do nothing to dampen the coin's silver-white essence. A few small reeding marks isolated in the fields contribute to the grade. Rare any finer, with only 31 such pieces graded by PCGS (6/15).

Ex: *Summer FUN Signature (Heritage, 7/2009)*, lot 944.
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 255H, PCGS# 7206

**1891-CC Silver Dollar, MS65
Doubled Die Reverse, VAM-6**

5645 1891-CC MS65 PCGS. VAM-6. Portions of AMERICA are lightly die doubled. An underrated variety; much scarcer than the well known "Spitting Eagle" VAM-3. The present lustrous Gem has a good strike and only a wisp of almond-gold toning. The fields are smooth, while Liberty's cheek and neck display minor contact.

Ex: *Rosemont Central States Signature (Heritage, 4/2011)*, lot 5767, which realized \$4,025. NGC ID# 255H, PCGS# 7206

5646 1891-CC Spitting Eagle, VAM-3, MS64 NGC. A Top 100 Variety. A wisp of golden toning graces this lustrous and boldly struck Choice Carson City dollar. Perhaps half of all Uncirculated '91-CC dollars are VAM-3, with a die lump beneath the beak, but the variety nonetheless remains popular. PCGS# 133937 Base PCGS# 7206

**1891-CC Dollar, MS65
Rarely Seen Finer**

5647 1891-CC Spitting Eagle, VAM-3, MS65 PCGS. A Top 100 Variety. Although the 1891-CC is scarcer than the Carson City dollars struck between 1881 and 1885, this late-date issue can be located with little searching through Gem condition, above which point examples are decided rarities. This brilliant, sharply struck representative has a few light grazes on the cheek that limit the grade, but the fields are minimally marked. PCGS counts just 31 coins finer (7/15). PCGS# 133937 Base PCGS# 7206

**1891-O Morgan Dollar, MS65
Unknown in Premium Gem Grade**

5648 1891-O MS65 PCGS. The satiny, untoned, silver-white surfaces of the Gem 1891-O Morgan dollar offer excellent preservation and top-notch eye appeal. Liberty's cheek is free of all but the most insignificant tiny ticks, although a couple of small abrasions show on the eagle's breast. Although PCGS has graded four examples of the 1891-O in MS65+, it has yet to ever certify an MS66 of the issue (6/15).

From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 255J, PCGS# 7208

**1891-O Silver Dollar, MS65
Exceptional Preservation**

5649 1891-O MS65 PCGS. A high mintage issue available in Uncirculated grades, but rarely in the present quality. This essentially brilliant Gem offers dynamic luster and exceptionally smooth surfaces. The strike is good by New Orleans standards, although the centers show minor blending. Encapsulated in an old green label holder, and virtually unobtainable any finer. NGC ID# 255J, PCGS# 7208

5650 1891-O MS63 Prooflike PCGS. A frosty and reflective black and white coin, this CC dollar is well-struck and essentially untoned. Minor scuffs in the obverse fields prevent an even higher grade. This issue is rarely seen in Prooflike condition. Population: 21 in 63 Prooflike, 11 finer (7/15).

Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 5945. NGC ID# 255J, PCGS# 7209

**1891-S Morgan Dollar, Frosty MS66
Untoned and Well-Preserved**

- 5651 1891-S MS66 PCGS.** This brilliant Premium Gem boasts generous, frosty luster throughout both sides amid excellent preservation and a bold strike for the issue. Liberty's cheek and the eagle's breast are free of major marks. This better-date issue is available for a price up to MS66, but PCGS reports only eight in higher grades (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 255K, PCGS# 7210

**1891-S Silver Dollar, MS66
Outstanding Preservation**

- 5652 1891-S MS66 PCGS.** The 1891-S Morgan dollar is an available issue through MS64, but the certified population thins considerably at the Gem level and finer pieces are genuinely scarce. This Premium Gem is among the finest examples that most budget-conscious collectors will be able to acquire. The strike is bold and both sides exhibit attractive lavender-gold toning, with deeper burgundy overtones appearing periodically around the peripheries. Liberty's cheek is pristine, and were it not for a few trivial grazes in the left obverse field, this 1891-S might have garnered an even higher grade. Population: 85 in 66 (7 in 66+), 8 finer (7/15). NGC ID# 255K, PCGS# 7210
- 5653 1892 MS64 PCGS. CAC.** A mostly brilliant Choice Mint State piece, this example shows splashes of gold and iridescent toning on each side. The strike is typically weak over Liberty's ear. NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, Frosty MS65

- 5654 1892 MS65 PCGS.** Frosty, untoned silver-white surfaces display generous luster and notable absence of mentionable abrasions on this nicely preserved Gem 1892 Morgan, which also boasts a nice, sharp strike for the date. Liberty's cheek is free of distractions, as is the eagle's breast. The few marks occur mostly in the fields on the reverse. PCGS reports only five finer in MS66 (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 255L, PCGS# 7212

**1892 VAM-3 Dollar, MS65
Die Doubled Reverse**

- 5655 1892 MS65 PCGS. VAM-3.** Mintages of silver dollars at Philadelphia declined annually between 1889 and 1895, partly due to Grover Cleveland's opposition to Free Silver. The 1892 has a fairly low production of 1,036,000 pieces, and becomes elusive at the MS65 level. This lustrous and brilliant Gem has a pristine reverse and only minor contact on the obverse. The reverse is lightly die doubled, most apparent on the upper legends. Certified in an old green label holder. NGC ID# 255L, PCGS# 7212

**1892 Silver Dollar, MS66
Prohibitively Rare Finer**

- 5656 1892 MS65 PCGS.** The availability of the 1892 Morgan dollar declines significantly between MS64 and MS65, and Premium Gems are extremely rare. This Gem representative is boldly struck, with vibrant, frosty luster that shows just a touch of golden toning around the periphery. A single, linear graze on Liberty's cheek and a faint reed mark on the upper lip are the only grade-limiting faults. PCGS lists only five MS66 coins finer (7/15). NGC ID# 255L, PCGS# 7212
- 5657 1892-CC MS61 PCGS. CAC. VAM-4B.** This interesting VAM features a repunched mintmark and at least three sets of clash marks. A lustrous and lightly toned better date Carson City dollar. The centers are typically struck and the left obverse displays marks commensurate with the grade. NGC ID# 255M, PCGS# 7214
- 5658 1892-CC MS61 PCGS. CAC.** Numerous wispy die cracks occupy the peripheries on each side of this lustrous, untuned Mint State dollar. A few larger marks on the cheek and chin of Liberty account for the grade, but this is a coin with excellent eye appeal nonetheless. *From The College Collection, Part Two.* NGC ID# 255M, PCGS# 7214
- 5659 1892-CC MS62 PCGS.** An occasional wisp of reddish-gold adheres to the margins of this well-struck CC Morgan. Some luster disruptions are noted, especially on Liberty's cheek that is heavily abraded. NGC ID# 255M, PCGS# 7214
- 5660 1892-CC MS62 PCGS.** Nearly 3 million Carson City dollars were distributed through the GSA sales, but the 1892-CC was not part of that distribution, with just one recorded example. This fully brilliant Carson City dollar exhibits frosty mint luster and no evidence of toning on either side. NGC ID# 255M, PCGS# 7214

- 5661 1892-CC MS63 NGC.** Concentric patina decorates the obverse of this Select 1892-CC dollar in rings of gold, copper, magenta, and aqua contrasting against an untoned silver center. The reverse shows a peripheral ring of light copper-gold, and on its own might garner a Prooflike designation, although the obverse contrast is not quite sufficient. Nonetheless a beautiful coin, and relatively unabraded for the grade. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
Above Average Strike**

- 5662 1892-CC MS64 NGC. VAM-8A.** Missing from the GSA sales except for one lonely coin, this late-date Carson City issue is considerably more challenging than the high-release dates from the early-to-mid-1880s. A faint hint of fawn-gold toning sneaks into the margins of this semiprooflike example, but for all practical purposes the coin is untoned and brilliant with sharp silver luster. A near-full strike adds to the appeal. Marks are scattered about, but they are minor in the context of the rough handling most CC dollars received. For VAM enthusiasts, the coin shows a filled 2 and faintly clashed N. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
Semiprooflike**

- 5663 1892-CC MS64 PCGS.** The bold strike and brilliant silver luster create exceptional eye appeal for the grade of this Choice Mint State Carson City dollar. Both sides are untoned with reflective fields and frosty devices that combine to present light cameo contrast. Trivial grade-limiting marks are the only distraction. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64+
High-End Example**

- 5664 1892-CC MS64+ PCGS.** Always in demand, this Carson City issue often displays high-quality, attractive surfaces and a bold strike. This borderline Gem coin is a sharp example, with nice frosted detail on the motifs and clear, unabraded fields. A couple of small marks above the eagle's head do not detract significantly from the appeal. A glint of champagne-gold toning appears overall. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
Scarcer CC Issue**

- 5665 1892-CC MS64 PCGS. CAC.** Choice condition is about the highest grade for which the 1892-CC can be considered collectible. Finer examples are considerably scarcer than the demand for them. Dappled red-violet, fiery-orange, and ice-blue patina clings to the recesses of this eye-catching near-Gem, while the exposed regions maintain their brilliance. The motifs are well-struck with strong detail on the hair over Liberty's ear.
From The College Collection, Part Two. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64
Beautiful Orange and Red-Violet Patina**

- 5666 1892-CC MS64 PCGS. CAC.** Quantities of 1892-CC dollars were dispersed in the late 19th century, and then intermittently from the mid-1920s through the 1950s. By the early 1960s only a single example remained in Treasury vaults. Nevertheless, examples are accessible through Choice condition, making this a perfect Carson City type coin. Golden-orange and red-violet elements coalesce around the edges, ceding to mostly brilliant centers. Glowing luster issues from surfaces that show strike softness at the extreme centers, and lightly peppered abrasions throughout.
From The College Collection, Part Two. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar
Close to Full Gem Quality**

- 5667 1892-CC MS64+ PCGS. CAC.** A brilliant and frost-white coin, with blazing mint luster. A hint of pale gold at ONE on the reverse is the only semblance of toning, but it is barely noticed. This Carson City issue, like all of the CC-Mint dollars, was subjected to rough handling and transport, but the present coin escaped relatively unscathed. The few small bagmarks are grade-appropriate and of minimal concern. The coin is sharply struck save for minor blending at the ear and talons. CAC endorsed. NGC ID# 255M, PCGS# 7214

5668 1892-O MS64+ NGC. A few marks near Liberty's mouth and on her neck likely prevent a Gem grade on this O-mint dollar, nonetheless quite an attractive coin, showing surfaces that are untuned save for a thin accent of gold and copper at the margins. NGC ID# 255N, PCGS# 7216

5669 1892-O MS64 PCGS. CAC. A virtually brilliant and highly lustrous near-Gem of this conditionally rare New Orleans issue. The fields are smooth and the cheek shows only minor grazes. Customary for the '92-O, the centers are lightly brought up. Encapsulated in an old green label holder.
From The College Collection, Part Two. NGC ID# 255N, PCGS# 7216

1892-O Dollar, MS65
Multicolor Patina, Smooth Surfaces

5670 1892-O MS65 PCGS. VAM-2. The 2 in the date is repunched north. Navy-blue and autumn-gold dominate the obverse, while the reverse displays iridescent peach, lemon, and aquamarine shades. Lustrous and essentially unabraded. The centers show the incompleteness of strike characteristic of the '92-O. Much nicer than usually encountered for the issue.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255N, PCGS# 7216

5671 1892-S AU50 PCGS. Cream-gray surfaces show few marks and good eye appeal on this lightly circulated semikey S-mint dollar. The minor wear shows more as thinned luster in the fields, although light high-point rub appears. A faint golden accent also shows on each side. Nice for the grade. NGC ID# 255P, PCGS# 7218

5672 1892-S AU50 NGC. Dove-gray fields contrast against charcoal-gray device outlines on this appealing and still-lustrous 1892-S dollar. The light high-point wear is as expected, but abrasions are minimal throughout. NGC ID# 255P, PCGS# 7218

5673 1892-S AU53 NGC. The lightly abraded surfaces of this pleasing AU53 example retain much of their original mint luster, and just a touch of high-point wear shows on the well-detailed design elements. From a smallish mintage of 1.2 million pieces. NGC ID# 255P, PCGS# 7218

1892-S Morgan Dollar, AU55
Remarkably Clean Surfaces

5674 1892-S AU55 PCGS. A lightly worn example that retains most of its original luster. Nicely struck with silver-gray surfaces toned pale red in patches on the reverse. The only mentionable mark is located above the head of the eagle. An attractive and affordable example of this surprisingly difficult semikey date.
Ex: Denver Signature (Heritage, 8/2006), lot 3069. NGC ID# 255P, PCGS# 7218

1892-S Silver Dollar, Lustrous AU55

5675 1892-S AU55 PCGS. After the key-date 1893-S, the 1892-S Morgan is the most challenging issue in the series to acquire in Mint State. This Choice AU representative offers the budget-conscious collector with a well-detailed, still-lustrous alternative to a costly Uncirculated piece. The surfaces are smooth and both sides show a light blush of golden toning. NGC ID# 255P, PCGS# 7218

1892-S Dollar, Vividly Toned AU58
Lustrous and Semiprooflike

5676 1892-S AU58 NGC. This magnificent near-Mint 1892-S Morgan has a distinct shot at being the single most attractive AU example known. The fields are semiprooflike and the sharp devices are almost devoid of perceptible friction. Vivid splashes of amber, violet, gold, and olive toning blanket each side, while the underlying surfaces are devoid of distracting abrasions. The 1892-S is one of the rarest dates in the series in Mint State, making this Borderline Uncirculated coin all the more impressive. NGC lists 48 Mint State coins finer, including resubmissions (6/15). NGC ID# 255P, PCGS# 7218

1892-S Silver Dollar, AU58
Conditionally Challenging

5677 1892-S AU58 PCGS. The 1892-S is only a semikey date in the context of the Morgan dollar series, but in Mint State it is nearly as rare as the 1893-S. However, what separates these two issues is the number of coins extant in AU grades. The '93-S poses a problem for collectors all the way down to the XF range, but the 1892-S becomes moderately available as quickly as AU55. Thus, near-Mint examples of the '92-S, while scarce, are collectible by average enthusiasts, which heightens demand. This piece appears Uncirculated at first glance, but a loupe reveals traces of friction over the high points of the devices. Luster remains in the fields and there is a hint of light golden toning overall. A few marks on Liberty's cheek are not unusual for the grade. PCGS lists only 60 Uncirculated examples finer, including possible resubmissions (7/15). NGC ID# 255P, PCGS# 7218

- 5678 1892-S Doubled Date, VAM-2, AU53 NGC.** A Top 100 Variety. The date is repunched, most apparent on the 8. The variety is undesignated on the NGC insert. But any AU53 1892-S dollar is desirable, since the relatively low mintage issue is typically encountered in Fine to VF grades, and becomes a formidable condition rarity in Mint State. The present partly lustrous piece is lightly abraded and displays medium gunmetal and chestnut toning. PCGS# 133941 Base PCGS# 7218

**1893 Silver Dollar, MS65
Attractive Album Toning**

- 5679 1893 MS65 PCGS. VAM-2.** The 3 in the date is repunched. Liberty's chin is lightly die doubled. Lovely orange-red and navy-blue toning the borders of this sharply struck and thoroughly lustrous Gem. The 1893 is a much better date due to its low mintage, and is nearly unobtainable above the MS65 level. Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1560. From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255R, PCGS# 7220

- 5680 1893-CC XF45 PCGS.** Light silver-gray surfaces peak through the golden-brown and iridescent toning on this Choice XF Morgan dollar. This issue is usually found in Mint State grades, or in well-circulated grades, but rarely between those extremes. PCGS has certified more than 2,100 examples below XF40, and more than 4600 pieces in AU or finer grades, but just 371 pieces in XF grades (7/15). NGC ID# 255S, PCGS# 7222

- 5681 1893-CC AU55 NGC.** The silver-gray surfaces of this Choice AU Carson City issue display luster in the recessed areas. The design features are well-defined, including some detail in the hair over Liberty's ear. Scattered marks are in line with a large silver coin that has seen brief circulation. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS62
Final Carson City Morgan**

- 5682 1893-CC MS62 PCGS.** An attractive MS62 example of the final Morgan dollar issue from the Carson City Mint. This piece offers sharply detailed design elements and brightly lustrous surfaces with a few hints of golden-tan toning and some scattered minor contact marks. Eye appeal is quite strong for the grade and this date is always in demand. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS63
Eye-Catching Luster**

- 5683 1893-CC MS63 PCGS.** The popular final-year Carson City issue, and a slightly better date in high grade. This Select example shows vibrant, frosty luster with tinges of gold around the peripheries. A few light abrasions limit the grade, and the central devices show the usual striking deficiency. Housed in a green label holder. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63
Sharp, Vibrant Appeal**

- 5684 1893-CC MS63 PCGS. CAC.** Slight areas of russet toning are confined to the rims and margins of this brilliantly lustrous Carson City dollar. Bagmarks are always the challenge for the final-year issue, and the present Select Uncirculated example has its share, but the cheek is relatively smooth and the strike and luster are significantly above average. Great eye appeal for the grade. NGC ID# 255S, PCGS# 7222

- 5685 1893-O AU58 NGC.** Whispers of russet patina make occasional visits to the borders of this near-Mint Morgan, somewhat more so on the reverse. Traces of luster reside in the recesses of the well-struck design elements. The few scattered marks are in concert with a large silver coin that has seen brief circulation. NGC ID# 255T, PCGS# 7224

- 5686 1893-O AU58 NGC.** Greatly overshadowed by its San Francisco and Carson City brethren, the 1893-O is still a better date in the series with a paltry mintage of just 300,000 coins. This borderline-Uncirculated dollar is all-brilliant with lustrous surfaces and minimal signs of handling. Minor clash marks appear on each side. NGC ID# 255T, PCGS# 7224

- 5687 1893-O AU58 PCGS. CAC.** Nearly full luster is evident beneath light gold toning over natural silver-gray surfaces. A few scuffs are noted in the fields of this highly attractive example. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS61
Better New Orleans Issue**

- 5688 1893-O MS61 NGC.** The 1893-O, with a mintage of 300,000 coins, is a better date in all grades, particularly in Mint State. This piece is untoned, with pleasantly few major abrasions, considering the grade. The fields show characteristically satiny luster with a hint of semiprooflike mirroring when tilted beneath a light. The New Orleans specialty — minor striking softness — appears on the central high points. NGC ID# 255T, PCGS# 7224

**1893-O Morgan Dollar, MS63
Elusive New Orleans Issue**

- 5689 1893-O MS63 PCGS.** A recognized semikey in the series, boasting a limited 300,000-coin mintage. Many 1893-O Morgans were distributed into circulation, and those coins released from the Treasury in later decades typically come heavily abraded. This Select example is free of any major surface flaws, with satiny luster and just a few wisps of light golden toning. As expected for the issue, slight striking softness is seen on the eagle's breast and the hair above Liberty's ear.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 255T, PCGS# 7224

**1893-O Dollar, MS63
Popular Semikey Issue**

- 5690 1893-O MS63 NGC.** All 300,000 Morgan dollars struck at New Orleans in 1893 were manufactured in January, and the issue's survivorship in circulated grades suggests many pieces were distributed to the public soon after production. Mid-20th century releases yielded stray coins and small groups, but no large hoards. This Select example is untoned aside from light russet color around the rims. Central strike detail is typical for the facility, and the luster is softly frosted. A lightly marked example that would prove exceedingly difficult to improve upon. NGC has only seen 35 coins finer (7/15). NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS63
Semiprooflike, Border Toned**

- 5691 1893-O MS63 PCGS. CAC.** A thin band of rustic-red toning encircles both sides of this otherwise silver-white Select dollar. Always challenging to find with any measure of eye appeal, this semiprooflike New Orleans example earned high marks from CAC for its pleasing surfaces and above-average strike. Liberty's cheek is clean, and most of the bagmarks are slight and unobtrusive. The visual impression suggests an even higher grade. NGC ID# 255T, PCGS# 7224

- 5692 1893-S Good 6 PCGS.** All major design elements remain complete in outline and some interior design detail remains intact, all lettering is legible, but the rim is worn flat in places on the obverse. The dove-gray surfaces of this important series key are problem-free and no large abrasions are noted, aside from a rim bruise at 10 o'clock on the obverse. NGC ID# 255U, PCGS# 7226

- 5693 1893-S Good 6 NGC.** An excellent opportunity for collectors to afford this otherwise hard-to-obtain issue. Deep gray surfaces show the extensive wear associated with the grade, but the rims are intact and marks are not excessive for the amount of time this piece must have spent in circulation. NGC ID# 255U, PCGS# 7226

- 5694 1893-S — Damaged, Cleaned — NGC Details. VG.** Light battleship-gray surfaces offer glimpses of golden patina throughout this well-worn key date representative. The legends, including the date and mintmark remain clear. The noted damage occurs at the tip of Liberty's cap, but it does not overly detract. A perfect example for the budget-minded collector. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, VG10
Collector-Grade Example**

- 5695 1893-S VG10 NGC.** Well-circulated, as are most surviving examples of this key San Francisco issue, but therein well-suited for the budget-conscious collector. The surfaces are smooth, with even wear and consistent tan-gray patina. A few deeper gray overtones appear on the lower-left obverse. NGC ID# 255U, PCGS# 7226

- 5696 1893-S — Repaired — PCGS Genuine. Fine Details.** This cream-gray and straw-gold key date Morgan dollar displays ample plumage detail. The cheek has been smoothed, and both sides are thoroughly hairlined. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Collectible Fine 15

5697 1893-S Fine 15 NGC. A collector-grade example of the 1893-S Morgan, such as the present coin, never fails to have demand among budget-conscious collectors. This piece is well-circulated but retains a pleasing degree of detail for the grade. Both sides are consistently colored in dusky golden-gray patina. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF25 An Accessible Key Date Representative

5698 1893-S VF25 PCGS. This is a great key date example that actually served its intended role as a medium of exchange in West Coast commerce. Fortunately, a forward-thinking individual saved the coin from complete annihilation — an adverse fate met by about 90% of the 100,000-coin mintage. Battleship-gray surfaces with darker color in the protected areas exhibit an expected amount of wear over the devices. The hair retains partial detail, as do the wing feathers. Abrasions are peppered over each side. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Collectible VF30

5699 1893-S VF30 PCGS. A collector-grade example of this key San Francisco issue, slightly sharper than the typical VF representative. This piece shows medium golden-gray patina with occasional charcoal overtones attesting to the originality of the surfaces. The 1893-S boasts the lowest mintage in the Morgan dollar series at 100,000 coins, and most known survivors are in lower circulated grades. NGC ID# 255U, PCGS# 7226

1893-S Morgan, Choice VF

5700 1893-S VF35 NGC. This piece is well-circulated, but shows a little sharper detail than is typical for the issue which experienced extensive circulation in the 19th century. The coin shows medium golden-gray toning with hints of luster in the fields. Strong detail remains throughout, save for the eagle's breast and the hair above Liberty's ear, which bear the brunt of the wear. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF Details The Key Morgan Issue

5701 1893-S — Improperly Cleaned — NGC Details. XF. Some numismatists believe that the actual mintage of 1893-S Morgan dollars was even smaller than the reported figure of 100,000 coins. Regardless, the 1893-S is the key-date among circulation-strike Morgans and it enjoys great demand in all grades. This light silver-gray example was undoubtedly cleaned long ago, but not displays pleasing surfaces and good eye appeal. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF45 Details Hints of Tan Toning

5702 1893-S — Cleaned — ANACS. XF45 Details. The diagnostic die markers on the RT in LIBERTY are clear on the present key date dollar. Luster glimmers across the devices, and protected areas display wheat-gold toning. The predominantly stone-gray surface are subdued and minutely granular. Occasional minor marks are of little import. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Sharpness

- 5703 1893-S — Improperly Cleaned — NGC Details. AU.** A subdued steel-gray and golden-brown representative of the key business issue. Faintly hairlined but only lightly abraded. Wear is apparent on the eagle's breast, although most design elements are sharp. From the mintage of 100,000 pieces, survivors are insufficient to meet collector demand. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Details Well-Defined Cornerstone Example

- 5704 1893-S — Cleaning — PCGS Genuine. AU Details.** A bright key date representative, this untoned 1893-S features light friction over the devices and scattered marks over each side. Wispy hairlines from the noted cleaning do not overly detract. Most of the 100,000 coins struck in 1893 were employed in commercial transactions. There was little collector interest in mintmarked coins at the time, and only after Augustus Heaton published his landmark treatise (also in 1893) did collecting horizons expand to include the branch mints. *From The College Collection, Part Two.* NGC ID# 255U, PCGS# 7226

- 5705 1894 AU53 NGC.** The second-lowest mintage in the series (110,000 coins) ensures the 1894 as one of the most sought-after Morgan dollars in the set. Somewhat muted silver-gray surfaces show an expected number of marks from brief circulation, and moderate blending occurs over the hair and breast feathers. NGC ID# 255V, PCGS# 7228

- 5706 1894 AU53 NGC.** An attractive AU53 example of this low-mintage Morgan dollar, with just a touch of wear on the well-detailed design elements and lustrous, lightly abraded surfaces that show a few hints of pale gold and lavender toning. NGC ID# 255V, PCGS# 7228

- 5707 1894 AU58 PCGS.** Largely pale silver with just a hint of rub. The obverse has a few scattered abrasions, while a scrape on the reverse descends from the eagle's beak. An important example from an issue of just 110,000 business strikes. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, Remarkable MS64

- 5708 1894 MS64 PCGS.** A remarkable 1894 Morgan dollar, this near-Gem is fully brilliant and sharply defined with nearly full hair detail over the ear, and strong breast feathers on the reverse. The surfaces are exceptional for the grade with only a few mostly hidden abrasions. PCGS has only certified 27 examples in higher grades (6/15). *Ex: Carson Silver Collection / Los Angeles Signature (Heritage, 8/2009), lot 1996.*
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255V, PCGS# 7228

1894-O Dollar, Appealing MS64

- 5709 1894-O MS64 PCGS.** This better-date Morgan dollar shows a few luster grazes and ticks on Liberty's cheek and neck and in the left obverse field that determine the grade, amid much eye appeal and soft but thorough luster on both sides. The largely silver-white surfaces display a tinge of copper-gold near the rims. The moderate strike shows typical O-mint weakness on the hair over the ear. PCGS reports only 11 at the Gem level or finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 255W, PCGS# 7230

1894-O Silver Dollar, MS64 Vibrant Mint Bloom

- 5710 1894-O MS64 PCGS.** The 1894-O Morgan dollar is plagued by poor strikes and deficient luster, and extensive cherrypicking is needed to locate an attractive representative. This Choice example exhibits the usual weakness on the hair above Liberty's ear and the eagle's breast, but the surfaces display uncharacteristically vibrant, untuned mint luster so as to fully balance the visual appeal. As only 11 coins have been certified numerically finer at PCGS (6/15), this well-preserved piece represents an important opportunity for the advanced specialist. NGC ID# 255W, PCGS# 7230

**1894-O Morgan Dollar, MS64
Few Seen Finer**

5711 1894-O MS64 PCGS. An attractive Choice specimen of this challenging branch mint issue, with well-detailed design elements that show just a touch of softness on the hair above the ear. The well-preserved surfaces are lightly toned and vibrant mint luster radiates from both sides. PCGS has graded 11 numerically finer examples (7/15). NGC ID# 255W, PCGS# 7230

5712 1894-S MS62 PCGS. CAC. Copious cartwheel luster occupies both sides of this untoned better-date dollar. Scattered marks account for the grade, but the eye appeal is good. Light roller marks appear under a loupe throughout the obverse and in the lower portion of the reverse. A couple of small die-grease spots on the obverse are undistracting.
From The College Collection, Part Two. NGC ID# 255X, PCGS# 7232

5713 1894-S MS63 NGC. The lustrous silver-gray surfaces of this Select S-mint Morgan exhibit well-struck design features, including a modicum of detail in the hair above Liberty's ear. Scattered contact marks limit the grade. Die polish lines, a typical feature of this issue (Bowers, 2007), are visible in the obverse field. The 1894-S is available in MS63 and MS64 grades, but finer examples are difficult to locate. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS64+
Radiant Mint Luster**

5714 1894-S MS64+ PCGS. CAC. The well-preserved surfaces of this impressive Morgan dollar are mostly brilliant, with some delicate highlights of pale gold toning. Vibrant mint luster is evident on both sides and the design elements exhibit razor-sharp definition throughout. Eye appeal is outstanding. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, Untoned MS65
Lavish Cartwheel Luster**

5715 1894-S MS65 PCGS. Lavish cartwheel luster rides the surfaces on both sides of this untoned silver-white Gem 1894-S Morgan dollar. Liberty's cheek in particular, and the devices elsewhere in general, are well-preserved and free of post-Mint distractions, although some light roller marks, as made, appear on the cheek. This issue is much more elusive in MS66 and finer grades, where PCGS reports only 15 submissions (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS65
Outstanding Visual Appeal**

5716 1894-S MS65 PCGS. CAC. Speaking of the 1894-S Morgan dollar, Q. David Bowers opines "MS-65 coins are difficult to find." The present Gem specimen displays brilliant fields and dazzling mint luster. The coin offered here is certified in an old green-label holder and is almost fully struck; the eye appeal is outstanding. A few shallow roller marks above the ear and on the cheek can be detected with a glass. PCGS lists only 15 numerically finer representatives (6/15).
Ex: FUN Signature (Heritage, 1/2010), lot 3030. NGC ID# 255X, PCGS# 7232

5717 1895-O AU55 PCGS. Broad luster remains in the pale silver-gray fields. Minor wear is noted on the high points and to the left of the eagle. Scattered minor marks contribute to the grade of this semikey coin. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, Lustrous AU58

5718 1895-O AU58 NGC. The scarcity of the 1895-O Morgan in Mint State heightens demand for better AU representatives, such as this Borderline Uncirculated piece. The strike is bold and only trivial friction is evident over the high points of the design. Light golden toning accentuates the luster that illuminates the fields. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58
Semiprooflike Fields

- 5719 1895-O AU58 PCGS.** The 1895-O is a scarce semikey date in Mint State, out of reach for many budget-conscious collectors. This Borderline Uncirculated example offers excellent detail at a more affordable grade level, with noticeably semiprooflike fields. Both sides show golden-gray toning and have few detracting abrasions. Without a doubt, this is one of the finer AU examples we have handled. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58
Semiprooflike Slider

- 5720 1895-O AU58 PCGS. CAC.** Years ago, this near-Mint dollar would most likely be a strong candidate for Mint State holder, and that still may be the case. The brilliant luster and semiprooflike fields are terrific for the grade, and the strike is extra-sharp for the New Orleans issue. Abrasions on and near the chin and a scuff around star 8 are the most likely deterrents to a confirmed Uncirculated designation. CAC endorsed for quality. NGC ID# 255Y, PCGS# 7236
- 5721 1895-S AU50 PCGS.** Speckles of brownish-gray patina gravitate to the borders of this AU Morgan. Traces of luster are visible in the recessed areas. A few minute marks are in line with the grade designation, however, these are less severe than typically seen on this issue that has been heavily bagmarked, even in Uncirculated grades. NGC ID# 255Z, PCGS# 7238
- 5722 1895-S AU55 PCGS.** A Choice AU example of this low-mintage Morgan dollar issue, with just a trace of high-point wear and lightly abraded surfaces that retain much of their original mint luster. NGC ID# 255Z, PCGS# 7238

1895-S Morgan, AU58
Lustrous Fields

- 5723 1895-S AU58 NGC.** Dusky champagne-gray toning graces the still-lustrous surfaces of this near-Mint 1895-S Morgan dollar. The design elements are boldly rendered and show friction only on the high points of the eagle's breast and the hair above Liberty's ear. A few scattered abrasions are as expected for the grade. NGC ID# 255Z, PCGS# 7238

- 5724 1895-S — Reverse Repaired — NGC Details. Unc.** A portion of the eagle's right (facing) wing is smoothed, and the nearby field is hairlined. The lustrous obverse is problem-free. The reverse has a broad diagonal area of brilliance, while the remainder of that side is richly toned sea-green and rose-red. NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, MS63
Better Date in Mint State

- 5725 1895-S MS63 PCGS.** Mint State examples of this better San Francisco issue are infrequently seen finer than the currently offered MS63 coin. Well-struck design elements are accentuated by semiprooflike fields and a lack of all toning save for a hint of champagne color. A few light, scattered abrasions limit the grade. NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, MS64
Only 400,000 Minted

- 5726 1895-S MS64 PCGS.** In Mint State grades, the 1895-S is the only reasonably obtainable Morgan dollar of the year. This example is a splendid Choice Mint State dollar with brilliant silver surfaces. Light field reflectivity surrounds the lustrous devices. The obverse is untoned and the reverse exhibits delicate champagne hues. NGC ID# 255Z, PCGS# 7238

5727 1895-S/S VAM-3 AU50 NGC. A Hot 50 Variety. Although undesignated on the NGC insert, this is the variety with the mintmark initially entered widely left and tilted, then corrected. A curve from the first mintmark impression remains visible, northwest of the primary mintmark. A lightly toned example with ample border luster and moderate field marks beneath the eagle's wings. PCGS# 134020 Base PCGS# 7238

5728 1896 MS67 NGC. Iridescent rainbow toning on the obverse and a brilliant reverse likely result from years spent in an old Whitman folder. The impeccably preserved surfaces are free of marks, further suggesting this Superb Gem was set aside following the releases of the mid-20th century. Census: 70 in 67 (7 in 67 ★, 1 in 67+★), 4 finer (7/15). NGC ID# 2562, PCGS# 7240

5729 1896 MS67 PCGS. The 1896 Morgan, claiming a mintage approaching 10 million pieces, is plentiful in mint condition. Superb Gems such as the present offering are very scarce, however, and finer specimens are extremely rare. Luster radiates from both sides, each of which is untuned and well-struck. Impeccably preserved surfaces further enhance the coin's pleasing eye appeal. PCGS has graded just two examples finer (7/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2562, PCGS# 7240

5730 1896 MS67 PCGS. This coin is a bright, mostly brilliant, and sharply struck Superb Gem Morgan dollar. Whispers of gold color concentrate at the borders. A superficial abrasion is noted just above Liberty's eye, but the overall quality of the coin is exceptional. PCGS has certified only two numerically finer examples (6/15). NGC ID# 2562, PCGS# 7240

5731 1896 MS67 PCGS. Radiant luster issues from the silver-white, impeccably preserved surfaces of this Superb Gem Morgan. Sharp definition is apparent on the design elements, including strong detail in the hair above Liberty's ear. These attributes add up to outstanding eye appeal. PCGS has graded just two submissions finer (7/15). NGC ID# 2562, PCGS# 7240

1896 Dollar, MS66 Deep Mirror Prooflike White-on-Black Cameo Contrast

5732 1896 MS66 Deep Mirror Prooflike PCGS. This remarkable Premium Gem is so deeply mirrored in the fields that at first glance it could be mistaken for a proof. The devices are sharp and starkly contrasted against the mirrors, and the surfaces are devoid of toning. The 1896 is a plentiful Philadelphia issue in the absolute sense, but Deep Mirror Prooflike examples are rarely encountered this well-preserved. Population: 18 in 66 Deep Mirror Prooflike, 1 finer (7/15). NGC ID# 2562, PCGS# 97241

5733 1896-O MS61 NGC. A veneer of soft russet patination covers portions of this O-mint Morgan dollar. The design elements are relatively well-struck, including some detail in the hair over Liberty's ear. Small marks and scuffs on Liberty's cheek and neck help to determine the grade. Nonetheless, taking the coin as a whole, these are fewer than what might be expected for the grade designation. NGC ID# 2563, PCGS# 7242

5734 1896-O MS61 NGC. This attractive Mint State branch mint Morgan dollar exhibits well-detailed design elements, with just a touch of the usual softness on the hair above Liberty's ear. The lustrous surfaces show a minimum number of minor contact marks for the grade. NGC ID# 2563, PCGS# 7242

5735 1896-O MS62 PCGS. Silver-gray lustrous surfaces exhibit well-struck design features, including a modicum of detail in the hair over Liberty's ear. The distributed minute marks are in concert with the grade designation. NGC ID# 2563, PCGS# 7242

1896-O Silver Dollar, MS63 Lightly Toned and Lustrous

5736 1896-O MS63 PCGS. Despite a mintage of 4.9 million coins, the 1896-O Morgan dollar is elusive in pleasing Mint State condition. This Select example shows an above-average strike for the issue, with satiny luster shining through golden-gray toning on each side. Grade-consistent abrasions are largely minor in nature, posing little distraction. PCGS has seen only 32 numerically finer submissions (7/15). NGC ID# 2563, PCGS# 7242

1896-O Dollar, MS63 An Attractive Example of the Issue

5737 1896-O MS63 PCGS Secure. For all practical purposes, this New Orleans issue is impossible to find in Select Uncirculated condition with attractive surfaces and appealing mint luster. While nearly 300 coins have achieved the MS63 grade at PCGS (and about half that number at NGC), few display an even moderately sharp strike and most are bagmarked with poor luster. This lustrous coin is an exception, with few marks for the grade and considerable eye appeal. The obverse fields are nearly unmarked, while the strike is above average for the issue. Glints of gold toning appear mainly at the reverse margins. Just 32 coins are numerically finer at PCGS (6/15).
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2563, PCGS# 7242

**1896-O Morgan Dollar, MS63
Unusual Quality and Eye Appeal**

- 5738 1896-O MS63 PCGS. CAC.** The 1896-O Morgan dollar was not a well-produced issue, and few examples were saved by contemporary collectors or preserved in government storage. As a result, the 1896-O is one of the most challenging issues of the series in attractive high-grade condition. This impressive Select specimen displays sharp definition on all design elements and vibrant mint luster on both sides. A few minor contact marks are distributed about the unusually clean surfaces. PCGS has certified 32 numerically finer examples (7/15). NGC ID# 2563, PCGS# 7242

**1896-S Morgan Dollar, MS64
Scarce Any Finer**

- 5739 1896-S MS64 PCGS. CAC. VAM-2.** The date is lightly repunched north, visible most noticeably at the top curve of the 6. Mottled peach-gold and ice-blue toning enhance the lustrous silver surfaces of this near-Gem dollar. Struck from cracked dies on both sides, yet the strike is uniformly bold — especially at the centers. A few bagmarks dot the obverse, contributing to the assigned grade. PCGS reports just 77 coins numerically finer (6/15). NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, Beautiful MS64+
Radiant Mint Brilliance on Each Side**

- 5740 1896-S MS64+ PCGS. CAC.** A production of 5 million coins belies just how challenging the 1896-S is in the upper tiers of Uncirculated condition. Dave Bowers suggests 1 million or so pieces were put into circulation, a small quantity remained in storage at the San Francisco Mint, and the rest were melted. This near-Gem has fully brilliant surfaces and surprisingly few abrasions on the reverse. Parallel roller marks appear over lightly struck centers with strong detail elsewhere. PCGS reports just 80 finer submissions (7/15) NGC ID# 2564, PCGS# 7244

- 5741 1897 MS66 PCGS. Ex:** Larry Shapiro. A hint of golden-gray toning graces the otherwise brilliant surfaces. A lustrous and precisely struck Premium Gem. Uncommonly free from contact. Larry Shapiro is best known for his remarkable PCGS Registry Set of Mercury dimes, auctioned by Heritage in our 2006 FUN Signature. *Ex: Long Beach Signature (Heritage, 10/2001), lot 7606, which realized \$977.50. NGC ID# 2565, PCGS# 7246*

1897 Silver Dollar, Top-Grade MS67

- 5742 1897 MS67 PCGS.** Liberty's cheek is completely free of distractions, as are the surfaces overall, untuned, frosty-white, well-struck, and impeccably preserved. The 2.8 million coins minted for the 1897 Morgan make it a common coin in lower grades but a conditional rarity at the Superb Gem level. Population: 30 in 67 (1 in 67+), 0 finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2565, PCGS# 7246*

- 5743 1897-O MS62 PCGS.** Moderate luster and minimal marks for the grade create good eye appeal on this O-mint Morgan, which shows a typical strike on the hair above the ear and the eagle's breast. The surfaces are untuned save for a light golden hue. NGC ID# 2566, PCGS# 7248

1897-O Morgan, Untoned MS63

- 5744 1897-O MS63 PCGS.** The untuned silver-white surfaces on this Select 1897-O Morgan host ample luster and good eye appeal, despite the smattering of small marks that determine the grade, most of them minor. A couple of small ticks on Liberty's cheek and neck are the most obvious, yet still undistracting. The certified populations at PCGS thin out rapidly in finer grades than this MS63 piece: Only 36 are reported in MS64, with 13 finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 2566, PCGS# 7248*

1897-O Silver Dollar, Lustrous MS63

5745 1897-O MS63 NGC. This 1897-O Morgan is lightly abraded, as the grade suggests, but exhibits unusually vibrant, frosty luster for the issue. The strike is also above-average, and the overall eye appeal is simply pleasing. Few finer examples are certified, and the date is rare in Gem condition. NGC lists 34 numerically finer representatives (6/15). NGC ID# 2566, PCGS# 7248

5746 1897-S MS66 PCGS. The well-preserved surfaces of this impressive Premium Gem display vibrant mint luster on both sides, with a few hints of golden-tan toning. The design elements are sharply detailed and eye appeal is outstanding. PCGS has graded 25 numerically finer examples (7/15). NGC ID# 2567, PCGS# 7250

1897-S Dollar, MS67 Two Finer at PCGS

5747 1897-S MS67 PCGS. The 1897-S is a high-mintage issue within the Morgan dollar series, struck to an extent exceeding 5.8 million coins, but most survive today either circulated or in the lower Mint State grades. This Superb Gem is among just 23 such at PCGS, which has seen but two pieces numerically finer (6/15). This piece hosts thoroughgoing mint luster on pristine silver-white surfaces that are uniformly frosty and show a slight glint of cinnamon at the rims. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2567, PCGS# 7250

1898 Morgan Dollar, Satiny MS67

5748 1898 MS67 PCGS. Although a large PCGS population is recorded for 1898 silver dollars, they are elusive at the Superb Gem level. This majestic Morgan has satiny silver surfaces and bold design motifs, with only slight merging of the hair strands over Liberty's ear. Both sides are brilliant and untuned, with exceptional eye appeal. Population: 81 in 67 (4 in 67+), 0 finer (6/15). Ex: *ANA Signature (Heritage, 10/2012), lot 4976*. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2568, PCGS# 7252

5749 1898 MS65 Deep Mirror Prooflike PCGS. *A Guide Book of Morgan Silver Dollars* explains that 1898 "DMPL coins with cameo contrast are rare indeed." The watery mirrors on this Gem example surround frosty devices on both sides. Sharply struck and minimally marked with light champagne-gold tones peripherally. NGC ID# 2568, PCGS# 97253

5750 1898-O MS67 PCGS. Before the Treasury release half-a-century ago, the 1898-O Morgan dollar was a premier rarity in the series. Nearly all of those that survived the melting pot following passage of the 1918 Pittman Act remained in storage until the early 1960s. Today, Superb Gem representatives are plentiful and extremely popular with type collectors and Morgan dollar aficionados. This sharply struck example, tied for the finest that PCGS has certified (7/15), is highly lustrous and fully brilliant with untuned silver surfaces. NGC ID# 2569, PCGS# 7254

5751 1898-O MS67 PCGS. CAC. Ex: STP Legacy Collection. This impressive Superb Gem offers well-detailed design elements and well-preserved lustrous surfaces that show light shades of golden-tan toning. PCGS has graded no coins in higher numeric grades (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 2569, PCGS# 7254

5752 1898-S MS65 PCGS. This brilliant Gem shows reflective surfaces on both sides that appear to merit a Prooflike designation. The portrait of Liberty is thickly frosted with a touch of incompleteness over the ear. The eagle's breast is also a bit soft, but the overall impression is sharp. NGC ID# 256A, PCGS# 7256

1898-S Silver Dollar, Bold MS66

5753 1898-S MS66 PCGS. Wisps of gold-tan color around the margins show under high magnification, and pleasing luster emanates from well-cared-for surfaces. The strike is bold on each side, despite the characteristic minor softness apparent on the hair over Liberty's ear. Population: 81 in 66 (5 in 66+), 3 finer (6/15). Ex: *Summer FUN Signature (Heritage, 7/2007), lot 1683; FUN Signature (Heritage, 1/2009), lot 4771*. From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256A, PCGS# 7256

1898-S Dollar, Untoned MS66+

5754 1898-S MS66+ PCGS. CAC. This frosty Premium Gem is untuned and shows only a few minimal marks on Liberty's cheek, and two faint scrapes on the neck. Two reeding marks show on the eagle's breast, along with a squiggly, curving wire mark in the same area. The strike is quite nice and sharp, and the fields are largely mark-free. Top-notch eye appeal. Population: 81 in 66 (5 in 66+), 3 finer (7/15). NGC ID# 256A, PCGS# 7256

5755 1899 MS66 PCGS. Strongly struck and snow-white with captivating luster. This 19th century issue is borderline scarce in Premium Gem condition and a clear rarity any finer, with just 19 coins rated MS67 or finer known to PCGS (6/15).

Ex: *Long Beach Signature* (Heritage, 6/2006), lot 2690. NGC ID# 256B, PCGS# 7258

5756 1899 MS66 NGC. A bright silver beauty with a strong cartwheel effect and minimal patina. Detail is surprisingly good on the hair over Liberty's ear. A small dot of toning is noted over the A in STATES on the reverse. Census: 73 in 66 (1 in 66+), 3 finer (7/15). NGC ID# 256B, PCGS# 7258

5757 1899 MS66 NGC. Sharply struck, particularly on the hair over Liberty's ear. A frosty, lustrous example of this popular issue of the late 19th century. Census: 73 in 66 (1 in 66+), 3 finer (6/15). Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5520. NGC ID# 256B, PCGS# 7258

1899 Morgan Dollar, MS66 Remarkably Well-Preserved

5758 1899 MS66 PCGS. CAC. Well-defined and brightly lustrous with immense eye appeal. Largely silver-white surfaces show only a brief hint of pale peach toning in Liberty's forecurls. The cheek is entirely smooth and free of marks. CAC endorsed, housed a blue-label holder. PCGS has graded just 19 finer pieces (7/15).

Ex: *Long Beach Signature* (Heritage, 9/2009), lot 1176. NGC ID# 256B, PCGS# 7258

1899 Morgan Dollar, MS66+ Thickly Frosted and Untoned Semikey

5759 1899 MS66+ PCGS. CAC. A well-known semikey, the 1899 tends to be more available than its low mintage of 330,000 coins suggests. Unopened bags were dispersed throughout the 1950s and 1960s, and seemingly freshly minted Gems are readily collectible. The 1899 is scarcely seen in Premium Gem condition and rarely with a Plus designation. This gorgeous MS66+ is thickly frosted, untoned and strongly defined, representing the upper level of quality for the grade. Two small nicks around Liberty's mouth preclude a Superb Gem assessment.

From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256B, PCGS# 7258

5760 1899 MS65 Deep Mirror Prooflike PCGS. This spectacular Gem Morgan dollar exhibits sharply detailed frosty design elements that contrast boldly with the reflective prooflike fields. Only minor signs of contact are evident and eye appeal is outstanding. Population: 51 in 65 Deep Mirror Prooflike, 12 finer (7/15). NGC ID# 256B, PCGS# 97259

5761 1899-O MS67 PCGS. Pleasing cartwheel luster swirls over the silver-white surfaces of this Superb Gem O-mint Morgan. The design features are well-defined and the few light marks are within the parameters of the designated grade. Examples grading MS67 will require some diligent searching, and are the finest that are likely to be encountered. PCGS has seen a solitary piece finer and NGC has graded none finer (7/15).

Ex: *FUN Signature* (Heritage, 1/2004), lot 9073.

From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256C, PCGS# 7260

1899-O Morgan, MS67 Multihued Two-Sided Toning

5762 1899-O MS67 NGC. CAC. The strike and surface quality of this Superb Gem dollar are exemplary, yet they are second fiddle to the intense, multihued toning that covers both sides. Coppery-gold and ocean blue tones predominate on the obverse, with rainbow shades of ruby-red, orange, lime-green, and yellow-gold on the reverse. Mint luster shines through the variegated patina. No examples are certified numerically finer at NGC, and a single coin at PCGS ranks higher (7/15). NGC ID# 256C, PCGS# 7260

1899-O Dollar, Stunning MS67

5763 1899-O MS67 PCGS. CAC. Although the 1899-O Morgan dollar issue is common even in the Superb Gem grade level, few attain the beauty and high eye appeal of this stunning untoned example, which has garnered the added CAC designation as well. The focal points are mostly mark-free (one small hit shows on the eagle's breast), and the strike is better than expected. CAC has certified only 33 in this grade (7/15). NGC ID# 256C, PCGS# 7260

5764 1899-O MS66 Prooflike PCGS. The design elements are well struck, the fields are richly reflective, and there are few marks on either side of this lovely, prooflike Premium Gem. Population: 15 in 66 (1 in 66+) Prooflike, 0 finer (7/15). NGC ID# 256C, PCGS# 7261

**1899-O Dollar, MS66 Deep Mirror Prooflike
Outstanding Surface Quality**

5765 1899-O MS66 Deep Mirror Prooflike PCGS. The 1899-O Morgan is usually regarded as a common date, however its availability plummets in the Deep Mirror Prooflike category. This Premium Gem example is among the finer-known representatives. Sharp, frosty motifs provide pleasing contrast against the mirrored fields, while hints of light golden toning intrude from the peripheries. Population: 19 in 66 (1 in 66+) Deep Mirror Prooflike, 2 finer (6/15). NGC ID# 256C, PCGS# 97261

5766 1899-O Micro O, VAM-6, MS61 PCGS. A Top 100 Variety. The date is placed far left, the mintmark is tilted right, and a confirming die line connects the eagle's right wing and rear neck-feathers. This variety is ranked R.5 by VAMWorld and seldom seen in Mint State. This is an attractive untuned example with a light golden cast and good eye appeal despite minor, unobtrusive marks. For the Micro O varieties, Population: 2 in 61, 5 finer (7/15). PCGS# 133948 Base PCGS# 87260

5767 1899-S MS65 PCGS. Minimally toned and brightly appealing with powerful obverse luster in particular. Solid detail on the hair over the ear is a welcome bonus on this Gem. NGC ID# 256D, PCGS# 7262

5768 1899-S MS65 PCGS. Splendid cartwheel luster rolls around each side of this untuned Gem 1899-S, a boldly struck coin with great eye appeal and a clean cheek on Liberty. A pair of reeding marks show on the eagle's breast, which is otherwise equally well-preserved. NGC ID# 256D, PCGS# 7262

1899-S Dollar, Sharp MS66

5769 1899-S MS66 PCGS. Whispers of light tan and gray patina appear over the lustrous surfaces of this Premium Gem, especially on the reverse, and the design features are generally well-impressed, save for typical minor softness on the hair above Liberty's ear. A nicely preserved piece. PCGS reports only 10 submissions in MS67 (one MS67+) (6/15).

Ex: Long Beach Signature (Heritage, 2/2009), lot 1939; Central States Signature (Heritage, 4-5/2009), lot 3200.

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256D, PCGS# 7262

5770 1899-S MS65 Prooflike PCGS. The well-preserved surfaces of this impressive Gem are mostly brilliant, with a few highlights of golden-tan toning and strong prooflike reflectivity in the fields. The design elements are sharply detailed throughout. Population: 42 in 65 Prooflike, 4 finer (7/15). NGC ID# 256D, PCGS# 7263

5771 1900 MS66+ PCGS. CAC. This high-end Premium Gem displays creamy pristine surfaces with vibrant frosty mint luster. The design elements show just a touch of softness on the hair strands above Liberty's ear. Overall visual appeal is terrific. NGC ID# 256E, PCGS# 7264

**1900 Morgan Dollar, MS67
Completely Brilliant, Nearly Flawless**

5772 1900 MS67 PCGS. This Superb Gem is a must for the Morgan dollar enthusiast who desires a frosty, entirely brilliant example of unsurpassed technical quality. Both the obverse and reverse are devoid of even the faintest trace of toning, and bagmarks are nearly unseen. Sharply struck overall with moderate central softness over Liberty's ear and the eagle's breast. Population: 38 in 67 (3 in 67+), 0 finer (7/15).

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256E, PCGS# 7264

5773 1900-O MS67 PCGS. The 1900-O Morgan dollar, with a mintage exceeding 12 million pieces, is a readily available issue through Premium Gem. MS67 examples are elusive, however, and finer pieces are virtually unobtainable. Strong luster emanates from the untuned surfaces that exhibit well-struck design elements, including the hair over Liberty's ear and the eagle's breast feathers. Both sides are impeccably preserved. Population: 62 in 67 (4 in 67+), 0 finer (7/15).

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. NGC ID# 256F, PCGS# 7266

**1900-O/CC Dollar, MS66
VAM-10A, Top 100**

5774 1900-O/CC VAM-10A MS66 PCGS. A Top 100 Variety. The base of both Cs in the Carson City mintmark are apparent, bookending the New Orleans mintmark. The late die state with a clashed N (from IN) on the obverse field near Liberty's neck. A brilliant Premium Gem with potent luster, a good strike, and exceptionally mark-free fields. The portrait displays only delicate contact.

From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars. PCGS# 133962 Base PCGS# 7268

5775 1900-S MS65 NGC. The brilliant surfaces show little contrast but great luster on this untuned Gem better-date S-mint. Liberty's cheek shows a few light vertical roller marks, as made, but post-Mint abrasions are few throughout both sides. NGC ID# 256H, PCGS# 7270

5776 1900-S MS65+ NGC. Blushes of cobalt-blue, plum, and golden-amber patina adorn the rims, while the interior portions of this well-detailed high-end Gem remain largely brilliant. Light marks are not overly distracting, and the only noteworthy flaw is a linear depression below PL(URIBUS). NGC reports just 27 pieces finer (7/15). NGC ID# 256H, PCGS# 7270

**1900-S Morgan Dollar, MS66
Green Label Holder**

- 5777 1900-SMS66PCGS. CAC.** Glimpses of straw-gold toning are noted near PLURIBUS, but this highly lustrous and high grade silver dollar is otherwise close to brilliant. The strike is good, and the eye appeal is attractive. Significantly scarcer than its 1900-dated New Orleans and Philadelphia counterparts. Certified in a green label holder.
Ex: Long Beach Signature (Heritage, 5/2001), lot 6628.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
NGC ID# 256H, PCGS# 7270

- 5778 1901 AU58 PCGS. CAC.** Just a whisper of wear crosses the high points of this still-lustrous 1901 dollar. Both sides remain brilliantly light silver with a few dusky elements in the reverse fields. Housed in a green-label PCGS holder. NGC ID# 256J, PCGS# 7272

1901 Silver Dollar, Satiny MS60

- 5779 1901 MS60 NGC.** An affordable Mint State example of this conditionally challenging Philadelphia issue. This piece displays brilliant, satiny luster with light, scattered abrasions as noted by the grade. Some typical striking weakness on the eagle's breast and the hair above Liberty's ear is not overly obvious. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62
Attractively Lustrous**

- 5780 1901 MS62 NGC.** This Mint State 1901 Morgan dollar exhibits satiny silver-gray luster with hints of golden toning around the peripheries. Light, scattered surface grazes limit the grade, but no singularly significant abrasions are present. This piece shows only a touch of striking softness on the eagle's breast and the hair above Liberty's ear. NGC ID# 256J, PCGS# 7272

**1901 Silver Dollar, Choice AU
Doubled Die Reverse, VAM-3
Important Guide Book Variety**

- 5781 1901 Doubled Die Reverse, VAM-3, AU55 PCGS.** *Ex: Jeffrey M. Cohen. A Top 100 Variety.* The reverse is die doubled north, with the spread most impressive on the branch, arrows, and tail feathers. Listed in the *Guide Book*, and among the most popular die varieties of the series. Only a handful of Uncirculated examples are known. The present untoned example has substantial peripheral luster and lacks any mentionable marks.
From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.
PCGS# 133965 Base PCGS# 7302

**1901 Morgan, Lustrous AU55
VAM-3, 'Shifted Eagle'**

- 5782 1901 Doubled Die Reverse, VAM-3, AU55 PCGS.** A Top 100 Variety. Popularly known as the "Shifted Eagle" variety, VAM-3 shows bold die doubling on most reverse design elements, and is recognized as one of the must-have varieties of the Morgan dollar series. This Choice AU representative displays still-lustrous fields with a hint of golden toning. The high points of the devices show trivial wear. Population: 34 in 55, 16 finer (6/15). PCGS# 133965 Base PCGS# 7302

- 5783 1901-O MS66 PCGS. CAC.** The well-detailed design elements of this impressive Superb Gem show just a trace of the usual softness on the hair above the ear and the lustrous surfaces display highlights of pale gold and lavender-gray toning. PCGS has graded four numerically finer examples (6/15). NGC ID# 256K, PCGS# 7274

- 5784 1901-S MS64+ PCGS. CAC.** Splashes of cobalt-blue, lavender, and reddish-orange patina gravitate to the borders of this high-end near-Gem Morgan. Minimal contact marks are evident on the lustrous surfaces, though roller marks are visible on both sides. Pleasing overall eye appeal, appropriately recognized by CAC. NGC ID# 256L, PCGS# 7276

**1901-S Morgan Dollar, MS65
Rainbow Toning, Sharp Strike**

- 5785 1901-S MS65 NGC.** Shades of blue, violet, and sunset-gold grace both sides of this Gem San Francisco issue, which becomes scarce at this grade level and notably rare any finer. The strike is often problematic on the 1901-S, yet only slight central blending can be seen on this well-produced example. Mint luster glows beneath the vibrant colors. NGC reports just six numerically finer examples (6/15). NGC ID# 256L, PCGS# 7276

**1901-S Dollar, MS66
Prohibitively Rare Any Finer**

- 5786 1901-S MS66 PCGS.** This is one of the more elusive S-mint issues in the series. Bowers (2007) estimates that only 30 to 45 examples survive in this rarified grade. Swirling cartwheel luster rolls over all-brilliant surfaces on each side of this Premium Gem. A small grouping of minor ticks is concentrated around the point of Liberty's bust. We have only seen a single example of the 1901-S finer (MS67 PCGS), which realized \$42,300 in our February 2015 Dallas Signature sale. Population: 34 in 66 (3 in 66+), 3 finer (7/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256L, PCGS# 7276

- 5787 1902 MS66+ PCGS. CAC.** The silver-gray surfaces of this high-end Premium Gem Morgan yield pleasing luster and well-struck design elements, including ample definition in the hair above Liberty's ear. Both sides have been well-cared for. The 1902 becomes elusive any finer, evidenced by PCGS having graded fewer than 30 such examples (7/15). NGC ID# 256M, PCGS# 7278

1902 Morgan Dollar, Top-Grade MS67

- 5788 1902 MS67 PCGS.** The 1902 Morgan dollar claims a large mintage of nearly 8 million pieces, and this coin is among the finest survivors of that notable production. Razor-sharp definition is apparent on all design elements, and both sides radiate vibrant mint luster. A few hints of pale gold toning enhance the top-notch eye appeal. Population: 29 in 67 (2 in 67+), 0 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256M, PCGS# 7278

- 5789 1902-O MS66+ PCGS.** Bright silver luster with only a hint of pale blue visiting the surfaces. Well-defined overall, if a trifle soft on the hair over the ear. Carefully preserved and attractive. PCGS has graded just 16 pieces as MS67 or better (7/15). NGC ID# 256N, PCGS# 7280

**1902-S Morgan, Silver-White MS66
Good Eye Appeal and Preservation**

- 5790 1902-S MS66 NGC.** Liberty's cheek and mouth show only small, trivial ticks and luster grazes on this better-date S-mint, but a couple of larger hits on the eagle's breast likely help account for the grade. The eye appeal and preservation are nonetheless quite high on this untoned example. Roller marks on the cheek could go unnoticed without a loupe and careful scrutiny. Census: 9 in 66, 0 finer (7/15). NGC ID# 256P, PCGS# 7282

**1902-S Dollar, MS66
Ex: Bella Collection**

- 5791 1902-S MS66 PCGS Secure.** Ex: Bella. This low mintage issue had production halted after 1.53 million coins were produced, and survivors, while available, are elusive in higher grades. This lustrous Premium Gem exhibits delicate almond-gold and pearl-gray toning. The centers show moderate incompleteness. The Bella Collection of Morgan dollars, a high-ranking PCGS Registry Set, was purchased by Legend Numismatics in 2013 for a price in excess of \$3,000,000. Population: 42 in 66 (3 in 66+), 4 finer (6/15). From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256P, PCGS# 7282

- 5792 1903 MS67 PCGS.** Ex: David S. Emery. Wisps of light gold, violet, and ice-blue toning grace the surfaces of this attractive Superb Gem. The fields are virtually mark-free, and vibrant mint luster shines beneath the patina. This coin combines outstanding eye appeal and the highest available technical grade from PCGS. Population: 91 in 67 (1 in 67+), 0 finer (6/15).
Ex: *Summer FUN Signature* (Heritage, 7/2011), lot 4212.
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256R, PCGS# 7284

**1903 Morgan Dollar, MS67
Among the Finest at PCGS**

- 5793 1903 MS67 PCGS. CAC.** This late-date Philadelphia issue only becomes scarce at the Superb Gem level, and finer coins are virtually unknown. The devices show needle-sharp detail with the hair strands over Liberty's ear boldly defined. Even the wrinkles on the eagle's talons are fully delineated. Radiant surfaces are entirely brilliant with coruscating mint frost, and there are no singular marks to report. Population: 91 in 67 (1 in 67+), 0 finer (7/15).
NGC ID# 256R, PCGS# 7284

- 5794 1903 MS65 Prooflike PCGS.** Even though struck in an amount exceeding 4.6 million coins, the 1903 Morgan dollar seldom appears in high grade with prooflike surfaces. This untuned piece shows generous luster and abundant contrast, a happy exception. Population: 34 in 65 Prooflike, 6 finer (7/15). NGC ID# 256R, PCGS# 7285

1903-O Morgan Dollar, Frosty MS67

- 5795 1903-O MS67 PCGS.** The 1903-O Morgan dollar was once upon a time among the rarest issues in the series, before bagfuls turned up in the Treasury holdings released circa 1962-65. Today it has among the highest "curiosity factor" quotients of any issues in the series, which in turn leads to much demand. The Superb Gem level is the top for the 1903-O, and this silver-white example boasts pristine preservation and top-notch frosty luster. Population: 73 in 67 (1 in 67+), 0 finer (6/15).
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256S, PCGS# 7286

- 5796 1903-O MS65 Prooflike PCGS.** A light coating of golden patina covers flashy, reflective fields. This is a well-defined, highly attractive representative of a New Orleans issue that is rarely seen with a Prooflike finish. Population: 26 in 65 Prooflike, 5 finer (7/15).
Ex: *Central States Signature* (Heritage, 5/2005), lot 9971. NGC ID# 256S, PCGS# 7287

**1903-O Dollar, MS65 Deep Mirror Prooflike
Gleaming, Brilliant Surfaces**

- 5797 1903-O MS65 Deep Mirror Prooflike NGC.** Quantities of 1903-O Morgan dollars survive in Mint State, but few exhibit Prooflike contrast and even fewer deserve the Deep Mirror Prooflike designation. This Gem example is brilliant and impressively reflective. The devices are well-struck for a New Orleans issue, showing satiny luster. No major abrasions are observed. Census: 5 in 65 Deep Mirror Prooflike, 1 finer (6/15). NGC ID# 256S, PCGS# 97287

- 5798 1903-S AU53 PCGS.** The 1903-S is a lower-mintage semikey that poses a challenge in Mint State condition. This collectible AU coin has bright silver surfaces with accents of pale gold in the recesses. The centers show expected blending, and marks are lightly scattered over each side. NGC ID# 256T, PCGS# 7288

1903-S Silver Dollar, MS62

- 5799 1903-S MS62 PCGS. CAC.** This delicately gold-toned Morgan dollar is housed in a first-generation PCGS holder. Both sides have satiny silver luster and sharp design motifs. The 1903-S is a scarce issue in the Morgan series with relatively few remaining in Treasury vaults in the 1960s. NGC ID# 256T, PCGS# 7288

**1903-S Silver Dollar, Radiant MS65
Elusive Late-Series Issue**

- 5800 1903-S MS65 PCGS.** Radiant cartwheel luster shows amid a scant trace of color on this largely untuned Gem 1903-S dollar. Faint hints of rose are scattered hither and yon. Were it not for a few trivial marks on Liberty's cheek and a couple of small luster grazes, this attractive coin might be eligible for an even finer grade. The 1903-S is among the more-elusive late-series S-mint issue in the Morgan series, seen in Gem and finer grades far less often than the 1902-S and a more often than the key 1904-S. PCGS reports only 40 submissions in higher grades (5/15).
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256T, PCGS# 7288

**1903-S Morgan Dollar, AU53
VAM-2 Micro S Variety**

- 5801 1903-S Micro S, VAM-2, AU53 PCGS. CAC.** A Top 100 Variety. Ex: Jeffrey M. Cohen. The minuscule S mintmark is centered beneath the bow and upright, far smaller than the normal S mintmark. The 1903-S Micro S variety is a popular one that is quite elusive in the higher grades, combining the absolute rarity of the 1903-S with the added conditional rarity of the variety. VAMWorld.com writes of the VAM-2 variety: "The 1903-S is a costly coin to begin with, but add this micro S and the price jumps considerably. In addition, condition plays a part in the rarity. VAM-2 coins are very hard to find in XF and above." This slightly circulated example alternates areas of untuned silver-white with rose-gold near the borders and some patches of deeper lilac, cinnamon, and cobalt-blue on the reverse. Minor high-point wear appears amid no singularly mentionable signs of contact. Population: 7 in 53, 6 finer (5/15). This piece is one of two in this grade with the CAC green approval sticker.
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
PCGS# 133967 Base PCGS# 7306

- 5802 1904 MS65 PCGS.** Most 1904 dollars are poorly struck and exhibit substandard luster (Bowers, 2007). The present Gem offering deviates from this profile. Its mint luster is thick and satiny, and the striking definition is above average, especially in the hair over Liberty's ear. Mostly brilliant, there is just a hint of golden toning present over the denticles on each side.
Ex: *Long Beach Signature* (Heritage, 2/2006), lot 2374; *FUN Signature* (Heritage, 1/2009), lot 4825.
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256U, PCGS# 7290

- 5803 1904 MS65 PCGS.** Dusky green-gold at the margins with blue-gray interiors that are lighter on the reverse. Considerable cartwheel luster pierces the patina on this late-date Gem. NGC ID# 256U, PCGS# 7290

**1904-O Dollar, MS67
None Finer at Either Service**

- 5804 1904-O MS67 PCGS.** New Orleans Morgan dollar production dropped to 3.7 million coins in 1904, representing the lowest total since 1895. Massive quantities were released from the Treasury vaults in the early 1960s, turning the previously ultra-rare 1904-O into a popular issue for type representation. Today, examples only become scarce at the MS67 grade level. This is an untuned Superb Gem with vibrant mint luster and boldly impressed devices. The surfaces are remarkably clean, as expected given the high technical assessment. Population: 43 in 67, 0 finer (6/15).
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.
NGC ID# 256V, PCGS# 7292

**1904-O Morgan, MS66 Deep Mirror Prooflike
In an Old Green Label Holder**

- 5805 1904-O MS66 Deep Mirror Prooflike PCGS. CAC.** Although a significant quantity of Mint State coins were turned up in the Treasury releases, the 1904-O Morgan dollar is still scarce in the higher reaches of the Deep Mirror Prooflike category. This Premium Gem shows gleaming mirror-like fields around satiny devices. Hints of light golden toning appear around the periphery, barely noticeable. Only a touch of striking softness is evident on the eagle's breast and the hair above Liberty's ear. Housed in an old green label holder. Population: 19 in 66 Deep Mirror Prooflike, 1 finer (7/15). NGC ID# 256V, PCGS# 97293

**1904-S Silver Dollar, MS63
Semiprooflike Fields**

- 5806 1904-S MS63 PCGS.** Consistent with the grade, this Select 1904-S Morgan dollar shows light, scattered abrasions, but these are almost insignificant in the shadow of the gleaming near-prooflike fields that deliver outstanding eye appeal. Amber-gold toning begins at the peripheries and lightens as it expands inward, leaving the central devices with a faint champagne hue. Some lightness of strike on the eagle's breast and the hair above Liberty's ear is not unusual for the issue. NGC ID# 256W, PCGS# 7294

**1904-S Silver Dollar, MS64
Pleasing for the Grade**

- 5807 1904-S MS64 PCGS.** A vibrantly lustrous, untuned example of this conditionally elusive San Francisco issue. Not unusual for the grade, there is minor striking weakness on the eagle's breast and the hair above Liberty's ear. Grade-limiting abrasions are at a minimum. The 1904-S is available through the MS64 level, but finer pieces are seldom seen. NGC ID# 256W, PCGS# 7294

**1904-S Silver Dollar, Satiny MS64+
Blaze-White and Attractive**

- 5808 1904-S MS64+ PCGS. CAC.** Those who prefer untuned Morgan dollars will find this example powerfully attractive. Granted both the PCGS Plus for high-end quality and CAC endorsement as an additional award, the coin is a true borderline Gem with a strike that is above average for the San Francisco issue. Marks are minimal on the obverse. A scrape through the A in States is noted, yet it is visible under magnification but mostly hidden to the naked eye. NGC ID# 256W, PCGS# 7294

**1904-S Morgan Dollar, MS64+
Attractive Luster and Toning**

- 5809 1904-S MS64+ PCGS. CAC.** From a late-series mintage of 2.3 million pieces, the 1904-S Morgan dollar is a challenging issue in grades above the MS64 level. This high-end Choice example is well-detailed and brightly lustrous, with well-preserved surfaces that are blanketed in shades of golden-brown and lavender toning. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, Luminous MS65
Outstanding Surface Quality**

- 5810 1904-S MS65 PCGS.** A beautiful example of this late-series S-mint. The 1904-S is only occasionally available in Gem condition and seldom finer. Luminous mint luster emanates from both sides, complementing pale gold, rose, and ice-blue patina amid excellent preservation. The strike through the central high points is a bit on the mushy side, as usually seen, but the lack of singular marks and lovely surfaces more than compensate. PCGS reports only 13 submissions in MS66 or finer grades (5/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 256W, PCGS# 7294

**1921 Morgan Dollar, MS66+
Terrific Luster, Frost-White Surfaces**

- 5811 1921 MS66+ PCGS. CAC.** It is hard to visualize a more appealing example of this massively minted Philadelphia issue, which is equally known for its easy availability yet lack of truly attractive representatives. This coin is razor-sharp and thickly frosted, with blazing silver luster. Aside for a handful of tiny marks and grazes, none of which are significant, the surfaces are wholly undisturbed. Population: 46 in 66+, 10 finer (6/15). NGC ID# 256X, PCGS# 7296

**1921 Morgan Dollar
High-End Premium Gem**

- 5812 1921 MS66+ PCGS. CAC.** The strike is needle-sharp on Liberty's portrait and the eagle, with full details throughout. A thick blanket of mint frost captures the brilliant cartwheel luster, which flashes across the frost-white surfaces that are entirely untuned. Only minor luster grazes and minor scuffs prevent an even finer grade. Excellent eye appeal, CAC endorsed. Population: 46 in 66+, 10 finer (6/15). NGC ID# 256X, PCGS# 7296

1921 Morgan Dollar, Frosty MS66+

- 5813 1921 MS66+ PCGS. CAC.** Generous frost-white luster complements untuned silver-white surfaces that show excellent preservation on this last-year 1921 Morgan dollar. A Superb Gem, only a skosh finer, would be a difficult upgrade to achieve, and this piece's CAC approval further separates it from most of its ilk. Population: 46 in 66+, 10 finer (6/15). *From The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars.* NGC ID# 256X, PCGS# 7296

- 5814 1921-D MS66 PCGS. CAC.** After production ceased in 1904, the Morgan dollar was again issued in 1921, prior to the introduction of the Peace dollar. Since the Denver Mint begun operations in 1906, the 1921-D is the only Morgan issued at that facility. This Premium Gem is a lovely example with satiny silver luster beneath dappled green and gold toning. NGC ID# 256Y, PCGS# 7298

5815 1921-D MS66 PCGS Secure. CAC. Ex: Sunnywood/Simpson. Stunning but unusual colors make this coin stand out, burnt orange around the peripheries of each side, moss-green moving inward, to violet and rose. A likely fingerprint in the center obverse is scarcely bothersome, given the otherwise-high eye appeal. The surfaces are unabraded and show great luster, despite the intense color. NGC ID# 256Y, PCGS# 7298

5816 1921-D MS66+ PCGS. CAC. Denver Morgan dollar output amount to 20.3 million coins in the facility's only year producing the design. Mottled album toning on each side shows a mix of blue, violet, and orange shades marginally with brilliant, frosty centers. Liberty's cheek is exceptionally clean. There are a mere eight submissions finer at PCGS (7/15). NGC ID# 256Y, PCGS# 7298

1921-S Morgan Dollar, MS66 None Graded Finer at PCGS

5817 1921-S MS66 PCGS. Morgan dollar collectors are well-aware that this San Francisco issue is — for all practical purposes — unobtainable any finer than MS66. Premium Gems are scarce enough, with lustrous and attractive coins such as the present example always in hot demand. The intense silver surfaces of this coin are well-struck and enriched with a faint dusting of reddish-gold patina. The luster is terrific. Population: 70 in 66 (2 in 66+), 0 finer (6/15). NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, MS66 Only One Coin Numerically Finer

5818 1921-S MS66 NGC. The 1921-S is the most challenging of the three final-year Morgan dollar issues to locate in high grades. This Premium Gem example shows brilliant, frosty luster, with unusually well-preserved surfaces. The eagle's breast and the lower wreath leaves show some of the usual striking softness. Census: 62 in 66 (3 in 66+, 3 in 66 ★), 1 finer (6/15). NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar Sharp, Untoned Premium Gem

5819 1921-S MS66 PCGS. This brilliant, frost-white silver dollar stands out for its sharp strike. The final-year Morgan dollars were struck in huge quantities at all three Mints, with scant regard for die wear. Perhaps this frosty Premium Gem was an early strike, given its bold overall detail including the eagle's lower extremities. Some blending on the wreath leaves prevents "full strike" status. Blazing mint luster and a clean cheek on Liberty compensate for the few field ticks seen on the reverse. Population: 71 in 66 (2 in 66+), 0 finer (7/15). NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, Brilliant MS66

5820 1921-S MS66 PCGS. This untuned Premium Gem 1921-S Morgan features sumptuous cartwheel luster that races around both sides. Only trivial marks are present amid top-notch eye appeal. Despite a mintage of nearly 22 million coins, the 1921-S issue has only 68 submissions in MS66 at PCGS and two MS66+ in the top spot (6/15).
From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1878 8 Tailfeathers Dollar, PR64 A Popular Low-Mintage Issue

5821 1878 8TF PR64 PCGS. CAC. The 8 Tailfeathers variety of the proof 1878 Morgan dollar claims a small estimated mintage of 500 pieces, and attractive examples are always in demand. This impressive Choice specimen exhibits sharply detailed devices and stunning iridescent gold and violet patina. The surfaces are deeply reflective beneath the toning. Population: 27 in 64, 21 finer (7/15).
Ex: *Pittsburgh Signature (Heritage, 10/2011)*, lot 4308 NGC ID# 2572, PCGS# 7311

- 5822 1879 PR62 PCGS.** Hints of champagne toning deepen to gold at the borders of this pleasing proof. Faint hairlines in the fields limit the grade, although they are barely noticeable. A pleasing example for a type set or proof Morgan collection. NGC ID# 27Z2, PCGS# 7314

1880 Dollar, Colorfully Toned PR65

- 5823 1880 PR65 PCGS.** Silver proof mintages were generous in 1880, but this Morgan dollar issue is seldom encountered in Gem condition. This delightful Gem is spectacularly toned in shades of gray, gold, lavender, and cobalt-blue, with reflective fields and well-detailed design elements. Population: 42 in 65, 52 finer (7/15). NGC ID# 27Z4, PCGS# 7315

**1885 Morgan Dollar, PR64 Cameo
Nicely Contrasted Surfaces**

- 5824 1885 PR64 Cameo NGC. CAC.** This well-struck near-Gem Cameo proof displays frosty devices and reflective fields of champagne-pink and pale lilac. The surfaces are well-preserved, and the fields set up nice contrast against the devices. Census: 15 in 64 Cameo, 46 finer (7/15).
Ex: Long Beach Signature (Heritage, 6/2002), lot 6235. PCGS# 87320

- 5825 1889 — Altered Surface — PCGS Genuine. Proof, Unc. Details.** A razor-sharp specimen with dusky butter-gold and steel-blue toning. The fields are moderately subdued but void of contact marks or detracting hairlines. One of just 811 proofs issued. NGC ID# 27ZJ, PCGS# 7324

**1889 Silver Dollar, PR64 Cameo
Moderately Toned and Attractive**

- 5826 1889 PR64 Cameo NGC.** The obverse shows an area largely untuned at the center, save for a slight golden cast, deepening to copper-gold and pale blue near the rims, while the reverse is subsumed by lovely sunset-orange patina accented by ice-blue. The fields are nonetheless well-mirrored on both sides and the devices frosted, a bit heavier on the reverse. An attractive example of this midseries proof issue. Census: 11 in 64 Cameo, 27 finer (7/15). PCGS# 87324

**1889 Dollar, PR65 Cameo
Lightly Toned, Stark Field-Device Contrast**

- 5827 1889 PR65 Cameo PCGS.** Proof Morgan dollar production remained fairly stable between 1888 and 1889, declining modestly from 833 proofs to 811 proofs. Gems with cameo contrast are rare despite the unremarkable mintage. This magnificent PR65 Cameo representative offers profound reflectivity in the fields, contrasting appreciably against frosty motifs. Faint gold and lavender toning lightly colors surfaces that are free of mentionable imperfections. Population: 12 in 65 Cameo, 10 finer (7/15). PCGS# 87324

**1891 Morgan Dollar, Attractive PR63
Light, Even Toning**

- 5828 1891 PR63 NGC.** Light, even golden toning covers both sides of this deeply mirrored proof Morgan dollar. Some cameo contrast is evident between the fields and devices, a bit more perceptibly on the reverse. Quite nice for the grade, which is determined largely by tiny contact marks on the cheek.
Ex: Long Beach Signature (Heritage, 2/2001), lot 6464; Atlanta Bullet Sale (Heritage, 8/2001), lot 1200. NGC ID# 27ZL, PCGS# 7326

1892 Dollar, PR64
An Accessible Proof Example

- 5829 1892 PR64 PCGS.** Proof Morgan dollar production nearly doubled between 1891 and 1892 (650 pieces versus 1,245 pieces), no doubt reflecting the heightened demand for sets containing the new Barber coinage. This is an eye-catching black-and-white example with bold contrast. Brilliant surfaces show a slight tinge of rose coloration and minimal contact marks. NGC ID# 27ZM, PCGS# 7327

1893 Morgan Dollar, PR64 Cameo
792 Pieces Struck

- 5830 1893 PR64 Cameo PCGS.** The margins offer rich navy-blue and peach-gold patina, though the majority of the present Choice proof is untoned. The motifs are frosty aside from an overlay of gunmetal-gray and ruby-red on the lower portion of the portrait. The centers are lightly brought up and retain a couple of slender planchet marks, as coined. Population: 18 in 64 Cameo, 20 finer (7/15). PCGS# 87328

1894 Morgan, Beautifully Toned PR65
Better Date in the Series, CAC

- 5831 1894 PR65 NGC. CAC.** The business strike 1894 Morgan dollar is a low-mintage issue, struck to the extent of only 110,000 pieces, that is difficult to locate in the preferred Mint State grades. This Gem proof offers an originally preserved coin that would fit equally well into a high-quality date set. Both sides are uniformly reflective, well-preserved, and show some cameo contrast. The toning is stunning on both sides, although painted from differing palettes. The obverse offers pale sunset-orange and lilac hues; the reverse is vividly and beautifully toned in saffron, gold, copper-orange, violet, and aqua. Both sides are remarkably well-preserved. Any Gem proof Morgan is a conditional rarity, and this better-date, beautifully toned 1894 is far more desirable still. Census: 46 in 65, 74 finer (7/15). Only three non-Cameo/Deep Cameo 1894 Morgans in PR65 bear the CAC green approval sticker. Ex: Long Beach Signature (Heritage, 2/2001), lot 6466. NGC ID# 2577, PCGS# 7329

1898 Morgan Dollar, Nicely Contrasted PR63

- 5832 1898 PR63 NGC.** This pleasing proof will find demand from both specialists and type collectors. Faint steel-gray field toning contrasts well against lighter cream-gray devices. Minor hairlines limit the grade. Judging solely by the reverse, this piece would likely merit a Cameo designation, but the obverse falls just short. Ex: Long Beach Signature (Heritage, 2/2005), lot 10667. NGC ID# 27ZW, PCGS# 7333

- 5833 1899 PR60 NGC.** Though this proof has extensive imperfections, including numerous hairlines and contact marks, it is unworn in the strictest sense. On the reverse, cameo contrast persists. A fascinating coin. NGC ID# 27ZX, PCGS# 7334

1899 Silver Dollar, PR64 Cameo
Undeniable Eye Appeal

- 5834 1899 PR64 Cameo PCGS.** This near-Gem proof displays illimitable reflectivity in the fields and rich mint frost over the devices. A hint of natural-gold patina is seen at the borders while only a few scattered hair-thin lines limit the grade. Exceptional overall quality with sharp Cameo contrast provides undeniable eye appeal. Population: 21 in 64 (2 in 64+) Cameo, 22 finer (6/15). Ex: Palm Beach Signature (Heritage, 11/2004), lot 10224. PCGS# 87334

1900 Dollar, PR65 Cameo
Strong Field-Motif Contrast

- 5835 1900 PR65 Cameo NGC.** This turn-of-the-century Gem has strong contrast despite rich patina occupying all but the silvery centers. Lush gold-to-orange hues turn to violet at the rims, and the mirrors around the well-frosted devices remain strong. Sharply struck with great eye appeal from late in the Cameo era for proof Morgan dollars. Census: 17 in 65 Cameo, 37 finer (7/15). PCGS# 87335

1900 Dollar, PR65 Cameo
Elusive Cameo Specimen

- 5836 1900 PR65 Cameo PCGS.** The silver-white devices contrasting against deeply mirrored, midnight-black fields place this appealing Gem on the cusp of a Deep Cameo designation. The design elements are sharply struck and there is a lack of mentionable contact. Seldom seen with Cameo surfaces. Population: 11 in 65 Cameo, 14 finer (7/15). PCGS# 87335

1902 Morgan Dollar, PR66
Subtle Field-Motif Contrast

- 5837 1902 PR66 NGC.** This is an outstanding Premium Gem example of this early 20th century proof Morgan dollar, showing brilliant, satiny motifs and deeply mirrored fields that show just a hint of purplish-gray color. As anticipated for the issue, cameo contrast is lacking the boldness necessary for such a designation, but is nonetheless present to a modest extent on each side. Census: 39 in 66 (1 in 66 ★), 18 finer (6/15). NGC ID# 2822, PCGS# 7337

1903 Morgan Dollar, PR63
Low-Contrast Late-Series Proof

- 5838 1903 PR63 NGC.** This Select proof bears the low-contrast “chromium look” of many post-1902 Morgan dollar proofs, although the eagle on the reverse shows faint contrast against the fields. Pale champagne-pink patina is uniform and attractive. There is a trivial staple scratch below TRUST. Only 755 proofs were struck.
Ex: Long Beach Signature (Heritage, 2/2002), lot 6250. NGC ID# 2823, PCGS# 7338

1921 Morgan Dollar, SP63
Zerbe Special Strike

- 5839 1921 Zerbe SP63 PCGS. VAM-1AG.** Research conducted by Ash Harrison in 2009 on 1921 Morgan dollars revealed an interesting commonality among many encapsulated Zerbe proofs by both grading services. Per VAMworld.com, “he determined that the same variety [VAM-1AG] tended to occupy PCGS and NGC holders labeled as Zerbe proofs.” The variety is attributed by specific and distinctive die polish lines through the US in PLURIBUS with repeating X convergences of the polish lines and “scribbling die scratches” around the talons on the reverse. This VAM-1AG example displays an even layer of golden toning with pleasing reddish undertones. The reflective fields, a virtually full strike, and an absence of bagmarks all suggest specimen status common to Zerbe proofs, as confirmed by the PCGS attribution. Population: 18 in 63, 46 finer (6/15). NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

- 5840 1921 MS64+ PCGS. CAC. VAM-1F.** The dies for this VAM were used to strike matte proofs, though the present near-Gem is a business strike with expected moderate incompleteness at the centers. Lustrous with faint tan toning and a few delicate obverse abrasions.
Ex: Orlando FUN Signature (Heritage, 7/2012), lot 4473, which realized \$977.50. NGC ID# 2U4E, PCGS# 7356
- 5841 1921 MS65 NGC.** The satiny surfaces and above-average central detail on this untoned Gem 1921 Peace dollar marks it as probably one of those struck during the first few days of production from fresh dies. A few ticks that determine the grade are largely confined to the eagle’s midsection on the reverse. NGC ID# 2U4E, PCGS# 7356
- 5842 1921 MS65+ PCGS.** The satiny surfaces are largely untuned, save for a light golden accent on the left half of the obverse. The central strike is not sharp but better than typically seen. Abrasions are few and mostly away from the high points, and generous luster creates great eye appeal on this key-date Peace dollar. A couple of milky-gray spots show in the left reverse field. NGC ID# 2U4E, PCGS# 7356
- 5843 1921 MS65 PCGS. CAC.** A colorful first-year Peace dollar Gem with ample luster lighting up the violet-gray, peach, and steel-gray surfaces. Ideal for a toned type set needing this higher-relief variety. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS66
First-Year High Relief Type**

5844 1921 MS66 PCGS. The 1921 is widely pursued as both the first issue in the Peace dollar series and a one-year High Relief type. Over 1 million coins were struck in that first year, and while demand puts added pressure on coins across all grade levels, examples only become scarce in Premium Gem condition. As usual, the strike is problematic over the centers, but the overall impression is strong. Vibrant luster shimmers beneath light golden patina, enhancing the appeal. PCGS reports only seven submissions finer (7/15). NGC ID# 2U4E, PCGS# 7356

5845 1922 MS66+ PCGS. CAC. The Mint struck an astonishing 51.7 million Peace dollars in 1922, and examples can be found in MS66 with ease. Plus-graded coins with CAC approval, however, are very scarce. Largely brilliant centers turn to mottled shades of russet and olive at the rims. Liberty's portrait is remarkable for its lack of abrasions. A frosty, well-defined type representative. NGC ID# 257C, PCGS# 7357

5846 1922 MS66+ NGC. CAC. An impressively preserved second-year Peace dollar with smooth silver-white luster and pleasing detail. Modest patina is noted at the upper obverse. NGC has graded just 36 pieces as MS67 or better (6/15). NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, Frosty MS67
Superb Type Coin**

5847 1922 MS67 PCGS. The 1922 has a reputation as being one of the most plentiful issues in the Peace dollar series, a favorite among type collectors. This is a conditionally rare Superb Gem example, tied with 25 others as the finest at PCGS (7/15). The strike is bold and the intensely frosted surfaces show traces of pale champagne toning to attest to their originality. Eye appeal is incredible. NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, MS67
Tied for Finest Certified**

5848 1922 MS67 PCGS. A thin coating of golden-tan patina embraces near-pristine surfaces. Liberty's hair and diadem, and the eagle's feathers are crisply impressed, while IN GOD, ONE, and DOLLAR are a tad soft. A die crack travels from the top of the 1 through the truncation of the bust to the T in TRUST. A perfect coin for type or Registry purposes. Population: 26 in 67, 0 finer (7/15). NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, Untoned MS67
Blatant Cartwheel Luster**

5849 1922 MS67 PCGS Secure. Ex: MJB. The cartwheel luster on this Superb Gem Peace dollar is far more radiant and blatant than normally seen on examples of this type. The satiny surfaces are untoned, save for a light dusting of gold patina more prominent on the reverse. The devices are quite sharp throughout both sides. A great type coin or Registry Set entry. Population: 26 in 67, 0 finer (7/15). From The DeMicco Family Collection. NGC ID# 257C, PCGS# 7357

5850 1922-D MS66 PCGS. This untoned Premium Gem shows fulsome cartwheel luster that would not be out of place on many Morgan dollars. Light golden-gray patina is scarcely perceptible without a loupe, and the surfaces are uniformly well-preserved. NGC ID# 257D, PCGS# 7358

5851 1922-S MS65 PCGS. An interesting bicolor Gem, this piece shows a dusky golden band in the centers of each side with bright ice-white nearer the top and bottom rims — unusual but beautiful. Satin luster completes the broad eye appeal, and the surfaces are nicely preserved despite a couple of marks on Liberty's mouth and neck. PCGS reports only seven submissions in the MS66 grade level (7/15). NGC ID# 257E, PCGS# 7359

**1922-S Dollar, MS65+
Frosty and Pleasingly Toned**

- 5852 1922-S MS65+ PCGS.** A ring of copper-orange patina encircles lighter interior surfaces that are overlaid in delicate champagne-gold toning. Frosty S-mint luster issues from each side of this Gem Peace dollar, illuminating typically struck devices. Bagmarks are usually a problem for the 1922-S, but not for this coin. Only 4% of MS65 representatives at PCGS have been awarded a Plus designation, and just seven submissions are rated higher at that service (7/15) NGC ID# 257E, PCGS# 7359

**1922-S Peace Dollar, Untoned MS65+
Sharp Strike and Great Luster**

- 5853 1922-S MS65+ PCGS.** Effulgent cartwheel luster rolls around each side of this untuned and brilliant Peace dollar, one that amply deserves its Superb Gem grade. The devices front and back are free of all but tiny, undistracting ticks, and the sharp is well-impressed throughout. Population: 16 in 65+, 7 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257E, PCGS# 7359

**1923 Dollar, MS67
None Certified Finer**

- 5854 1923 MS67 PCGS.** It is unsurprising that given a mintage of 30 million coins, most of which remained in storage as currency reserves, the 1923 Peace dollar is obtainable even in this lofty grade. However, those looking for a finer example in MS68 will be disappointed, as none have been certified at that level by either service. Frosty luster cartwheels over the brilliant surfaces of this top-graded Superb Gem. Well-struck and nearly unmarked. Population: 58 in 67, 0 finer (7/15). NGC ID# 257F, PCGS# 7360

1923 Peace Dollar, Pristine MS67

- 5855 1923 MS67 PCGS Secure.** Ex: MBJ. Strong cartwheel luster is the calling card of this nicely preserved 1923 Peace dollar, a Superb Gem with a bold strike on satiny surfaces and minimal abrasions on either side. A light cast of gold on both sides adds to the eye appeal. Despite the enormous mintage of more than 30 million coins, only a few dozen meet the strict requirements for an MS67 grade. Population: 58 in 67, 0 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257F, PCGS# 7360

**1923-D Dollar, MS66
Only a Single Coin Certified Finer**

- 5856 1923-D MS66 PCGS.** Ex: Jack Lee 2. The 1923-D mainly sat in storage vaults until distribution began in the late 1930s. Dispersal continued through the 1950s, when the inventory ran out. Today the 1923-D can be found through Gem condition, but examples are very scarcely seen in MS66. Only a single coin is certified in MS67 between the two leading grading services. This brilliant Premium Gem is much better struck than the typical survivor with minor softness confined to the centers. A couple of small marks on the eagle's wing limit the grade. Population: 94 in 66 (3 in 66+), 1 finer (7/15). NGC ID# 257G, PCGS# 7361

1923-D Peace Dollar, Sharp MS66

- 5857 1923-D MS66 PCGS.** Ex: MBJ. The 1923-D Peace dollar is quite common in circulated grades, but Gems, or Premium Gems such as the present piece, are quite another story, despite the mintage exceeding 6.8 million coins. This coin boasts a fairly sharp strike through the centers, although a few light ticks appear on the high points, and some tiny dark areas on Liberty's neck. The die crack through Liberty's neck is a common occurrence on the issue. Population: 94 in 66 (3 in 66+), 1 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257G, PCGS# 7361

1923-S Peace Dollar
Scarce, Brilliant-Gem Example

- 5858 1923-S MS65 PCGS.** Brilliant frosty luster and a strong strike on the central motifs far exceed the norm for this quality-challenged San Francisco date. The textured surfaces capture and hold the mint bloom for great eye appeal. Numerous die cracks traverse both sides and minor scuffs on and near the portrait are noted, yet few examples of the issue can equal this coin for visual impact and desirability. PCGS has graded just three examples in a numerically finer grade (6/15). NGC ID# 257H, PCGS# 7362

1923-S Peace Dollar, MS65
Condition Rarity in Finer Grades

- 5859 1923-S MS65 PCGS.** The 1923-S Peace dollar is a scarce issue in MS65 condition and a prime condition rarity in finer grades. This impressive Gem exhibits well-detailed design elements and well-preserved lustrous surfaces with a few hints of lavender-gray and amber toning. PCGS has graded three numerically finer examples (7/15). NGC ID# 257H, PCGS# 7362

1923-S Peace Dollar, MS65
Essentially Unobtainable Any Finer

- 5860 1923-S MS65 PCGS.** The San Francisco Mint struck a copious production of over 19 million Peace dollars in 1923. The typical example grades MS62 to MS64 with myriad bagmarks and a soft strike. In Gem condition, the 1923-S becomes a very scarce date, especially with well-struck motifs. This Gem has lightly toned but mostly brilliant surfaces with minimal bagmarks scattered over each side. The strike shows a touch of softness at the centers, but the peripheries and legends are boldly impressed. PCGS has only seen three finer submissions (7/15). NGC ID# 257H, PCGS# 7362

1923-S Dollar, Conditionally Rare MS65

- 5861 1923-S MS65 PCGS Secure.** Ex: MBJ. Due to overall poor strikes, bagmarks, and usually lackluster surfaces, the 1923-S Peace dollar is one that is seldom found in Gem or finer grades, where it is quite elusive. Lower-Mint State examples, showing some of the problems cited, however, are quite common. This piece is a happy exception, showing brilliant cartwheel luster, a decent strike, and minimal marks, mostly on Liberty's neck, although a few show on the eagle's breast as well. This piece ranks far above average for the issue. A circular die crack covers much of the obverse periphery, and radial die-polishing marks appear on the obverse as well, accentuating the curious appearance. PCGS reports only three examples in higher grades — two in MS66, one in MS67 (7/15).
From The DeMicco Family Collection. NGC ID# 257H, PCGS# 7362

1924 Peace Dollar, MS67
Fulsome Satin Luster

- 5862 1924 MS67 PCGS.** Fulsome satin luster creates a cartwheel effect on this stunning, lightly toned Superb Gem Peace dollar, showing a slight golden cast. The surfaces are almost completely free of mentionable marks, save for a couple of small luster grazes on Liberty's neck and two small ticks at the rear midsection of the eagle. Certified in a green-label holder. Population: 29 in 67, 1 finer (7/15). NGC ID# 257J, PCGS# 7363

1924 Peace Dollar, Appealing MS67

- 5863 1924 MS67 PCGS Secure.** CAC. Ex: MBJ. The luster on this greenish-gold Superb Gem is of the cartwheel variety but not truly flashy, the effect apparently somewhat muted by die fatigue. The eye appeal is nonetheless quite good, and further enhanced by overall excellent preservation, save for one noticeable scrape somewhat hidden by the lower curve of the eagle's wing. Population: 29 in 67, 1 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257J, PCGS# 7363

5864 1924-S MS64 PCGS. This better-date S-mint Peace dollar shows good eye appeal on the gold-tipped silver-white surfaces that emanate generous luster throughout. Liberty's face and the eagle are nearly mark-free, but a couple of large hits show on the bust truncation. NGC ID# 257K, PCGS# 7364

5865 1924-S MS64+ PCGS. Variegated gold, green, burnt orange, and blue patina enlivens the surfaces of this better-date Peace dollar, which shows considerable luster despite the moderate color. A better-than-average strike separates this piece from most of its cohort. Population: 85 in 64+, 85 finer (7/15). NGC ID# 257K, PCGS# 7364

5866 1924-S MS64 PCGS. CAC. The frosty surfaces are fully lustrous and brilliant with a light peppering of deeper russet and gunmetal-gray tones. A well-struck coin showing only scattered minor marks. This S-mint issue is readily accessible through Choice condition, while Gems or better are very scarce. NGC ID# 257K, PCGS# 7364

1924-S Dollar, MS65 Underappreciated S-Mint Issue

5867 1924-S MS65 PCGS. The 1924-S Peace dollar was never available in any significant quantity at the Uncirculated level, and coins in high grades are apt to have a substandard strike. Consequently, the 1924-S is a legitimate, if unheralded scarcity in the series. This Gem example is particularly well-struck for the issue with pleasing, mostly brilliant surfaces that show subtle apricot accents. Population: 80 in 65 (1 in 65+), 5 finer (7/15). Ex: *Dallas Signature (Heritage, 11/2005)*, lot 3747. NGC ID# 257K, PCGS# 7364

1924-S Dollar, Elusive MS65 Beautiful Color and Luster

5868 1924-S MS65 PCGS Secure. CAC. Ex: MJB. Beautiful color and generous cartwheel luster are this coin's chief attributes, far nicer than usually seen on this generally appearance-challenged issue. Pale gold, sandy-tan, and ice-blue patina complements the gorgeous luster amid few marks. The 1924-S is among the rarest Peace dollar issues in this grade, along with the 1927-S and (more elusive) 1928-S. From *The DeMicco Family Collection*. NGC ID# 257K, PCGS# 7364

1925 Peace Dollar, MS67 Superb Type Coin

5869 1925 MS67 PCGS. Although undeniably scarce at this level, the 1925 Peace dollar is nonetheless one of the most available dates in the series in Superb Gem condition, ideal for the type collector seeking exceptional quality. This MS67 coin is beautifully preserved with frosty golden-toned luster. Bold design elements further contribute to the eye appeal. Population: 99 in 67 (1 in 67+), 1 finer (6/15). NGC ID# 257L, PCGS# 7365

1925 Peace Dollar, MS67

5870 1925 MS67 NGC. An impressive Superb Gem, this 1925 Peace dollar has frosty silver luster with no toning on either side. The strike is bold and the surfaces are pristine. The 1925 was the final issue with a mintage over 10,000,000 pieces. Census: 77 in 67 (1 in 67+, 1 in 67 ★), 1 finer (7/15). NGC ID# 257L, PCGS# 7365

1925 Peace Dollar, MS67 Excellent Type Set Candidate

5871 1925 MS67 PCGS. A mintage of 10.2 million coins and widespread availability through MS66 make the 1925 a popular issue among collectors looking to assemble a high-grade type set. This Superb Gem has strong strike definition on each side. Brilliant surfaces are aglow in frosty mint luster with splashes of golden-tan hues interspersed. PCGS has seen just a single submission rated finer. NGC ID# 257L, PCGS# 7365

1925 Silver Dollar, Well-Preserved MS67

- 5872 1925 MS67 PCGS Secure.** Ex: MBJ. A light wash of gold patina, typical for the issue (and many other Peace dollar issues), lends an aura of originality to the surfaces, complementing radiant cartwheel luster and the excellent preservation evidenced by minimal marks on Liberty. The eagle shows a few minor ticks and reeding marks. Population: 99 in 67 (1 in 67+), 1 finer (7/15). From *The DeMicco Family Collection*. NGC ID# 257L, PCGS# 7365

1925 Peace Dollar, MS67 Just One Higher-Rated Example at PCGS

- 5873 1925 MS67 PCGS. CAC.** The 1925 Peace dollar claims a prodigious mintage of more than 10 million pieces, but the issue is very scarce in MS67 condition and prohibitively rare any finer. This spectacular Superb Gem exhibits razor-sharp design elements and vibrant mint luster, all under a thin layer of attractive champagne-gold toning. PCGS lists a single higher-rated example (7/15). NGC ID# 257L, PCGS# 7365

- 5874 1925-SMS64+ PCGS. CAC.** A pleasing MS64+ Peacedollar, largely silver and bright with touches of gold and peach-rose along the rims. Shallow reed marks on Liberty's chin preclude an even finer grade. From *The College Collection, Part Two*. NGC ID# 257M, PCGS# 7366

- 5875 1926 MS66 PCGS. VAM-3.** A virtually immaculate Premium Gem draped in light caramel-gold and powder-blue toning. Well struck and exceptional, even by the rigorous standards of the MS66 level. The 6 in the date and designer's monogram are lightly die doubled. Housed in an old green label holder. NGC ID# 257N, PCGS# 7367

- 5876 1926 MS66 PCGS Secure. CAC.** Ex: MBJ. The radiant cartwheel luster on this Premium Gem 1926 Peace dollar is uncommonly fine and flashy, an effect that would do even the finest Morgan dollar proud. Perhaps only a single small tick in the center of Liberty's cheek keeps this high-end piece from an even finer grade. A light wash of gold completes the eye appeal. From *The DeMicco Family Collection*. NGC ID# 257N, PCGS# 7367

- 5877 1926-D MS66 PCGS.** The 1926-D Peace dollar is among the best-produced issues in the series, as this Premium Gem amply demonstrates. This boldly struck example offers cartwheel luster on untoned surfaces and top-notch preservation. NGC ID# 257P, PCGS# 7368

1926-D Peace Dollar, MS66 Flashy-White Example

- 5878 1926-D MS66 PCGS. CAC.** The curving die crack bridges Liberty's neck and connects WE and TRUST — an interesting feature of this brilliant-white Peace dollar. The surfaces are otherwise smooth and free of all but the most minor disturbances, with a few tiny nicks but no significant abrasions or contacts. The legends are sharp for the issue, as are the main motifs including Liberty's hair strands and the eagle's plumage. Flashy mint luster covers both sides. PCGS reports just 8 numerically finer coins (7/15). NGC ID# 257P, PCGS# 7368

- 5879 1926-S MS65 PCGS. CAC.** Rich violet, rose, and gold-gray hues enrich each side of this S-mint Peace dollar. Softly struck as usual on the portrait but a warmly lustrous Gem. From *The College Collection, Part Two*. NGC ID# 257R, PCGS# 7369

- 5880 1926-S MS65+ PCGS. CAC.** This high-end Gem displays well-detailed design elements and vibrant mint luster under shades of golden-tan and amber toning. The 1926-S Peace dollar is very scarce in finer grades. NGC ID# 257R, PCGS# 7369

1926-S Peace Dollar, MS66 Intense Mint Bloom

- 5881 1926-S MS66 PCGS.** This incredibly vibrant Premium Gem is boldly struck and awash in frost-white luster. A few trivial surface grazes are almost unnoticeable amid the captivating cartwheel effect. The 1926-S is conditionally scarce as a Premium Gem and is almost unknown finer. Population: 79 in 66, 2 finer (6/15). NGC ID# 257R, PCGS# 7369

1926-S Dollar, Sharp Premium Gem

- 5882 1926-S MS66 PCGS.** Ron Guth notes that the 1926-S is “one of the only S-mint Peace dollars that can be found with a good strike,” and Dave Bowers adds that “the typical piece encountered is fairly well struck.” This Premium Gem is typical in that regard, with sharp definition on the motto, date, and reverse legends. Each side remains brilliant with wisps of olive-tan patina over the right obverse field and the eagle’s breast. Population: 79 in 66, 2 finer (7/15). NGC ID# 257R, PCGS# 7369

1926-S Peace Dollar, Flashy MS66

- 5883 1926-S MS66 PCGS Secure. CAC.** Ex: MBJ. The 1926-S Peace dollar is an anomaly among S-mint dollar issues, interrupting a string of mediocre-looking dates with surprisingly strong eye appeal. This Premium Gem is no exception, showing flashy cartwheel luster, a bold strike on untuned, satiny surfaces, and excellent preservation. Population: 79 in 66, 2 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257R, PCGS# 7369

- 5884 1927 MS64 PCGS.** Only 848,000 Peace dollars were manufactured at Philadelphia in 1927, and the issue enjoys the second-lowest mintage in the series. This near-Gem shows specks of orange toning scattered over frosty and brilliant surfaces with a pale-blue tint. A milling mark on the cheek is the only notable flaw. NGC ID# 257S, PCGS# 7370

- 5885 1927 MS65 PCGS.** Unusually well-defined for a Peace dollar, if still a bit soft on the hair over the ear, and beautifully satiny with bright silver luster and minimal color. Housed in a green label holder. PCGS has graded just 10 pieces as MS66 or better (6/15).
Ex: Dallas Signature (Heritage, 11/2005), lot 3767. NGC ID# 257S, PCGS# 7370

- 5886 1927 MS65 NGC.** Above-average detail for this notoriously soft series and attractive silver brilliance are this Gem’s greatest assets. The 1927 is very rare any finer with just three MS66 and better coins graded by NGC (6/15).
Ex: Long Beach Signature (Heritage, 9/2005), lot 6233. NGC ID# 257S, PCGS# 7370

- 5887 1927 MS65 PCGS.** Great eye appeal is the calling card of this untuned satin-lustered Gem Peace dollar, showing no mentionable high-point marks on Liberty, although small abrasions gather on the eagle. NGC ID# 257S, PCGS# 7370

1927 Silver Dollar, MS65+ Flashy Luster and Good Preservation

- 5888 1927 MS65+ PCGS.** The low-mintage issue of 848,000 1927 Peace dollars consisted of coins that are well-made overall but usually fall short of the Gem grade level. This MS65+ example is a pleasing exception, showing bold luster on silvery surfaces with a light golden cast. Minimal abrasions complete the top-notch eye appeal. Population: 7 in 65+, 10 finer (7/15).
From The DeMicco Family Collection. NGC ID# 257S, PCGS# 7370

- 5889 1927 MS65 PCGS. CAC.** Faint crimson and gold patina covers largely brilliant surfaces throughout this impeccable Gem representative. The 1927 has a low mintage of 848,000 coins, and examples, including this coin, are typically strongly struck. PCGS reports only 10 submissions rated higher (7/15). NGC ID# 257S, PCGS# 7370

1927-D Peace Dollar, MS65 Glistening Satin Luster

- 5890 1927-D MS65 PCGS.** While the East and West Coast mints restricted silver dollar production to fewer than 900,000 coins each, the Denver Mint was busy manufacturing over 1.2 million Peace dollars in 1927. In MS65, the 1927-D is more available than the 1927-S, but scarcer than the 1927-P. This minimally patinated Gem features areas of light tan coloration over otherwise brilliant surfaces with glistening satiny luster. Abrasions are mostly well-concealed within the design elements, and PCGS reports just 10 examples in higher grades (7/15). NGC ID# 257T, PCGS# 7371

1927-D Dollar, High-End MS65+ Minimally Abraded and Attractive

5891 1927-D MS65+ PCGS Secure. Light golden patina shows throughout the well-preserved surfaces of this sharply struck 1927-D Peace dollar. The issue is generally found attractive, well-preserved, and boldly impressed, making this pleasing example typical but still thoroughly attractive. The lack of mentionable abrasions on Liberty's face and the eagle's high points, however, separates this coin from most of its cohort. Population: 8 in 65+, 10 finer (7/15). From *The DeMicco Family Collection*. NGC ID# 257T, PCGS# 7371

5892 1927-S MS64 PCGS. The 1927-S claims a relatively low mintage of 866,000 coins. Examples are available through MS64, but finer examples are very scarcely seen. Frosty surfaces glow beneath speckled gunmetal-blue, violet, and green toning on each side of this Choice S-mint Peace dollar. Typically struck without detracting bagmarks. NGC ID# 257U, PCGS# 7372

1927-S Dollar, MS65 Nearly Unobtainable in Better Condition

5893 1927-S MS65 PCGS. Of the three Peace dollar issues struck in 1927, the 1927-S is by far the most challenging to locate in Gem condition, and finer examples are virtually unknown. In fact, in MS65 "the 1927-S is one of the top several rarest varieties in the Peace dollar series," per Bowers' *Silver Dollar Encyclopedia*. This top-notch coin is frosty and brilliant with elements of gold and olive patina. The devices are well-struck, save for expected incompleteness on IN GOD. Population: 75 in 65 (1 in 65+), 2 finer (7/15). NGC ID# 257U, PCGS# 7372

1927-S Dollar, Flashy MS65

5894 1927-S MS65 PCGS Secure. CAC. Ex: MBJ. The low-mintage 1927-S Peace dollar issue saw a production of only 866,000 coins, and few Mint State examples survive with good luster, a bold strike, and well-preserved surfaces. This Gem is a happy exception on all counts, showing bold, flashy luminosity, good detail throughout, and minimal abrasions. Population: 75 in 65 (1 in 65+), 2 finer (7/15). From *The DeMicco Family Collection*. NGC ID# 257U, PCGS# 7372

5895 1928 MS64 PCGS. Both sides of this color-free near-Gem are awash with potent luster and exhibit sharply struck design elements. A few minute marks prevent Gem classification. This is a popular low-mintage date. NGC ID# 257V, PCGS# 7373

5896 1928 MS64+ PCGS. CAC. A gorgeous example of this low-mintage key date on the cusp of a considerably scarcer and pricier grade. Rich gold and pale sky-blue tints grace abundantly lustrous surfaces with just a few marks that barely prevent a full Gem designation. Ex: *FUN Signature (Heritage, 1/2012)*, lot 4493. NGC ID# 257V, PCGS# 7373

5897 1928 MS64+ PCGS. CAC. The centers of this brilliant example are a trifle indistinct, with the outer details strong. Both sides of this near-Gem are fully lustrous and untoned. The 1928 is acknowledged as the key date of the Peace dollar series, and it is difficult to find in higher Mint State grades. NGC ID# 257V, PCGS# 7373

1928 Silver Dollar, Sought-After MS65

5898 1928 MS65 PCGS. A Gem example of this highly sought-after date, this 1928 Peace dollar shows great eye appeal via its bold luster on surfaces that are nicely preserved and untoned, save for a faint blush of gold. A couple of marks show on Liberty's jaw, but her cheek is clean, and two other small marks show on the eagle. The preservation overall, however, is far better than usually seen on this date. PCGS reports only 15 in MS66 (7/15). NGC ID# 257V, PCGS# 7373

1928 Peace Dollar Scarce Gem Example

5899 1928 MS65 PCGS. CAC. The low mintage of just 360,649 pieces makes the key-date status of this Philadelphia issue a foregone conclusion, and the scarcity in high grades is confirmed by both services. This appealing Gem displays pale reddish-gold toning over softly lustrous, silver surfaces. The reverse is delightfully iridescent. Only a few light marks are visible under magnification. PCGS has certified just 15 numerically finer examples (6/15). NGC ID# 257V, PCGS# 7373

1934 Peace Dollar, Golden MS66

- 5900 1934 MS66 PCGS.** Frosty, golden luster glows over each side of this Premium Gm 1934 Peace dollar, a conditionally scarce example of a popular late-series issue. The strike is sharp and there are no obvious surface flaws. The 1934 is one of only four dates in the series with a mintage of fewer than 1 million coins. PCGS lists only three Superb Gems finer than this piece (7/15). NGC ID# 257X, PCGS# 7375

1934 Peace Dollar, Well-Preserved MS66

- 5901 1934 MS66 PCGS.** One or two stray, minor marks on Liberty's otherwise-clean cheek help to account for the grade on this nicely preserved Premium Gem Peace dollar. A light golden-gray patina encompasses both sides with warm luster and excellent eye appeal. The strike is a bit weak on some of the letters at the upper reverse. PCGS reports only three in finer grades (7/15). NGC ID# 257X, PCGS# 7375

1934 Peace Dollar, Sharp Premium Gem

- 5902 1934 MS66 PCGS Secure. CAC. Ex: MBJ.** The 1934 Philadelphia Peace dollar issue is a well-produced one, as this piece amply demonstrates. Copious cartwheel luster runs over surfaces that are untoned save for a uniform golden cast. The well-struck surfaces are devoid of mentionable distractions, as marks are minimal and distant from the device high points. PCGS reports only three in MS67 (7/15).
From The DeMicco Family Collection. NGC ID# 257X, PCGS# 7375
- 5903 1934-D MS65 PCGS. CAC. Micro D.** Lightly dappled tan-brown toning accompanies the margins of this lustrous and carefully preserved Gem. The strike is good despite minor merging at the centers. A lower mintage Denver issue. NGC ID# 257Y, PCGS# 7376

**1934-D Silver Dollar, MS66
Sharp Central Strike**

- 5904 1934-D MS66 PCGS.** Medium D. Only a trace of gold toning visits this thoroughly lustrous and crisply struck Premium Gem. The reverse field is essentially pristine, while the portrait and obverse field exhibit only delicate grazes. The date is moderately strike doubled. Population: 72 in 66 (2 in 66+), 2 finer (6/15). NGC ID# 257Y, PCGS# 7376

**1934-D Dollar, Untoned MS66
Remarkably Preserved Surfaces**

- 5905 1934-D MS66 PCGS.** Micro D. The 1934-D is moderately more challenging in high grades than the 1934-P, but the issue often plays second fiddle to the conditionally rare 1934-S. This is an all-brilliant, satiny Premium Gem with strong strike characteristics on each side and particularly bold definition on the motto. The fields and devices are remarkably clean, even for the lofty technical grade. Population: 73 in 66 (2 in 66+), 2 finer (7/15). NGC ID# 257Y, PCGS# 7376

**1934-D Dollar, MS66
Just Two Coins Finer at PCGS**

- 5906 1934-D MS66 PCGS.** Micro D. Splashes of golden-tan patina accent otherwise brilliant surfaces with gleaming satiny mint luster. The motto and date are razor-sharp, while the reverse legends show a touch of typical softness. The 1934-D is often overshadowed by the 1934-S, but it is a challenging issue in its own right in this high grade. Population: 73 in 66 (2 in 66+), 2 finer (7/15). NGC ID# 257Y, PCGS# 7376

1934-D Dollar, Flashy MS66

5907 1934-D MS66 PCGS Secure. CAC. Micro D. Ex: MBJ. The 1934-D is a well-produced but overlooked issue in the Peace dollar series, overshadowed by its more famous sibling, the 1934-S. This piece shows the typical bold luster the issue is known for, on untuned surfaces with flashy eye appeal and minimal marks. Population: 73 in 66 (2 in 66+), 2 finer (7/15). CAC reports only 15 in this grade with the green approval sticker.

From The DeMicco Family Collection. NGC ID# 257Y, PCGS# 7376

1934-S Dollar, MS64 First Generation Holder

5908 1934-S MS64 PCGS. CAC. Although the 1928 is the key to the series in circulated condition, the 1934-S is the most elusive issue at the MS64 level, approximately three times rarer than the 1928. This highly lustrous and essentially brilliant near-Gem has a nearly pristine cheek. The grade is limited solely by a pair of grazes on the right reverse field. Housed in a first generation holder.

Ex: Orlando FUN Signature (Heritage, 7/2012), lot 4501, which realized \$5,031.25. NGC ID# 257Z, PCGS# 7377

5909 1935 MS66 PCGS. The untuned silver-white surfaces are lightly coated in lovely gold on both sides of this stunning Premium Gem. Lavish mint luster of the cartwheel kind complements excellent surface preservation. PCGS has never graded an MS67 of this issue, giving this piece Registry Set potential (7/15). NGC ID# 2582, PCGS# 7378

1935 Dollar, High-End MS66+

5910 1935 MS66+ PCGS. CAC. This untuned, high-end Premium Gem sports flashy, lavish cartwheel luster on surfaces that approach MS67 quality. A mixture of frosty and brilliant areas appears on the reverse, while the obverse is frosty throughout. The surfaces are largely untuned silver-white but showing a light golden cast and a small area of tan patina between T and Y on the obverse. Population: 12 in 66+, 0 finer (7/15).

From The DeMicco Family Collection. NGC ID# 2582, PCGS# 7378

1935-S Peace Dollar, Nicely Preserved MS66

5911 1935-S MS66 PCGS. Three Rays below ONE. One thin scrape is well-hidden in Liberty's hair, well consistent with the Premium Gem grade on this nicely preserved Peace dollar. The satiny surfaces are untuned save for a light golden cast and show considerable cartwheel effect on both sides. A higher-graded example would be difficult to find: PCGS reports only two each in MS66+ and MS67 (7/15). NGC ID# 2583, PCGS# 7379

1935-S Peace Dollar, MS66+ Top-Notch Example

5912 1935-S MS66+ PCGS Secure. CAC. Ex: MBJ. Three Rays below ONE. Flashy cartwheel luster on both sides is quite strong, with little evidence of patina other than a slight golden accent, perceptible on both sides but stronger on the reverse. The satiny surface texture is uniformly pleasing, and there are simply no mentionable marks that interrupt the smooth, untroubled appearance of this remarkably nice Peace dollar, a top-notch example of the final San Francisco issue. Population: 2 in 66+, 2 finer (7/15).

From The DeMicco Family Collection. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

5913 1972 Type One MS66 NGC. Beautifully preserved surfaces show good luster amid pale rose and blue patina on each side. President Eisenhower's face is free of major marks. A couple of larger abrasions show on the reverse. This is the common Type One reverse. The NGC Census shows only 21 submissions of all 1972 varieties in MS66, along with one attributed as Type One (7/15). None are finer. NGC ID# 2587, PCGS# 87409

1972-D Eisenhower Dollar, MS67
Delicate Toning, Tied for Finest Certified

5914 1972-D MS67 PCGS. Lovely ice-blue toning is accentuated by hints of champagne on each side of this Superb Gem Registry coin, while a thin sliver of rainbow color appears along the lower reverse rim. The strike is lacking sharpness on the eagle and the finer hair details of the obverse portrait, with a few faint roller lines (as struck) evident in its place. As one of only eight MS67 examples certified by PCGS with none finer (6/15), this coin is of great importance for Registry purposes. NGC ID# 2588, PCGS# 7410

5915 1972-D MS67 NGC. Incredible preservation is the hallmark of this stunning Superb Gem, showing surfaces that are virtually free of abrasions throughout both sides. A lack of any toning further emphasizes its pristine state. One of the five top-graded examples at NGC (7/15). NGC ID# 2588, PCGS# 7410

5916 1972-D MS67 NGC. Registry Set competitors will want to pay attention when this Superb Gem crosses the auction block. NGC has certified only five examples in this lofty grade, and none numerically finer (7/15). Nickel-gray surfaces yield a faint golden hue amid vibrant cartwheel luster. No significant abrasions are present, delivering pronounced visual appeal. NGC ID# 2588, PCGS# 7410

5917 1973-D MS67 NGC. A fine-looking and stunningly preserved example of the 1973-D Ike dollar, issued along with the 1973-P only in mint sets; none were made for circulation. This Superb Gem shows a light golden wash on surfaces that are extremely lustrous and nearly mark-free. This piece is one of only two in this grade at NGC and 11 at PCGS (7/15). NGC ID# 258B, PCGS# 7413

5918 1976-D Type One MS67 NGC. The 1776-1976 Bicentennial Ike dollars with the low-relief, bold lettering on the reverse known as Type One are among the keys the complete set. This 1976-D example in MS67 shows intense luster and great eye appeal on golden-toned surfaces free of mentionable defects. Census: 7 in 67, 0 finer (7/15). NGC ID# 258J, PCGS# 7420

PROOF EISENHOWER DOLLARS

1972-S Silver Eisenhower Dollar
PR70 Deep Cameo

5919 1972-S Silver PR70 Deep Cameo PCGS. Few examples of this popular silver proof are certified at the perfect PR70 Deep Cameo grade level, but this outstanding coin is among them. An ideal Registry Set contender, this piece is razor-sharp and starkly contrasted, with just a touch of light golden toning over each side. Population: 70 in 70 Deep Cameo, (7/15). NGC ID# 258T, PCGS# 97429

1973-S Clad Eisenhower Dollar
Pristine PR70 Deep Cameo

5920 1973-S Clad PR70 Deep Cameo PCGS. Both the 1973-S and 1974-S clad and 40% silver issues are elusive and seemingly rare in unsurpassable proof condition. Just 16 such pieces are reported by PCGS, one of which is this gleaming example. Nicely contrasted raised elements are suspended over glassy-black fields, which are entirely untuned save for a faint gold dot in the left obverse field. Unimprovable technical quality. Population: 16 in 70 Deep Cameo, (7/15). NGC ID# 282A, PCGS# 97430

1973-S Silver Eisenhower Dollar
PR70 Deep Cameo

5921 1973-S Silver, Doubled Die Obverse, FS-101, PR70 Deep Cameo PCGS. The die doubling is minimal, but is evident on the motto IN GOD WE TRUST. This piece is one of only 18 silver 1973-S proof Eisenhower dollars awarded a perfect PR70 Deep Cameo grade at PCGS; no Ultra Cameos have been graded this high by NGC (6/15). The strike is bold and the devices are starkly contrasted against the mirrored fields. A brilliant, eye-catching Registry coin. PCGS# 396480 Base PCGS# 97431

5922 1974-S Silver PR70 Deep Cameo PCGS. By definition for the grade, this is a perfect proof Eisenhower dollar that was struck in 40% silver. Both sides are fully brilliant and untuned with black-and-white contrast between the fields and devices. Population: 30 in 70 Deep Cameo (7/15). NGC ID# 258V, PCGS# 97433 Base PCGS# 999138

1978-S Eisenhower Dollar, PR70 Deep Cameo

5923 1978-S PR70 Deep Cameo PCGS. PCGS reports only 67 1978-S Eisenhower dollars in PR70 Deep Cameo, while NGC lists just four coins in this grade (6/15). This Registry Set contender is fully rendered, with bold field-device contrast and pristine mirrors. Traces of light golden toning accentuate the eye appeal. NGC ID# 282D, PCGS# 97438

The David Cassel Collection of U.S. Pattern Postage Currency Coins and Related Items

As part of Heritage's presentation of the broader David Cassel Collection, it is our pleasure to present a special section for The David Cassel Collection of United States Pattern Postage Currency Coins and related items.

Midway through his career collecting patterns, an unexpected discovery changed Mr. Cassel's numismatic focus. At a 1994 auction, he was intrigued by three Postage Currency ten cent coins: one PCGS certified as Judd-325 (Plain Edge, silver alloy), another as Judd-326 (pure copper, reeded edge), plus Judd-326a (billion, plain edge, which is predominantly copper with less than 50% silver content). After acquiring the coins, Cassel weighed the slabs on a precision scale and discovered that all of the coins had an identical gross weight – a result that seemed implausible based on the current Judd reference.

Intrigued, Cassel had the coins cracked out and studied using the pioneering Scanning Electron Microscopy with Energy-Dispersive X-Ray analysis (SEM-EDX). The high-tech analysis is a harmless process that does not alter a coin in any way.

To his amazement, all three coins were essentially the same composition, matching Judd-326a (billion, plain edge). At once, Cassel had a new mission: To buy and borrow as many Postage Currency ten cent coins as he could, and to study them and make conclusions about their compositions and characteristics.

Today, Mr. Cassel is known for acquiring a comprehensive set of the United States Postage Currency ten cent pattern coins of 1863, as well as the related issues dated 1868 and 1869. Analyzing a core group of 70 coins using SEM-EDX, he was able to show metallurgical differences in some coins that would lead to changes in the Judd reference as well as refinements in the grading service numbering systems. He also identified several coins that needing attribution changes by the major grading services.

The discoveries confirm that not all Judd-325 (silver alloy) coins are run-of-the-mill Judd-325 examples. Two R.8 examples of Judd-325 were discovered to be nearly pure silver weighing 38 grains each, and not the more-common variety that was predominantly silver but weighed only 22 grains.

Interesting conclusions were drawn from some of the data. The two 38-grain examples were possibly *pièces de caprice*, coins produced for the clandestine purpose of enriching the owner for their rarity. The coins had an intrinsic value of more than ten cents when the Mint was tasked with producing a ten cent coin that would cost the Mint less than ten cents to produce.

Other interesting varieties were discovered in the series including a Judd-326 (pure copper) coin and the Judd-326A variety (billion or mostly copper coins). The Judd-326 consists of a unique 36-grain pure copper example with a reeded edge, and two rare examples of a lightweight plain edge variety, each weighing approximately 20 grains. Several more-common examples of Judd-326A (billion) exist in a tight range of 24 to 25 grains.

In 2000, Mr. Cassel published a limited edition book chronicling his work. Seven years later he improved and revised his book, publishing just 30 limited-edition volumes. Entitled *United States Pattern Postage Currency Coins*, a pair of two-volume sets (numbered 29 and 30) was set aside to be offered along with the Cassel pattern collection in this sale. The Postage Currency coins offered here are featured in those books, including the coin's elemental analysis and provenance where known.

THE DAVID CASSEL COLLECTION OF
U.S. PATTERN POSTAGE CURRENCY
COINS AND RELATED ITEMS

1863 Postage Currency Pattern in Silver, PR63
Judd-325, Two Planchet Cracks
Only One Other Piece Known With Such Cracks

- 5924 1863 Ten Cents, Judd-325, Pollock-390, Cassel-9, R.8, PR63 PCGS. 20.0 grains. The obverse design features the heraldic shield with arrows, inside an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY above, and ACT JULY 1862 below. SEM-EDX tested by S&N Labs on certificate number 60482.63/2671752 as struck in 94.2% silver and 5.8% copper with a plain edge. In addition to the customary die cracks found on coins of this type, this piece exhibits a planchet crack. This test piece (and one other) were likely struck on one of the Mint's steam-powered presses. When one considers the Postage Currency planchets were only half as thick as a regular dime, the extreme pressure yielded a predictable result, planchet cracks. Later the steam press was abandoned for striking these thin coins and the old screw press was used. This example shows two cracks in the planchet, not immediately recognizable as such but close examination confirms the cracks at 10 o'clock on the obverse and 8 o'clock on the reverse are definite cracks in the planchet. The surfaces are pleasing for the grade with pronounced die striations in the fields and bright mirroring on each side. The surfaces are lightly toned and there are two small spots that are useful pedigree identifiers: one at the top of the vertical shield stripes and on the reverse a faint spot within the 0 in the denomination.
Ex: Rossi and Wilson Collections (Bowers and Merena, 5/1997), lot 2010.
From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern in Silver
Judd-325, PR64
Possible Presentation Piece to Salmon Chase

- 5925 1863 Ten Cents, Judd-325, Pollock-390, Cassel-7, R.8, PR64 PCGS. 19.9 grains. The standard Postage Currency designs are seen on each side. Struck in 88% silver, 12% copper with a plain. Elemental analysis was done on this piece by S&N Labs and Certificate Number 04650163 confirming the less-than-coin silver content of this piece. The three Postage Currency patterns of 1863 differ by weight and thickness. Two types are on thin planchets and either weigh 20 grains or 22 grains. The thick planchet pieces (likely fantasy pieces) weigh 38 grains. Only two 20-grain examples (excluding the cracked planchet coins, Cassel-9, and the Bowers and Merena-Silverman coin are known), and both are in this collection. David Cassel believes these 20-grain pieces to have been struck by J.R. Eckfeldt and William E. DuBois and presented to Treasury Secretary Salmon P. Chase by James Pollock. The standard silver striking that weighed 20 grains was valued at 5.21 cents according to handwritten documentation that existed at one time, was photocopied, recorded, and is now lost. The 20-grain pieces are approximately 15 times rarer than their 22.5-grain counterparts. The fields show evidence of strong die polishing and there is no loss of mirroring with the light layer of golden toning seen over each side.
Ex: Long Beach and Cherry Hill Collections (NERCA, 6/1981), lot 961; L.S. Ruder Collection (Stack's, 9/1981), lot 978; Milton R. Friedberg to Auction '90 (Superior's session, 8/1990), lot 1409; David Cassel.
From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern, 97.82% Silver
Judd-325, Richly Toned PR64

5926 1863 Ten Cents, Judd-325, Pollock-390, Cassel-58, Low R.6, PR64 PCGS. 22.2 grains. This is the standard Postage Currency design. Here it is struck in 97.28% silver and 2.72% copper, with a plain edge, as verified by SEM-EDX testing by QC Metallurgical on certificate number 60482.64/21873034. According to the Chapman brothers in their 1903 Eavenson Collection, the Mint struck 43 Postage Currency patterns in May 1863. These are the most frequently encountered pieces in the Postage Currency series and most often used for type purposes. This example displays rich olive and rose toning over each side with remarkably deep mirrors that enliven the patina when the piece is rotated beneath a light.

Ten Postage Currency patterns were presented to Salmon P. Chase in 1863, and all were in original wrappers until recently. The original wrappers are now thought to be lost, but photos of them survive. It is possible to see diagnostic markings and correlate the coin with the photo taken of these presentation pieces. This example is one of the 22-grain presentation pieces, provable by comparison to these photographs (the photo negatives were originally owned by Milton Friedberg and later given to David Cassel). These photos of the wrappers and coins are reproduced on three pages in the first edition and three pages in the second edition of Cassel's Postage Currency references.

Ex: Long Beach & Cherry Hill Auctions (NERCA, 6/1981), lot 962; Auction '90 (Superior's session, 8/1990), lot 1410; Larry Shepherd Collection / Superior (8/1991), lot 910; Superior (2/2001), lot 5122; TAGZ FPL; to David Cassel.

From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Ten Cents in Silver
Judd-325, PR64, 2.6% Iron Alloy
Second Possible Presentation Piece

5927 1863 Ten Cents, Judd-325, Pollock-390, Cassel-25, R.8, PR64 PCGS. 20.17 grains. *Ex: Bass.* The standard Postage Currency obverse and reverse designs, but this lightweight example is struck in an unusual alloy of 94.5% silver, 2.9% copper, and 2.6% iron, with a plain edge, as verified by SEM-EDX testing conducted by QC Metallurgical on certificate number 60482.64/5501080. Only two 20-grain patterns were presented to Treasury Secretary Salmon Chase — who requested they be struck — and then rejected them. This is believed to be the second of the two lightweight pieces struck for presentation for him. What is most curious is the 2.6% iron alloy. According to series specialist David Cassel: "This coin was produced to test if some iron replacing an equal amount of copper would strengthen this thin, fragile coin. This is the only tested silver J-325 coin that has iron." Each side is richly toned in shades of golden-rose and sky-blue with strong underlying mirrors. Numerous lint marks were struck into the surfaces, especially the reverse.

Ex: Numismatics, Ltd. to Harry Bass (8/12/1974); Bass I (Bowers and Merena, 5/1999), lot 1080; to David Cassel.

From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern, 96% Silver
Judd-325, PR63
One of Only Two Heavy-Weight Coins Known

5928 1863 Ten Cents, Judd-325, Pollock-390, Cassel-10, R.8, PR63 PCGS. 38.3 grains. The obverse design features the heraldic shield with arrows, inside an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY above, and ACT JULY 1862 below. Struck in 96% silver / 4% copper alloy. This pattern is also known in coin silver as well as 88% silver / 12% copper alloy. Plain edge. While R.5 as a Judd-325 only one other heavier weight piece is known, making this piece R.8 in this weight category and thicker planchet type. This pattern had an intrinsic value of approximately twelve cents when it was produced. This was at a time when the Mint was charged with producing a dime worth considerably less than its intrinsic value. As such, this may be classified as a *pièce de caprice* or fantasy coin. According to David Cassel it might arguably be a rarity made for the enrichment of someone in the Mint.

There are three types of Judd-325 ten cent patterns. The first two types (both thin planchet) weigh 20 and 22.5 grains and were struck in 1863. This third type weighs 38.3 grains (thick planchet). It is identifiable as an early strike from the planchet flaw through the 0 in 10 on the reverse, a common characteristic on both of these heavier weight Judd-325 patterns. SEM-EDX testing was done by S&N Labs for PCGS to determine the metallic composition. Certificate #04646240 states this piece is 96% silver, 4% copper. The fields show evidence of heavy die polishing (and subsequent deep mirroring). Each side is mostly brilliant, and there is an immediately identifying check-like scratch at the top of the reverse.

Ex: ANA Auction (Superior, 8/1975), lot 1229; to Julian Leidman; privately to Milton R. Friedberg, prior to September 26, 1987; Milton R. Friedberg Collection (C.A.A., 1/1997), lot 1120; to David Cassel. From The David Cassel Collection. PCGS# 60482

1863 Postage Currency Pattern in Silver
Judd-325, PR64
38.5-Grain Planchet, 12 Cents Intrinsic Value

5929 1863 Ten Cents, Judd-325, Pollock-390, Cassel-69, R.8, PR64 PCGS. 38.5 grains. Both sides show the usual Postage Currency design. SEM-EDX tested by QC Metallurgical on certificate number 60482.64/13189787, and confirmed to be struck in coin silver (90% silver / 10% copper) with a plain edge. Like the other heavier weight example in this collection (the only two 38-grain examples known), this piece contains the normal amount of silver for a dime, and may have in fact been have been struck on an actual production dime planchet. This is an especially curious development as the Postage Currency series, along with encased postage and other coinage alternatives produced during the Civil War, were tokens produced of fractional value to actual Federal coinage. The thicker planchet and larger intrinsic value point to these two pieces being produced as fantasy pieces, or *pièces de caprice*. The mirrored fields flash brightly through the light layer of reddish-golden toning that covers each side.

Ex: Numismatic Gallery (11/1955), lot 566; Harold Bareford Collection (Stack's, 10/1981), lot 285; Baron Von Stetten-Buchenbach (Bowers and Merena, 11/1986), lot 775; to Doug Hales privately; to Tom O'Mara in 1999; Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16145; to David Cassel. From The David Cassel Collection. PCGS# 60482

**1863 Postage Currency Ten Cents Pattern
PR65 Red and Brown
Judd-326, Pure Copper Striking
Only Two Examples Privately Owned**

- 5930** 1863 Ten Cents, Judd-326, Pollock-395, Cassel-13, R.8, PR64 Red and Brown NGC. 36.0 grains. This is the standard Postage Currency design. The Judd-326 is struck in pure copper and has a reeded edge. Previously believed to be struck in billon (copper and silver). Only three other examples are known of this pattern. The others are in the Byron Reed Collection in Omaha, Connecticut State Library, and the 35-grain Bass Collection (offered by us in our August 2014 ANA sale). These pieces have tested as either pure copper (in the case of this piece) or nearly pure copper with negligible amounts of iron and lead (in the case of the Byron Reed piece). It appears only two heavy (35-36-grain) pieces are known. S&N Labs tested this piece in 1997 (while it was still in a PCGS holder) and its certificate number 04646243 stated it was 100% copper. This may well be the only pure copper example known in this heavier weight subset for the Judd-326. The fields are bright and shine forcefully through the blue-yellow patina that is intermixed with original red.
Ex: Quality Sales (6/1970), lot 1285; Isadore Herman Collection (Lester Merkin, 9/1974), lot 221; Milton Friedberg Collection (C.A.A., 1/1997), lot 1123.
From The David Cassel Collection. PCGS# 535038

**1863 Postage Currency Ten Cents in Billon
Judd-326A, PR64, 90.6% Copper / 9.4% Silver
Ex: Gschwend / Friedberg**

- 5931** 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-11, High R.6, PR64 PCGS. 24.7 grains. The obverse features the usual heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in billon with a plain edge. Among the numerous coins tested by SEM-EDX analysis, David Cassel found the composition varied from a low of 9.4% silver, 90.6% copper (this piece) to a high of 39.2% silver, 60.8% copper. This example was tested by S&N Labs on certificate number 60485.64/4646241. As with most billon coins, they are easily confused with copper or bronze, and as a result their pedigrees are problematic prior to the advent of metallurgical testing. However, David Cassel has traced this piece back to 1908 with a high degree of confidence. Nevertheless, this piece does look like a copper or bronze pattern with its deep brown surfaces. Slight blue patina can be seen on each side in addition to spots on the obverse (that we are not convinced are carbon). Fully struck throughout.
Ex: Peter Gschwend Collection (Thomas Elder, 6/1908), lot 218 (as brass); George H. Blake; ANA Auction (Stack's, 8/1971), lot 381; to Milton R. Friedberg; Milton R. Friedberg Collection (C.A.A., 1/1997), lot 1121; ANA Auction (C.A.A., 7-8/1997), lot 7262; to David Cassel.

1863 Postage Currency Ten Cents in Billon
Judd-326A, PR64
Struck From Uncracked Dies

5932 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-3, High R.6, PR64 PCGS. 24.8 grains. The usual obverse design that features the Federal shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse contains the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in billon with a plain edge. These interesting Civil War patterns were struck clandestinely to reduce the weight of dimes and thus produce a “token” silver coinage for use during the war. SEM-EDX testing by S&N Labs on certificate number 60485.64/9460714 revealed this piece was composed of 84% copper and 16% silver. Perhaps the most significant aspect of this piece is the lack of die cracking, indicating its first-strike status. Like other billon pieces in this collection the surfaces show deep blue-green patina with a trace of red around the reverse margin. Fully struck, spot-free, the only pedigree identifier we see is a shallow planchet flake out of the reverse to the right of the 0 in the denomination.

In pattern production, the Mint greatly abbreviated the usual process of die production. Normally, a galvano was placed on a reducing lathe, a hub was cut, and then sunk into a die blank. The stars, lettering, dentils were then added. Once it was hardened, a working hub was raised that could be used to produce working dies. But with patterns, where production runs were usually no more than a couple of dozen pieces, that process was greatly reduced. A die would be directly made for a pattern, and if more pieces were needed a hub could be created from the die. A new die could then be fashioned from the existing hub. (Thus, the argument could be made that most patterns were struck from a master die.) The fact is, no hub was ever created for the Postage Currency patterns. Not long after this coin was struck, the only existing obverse and reverse dies suffered cracks. As the cracks advanced, the resulting coins showed larger and more progressive cracks. Die crack progression is how we can demonstrate the order of striking of these coins. It is more than likely that a Mint employee created the rare early die state pieces, showing only minor cracking, before striking the coins that were authorized in silver, aluminum, and tin.

1863 Postage Currency Pattern in Billon
Judd-326A, PR64, 81% Copper / 19% Silver

5933 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-1, High R.6, PR64 PCGS. 24.8 grains. Another Postage Currency pattern from 1863, struck in billon and with a plain edge. While these billon pieces seem numerous, they are, in fact, individual compositions. This particular piece contains 81% copper and 19% silver, reasonably close to the 75 / 25 composition expected for billon coinage. This example was originally purchased by David Cassel as a silver Judd-325. With SEM-EDX testing conducted by S&N Labs on certificate number 60485.64/4137217 it turned out to be a much scarcer billon striking. Examination of the piece shows how one could be easily confused. The surfaces show a confirmed brightness, in part from the proof finish but in part also from the silver content. Otherwise each side displays an "autumn leaves" display of toning. Fully struck, of course.

*Ex: Superior (5/1994), lot 1175, as a Judd-325; to David Cassel.
From The David Cassel Collection. PCGS# 60485*

1863 Postage Currency Ten Cents in Billon
Judd-326A, PR64

5934 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-66, High R.6, PR64 PCGS. 24.9 grains. The normal Postage Currency pattern on obverse and reverse. However, here it is struck in billon, consisting of 60.8% copper and 39.20% silver, with a plain edge. David Cassel succinctly and accurately sums up the past (mis) understanding of the various Judd-326 variants when he wrote: "This category is totally screwy." To see just how screwy, read the four pages in his reference that deals with these pieces.

The best way to understand this pattern is to break down 326A as billon pieces and 326B as pure copper strikings. Billon is a difficult alloy to identify since it has such a high percentage of copper, and unsurprisingly such pieces have been cataloged in the past as copper. Fortunately SEM-EDX testing has clarified the status of most known examples (this piece was tested on certificate number 60485.64/13189496. The surfaces display deep purple-blue patina with significant brightness, which we assume must come from the 39.20% silver alloy. Just the tiniest flecks of carbon can be seen in the right obverse field, preventing an even higher grade.

*Ex: Milton Friedberg to Doug Hales to Tom O'Mara (all by private treaty); Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16146; to David Cassel.
From The David Cassel Collection. PCGS# 60485*

1863 Postage Currency Pattern, PR65
Judd-326A, Billon With a Trace of Iron
Ex: Bass

1863 Billon Postage Currency Pattern
Judd-326A, Nearly Spot-Free PR65

5935 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-27, High R.6, PR65 PCGS. 24.5 grains. Ex: Bass. The obverse features the heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in billon with a plain edge. This piece was originally thought to have a tin / copper alloy, and it was attributed as a Judd-330. However, SEM-EDX metallurgical testing conducted by QC Metallurgical on certificate number 60485.65/5500638 showed the composition to be 76% copper, 20.2% silver, and 3.2% iron. It was then correctly attributed as a Judd-326a as this is a billon composition. This example may well be the only Judd-326a with iron in the coin's alloy. The billon composition gives the coin an unusual hybrid appearance. It certainly doesn't look like silver, nor does it have a confirmed copper appearance. We have to wonder if these billon pieces may have had a more silvery appearance 152 years ago, enough that they would have been accepted in the channels of commerce. The surfaces are toned moss green with occasional hints of rose. The fields are brightly reflective and the strike details are complete throughout. A few tiny spots can be made out on the obverse, many more are seen on the reverse.
Ex: Numismatics Ltd. (8/12/1974); Harry Bass; Bass I (Bowers and Merena, 5/1999), lot 1083; David Cassel.
From The David Cassel Collection. PCGS# 60485

5936 1863 Ten Cents, Judd-326A, Pollock-394, Cassel-6, High R.6, PR65 PCGS. 24.7 grains. Standard Postage Currency obverse and reverse designs. Struck in billon with a plain edge. This beautiful Gem proof was SEM-EDX tested by S&N Labs on certificate number 60485.65/2412871 and the metallurgical results were: 83.3% copper and 16.2% silver. Like the other PR65 (the 24.5 grains-piece), this example has rich moss green patina over each side with faint traces of rose. The common color of these two pieces makes us wonder if patterns with this percentage of copper / silver alloy naturally take on this particular color scheme. We are even more convinced this may be the case since both pieces came from such diverse sources. This piece is nearly spot-free and the strike is complete on each side.
Purchased from Donald Kagin.
From The David Cassel Collection. PCGS# 60485

1863 Postage Currency Ten Cents
PR64 Red and Brown
Judd-326B, Pure Copper, Plain Edge
Possibly Unique

5937 1863 Ten Cents, Judd-326B, Pollock-396, Cassel-65, R.8, PR64 Red and Brown PCGS. 19.75 grains. This is the typical Postage Currency design. Listed as Judd-326 except it is struck in copper rather than the billon composition described by Judd. Plain edge. This piece was SEM-EDX tested by QC Metallurgical on certificate number 70515.64/21873027 and found to be pure copper. Mint records indicate only the striking of plain edge examples in billon, indicating this is a *pièce de caprice*, and incredibly rare as such. This Judd-326 version was suffixed with a "B" because it has a plain edge, unlike the Judd-326 that has a reeded edge. At 19.75 grains, its weight is also considerably different from the 36-grain Judd-326.

The surfaces are only slightly mellowed, mostly on the reverse. Bright yellow-red color is seen over much of the obverse. Another Judd-326B has been certified by PCGS, a PR64 Brown, but its present location is unknown. Assuming it does indeed exist and is correctly attributed, then this is an R.8 pattern; if not, then this piece is unique.

Ex: William W. Moore (Stack's, 3/1992), lot 1647; New York Signature (Heritage, 7/2004), lot 7896; Pre-FUN Auction (Superior, 1/2005), lot 447, where it brought \$12,650.

From The David Cassel Collection. PCGS# 70515

1863 Aluminum Postage Currency Pattern
Judd-327, PR66, Alloyed With Silicon

5938 1863 Ten Cents, Judd-327, Pollock-397, Cassel-59, High R.6, PR66 NGC. 8 grains. The obverse depicts a Union shield pierced by two arrows; a simple wreath rests above. The remainder of the design consists of token-like legends; EXCHANGED FOR U.S. NOTES on the obverse, POSTAL CURRENCY ACT JULY 1862 and 10 CENTS 1863 on the reverse. Struck in aluminum (mostly) with a plain edge. The actual composition of this pattern as determined by SEM-EDX testing (conducted by Ledoux & Company on certificate number 1285227-001 is 96.6% aluminum, 2.3% iron, 0.9% silicon, and 0.1% lead. Many aluminum and tin patterns are actually alloyed with a small amount of silicon which hardens the resultant alloy and helps preserve the surfaces. This is a remarkably bright example of aluminum coinage with no areas of oxidation present. A shallow, irregular area of planchet roughness is observed between the 1 in the date and CT of ACT. This is believed to be one of the 1863-dated presentation coins delivered to Salmon P. Chase. In 1863 aluminum was still an expensive metal. This piece had an intrinsic value of five cents, yet it weighed just a twentieth of a silver dime that was worth ten cents.

Ex: Lester Merkin to Milton R. Friedberg via private treaty in 1967; Long Beach and Cherry Hill Collection (NERCA, 6/1981), lot 963; Auction '90 (Superior's session, 8/1990), lot 1411; Larry Shepherd Collection (Superior, 8/1991), lot 914; eBay Auction (TAGZ, 12/2000); Superior (2/2001), lot 5123, to David Cassel.

1863 Postage Currency Aluminum Pattern
Judd-327, Plain Edge Striking, PR66

- 5939** 1863 Ten Cents, Judd-328 (misattributed), Pollock-398, Cassel-20, High R.6, PR66 PCGS. 8.2 grains. The obverse features the usual heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in aluminum with a plain edge. The percentage of aluminum in this alloy, as determined by S&N Labs on certificate number 60487.66/2679413, was very high at 96%, followed by 2.2% iron, and 1.6% silicon. This is an extraordinarily well-preserved pattern. The aluminum shows no signs of oxidation, and there is just the slightest hint of pale golden toning present on each side. This piece is misattributed as a Judd-328 (reeded edge). It is actually a Judd-327 (plain edge). Actually, this piece is even misattributed as a Judd-327. In earlier editions of Judd, the Judd-327 listing included aluminum Postage Currency versions in both 8 grains and pure aluminum. However, no pure aluminum pieces have been located. Judd-328 pieces weighed 11 grains, had a reeded edge, and 3% copper combined with 97% aluminum. To better cope with these impossible combinations, beginning with the eighth edition, Judd-327 encompassed all the plain edge versions; Judd-328 covered all the reeded edge pieces, and the 8 and 11 grain weights were ignored. Considering the variants of weight, purity, and edge, there eight possible combinations for just two Judd numbers: Judd-327 and Judd-328.

1863 Postage Currency Ten Cents in Aluminum
Judd-328, Unc Details
Rarely Seen Reeded Edge Variant

- 5940** 1863 Ten Cents, Judd-328, Pollock-398, Cassel-14, R.8 — **Damaged — PCGS Genuine. Unc Details.** 10.8 grains. Standard Postage Currency obverse and reverse. Struck in aluminum with a reeded edge. This rarely encountered Postage Currency issue was metallurgically examined by S&N Labs on Certificate number 635017 “Corroded” and it was found to contain 97% aluminum, 1.2% silver, and 1.6% iron. Believed to be one of only two or three reeded edge aluminum strikings extant. The surfaces are bright, most likely from cleaning, and there are numerous small to medium-sized spots of oxidation present. There is also a larger planchet lamination observed on the lower reverse (in the date area).
Ex: Stack’s MBS (11/16/1983), lot 2067; L.S. Ruder Collection (Stack’s, 9/1987), lot 983; Superior (10/1990), lot 1826; Milton R. Friedberg Collection (C.A.A., 1/1997); David Cassel.

1863 Postage Currency Pattern in Aluminum
Judd-328, PR62
Very Rare Reeded Edge Striking, PR62

- 5941** 1863 Ten Cents, Judd-328, Pollock-398, Cassel-67, R.8, PR62 PCGS. 10.9 grains. Standard Postage Currency obverse and reverse. Struck with a high percentage of aluminum with a reeded edge. The actual metallic composition of this piece as determined by SEM-EDX testing by QC Metallurgical on certificate number 60487.62/13189786 is 89.7% aluminum, 7.9% silver, 1.2% iron, and 1.2% silicon. Believed to be one of only two or three reeded edge, aluminum pieces known. Silicon is never found uncombined in nature. It is always combined with other elements, such as iron, copper, or manganese, according to the *New Columbia Encyclopedia*. While a small amount of silicon helped to harden and preserve the surfaces of this pattern, environmental conditions after a century and a half still has had an even greater influence on this coin's preservation. The other two known examples of 11-grain aluminum patterns with a reeded edge are in lower grades, and no silicon was found in either. This leads to the conclusion that the more silicon present in the aluminum alloy (as well as other base metal coins), the higher the potential grade. On this piece, each side has numerous spots of oxidation which accounts for the grade. These reeded edge, 11-grain aluminum patterns have been tested and found to contain alloys of silver, iron, silicon, and / or lead. The 11-grain, reeded edge aluminum patterns are exceptionally rare, and only three are known. (No 8-grain, reeded edge variety exists.) This aluminum Postage Currency pattern is the finest example known.
Ex: L.S. Ruder Collection (Stack's, 9/1987), lot 982; Doug Hales; Tom O'Mara; The Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16148; to David Cassel.

1863 Postage Currency Ten Cents in Aluminum
Judd-328A, 8.02-Grain Planchet, PR64

- 5942** 1863 Dime, Judd-328A, Pollock-398, Cassel-4, High R.7, PR64 PCGS. 8.02 grains. The usual obverse design that features the Federal shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse contains the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in aluminum with a plain edge. Each aluminum striking of this design varies in composition. Most likely these were struck as metallurgical trial pieces to test color, malleability, oxidation resistance, and resistance to damage in the striking process. The SEM-EDX composition of this piece as determined by S&N Labs on certificate number 70487.64/4486786 is 97.5% aluminum and 2.5% iron. This is a bright example with the often-found contrast between the fields and devices. Only a couple of spots of oxidation are seen.
Ex: Corrado Romano Estate (Stack's, 6/1987), lot 851 (as a Judd-327); L.S. Ruder Collection (Stack's, 9/1987), lot 981; Stack's (6/1994), lot 1050; David Cassel.

1863 Aluminum Postage Currency Pattern
Judd-328B, PR65
8-Grain Planchet / Plain Edge

1863 Postage Currency Ten Cents in Tin
Judd-329, PR65
Ex: Bass

5943 1863 Ten Cents, Judd-328B, Pollock-397, Cassel-8, High R.6, PR66 PCGS. 8.2 grains. The standard Postage Currency obverse and reverse designs are present on each side. Struck in aluminum with a plain edge. The SEM-EDX testing by S&N Labs on certificate number 80487.66/4624173 revealed the composition to be: 94.5% aluminum, 4.2% silicon, and 1.3% iron. The aluminum strikings of the Postage Currency patterns are found in two weight classes: 8.2 grains and 11 grains. The 328B designation is explained by PCGS' attribution of Judd-327 pieces as pure aluminum on an 11-grain planchet. Judd-328 is an alloyed aluminum eight-grain planchet with a reeded edge; therefore, Judd-328B was the PCGS choice for an alloyed 8-grain striking with a plain edge. The surfaces are remarkably preserved. There are a couple of minor planchet laminations, a common occurrence on early aluminum patterns. Otherwise, the surfaces are bright and essentially "as struck." The iron /silicon addition to the aluminum alloy appears to have been remarkably effective. We would be interested to find out if other later-dated aluminum patterns also used this as part of the aluminum alloy, or was the discovery of the combination of the strengthening property of iron and the preservation of surfaces of silicon lost on Mint personnel at the height of the Civil War?
Ex: Lester Merkin private treaty sale to Milton R. Friedberg in 1967; Long Beach & Cherry Hill Collection (NERCA, 6/1981), lot 963; Larry Shepherd Collection (Superior, 8/1991), lot 913; Superior (5-6/1993), lot 1250; David Cassel.
From The David Cassel Collection. PCGS# 80487

5944 1863 Ten Cents, Judd-329, Pollock-399, Cassel-26, Low R.6, PR65 PCGS. 21.1 grains. Ex: Bass. Standard Postage Currency obverse and reverse. Struck in tin with a plain edge. Patterns struck in tin are rare, and high-grade examples are even rarer. The composition of this piece explains a great deal about why this piece has survived in Gem condition. SEM-EDX testing conducted by QC Metallurgical on certificate number 60488.65/5500637 revealed the composition as: 96.7% tin, 2.9% iron, and 0.4% silicon. The iron would have been a natural alloy metal added to the tin to strengthen the coin's composition. But silicon was found with the iron ore. Silicon is never found in nature in a pure state. In this case it bonded with iron to produce ferro-silicon, with the result that the iron strengthened the composition and the silicon helped prevent oxidation. According to the George Eavenson Collection of 1903 (Chapman Brothers), 39 pure tin coins were struck in May 1863. The surfaces are exceptionally bright and reflective with a rippling effect in the fields. No toning is present.
Ex: Massachusetts Historical Society and Appleton Collection (Stack's, 5/1973), lot 325; Harry Bass Collection, Part I (Bowers and Merena, 5/1999), lot 1082; David Cassel.

1863 Postage Currency Ten Cents in Tin
Judd-330, PR62, Ex: Garrett
Heaviest Known, Slightly Alloyed With Lead

5945 1863 Ten Cents, Judd-330, Pollock-399, Cassel-21, Low R.6, PR62 PCGS. Ex: Garrett. The obverse depicts an ornamental shield with an inverted laurel wreath suspended from a ring. A pair of crossed arrows is behind the shield. The inscription reads EXCHANGED FOR U.S. NOTES. The reverse has 10 CENTS 1863 in the center with * POSTAGE CURRENCY * ACT JULY 1862 around the margin. Struck in almost pure tin with a plain edge. As David Cassel stated in his reference this Judd-330 piece is a "version" of a Judd-330. It is the heaviest Judd-330 known, undoubtedly because of the presence of a small amount of lead in the composition. SEM-EDX testing conducted by S&N Labs on certificate number 60489.62/2407865 indicated this piece is composed of 98% tin, 1% copper, and 1% lead. The difference between Judd-329 and 330 is weight. Both are tin compositions, either pure (329) or slightly alloyed (330). The Judd-329 coins weigh 20.5 grains, the Judd-330 pieces are heavier at 25 grains. The "variant" mentioned above is explained by the heaviness of this piece. The surfaces are muted gray-brilliant with significant brightness in the proof fields.

Ex: Mendez I. Cohen Collection (Edward Cogan, 10/1875), lot 1336; to John W. Haseltine; T. Harrison Garrett; Garrett II (Bowers and Ruddy, 3/1980), lot 1015; Auction '82 (Superior's session, 8/1982), lot 1494; Superior (5-6/1993), lot 1257; Larry Hanks private transaction to David Cassel.

1863 Postage Currency Pattern
Tin / Copper Alloy, Judd-330, PR63

5946 1863 Ten Cents, Judd-330, Pollock-399, Cassel-68, Low R.6, PR63 PCGS. 28.1 grains. Standard Postage Currency obverse and reverse designs. Struck in tin (mostly) with a plain edge. According to the Chapman Brothers in their 1903 catalog of the George Eavenson Collection, 15 tin coins that were alloyed with copper were struck in May 1863. This piece's SEM-EDX testing that was conducted by QC Metallurgical on certificate number 60489.63/13189497 showed its alloy to be 98.72% tin and 1.28% copper. The Judd reference previously (7th edition and earlier) stated these pieces contained 3% copper. However, to date none of the pieces tested have had that much copper content, and the 3% assertion has been dropped from subsequent editions. The tin surfaces are bright and virtually undiminished by toning. The strike is strong throughout and there are a number of lint marks impressed into the reverse, debris that obviously adhered to the die by static electricity after the die was wiped by the coiner.

Ex: Len Glazer to Tom O'Mara (1/3/1985); The Tom O'Mara Collection of Fractional Currency (Heritage Currency, 5/2005), lot 16149; David Cassel.

1863 Copper-Nickel Postage Currency Ten Cents
Judd-330A, PR65
Unusual Iron and Silicon Additions to the Alloy

5947 1863 Ten Cents, Judd-330A, Pollock-401, Cassel-32, R.7, PR65 PCGS. 32.7 grains. The obverse features a heraldic shield with arrows, framed by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the peripheral inscriptions POSTAGE CURRENCY and ACT JULY 1862. Struck with a medal turn, in cupro-nickel with a reeded edge. SEM-EDX testing conducted by QC Metallurgical on certificate number 60490.65/2615814 reveals the curious alloy of this piece: 73.32% copper, 24.06% nickel, 2.57% iron, and 0.05% silicon. The composition raises two questions about the alloy of these patterns. How much harder would the iron make the already hard copper / nickel alloy? How much (or little) silicon was necessary to enhance the preservation of the surfaces? To answer the second question first, it appears very little silicon is actually needed to prevent deterioration of the alloy. The question of the addition of iron remains an open one.

There were no cupro-nickel Postage Currency listed in either the Eavenson Sale (1903) or the George H. Earle Sale (1912). It is most likely the three known (and fourth possible) copper-nickel pieces were confused with silver strikes. However, silver pieces with reeded edges never existed and have been delisted.

Only slight strike softness is noted from this hard alloy with some weakness on the venation on the leaves in the wreath noted. Each side displays reddish-lilac patina with a light gray overtone. Close examination shows only a few small spots of carbon.

Ex: L.S. Ruder Collection (Stack's, 9/1987), lot 985; Musikoff Collection (Jay Parrino FPL, 1997); The California Sale (Goldberg Auctions, 10/2000), lot 590; David Cassel.

1863 Postage Currency Ten Cents, PR64 Brown
Judd-331A, Unique Copper Striking
Ex: Davis-Brand-Boyd-Farouk

5948 1863 Ten Cents, Judd-331A, Pollock-403, Cassel-17, Unique, PR64 Brown PCGS. 38.4 grains. Regular obverse dies trial but undated, the reverse is the standard Postage Currency format. Struck in pure copper with a reeded edge. David Cassel had S&N Labs conduct SEM-EDX testing for PCGS on this piece in 1997. Their certificate number 104646247 confirmed this piece was pure copper. To quote Cassel from his second edition: "It is a fantasy piece created for no other reason than to create a great and valuable rarity." Later he speculates about the creation of this piece:

"The coin was probably created by William E. DuBois, assayer and coiner at the request of Dr. Henry Linderman, later to become Direction of the U.S. Mint. Linderman and others are credited with creating some of the classic and rarest collectibles to come out of the Mint, including some incredible restrikes. It is probable that William E. DuBois had a hand in all of this as he knew every job connected with the Mint. He was employed at the U.S. Mint for more than forty years beginning in 1840."

The brown patina is thick over the surfaces, but if the piece is angled just right underlying multicolored iridescence is abundantly evident. The strike details are strong throughout and there are no obvious contact marks.

Undated (1863) Postage Currency Pattern
Judd-331B, PR64, Copper-Nickel Alloy
Ex: Eliasberg

- 5949** 1863 Ten Cents, Judd-331B, Pollock-402, Cassel-5, R.7, PR64 PCGS. 33.1 grains. Ex: Eliasberg. The design is a dateless Seated Liberty obverse, paired with the Postage Currency reverse featuring 10 CENTS 1863 in the center and * POSTAGE CURRENCY * ACT JULY 1862 around the margin. Struck in copper-nickel with a reeded edge. This dateless Seated Liberty obverse was left over from 1863 and is characterized by the broken top to the first S in STATES, obviously caused by the heavy lapping required to eliminate six years of die rust that had accumulated. A few of these fantasy pieces were created by pairing the undated obverse from 1863 with the Postage Currency reverse from that same year. A faint diagonal die scratch through the field and foot of Liberty is seen to some degree on all five pieces known of this obverse/reverse pairing. SEM-EDX testing conducted by S&N Labs on certificate number 60493.64/4486785 revealed the exact composition of this piece to be 74% copper and 26% nickel. The surfaces show just the slightest hint of reddish toning with strong underlying brightness in the fields. Each side also shows (with magnification) a number of contact marks and lint marks. A couple of other obverse die scratches are also seen, an obvious effort on the coiner's part to efface die rust. Ex: Charles Morris Collection (S.H. and H. Chapman, 4/1905), lot 384; J.M. Clapp; Louis Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 5/1996), lot 193; David Cassel. From The David Cassel Collection. PCGS# 60493

Undated (1863) Postage Currency Pattern
Judd-331C, PR65
Iron and Cobalt in the Cupro-Nickel Alloy

- 5950** 1863 Ten Cents, Judd-331C, Pollock-402, Cassel-23, R.8, PR65 NGC. 31.86 grains. The design is a dateless Seated Liberty obverse, paired with the Postage Currency reverse featuring 10 CENTS 1863 in the center and * POSTAGE CURRENCY * ACT JULY 1862 around the margin. Struck in medallic alignment in copper-nickel with a reeded edge. Like the Judd-331b above, this piece shows the diagnostic angling die scratch through the foot of Liberty and the "broken" top of the first S in STATES, both characteristics of reworking of the leftover, repolished obverse from 1863. The "c" designation indicates a different copper-nickel alloy, in this case alloyed with iron and cobalt. One other such piece is known. SEM-EDX testing conducted by Ledoux & Company Certificate number 289163-019 showed the metallurgical composition of this piece as: 74.9% copper, 24.5% nickel, 0.35% iron, and 0.18% cobalt. No one has given an explanation for the presence of iron and cobalt in the copper-nickel alloy. David Cassel's only guess is that in larger percentages, iron and cobalt would make the coin magnetic. The fields are remarkably bright and mirrored, especially so for a coin with such a strong presence of nickel in the alloy. Light, streaky reddish toning is seen across each side. There are a few field marks and Mint-made lint marks, and the strike displays localized softness on the head of Liberty. Ex: Lenox Lohr / ANA Auction (Numismatic Gallery, 8/1958), lot 49; Bareford Collection (Stack's, 10/1981), lot 288; to a New England collector; appeared in a Coin World ad for JMN & Associates, 1/31/1990; to Donald Kagin and Andy Lustig; David Cassel (1998). From The David Cassel Collection. PCGS# 60491

1868 Ten Cent Pattern
Judd-641A, Bright and Flashy PR65
 Remotely Related to Postage Currency Issues

1868 Dime Pattern in Copper, PR63 Brown
Judd-642, The Only Example in Private Hands
 Ex: Woodin-Farouk

5951 1868 Ten Cents, Judd-641, Pollock-713, Cassel-30, Low R.7, PR65 NGC. 31.64 grains. The obverse is the regular issue design of the Seated Liberty dime except with no date. The reverse is similar to the regular issue Seated Liberty design with the date and a star inside the wreath. Struck in copper-nickel alloy with a reeded edge. The obverse is from the same undated, vigorously polished obverse die used to strike the undated mules that were paired with the Postage Currency reverse; thus making these pieces distantly related to the Postage Currency series. SEM-EDX testing conducted by Ledoux & Company on certificate number 581886-002 revealed the composition of this piece as: 76% copper, 23% nickel, 0.3% cobalt, 0.2% iron, and 0.1% silicon. It is David Cassel's opinion that the presence of small amounts of silicon, iron, and cobalt account for the better flash and contrast of this piece than the Friedberg, Eliasberg, or Wolfe examples. To us this seems doubtful since these elements are present in such small amounts. It seems more likely this was simply a well-produced and well-preserved pattern. The fields show the expected die polishing marks, and they are exceptionally deep in mirrored reflectivity. Additionally, the devices display significant mint frost, giving the coin considerable field-device contrast on each side. Just a hint of pale golden-rose toning is present across each side. The devices are fully struck in all areas. Ex: National Money Show Auction (Superior, 3/2000), lot 655; Donald Kagin and Andy Lustig; David Cassel. From The David Cassel Collection. PCGS# 60859

5952 1868 Ten Cents, Judd-642, Pollock-714, Cassel-39, R.8, PR63 Brown PCGS. 27.46 grains. The obverse is of the regular dies 1868 dime. The reverse, however, shares the same design as Judd-640 through 646, showing ONE DIME in the center, a six-pointed star above, the date below, and all surrounded by a wreath of cotton, corn, and tobacco. SEM-EDX tested by QC Metallurgical on certificate number 60860.63/21873030 confirmed this piece was struck in pure copper. Designated a Brown coin, the surfaces are deep brown with just the faintest glimmers of red still evident surrounding the devices. Only one other Judd-642 is known, and that piece is part of the Mitchelson Collection at the Connecticut State Library. That coin weighs 18 grains, making each piece known unique in its weight category. Ex: William Woodin; Hans Schulman to King Farouk; The Palace Collections of Egypt (Sotheby's, 2/1954), lot 1815; to Sol Kaplan; to Gene Wolfe; Gene Wolfe Collection / FUN Signature (Heritage, 1/2000), lot 7423; Stack's (12/2003), lot 197, uncertified, where it brought \$9800. From The David Cassel Collection. PCGS# 60860

1868 Postage Currency Dime (Struck in 1863)

Judd-644, PR64

Ex: Garrett

5953 1868 Ten Cents, Judd-644, Pollock-716, Cassel-18, Low R.7, PR64 PCGS. 30.9 grains. Ex: Garrett. A Postage Currency related pattern, dated 1868. The obverse has a central shield with diagonal arrows behind, EXCHANGED FOR above and U.S. NOTES below. The reverse is a variant of the adopted design with the central wreath surrounding ONE DIME, a six-pointed star above and the date below. Struck in copper-nickel with a reeded edge. The metallic composition of this piece, as determined by SEM-EDX testing by S&N Labs on certificate number 60862.64/4646248, is 74% copper and 26% nickel.

The most numismatically interesting revelation about this series of patterns is when the 1868-dated pieces are compared side-by-side with those from 1863, the 1868-dated coins have less advanced die cracks. In the second edition of his reference on the Postage Currency series, David Cassel explained:

“these coins dated 1868 ... were produced in May 1863 before most of the Dies 1-A coins as *pièces de caprice* for collectors. The several I have seen do not appear to be restrikes but appear to be Mint date logo punch errors. I am not aware of any patterns that were struck five years in anticipation of the expectation of a need.”

Pronounced striking softness is noted at 2 o'clock on the obverse, affecting most of the word FOR. The obverse die was vigorously lapped and the fields are brightly reflective. The reverse shows peripheral die cracking and occasional areas of die rust. The leaves on the lower right portion of the wreath are weakly impressed also. These two areas of strike weakness are undoubtedly from the hardness of the 26% nickel alloy. Pale rose toning covers otherwise brilliant surfaces.

Ex: John Work Garrett Collection (Stack's, 3/1976), lot 602; Auction '82 (Paramount's session, 8/1982), lot 1814; Charmont Sale (Steve Ivy, 8/1983), lot 4586; Milton R. Friedberg Collection (C.A.A., 1/1997), lot 1128; David Cassel.

1868 Postage Currency Pattern in Copper
Judd-645, PR67 Brown
Thin Planchet, Probably Unique as Such

5954 1868 Ten Cents, Judd-645, Pollock-717, Cassel-28, High R.7, PR67 Brown PCGS. 28.1 grains. Ex: Bass. A rare Postage Currency related pattern, dated 1868. The obverse displays the expected central shield with diagonal arrows behind, EXCHANGED FOR above and U.S. NOTES below. The reverse is a variant of the adopted design with the central wreath surrounding ONE DIME, a six-pointed star above and the date below. Struck in copper, medallion alignment on a thin planchet, and with a plain edge. This appears to be the only thin planchet, light weight example known of this pattern. At least one thick planchet coin exists and possibly two exist at 38.6 grains. This seldom-seen 1868 Postage Currency pattern has two distinctive characteristics. The first is the previously mentioned misdated date punch used — the coin having actually been struck in 1863 — and showing a pronounced lack of die cracking seen on later 1863 strikes. Second is the curious double-struck reverse. There is approximately 5 degrees of rotation between the first and second strike, and no evidence of double striking on the obverse. SEM-EDX testing conducted by QC Metallurgical on certificate number 60863.67/5500641 showed this piece to be almost pure copper. The exact breakdown is 97.65% copper and 2.35% iron. The surfaces on this piece are nothing less than spectacular. The PR67 grade tells much more about the appearance than does the Brown designation. Each side has an inescapable deep blue patina and the deeply mirrored fields further enhance the vibrancy of the color. What is not stated on the insert is the contrast present on each side, but the fields and devices display a stark cameo effect. The surfaces are almost perfectly preserved.
Ex: *The Palace Collections of Egypt - Farouk* (Sotheby's, 2/1954), lot 1815; *Sol Kaplan*; *Harry X Boosel Collection* (RARCOA, 1/1973), lot 589; *Brinton T. Schorer to Harry Bass* (5/3/1973); *Harry Bass Collection, Part I* (Bowers and Merena, 5/1999), lot 1086; *David Cassel*.
From *The David Cassel Collection*. PCGS# 60863

1868 Dime Pattern in Copper
Judd-645, PR64 Red and Brown
Combined 2-3 Pieces Known of This Issue
Ex: Garrett

5955 1868 Ten Cents, Judd-645, Pollock-717, Cassel-60, R.8, PR64 Red and Brown PCGS. 38.7 grains. Ex: Garrett. This unusual and rare pattern shows a small shield and inverted wreath on the obverse and a legend that reads EXCHANGED FOR U.S. NOTES. The reverse is laid out in a peculiar fashion also with ONE DIME in the center, a six-pointed star above, the date below, and all surrounded by a wreath of cotton, corn, and tobacco. Struck in copper, medallic alignment, and a plain edge. Only one or two other heavy weight examples of this pattern are known. The plain edge copper strikings (now believed unique) were not included in the Adams-Woodin pattern reference in 1913, but have been included in both the Judd and Pollock references. This piece was SEM-EDX tested by QC Metallurgical on certificate number 70863.64/21873025.

The surfaces are remarkably clean and problem-free for the stated grade. Original mint red is obvious beneath the light layer of brown patina that covers each side. Fully defined throughout with significant mirroring in the fields.

Ex: Garrett Collection (Bowers and Ruddy, 3/1980), lot 1016; unknown intermediaries; Long Beach Signature (Heritage, 3/2003), lot 9075. From The David Cassel Collection. PCGS# 70863

1868 Ten Cents Pattern
Judd-646, PR61
Unusual Aluminum / Silver Alloy

5956 1868 Ten Cents, Judd-646, Pollock-718, Cassel-29, R.7, PR61 PCGS. 11.9 grains. The obverse has an ornamental shield in the center with an inverted laurel wreath suspended from a ring. A pair of crossed arrows is behind the shield. The peripheral device reads EXCHANGED FOR U.S. NOTES. The reverse displays ONE DIME / 1868 / a six-pointed star in the center / surrounded by a cereal wreath. Struck in aluminum / silver alloy with a plain edge. SEM-EDX testing, conducted by QC Metallurgical on Certificate number 60864.61/9321628, shows this piece to be composed of 61.1% aluminum, 29.5% silver, 6.19% iron, and 3.21% copper. One can only speculate what the Mint's intention was in striking this (and the other Judd-646) in this unusual aluminum / silver alloy. David Cassel considered these two pieces fantasy products of the Mint with a value of nine cents at the time they were produced. The surfaces, undoubtedly a result of the peculiar alloy, are dull and chalky-white. The strike is strong throughout and there are numerous small, but individually insignificant spots across each side.

Ex: W.J. Crouch Collection (Superior, 6/1977), lot 297; Gene Wolfe Collection of Postage Currency Patterns / FUN Auction (Heritage, 1/2000), lot 7424; David Cassel.

From The David Cassel Collection. PCGS# 60864

1868-Dated Ten Cents Pattern
Judd-646, PR63
Unique Aluminum / Silver Alloy Composition

5957 1868 Ten Cents, Judd-646, Pollock-718, Cassel-70, R.7, PR63 PCGS. 11.6 grains. An unusual and rare pattern with a small shield and inverted wreath on the obverse and a legend that reads EXCHANGED FOR U.S. NOTES. The reverse is laid out with ONE DIME in the center, a six-pointed star above, the date below, and all surrounded by a wreath of cotton, corn, and tobacco. Struck in aluminum / silver alloy with a plain edge. As with the PR61 Judd-646 above, this piece was struck in a similarly unusual alloy. The differing compositions of each lend a unique quality to each. This piece was SEM-EDX tested by QC Metallurgical on Certificate number 60864.63/13189788, which showed the piece to be composed of 80.4% aluminum, 18.10% silver, 0.9% silicon, and 0.7% iron. In addition to the singular metallic compositions of these Judd-646 pieces, they are noteworthy for another reason. The die cracks on the obverse are less advanced than those on the aluminum Die 1-A presentation pieces. The significance being this proves these pieces were struck in May 1863, not in 1868 as the date on these pieces would lead one to believe. This example lacks the chalky color of the other Judd-646, and the fields are moderately bright. There are numerous spots of oxidation on each side, a problem seen on many aluminum patterns that were not stored properly.

Ex: *Goldberg Auctions* (5/2003), lot 593; *Stack's* (10/2003), lot 2025; *Oliver Jung Collection* (*American Numismatic Rarities*, 7/2003), lot 1018; *Medio and Henry da Costa Gomez Collections* (*Stack's / ANR*, 6/2004), lot 4685; *Richard Jewell Collection* (*American Numismatic Rarities*, 3/2005), lot 1050; *Rarities Sale* (*Bowers and Merena*, 7/2005), lot 2390; *David Cassel*.
From The David Cassel Collection. PCGS# 60864

1869 SIL. / NIC. Dime Pattern
Judd-714, PR64
Cupro-Nickel Experimental Strike

5958 1869 Ten Cents, Judd-714, Pollock-793, Cassel-22, Low R.7, PR64 PCGS. 30.9 grains. The obverse features the regular issue Liberty Seated design without the date. The reverse is inscribed SIL. 9 / NIC. 1 / 1869. Struck in cupro-nickel composition with a reeded edge. While one would naturally assume (as did Adams-Woodin and the early editions of the Judd book) that this pattern would be a metallurgical trial for a silver / nickel alloy, that has not turned out to be the case. The only pieces known of this pattern are in copper-nickel alloy. This particular piece was SEM-EDX tested by S&N Labs on certificate number 60939.64/2510321 and turned out to be 75% copper and 25% nickel. The surfaces have the "hard" look of a nickel coin with satiny mint luster and light oil-slick iridescence over each side. In spite of the high nickel content, the strike details are strongly brought up, and there are no obvious or detracting abrasions. A light streak of discoloration through the S in SIL. is noted, and is an easy pedigree identifier. Fine diagonal die striations are seen to the upper-right of the figure of Liberty, a characteristic of all patterns in this series.

Ex: *David B. Silberman, Jr. Collection* (*Bowers and Merena*, 11/1988), lot 5392; *ANA Signature Auction* (*Heritage*, 8/1998), lot 5103; *David Cassel*.
From The David Cassel Collection. PCGS# 60939

1869 Copper Ten Cent Pattern
Judd-715, PR66 Brown
SIL. / NIC. Reverse Design

- 5959** 1869 Ten Cents, Judd-715, Pollock-794, Cassel-61, Low R.7, PR66 Brown NGC. 37 grains. The obverse is similar to the regular issue, but without the date in the exergue area. The reverse has SIL. 9 / NIC. 1 / 1869 in large letters and digits. This reverse design pattern was struck in copper with a reeded edge. Of the six known examples of this copper striking, this is the finest certified. SEM-EDX testing by Ledoux & Company Certificate number 919577-011 proved it to be almost pure copper: 99.7% copper and 0.2% nickel. Curiously, the silver / nickel alloy stamped on the reverse of this piece does not appear to exist on any coins of this design. The production of this almost pure copper piece makes one wonder what was intended by Mint officials. Each side displays variegated "autumn leaves" toning that is quite deep in hue, yet the surfaces show strong underlying brightness. Pronounced die striations are easily in the upper-right of the obverse as well as the long diagonal die scratch in the lower obverse field that passes under the foot of Liberty.
Ex: Goldberg Auctions (5/2003), lot 593; David Cassel.
From The David Cassel Collection. PCGS# 60940

1869 Ten Cents Pattern, PR64
Judd-716, SIL. / NIC. / COP. Reverse

- 5960** 1869 Ten Cents, Judd-716, Pollock-795, Unlisted in Cassel, High R.6, PR64 PCGS. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. in larger letters, the date is below, smaller, and slightly curved. Allegedly struck in Koultz's alloy, a variant of German silver, with a reeded edge. SEM-EDX testing was done on this piece, but the totals only add up to 98%. The known percentages are: 35% nickel, 38% copper, and 25% silver. This piece has the appearance of a nickel coin with more subdued, satiny surfaces and minimally reflective fields. Each side displays finely variegated rose-lilac-gray patina, and there are no mentionable flaws on either side. Sharply defined throughout.
From The David Cassel Collection. PCGS# 60941

1869 'Koulz's Alloy' Dime in Silver
Judd-716A, PR63

- 5961** 1869 Ten Cents, Judd-716A, Pollock-796, Cassel-62, High R.7, PR63 PCGS. 38.4 grains. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. in larger letters with the date below, in a smaller font, and slightly curved. This design pattern has a reeded edge and was supposedly struck in the unworkable alloy of silver, nickel, and copper: Koulz's alloy. This piece was struck in 100% silver, as confirmed by SEM-EDX testing conducted by QC Metallurgical on certificate number 60942.63/21873023. As a reminder, the link of the so-called Koulz's Alloy patterns with the Postage Currency series is the use of the Postage Currency undated obverse, identifiable by the broken first S in STATES. The so-called Koutz's Alloy has turned out to be a misnomer. David Cassel's extensive research failed to reveal a single person named Koulz. However, there were a number of entries for a French chemist, Montchal Roulz. So Koulz's Alloy may simply be a typographical error or misreading of the capital letter R, one that should actually be Routz's Alloy. The surfaces of this piece are bright throughout with just the slightest trace of toning on the reverse. The strike is well brought up overall and there are no distracting contact marks evident.
Ex: *The Palace Collections of Egypt*, (Sotheby's, 2/1954), lot 1831; Hans Schulman; T. James Clarke, et al.; (Numismatic Gallery, 11/1955), lot 581; Maurice M. Burgett & Lenox R. 1869 Silver 'Koutz's Alloy' Dime
SIL. / NIC. / COP. Reverse
Judd-716A, PR64

- 5962** 1869 Ten Cents, Judd-716A, Pollock-796, Cassel-63, High R.7, PR64 PCGS. 38.6 grains. The obverse was struck from the leftover, undated obverse die used on Postage Currency patterns from 1863. The reverse has SIL. / NIC. / COP. in larger letters with 1869 below, in a smaller font, and slightly curved. Struck in almost pure silver (not the alloy stated on the reverse) with a reeded edge. The SEM-EDX composition of this piece as determined by QC Metallurgical on certificate number 60942.64/21873026 proved to be 98.77% silver and 1.23% copper. The name Koulz appears to have originated in an obscure 1869 government publication *Suggestions to Congress of the Finances of the United States*. In that booklet there is a quote from W. E. DuBois who described the proposed the alloy of 41% copper, 33% nickel, and 26% silver:

"Mr. Eckfeldt made a small bar, and gave it three meltings. It rolled down with great difficulty, splitting and cracking in spite of all the precaution and annealings. Mr. Barber made a reverse to try it under the press (using the dime head for the obverse), and a faint impression was produced in the steam press. The metal is totally unfit for coinage, and the color is bad."

It is unlikely that any of the so-called "Koulz's alloy" impressions made it out of the Mint. Only one piece is known with a roughly comparable composition. Instead, the reverse die was used to strike more conventional metals and alloys. Deep rose and blue toning is seen in equal measures over each side with light hairlining apparent with magnification. Otherwise, no contact marks are seen.

1869 'Koulz's Alloy' Ten Cents in Copper
Judd-717, PR64 Red and Brown

- 5963** 1869 Ten Cents, Judd-717, Pollock-797, Cassel-46, Low R.7, PR64 Red and Brown PCGS. 31.20 grains. The "Koulz's Alloy" design that uses the undated Postage Currency obverse (from 1863) with the "broken S" in STATES, paired with the reverse that displays SIL. / NIC. / COP. in the center, followed by a straight line, then the date, in exergue. Struck in copper with a reeded edge. Certificate number 5500648 Similar to German silver (Neusilber), French chemist Montchal Roulz received a French patent for his silver / nickel / copper alloy in 1841. The composition's unsuitability for use in coinage left the Mint with an experimental reverse die, but no usable experimental alloy. Pieces were struck using the SIL. / COP. / NIC. reverse in silver, nickel, and copper. This piece displays rich cherry-red color with faint traces of blue intermixed. The fields show signs of heavy die polishing which give the piece its brightly mirrored fields. The strike is sharp throughout with a few small, grade-limiting specks of carbon present.
Ex: David Golding Sale (Stack's, 6/1952), lot 16; ANA Auction (Stack's, 8/1971), lot 402; Brinton T. Schorer (5/3/1973); Harry W. Bass Collection, Part I (Bowers and Merena, 5/1999), lot 1093; Teletrade Auction 1382 (11/29/2000), lot 1148; David Cassel.

1869 Ten Cent 'Koulz's Alloy'
Judd-717A, PR64
Alloyed With Traces of Iron and Silicon

- 5964** 1869 Ten Cents, Judd-717A, Pollock-798, Cassel-64, High R.7, PR64 PCGS. 44.3 grains. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. in the center with the date slightly curved below and in a smaller font. This second reverse design pattern has a reeded edge. The reverse states it was struck in the unworkable alloy of silver, nickel, and copper: Koulz's alloy. However, this example proved to be composed of a most interesting alloy when SEM-EDX testing was conducted by QC Metallurgical on certificate number 60944.64/21873031: 76.07% copper, 23.42% nickel, 0.27% iron, and 0.24% silicon. This piece was originally attributed as a Judd-716 (Koulz's alloy), but after metallurgical testing was done it was reholdered as a Judd-717A (mostly nickel) striking. The difference between the two cannot be discerned by appearance, weight, or specific gravity; only SEM-EDX testing can differentiate between the two alloys. The piece looks like other nickel patterns we have seen with subdued mint luster. The strike is surprisingly strong for a composition as hard as this one. Moderate reflectivity is seen in the fields and the devices are notably frosted, yielding significant contrast. Light gray-rose toning is seen over each side. An irregular planchet flaw in the right field serves as a useful pedigree identifier.
Ex: eBay offering #391360575 (2004) by Blue Moon Coin; David Cassel.
From The David Cassel Collection. PCGS# 60944

1869 'Koulz's Alloy' Dime
Judd-717A, PR65
Copper / Nickel Composition

1869 Dime Pattern, Cupro-Nickel
Judd-717A, PR66
The Finest SIL. / NIC. / COP. Design

5965 1869 Ten Cents, Judd-717A, Pollock-798, Cassel-24, High R.7, PR65 NGC. 45.94 grains. The undated obverse is similar to the regular issue and was used to strike the Postage Currency patterns in 1863, as seen by the broken top of the first S in STATES. The reverse features SIL. / NIC. / COP. in the center, followed by a straight line, the date in the exergue below and in a smaller font. Allegedly struck in the unworkable Koulz's alloy with a reeded edge. SEM-EDX testing conducted by Ledoux & Company Certificate number 235641-018 actually showed this piece to be struck in 74.5% copper, 24.9% nickel, 0.33% iron, and 0.27% cobalt. Two of the three elements in Koulz's alloy (or more precisely Montchal Roulz's alloy) are present in this piece, but no silver was found. This is a brightly mirrored proof whose reflectivity greatly enhances the oil-slick patina seen over each side. High-point definition is lacking on the hair and breasts of Liberty, not surprising considering the hardness of the alloy this piece was struck in. Numerous flyspecks of carbon are scattered over each side, but there are no obvious or detracting contact marks.

From *The David Cassel Collection*. PCGS# 60944

5966 1869 Ten Cents, Judd-717A, Pollock-798, Cassel-31, High R.7, PR66 NGC. 44.60 grains. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. with the date slightly curved below and in a smaller font. This second reverse design pattern has a reeded edge and was a modification of the virtually unworkable "Koulz's Alloy." This piece has been SEM-EDX tested at Ledoux & Company Certificate Number 919577-012 and the results are: 76% copper, 23% nickel, 0.2% silicon, 0.1% iron, 0.1% cobalt, and 0.05% silver. This composition was also very difficult to produce because of the high nickel content. This particular piece is the finest known at both services (5/15). The bright nickel-gray fields show light oil-slick iridescence that is most attractive, and the devices are especially well struck considering the hardness of the alloy.

Ex: *Heritage FPL* (9/22/1998), offered as a Judd-716; *Kagin's private treaty* (3/2000) to *David Cassel*.

CASSEL COLLECTION BOOKS

Postage Currency References by David Cassel First and Second Editions

- 5967 Pattern Postage Currency References, First and Second Editions.** For the Postage Currency specialist, these two volumes are indispensable. Each is long out-of-print. Each volume of *United States Pattern Postage Currency Coins* details David Cassel's journey of knowledge in uncovering the facts of this oftentimes surprising series. The first edition is Number 29 of a run of 110 volumes of the Premier Edition from 2000. The second edition is Number 29 of a tiny run of only 30 books, published in 2007. Each volume is in mint condition and shrink-wrapped. The first edition is autographed by the author.
From The David Cassel Collection. (Total: 2 books) PCGS# 661000

Postage Currency References First and Second Editions

- 5968 Pattern Postage Currency References, First and Second Editions.** A second set of this definitive reference on Postage Currency and associated patterns. These editions of *United States Pattern Postage Currency Coins* have long been out-of-print, and this and the previous lot are the final books held by the author. The Premier first edition (2000) is Number 30 of 110 books printed, and it autographed by David Cassel. The second edition (2007) is Number 30 of only 30 books printed. The pair is shrink-wrapped by the author and in new condition.
From The David Cassel Collection. (Total: 2 books) PCGS# 661000

PATTERNS

1836 Two Cent, Near-Mint Judd-53, Reeded Edge

- 5969 1836 Two Cents, Judd-53, Pollock-54, Low R.6, AU58 PCGS.** The first pattern two cent design. The obverse has a small eagle that stands on a cloud, with the date below and UNITED STATES OF AMERICA at the borders. The reverse has the denomination widely spaced within a peripheral laurel wreath. Struck in billon with a reeded edge. A well defined example with deep gunmetal-gray toning. Despite momentary circulation, we can mention only a small spot near the left (facing) wingtip and a slight obverse edge knock at 5:30 o'clock. PCGS# 11196

1858 Indian Cent in Copper-Nickel Judd-208, Pollock-259 Centered Date, Five Leaf Clusters

- 5970 1858 Indian Cent, Judd-208, Pollock-259, R.3, PR64 PCGS.** Snow-PT28. Die Pair 1. The Indian Head cent as adopted in 1859, with clusters of five leaves on the reverse wreath. This is the Centered Date Pollock variant. Struck in copper-nickel with a plain edge. This is the most commonly encountered of the four Judd-208 variants. Obviously a copper-nickel product from the "white" appearance of the coin, only slight rose color is seen on each side. A number of small, but individually insignificant contact marks are seen on each side. Slight high-point softness is noted on the headdress and laurel wreath. PCGS# 11885

1859 Indian Cent Pattern, PR12 Judd-230, Pure Copper

- 5971 1859 Indian Cent, Judd-230, Pollock-274, High R.7, PR12 NGC.** Ex: Col. Green, Eric P. Newman Collection. 4.7 gm. Struck from regular issue 1859 Indian cent plain edge dies, but in 100% copper instead of the expected 88% copper, 12% nickel alloy. The cent undoubtedly circulated for a number of years until was saved, probably because of its pre-Civil War date, or laurel wreath reverse. But its status as a pattern was known to Newman, who paid \$12.50 for it when he acquired it circa-1940. The mahogany-brown surfaces display distributed unimportant marks, in addition to a small rim knock at 7 o'clock on the reverse. PCGS# 11944

1863 Indian Cent in Bronze Judd-299, Thin Planchet, PR64 Red and Brown

- 5972 1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Brown PCGS.** Struck from regular issue, plain edge dies, but in bronze instead of copper-nickel. No L on the ribbon. The Indian cent alloy switched from bronze to copper-nickel during 1864. The dies exhibit medallic alignment, as usual for Judd-299, and this is a thin planchet variant. This pattern was the Mint's first experiment with bronze. Only 200 or so pieces are believed known, and examples are rarely seen with any red color remaining. Strike details on this piece are complete throughout, and the fields are deeply reflective with rich brown and blue patina.
From The David Cassel Collection. PCGS# 60454

**1863 Reeded Edge Copper-Nickel Cent, PR64
Judd-300, Pollock-360, High Date Variety**

- 5973** 1863 One Cent, Judd-300, Pollock-360, R.7, PR64 NGC. Struck from regular issue Indian cent dies in the usual copper-nickel alloy, but the edge is reeded instead of plain. High Date variant. All Judd-300 strikes are rare, whether in circulation or proof format. This is a most unusual pattern. It is the only proof cent coin struck with a reeded edge. This is a remarkable proof that displays deeply reflective fields on each side. The color, rather than the usual whitish lack of color, is deep yellow-gold in the fields with deep red accents around the devices. Fully struck.
From The David Cassel Collection. PCGS# 60455

**1863 Indian Cent in Copper-Nickel
Judd-300, Pollock-362, MS64
Low Date Variant**

- 5974** 1863 One Cent, Judd-300, Pollock-362, R.7, MS64 PCGS. 71.9 grains. Ex: Starr. The regular dies trial issue for the 1863 Indian cent. Struck in copper-nickel but with a reeded edge. This is a low date variant, and is rare as such with only a half dozen known according to USPatterns.com. Business strikes can be distinguished by the crooked fleck on the cheek below the eye. Pollock, in his standard reference on patterns, broke the single Judd variety into three variants, two in proof format and Pollock-362 as a business strike. A reeded edge Uncirculated piece was first offered in public auction in an 1865 Cogan sale. For a copper-nickel coin, the surfaces display a remarkable amount of red patina. The surfaces glow with mint luster, and there are no mentionable contact marks present.
Ex: Floyd Starr (Stack's, 10/1992), lot 1046.
From The David Cassel Collection. PCGS# 70455

**1863 Copper-Nickel Indian Cent, MS64
Low-Date Judd-300, Pollock-362 Variety**

- 5975** 1863 One Cent, Judd-300, Pollock-362, R.7, MS64 PCGS. Regular dies trial issue for the Indian cent. Struck in copper-nickel with a reeded edge. This is a Low Date example with the diagnostic hook-shaped mark on the cheek just below the eye. What is significant about this pattern is their experimental nature, they were struck in both business strike and proof format, with a reeded edge. These pieces were believed at one time to have had the reeds filed into each coin, but was recently disproved. Compared to the other MS64 above, this piece displays more traditional "white" surfaces of a copper-nickel coin with just faint tinges of red present. A bit softly defined on the tips of the feathers in the headdress, and showing no objectionable contact marks.
From The David Cassel Collection. PCGS# 70455

**1863 Judd-305 Two Cents, PR63 Brown
Popular Washington Design**

- 5976** 1863 Two Cents, Judd-305, Pollock-370, R.4, PR63 Brown PCGS. The obverse displays a portrait of Washington facing right, GOD AND OUR COUNTRY around, date and two stars below. The reverse expresses the denomination 2 CENTS within a wheat wreath, UNITED STATES OF AMERICA around. CENTS is curved dramatically. Struck in copper with a plain edge. Lovely olive-brown surfaces exhibit traces of pale blue toning with golden-tan splashes on the obverse. Population: 6 in 63 Brown, 18 finer (7/15). PCGS# 60460

**1863 Half Dime, PR65 Red and Brown
Copper Strike From Regular Dies, Judd-323**

- 5977** 1863 Seated Half Dime, Judd-323, Pollock-388, High R.7, PR65 Red and Brown PCGS. CAC. Struck in copper with a reeded edge. Only about a dozen examples of this type are known. The design elements are the same as those seen on the regular issue coins. According to the USPatterns.com website: "Although described in the literature as 'regular dies trial pieces', these are actually restrikes deliberately made in the early 1870s and sold as part of complete off-metal sets with the silver coinage of this year ... These half dime dies were made from a hub which had the "D" in "United" broken and are believed to be backdated novodels." A well struck, nicely mirrored, and unabraded Gem. The reverse field and obverse margin are fire-red, although sea-green toning embraces the obverse field. PCGS# 70480

**1867 Five Cent Pattern in Nickel
Judd-570, Pollock-638, PR64+ Cameo**

- 5978** 1867 Five Cents, Judd-570, Pollock-638, R.5, PR64+ Cameo NGC. Liberty wears a coronet and faces left on the obverse, showing UNITED STATES OF AMERICA around the periphery and the date below. The top of the 7 is distant from the curl, distinguishing the Pollock-638 variety from the Pollock-640, which shows the 7 close to the curl. The reverse shows 5 CENTS centered within a laurel wreath and IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. For a nickel product, this is a remarkably well-struck and deeply mirrored example. The surfaces are untoned and a few tiny planchet divots are seen scattered over each side. PCGS# 860780 Base PCGS# 60780

**1868 Cent Pattern in Nickel
Judd-608, Centered Date Variant, PR62**

- 5979** 1868 Cent, Judd-608, Pollock-673, R.4, PR62 PCGS. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. The die variant with the 1 in the date centered over a dentil. Struck in nickel with a plain edge. This particular variety does not appear to match either of the photos on the USPatterns.com website. The Centered Date variant there shows a longer flag on the top of the 1 in the date than seen here. The fields are moderately reflective, and there is an oval-shaped area of planchet granularity in the upper-left portion of the obverse. Bright surfaces with just the slightest tinge of patina present. The central device of Liberty shows some softness of detail on the hair curls. PCGS# 60820

**1868 Five Cent Pattern in Nickel
Judd-623, PR64**

- 5980** 1868 Five Cents, Judd-623, Pollock-692, Low R.6, PR64 PCGS. The obverse depicts Liberty wearing a coronet inscribed LIBERTY. Around, the legend UNITED STATES OF AMERICA and below, the date, with a wide border. On the reverse, the denomination 5 CENTS is enclosed within a laurel wreath, with the motto IN GOD WE TRUST above, and a wide border. Struck in nickel with a plain edge. USPatterns.com estimates probably 40-50 pieces are known of this nickel pattern. As often seen with nickel products, the surfaces have slight granularity and are just a tad softly struck in the centers. Each side is surprisingly well-mirrored in the fields, though, and just the faintest rose patina is seen throughout. From The David Cassel Collection. PCGS# 60840

1868 Nickel Composition Five Cent Piece
Judd-624, PR65

- 5981** 1868 Five Cents, Judd-624, Pollock-693, Low R.6, PR65 PCGS. Struck on a broad, slightly oversized five cent planchet. The obverse is a larger variant of the three cent nickel design, while the reverse has 5 CENTS in the center surrounded by a laurel wreath. Struck in nickel with a plain edge. Approximately 2-3 dozen pieces are believed extant of this popular nickel pattern. As with the Judd-623 above, this piece also shows slight granularity and central striking softness, common to the hard nickel alloy used to strike these pieces. Fine die striations are seen in the fields on each side with resultant bright mirroring. Pale toning.

From The David Cassel Collection. PCGS# 60841

1868 Five Cent Planchet in Copper
Oversized Planchet, Reeded Edge
Judd-628, PR64 Red and Brown

- 5982** 1868 Five Cents, Judd-628, Pollock-697, High R.7, PR64 Red and Brown PCGS. The obverse shows the head of Liberty similar to the three cent nickel, only larger. The legend UNITED STATES OF AMERICA is around the border and the date 1868 is below. The reverse has 5 CENTS in the center encircled by a laurel wreath, and IN GOD WE TRUST at the top in very small letters. Struck on a broad copper planchet with a reeded edge. This is a rare and infrequently offered copper striking. The last offering we show in our Auction Archives (and the last offering listed in the Judd book also) is from our 2004 ANA Sale. We show only five auction appearances since 1990 by all the major auction companies. The Red and Brown designation is accurate, but there is significant mint red remaining on each side as well as yellowish-tinged green-brown. The fields are brightly mirrored with fine die striations on each side. An exceptionally well-preserved example of this overlooked rarity.

Ex: Lenox Lohr FPL (Empire Coin Co., 1961); Robert Branigan / ANA Auction (Bowers and Merena, 8/1978), lot 1775.

From The David Cassel Collection. PCGS# 70845

**1868 Five Cent Pattern, PR65
Underrated Judd-630**

- 5983** 1868 Five Cents, Judd-630, Pollock-700, R.7, PR65 NGC. Ex: Eric P. Newman Collection. The obverse displays a Liberty head facing left, similar to the design on the regular-issue three cent piece, with UNITED STATES OF AMERICA around and the date 1868 below. The design is similar to other patterns of the same date, but this variant has no star on Liberty's coronet. The reverse exhibits a large V on an ornate shield, with IN GOD WE TRUST above. Struck in nickel with a plain edge.

Well-detailed design elements of this charming Gem show just a touch of softness on Liberty's curls. The brightly reflective surfaces display a few hints of champagne-gold toning, with a couple of minor contact marks in the obverse field. Visual appeal is quite strong. Census: 1 in 65, 0 finer (6/15). PCGS# 60847

**1868 Ten Cent, Gem Proof
Judd-647, Nickel, Plain Edge**

- 5984** 1868 Ten Cents, Judd-647, Pollock-720, Low R.6, PR65 NGC. CAC. The obverse features the almost identical design used on large cents from 1843 to 1857. The reverse is similar to the large cent design except the wreath is smaller and open, and TEN CENTS appears in its center. Struck in nickel with a plain edge. The obverse die was also used to strike large cent patterns in 1868, an unlikely return of the long-dormant denomination. The present tan-brown example displays minor carbon across unabraded, satiny surfaces. Census: 5 in 65, 5 finer (6/15). PCGS# 60865

**1868 Dual-Denomination Pattern in Copper
Judd-656, PR65 Red and Brown**

- 5985** 1868 Dual Denomination \$5-25 Francs, Judd-656, Pollock-729, Low R.7, PR65 Red and Brown NGC. Anthony Paquet's design for an international five dollar coin equal to the value of a proposed 25 franc piece. The obverse depicts Liberty, facing left, hair bound with a ribbon and star at the front. The reverse is simply inscribed 5 / DOLLARS / 25 / FRANCS in the center with a laurel and oak wreath surrounding. Struck in copper with a reeded edge. Only a dozen or so copper pieces are known, several of which have been gilt. This pattern was the United States' first attempt at an international coinage. These pieces were also struck as plain edge copper pieces, and there are aluminum pieces also known, both with plain and reeded edges.

These patterns were to be struck as a five-dollar coin weighing 124 9/20 grains, rather than the standard 129 grains. The lower weight would equal the weight of a 5-franc gold coin. This international coinage was apparently taken seriously, at least for a while. France and Great Britain also struck similar patterns. The French produced patterns with the same monetary expression, as seen here, plus there is another design with a reverse that reads: 10 / FLORINS / 25 / FRANCS. The English struck a similar pattern with the reverse denomination reading: DOUBLE / FLORIN / FIVE FRANCS / 1868 (plain and reeded edges). **These four types mentioned above are also included in the Cassel Collection as part of our World Coins catalog in association with the ANA Auction.**

The red part of the Red and Brown designation is muted and more cherry-red, while the remainder of the surfaces orange-yellow and sea-green. The fields are brightly mirrored and serve to enhance the multicolor patina. Fully struck.

From The David Cassel Collection. PCGS# 70874

These English and French counterparts to these dual-denomination patterns are included in the World Coins catalog of the ANA Auction.

**1868 Dual-Denomination Aluminum Pattern
Judd-658, Reeded Edge, Contrasted PR64**

5986 1868 Dual Denomination \$5-25 Francs, Judd-658, Pollock-731, Low R.7, PR64 PCGS. The obverse has a bust of Liberty facing left, with UNITED STATES OF AMERICA and the date along the periphery. Liberty has a headband with a star, hair tied with a ribbon. The reverse displays an olive and oak wreath, with 5 / DOLLARS / 25 / FRANCS inside the wreath. Struck in aluminum with a reeded edge. About a dozen pieces are known. The proposed international coinage patterns from 1868 were an outgrowth of the 1867 Latin Monetary Union. According to Wikipedia: "The LMU served the function of facilitating trade between different countries by setting the standards by which gold and silver currency could be minted and exchanged." **These patterns were also struck in France and England. David Cassel has examples of all four types (two French, two English) in the World Coins section of this ANA Catalog.** This is a lovely, unoxidized example of this rare dual-denomination pattern. The fields are nicely mirrored with strongly contrasting, frosted devices. Close examination shows faint glimmers of pale lilac and rose patina. A splendid example of this first attempt at an international coinage.

From The David Cassel Collection. PCGS# 60876

**1868 5 DOLLARS / 25 FRANCS Pattern
Judd-659, Aluminum, Plain Edge, PR64**

5987 1868 Dual Denomination \$5-25 Francs, Judd-659, Pollock-732, Low R.7, PR64 PCGS. Anthony Paquet's design for an international five dollar coin equal to the value of a proposed 25 franc piece. The obverse depicts Liberty, facing left, hair bound by a ribbon and star at the front. The reverse is simply inscribed 5 / DOLLARS / 25 / FRANCS in the center with a laurel and oak wreath surrounding. Struck in aluminum with a plain edge. After the international monetary convention in Paris in June 1867, a coinage bill was introduced to produce a 5 dollar / 25 francs gold coin. The experimental international coin, of course, went nowhere but patterns were produced in copper and aluminum. All are very rare. **Even rarer are the French and English pattern counterparts. All four types, two English and two French patterns, are offered in the World Coins section of this ANA Auction.**

This is a bright aluminum striking, one that shows the usual strong field / device contrast on each side. The only surface problem is a minor streak of oxidation near the obverse rim at 3 o'clock — a common problem on many aluminum patterns — here of only slight consequence. Of the greatest rarity and desirability.

From The David Cassel Collection. PCGS# 60877

**1868 Ten Dollar Pattern in Copper
Judd-662, Pollock-735, PR65 Brown**

- 5988** 1868 Ten Dollar, Judd-662, Pollock-735, Low R.7, PR65 Brown NGC. The obverse design, attributed to James B. Longacre, is quite similar to the design on the circulating three cent nickel, although in the large format here it looks radically different. The reverse shows a small eagle in the center with raised wings, the scroll reads IN GOD WE TRUST, UNITED STATES OF AMERICA around, and TEN D. at the rim below. Struck in copper with a reeded edge. This is the Low Date variant with the 1 in the date close to the border and distant from the bust. Possibly as many as a dozen examples of this variety exist, and several are gilt. The other variety, Pollock-737, has the 1 closer to the bust. Only two examples of the High Date variety are thought to exist. Examples of this design were struck in gold, copper, and aluminum. Only four pieces are known in gold. This is a lovely Brown example that, while technically Brown, appears to even the most casual observer to be blue. The fields are brightly mirrored and greatly enhance the radiant appearance of this Gem. Problem-free surfaces.
From The David Cassel Collection. PCGS# 60880

**1869 Standard Silver Ten Cent, PR64
Judd-708, Silver, Plain Edge**

- 5989** 1869 Standard Silver Ten Cents, Judd-708, Pollock-787, R.5, PR64 PCGS. CAC. Liberty faces right, wearing a headband adorned with a single large star above the forehead. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. Reverse: STANDARD SILVER around upper edge with 10 / CENTS in an oak and laurel wreath. Struck in silver with a plain edge. Although this unblemished and conservatively assessed pattern is undesignated as Cameo, both the portrait and wreath are frosty, and the rose-gold fields are impressively mirrored. Certified in a green label holder. PCGS# 60933

**1869 Standard Silver Ten Cent, PR65
Judd-709, Silver, Plain Edge**

- 5990** 1869 Standard Silver Ten Cents, Judd-709, Pollock-788, High R.6, PR65 NGC. This Standard Silver design variety has only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, crowded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in silver with a plain edge. A flashy Gem that shows powder-blue toning on the portrait. The fields are caramel-gold aside from a few tan freckles near 7:30 on the reverse. Census: 4 in 65, 0 finer (6/15).
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2263. PCGS# 60934

1869 Standard Silver Half in Silver
Judd-742A, PR60
No Initial 'B' at Back of Cap

- 5991** 1869 Standard Silver Half Dollar, Judd-742A, Pollock-830, R.8. PR60 PCGS. A bust of Liberty faces right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with two large stars. William Barber's initial "B" is not seen within the folds of the ribbon at the back of the cap. The reverse has 50 CENTS centered within a wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. This rare variety was apparently first discovered in the Morris Evans Collection in 1998. So far it is only known in silver and with a reeded edge. Deep freckled gray-blue toning covers most of each side. The fields are only moderately reflective, but there are no obvious contact marks present.
From The College Collection, Part Two. PCGS# 60970

1870 Standard Silver Ten Cent, PR66
Judd-856, Silver, Plain Edge

- 5992** 1870 Standard Silver Ten Cents, Judd-856, Pollock-936, High R.6, PR66 NGC. CAC. The central obverse device features Liberty facing right, wearing a cap ornamented with three stars. The motto is below and UNITED STATES OF AMERICA is above. A wreath of oak and laurel surrounds 10 CENTS in the center, with STANDARD SILVER above and 1870 below. Struck in silver with a plain edge. This fully struck and flashy high grade specimen offers medium autumn-brown, lilac, and navy-blue toning. Devoid of any post-strike detractors. Although the Judd 12th edition lists both the plain and reeded edge (Judd-855) silver varieties as High R.6, we have seen several more of the latter than the former, and in fact our auction archives show only a single Heritage appearance of Judd-856 over the past 15 years. PCGS# 61100

1870 Quarter Dollar Pattern in Aluminum
Judd-886, PR66 Cameo

- 5993** 1870 Quarter Dollar, Judd-886, Pollock-985, High R.7, PR66 Cameo PCGS. CAC. Ex: Denali Collection. The obverse is designed by William Barber and features Liberty seated and facing left, surrounded by 13 stars. She supports a shield with her right hand and has an olive branch in her left hand. A Liberty pole is behind the shield, and the date is in the exergue. The reverse is the regular issue With Motto Seated Liberty quarter design. Struck in aluminum with a reeded edge. Just a hint of obverse haze keeps that side from a black-and-white appearance. The reverse is less toned but a trifle less reflective in the fields, a subtle tradeoff. Starkly contrasted on each side. Pleasingly preserved and an all-around appealing piece. PCGS# 800012

1870 Standard Silver Quarter in Silver
Judd-918, PR64

- 5994** 1870 Standard Silver Quarter Dollar, Judd-918, Pollock-1022, Low R.7, PR64 NGC. The obverse exhibits a bust of Liberty facing right with the legend UNITED STATES OF AMERICA around the upper border. Liberty wears a ribbon inscribed LIBERTY, and the motto IN GOD WE TRUST is on a scroll near the lower border. The reverse displays the denomination 25 CENTS within a wreath of laurel and oak. STANDARD SILVER is at the top, the date 1870 is below. Struck in silver with a reeded edge. Rich blue and golden-rose toning is seen over each side with strong, flashy mirrors in the fields.
From The David Cassel Collection. PCGS# 61162

1870 Judd-955 Aluminum Pattern, PR66 Cameo
Standard Silver Design

- 5995** 1870 Standard Silver Half Dollar, Judd-955, Pollock-1099, High R.7, PR66 Cameo PCGS. CAC. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in aluminum with a reeded edge. Less than half a dozen of these aluminum patterns survive, and none can equal this amazing Cameo proof. Aside from tiny planchet flakes as made, the brilliant light gray surfaces are pristine with excellent contrast. Population: 1 in 66 Cameo, 0 finer (7/15). PCGS# 505671 Base PCGS# 61201

1870 Indian Princess Dollar in Copper
Judd-1017, PR63 Brown

- 5996** 1870 Dollar, Judd-1017, Pollock-1151, Low R.7, PR63 Brown PCGS. The obverse is the Longacre Indian Princess design with a figure of Liberty seated and facing left, 13 stars around the upper peripheries, and the date 1870 below. Liberty is wearing an Indian headdress, and supports a liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Behind are two flags, one of which is ornamented with twenty-two stars. The figure of Liberty is taken from the Indian Princess design of James Longacre, and his last name is printed in small letters just beneath the base of the globe. The reverse design is the same used to coin regular issue Liberty Seated silver dollars. Struck in copper with a plain edge. Beautiful watery iridescence covers each side, mostly blue-green and pinkish-rose in hue. The fields are brightly reflective and serve to greatly enhance the coloration. A spot below star 5 is the only grade-limiting flaw we can see. From The David Cassel Collection. PCGS# 61265

1870 Gold Dollar in Copper
Judd-1023, PR65 Brown
Only 4 or 5 Pieces Believed Known

5997 1870 Gold Dollar, Judd-1023, Pollock-1158, High R.7, PR65 Brown NGC. Regular dies trial issue struck from the regular 1870 gold dollar dies. Struck in copper with a reeded edge. While termed a dies trial issue, it is more likely these pieces were struck for sale to collectors as part of off-metal sets. Only four or five pieces are believed known. While this example is called Brown, it still retains much underlying red which is most apparent when the mirrored fields are flashed beneath a light. A few minor lint marks are scattered over each side, struck into the coin after the dies were wiped and static electricity caused lint to adhere to the dies. PCGS# 61271

1871 Copper Indian Princess Dollar
Judd-1148, PR64 Brown

5998 1871 Dollar, Judd-1148, Pollock-1290, Low R.7, PR64 Brown PCGS. The Longacre obverse, with a seated Liberty facing left, wearing an Indian headdress and supporting a liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Behind is a flag ornamented with 22 stars. Thirteen stars surround the date 1871 is at the bottom. The design is executed in high relief with the appearance of a medal. The reverse was struck from the die used for regular issue Seated Liberty dollars. Struck in copper with a plain edge. Implemented by William Barber after James Longacre's death, this Indian Princess design is a favorite among pattern collectors and available in a number of metals, edges, and reverse types. The surfaces are deep moss-green, blue, and brown, but the mirrored fields flash strongly when angled just so beneath a light. Remarkably problem-free for a copper coin and seemingly finer than the stated grade.

From The David Cassel Collection. PCGS# 61410

1873 Pattern Trade Dollar, PR63
Judd-1276, Bright Mirrors

5999 1873 Trade Dollar, Judd-1276, Pollock-1418, R.4, PR63 NGC. A distinctive Trade dollar pattern with a small head of Liberty (reminiscent of William Barber's "Sailor" Head design) facing left, set amid a large, open field with 13 stars at the margin. The reverse has the required legends mostly set in the middle of that side, surrounded by an olive wreath, and UNITED STATES OF AMERICA at the upper periphery. Struck in silver with a reeded edge. This issue was sold as part of six-piece pattern sets for \$30. Another silver variant, Judd-1277, has a plain edge. This Select example is boldly struck and well-mirrored. Hints of gold and russet toning accent otherwise brilliant surfaces. Census: 6 in 63, 8 finer (6/15). PCGS# 61561

**1873 Bailly / Barber Trade Dollar
Judd-1316, PR62+ Cameo
Rare Plain Edge Striking in Silver**

- 6000** 1873 Trade Dollar, Judd-1316, Pollock-1459, High R.7, PR62+ Cameo PCGS. The obverse shows Liberty seated on a globe, with 13 stars around and the date below. The reverse has a defiant eagle perched on a rock, with a scroll and motto below; TRADE DOLLAR and UNITED STATES OF AMERICA are around the periphery, along with two stars. E PLURIBUS UNUM is set into the field above the eagle's head; 420 GRAINS and 900 FINE. are below the scroll and above TRADE DOLLAR. Modified from a design of Joseph Alexis Bailly by William Barber, and struck in silver with a plain edge. Curiously, the reeded edge strikings of this design are only R.4, but the plain edge pieces (like this one) are High R.7. This is an almost-brilliant dollar with just the thinnest trimming of golden-russet around the margins. The fields display profound depth of mirrored reflectivity with stark white cameo devices set against the "black" fields. Only minor hairlines account for the grade, which appears much finer than its numeric designation. From *The David Cassel Collection*. PCGS# 543600 Base PCGS# 61602

**1879 Metric Dollar by William Barber
Judd-1617, Toned PR64**

- 6001** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR64 PCGS. William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. Streaks of golden-gray patina cover each side and serve to mute the mirrored flash in the fields. Well struck and only showing a couple of shallow field marks to the left of the mouth of Liberty. PCGS# 61995

**1879 Goloid Metric Dollar in Copper
Judd-1628, PR65 Red
Complete, Unmellowed Red Surfaces**

- 6002** 1879 Goloid Metric Dollar, Judd-1628, Pollock-1824, R.7, PR65 Red PCGS. William Barber's design for the Goloid Metric dollar with a large head of Liberty facing left and LIBERTY on a wide ribbon around her head. The reverse is laid out with the proposed composition of the coin in the center, surrounded by a circle of 38 stars. Struck in copper with a reeded edge. While this is a William Barber design, it is possible this was executed by his son, Charles. This Goloid Metric design was struck in goloid, silver, copper, aluminum, and white metal. What is most extraordinary about this piece is not only its rarity, but the retention of its full red color. Very few copper patterns are known today with the original mint luster intact. Brighter red is noticed in the centers with a slightly deeper hue around the margins. Nevertheless, there is no mellowing on either side. The fields are bright and highly reflective, and there are no obvious or mentionable flaws present. From *The David Cassel Collection*. PCGS# 82006

**1880 Metric Dollar in Copper
Judd-1646, PR65 Red and Brown**

- 6003** 1880 Metric Dollar, Judd-1646, Pollock-1846, R.7, PR65 Red and Brown PCGS. William Barber's Metric dollar depicts Liberty wearing a coronet with a border of pearls. The elaborate reverse displays a partial wreath of cotton and corn tied at the base, a ribbon, and the motto DEO EST GLORIA within a cartouche above. Struck in copper with a reeded edge. This majestic design was taken from the 1877 half union. Examples were struck in silver or goloid, copper, and aluminum. More than a dozen examples are known in copper. For a Red and Brown coin, this piece retains a significant amount of deep red. The fields are only tempered by slight blue, not the usual brown one would expect. Outstanding preservation. From *The David Cassel Collection*. PCGS# 72031

**1884 Five Cent, PR67 Cameo
Octagonal Perforation, Nickel**

- 6004** 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR67 Cameo PCGS. CAC. The Eastman Johnson "holey five cent" design. The obverse shows FIVE above and CENTS below a roughly octagonal opening in the planchet, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge. Faint wheat-gold toning graces fully struck and pristine surfaces. A few minuscule lint marks provide the sole imperfections. PCGS# 397007 Base PCGS# 62154

**Martha Washington 'Dime' Reverse Die
Excellent Condition**

- 6005** ("1759") Martha Washington "Dime" Reverse Die. 188.4 gm. 54 mm in height with a 32 mm base and a 21 mm face. A reverse die for the 1759-dated Martha Washington "dime," used to strike Judd-2101 cupronickel-copper patterns circa 1965 during the dime alloy transition from silver to clad. The die depicts Mount Vernon, the George Washington family home. According to USpatterns.com, the Martha Washington dies were used at the Mint and "also given out to certain vendors including IDX Inc., PMX Industries, and the Olin Brass Corporation by the Mint to test planchets." The face of the die is undamaged, and displays light golden-brown and steel-blue toning.

GOLD DOLLARS

**1849 Closed Wreath Dollar, MS65
Infrequently Seen in Gem**

- 6006** 1849 Closed Wreath MS65 PCGS. The yellow-gold surfaces of this Gem display strong luster and sharply struck design elements. Close examination reveals no marks of significance. The 1849 gold dollar is very popular as the first year of the denomination struck in gold. It is only infrequently seen in MS65 and finer grades. Population: 17 in 65, 4 finer (7/15). PCGS# 7503

**1854 Gold Dollar, MS66
Fully Struck Type One Example**

6007 1854 Type One MS66 PCGS. Fully struck with frosty luster over pristine lemon-gold surfaces, this Premium Gem gold dollar is perfect for type representation. The 1854 Type One dollar (855,502 coins struck) is as rare as the 1854 Type Two dollar (783,943 coins produced later in the year) in MS66, yet the Liberty Head issue sells for a fraction of its Indian Princess Head counterpart. Housed in a green label holder. Population: 14 in 66 (2 in 66+), 3 finer (6/15). NGC ID# 25BY, PCGS# 7525

6008 1854 Type Two MS61 PCGS. Flashy luster issues from colorful rose and green-gold surfaces. This Indian Princess Head gold dollar is crisply rendered with minor incompleteness on the hair and right corn husk. A small dig in the left obverse field is the only flaw of note. A fantastic, minimally clashed Type Two representative. NGC ID# 25C3, PCGS# 7531

6009 1854 Type Two MS61 NGC. Prominent clash marks show on the reverse of this attractive Mint State example, with well-detailed design elements and lustrous orange-gold surfaces that show a few hair-thin surface scratches. Always popular as a representative of the short-lived Type Two design. NGC ID# 25C3, PCGS# 7531

6010 1855 MS62 PCGS. A coveted Type Two gold dollar from a mintage of 758,269 coins, this Uncirculated 1855 example has marvelous wheat-gold color with olive elements. The surfaces exude glistening frost and offer little to critique aside from small scattered ticks. Lightly clashed and sharply defined, especially on the bow knot and leaves. NGC ID# 25C4, PCGS# 7532

6011 1855-O AU50 PCGS. Variety 2. This is the late, lapped die state of Variety 2. A light yellow-gold example of the low-mintage Type Two gold dollar, the only issue of the type coined in New Orleans. Just 55,000 examples were produced. Traces of mint luster are visible in the protected areas of the design, with a few scattered marks of little consequence. NGC ID# 25C7, PCGS# 7535

**1857-C Gold Dollar, AU55
Above-Average Preservation**

6012 1857-C AU55 NGC. Variety 1, the sole die pair employed for striking the meager total of 13,280 gold dollars of this vintage. This greenish-gold example shows the typical strike weakness around portions of the rims on each side and the bowknot. A small die lump shows in the field underneath ST, but mentionable abrasions are minimal. The preservation on this piece is considerably above average. Census: 52 in 55 (1 in 55+★), 46 finer (7/15). NGC ID# 25CE, PCGS# 7545

**1858-S Gold Dollar, MS61
Low-Mintage Condition Rarity**

6013 1858-S MS61 NGC. The 1858-S has a mintage of only 10,000 pieces and is an important condition rarity in AU and Mint State. This piece possesses full, shimmering mint luster and exhibits a hint of reflectivity on the obverse with rich reddish-gold patina throughout. There are no obvious blemishes on either side, just some minor scuffiness that is confined mostly to the obverse. Census: 8 in 61, 3 finer (7/15).
Ex: Long Beach Signature (Heritage, 9/2006), lot 3072. NGC ID# 25CK, PCGS# 7550

**1858-S Gold Dollar, MS61
Superior Eye Appeal**

6014 1858-S MS61 PCGS. A crisply struck and minimally marked orange-gold example. Luster illuminates design elements. Despite a low mintage of 10,000 pieces, there was little contemporary interest in the 1858-S gold dollar, and few were set aside. Most of the approximately 200 survivors are in XF to AU grades. Certified in a green label holder. Population: 6 in 61, 5 finer (6/15). NGC ID# 25CK, PCGS# 7550

6015 1859 MS64 PCGS. A lovely Choice Mint State 1859 gold dollar, the likes of which are rarely seen. This example has splendid yellow-gold luster with frosty mint surfaces. Trivial marks prevent a higher grade. Population: 28 in 64 (2 in 64+), 30 finer (7/15). NGC ID# 25CL, PCGS# 7551

6016 1859 MS65 PCGS. The 1859 gold dollar is elusive in all grades, and Gem examples are hard to locate. The collector who seeks a high grade example will do well to consider this piece. The frosty mint surfaces are fully brilliant with hints of orange and blue over the yellow-gold luster. Population: 18 in 65, 12 finer (7/15). NGC ID# 25CL, PCGS# 7551

1859-C Gold Dollar, AU50
Final Charlotte Issue

6017 1859-C AU50 PCGS. Variety 1. A radiant honey-gold example. Surprisingly free from abrasions, and Liberty's cheek shows only a hint of wear. As usual for the '59-C, the strike is indistinct on the hair and dentils, and minor mint-made strike-throughs affect portions of the date. The sole post-1857 Charlotte issue of the denomination. Only 5,235 pieces were struck. NGC ID# 25CM, PCGS# 7552

6018 1860-S AU58 PCGS. Just a touch of rub visits the high points of this later S-mint gold dollar. Both sides are largely copper-gold though lighter elements appear in parts of the fields. Population: 17 in 58 (1 in 58+), 31 finer (7/15). NGC ID# 25CT, PCGS# 7557

1861 Gold Dollar, MS65
Early Type Three Representative

6019 1861 MS65 PCGS. The 1861 is one of the more plentiful gold dollar issues of the period, suitable for type purposes. This Gem example offers sharp design elements and frosty apricot-gold luster. The reverse is heavily clashed, with an impression of LIBERTY visible below the date. No major abrasions are observed. Population: 40 in 65, 11 finer (6/15). NGC ID# 25CU, PCGS# 7558

1862 Gold Dollar, MS66+
Radiant Eye Appeal

6020 1862 MS66+ PCGS. In high grades, the 1862 is the most available gold dollar issue of the 1860s, popular among type collectors. This Plus-graded Premium Gem showcases radiant yellow-gold luster with sharp motifs and largely unabraded surfaces. Struck from fresh dies, with some semiprooflike surface remaining in portions of the fields. Population: 33 in 66 (3 in 66+), 7 finer (6/15). NGC ID# 25CW, PCGS# 7560

1862 Gold Dollar, MS67
Prooflike Obverse, Tied for Finest at PCGS

6021 1862 MS67 PCGS. CAC. The 1862 is a contender for the title of "Most Available Type Three Gold Dollar," boasting a sizeable mintage of 1.3 million coins. The obverse of this Superb Gem is decidedly prooflike with frosty, sharply defined motifs that stand out against moderately reflective fields. Glistening luster and peach-gold color characterize the reverse. The resulting visual appeal is unsurpassed. Minimally clashed and void of readily detectable marks. Population: 7 in 67, 0 finer (7/15).
From The College Collection, Part Two. NGC ID# 25CW, PCGS# 7560

6022 1874 MS66 PCGS. CAC. This boldly defined Premium Gem is an important condition rarity in the series. A fully lustrous example, this gold dollar has brilliant yellow-gold surfaces. PCGS has only certified 35 finer examples (7/15). NGC ID# 25DC, PCGS# 7575

1878 Gold Dollar, Semiprooflike MS65

6023 1878 MS65 PCGS. With a mintage of only 3,000 pieces, the 1878 gold dollar is elusive in all Mint State grades, but becomes genuinely rare at the Gem level. This MS65 coin displays a sharp strike, with wheat-gold luster and semiprooflike fields. A couple faint vertical roller marks on Liberty's cheek (as struck) should not be confused for abrasions. Population: 16 in 65, 7 finer (7/15). NGC ID# 25DG, PCGS# 7579

**1880 Dollar, Sharply Struck MS67
A Low-Mintage, High-Population Date**

6024 1880 MS67 PCGS. Despite the small mintage of 1,600 circulation strikes, the 1880 gold dollar has a relatively high survival rate. PCGS and NGC combined report 657 submissions, the vast majority in Mint State grades (7/15). Most of the production was saved by collectors, dealers, and speculators.

The yellow-gold surfaces of this Superb Gem display hints of olive-green, orange, and rose and are highly lustrous. The design elements are sharply struck, including the feathers and plumes of the headdress, the letters in LIBERTY, and the wreath. Both sides are impeccably preserved. PCGS reports 28 examples finer. NGC ID# 25DJ, PCGS# 7581

6025 1881 MS66 PCGS. Especially vibrant mint luster and sharply detailed design elements are the outstanding visual attributes of this delightful Premium Gem. The well-preserved surfaces add to the outstanding eye appeal. NGC ID# 25DK, PCGS# 7582

6026 1882 MS66 PCGS. Reddish-gold surfaces feature moderate reflectivity in the fields and crisp design definition. Such characteristics are common among 1882 gold dollar representatives given the low mintage of just 5,000 pieces. Population: 29 in 66, 43 finer (7/15). NGC ID# 25DL, PCGS# 7583

**1883 Gold Dollar, MS67+
Modest Cameo Contrast**

6027 1883 MS67+ PCGS. CAC. The 1883 gold dollar was heavily saved at the time of issue and is usually available for type representation, even in high grade. Yet, above the MS67 level this issue becomes conditionally rare. This Plus-graded example is boldly struck, with frosty motifs that offer modest cameo contrast against the mirrored golden-orange fields. PCGS lists only a dozen finer representatives in MS68 (7/15). NGC ID# 25DM, PCGS# 7584

6028 1887 MS65 PCGS. Ex: Stecher Collection. A beautiful sun-gold Gem that boasts a sharp strike and exemplary preservation. Per its prior Heritage auction appearance, Karl Stecher, Sr. purchased the present coin from the Gutttag Bros. of New York for \$6.00 during the 1930s.
Ex: *ANA National Money Show (Heritage, 3/2007)*, lot 1662. NGC ID# 25DS, PCGS# 7588

6029 1889 MS65+ PCGS. CAC. Strong luster embraces the yellow-gold surfaces of this high-end Gem. The design elements are well-struck except for the usually seen weakness in some of the letters in LIBERTY. A few minor marks are within the parameters of the designated grade. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, Superb MS68
Tied for Finest Certified**

6030 1889 MS68 PCGS. The 1889 is one of the most plentiful dates in the gold dollar series, and is highly popular as a final-year type coin. However, only a paltry six examples are certified by PCGS as MS68 (7/15), the current coin among them. The strike is bold and the satiny orange-gold surfaces are seemingly free of even the slightest imperfection. The reverse is semiprooflike. Superb. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

6031 1835 AU58 PCGS. Breen-6141, Variety 6, R.2. A pleasing Borderline Uncirculated Classic type coin. The peach-gold surfaces are refreshingly unmarked, and the borders retain substantial flashes of luster. The hair above the ear is softly brought up, usual for the variety. NGC ID# 25FT, PCGS# 7693

6032 1838 AU55 NGC. Breen-6146, Variety 19, R.2. The Philadelphia Mint recorded the production of 47,030 quarter eagles in 1838, and they were all minted from a single pair of dies. This Choice AU example has rich coppery-orange toning on both sides that accents the light yellow luster. NGC ID# 25FY, PCGS# 7696

6033 1838 AU58 PCGS. Breen-6146, Variety 19, R.2. A single die pair is identified for the 1838 quarter eagle coinage. This sharply detailed near-Mint example retains virtually all of its satiny mint luster with brilliant yellow surfaces and splashes of pale orange toning. NGC ID# 25FY, PCGS# 7696

**1839-O Two and a Half, XF45
Only New Orleans Classic Issue**

6034 1839-O XF45 NGC. Breen-6152, Variety 27, R.3. The High Date, Wide Fraction variety. No gold coins were struck at New Orleans in its first year of operation, 1838. Thus, the 1839-O is the sole Classic issue coined at the facility. Only 17,781 pieces were issued. The present almond-gold example displays moderate wear. Abrasions are absent aside from a hair-thin diagonal line on the field near the profile. NGC ID# 25G7, PCGS# 7701

**1839-O Quarter Eagle, Luminous AU58
Original Green-Gold Color, Bold Detail**

- 6035 1839-O AU58 PCGS. CAC. Breen-6152, Variety 27, R.3.** High Date, Wide Fraction. The more available of two varieties. This offering represents the first gold issue struck at New Orleans, consisting of 17,871 coins. As an introductory issue, many pieces were saved, though few survivors are as appealing as this near-Mint example. Medium green-gold coloration is obviously original. Vibrant luster emanates from the design recesses, illuminating sharply struck devices with typical incompleteness between 5 and 7 o'clock at the lower reverse. Each side is void of distracting abrasions. *From The College Collection, Part Two.* NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

- 6036 1841-D — Removed From Jewelry — NGC Details. AU. Variety 2-C.** This low mintage Dahlonega two and a half has little if any wear from circulation, but the olive-green surfaces are hairlined and microgranular. The fields display scattered minor abrasions. NGC ID# 25GF, PCGS# 7722

**1842 Quarter Eagle, AU55
Rare Early Philadelphia Issue**

- 6037 1842 AU55 NGC.** The Philadelphia Mint coined a paltry 2,823 quarter eagles in 1842, and most were either lost over time or heavily circulated. Surviving examples in any grade are rare, and AU or finer specimens are exceedingly so. This Choice AU representative displays a touch of light wear over each side, with faint apricot overtones accenting primarily green-gold patina. No major abrasions are observed, giving this piece a pleasing level of eye appeal. Census: 4 in 55, 5 finer (6/15). NGC ID# 25GG, PCGS# 7723

**1842-O Quarter Eagle, MS61
Good Luster and Eye Appeal**

- 6038 1842-O MS61 NGC. Variety 1.** Only a single die marriage was required to produce the 19,800 New Orleans Mint quarter eagles dated 1842. Most of those coins circulated heavily, due no doubt in part to pent-up demand from the lack of any O-mint quarter eagles being struck for circulation in 1841. (And a reported 50 1841-O half eagles were made, but none are known to survive today in any collection.) This piece shows a few scattered abrasions for the grade, but perhaps fewer than expected, and the eye appeal remains quite high on the wheat-gold, lustrous surfaces. The 1842-O quarter eagle is nearly always found weakly struck through the centers, and this example is no exception. Census: 4 in 61, 7 finer (7/15). NGC ID# 25GK, PCGS# 7726

**1843-C Two and a Half, AU58
Large Date, Plain 4**

- 6039 1843-C Large Date, Plain 4, AU58 PCGS. CAC. Variety 1.** The borders teem with luster, and the fields display relatively few consequential abrasions. The centers show the incompleteness of strike customary for the issue. Although more available than its Small Date counterpart, the 1843-C Large Date is nonetheless rare in Mint State, and AU examples are very scarce. Population: 10 in 58, 12 finer (6/15). *Ex: Milwaukee Central States Signature (Heritage, 4/2010), lot 3450.* NGC ID# 25GN, PCGS# 7728

- 6040 1843-O Large Date, Plain 4 AU55 NGC. Variety 1.** The Large Date, Plain 4 1843-O quarter eagles are far scarcer than their Small Date, Crosslet 4 counterparts. This lightly circulated caramel-gold Large Date example is minimally abraded and shows moderate incompleteness of strike on Liberty's curls. NGC ID# 25GS, PCGS# 7732

**1846 Quarter Eagle, MS61
Low-Mintage Issue**

- 6041 1846 MS61 NGC.** Myriad surface marks prevent a higher grade to this greenish yellow-gold quarter eagle that was struck prior to the California gold rush. Both sides exhibit reflective fields and bold design motifs. The 1846 is a low-mintage condition rarity from a production of only 21,598 coins. Census: 17 in 61, 4 finer (7/15). NGC ID# 25GZ, PCGS# 7740

**1847-C Quarter Eagle, AU58
Collectible Charlotte Representative**

- 6042 1847-C AU58 NGC. Variety 1.** The 1847-C is the most collectible Charlotte quarter eagle with a mintage of 23,226 coins, but examples are "scarce in properly graded AU58 and rare in Uncirculated [condition]," according to Doug Winter. Reddish-gold surfaces display extraordinary detail for the facility with bold stars and crisp definition on the portrait and eagle. A trace of high-point blending occurs over the hair curls and feathers, but abrasions from circulation are minimal. Census: 45 in 58, 33 finer (7/15). NGC ID# 25H6, PCGS# 7745

1852-C Two and a Half, Honey-Gold AU58

- 6043 1852-C AU58 PCGS. Variety 1.** A honey-gold Borderline Uncirculated example of this rare Charlotte issue. Just 9,772 pieces were struck, and the typically encountered survivor is a cleaned XF. The present coin is significantly finer since wear is minimal and there are no detracting marks. The centers show moderate incompleteness usual for the remote branch facility. Population: 11 in 58 (1 in 58+), 6 finer (7/15). NGC ID# 25HS, PCGS# 7764

1852-O Quarter Eagle, Seldom-Seen MS61

- 6044 1852-O MS61 NGC. Variety 1,** scarcer than Variety 2, showing a bit of the fletchings inside the top-left corner of the mintmark. Even though it has a much larger mintage at 140,000 coins, the 1852-O quarter eagle in Mint State is of similar rarity to its smaller-mintage cousins, the 1852-C and 1852-D quarter eagles. Doug Winter's latest O-mint reference calls it "one of the rarest No Motto eagles" and a "very undervalued date that has still not received the merit it deserves, especially in higher grades." This piece shows good reflectivity on honey-gold surfaces that show light smoky accents. A few larger scrapes appear under a loupe both before and behind Liberty's head, and the strike is typically soft on the eagle's wing tips, lower legs, and claws. Census: 18 in 61, 11 finer (7/15). NGC ID# 25HU, PCGS# 7766

**1854-C Quarter Eagle, AU53+
Better Charlotte Date**

- 6045 1854-C AU53+ NGC. Variety 1.** The 1854-C quarter eagle is scarcer than the certified population reports would suggest. Likely only 105 to 145 examples are known in all grades, these more or less evenly distributed throughout the VF, XF, and AU grade ranges. In Mint State, this issue is genuinely rare. The present Plus-graded AU coin displays medium green-gold patina with minimal abrasions. Weakness on the central eagle and the hair curls around Liberty's face is due to strike, not wear. Census: 20 in 53+, 65 finer (6/15). NGC ID# 25HY, PCGS# 7770

**1856-C Quarter Eagle, AU55
Variety 1, the Only Dies**

- 6046 1856-C AU55 NGC. Variety 1.** The only known dies for the 1856-C quarter eagle saw a total production of just 7,913 coins. Hints of orange toning remain in the protected areas of the design, with scattered grade-consistent marks that are entirely insignificant. Traces of luster remain on both sides of this pleasing Charlotte quarter eagle. Census: 15 in 55, 31 finer (7/15). NGC ID# 25J8, PCGS# 7778

1856-C Two and a Half, AU58
Difficult Charlotte Issue

- 6047 1856-C AU58 NGC. Variety 1.** A mintage of 7,913 pieces confirms the rarity of this antebellum Charlotte issue. The caramel-gold surfaces are minimally abraded, although the mint-made strike-throughs (customary for the '56-C) provide a granular appearance. The major devices are lightly brought up, as always for the issue. Census: 19 in 58, 12 finer (6/15). NGC ID# 25J8, PCGS# 7778

1859 Quarter Eagle, MS63
Type Two Reverse

- 6048 1859 New Reverse, Type Two, MS63 PCGS.** A new reverse hub was introduced in 1859, exhibiting several minor differences in the placement of the lower design elements, most notably that of the arrows, which are smaller and well-separated on the Type Two Reverse. This variant is only slightly scarcer than its Type One Reverse counterpart, though both are elusive in all Mint State grades. This piece displays original honey-gold luster and sharp motifs. Surface abrasions are faint and evenly dispersed. Population: 11 in 63, 5 finer (6/15). NGC ID# 25JK, PCGS# 7788

- 6049 1861 New Reverse, Type Two, MS64 PCGS.** The New Reverse has long, slender arrows that are fully separated. This rich lemon-yellow example has frosty mint luster with delightful orange overtones. Minuscule field marks limit the grade of this near-Gem. NGC ID# 25JX, PCGS# 7794

1861 New Reverse Quarter Eagle
Boldly Struck Gem

- 6050 1861 New Reverse, Type Two, MS65 PCGS. CAC.** The 1861 New Reverse quarter eagles are popular as a Civil War memento and also because they are usually well-struck. In any case, they are conditionally elusive at the Gem level, despite the large mintage exceeding 1.2 million pieces. This example displays a strike that is virtually full, complementing bright yellow-gold color. Population: 31 in 65, 12 finer (6/15). NGC ID# 25JX, PCGS# 7794

1862 Quarter Eagle, MS63
Very Rare So Well-Preserved

- 6051 1862 MS63 PCGS.** The economic impact of the Civil War is clear by examining the decline in quarter eagle mintages beginning in 1862. Between 1861 and 1862, the production of quarter eagles at the Mint dropped by over 92%. One year later, no two and a half dollar gold coins were produced at all. The 1862 (98,508 coins struck) is very scarce in all grades and rare in Uncirculated condition. Select survivors are very rare. This piece has rich orange and reddish-gold color with luminous luster and a full strike. Light field marks are undistracting. Population: 8 in 63, 3 finer (7/15). NGC ID# 25JZ, PCGS# 7796

1866-S Quarter Eagle, MS61
Rare in Mint State

- 6052 1866-S MS61 PCGS. CAC.** The 1866-S Liberty quarter eagle had a mintage of only 38,960 pieces, most of which were lost to circulation. Today, the typical survivor grades only VF or XF; this issue is scarce in AU and any Mint State coin is a major rarity. This MS61 example shows original frosty luster with honey and coppery-gold hues in the fields. Some minor striking softness on the eagle's left (facing) leg is not unusual for the issue. Population: 3 in 61, 1 finer (7/15). NGC ID# 25K8, PCGS# 7804

- 6053 1868-S AU58 PCGS. CAC.** The 1868-S Liberty quarter eagle claims a mintage of 34,000 pieces and high-grade examples are very scarce. This attractive near-Mint specimen is lightly worn and lightly abraded, with orange-gold surfaces that retain traces of original mint luster. Population: 17 in 58, 13 finer (7/15). *From The College Collection, Part Two.* NGC ID# 25KC, PCGS# 7808

- 6054 1869-S AU58 NGC.** This San Francisco quarter eagle issue, like its contemporaries, circulated extensively and is rarely found in high grades. Reddish-gold, partly lustrous surfaces exhibit strong detail with full star centers and minimal marks. Light blending occurs over the eagle's feathers. Census: 67 in 58, 19 finer (6/15). NGC ID# 25KE, PCGS# 7810

- 6055 1870 AU58+ NGC.** From a small mintage of 4,520 business-strike examples, this attractive near-Mint quarter eagle shows only the slightest wear on the high points of the design elements and the lightly marked green and rose-gold surfaces retain much of their original mint luster. Census: 38 in 58 (1 in 58+), 19 finer (7/15). NGC ID# 25KE, PCGS# 7811

1870 Quarter Eagle, MS60
Generous Luster and Attractive Color

6056 1870 MS60 PCGS. CAC. A meager 4,520 circulation strikes were made of the 1870 quarter eagle, and today the issue is difficult to find in any problem-free grade. Mint State pieces are correspondingly more elusive. This example shows generous luster. A couple of large scrapes show in the left obverse field, with others on the cheek of Liberty; her profile and coronet show some radial "lathe lines," an apparent remnant of the die production. Other smaller marks appear on the reverse. The strike is nice and sharp throughout. Population: 1 in 60, 8 finer (7/15). NGC ID# 25KF, PCGS# 7811

6057 1878 MS64 PCGS. CAC. The large mintage of 286,240 pieces belies the scarcity of this issue in higher grades, although it is still a favorite date for type. A near-Gem coin such as this is perhaps the optimal Mint State grade for collectors, with full Gem and finer coins considerably more challenging. This CAC-endorsed example is frosty, lustrous, and highly attractive with a sharp strike. A few minor luster grazes are the only marks to mention. PCGS has graded just 47 coins finer (7/15). NGC ID# 25KY, PCGS# 7828

1881 Two and a Half, AU50
Only 640 Examples Struck

6058 1881 AU50 NGC. A paltry 640 quarter eagles were produced in 1881, making this issue "one of the most popular and sought-after dates in the series," per Garrett and Guth. The majority of survivors seem to grade in the AU range, though even these are seldom seen. This piece displays fully original, olive-gold color overall, with remnants of prooflike mirroring seen in the fields. Only light wear is present over the high points of the design, and surface flaws are seemingly nonexistent. Census: 4 in 50, 61 finer (6/15). NGC ID# 25L5, PCGS# 7833

1888 Quarter Eagle, MS66
Single Finest at PCGS

6059 1888 MS66 PCGS. Despite a scant mintage of only 16,001 coins, the 1888 quarter eagle is marginally plentiful in lower Mint State grades, but in Gem condition the date is rare and finer coins are exceedingly so. This Premium Gem is the sole finest at PCGS (6/15). The original frosty surfaces show warm straw-gold coloring and are devoid of obvious abrasions. A touch of striking weakness is seen on the central shield and the eagle's left (facing) leg, as usual. NGC ID# 25LC, PCGS# 7840

1893 Two and a Half, MS66

6060 1893 MS66 NGC. Despite the Panic of 1893 the mintage of the 1893 quarter eagles was far larger — about 12 times — that of the 1892s. Gem examples are nonetheless rare; perhaps because of the larger mintage, fewer were saved. This Premium Gem boasts greenish-gold and orange-gold hues competing for territory. Each side is sharply struck and shows few marks, but a small planchet lamination, as made, occurs in the obverse field above star 1. Census: 26 in 66 (1 in 66+), 4 finer (7/15). NGC ID# 25LH, PCGS# 7845

1893 Quarter Eagle, MS66
Razor-Sharp, Conditionally Rare

6061 1893 MS66 PCGS. The certified population for this date drops significantly at the Gem grade level, and even further at MS66; pieces grading finer than the present coin are extremely rare. This piece is fully struck. The surfaces are frosty and display varying orange-gold hues. There are no bothersome abrasions. Population: 24 in 66, 2 finer (7/15). NGC ID# 25LH, PCGS# 7845

6062 1895 MS64 PCGS. Excellent detail on hair and feathers alike. This near-Gem is lightly marked on its honey-gold surfaces but the luster is strong. A great 19th century type coin from a better issue of just 6,000 business strikes. Population: 32 in 64, 24 finer (7/15). NGC ID# 25LK, PCGS# 7847

**1898 Two and a Half, Fully Defined MS66+
Seemingly Pristine, Just 24,000 Coins Struck**

6063 1898 MS66+ PCGS. CAC. Light lemon-gold coloration throughout with coruscating mint frost over each side. The devices show complete definition on the stars, hair curls, feathers, fletchings, and olive leaves. Although it is somewhat scarcer than the 1900 and 1907 quarter eagle issues, the 1898 (24,000 coins struck) is still popular for type representation, a role for which this nearly flawless Premium Gem is perfectly suited. Population: 39 in 66 (2 in 66+), 11 finer (7/15). NGC ID# 25LN, PCGS# 7850

6064 1903 MS66 ★ NGC. CAC. Honey-gold patina embraces this gorgeous Premium Gem, with the obverse central device highlighted by the semiprooflike fields. The design elements are crisply defined, further enhancing the coin's outstanding eye appeal. While the 1903 is plentiful through MS66, NGC has given a mere two examples the coveted Star and assigned four finer with this designation (7/15). NGC ID# 25LU, PCGS# 7855

**1905 Two and a Half, MS67+
Superb Type Coin**

6065 1905 MS67+ NGC. Any 1905 quarter eagle in MS67 is a special coin, and this piece has the added distinction of a Plus designation. Both sides are boldly struck, illuminated by luminous peach-gold luster that is devoid of abrasions. The eye appeal is exceptional. Only six coins are finer at NGC (7/15). NGC ID# 25LW, PCGS# 7857

1905 Quarter Eagle, Glowing MS67+

6066 1905 MS67+ NGC. A spectacular type coin, aglow in luminous orange-gold luster that rolls over each side in frosty shimmers. The strike is fully executed. Occasional lilac and coppery hues attest to the originality of the surfaces, but are only discernible with a glass. A tiny planchet lamination near star 3 should not be mistaken for an abrasion, as there are none detectable. Only six coins are finer at NGC (7/15). NGC ID# 25LW, PCGS# 7857

**1905 Quarter Eagle, MS67+
A Favorite Among Type Enthusiasts**

6067 1905 MS67+ PCGS. The 1905 is a favorite among type enthusiasts because of its availability up to and including MS67 condition. Superb Gems with a Plus designation are rarely encountered, however, and finer examples consistently fetch many times that of an MS67, making this an ideal collectible grade. This is an essentially perfect coin with pinpoint strike definition. Gorgeous sun-gold surfaces lack copper alloy spots that typically plague the issue. Population: 78 in 67 (4 in 67+), 3 finer (7/15). NGC ID# 25LW, PCGS# 7857

**1905 Quarter Eagle, High-End MS67+
Impeccable Type Representative**

6068 1905 MS67+ PCGS. CAC. A plentiful late-series date, the 1905 is available in grades through MS67. However, finer examples are extremely rare, making this Plus-graded piece a must-have item for the advanced type or date collector. Heavily frosted luster blankets green-gold surfaces on each side. The design elements are fully struck. Close examination fails to find any noteworthy flaws. NGC has certified only six finer representatives (7/15). NGC ID# 25LW, PCGS# 7857

6069 1906 MS65 PCGS Secure. This late-date Coronet quarter eagle Gem is light yellow-gold with a handful of coppery flecks. Well-struck and well-suited to a type or date set.
From The College Collection, Part Two. NGC ID# 25LX, PCGS# 7858

6070 1906 MS65 NGC. CAC. Boldly impressed with effusive luster, yellow-orange and honey-gold with a few touches of green. A carefully preserved Gem ideal for the type collector.
From The Glacier Collection. NGC ID# 25LX, PCGS# 7858

6071 1906 MS66 PCGS. The well-preserved orange-gold surfaces of this delightful Premium Gem radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. Eye appeal is extraordinary. NGC ID# 25LX, PCGS# 7858

**1906 Quarter Eagle, Fully Struck MS67+
Just Two Submissions Finer at PCGS**

- 6072 1906 MS67+ PCGS. CAC.** This is one of the more plentiful issues in the series with thousands of coins certified through the Premium Gem grade level. The 1906 (176,330 pieces struck) becomes very scarce in MS67 and extremely rare in MS68. The surfaces of this high-end Superb Gem are virtually perfect with only a handful of microscopic specks in the upper reverse field that prevent a full MS68 grade. Frosty luster rolls over light peach-gold surfaces with fully struck design features. A tiny planchet flake appears above star 8. Population: 58 in 67 (1 in 67+), 2 finer (7/15). NGC ID# 25LX, PCGS# 7858

PROOF LIBERTY QUARTER EAGLES

**1890 Quarter Eagle, PR63 Ultra Cameo
Small Proof Mintage, Few Survive**

- 6073 1890 PR63 Ultra Cameo NGC.** Just 93 proofs were struck in 1890 with perhaps 50 to 60 surviving examples. Of these, only a few Deep or Ultra Cameos can lay claim to the rich, orange-gold color and the high-contrast frosted, devices of this deep-mirrored Select Proof. The strike is pinpoint-sharp, while a random scattering of hair-thin lines determine the assigned grade. Census: 1 in 63 Ultra Cameo, 22 finer (6/15). NGC ID# 288D, PCGS# 97916

**1894 Two and a Half, PR63 Cameo
Collector-Grade Proof**

- 6074 1894 PR63 Cameo PCGS.** From a mintage of 122 proof quarter eagles in 1894, likely no more than 80 survive in all grades. This Select Cameo is a delightful example for the budget-conscious collector, showing stark field-motif contrast and deep mirrors. The strike is full and the grade is determined by a few light, scattered marks in the fields, none of which are singularly bothersome. Population: 2 in 63 Cameo, 0 finer (7/15). NGC ID# 288H, PCGS# 87920

**Proof 1898 Quarter Eagle, Unc Details
Stark Field-Device Contrast**

- 6075 1898 — Altered Surfaces — PCGS Genuine. Proof, Unc Details.** From a proof mintage of just 165 coins, this starkly contrasted, yellow-gold example offers the budget-conscious collector with a still-pleasing entry into 19th century proof gold. Full struck with deeply mirrored fields. Light, scattered ticks in the fields on each side are accompanied by a few light hairlines on the reverse, the latter likely from an attempt to soften the former. The eye appeal is only marginally affected. NGC ID# 288M, PCGS# 7924

- 6076 1902 — Cleaning — PCGS PR Genuine. AU Details.** A lightly circulated example of this turn-of-the-century proof, with just a trace of wear on the high points of the design elements and lightly marked fields that retain much of their original reflectivity, despite the noted cleaning. NGC ID# 288S, PCGS# 7928

INDIAN QUARTER EAGLES

**1908 Indian Quarter Eagle, MS65
Gleaming Gold Type Coin**

- 6077 1908 MS65 PCGS.** The obverse is smooth and impressive — sharply struck and nearly mark-free. Flashy mint luster radiates from beneath the honey-gold coloration. The reverse is equally lustrous, with a few light field lines and the characteristic soft strike on the eagle's upper top-most wing feathers, the result of poor die preparation for this first-year issue. A great type coin, truly Gem condition. NGC ID# 288Y, PCGS# 7939

**1908 Quarter Eagle, MS65
First-Year Type Example**

- 6078 1908 MS65 PCGS.** Primarily light yellow-gold with areas of deep lemon. Minor die erosion at the margins and a degree of central striking softness have little influence on the Gem grade, which is warranted for the relative smoothness of the interior surfaces. This first-year Indian quarter eagle is ideal for a type set. NGC ID# 288Y, PCGS# 7939

**1908 Quarter Eagle, MS65+
Strong Definition and Eye Appeal**

6079 1908 MS65+ NGC. CAC. A razor-sharp Gem, the only area of softness occurs on the eagle's upper wing, as always. David Akers notes that the typical incompleteness "is not the result of a weak strike but rather stems from a lack of die detail." Orange-gold colors each side with intermittent glints of mint-green. The 1908 is one of the most available issues in the series in high grades, making this a suitable representative for type purposes. This is one of just seven Plus-designated Gems at NGC (6/15). NGC ID# 288Y, PCGS# 7939

**1908 Two and a Half Dollar, MS66
Virtually Unseen in Higher Grades**

6082 1908 MS66 PCGS. The 1908 was heavily saved as a first-year issue, but few survivors are of Premium Gem quality. In fact, examples are very scarcely seen at this grade level, and finer coins are extremely rare with no more than five pieces extant. Marvelous orange-gold surfaces display strong detail on the obverse, while the well-defined reverse features a degree of incompleteness on the tip of the eagle's wing — a hallmark of the issue, which was struck from improperly prepared dies. PCGS reports only two finer submissions (7/15). NGC ID# 288Y, PCGS# 7939

**1908 Indian Quarter Eagle, MS65+
First-Year Type Coin**

6080 1908 MS65+ PCGS. CAC. The 1908 Indian quarter eagle was heavily saved as a first-year memento and is thus the most available date in the series in high grade. Its popularity as a type coin is rivaled by few. This Plus-designated Gem example is well-struck, with satiny orange-gold luster and fairly clean surfaces. The softness on the eagle's wing is diagnostic of this issue, a product of insufficient engraving of the die rather than striking deficiency. NGC ID# 288Y, PCGS# 7939

**1908 Indian Quarter Eagle, MS66
Only Two Finer at PCGS**

6083 1908 MS66 PCGS. CAC. This is the first year of issue of Bela Lyon Pratt's distinctive Indian head design with the details sunk below the level of the field. The design met with mixed reviews at the time of issue, although it is extremely popular today. This Premium Gem has a bold strike and frosty luster with brilliant yellow surfaces. PCGS has only certified two finer examples (7/15). NGC ID# 288Y, PCGS# 7939

**1908 Indian Head Quarter Eagle, MS66
Important First-Year Issue**

6081 1908 MS66 PCGS. This was the first year for Bela Lyon Pratt's Indian Head design, which was not received with great enthusiasm by the general public. Despite being well-saved, the number of high-grade survivors is not great. The present lovely Premium Gem shows only minor incompleteness on the eagle's shoulder and breast feathers, yet it is boldly struck on the obverse. Light mint-green and deeper peach-gold hues are attractively blended over both sides. PCGS reports just two coins in a numerically finer grade (6/15). NGC ID# 288Y, PCGS# 7939

6084 1909 MS63 PCGS. Greenish-gold and apricot patina compete for territory on the lustrous surfaces of this Select quarter eagle. The design features are well-struck throughout. Some minute marks determine the grade. The 1909 quarter eagle is readily obtainable through MS64.

From The Badger Collection. NGC ID# 288Z, PCGS# 7940

6085 1909 MS63 PCGS. The attractive orange-gold surfaces of this impressive Select example show the minimum number of minor contact marks for the grade, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is strong. NGC ID# 288Z, PCGS# 7940

**1909 Indian Quarter Eagle
Exceptional Gem Surfaces**

6086 1909 MS65 PCGS. CAC. Our consignor has assembled an outstanding set of Gem Indian quarter eagles, and this conditionally scarce Philadelphia issue fits right in. Satiny and extremely attractive, the surfaces and strike are beyond reproach. The medium-gold surfaces are tinged with orange and lilac with brilliant mint luster shining through. This is arguably one of the scarcer dates in the series in terms of grading service submissions and high-grade rarity. PCGS has certified no coins finer than MS66, with just 18 pieces so-graded (6/15). NGC ID# 288Z, PCGS# 7940

6087 1910 MS64 NGC. This near-Gem exhibits excellent definition throughout. Pretty peach-gold color adorns lustrous surfaces, and minor marks in the fields limit the grade. The 1910 is collectible through MS64, but examples are scarcely seen finer.
Ex: Central States Signature (Heritage, 5/2007), lot 3429. NGC ID# 2892, PCGS# 7941

**1910 Indian Two and a Half, MS65
Lovely Coloration**

6088 1910 MS65 NGC. This is a beautiful Gem. In addition to the outstanding surface quality that comes with the grade, this piece showcases frosty luster in attractive variations of apricot, rose, bronze, and lilac-gold hues. The strike is a trifle soft above the Indian's brow and on the eagle's left (facing) talons, but this is only detected with a loupe. NGC lists just 15 MS66 coins finer (7/15). NGC ID# 2892, PCGS# 7941

**1910 Two and a Half, MS65
Satin-Smooth, Green Label Holder**

6089 1910 MS65 PCGS. The sharp strike and satiny, honey-gold luster set this Gem quarter eagle apart from all others. The obverse eye appeal suggests an even finer grade, while the reverse is equally appealing to the unaided eye. A few microscopic marks in the upper-left reverse field are widely scattered and of little impact. Housed in a green label holder. Just 11 coins are certified numerically finer by PCGS (6/15). NGC ID# 2892, PCGS# 7941

**1911 Quarter Eagle, Sharp MS65
Just One Finer at PCGS**

6090 1911 MS65 PCGS. Brilliant and frosty, the surfaces of this Gem quarter eagle lack the overt granularity often seen for the issue. Rather, the finely textured fields and deeply impressed devices capture and project blazing rich-gold luster. A few widely scattered, microscopic marks are minor in the context of the coin's overall radiance and eye appeal. PCGS has certified only a single numerically finer example (6/15). NGC ID# 2893, PCGS# 7942

**1911 Quarter Eagle, MS65
Only One Finer PCGS Coin**

6091 1911 MS65 PCGS. CAC. The 1911 had the second highest mintage of any Indian quarter eagle, yet it is a popular date due in part to the rarity of its Denver-Mint brother. This lovely Gem has brilliant orange gold surfaces, exhibiting a sharp strike and frosty luster. PCGS has only certified one finer example (7/15). NGC ID# 2893, PCGS# 7942

6092 1911-D Strong D — Mount Removed — PCGS Genuine. AU Details. The edge is filed near 6 o'clock, presumably to remove evidence of a mount. The apricot-gold fields are glossy. The mintmark is well defined, and the devices show only slight wear. A low mintage series key. NGC ID# 2894, PCGS# 7943

**1911-D Strong D Quarter Eagle, AU53
Popular Collector Grade**

6093 1911-D AU53 PCGS. Strong D. The 1911-D quarter eagle is the sole series key in all grades to the Indian Head series, although there are a couple of conditional rarities in Mint State. This is a nice collector-grade example of the issue, showing most of the original luster over khaki-gold surfaces with a few minor surface ticks and great eye appeal. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, AU58
Sought-After Key Issue**

- 6094 1911-D AU58 NGC.** The 1911-D Indian quarter eagle has long been acknowledged as the low-mintage key to the series and one of the most sought-after 20th century U.S. coins. This attractive near-Mint example displays sharply detailed design elements with just a trace of high-point wear, and lightly abraded orange-gold surfaces. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, AU58
Strong D**

- 6095 1911-D AU58 PCGS. CAC. Strong D.** For the collector avoiding the pricey Mint State grades, this Borderline Uncirculated 1911-D quarter eagle is a suitable candidate. Unlike many of its comparably graded counterparts, this piece shows original orange-gold patina with hints of mildly granular luster remaining in the recesses. The mintmark is clearly defined. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, Unc Details
Low-Mintage Series Key**

- 6096 1911-D — Improperly Cleaned — NGC Details. Unc.** Still attractive, despite the noted cleaning, this unworn specimen exhibits razor-sharp definition on all design elements and the light greenish-gold surfaces show only minor signs of contact. From a mintage of 55,600 pieces, the 1911-D is the acknowledged key to the Indian series. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS61
High-End Eye Appeal, Strong D**

- 6097 1911-D Strong D, MS61 NGC.** While the 1911-D is the undisputed key to the Indian Head quarter eagle series, there are many opportunities at this grade level to acquire a Mint State example. This coin rates above many in eye appeal and surface quality. Attractive orange-gold patina covers both sides, and a strong loupe is needed to identify any marks. Slight blending at the eagle's shoulder contradicts an otherwise sharp strike, but the Strong D mintmark provides additional allure. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS62
Pleasing Patina**

- 6098 1911-D MS62 PCGS. Strong D.** This is a well-struck, satiny example of this key Denver issue, showing yellow-gold luster with deeper coppery overtones on portions of the reverse. Lightly abraded, as the grade suggests, but without any individually significant distractions. A collectible Mint State example of this sought-after series key. *From The Badger Collection.* NGC ID# 2894, PCGS# 7943

**1911-D Two and a Half, MS63
Pleasing Mint State Example**

- 6099 1911-D MS63 NGC. Strong D.** An impressive, apricot-gold Mint State example of this series key date. Were it not for a thin scratch in the field near star six, this piece might have garnered a finer grade; the reverse is devoid of mentionable abrasions. This piece shows a sharp mintmark and excellent detail throughout the headdress and eagle. As is diagnostic of this issue, the luster has a slightly granular appearance. NGC ID# 2894, PCGS# 7943

**1913 Quarter Eagle, MS65
Seldom Seen Finer**

6100 1913 MS65 PCGS. The high fields are remarkably unmarked for this technically challenged issue, which is often found with many abrasions. Just a few tiny marks and hair-thin lines are confined mostly to the reverse, where they are widely separated and minuscule. Stately satin luster emanates from the sharply struck surfaces amid wheat-gold coloration. Just seven examples are numerically finer at PCGS (6/15). NGC ID# 2897, PCGS# 7945

6101 1914 MS62 PCGS. Reddish-gold patination adorns both sides of this quarter eagle. The design features are sharply struck, including the shoulder feathers of the eagle. A few grease streaks are visible on the reverse.
From The Badger Collection. NGC ID# 2898, PCGS# 7946

6102 1914 MS63 NGC. The 1914 Indian quarter eagle claims a low mintage of 240,000 pieces, and the date ranks second behind only the 1911-D in terms of scarcity. This attractive Select coin offers sharply detailed design elements and vibrant mint luster with lightly marked greenish-gold surfaces and outstanding eye appeal. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS64
Attractive, Rich-Gold Color**

6103 1914 MS64 NGC. One of the eagerly sought issues of the quarter eagle series, trailing only the 1911-D in high-grades — a fact that makes this Philadelphia date particularly attractive to collectors and gold specialists in the present near-Gem grade. The bonnet is a trifle soft on the lower-most feathers, and a few shallow marks are distributed over the exposed fields. That said, the coin's attractive rich-gold coloration and abiding mint luster provide the main attraction, and this example is sure to entice a strong bid. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle
Appealing Near-Gem Example**

6104 1914 MS64 PCGS. A low-mintage issue for the series, this Philadelphia date seldom displays both attractive mint luster and rich orange-gold color, yet the current coin has both attributes. A sharp strike on the headdress and on the eagle's upper wing add to the appeal. Numerous small marks are visible with a glass — typical for the issue, accounting for the assigned near-Gem grade. NGC ID# 2898, PCGS# 7946

6105 1914-D MS63 PCGS. The yellow-gold surfaces of this Select quarter eagle display good luster and sharply struck design elements, including excellent detail on the eagle's shoulder. A few moderate marks in the upper-right reverse field preclude a finer grade. MS63- and MS64-graded coins are in high demand due to the rarity of Gem and finer pieces.
From The Badger Collection. NGC ID# 2899, PCGS# 7947

6106 1914-D MS63 PCGS. This is an appealing orange-gold representative of one of the more challenging issues in the Indian Head quarter eagle series behind the 1911-D and the 1914. The headdress feathers, eagle's shoulder, and leg exhibit crisp detail for the date. Wispy scattered marks preclude a near-Gem assessment. NGC ID# 2899, PCGS# 7947

6107 1914-D MS64 NGC. This better-date Indian Head two and a half features deep orange-gold color over both sides with occasional blushes of light rose. The devices are well-struck with trivial softness on the lower headdress feathers and the eagle's shoulder. NGC has only seen 44 examples finer (7/15). NGC ID# 2899, PCGS# 7947

**1915 Quarter Eagle, Pleasing MS65
Nicely Preserved, Coppery-Gold Highlights**

6108 1915 MS65 PCGS. A captivating combination of lilac, orange, and coppery-gold accents enhance the medium-gold coloration of this smoothly lustrous Gem quarter eagle. The strike is uniformly bold except at the lowest bonnet feathers, which show slight blending. A trio of tiny contacts near the eagle's wing are the sole marks to mention. Gem or finer examples are the exception for this Philadelphia issue, with both services combined reporting just a dozen numerically finer coins (6/15). NGC ID# 289A, PCGS# 7948

6109 1925-D MS65 PCGS. This impressive Gem displays pleasing orange-gold surfaces that are free of mentionable distractions and radiate vibrant mint luster on both sides. Sharply detailed design elements add to the ample eye appeal. PCGS has graded 34 numerically finer examples (7/15). NGC ID# 289B, PCGS# 7949

6110 1925-D MS65 PCGS. This impressive Gem displays sharply detailed design elements and vibrant mint luster throughout. The pleasing lemon-yellow surfaces are free of all but the most insignificant signs of contact.
From The College Collection, Part Two. NGC ID# 289B, PCGS# 7949

6111 1925-D MS65 PCGS. The 1925-D, one of three Denver issues in the series, is one of the most frequently seen Indian quarter eagles in Gem condition, popular among type collectors. This glowing orange-gold example is devoid of major abrasions and highly eye-appealing. The lower portion of the Indian's headdress shows considerable striking weakness. Housed in a green label holder. NGC ID# 289B, PCGS# 7949

6112 1925-D MS65 NGC. CAC. The third and final Indian Head quarter eagle struck at the Denver Mint, the 1925-D is an ideal type coin for Denver collectors. This sharply detailed example has frosty straw-gold luster. Although plentiful at this grade level, finer examples are extremely hard to locate.
From The Glacier Collection. NGC ID# 289B, PCGS# 7949

6113 1926 MS65 PCGS. The vivid orange-gold surfaces of this delightful Gem are well-preserved and brightly lustrous, to complement the sharply detailed design elements. Eye appeal is outstanding. PCGS has graded 42 numerically finer examples (7/15). NGC ID# 289C, PCGS# 7950

1926 Quarter Eagle, MS65+ Dramatic Coloration

6114 1926 MS65+ PCGS. CAC. Orange-gold color yields to olive and pale rose highlights over the dramatically toned surfaces of this high-end Gem quarter eagle. While the 1926 issue is readily available in grades up to MS65, few coins can pass muster for a higher designation. The present coin exceeds the norm with flying colors, while only a scattering of tiny field ticks prevent an even finer grade. Population: 11 in 65+, 42 finer (7/15). NGC ID# 289C, PCGS# 7950

6115 1927 MS65 PCGS. The mint bloom is full and displays fragile variegated patina that adds an extra dimension of visual interest to this solid Gem type coin. Crisply detailed with superior luster characteristics, this is a Gem Indian Quarter Eagle to remember. PCGS has graded 21 numerically finer examples (6/15). NGC ID# 289D, PCGS# 7951

6116 1927 MS65+ PCGS. This frosty Gem has bold design motifs and brilliant light yellow luster with bluish overtones. An exceptional example for a type set or advanced collection. NGC ID# 289D, PCGS# 7951

6117 1928 MS65 PCGS. This spectacular Gem offers sharply detailed design elements and vibrant mint luster throughout, with well-preserved orange-gold surfaces that add to the ample visual appeal. PCGS has graded 11 numerically finer examples (7/15). NGC ID# 289E, PCGS# 7952

1929 Two-and-a-Half, Exceptional MS65 Ex: Benson, Stunning Coloration

6118 1929 MS65 PCGS. Both sides of this memorable coin offer exceptional color and luster for an Indian quarter eagle. Lilac and rose accents intersperse the ample areas of vivid, orange-gold coloration and vibrant mint luster. Sharply struck, and the few surface contacts are entirely secondary to the stunning visual impact of this radiant Gem.
Ex: Ira S. Reed (2/1944); Benson Collection Part III (Superior, 2/2003), lot 1976. NGC ID# 289F, PCGS# 7953

1929 Quarter Eagle, MS65 Glimmering Peach-Gold Example

6119 1929 MS65 PCGS Secure. CAC. This late-date Indian Head quarter eagle issue is readily accessible through MS64, but Gems are surprisingly scarce. Advanced collectors with sights set on a Premium Gem or better example will have to wait for an opportunity to procure one of the eight pieces at PCGS and NGC combined. This glimmering peach-gold example exhibits strongly struck devices. The only notable impairment is a tiny struck-in grease mark on the necklace. PCGS reports only four examples finer (7/15).
From The College Collection, Part Two. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

6120 1854 AU55 NGC. This attractive Choice AU specimen shows just a trace of wear on the high points of the well-detailed design elements and the lightly abraded greenish-gold surfaces retain most of their original mint luster. NGC ID# 25M3, PCGS# 7969

6121 1854 AU55 PCGS. Peach-gold and olive-green toning graces this briefly circulated but partly lustrous first-year three dollar type coin. Smooth aside from moderate field marks near the date and denomination. Certified in a green label holder. NGC ID# 25M3, PCGS# 7969

6122 1854 AU58 NGC. Traces of luster reside in the recesses of this honey-gold near-Mint three dollar that exhibits well-defined design features. A few minute marks are in concert with the designated grade.
From The Badger Collection. NGC ID# 25M3, PCGS# 7969

1854-O Three Dollar Gold, XF45
Collector-Grade Example

- 6123 1854-O XF45 PCGS. Variety 2.** The 1854-O gold three dollar piece is a major rarity in Mint State, nearly to the same extent as the 1854-D, even though the Dahlonega issue is far rarer overall. This Choice XF 1854-O offers a collectible, well-detail option for the New Orleans gold enthusiast on a budget. The surfaces show original olive-gold patina with coppery overtones in the protected areas. Eye appeal is pleasing. NGC ID# 25M5, PCGS# 7971

- 6124 1854-O — Improperly Cleaned — NGC Details. AU. Variety 2.** Relatively free from bagmarks, but rotation beneath a light reveals patches of hairlines on both sides. Liberty's curls display moderate wear. Luster outlines the letters, wreath, and other protected areas. The usual lapped die state of this scarce and low mintage issue. NGC ID# 25M5, PCGS# 7971

1854-O Three Dollar Gold, AU50
Low New Orleans Mintage

- 6125 1854-O AU50 NGC. Variety 2.** The availability of the 1854-O begins to decline at the AU50 grade level, and it is a major rarity in Mint State. This piece shows bright yellow-gold surfaces, with a touch of high-point wear over the well-struck design elements. As the only New Orleans issue in the series, the 1854-O three dollar gold (24,000 pieces struck) appeals to a wide range of 19th century gold enthusiasts. NGC ID# 25M5, PCGS# 7971

1854-O Gold Three Dollar, AU55
Sole New Orleans Issue

- 6126 1854-O AU55 PCGS. Variety 2.** The 1854-O three dollar gold is challenging in all grades, but essential for a complete New Orleans gold collection. This Choice AU representative displays medium green-gold patina with hints of luster in the recesses. A lapped reverse die makes the strike look weaker than it actually is, as the obverse portrait is sharp. Population: 48 in 55, 21 finer (6/15). NGC ID# 25M5, PCGS# 7971

- 6127 1855 AU55 NGC.** Considerable luster remains on each side of this lightly worn yellow-gold three dollar piece. The surfaces are pleasing with only scattered and trivial handling marks. NGC ID# 25M6, PCGS# 7972

- 6128 1855 AU58 NGC.** Traces of luster reside in the recessed areas of this near-Mint three dollar piece. Well-struck design elements and minimally abraded surfaces round out the coin's pleasing eye appeal.
From The Badger Collection. NGC ID# 25M6, PCGS# 7972

1855-S Three Dollar, Seldom-Seen XF45

- 6129 1855-S XF45 PCGS.** The low-mintage 1855-S three dollar, struck in the amount of 6,600 pieces, is about as rare as the better-known 1854-D issue. This Choice XF example is a tad finer than the typical survivor, as the coins circulated extensively until the Civil War. This piece shows orange fields predominating against ice-blue high points, a beautiful coin with the expected wear, scattered marks, and some buildup in a couple of the letters. Population: 39 in 45, 41 finer (7/15). NGC ID# 25M7, PCGS# 7973

- 6130 1856 AU58 NGC.** The yellow-gold surfaces of this near-Mint three dollar are imbued with hints of soft rose color, and reveal just the expected number of marks associated with the grade designation. The design elements are well-struck.
From The Badger Collection. NGC ID# 25M8, PCGS# 7974

- 6131 1856 AU58 NGC.** Light wear is noted on the highest design points of this attractive near-Mint example. The satiny surfaces have nearly full luster and inconsequential marks. Faint field reflectivity is evident on each side. NGC ID# 25M8, PCGS# 7974

1862 Gold Three Dollar, AU53
Original Patina

- 6132 1862 AU53 PCGS.** The 1862 three dollar gold is a better date, boasting a low mintage of just 5,750 pieces and a fairly low survival rate in high grade. This AU representative shows original olive-gold patina with golden luster in the protected regions of the fields. The strike is well-executed and the devices show little evidence of circulation. NGC ID# 25MH, PCGS# 7983

1862 Three Dollar Gold, Near-Mint

- 6133 1862 AU58 NGC.** This is an attractive collector-grade example of this better three dollar gold issue, struck to the limited extent of only 5,750 pieces. The devices are sharply rendered and the surfaces yield original green-gold coloration. Faint, vertical die striations in the fields are as struck and denote unworn, Mint surface. Just a touch of friction appears over the high points of the devices. Census: 50 in 58, 45 finer (6/15). NGC ID# 25MH, PCGS# 7983

- 6134 1866 — Improperly Cleaned — NGC Details. AU.** The apricot-gold surfaces lack noticeable hairlines, but appear wavy above Liberty's bust tip and the upper left portion of the wreath. The curls display slight wear, but luster emerges from design recesses. The reverse exhibits a wire rim near 12 o'clock. One of only 4,000 pieces struck. NGC ID# 25MM, PCGS# 7987

1868 Gold Three Dollar, MS62 Semiprooflike Fields

- 6135 1868 MS62 PCGS.** Few Mint State examples of the 1868 gold three dollar are available, and rarely is a piece offered that is finer than the current example. Both sides show well-struck devices with semiprooflike fields and rich apricot-orange color. Abrasions are surprisingly minimal for the grade, and the eye appeal is correspondingly high. Population: 43 in 62 (1 in 62+), 42 finer (6/15).
From The Badger Collection. NGC ID# 25MP, PCGS# 7989

1873 Closed 3 Three Dollar XF Sharpness, Rare Variety

- 6136 1873 Closed 3 — Repaired — PCGS Genuine. XF Details.** The business mintage of the 1873 Closed 3 is unknown but undoubtedly very low. The PCGS Population report lists at least one example in each grade between XF45 and MS64, but the combined total is just 69 pieces. The present piece has unusual olive-green color. Obverse smoothing affects the peripheries of several letters in UNITED STATES OF AMERICA, and the dentils near 8:30 have a blurry appearance. NGC ID# 25MW, PCGS# 7995

- 6137 1874 AU58 PCGS.** Ample luster is apparent over the honey-gold surfaces of this near-Mint three dollar gold piece. The design features are well defined except for the often-seen softness in the hair at Liberty's forehead and above the ear. Neither side reveals significant marks. This is an excellent type coin.
From The Badger Collection. NGC ID# 25MX, PCGS# 7998

1874 Gold Three Dollar, MS62 Prooflike Cameo Contrast

- 6138 1874 MS62 Prooflike NGC.** NGC lists 29 Prooflike 1874 three dollar gold pieces, but almost half of them are in AU grades; this piece is one of only four Prooflike coins in MS62 and there are just two MS63 examples finer (7/15). Gleaming yellow-gold fields provide stark cameo contrast without any significant abrasions. The wreath bowknot is soft, but the obverse portrait is well-defined. PCGS# 77998

- 6139 1878 AU58 NGC.** A trace of high-point wear is noted on each side of this pleasing piece that retains nearly full luster. A few scattered marks are inconsequential. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS63 Partially Prooflike Fields

- 6140 1878 MS63 PCGS.** Satiny orange-gold luster illuminates the minimally abraded surfaces of this Select three dollar gold type coin, while the only noticeable striking weakness is seen on the reverse bowknot, as usual. The 1878 is by far one of the most plentiful issues in the series in Mint State, and is also widely known for its typically excellent eye appeal. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, Frosty MS63

- 6141 1878 MS63 PCGS.** A well-struck type coin from one of the few issues in the series that is readily available in Mint State. This Select 1878 three dollar gold piece shows frosty peach-gold luster, with a few light, scattered abrasions as allowed for by the grade. The surfaces display a modest shimmer when tilted beneath a light. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64+
Perfect for Type**

- 6142 1878 MS64+ PCGS.** A combination of availability and strong eye appeal makes this issue an ideal type coin candidate. A few light marks and some roughness at the bow knot preclude a full Gem designation, but this high-end near-Gem is otherwise well-preserved and brilliantly lustrous over gleaming, medium-gold surfaces. An extremely Choice example for the gold specialist. NGC ID# 25MZ, PCGS# 8000

**1882 Gold Three Dollar, MS61
Semiprooflike Fields**

- 6143 1882 MS61 NGC.** This 1882 three dollar gold piece exhibits lovely semiprooflike fields behind modestly contrasted, well-struck devices. There are no individually obtrusive abrasions, and we instead note only light chatter in the fields that limits the grade. Medium wheat-gold color encompasses each side. The 1882 had a scant mintage of 1,500 pieces, but enough Uncirculated coins were set aside by contemporary numismatists that the issue is moderately collectible today. NGC ID# 25N5, PCGS# 8004

- 6144 1886 — Improperly Cleaned — NGC Details. Unc.** A well defined but slightly subdued example. Open areas are butter-gold, but the obverse legends exhibit orange toning. No marks are consequential. A tiny mintage of 1,000 pieces ensures that survivors are elusive.

**1886 Gold Three Dollar, MS61
Better Late-Series Issue**

- 6145 1886 MS61 NGC.** The devices are boldly rendered and the fields exhibit noticeable semiprooflike mirroring. A few light abrasions determine the grade, but none are overly obtrusive. This honey-gold 1886 three dollar piece is one of only a limited number of Mint State survivors from a mintage of just 1,000 coins. Census: 18 in 61, 20 finer (6/15). NGC ID# 25N9, PCGS# 8008

**1888 Three Dollar, MS64
Mostly Prooflike**

- 6146 1888 MS64 PCGS.** The three dollar gold pieces in the 1880s became more of a novelty than a serious circulating coin. Tiny mintages were the rule, while jewelers and speculators tucked away most available examples. Many high-grade coins survive of most issues from the decade. The 1888 issue had a comparatively generous mintage of 5,000 pieces. Most display some degree of prooflikeness, although not all are as attractive and well-made as this glittering example. The fields are almost entirely prooflike and the surfaces radiate rich, honey-gold luster. A near-Gem, with no meaningful distractions. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

**1803/2 Half Eagle, BD-3, XF45
Imperfect T, 3 Free of Bust**

- 6147 1803/2 BD-3, R.4, XF45 NGC.** Bass-Dannreuther Die State e/b. A yellow-gold example with bits of mint luster still in evidence. The T in LIBERTY is missing its right foot — an imperfection that helps distinguish the BD-3 variety from the more-available BD-4, since both varieties share the same reverse. The surfaces are uniformly abraded on both sides but escape major marks. A few adjustment marks angle downward from the left edge through the clouds, left wing, and shield. PCGS# 504950 Base PCGS# 8084

1803/2 BD-4 Half Eagle, AU58
Middle Die State

- 6148** 1803/2 BD-4, R.4, AU58 NGC. Bass-Dannreuther Die State c/c. An almond-gold representative of this scarce Jefferson-era date. The forehead curl displays minor wear, but luster illuminates the stars, plumage, legends, and portrait. Abrasions are unobtrusive and chiefly confined to obverse field, the U in UNITED, and the reverse rim at 1 o'clock. PCGS# 504951 Base PCGS# 8084

1804 Half Eagle, AU Sharpness
Small Over Large 8, BD-7

- 6149** 1804 Small Over Large 8, BD-7, R.4 — Repaired, Whizzed — NGC Details. AU. Bass-Dannreuther Die State c/c. This sharply detailed early half eagle is microgranular from whizzing, and shows smoothing on the field near the date and bust tip. Nonetheless, a bold example of an infrequently encountered variety. The Small Over Large 8 obverse die was paired with three different reverses. BD-7 was the final die marriage of the date. PCGS# 519897 Base PCGS# 8086

1804 Half Eagle, Unc Sharpness
BD-7, Small Over Large 8

- 6150** 1804 Small Over Large 8, BD-7, R.4 — Obverse Improperly Cleaned — NGC Details. Unc. Bass-Dannreuther Die State b/b. A scarce variety, showing a small 8 punched over a previous large 8 in the date. Only 100 to 150 examples are believed known. This piece is sharply struck with complete border dentils and bold interior motifs. The reverse fields are fully prooflike, although the obverse is slightly subdued in that regard due to a light cleaning. Bright yellow-gold in color. PCGS# 519897 Base PCGS# 8086

1806 Knob 6, 7x6 Stars Half Eagle, BD-6, XF40

- 6151** 1806 Knob 6, 7x6 Stars, BD-6, R.2, XF40 ANACS. Bass-Dannreuther Die State a/b, showing light clash marks from star 7 to the left (facing) eagle's wing. This variety is more commonly referred to these days as Round Top 6, as in its *Guide Book* listing. This piece shows honey-gold surfaces that retain considerable appeal despite the expected wear and some pitting in the obverse fields. PCGS# 45620 Base PCGS# 8089

1806 Half Eagle, AU Details
7x6 Stars, Knob 6, BD-6

- 6152** 1806 Knob 6, 7x6 Stars, BD-6, R.2 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State d/e. BD-6 is the only die marriage with an unbalanced obverse arrangement of 7x6 stars. LIBERTY and the right-side stars are crowded, while the left-side stars allow open space near the curl and cap. This moderately circulated sun-gold representative is mildly luminous, but the surfaces are smooth save for a cluster of individually minor abrasions on the left obverse field. PCGS# 45620 Base PCGS# 8089

1807 Half Eagle, BD-1, AU50 Details

- 6153** 1807 Bust Right, BD-1, High R.4 — Repaired — ANACS. AU50 Details. Small Date, Small Obverse Stars, Small Reverse Stars. Some luster glimmers from the devices and legends, and little actual wear is apparent. Both sides are glossy from a cleaning, and repairs are evident left of the L in LIBERTY, where the piece may have had an attempted puncture at one time. A pair of minor pinscratches cross right side reverse stars. Ex: *Dallas Signature* (Heritage, 10/2006), lot 2701. PCGS# 519898 Base PCGS# 8092

1807 Half Eagle, AU55
Small Reverse Stars, Scarce BD-1

- 6154 1807 Bust Right, BD-1, R.4, AU55 NGC.** Possibly from the terminal die state of this reverse die, with a heavy rim cud above T in UNITED. This Choice AU example is lightly worn across both sides, with bold striking details and deep green-gold and red-orange toning. A scarce die marriage that is seldom seen at any grade level.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2854. PCGS# 519898 Base PCGS# 8092

1811 Capped Head Half Eagle, Unc Details
Tall 5, BD-1 Variety

- 6155 1811 Tall 5, BD-1, High R.3 — Tooled — PCGS Genuine. Unc Details.** Bass-Dannreuther Die State c/c. The 1811 Capped Head half eagle claims a substantial mintage of 99,581 pieces, with two die varieties known for the date. This coin represents the BD-1 variety, with a Tall 5 in the denomination. The BD-1 has a surviving population of 175-250 pieces in all grades and conditions.

This coin traces its history to lot 213 in the Titus, Johnson and Reamer Collections (B. Max Mehl, 12/1928) where it was described as:

“1811 Large 5 on reverse. Uncirculated; frosty mint surface. Very scarce so choice. With record of \$35.00 for an equal specimen.”

We agree with Mehl’s assessment of this attractive coin except for some tooling on the eagle’s left (facing) wing. Today, Mint State specimens of this date sell for around \$10,000 at auction. The original envelope from Mehl’s sale accompanies the lot.
Ex: Titus, Johnson and Reamer Collections (B. Max Mehl, 12/1928), lot 213. PCGS# 8110

CLASSIC HALF EAGLES

1834 Plain 4 Half Eagle, MS61
McCloskey 3-B, Semiprooflike Fields

- 6156 1834 Plain 4, Breen-6501, McCloskey 3-B, R.1, MS61 NGC.** An affordable Mint State Classic Head type coin, this Plain 4 half eagle shows uncommonly well-struck design elements set against semiprooflike fields and illuminated by rich orange-gold and peach luster. Trivial surface contact in the fields limits the grade, as there are no singularly significant abrasions. Housed in a prior generation holder. NGC ID# 25RR, PCGS# 8171

- 6157 1834 Crosslet 4 — Obverse Tooled — NGC Details. AU.** Garret and Guth (2006) note that the 1834 Crosslet 4 half eagle is 10 times rarer than its Plain 4 counterpart, and the census data bears that out. This bright green-gold example retains considerable luster in the recesses. Tooling on the obverse does not diminish the appeal of this Classic Head rarity. PCGS# 8172

- 6158 1835 AU53 PCGS. Breen-6504, McCloskey 1-A, R.2.** First Head, Block 8. Peach-gold luster lingers in recessed areas of this moderately circulated and inoffensively abraded type representative. Seven die marriages are confirmed for the 1835, although M. 1-A constitutes about half of the known examples. NGC ID# 25RV, PCGS# 8173

- 6159 1836 AU53 NGC. Breen-6508, McCloskey 5-D, R.3.** Second Head, Small Date. McCloskey 5-D is a scarce Classic Head half eagle variety. This example displays rich violet and blue toning over lustrous yellow-gold surfaces. NGC ID# 25RY, PCGS# 8174

- 6160 1838 AU58 NGC. Breen-6515, McCloskey 2-B, R.1.** Two varieties of 1838 Classic half eagles are known and the McCloskey 2-B is more frequently encountered. This lovely near-Mint example has brilliant greenish yellow-gold luster with satin surfaces and excellent eye appeal. NGC ID# 25S4, PCGS# 8176

1838-D Half Eagle, Choice XF
McCloskey 1-A

- 6161 1838-D McCloskey 1-A, R.3, XF45 PCGS Secure.** The 1838-D half eagle is an important issue, being the first of the denomination struck at the Dahlonega Mint and the only D-mint issue in the Classic Head half eagle type. This Choice XF example shows medium green-gold patina, with minor wear over the high points of the devices. An old, vertical scratch on Liberty’s cheek, visible with a loupe, is the only mentionable surface flaw. NGC ID# 25S6, PCGS# 8178

LIBERTY HALF EAGLES

1839 Liberty Half Eagle, AU58 Excellent Luster

- 6162 1839 AU58 PCGS.** The 1839 half eagle issue marks the first of the Liberty Head design by Christian Gobrecht, and it is a one-year-only type. Mint State survivors are quite rare, and the average certified survivor is XF45 to AU50. This near-Mint State example boasts great eye appeal on mellow orange-gold surfaces with excellent luster and minimal marks. Population: 14 in 58, 20 finer (7/15). NGC ID# 25S7, PCGS# 8191

- 6163 1840 Narrow Mill AU58 NGC.** The yellow-gold surfaces of this near-Mint five dollar are imbued with soft mint-green and display traces of luster in the recessed areas. The design elements are well-struck save for the typical softness in the eagle's leg feathers and claws. A few minute marks are consistent with the grade. Census: 59 in 58, 28 finer (7/15). NGC ID# 25SA, PCGS# 8194

1840-C Five Dollar, AU50 Challenging Charlotte Issue

- 6164 1840-C AU50 PCGS Secure. Variety 2.** The 1840-C half eagle is one of the scarcer issues in the Charlotte series. From a mintage of 18,992 pieces, it is doubtful that more than 125 to 150 survive in all grades. This AU representative is finer than the typically seen example, showing well-struck motifs with light wear. The surfaces exhibit original olive-gold patina with hints of coppery-red in the peripheral recesses. No major abrasions are present. Population: 11 in 50, 36 finer (7/15). NGC ID# 25SD, PCGS# 8196

- 6165 1843-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 10-G.** Patches of hairlines emerge when this Dahlonega type coin is rotated beneath a light. Careful examination reveals unobtrusive scuffs on the eagle's beak and the upper portion of the left (facing) wing. NGC ID# 25T4, PCGS# 8215

- 6166 1849-C XF45 PCGS. Variety 2.** The scarcer of the two die marriages for the '49-C, identified by parallel vertical die lines behind Liberty's neck. This Charlotte type coin has noticeable luster and moderately marked honey-gold surfaces. The central strike is incomplete, typical for the issue. NGC ID# 25TW, PCGS# 8241

- 6167 1850-C VF35 NGC. Variety 1.** Four die marriages are known for the '50-C, despite a small mintage of 63,591 pieces. This lightly abraded and luminous straw-gold Charlotte representative has flat curls from a combination of strike and wear, but the eagle's left (facing) wing is richly detailed. NGC ID# 25TZ, PCGS# 8244

1850-C Five Dollar, AU50 Variety 4 With Weak Mintmark

- 6168 1850-C AU50 PCGS. Variety 4.** This variety has the date and mintmark positioned furthest right of the four die pairings known. This is a later die state with just the top of the C mintmark barely visible. The substantial mintage of 63,591 pieces ensures a generous number of survivors and this issue's availability as a type coin. The surfaces are choppy with numerous small abrasions scattered over each side, as usually found. Just a bit weakly defined over the high points of the design. NGC ID# 25TZ, PCGS# 8244

- 6169 1850-D — Obverse Scratched — NGC Details. AU. Variety 27-U.** Rich orange and sea-green toning embraces this lightly circulated Dahlonega half eagle. The strike is usual for the remote branch mint facility. A fairly deep abrasion on Liberty's forehead accounts for the NGC designation. NGC ID# 25U3, PCGS# 8245

1852 Half Eagle, MS62 Luminous, Original Surfaces

- 6170 1852 MS62 PCGS. CAC.** Half of the stars on the obverse are flat on this Mint State piece, although the balance of the design motifs on both sides are boldly detailed. The surfaces display frosty yellow-gold mint luster and excellent eye appeal. The 1852 is one of the more readily obtainable half eagle issues from the 1850s, but is still itself scarce in Mint State, and rare above the MS62 grade level. Population: 40 in 62 (1 in 62+), 30 finer (7/15). NGC ID# 25UA, PCGS# 8250

1852-D Five Dollar, AU53

- 6171 1852-D AU53 NGC. Variety 33-V.** This yellow-gold Dahlonega example lacks mentionable marks and has a good strike on the wings and borders. The curls, claws, and fletchings are typically brought up. Three die marriages exist for the '52-D. Variety 32-V is most often seen, while Variety 33-V is rare and Variety 33-W is very rare. The pick-up point is the 2 in the date, which is distant from the bust on the "common" Variety 32-V but nearly touches the bust on Varieties 33-V and 33-W. NGC ID# 25UC, PCGS# 8252

1856-D Half Eagle, AU53
Pleasing Color and Surfaces

- 6172 1856-D AU53 PCGS. Variety 39-FF.** One of the scarcer Dahlonega half eagles, with a mintage of 19,786 pieces (for comparison, less than half the mintage of the 1854-D half eagles). This pleasing example displays medium-gold color with orange highlights within the protected areas. Abrasions are less than expected for the issue — especially on the obverse, which shows only minor marks. Sharp detail and considerable mint luster remain for the grade. Population: 8 in 53, 45 finer (7/15). NGC ID# 25UX, PCGS# 8268

1857-C Half Eagle, MS61
Rare in Mint State

- 6173 1857-C MS61 PCGS. CAC. Variety 1.** A single die variety is known for the 1857 Charlotte half eagles. Claiming a mintage of 31,360 pieces, this is one of the more available Charlotte issues in circulated grades. Mint State coins are rare, however. PCGS and NGC have certified 45 examples in Mint State, primarily MS60 through MS62. The yellow-gold surfaces of the present MS61 offering are imbued with whispers of olive-green and orange, and exhibit sharply struck design features. Scattered marks limit the grade. Population: 10 in 61, 7 finer (7/15). NGC ID# 25V3, PCGS# 8272

1858 Five Dollar, MS62+
Seldom Seen in Uncirculated

- 6174 1858 MS62+ NGC.** The 1858 half eagle is somewhat underrated. Its mintage of just 15,136 coins is comparable to that of the 1858-D, and the date is scarcer overall than any of its branch mint counterparts. Mint State examples are especially rare, regardless of grade. This Plus-graded MS62 coin shows a sharp strike with some semiprooflike reflectivity in portions of the fields and rich orange-gold color overall. No major abrasions are present, and we instead note only faint lines in the surfaces that limit the grade. Census: 1 in 62 (1 in 62+), 8 finer (7/15). NGC ID# 25V7, PCGS# 8276

1859 Half Eagle, AU58
Rare Any Finer

- 6175 1859 AU58 PCGS.** The scarcity of this Philadelphia half eagle belies its mintage, which at 16,734 pieces is not large, but about average for the period. Few Mint State coins are known, suggesting this lightly abraded AU58 example is a viable alternative. Yellow-gold surfaces retain mint luster at the margins, and abrasions are limited to light lines and some busyness in the fields. The coin is sharply struck on both sides. Population: 9 in 58, 2 finer (7/15). NGC ID# 25VB, PCGS# 8280

- 6176 1871-S AU50 PCGS.** The orange-gold surfaces of this half eagle display traces of luster in the protected areas of the well-defined design elements. The few scattered marks are within the confines of a lightly circulated coin. From a mintage of 25,000 pieces, the 1871-S half eagle is very rare in Mint State, where PCGS and NGC have seen only seven examples. Population: 8 in 50, 21 finer (7/15). NGC ID# 25WE, PCGS# 8324

1874-S Half Eagle, Choice AU
No Mint State Survivors

- 6177 1874-S AU55 PCGS.** The *Encyclopedia of U.S. Gold Coins* notes that “in About Uncirculated condition the 1874-S half eagle is very rare, and most of the known survivors that have graded About Uncirculated are on the low end of the scale.” The bright yellow and green-gold surfaces of this Choice AU example retain partial mint luster within the protected regions of the design. Myriad abrasions are scattered throughout. A great example from this low-mintage West Coast issue (16,000 coins struck). Population: 7 in 55, 1 finer (7/15). NGC ID# 25WR, PCGS# 8335

**1876 Half Eagle, Sharply Struck MS62+
A Low-Mintage, Low-Population Issue**

6178 1876 MS62+ NGC. The 1876 half eagle has a very low circulation-strike mintage of 1,432 pieces and an extremely low population figure. Indeed, NGC and PCGS combined report only 48 submissions in all grades (7/15), and the PCGS website estimates only 40 to 50 known examples. Moreover, perusal of the Heritage Auctions Archives lists only 76 appearances over the last 20 or so years, several of which are known to be multiple appearances.

The present high-end MS62 offering is the third finest example seen at NGC. The obverse displays light yellow-gold patination while the reverse shows deeper reddish-gold color. The design elements are sharply struck except for the typical softness in the eagle's neck feathers. Distributed marks, mostly on the obverse, preclude a higher grade. This is an infrequent opportunity to acquire this classic rarity. NGC ID# 25WW, PCGS# 8339

6179 1877 — Cleaning — PCGS Genuine. AU Details. The rare date 1877 has a business mintage of only 1,132 pieces. The PCGS Population is 34 examples in all grades, although that roster excludes the present coin, as it is moderately bright from a wipe. Generally orange-gold, although the portrait displays lavender shades. NGC ID# 25WZ, PCGS# 8342

**1877-CC Five Dollar, AU Details
Challenging Carson City Emission**

6180 1877-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-B. The 1877-CC has a scant production of 8,680 pieces, yet little regard was given the issue until a number of years later. Most of the 200 to 300 survivors are in VF to AU grades. The present yellow-gold example is moderately glossy from a wipe, and the field beneath the date appears smoothed. Surprisingly free from marks aside from a diagonal line within the shield. NGC ID# 25X2, PCGS# 8343

**1880 Half Eagle, Sharp MS65+
Far Finer Than Normal**

6181 1880 MS65+ PCGS. Even though nearly 3.2 million examples of the 1880 half eagle were struck, few survive anywhere near as nice as the present MS65+ PCGS representative. The honey-gold centers cede to deep caramel-gold near the rims on the obverse, while the reverse is a more consistent orange-gold. The strike is sharp but not absolute. A few dark flecks occur near star 11 and on the reverse rim at 7:30. Population: 15 in 65 (1 in 65+), 1 finer (7/15). NGC ID# 25XA, PCGS# 8351

6182 1881/0 FS-301 MS63 NGC. Traces of the overdate are visible under all four digits of the 1881 date, with the final 1 punched over a 0. This scarce overdate variety is extremely popular and has been listed in the Guide Book for many years. This Select Mint State piece has frosty yellow luster with rich peripheral orange toning. Census: 6 in 63 (1 in 63 ★), 5 finer (7/15). PCGS# 145714 Base PCGS# 8355

**1883-CC Five Dollar, AU58
Rarely Seen This High Grade**

6183 1883-CC AU58 NGC. Variety 1-A. With a mintage of only 12,598 pieces, the 1883-CC half eagle is challenging in all grades, but is extremely rare in Mint State. This Borderline Uncirculated example displays sharp detail with honey-gold luster in the protected areas and pleasantly smooth surface overall. A couple ticks below Liberty's chin are the only mentionable abrasions. Census: 20 in 58, 7 finer (7/15). NGC ID# 25XL, PCGS# 8362

**1891-CC Half Eagle, MS63
Late Carson City Issue**

- 6184 1891-CC MS63 NGC. Variety 2-A.** The large production exceeding 200,000 pieces for this late-series CC-mint half eagle issue makes examples available up to the Select grade of the present piece and upwards to the occasional Gem (one at PCGS, eight at NGC) (6/15). Scattered, mostly light abrasions and a moderately bold strike make for good eye appeal on the orange-gold surfaces of this piece. A few larger marks appear on the reverse, under the eagle's left (facing) wing. NGC ID# 25Y5, PCGS# 8378

1891-CC Five Dollar, Top-Notch MS63

- 6185 1891-CC MS63 PCGS. CAC. Variety 1-A.** Copious luster abounds on the sumptuous orange-red surfaces of this highly appealing 1891-CC half eagle, separating this coin from most survivors of the issue. The strike is sharp front and back and marks are few, further distinguishing this piece from its cohort. The CAC population in this MS63 grade is 26 with 14 finer (6/15). NGC ID# 25Y5, PCGS# 8378

- 6186 1893-CC AU55 PCGS. Variety 1-A.** The borders display ample bright luster, and the moderately marked lemon-gold surfaces are well defined. The 1893-CC has a mintage of only 60,000 pieces, and is scarcer than either the 1891-CC or 1890-CC. NGC ID# 25YB, PCGS# 8384

**1896-S Half Eagle, MS63
Lightly Patinated and Attractive**

- 6187 1896-S MS63 PCGS.** A fair mintage of 155,400 coins makes this an available San Francisco issue, but it becomes rare in Select Mint State or finer. Some chatter and minor abrasions in the left obverse field and on the portrait limit the grade of this boldly struck half eagle, which has splendid eye appeal and bountiful mint luster. Rich, honey-gold surfaces have a Mint-fresh quality. Rare this nice. Population: 7 in 63, 5 finer (6/15). NGC ID# 25YL, PCGS# 8393

- 6188 1897 MS64 PCGS.** The lustrous surfaces of this near-Gem display yellow-gold color imbued with hints of light green on the obverse and reddish-gold patina on the reverse. The design elements are sharply struck and each side reveals a few minor marks that prevent Gem classification. PCGS has certified only 30 pieces finer (7/15). NGC ID# 25YM, PCGS# 8394

**1901-S/S Half Eagle, MS66+
Intense Luster and Eye Appeal**

- 6189 1901-S/S FS-501 MS66+ NGC.** This *Cherrypickers'* variety is not as well-known as the overdate of this year, but is nonetheless intriguing. The mintmark is plainly punched over a previous, smaller S. As a date, the 1901-S half eagle is scarce in MS66, and anything finer is rare. This Plus-designated coin displays sharp detail and frosty yellow-gold luster. There are no mentionable abrasions. Census: 63 in 66 (6 in 66+), 11 finer (7/15). From *The College Collection, Part Two*. PCGS# 145025 Base PCGS# 8404

**1902 Half Eagle, MS65+
Conditionally Rare**

- 6190 1902 MS65+ PCGS.** The Mint State availability of the 1902 half eagle peaks in MS62 and MS63, and quickly begins to decline in finer grades. In MS65, this issue is rare and finer representatives are exceedingly so. This plus-graded Gem is sharply struck, with frosty orange-gold luster. Population: 24 in 65 (1 in 65+), 8 finer (7/15). NGC ID# 25YY, PCGS# 8405

**1904 Liberty Five, MS66+
Glowing Luster**

- 6191 1904 MS66+ PCGS.** A conditional rarity, among the finer-known 1904 Liberty half eagles. This Plus-designated Premium Gem exhibits bold design elements amid vibrant, frosty luster that enlivens each side in deep orange-gold hues. As the grade suggests, the surfaces are free of any mentionable imperfections. Population: 17 in 66 (1 in 66+), 5 finer (7/15). NGC ID# 25Z4, PCGS# 8409

**1906 Half Eagle, MS66
Exceptional Type Coin**

- 6192 1906 MS66 PCGS.** A bold strike and undisturbed mint luster combine for outstanding eye appeal, while only the occasional minuscule mark exists on the smoothly glowing surfaces. A short scrape beneath the eagle's left wing is the sole abrasion of note. The 1906 issue is an exceptional type selection in Premium Gem because so few examples are any finer — a fact that eludes many collectors. Population: 28 in 66 (1 in 66+), 4 finer (6/15). NGC ID# 25Z9, PCGS# 8413

**1906 Half Eagle, MS66+
Among the Finest Known**

- 6193 1906 MS66+ PCGS. CAC.** The 1906 issue is an unrecognized condition rarity among the late-date Liberty fives. Remarkably few high Mint State coins are known from the moderate mintage of 348,735 pieces. This satiny, highly lustrous example is among the finest seen by PCGS. Only a few minor marks are dispersed over the brilliant-gold surfaces. Fully struck, the present example is the sole MS66 coin to receive the PCGS Plus designation. Population: 1 in 66+, 4 finer (7/15). NGC ID# 25Z9, PCGS# 8413

**1907 Half Eagle, MS66
Few Known Finer**

- 6194 1907 MS66 NGC.** A beautifully preserved Premium Gem example of this late-series Liberty half eagle, ideal for type representation. The strike is sharply rendered throughout the stars and central devices, and the frosty yellow-gold surfaces are free of distracting abrasions. Census: 40 in 66 (3 in 66+, 2 in 66 ★), 12 finer (6/15). NGC ID# 25ZC, PCGS# 8416

- 6195 1908 MS65 NGC. CAC.** The final year of issue for the Liberty half eagle, and the only example of James Longacre's design that was minted that year as the other denominations were discontinued in 1907. This lovely Gem has frosty orange-gold luster and bold design motifs.
From The Glacier Collection. NGC ID# 25ZE, PCGS# 8418

PROOF LIBERTY HALF EAGLE

**1890 Liberty Half Eagle, PR62 Cameo
Ex: Trompeter**

- 6196 1890 PR62 Cameo NGC. Ex: Trompeter.** The 1890 proof Liberty half eagle is even more elusive than its reported mintage of 88 pieces would suggest. Probably no more than 20-25 examples are extant in all grades, including three coins in institutional collections. In addition, the Philadelphia Mint business-strike mintage of half eagles was a paltry 4,240 pieces in 1890, putting significant pressure on the small supply of proofs from date collectors.

The present coin is an attractive proof, with frosty, sharply detailed design elements throughout. The date is diagnostically positioned to the left, with the left edge of 1 over the left edge of a dentil. The fields are deeply mirrored, providing desirable cameo contrast with the devices. A few minor hairlines and contact marks are evident, but the overall presentation is most appealing. Census: 1 in 62 Cameo, 14 finer (5/15).

Ex: Ed Trompeter Collection; Heritage Auctions, circa 1998; private collection.

From The Ed Trompeter Collection of Proof \$5 Liberties. NGC ID# 28CU, PCGS# 88485

INDIAN HALF EAGLES

- 6197 1908 MS63 PCGS.** The lustrous surfaces of this Select half eagle display greenish-gold patina. The design features are well-struck, including fairly strong detail in the eagle's shoulder feathers. There are fewer and less severe marks than what might be expected for the grade designation. This will be a great coin for a type collection.
From The Badger Collection. NGC ID# 28DE, PCGS# 8510

6198 1908 MS64 NGC. The vivid orange-gold surfaces of this attractive Choice specimen show a few highlights of rose, with vibrant mint luster on both sides. The design elements are well-detailed and a few scattered contact marks are not distracting. NGC ID# 28DE, PCGS# 8510

6199 1908 MS64 PCGS. The 1908 Indian half eagle is moderately available, as numerous pieces were set aside at the time of issue as first-year mementos. This Choice example is suitable for date or type purposes, and is sharply struck with satiny yellow-gold luster. A few light, scattered abrasions are in keeping with the grade. NGC ID# 28DE, PCGS# 8510

1908 Five Dollar, MS64 High-End Introductory Representative

6200 1908 MS64 PCGS. CAC. The heavily minted and saved 1908 half eagles are collectible through the Choice grade level. Gems are scarce and can easily realize five figures at auction, placing them out of the reach of most enthusiasts. This delightful near-Gem offers attractive orange-gold surfaces with a fully struck obverse and boldly detailed reverse that shows the usual incompleteness on the eagle's shoulder. Minimally marked and high-end for the grade. NGC ID# 28DE, PCGS# 8510

6201 1909 MS64 NGC. This sharply detailed Choice specimen offers vivid greenish-gold surfaces with vibrant mint luster and just a few minor signs of contact. Eye appeal is outstanding. NGC has graded 59 numerically finer examples (7/15). NGC ID# 28DH, PCGS# 8513

6202 1909 MS64 NGC. CAC. Sharply detailed design elements and vibrant mint luster are the calling cards of this attractive Choice specimen, with pleasing orange-gold surfaces that show few signs of contact. NGC has graded 59 numerically finer examples (7/15). *From The Badger Collection.* NGC ID# 28DH, PCGS# 8513

1909-S Five Dollar, MS62 Seldom Seen in Mint State

6203 1909-S MS62 NGC. Despite a mintage of nearly 300,000 coins, the 1909-S half eagle is a better date in Uncirculated grades, particularly above MS62. This piece is lightly abraded, but displays satiny olive-gold luster with hints of peach in the recesses. The strike is well-executed and the overall eye appeal is pleasing for the grade. Census: 73 in 62, 18 finer (6/15). NGC ID# 25ZL, PCGS# 8516

6204 1910 MS63 PCGS. Orange-gold dominates, but sea-green toning emerges throughout. This nicely struck representative is essentially unabraded except for a thin mark on the lowest headdress feather. Housed in a green label holder. *From The Badger Collection.* NGC ID# 28DK, PCGS# 8517

1910-S Half Eagle, MS62 Better San Francisco Issue

6205 1910-S MS62 NGC. The 1910-S Indian five is similar in Mint State rarity to its 1909-S counterpart, seldom seen finer than MS62. Most of the 770,200-coin mintage experienced light circulation, with the result that a significant number of XF and AU coins are known today. This Mint State piece is lightly abraded, but shows sharp detail and satiny olive-gold luster. NGC lists 34 numerically finer examples (6/15). NGC ID# 28DM, PCGS# 8519

6206 1911 MS64 NGC. This attractive Choice example offers sharply detailed design elements and vibrant mint luster on both sides, with bright orange-gold surfaces that show a few scattered minor contact marks. NGC ID# 28DP, PCGS# 8520

1911 Half Eagle, Choice MS64 Notably Smooth Fields

6207 1911 MS64 PCGS. CAC. An exceptionally clean coin for the grade, this Choice 1911 Indian half eagle is completely devoid of distracting abrasions. The only grade-limiting factors appear to be a few faint lines in the reverse fields and evidence of light contact on the Indian's cheek. The strike is sharp and the frosty surfaces showcase warm straw-gold luster. Few pieces are certified finer. NGC ID# 28DP, PCGS# 8520

6208 1911-D AU50 NGC. The 1911-D half eagle is grade far rarer than its quarter eagle counterpart, although it is less celebrated since it shares "key status" with other issues in its series. This piece is housed in a "no line fatty" old-style NGC holder, showing good eye appeal. The wheat-gold surfaces show the light wear expected, but most of the abrasions are confined to the reverse. NGC ID# 28DR, PCGS# 8521

1911-D Half Eagle, AU55
Lightly Abraded for the Issue
Difficult to Locate in Mint Condition

- 6209 1911-D AU55 PCGS. CAC.** The 1911-D half eagle comes from a low mintage of 72,500 pieces. It is not particularly scarce in circulated grades but Mint State examples are difficult to come by, and are very elusive above MS62. This Choice AU offering displays wheat-gold surfaces with traces of luster in the recessed areas of the well-defined design features. Minute marks are within the parameters of the grade designation, and are fewer and less severe than normally seen on this heavily abraded issue. NGC ID# 28DR, PCGS# 8521

1912-S Indian Half Eagle, MS62
Seldom Encountered in High Grade

- 6210 1912-S MS62 PCGS.** A moderate mintage of 392,000 Indian half eagles was accomplished at the San Francisco Mint in 1912, but few examples were saved by contemporary collectors. As a result, the 1912-S is one of the most difficult issues of the series to locate in high grade. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. Population: 92 in 62 (1 in 62+), 34 finer (7/15). NGC ID# 25ZN, PCGS# 8524

1913-S Half Eagle, Strong MS62
Better Date in the Series

- 6211 1913-S MS62 NGC.** The Bela Lyon Pratt design for quarter and half eagles is notoriously difficult to grade and collect due to the uniqueness of the sunken-relief design. At first glance this sharply struck 1913-S coin appears too good to be an MS62, though close inspection of the reverse shows the shallow marks that prevent a higher grade. Still a great coin for arm's-length eye appeal. NGC ID# 25ZP, PCGS# 8526

1913-S Half Eagle, MS62
Ex: Richmond Collection

- 6212 1913-S MS62 NGC.** The 1913-S has a reasonable mintage of 408,000 pieces, but like other San Francisco Indian five dollar issues, is surprisingly scarce in Mint State. A majority of certified examples are in XF and AU grades, since the hard money tradition of the West Coast continued into World War I. This coruscating apricot-gold representative displays scattered small abrasions, though only a graze on the upper lip merits mention. *Ex: Richmond Collection, Part 1 (David Lawrence, 7/2004), lot 1544, which realized \$2,415.* NGC ID# 25ZP, PCGS# 8526

- 6213 1914 MS63 PCGS.** Bright orange-gold luster endows both sides of this Select half eagle. The design elements are sharply struck throughout and the few scattered marks are within the parameters of the grade designation. *From The Badger Collection.* NGC ID# 28DU, PCGS# 8527

1914 Five Dollar, High-End MS64+

- 6214 1914 MS64+ PCGS. CAC.** The Philadelphia and Denver Mints each coined 247,000 Indian Head half eagles in 1914. The 1914-D is scarcer in high grades, but both issues are among the more available in the series. Only in Gem condition does the 1914 become rare. This Plus-designated near-Gem is sharply struck with frosty rose and orange-gold surfaces. Minimally marked with phenomenal eye appeal. PCGS reports just 32 finer submissions. NGC ID# 28DU, PCGS# 8527

- 6215 1915 MS63 PCGS. CAC.** This pleasing Select specimen displays sharply detailed design elements and vibrant mint luster throughout. The orange-gold surfaces show a few minor signs of contact that do not detract from the outstanding eye appeal. *From The College Collection, Part Two.* NGC ID# 28DX, PCGS# 8530

**1915 Half Eagle, Sharply Struck MS65
No Examples Certified Finer**

6216 1915 MS65 PCGS. The 1915 half eagle is a readily available issue through near-Gem, after which the population declines significantly. PCGS and NGC have certified a total of 89 Gem examples and none finer. The current MS65 offering displays yellow- and orange-gold surfaces that give off intense luster. Sharply struck design elements and impeccable preservation further enhance the coin's pleasing eye appeal. Population: 50 in 65 (5 in 65+), 0 finer (7/15). NGC ID# 28DX, PCGS# 8530

6217 1915-S AU58 PCGS. Wheat-gold with honey accents and pale sparkling beauty. Though a touch of rub affects the surfaces, the overall visual appeal remains strong on this late-date five. *From The College Collection, Part Two.* NGC ID# 25ZR, PCGS# 8531

EARLY EAGLES

**1797 Large Eagle Ten, BD-2, VF Details
Well-Detailed**

6218 1797 Large Eagle, BD-2, High R.4 — Tooled — PCGS Genuine. VF Details. Bass-Dannreuther Die State b/b, cracked through the final 7 in the date. BD-2 is a scarce variety with fewer than 100 examples believed known in all grades. This piece shows bright green-gold patina with sufficient detail for the VF level. The fields on each side show extensive tooling, and there are several curving scratches on the obverse through the upper hair curls and in the field right of the nose. An affordable Large Eagle type coin. PCGS# 45717 Base PCGS# 8559

**1801 BD-2 Eagle, Unc Details
Rare Early Die State**

6219 1801 BD-2, R.2 — Repaired — PCGS Genuine. Unc Details. The vast majority of 1801 BD-2 eagles have prominent vertical lines in Liberty's cap, while only a few examples like the present piece were struck before the accident creating those lines. This is an extremely important opportunity for the advanced variety and die state specialist. The surfaces are brilliant green-gold with light hairlines and other impairments of little concern. An attractive and highly important early eagle. PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

**1838 Liberty Eagle, XF40
Scarce First-Year Issue**

6220 1838 XF40 PCGS. The introduction of Gobrecht's Liberty Head motif on gold coinage in 1838, was also the reintroduction of the eagle denomination, coinage of which had been suspended since 1804. The 1838 Liberty eagle had a mintage of only 7,200 coins, and it is believed that fewer than 100 pieces are extant in all grades. This collector-grade example retains sharp detail with small tinges of luster in the protected areas near the rims. Both sides are otherwise consistently toned in original green-gold hues. Population: 13 in 40, 49 finer (6/15). NGC ID# 262D, PCGS# 8575

**1839 Liberty Eagle, AU50
Two-Year Type of 1838**

6221 1839/8 Large Letters AU50 NGC. The "Type of 1838" Liberty eagle is identified by the more scalloped appearance of the bust truncation and subtle differences in Liberty's hair. The type was only struck during 1838 and 1839, with the 1839 mintage reported as 25,801 pieces. This lightly circulated yellow-gold example displays lustrous, minimally abraded surfaces. NGC ID# 262E, PCGS# 8576

**1839/8 Liberty Ten, AU55+
Head of 1838**

- 6222 1839/8 Large Letters AU55+ NGC.** The Large Letters 1839 Liberty ten is more easily differentiated from its Small Letters counterpart by the obverse portrait. The stylized, artistic rendering of Liberty seen on the 1838 issue was employed for the first 25,801 eagles coined in 1839, after which the final 12,447 pieces were struck with the modified portrait that would endure until 1907. This Head of 1838 example displays sharp detail with the appropriate high-point wear for the grade. Bright yellow-gold surfaces yield hints of luster in the protected areas. Census: 17 in 55 (1 in 55+★), 40 finer (6/15). NGC ID# 262E, PCGS# 8576

**1841 Eagle, Appealing AU58
Reflective Surfaces**

- 6223 1841 AU58 NGC.** Although more than 63,000 examples of the 1841 eagle were struck, Mint State examples are seldom seen, and to a lesser degree than the inflated population data might imply. This AU58 piece displays splendid, somewhat prooflike reflectivity on lemon-yellow surfaces that show mostly light field chatter with a few scattered larger marks. Extremely appealing. Census: 16 in 58, 14 finer (7/15). NGC ID# 262H, PCGS# 8582

1842-O Eagle, Lustrous AU53

- 6224 1842-O AU53 PCGS. Variety 2.** Orange-gold surfaces exhibit lots of lively luster on this 1842-O eagle, a rarity in AU or finer grades. Only 27,400 were struck, and most survivors today are VF to low XF. A loupe reveals scattered small to medium marks that account for the grade, but there are none worthy of singling out. Population: 12 in 53, 20 finer (7/15). NGC ID# 262N, PCGS# 8587

- 6225 1843 AU50 PCGS.** Bright, almost flashy surfaces show pale lemon-gold and straw-gold shadings. Well-defined with faint abrasions and wear largely concentrated at the high points. Population: 20 in 50, 10 finer (7/15). NGC ID# 262P, PCGS# 8588

**1843 Liberty Eagle, AU53
Surprisingly Elusive Issue**

- 6226 1843 AU53 PCGS.** Despite an adequate mintage of 75,462 pieces, the 1843 Liberty eagle is surprisingly difficult to locate, especially in high grade. This impressive AU53 example is lightly worn and moderately abraded, with light greenish-gold surfaces that retain traces of original mint luster. Population: 5 in 53, 5 finer (7/15). NGC ID# 262P, PCGS# 8588

- 6227 1843/1843 AU53 NGC. Breen-6861, VP-001.** The entire date was lightly repunched north of the initial impression, identifying this NGC Variety Plus variant. This lightly worn AU53 specimen retains much of its original mint luster and shows only minor signs of contact. Census for VP-001: 3 in 53, 3 finer (7/15). NGC ID# 262P, PCGS# 8588

- 6228 1847-O AU58 PCGS. Variety 2.** Scattered abrasions are mostly minor, save for one larger hit under the eagle's beak. The surfaces host much luster and lively reflectivity under the light field chatter. A nice example of this early O-mint ten. Population: 13 in 58 (1 in 58+), 12 finer (7/15). NGC ID# 2632, PCGS# 8598

- 6229 1849 AU55 NGC. Breen-6867, VP-002.** The entire date was repunched northeast of the initial impression, identifying the NGC Variety Plus-002 variant. This Choice AU specimen is lightly worn and lightly abraded, with still-lustrous yellow and greenish-gold surfaces. Census for VP-002: 2 in 55, 3 finer (7/15). NGC ID# 2635, PCGS# 8601

**1849-O Ten Dollar, AU55
Elusive New Orleans Issue**

- 6230 1849-O AU55 NGC. Variety 2.** A better grade orange-gold example. Lightly abraded aside from a thin mark below the T in UNITED. Despite a scant mintage of 23,900 pieces, two die marriages exist for the 1849-O, with or without a circular "ring" atop the second vertical shield stripe. The present piece is the sans ring variety. Census: 17 in 55, 8 finer (6/15).

Ex: FUN Signature (Heritage, 1/2009), lot 5521, which realized \$8,050. NGC ID# 2636, PCGS# 8602

- 6231 1850 Large Date AU53 NGC.** The Large Date is the usual variety of 1850 eagles, seen about three times as often as the Small Date. Distinct green-gold surfaces retain traces of luster on this pleasing, lightly worn gold piece. NGC ID# 2637, PCGS# 8603

1850 Small Date Eagle, MS61
Rare in Mint State

6232 1850 Small Date MS61 NGC. A “very scarce and under-appreciated, major variety” according to Garrett and Guth, who highlight the Small Date variant of the 1850 eagle as “an apparent mistake,” by claiming “the Small Date punch was intended for large cents and half eagles.” Indeed, on this MS61 example, the date seems small and lost in the roomy exergue. The present moderately abraded example displays radiant yellow-gold color with softness on most of the peripheral stars but better definition at the central devices. Mint luster flows across both sides. A minor alloy spot appears over the eagle’s left (facing) wing. For the variety, Census: 4 in 61, 0 finer (7/15).

Ex: *Boston Signature (Heritage, 8/2010)*, lot 3549. NGC ID# 2638, PCGS# 8604

1852-O Liberty Eagle, AU55
Undervalued Branch Mint Rarity

6233 1852-O AU55 PCGS. Variety 2. The 1852-O Liberty eagle is an underrated issue from a small mintage of 18,000 pieces. Probably no more than 80-90 examples are extant in all grades and Mint State coins are very rare. This Choice AU example shows just a trace of wear on the well-detailed design elements and the lightly abraded greenish-gold surfaces show traces of prooflike reflectivity in sheltered areas. Population: 13 in 55, 4 finer (7/15). NGC ID# 263D, PCGS# 8609

1853/2 Liberty Head Ten, MS60
FS-301, Mint State Rarity

6234 1853/2 MS60 PCGS. FS-301. A *Cherrypickers'* variety, recognized by both PCGS and NGC, and a listed *Guide Book* entry. Some numismatists question whether the slender curved lines that appear near the lower ball of the 3 is actually an underdigit 2, but the presence of something there is undeniable and for now the accepted theory is the overdate. The present coin displays attractive medium-gold color and bright mint luster throughout both sides. Sharply struck, although scattered light abrasions determine the grade. Extra metal beneath the date on the rim suggests the coin was struck with a loose collar. Examples are rare in Uncirculated condition, with both PCGS and NGC reporting two Mint State examples. Population: 1 in 60, 1 finer (6/15). NGC ID# 263E, PCGS# 8611

1854 Eagle, AU58
Seldom Encountered Finer

6235 1854 AU58 PCGS. From a mintage of 54,250 pieces, the 1854 Liberty eagle is a scarce date in all grades, and high-grade examples are very rare. This attractive near-Mint piece shows just a touch of friction on the well-detailed design elements and the pleasing peach-gold surfaces are lightly abraded. Population: 15 in 58, 8 finer (7/15). NGC ID# 263G, PCGS# 8613

6236 1854-S AU50 PCGS. Light wear on the yellow-gold surfaces of this S-mint ten dollar does little to diminish the detail of the design elements. Numerous distributed light marks are apparent on each side. The 1854-S eagle is the first coin of this denomination struck at the San Francisco Mint, and is a major rarity in mint condition. Population: 63 in 50, 82 finer (7/15). NGC ID# 263K, PCGS# 8615

**1854-S Eagle, Choice AU
Popular First-Year Issue**

6237 1854-S AU55 NGC. After years of demand for a branch mint on the West Coast, the San Francisco facility opened in April 1854 and coined 123,826 eagles in its first year of operation. Examples are relatively available in circulated grades, but they become scarce in AU and very rare in Uncirculated condition. This Choice AU example offers bright yellow-gold surfaces with well-struck devices. Die cracks connect the reverse legends, and abrasions are peppered throughout. NGC ID# 263K, PCGS# 8615

6238 1855 AU58 PCGS. The yellow-gold surfaces of this near-Mint ten dollar display luster in the protected areas. The design features are well-defined save for the usual softness in some of the star centers. What few marks that are present are within the confines of the grade designation and do not detract. The 1855 ten dollar is elusive in mint condition. Population: 25 in 58, 21 finer (7/15). NGC ID# 263L, PCGS# 8616

6239 1857 AU50 PCGS. CAC. Breen-6925. Housed in a PCGS Regency holder. A bold, thin, and slightly curved raised line connects the 5 in the date to the bottom of the crosslet of the 7. Breen considered this to be an overdate, but was uncertain of what digit this errant die line represented. Regardless of its overdate status, the 1857 is a much better date. Only 16,606 pieces were struck. This problem-free piece has bold details and ample radiant luster. Population: 22 in 50, 17 finer (7/15).
Ex: FUN Signature Sale (Heritage, 1/2004), lot 7780. NGC ID# 263T, PCGS# 8622

**1858-O Eagle, Near-Mint
Low-Mintage New Orleans Issue**

6240 1858-O AU58 PCGS. Variety 1. A mintage of just 20,000 pieces confirms the scarcity of the 1858-O. Most certified examples are in XF or AU grades. The present Borderline Uncirculated No Motto New Orleans ten has a bold strike and minimally marked caramel-gold surfaces. Thorough rotation reveals minor hairlines. Population: 13 in 58 (1 in 58+), 7 finer (6/15). NGC ID# 263X, PCGS# 8626

1861 Eagle, Appealing MS62

6241 1861 MS62 PCGS. A large mintage of 113,164 Liberty eagles was accomplished in 1861, the first year of the Civil War. Most coins seen today are heavily circulated, and Mint State examples are rare. This sharply detailed MS62 specimen is a pleasing exception, displaying strong mint luster and appealing green and rose-gold surfaces. Population: 10 in 62 (1 in 62+), 4 finer (6/15).
Ex: Summer FUN Signature (Heritage, 7/2012), lot 4995. NGC ID# 2647, PCGS# 8633

**1861-S Ten Dollar, AU53
Heavily Circulated S-Mint Issue**

6242 1861-S AU53 PCGS. The California mint increased eagle production by 10,500 coins or 210% between 1860 and 1861. Garrett and Guth suggest the increase likely reflects increased demand for smaller denomination gold coins, which were in short supply compared to the mass-produced S-mint double eagles. The 1861-S was a commercial workhorse and is usually seen in VF to XF condition. About Uncirculated survivors are rare. This is a lightly abraded example with partial luster remaining in the recesses. Light green-gold surfaces show well-struck devices with minor friction. Population: 6 in 53, 9 finer (7/15). NGC ID# 2648, PCGS# 8634

**1865-S Liberty Eagle, VF35
Elusive Low-Mintage Issue**

6243 1865-S VF35 PCGS. Only 16,700 Liberty eagles were struck at the San Francisco Mint in 1865, making the issue quite elusive in all grades. This pleasing Choice VF specimen shows some light wear on the hair above the coronet and the curl beneath the ear is worn but well-defined. The lightly abraded surfaces retain traces of original mint luster. Population: 3 in 35, 9 finer (7/15). NGC ID# 264G, PCGS# 8642

1866 With Motto Ten, AU50
First Year of Issue

- 6244 1866 AU50 PCGS.** The first-year 1866 With Motto eagle has a low mintage of only 3,750 circulation-strike coins, and it is a rarity in all grades. This pleasing AU50 example has light yellow surfaces with faint field reflectivity on both sides. An exceptional opportunity. Population: 10 in 50, 8 finer (7/15). NGC ID# 264J, PCGS# 8649

1869-S Ten Dollar, AU55
Scarce in All Grades

- 6245 1869-S AU55 PCGS. CAC.** From a mintage of 6,430 coins, perhaps only 60 to 75 pieces survive in all grades. Mint State examples of this San Francisco issue are extremely rare with the finest grading only MS61. This Choice AU representative is among the finest typically seen. Both sides retain excellent detail and display hints of luster in the protected regions. Deep olive-gold patina show coppery overtones around the borders. Population: 5 in 55, 5 finer (6/15). NGC ID# 264S, PCGS# 8656

1871-CC Ten Dollar, VF35
Challenging Early CC Issue

- 6246 1871-CC VF35 PCGS. Variety 1-A.** The 1871-CC is a sought-after early Carson City issue, boasting an enticingly low mintage of 8,085 coins. Perhaps only about 100 examples survive in all grades. This Choice VF example shows moderate detail, with bright yellow-gold patina on both sides. A few light marks and abrasions are as expected for the grade. Population: 5 in 35, 50 finer (7/15). NGC ID# 264X, PCGS# 8661

1876-S Liberty Eagle, XF45
Low-Mintage Branch Mint Issue

- 6247 1876-S XF45 PCGS.** The 1876-S Liberty eagle boasts a low mintage of just 5,000 pieces, making it scarce-to-rare in all grades. This attractive Choice XF specimen retains most of its interior design detail and the lightly abraded greenish-gold surfaces show traces of original mint luster. Population: 21 in 45, 18 finer (7/15). NGC ID# 265E, PCGS# 8676

1880-O Eagle, Reflective AU55
Rare in Mint State

- 6248 1880-O AU55 NGC. Variety 1.** A meager 9,200 1880-O eagles were struck, and today Mint State examples are quite elusive. This Choice AU coin shows considerable luster remaining on wheat-gold surfaces. Some reflectivity shows in the fields, amid scattered marks that explain the grade but do not defeat the strong eye appeal. NGC ID# 265U, PCGS# 8689

1881-O Eagle, MS60
Low-Mintage New Orleans Issue

- 6249 1881-O MS60 PCGS. Variety 1.** A meager mintage of 8,350 pieces ensures the rarity of the 1881-O. All examples entered commerce, since the few gold collectors of the day purchased proofs. As of (6/15), PCGS has certified only four examples as Mint State, including the present lemon-gold example. It has a bold strike, substantial luster, and the expected number of abrasions on the left obverse field. NGC ID# 265Y, PCGS# 8693

- 6250 1882-S MS62 PCGS.** Yellow-gold and rose patina bathes both sides of this S-mint eagle, and some interruptions in the luster flow are evident due to scattered abrasions. The design elements are sharply defined. A squiggly lintmark extends from Liberty's chin into the field. MS62 is the highest grade that most collectors will encounter, and even that will require diligent searching. Population: 80 in 62, 15 finer (7/15). NGC ID# 2665, PCGS# 8698

- 6251 1883-S MS61 PCGS.** The 1883-S ten dollar from a production of only 38,000 pieces is an underrated date in the Liberty Head eagle series. The orange-gold surfaces of this offering are imbued with traces of soft green, and the design elements are well-impressed. Distributed marks determine the grade. This issue is very difficult to locate in Mint State grades. Population: 23 in 61, 24 finer (7/15). NGC ID# 2669, PCGS# 8702

**1884-CC Eagle, Choice AU
Only 9,925 Pieces Coined**

- 6252 1884-CC AU55 ANACS. Variety 1-A.** A minimally marked and mildly glossy lemon-gold example of this rare Carson City issue. All '84-CC tens have bold die lines on Liberty's neck and coronet, perhaps from damage to the obverse die during its cross-country shipment from Philadelphia. Just 9,925 pieces were issued. In a small-sized holder.

Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 2086, which realized \$2,760. NGC ID# 266B, PCGS# 8704

- 6253 1888 MS62 PCGS.** Trivial marks are consistent with the grade of this scarce issue. This piece is far finer than the average certified example that grades AU58. Both sides have frosty luster and brilliant yellow-gold surfaces. Population: 39 in 62, 8 finer (7/15). NGC ID# 266K, PCGS# 8712

- 6254 1888-S MS63+ PCGS. CAC.** The 1888-S Liberty eagle is very rare in grades above the MS63 level. This high-end Select example displays lustrous orange-gold surfaces with a few scattered minor contact marks and sharply defined design elements. PCGS has graded three numerically finer examples (7/15). NGC ID# 266M, PCGS# 8714

**1889 Ten Dollar, MS61
Semiprooflike Fields**

- 6255 1889 MS61 NGC.** The 1889 eagle had a scant mintage of only 4,440 pieces, of which few survive in Mint State. This MS61 coin is lightly abraded, but only a couple marks on the cheek are worthy of mention. The strike is bold and the fields exhibit gleaming semiprooflike reflectivity. Census: 27 in 61, 8 finer (7/15). NGC ID# 266N, PCGS# 8715

**1890-CC Eagle, Red-Orange MS62
Seldom Seen in Higher Grades**

- 6256 1890-CC MS62 PCGS. Variety 1-A,** the sole dies known for the small mintage of 17,500 coins, showing the first C in the mintmark noticeably higher than the second C. Lovely reddish-orange color highlights the surfaces throughout, amid scattered, mostly light abrasions that determine the grade. The MS62 level is the highest at which this low-mintage issue is readily available. Population: 51 in 62 (1 in 62+), 6 finer (6/15). NGC ID# 266S, PCGS# 8718

- 6257 1891-CC AU55 NGC. Variety 1-A.** An attractive Choice AU specimen of this popular branch mint type coin, with lightly abraded greenish-gold surfaces and well-detailed design elements that show just a touch of high-point wear. NGC ID# 266U, PCGS# 8720

**1892-CC Ten Dollar, AU58
Scarce Carson City Issue**

- 6258 1892-CC Triple Die Reverse, FS-801, AU58 NGC.** A crisply struck canary-gold Liberty ten with moderate obverse marks. Luster is abundant throughout the peripheries and motifs. IN GOD WE TRUST is die tripled, as always for this penultimate Carson City issue. Just 40,000 pieces were struck.
Ex: Long Beach Signature (Heritage, 5/2012), lot 5152. PCGS# 511600 Base PCGS# 8722

- 6259 1892-O MS62 PCGS. Variety 1.** The 1892-O has a low mintage of 28,688 pieces. Approximately 1,000 pieces were exported to foreign banks and survived the U.S. gold recall, but those coins are abraded from indifferent storage. The issue is rare above the MS62 level. The present sun-gold example has good luster and moderate field marks. The strike is sharp except on star 13. NGC ID# 266X, PCGS# 8723

- 6260 1892-O MS62 PCGS. Variety 1.** As of (6/15), NGC and PCGS combined have certified 934 '92-O tens in Mint State. Of those, just 8 are graded MS63 or MS63+ with none finer. Thus, the MS62 grade is the highest that most collectors can hope to obtain. The present lustrous pumpkin-gold example has a narrow band of aquamarine on the obverse margin. Small marks below the hairbun and near the bust tip decide the grade. NGC ID# 266X, PCGS# 8723

- 6261 1892-O MS62 PCGS. Variety 1.** The low mintage 1892-O is collectible in introductory Mint State grades, but becomes a formidable condition rarity above the MS62 level. A radiant pumpkin-gold example with scattered field marks. The later die state with delicate cracks between the 92 in the date, and across much of the reverse periphery. NGC ID# 266X, PCGS# 8723

- 6262 1893 MS64 NGC.** It is our opinion that this Choice Mint State 1893 eagle should be awarded the PL or Prooflike designation at NGC. Both sides of this sharply detailed and brilliant yellow-gold example have fully mirrored fields and lustrous devices that display excellent contrast. NGC ID# 266Z, PCGS# 8725

1897 Ten Dollar, MS65
Lustrous, Fresh Mint Frost

- 6263 1897 MS65 NGC.** Known as an available Philadelphia date, but the 1897 becomes notably scarce in Gem condition and rare any finer. This sharply struck example traps strong mint luster beneath shimmering mint frost on both sides. There are no objectionable marks on the fields or central devices, although the rims show some tiny nicks. Census: 22 in 65 (1 in 65+), 6 finer (6/15). NGC ID# 267D, PCGS# 8737

- 6264 1898 MS64 PCGS. CAC.** Delicate pink accents visit the yellow-gold surfaces of this near-Gem eagle from the later 19th century. A few light marks are no obstacle to the grade and the strike is solid. Population: 68 in 64 (1 in 64+), 11 finer (7/15). NGC ID# 267G, PCGS# 8740

1898 Liberty Ten, MS65
High-Grade Rarity

- 6265 1898 MS65 PCGS.** Whether some of the mintage was lost to the decades-later Gold Recall, or if a large hoard remains undiscovered either here or in Europe (doubtful), the scarcity of this issue in high grades has never been explained. The present example is an unquestioned Gem, with frosty, honey-gold surfaces and virtually no marks to be seen. The strike is full. PCGS has certified just 10 coins — this one included — in Gem condition, with one finer coin. Population: 10 in 65, 1 finer (7/15). NGC ID# 267G, PCGS# 8740

1901-S Liberty Ten, MS65
Vivid Color, Vibrant Luster

- 6266 1901-S MS65 PCGS. CAC.** From a mintage of 2.8 million pieces, this delightful Gem exhibits razor-sharp definition on all design elements and the well-preserved orange-gold surfaces radiate vibrant mint luster, with attractive hints of rose patina. Eye appeal is terrific.

From The Glacier Collection. NGC ID# 267S, PCGS# 8749

1904-O Ten Dollar, MS63
Conditionally Scarce

- 6267 1904-O MS63 PCGS. Variety 1.** Mint State 1904-O eagles exist largely in the MS60 to MS62 grade range. This Select example is above-average in quality, and finer pieces are rare. Satiny orange-gold luster illuminates minimally abraded surfaces and sharp central devices. Several obverse stars are weakly defined, not unusual for this New Orleans issue. Population: 81 in 63, 19 finer (7/15). NGC ID# 267Z, PCGS# 8756

- 6268 1906-D MS64 PCGS. CAC.** Frosty pinkish yellow-gold luster appears on both sides of this first-year Denver Mint eagle. Delicate peripheral green accents heighten the eye appeal. PCGS has only certified 28 finer examples (7/15). NGC ID# 2685, PCGS# 8760

- 6269 1907-D MS64 PCGS.** This is the second of just two Denver Mint Liberty eagles, and it is a condition rarity despite a mintage of just over 1 million coins. A few scattered marks are evident, with a thin scratch across part of the shield that prevents a higher grade and finest known status. Brilliant yellow-gold surfaces exhibit wisps of pale blue and orange color. Population: 55 in 64 (1 in 64+), 0 finer (7/15). NGC ID# 2689, PCGS# 8764

- 6270 1907-S MS62 PCGS.** The yellow-gold surfaces of this S-mint ten dollar gold piece retain a considerable amount of luster and exhibit sharply struck design elements. Distributed light marks determine the grade. The MS62 grade level is desirable for this issue as examples in finer grades are very challenging. Population: 49 in 62 (1 in 62+), 29 finer (7/15). NGC ID# 268A, PCGS# 8765

INDIAN EAGLES

- 6271 1907 No Periods MS62+ NGC.** The 1907 No Periods Indian eagle is always in demand as a first-year type coin. This high-end MS62 example offers well-detailed design elements and vibrant mint luster on lightly marked greenish-gold surfaces. NGC ID# 28GF, PCGS# 8852

**1907 Ten Dollar Gold, MS63
Without Motto or Periods**

6272 1907 No Periods MS63 PCGS. Charles E. Barber's (and Henry Hering's) changes to the Saint-Gaudens ten dollar gold design were a combination of legitimate production concerns and simple differences in design preference. Still, the 1907 No Period tens were generally well-produced although less artistic than the original design. This Select example is frosty and lustrous. A few tiny rim nicks are the most noticeable marks. The strike is bold on the eagle, although the lower headdress details are less pronounced. The attractive rich, yellow-gold color flashes green highlights amid the bright luster. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS63
Rich Original Color**

6273 1907 No Periods MS63 PCGS. Deep apricot-gold luster glows over the satiny surfaces of this Select No Periods Indian ten, revealing only light, scattered abrasions. The strike is sharp and the eye appeal is satisfactory for the grade. The 1907 No Periods eagle is the most plentiful No Motto issue in Mint State, ideal for type representation.
From The Badger Collection. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Eagle, MS64
Satiny and Well-Preserved**

6274 1907 No Periods MS64 NGC. Suitable for type purposes, this boldly struck, satiny No Motto Indian eagle shows smooth lemon-gold luster, devoid of all but a few trivial grazes on Liberty's cheek. The No Periods variety was the last of three different Indian eagle types for the year, and is also the most plentiful No Motto issue overall, benefiting from a mintage of nearly 240,000 pieces.
From The Badger Collection. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Indian Eagle, MS64
First Year of Design**

6275 1907 No Periods MS64 PCGS. An attractive Choice example of this popular first-year type coin, with well-detailed design elements and vibrant mint luster on both sides. The smooth orange-gold surfaces show highlights of rose and a few minor contact marks on the portrait. The fields are remarkably free of distractions and eye appeal is outstanding. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS64
Bright, Lustrous No Motto Type Coin**

6276 1907 No Periods MS64 PCGS. Three distinct types of the 1907 Indian eagle were struck as the Mint experimented with perfecting the design for mass production. The No Periods variant, offered here, is the most plentiful, being the final product of the engraving department's efforts. This Choice example is well-struck and displays deep apricot-gold patina. NGC ID# 28GF, PCGS# 8852

**1907 Indian Ten, MS65
No Motto, No Periods**

6277 1907 No Periods MS65 NGC. CAC. A beautiful lemon-gold and olive-green Gem. Lustrous and well struck. The fields are immaculate, as is the eagle, and only minor marks on the cheek prevent an even finer grade. The "No Periods" name is something of a misnomer, since periods separate the country name and denomination, though are absent between E PLURIBUS UNUM. Encapsulated in a prior generation holder. NGC ID# 28GF, PCGS# 8852

**1908 No Motto Eagle, MS63
Better Philadelphia Issue**

6278 1908 No Motto MS63 PCGS. The 1908 No Motto Indian eagle had a mintage of only 33,500 pieces and is proportionately scarce in the finer Mint State grades. This Select example is well-struck and displays original honey-gold luster with hints of lilac throughout. A few scattered abrasions are not bothersome.

From The Badger Collection. NGC ID# 28GH, PCGS# 8853

6279 1908-D No Motto AU58 PCGS. CAC. Just a touch of rub visits the high points of this yellow-gold No Motto ten. Ample luster remains in the well-protected, pleasingly preserved fields.
From The College Collection, Part Two. NGC ID# 28GH, PCGS# 8854

6280 1908-D No Motto AU58 PCGS. CAC. Considerable luster remains on the yellow-gold surfaces of this minimally abraded near-Mint No Motto ten dollar. The design elements are well-impressed. This is a nice-looking coin overall. This issue is most frequently seen in AU55 to MS62 grades. It is scarce to rare any finer (Fuljenz, 2010). NGC ID# 28GH, PCGS# 8854

**1908-D No Motto Ten, MS63
Seldom Seen Finer**

6281 1908-D No Motto MS63 NGC. The 1908-D ranks as the only No Motto branch mint issue. It is more plentiful in Mint State than its Philadelphia counterpart, benefiting from a production of 210,000 coins, but high-end examples are scarcer than are those of the 1907 No Periods issue. This Select representative exhibits satiny yellow-gold luster and well-defined relief elements. Scattered light abrasions are not individually significant. Census: 35 in 63, 50 finer (6/15).
From The Badger Collection. NGC ID# 28GH, PCGS# 8854

6282 1908 Motto MS63 PCGS. The orange-gold surfaces of this Select ten dollar are laced with hints of mint-green. The design features are well-struck, though the eagle's shoulder is a tad soft as typically seen. Some minute marks limit the grade.
From The Badger Collection. NGC ID# 28GJ, PCGS# 8859

**1908 With Motto Ten, MS64
Rich Original Luster**

6283 1908 Motto MS64 PCGS. Original, satiny surfaces yield shades of sun and lilac-gold luster, while the design elements are boldly rendered and the surfaces are free of any major abrasions. The 1908 With Motto Indian eagle is infrequently seen finer, making this Choice example an attractive acquisition for the budget-conscious collector. This outstanding coin is housed in a green label holder.
From The Birmingham Collection. NGC ID# 28GJ, PCGS# 8859

1908 With Motto Ten, Satiny MS64

6284 1908 Motto MS64 NGC. Superb original luster sets this straw-gold With Motto type coin aglow on each side, revealing only a few trivial abrasions limited to the high points of the motifs. The strike is well-executed and the eye appeal is excellent. This first-year With Motto issue is marginally available in this grade, but finer examples are elusive. NGC ID# 28GJ, PCGS# 8859

**1908 Motto Eagle, MS64+
Smooth, Minimally Marked Surfaces**

6285 1908 Motto MS64+ PCGS. The omission of IN GOD WE TRUST from the Saint-Gaudens ten and twenty dollar gold coins of 1907 and early 1908 was considered by prominent media outlets and religious organizations to be an act of blasphemy. Its elimination generated a year-long controversy that was only resolved when Congress passed a law mandating the motto's restoration on May 13, 1908. This With Motto ten dollar gold piece has smooth, orange-gold surfaces with hints of lavender coloration. Crisply impressed aside from minor softness on the lower headdress feathers and the eagle's wing. NGC ID# 28GJ, PCGS# 8859

6286 1908-D Motto MS62 NGC. Lustrous surfaces are somewhat fine grained, and exhibit sharply impressed design features, including good delineation on the Indian's hair. Peach-gold color enriches both sides, each of which reveals a few minute surface and rim marks.
Ex: Summer FUN (Heritage, 7, 2007), lot 2755.
From The Badger Collection. NGC ID# 28GK, PCGS# 8860

**1909 Indian Ten, MS63
Better Date in High Grade**

6287 1909 MS63 NGC. A pleasing, satiny example of this Philadelphia issue which is seldom seen finer. The devices are sharp and the bright, yellow-gold surfaces reveal minimal abrasions. The 1909 Indian eagle is infrequently seen in this grade and Choice examples are scarce; at the Gem level, this date becomes genuinely rare. *From The Badger Collection.* NGC ID# 28GM, PCGS# 8862

6288 1909-D MS62 PCGS. The orange-gold surfaces of this D-mint ten dollar display considerable luster and exhibit well-struck design features, save for the often-seen weakness in the hair above the Indian's forehead. Scattered minute marks determine the grade. The 1909-D is one of the most undervalued Indian Head eagles (Fuljenz, 2010). *From The Badger Collection.* NGC ID# 28GN, PCGS# 8863

**1909-D Eagle, Lustrous MS62
Attractive Rose and Khaki-Gold Color**

6289 1909-D MS62 PCGS. CAC. This is a lustrous, high-end Denver representative with wonderful aesthetic appeal. Rose hues complement khaki-gold coloration overall. Moderately granular surfaces show well-struck design elements with minor high-point incompleteness. Lightly abraded, as expected for the grade. The 1909-D has a low-mintage of just 121,540 coins, and examples are scarcely seen in higher grades. NGC ID# 28GN, PCGS# 8863

6290 1909-S — Altered Surfaces — PCGS Genuine. Unc. Details. The 1909-S can be located with little difficulty in AU grades, but is scarce in Mint State. This caramel-gold example is lustrous and nicely struck. Practically unabraded, and the eye appeal is excellent. The mintmark is nicely repunched, one of at least three different RPM varieties known for the issue. NGC ID# 28GP, PCGS# 8864

6291 1910 MS63+ NGC. The availability of this Philadelphia issue drops significantly between MS63 and MS64, and again at MS65. This Plus-graded Select example offers a sharp strike and satiny yellow-gold luster combined with surface quality that is nearly as appealing as that of its MS64 counterparts. NGC ID# 28GR, PCGS# 8865

6292 1910-D MS64 PCGS. This attractive Choice specimen displays sharply detailed design elements and well-preserved orange-gold surfaces with just a few scattered minor contact marks on both sides. Eye appeal is outstanding. NGC ID# 28GS, PCGS# 8866

**1910-S Indian Eagle, MS62
Scarce Issue in Higher Grades**

6293 1910-S MS62 PCGS. The 1910-S Indian eagle claims a substantial mintage of 811,000 pieces, but few high quality examples were saved and the issue is scarce in grades above the MS62 level. This attractive piece offers well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 268D, PCGS# 8867

**1910-S Ten Dollar, MS62
Frosty Green and Rose Surfaces**

6294 1910-S MS62 PCGS. CAC. The San Francisco facility manufactured 811,000 eagles in 1910, and examples are much scarcer in Uncirculated condition than their Philadelphia and Denver counterparts. Beautiful green and rose coloration adorns this frosty example. Well-detailed motifs exhibit trivial blending over Liberty's hair strands and the eagle's breast feathers. The green CAC sticker affirms the quality of this minimally abraded 1910-S ten dollar gold coin. NGC ID# 268D, PCGS# 8867

1910-S Ten Dollar, Well-Struck MS63

6295 1910-S MS63 PCGS. The 1910-S Indian Head ten dollar can be located with minimal difficulty through the MS62 level of preservation. The population drops to about 130 coins in MS63 and fewer than 60 pieces in higher grades. The lustrous peach and yellow-gold surfaces of the present Select offering display some hints of light green and yield well-struck devices. A few darker-green toning spots are also noted. PCGS has seen 32 coins finer (7/15). NGC ID# 268D, PCGS# 8867

6296 1911 MS64 PCGS. Mass exportation makes the 1911 an obtainable issue through MS64. This Choice example displays luminous sun-gold color with exceptionally well-preserved fields. Only the exposed areas show small grade-limiting abrasions. Crisply struck with minor softness over the lower headdress and eagle's shoulder. NGC ID# 28GT, PCGS# 8868

6297 1911 MS64 PCGS. The orange-gold surfaces of this near-Gem display whispers of rose and possess strong luster. The design elements are well-struck, and the few marks that are present just barely preclude a Gem classification. This is the highest grade that can be encountered with minimal difficulty; finer pieces are challenging. *From The Badger Collection.* NGC ID# 28GT, PCGS# 8868

6298 1911-D AU50 PCGS. This challenging Denver issue remains collectible in AU condition, and this piece is pleasant for the grade. The strike is sharp and the devices show minimal wear. Both sides are deeply orange-gold and the only mentionable abrasion is an old scratch on Liberty's cheek. A bit of verdigris is tucked away near the eagle's right (facing) talon. Housed in a green label holder. NGC ID# 28GU, PCGS# 8869

6299 1911-D AU50 PCGS. Brilliant lemon-yellow surfaces show minimal handling marks on either side. An attractive, lightly circulated example housed in a green-label PCGS holder. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, MS61 Scarcely Seen Finer

6300 1911-D MS61 NGC. Gold production at the Denver Mint in 1911 was primarily focused on the double eagle, with the result that this issue is either a key or semikey date in every Indian Head gold series. This 1911-D eagle is a seldom seen Mint State survivor from a mintage of only 30,100 coins. The strike is sharp and the surfaces yield satiny yellow-gold luster with scattered abrasions called for by the grade. NGC ID# 28GU, PCGS# 8869

6301 1911-S AU53 NGC. A luminous orange-gold example with considerable luster shining in the protected areas. Wear appears mostly on the high points and the overall eye appeal is pleasing for the AU53 grade. NGC ID# 28GV, PCGS# 8870

6302 1914 MS63 NGC. The pleasing orange-gold surfaces of this attractive Select example radiate vibrant mint luster and show just a few scattered contact marks on both sides. The design elements are well-detailed and eye appeal is quite strong. *From The Badger Collection.* NGC ID# 28H2, PCGS# 8875

6303 1914-D MS63 PCGS. A pumpkin-gold and apple-green Select example. Crisply struck and lustrous with a modicum of marks. The final Denver Mint issue of the denomination until the 1984 Olympic commemorative. Encapsulated in a green label holder. *From The Badger Collection.* NGC ID# 28H3, PCGS# 8876

1914-S Indian Eagle, MS62

6304 1914-S MS62 NGC. From a mintage of 208,000 pieces, the 1914-S Indian eagle is of only median rarity in the series, making it equally suitable for series specialists and type collectors. This attractive MS62 example exhibits well-detailed design elements and vivid orange and rose-gold surfaces that show some scattered minor contact marks on both sides. NGC ID# 28H4, PCGS# 8877

1914-S Indian Ten, MS63 Better San Francisco Issue

6305 1914-S MS63 PCGS. The 1914-S is a slightly better Indian eagle issue, coming from a mintage of only 208,000 coins. Examples grading finer than this MS63 coin are scarce. This piece is well-struck, with satiny orange-gold luster. A few small abrasions are primarily restricted to Liberty's cheek and pose little distraction. NGC ID# 28H4, PCGS# 8877

6306 1915 MS63 NGC. The lustrous surfaces of this Select ten dollar display honey-gold color and well-struck design features, though the eagle's shoulder is a tad soft, as typically seen. Scattered marks determine the grade. The 1915 is available in MS63 and MS64; Gems are challenging and higher-grade pieces are rare. *From The Badger Collection.* NGC ID# 28H5, PCGS# 8878

1915 Indian Ten, MS65 Lovely Original Color

6307 1915 MS65 NGC. The Gem surfaces of this 1915 Indian eagle are aglow with wonderful rose, lilac, and sun-gold hues, heightening the visual impact of the frosty cartwheel effect. The strike is well-executed and there are no significant abrasions. This Philadelphia issue is available in lower grades, but Gems are scarce and anything finer is rare. NGC lists 28 numerically finer examples (6/15). NGC ID# 28H5, PCGS# 8878

**1915-S Indian Ten, MS61
Low-Mintage Issue**

- 6308 1915-S MS61 NGC.** All San Francisco Indian ten issues are scarce in Mint State, but the 1915-S ranks among the semikeys, since only 59,000 pieces were struck. The present lustrous lemon-gold example has no obvious abrasions and the designs are sharp despite minor incompleteness on the forehead curl and the left wing border.
Ex: *FUN Signature (Heritage, 7/2011)*, lot 4964. NGC ID# 28H6, PCGS# 8879

**1915-S Indian Ten, MS62
Better San Francisco Issue**

- 6309 1915-S MS62 PCGS.** A slightly better date, the 1915-S eagle had a mintage of only 59,000 coins. Uncirculated survivors are highly sought-after but are only infrequently seen. Above the MS62 level, the date is borderline rare. This piece is well-struck and aglow in satiny straw-gold luster. Light, scattered abrasions limit the grade but none are singularly obvious. Population: 63 in 62 (1 in 62+), 58 finer (6/15). NGC ID# 28H6, PCGS# 8879
- 6310 1916-S AU58 PCGS.** Orange-gold and mint-green coloration adorns both sides of this near-Mint ten dollar, each of which retains luster in the recessed areas. Relatively strong definition characterizes the design elements, and the distributed marks are what would be expected for a lightly circulated, large gold coin. NGC ID# 28H7, PCGS# 8880
- 6311 1916-S AU58 PCGS.** The yellow-gold surfaces of this near-Mint ten dollar are laced with soft olive-green and retain considerable luster in the recessed areas. The design features are well-struck though the eagle's shoulder feathers are a tad soft as often seen. Distributed small marks are in line with a large gold coin that has seen brief circulation. NGC ID# 28H7, PCGS# 8880

**1916-S Ten Dollar, MS63
Challenging in Select Condition or Better**

- 6312 1916-S MS63 PCGS. CAC.** Green and rose shades accent orange-gold color over each side. Liberty's hair strands, the lower headdress feathers, and the eagle's right leg are a touch soft, but the overall impression is bold. Radiant luster rolls over minimally bagmarked surfaces, furthering the eye appeal of this Select example. This was the only ten dollar gold issue in 1916 (138,500 pieces struck) and the final issue until 1920. The population of certified 1916-S eagles declines precipitously in MS63 condition or better. NGC ID# 28H7, PCGS# 8880
- 6313 1926 MS62 PCGS.** Rich orange toning embraces this lustrous and well struck Indian gold type coin. Abrasions are lesser than expected for the MS62 level. Encapsulated in an old green label holder. NGC ID# 28H9, PCGS# 8882
- 6314 1932 MS64 NGC.** An impressive Choice example of this popular type issue, this coin displays well-detailed design elements and vibrant mint luster on both sides. Only minor signs of contact are evident and eye appeal is outstanding. NGC ID# 28HB, PCGS# 8884
- 6315 1932 MS64 NGC.** Vibrant luster graces the peach-gold surfaces of this well struck near-Gem eagle, just a few minute marks away from an even higher grade. An excellent type set candidate.
Ex: *Long Beach Signature (Heritage, 2/2012)*, lot 5012. NGC ID# 28HB, PCGS# 8884
- 6316 1932 MS64 NGC.** A frosty near-Gem, this 1932 is the only readily collectible U.S. gold piece struck during the Great Depression, and these coins did not actually circulate, as nearly every surviving example is Mint State. This pleasing piece has brilliant yellow-gold luster and excellent eye appeal. NGC ID# 28HB, PCGS# 8884
- 6317 1932 MS64+ NGC. CAC.** This honey-gold eagle on the cusp of a Gem grade has warm, shimmering luster and good all-around eye appeal. A touch of central striking softness is noted on each side. NGC ID# 28HB, PCGS# 8884

**1932 Indian Eagle, MS65+
Popular Late-Series Type Coin**

- 6318 1932 MS65+ PCGS. CAC.** Lime-green margins bound the peach-gold fields and devices. Evenly struck and lustrous with attractive preservation and suitable eye appeal. Only scattered minor surface grazes determine the grade. The 1932 ten is the only readily collected gold issue from its decade.
From *The Glacier Collection*. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Liberty Double Eagle, AU55 Important First-Year Type Coin

- 6319 1850 AU55 NGC. CAC. Ex: Duquesne.** Its status as the first year of the design and denomination makes the 1850 Liberty double eagle an extremely popular issue with type collectors. This impressive Choice AU specimen displays well-detailed design elements with just a trace of high-point wear and lustrous green and orange-gold surfaces with a scattering of minor abrasions on both sides.
From The Duquesne Collection. NGC ID# 268F, PCGS# 8902

1850 Liberty Head Double Eagle, AU58 Attractive Type One Twenty

- 6320 1850 AU58 NGC. CAC.** The Liberty Head double eagle design was accepted in 1849, but the first mintage for circulation was in 1850. As a result, examples of the first-year twenties are always in demand. This near-Mint representative is lightly abraded as expected, but less-so than many Mint State coins in terms of bagmarks and large abrasions. The fields retain some prooflike flash and the rims are sharp and bold. A bold strike remains on the natural, medium-gold surfaces. CAC endorsed. NGC ID# 268F, PCGS# 8902

1850-O Double Eagle, VF25 First Branch Mint Issue

- 6321 1850-O VF25 PCGS. CAC. Variety 1.** A collector grade peach-gold and olive-green example of the introductory New Orleans double eagle issue. The surfaces display moderate wear and delicate hairlines but the only mentionable mark is an old pinscratch through the T in LIBERTY which cannot be clearly seen without a loupe. NGC ID# 268G, PCGS# 8903

1850-O Liberty Twenty, XF45 First New Orleans Double Eagle

- 6322 1850-O XF45 NGC. Variety 2.** Always popular as the first double eagle struck at a branch mint, the 1850-O Liberty twenty is a scarce issue in high grade. This attractive Choice XF specimen exhibits some light wear on the prongs of Liberty's crown, and the hair lines also show some rub, but most interior detail remains intact. The still-lustrous surfaces are lightly abraded, as well.
From The Duquesne Collection. NGC ID# 268G, PCGS# 8903

1851 Liberty Twenty, AU55 Large Mintage, Low Survival Rate

- 6323 1851 AU55 NGC.** Fueled by the massive influx of gold from California, the mintage of 1851 Liberty double eagles soared above 2 million pieces. Unfortunately, the issue circulated heavily and the survival rate was unusually low, especially for high-grade examples. This attractive Choice AU specimen is lightly worn and lightly abraded, with still-lustrous yellow and greenish-gold surfaces.
From The Duquesne Collection. NGC ID# 268H, PCGS# 8904

1851 Double Eagle, Reflective AU55

- 6324 1851 AU55 PCGS.** Glowing orange-gold luster and good preservation and strike are hallmarks of this eye-appealing Choice AU early Liberty twenty, certified in a PCGS green-label holder. A thin radial scrape inside of stars 1-4 is scarcely seen without a loupe but the only mentionable mark. The surfaces retain some nice prooflike reflectivity. NGC ID# 268H, PCGS# 8904

**1851 Double Eagle, Near-Mint
Perfect Type One Representative**

6325 1851 AU58 PCGS. Attractive khaki-gold surfaces feature fully defined radials on the stars, bold hair curls, and crisp feather detail. Minimal high-point rub is virtually invisible without the aid of a lens, and scattered abrasions are of little importance. This offering presents a prime opportunity to acquire a partly lustrous and nearly Uncirculated Type One representative from the denomination's second year of issue. NGC records only 74 examples rated higher (7/15). NGC ID# 268H, PCGS# 8904

**1851 Double Eagle, AU58
Elusive in Finer Grades**

6326 1851 AU58 NGC. CAC. Ex: "Col." E.H.R. Green. With large quantities of gold arriving from San Francisco to be converted into coins, double eagle production in Philadelphia exceeded 2 million pieces in 1851, nearly double the number produced the year before. Despite this high mintage, Mint State survivors are decidedly scarce, and none have been certified finer than MS64. This nearly Uncirculated piece displays luminous apricot-gold luster in the recesses, with unusually smooth surfaces and proportionately high eye appeal. A trace of friction is detected upon close examination, though the detail remains virtually complete. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$90.00; Eric P. Newman Numismatic Education Society; Newman Part V (Heritage, 11/2014), lot 3338. NGC ID# 268H, PCGS# 8904

**1851-O Double Eagle
AU Sharpness**

6327 1851-O — Removed From Jewelry — NGC Details. AU. Variety 1. The apricot-gold surfaces are unnaturally prooflike and appear polished, but noticeable marks are confined to a small reverse rim nick at 3 o'clock. A small rectangular lamination is noted on Liberty's neck. An always-popular New Orleans type issue. NGC ID# 268J, PCGS# 8905

**1852 Liberty Twenty, AU55
Lustrous and Lightly Abraded**

6328 1852 AU55 PCGS. With a reported mintage of more than 2 million pieces, the 1852 Liberty double eagle is one of the more available Type One issues. Most examples circulated extensively near the time of issue, however, making high-grade specimens elusive in today's market. This Choice AU example shows just a touch of wear on the well-detailed design elements and the lustrous surfaces are free of significant distractions. Housed in a green label holder. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU58
Popular Issue for Type Purposes**

6329 1852 AU58 NGC. CAC. Ex: Duquesne. With a reported mintage in excess of 2 million pieces, the 1852 Liberty double eagle is an available issue in lower grades, but Mint State examples are very scarce. This sharply detailed near-Mint example shows just a trace of friction on the high points of the design elements, and the lustrous orange-gold surfaces display a few minor abrasions. From The Duquesne Collection. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU58
Gold Rush-Era Type Coin**

6330 1852 AU58 NGC. CAC. The 1852 double eagle boasts a mintage of more than 2 million pieces, but as intended, the issue was a workhorse in commerce and the foreign trade. Few Uncirculated examples survive. This near-Mint piece is sharply detailed and retains hints of luster in the protected areas of the fields. The green-gold surfaces exhibit only a few scattered abrasions, as expected for the grade. NGC ID# 268K, PCGS# 8906

**1852/1852 Repunched Date Twenty, AU58
FS-301 Cherrypickers' Variety**

- 6331** 1852/1852 Repunched Date, FS-301, AU58 PCGS. The first date is visibly punched north of the second punch, so that the tops of each digit poke out above the final date. Adding further to the interest, a lazily looping die crack connects the left obverse field to the bottoms of all four digits and the right field. Only the most minor hint of high-point rub separates this lustrous yellow-gold coin from Mint State. For the variety, Population: 2 in 58, 4 finer (7/15). PCGS# 145729 Base PCGS# 8906

- 6332** 1853 XF40 NGC. A pleasing XF specimen from a mintage of 1.2 million pieces, this coin displays light wear on the prongs of the coronet and hair strands and lightly abraded greenish gold surfaces with traces of original mint luster.
From The Duquesne Collection. NGC ID# 268M, PCGS# 8908

- 6333** 1853 — Cleaning — Genuine PCGS. AU Details. Ex: Saddle Ridge Hoard. This piece has a special gold label PCGS Saddle Ridge label where they mention a Repunched Date and call it a minor variety. Slight recutting is evident within the 3, but is different than the so-called “1853/2” overdate (FS-301) or Breen-7161. Prominent cleaning lines are evident on the light yellow-gold obverse with considerable luster on the reverse.

- 6334** 1853 AU53 NGC. Myriad surface marks are present on both sides of this twenty dollar gold piece that was struck in Philadelphia during the height of the California Gold Rush. Traces of luster remain in the protected areas of this pleasing yellow-gold double eagle. NGC ID# 268M, PCGS# 8908

**1853 Double Eagle, MS61
Challenging in Mint State**

- 6335** 1853 MS61 PCGS. Doug Winter's online reference for Type One double eagles estimates that only 30 to 40 Mint State 1853 twenties survive, most in MS61 and MS62. This is one such example with attractive pale orange-gold coloration. The stars show full centers, and Liberty's curls are well-detailed. Each side exhibits subdued mint luster and a number abrasions. A small dark incrustation occurs above star 6. Population: 16 in 61, 25 finer (7/15). NGC ID# 268M, PCGS# 8908

**1853/2' Liberty Double Eagle, AU53
Popular FS-301 Variant**

- 6336** 1853/2' FS-301 AU53 NGC. Ex: Duquesne. The remains of an underdigit, most often called a 2, are evident below the final digit in the date. The 1853/2" variety is most easily recognized by the die lump below the R in LIBERTY. This lightly worn example offers pleasing orange-gold surfaces that show a few minor abrasions and retain considerable amounts of original mint luster. Census: 46 in 53 (1 in 53+), 73 finer (5/15).
From The Duquesne Collection. PCGS# 145730 Base PCGS# 8909

**1853-O Double Eagle, XF45
Scarce Low-Mintage Issue**

- 6337** 1853-O XF45 NGC. **Variety 1.** Mintage of Liberty double eagles was drastically reduced at the New Orleans Mint in 1853, to a mere 71,000 pieces, making the issue somewhat scarce in all grades today. This attractive Choice XF specimen shows lightly worn design elements and lustrous, lightly abraded greenish-gold surfaces.
From The Duquesne Collection. NGC ID# 268N, PCGS# 8910

- 6338** 1854 Small Date VF30 NGC. This is the more available of two varieties for the date. The 1854 Small Date is about on par with the 1852 and 1853 in terms of relative rarity despite a smaller mintage of 757,899 coins. This example features deep reddish-gold color and full centers on the stars. Myriad abrasions from circulation occur throughout. NGC ID# 268P, PCGS# 8911

**1854 Liberty Twenty, AU50
Scarcer Large Date Variant**

- 6339** 1854 Large Date AU50 NGC. CAC. Ex: Duquesne. The 1854 Large Date Liberty double eagle is much more elusive than its Small Date counterpart. This pleasing AU example displays lightly worn sharply detailed design elements, with lustrous yellow and greenish-gold surfaces that show some scattered minor abrasions on both sides. Census: 7 in 50, 83 finer (5/15).
From The Duquesne Collection. PCGS# 98911

1854-S Twenty, Unc Sharpness
First Double Eagle Issue of San Francisco

- 6340 1854-S — Smoothed — PCGS Genuine. Unc Details.** And the fields on each side appear to have been just that, smoothed or buffed, likely to efface abrasions. Quite a bit of eye appeal nonetheless remains on this first-year S-mint twenty, a historic issue in American numismatics that marks the long-awaited (and long-delayed, due to the faraway but meddlesome Washington bureaucracy) opening of the San Francisco Mint, five years after the California Gold Rush got seriously under way. This piece shows no mentionable high-point wear and offers a decent strike. There is an extensive network of die cracks on the reverse that many numismatists will find interesting and adding to the appeal. NGC ID# 268U, PCGS# 8913

1855 Twenty Dollar, AU53
Better Date in High Grade

- 6341 1855 AU53 PCGS.** The 1855 is one of the more challenging Philadelphia issues from the 1850s, especially in high grade. AU examples are elusive and Mint State coins are rare. This piece shows brief circulation, but retains luster in the protected regions of the fields and possesses well-detailed devices. A few linear marks below the eagle and another in the field near Liberty's eye are the only mentionable abrasions. NGC ID# 268V, PCGS# 8914

1855 Liberty Twenty, AU55
Lightly Abraded Example

- 6342 1855 AU55 NGC. CAC. Ex: Duquesne.** From a reported mintage of 364,666 pieces, the 1855 Liberty double eagle is a condition rarity in high grade. This attractive Choice AU specimen displays well-detailed design elements, with just a trace of wear, and pleasing orange-gold surfaces with a minimum number of minor contact marks for the grade. Census: 82 in 55 (1 in 55+★), 86 finer (5/15). From *The Duquesne Collection*. NGC ID# 268V, PCGS# 8914

- 6343 1855-S XF45 NGC. CAC. Ex: Duquesne.** Medium S. The availability of the 1855-S Liberty double eagle has been greatly augmented by recent shipwreck finds, as more than 300 examples were recovered from the wreck of the S.S. *Central America*. This well-detailed Choice XF specimen shows just a touch of actual wear and the pleasing surfaces are free of large or distracting abrasions. From *The Duquesne Collection*. NGC ID# 268X, PCGS# 8916

1856 Double Eagle, AU50
Elusive Type One Issue

- 6344 1856 AU50 NGC. CAC. Ex: Duquesne.** From a nominal mintage of 329,878 pieces, the 1856 Liberty double eagle is surprisingly difficult to locate, especially in high grade. Only a few examples have surfaced in recent shipwreck finds. This well-detailed, lightly worn AU example offers pleasing orange-gold surfaces that are remarkably free of large or distracting abrasions. From *The Duquesne Collection*. NGC ID# 268Y, PCGS# 8917

1856-S Double Eagle, AU55

- 6345 1856-S AU55 PCGS.** Scattered handling marks are mostly insignificant on this Choice AU S-Mint double eagle. Light yellow-gold surfaces retain noticeable luster in the protected areas. The actual S mintmark is weakly defined and only partially visible. Small splashes of coppery-orange toning appear on the reverse. NGC ID# 2692, PCGS# 8919

1856-S Twenty Dollar, AU58
Ex: S.S. *Central America*

- 6346 1856-S AU58 PCGS. Variety 17J. Ex: S.S. *Central America*, SSCA 5882. Split Serif.** From one of the most famous sunken treasure hoards ever discovered, this 1856-S double eagle is just a brush of friction shy of a Mint State designation. The design elements are boldly rendered and the fields display frosty orange-gold luster. No major abrasions are present. NGC ID# 2692, PCGS# 8919

1856-S Liberty Double Eagle, AU58
Excellent Type Coin

- 6347** 1856-S AU58 NGC. CAC. Ex: Duquesne. More than 1,000 examples of the 1856-S Liberty double eagle were recovered from the wreck of the S.S. *Central America*, making it one of the most available issues of the Type One design. This attractive near-Mint specimen is lustrous and lightly abraded, with well-detailed design elements that show just a trace of wear.

From *The Duquesne Collection*. NGC ID# 2692, PCGS# 8919

1857 Twenty, AU55
A Relatively Scarce Issue

- 6348** 1857 AU55 PCGS. Although the population of the 1857 Philadelphia Mint double eagle remained constant when the S.S. *Central America* treasure was recovered, the vast influx of S-Mint coins gave an appearance of rarity to the P-Mint issue. This Choice AU example has brilliant yellow surfaces with minimal marks and nearly full luster. NGC ID# 2693, PCGS# 8920
-

1857 Liberty Twenty, AU55
Elusive Issue Any Finer

- 6349** 1857 AU55 NGC. CAC. Ex: Duquesne. Unlike its San Francisco Mint counterpart, the 1857 Liberty double eagle from the Philadelphia Mint was not heavily represented in recent shipwreck finds. As a result, Mint State examples remain quite scarce. This Choice AU example displays lightly abraded lustrous surfaces, with well-detailed design elements that show just a trace of wear.

From *The Duquesne Collection*. NGC ID# 2693, PCGS# 8920

1857-S Liberty Double Eagle, AU55
Extremely Popular Type Coin

- 6350** 1857-S AU55 NGC. Medium S. Ex: Duquesne. The sharply detailed design elements of this attractive Choice AU specimen show just a trace of friction on the high points and the vivid orange-gold surfaces are remarkably free of large or distracting abrasions. Vibrant mint luster adds to the outstanding eye appeal. The 1857-S Liberty double eagle was rare in high grade before the discovery of the S.S. *Central America*.

From *The Duquesne Collection*. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, AU55
Smooth, Lustrous Surfaces

- 6351** 1857-S AU55 PCGS. Brief circulation is evident on the devices and in the open areas of the fields on this Choice AU 1857-S twenty, although there is not any noticeable loss of detail and the fields retain substantial luster. Rich straw-gold luster glows on each side and the eye appeal is outstanding. A popular date, made famous by the S.S. *Central America* shipwreck which yielded a few thousand examples. NGC ID# 2696, PCGS# 8922
-

1857-S Twenty Dollar, AU58
Original Orange-Gold Color

- 6352** 1857-S AU58 NGC. Breen-7189. Large S, which Breen called "very rare." All of the 1857-S double eagles recovered during the late 1980s from the S.S. *Central America* had Medium S mintmarks. This implies that the Large S variety was delivered after the S.S. *Sonora* left San Francisco for Panama on August 20, 1857. The present dusky, orange-gold near-Mint example is well-struck and exhibits the expected number of small to moderate obverse abrasions. It displays no overt seawater effects. NGC ID# 2696, PCGS# 8922
-

1857-S Double Eagle, AU58
Ex: S.S. Central America

6353 1857-S AU58 PCGS. CAC. Variety 20B. Ex: S.S. Central America. SSCA 3085. Variety 20B has a Bold S mintmark, and the center portion of the top horizontal stroke in the E of AMERICA is broken. This nearly Uncirculated shipwreck coin has typically orange and rose-gold surfaces with bold design definition and lightly peppered marks. A numismatically and historically significant Type One twenty dollar gold coin. NGC ID# 2696, PCGS# 8922

1857-S Twenty, Narrow Serif, MS64
S.S. Central America Recovery Coin

6354 1857-S MS64 PCGS. Variety 20C. Ex: S.S. Central America. SSCA 1449. This variety shows a repaired left serif on the U in UNITED, with narrow, straight sides and a blunt terminus. The center of the top horizontal stroke in ER in AMERICA is repaired, tapering to the left. This near-Gem shows a "typical" S.S. Central America look (meaning top-notch), with great luster on orange-gold to yellow-gold surfaces amid excellent preservation. A great example of this historic shipwreck coin and a nice alternative to the ubiquitous Spiked Shield variety. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, Frosty MS64
Ex: S.S. Central America

6355 1857-S MS64 PCGS. Variety 20A. Ex: S.S. Central America, SSCA 3609. Spiked Shield. 1857-S double eagles recovered from the Central America shipwreck have a distinct, frosty glow not seen on other examples of the issue, one which many collectors find especially attractive. This piece is beautiful in that regard, warmed by rose-gold centers and deeper apricot color around the peripheries. The strike is tack-sharp and the surfaces are free of any major abrasions. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, XF45
Better Type One Date

6356 1858 XF45 NGC. CAC. Ex: Duquesne. According to Mint records, 211,714 Liberty double eagles were struck at the Philadelphia Mint in 1858. Few examples were saved by contemporary collectors and the date is scarce-to-rare in all grades today. This Choice XF example exhibits light wear on the design elements and the antique-gold surfaces are lightly abraded. From The Duquesne Collection. NGC ID# 2697, PCGS# 8923

1858 Twenty Dollar, AU50
Scarcely Seen in High Grades

6357 1858 AU50 NGC. A lightly circulated No Motto coin from a mintage of 211,714 pieces, this About Uncirculated twenty has partial luster in the recesses that illuminates well-detailed motifs with expected high-point blending. Rose and khaki-gold surfaces show scattered abrasions on each side. The 1858 is conditionally scarce at this grade level, though it is more available than its low-mintage New Orleans counterpart. NGC ID# 2697, PCGS# 8923

1858 Liberty Double Eagle, AU55
Elusive Issue in High Grade

6358 1858 AU55 NGC. CAC. Ex: Duquesne. The 1858 Liberty double eagle is seldom encountered in Mint State grades, although a few nice coins were recovered from the wreck of the S.S. Republic. This attractive Choice AU specimen offers well-detailed design elements, with just a trace of high-point wear, and lustrous greenish-gold surfaces that show only minor abrasions. From The Duquesne Collection. NGC ID# 2697, PCGS# 8923

**1858-O Twenty, AU Details
Blundered Date, Breen-7192**

- 6359 1858-O Blundered Die — Harshly Cleaned — NCS. AU Details. Breen-7192.** “1858-O Blundered die. Very rare. Part of a third 8 protrudes from lower curl into field.” That is all Walter Breen said in his 1988 *Complete Encyclopedia* regarding this variety. In 1992, Doug Winter wrote “I have never personally seen or heard of such a piece and if this variety does exist it is extremely rare.” A decade later, Winter along with Adam Crum stated that “there do not appear to be any significant die varieties.” In 2004 Dave Bowers repeated the earlier 1988 information from Breen, adding nothing new. And in 2006 Doug Winter claimed that “there is just a single variety known.” Subsequent research by Heritage has identified three 1858-O die varieties. Breen-7192 is our Variety 2, and it remains rarer than Variety 1. The present example is richly detailed and retains glimpses of bright luster. Both sides display many fine hairlines.
Ex: *Deadwood Gulch Collection* (Heritage, 12/2008), lot 2256. NGC ID# 2698, PCGS# 8924

**1858-S Double Eagle, AU53
Pleasing Original Color**

- 6360 1858-S AU53 NGC.** The 1858-S had by far the highest double eagle mintage of the year, totaling nearly 850,000 coins. Yet, AU and Mint State pieces are nearly as scarce as are those of its Philadelphia counterpart. This example is only briefly circulated, with original olive-gold patina that retains hints of luster in the protected regions. There are no singularly obvious abrasions. NGC ID# 2699, PCGS# 8925

**1858-S Double Eagle, AU58
Rare Any Finer**

- 6361 1858-S AU58 PCGS.** The 1858-S Liberty Head twenty is rare in Mint State and only infrequently seen in the upper AU grades. This Borderline Uncirculated example is sharply detailed and held from a Mint State designation only by trivial friction over the high points of the design. Lightly abraded, but with significant luster remaining in the protected areas of the fields. Population: 46 in 58, 14 finer (7/15). NGC ID# 2699, PCGS# 8925

**1858-S Liberty Twenty, AU58
Scarcer Type One Double Eagle**

- 6362 1858-S AU58 NGC.** Ex: Duquesne. The 1858-S Liberty double eagle was struck too late to be included (and preserved) in the cargo of the S.S. *Central America*, and few examples were saved by contemporary collectors. As a result, the issue is scarce in AU58 condition, and finer examples are rare. This attractive near-Mint specimen shows just a trace of high-point wear and the lustrous surfaces show only minor abrasions. NGC has certified 19 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 2699, PCGS# 8925

1858-S Twenty, Eye-Appealing AU58

- 6363 1858-S AU58 PCGS.** Fantastic eye appeal is the byword for this early Type One S-mint double eagle in near-Mint State condition. Deep, mellow reddish-orange surfaces show minimal marks and retain most of their original luster. Mint State examples of this issue are quite elusive. Certified in a green-label holder. Population: 46 in 58, 14 finer (7/15). NGC ID# 2699, PCGS# 8925

1858-S Double Eagle, MS60
Scarce in Mint State

6364 1858-S MS60 NGC. The S.S. *Republic* yielded a few seawater salvage coins, but none were recovered from the S.S. *Central America*, and this San Francisco issue remains a Mint State rarity. The present coin shows strong mint luster and a relatively sharp strike, with numerous small abrasions across the frosty surfaces. Attractive, rich-gold color enhances the appeal. Census: 2 in 60, 17 finer (7/15). NGC ID# 2699, PCGS# 8925

1859 Liberty Double Eagle, AU50
Low-Mintage Philadelphia Issue

6365 1859 AU50 NGC. Ex: Duquesne. In addition to having a remarkably low Philadelphia business-strike mintage of 43,597 pieces, the 1859 Liberty double eagle was largely neglected by contemporary collectors. Few examples were saved and the 1859 is scarce-to-rare in all grades today. This attractive AU example is lightly worn and lightly abraded, with vivid orange-gold surfaces and vibrant mint luster. Census: 22 in 50, 67 finer (5/15).
From The Duquesne Collection. NGC ID# 269A, PCGS# 8926

1859-S Liberty Double Eagle, AU58
Rare in Finer Grades

6366 1859-S AU58 NGC. Ex: Duquesne. Like most double eagles of this era, the 1859-S is not difficult to locate in most circulated grades, but Mint State examples are rare. This attractive near-Mint example was sharply struck and shows just a trace of actual wear. The lightly abraded orange-gold surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC has graded 20 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 269C, PCGS# 8928

1860 Double Eagle, MS61
Lustrous, Colorful Surfaces

6367 1860 MS61 NGC. Ex: Duquesne. From a mintage of 577,670 pieces, the 1860 Liberty double eagle is easily located in lower circulated grades and a number of nicer coins were recovered from the wreck of the S.S. *Republic*. Still, the 1860 is an elusive issue in Mint State. This impressive MS61 example is well-struck, lustrous, and lightly marked for the grade. Census: 26 in 61, 17 finer (5/15).
From The Duquesne Collection. NGC ID# 269D, PCGS# 8929

1860-S Double Eagle, AU53
Attractive Type One Example

6368 1860-S AU53 NGC. CAC. Ex: Duquesne. The 1860-S Liberty double eagle follows the usual scenario for Type One twenties, the issue is common in VF-XF grades and difficult to locate finer, outside of a few examples from recent shipwreck finds. This lightly worn greenish-gold example retains some of its original mint luster and shows only minor abrasions.
From The Duquesne Collection. NGC ID# 269F, PCGS# 8931

1861 Double Eagle, Attractive AU55
Great Color and Luster

6369 1861 AU55 PCGS. Although minor wear is perceptible on the high points, the fields show only a slight thinning of the luster but few singular marks on this attractive Choice AU Type One twenty. Great orange color and generous luster produce broad eye appeal on this piece, certified in a green-label holder. NGC ID# 269G, PCGS# 8932

**1861 Liberty Double Eagle, AU55
In Demand for Type Purposes**

- 6370** 1861 AU55 NGC. CAC. Ex: Duquesne. A large mintage of nearly 3 million pieces makes the 1861 Liberty double eagle one of the most available Type One twenties and a popular choice of type collectors. This attractive Choice AU example shows just a touch of wear on the well-detailed design elements and the lightly abraded surfaces retain much original mint luster.

From The Duquesne Collection. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, Lustrous AU58

- 6371** 1861 AU58 NGC. For the grade, this near-Mint 1861 double eagle is unusually eye-appealing, with significant cartwheel luster illuminating warm yellow-gold surfaces. The coin is sharp, and the most obvious sign of brief circulation is light chatter in the fields on both sides. An outstanding Type One representative. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, Golden-Orange AU58

- 6372** 1861 AU58 NGC. Golden-orange surfaces host generous cartwheel luster on both sides and show light high-point wear. A few heavy abrasions appear scattered about, including a few on Liberty's cheek, but this piece retains good eye appeal through its decent strike, good color and luster. The 1861 double eagle had the largest mintage until the 1904. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, AU58
Appealing Type One Representative**

- 6373** 1861 AU58 PCGS. CAC. For type purposes, few Type One double eagles are as suitable as the 1861. This date had a mintage of nearly 3 million coins, and until the discovery of the S.S. *Central America* treasure, was the most plentiful Type One issue. This CAC-endorsed Borderline Uncirculated example is well-detail, with frosty green-gold patina that retains soft luster in the fields. There are no bothersome abrasions and the eye appeal is outstanding. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, MS60
Ideal No Motto Type Coin**

- 6374** 1861 MS60 NGC. In 1861, the issuance of Demand notes to raise funds for the war effort necessitated increased gold reserves, explaining the high mintage of double eagles in that year. This MS60 coin is a perfect entry point for collectors in search of an Uncirculated Type One twenty. Lustrous, rose and green-gold surfaces exhibit strong detail on the stars and hair curls with an expected number of abrasions scattered over each side. The reverse is comparatively clean. NGC ID# 269G, PCGS# 8932

- 6375** 1861-S XF45 NGC. A substantial quantity of large gold double eagles were coined in San Francisco in 1861. The year started out with production of Paquet double eagles, and continued using reverse dies of the standard design. This pleasing honey-gold example retains traces of luster with delicate rose color in the protected areas. NGC ID# 269K, PCGS# 8935

1861-S Liberty Twenty, AU55
Sharply Struck and Lightly Worn

6376 1861-S AU55 NGC. Ex: Duquesne. Produced in large numbers and widely circulated at the time of issue, the 1861-S Liberty double eagle conforms to the usual pattern of availability: lower circulated examples are common, high-grade pieces are rare. This sharply struck AU55 example exhibits just a touch of wear on the design elements and the lustrous yellow-gold surfaces show a scattering of minor abrasions on both sides.

From The Duquesne Collection. NGC ID# 269K, PCGS# 8935

6377 1862-S XF45 NGC. Traces of mint luster remain in the protected areas of this Type One S-Mint double eagle. The surfaces exhibit scattered marks that are consistent with the grade. NGC ID# 269N, PCGS# 8938

1862-S Double Eagle, AU50
Survivor of West Coast Commerce

6378 1862-S AU50 NGC. While West Coast commercial interests operated well-removed from the turmoil of the Civil War and somewhat insulated from its effects, the rest of the country nervously hoarded coinage from circulation. The 1862-S double eagles remained a stalwart of commerce in the West, and the coins circulated heavily. Those that did not were largely recovered from the bottom of the ocean. This About Uncirculated example shows no seawater characteristics, with natural orange-gold color and most abrasions softened by visible circulation. Nice mint luster remains across the attractive surfaces. NGC ID# 269N, PCGS# 8938

1862-S Liberty Twenty, AU53
Lightly Worn Type One Double Eagle

6379 1862-S AU53 NGC. CAC. Ex: Duquesne. Produced in large numbers, the 1862-S Liberty double eagle circulated heavily in both domestic economic circles and foreign trade. Before some recent shipwreck finds, the 1862-S was very rare in high grade, and the issue remains scarce at the AU53 level today. This attractive example is lightly worn and lightly abraded and retains traces of original mint luster.

From The Duquesne Collection. NGC ID# 269N, PCGS# 8938

1862-S Liberty Double Eagle, AU58
Lustrous, Lightly Worn Example

6380 1862-S AU58 NGC. Ex: Duquesne. Although the 1862-S Liberty double eagle was well-represented in recent shipwreck finds, the issue remains rare in Mint State grades. This attractive near-Mint example exhibits lightly abraded orange-gold surfaces with much original mint luster and just a trace of wear on the well-detailed design elements. NGC has graded 34 numerically finer examples (5/15).

From The Duquesne Collection. NGC ID# 269N, PCGS# 8938

6381 1863-S XF45 NGC. Breen-7216. Medium S. Liberty's coronet and hair show minor high-point wear but the light orange-gold surfaces of this Choice XF specimen are lightly abraded and retain a few traces of original mint luster. NGC ID# 269R, PCGS# 8940

1863-S Twenty Dollar, AU55
Smooth Surfaces

6382 1863-S AU55 PCGS. The 1863-S double eagle had a mintage of nearly 1 million coins, but these experienced moderate to extensive circulation. The scarcity and cost of Mint State examples moves many collectors to seek high-end AU coins for their sets. This Choice AU representative displays uncommonly smooth surfaces for the grade, with luster remaining in the protected regions of the fields. NGC ID# 269R, PCGS# 8940

1863-S Double Eagle, AU58
Lightly Worn, Lustrous Surfaces

- 6383 1863-S AU58 NGC.** Ex: Duquesne. Recent shipwreck finds have greatly augmented the supply of high-grade 1863-S Liberty double eagles, which were always available in circulated condition, but almost never seen in Mint State before the new discoveries. This attractive near-Mint representative shows just a trace of wear on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded. NGC has graded 72 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 269R, PCGS# 8940

1863-S Double Eagle, AU58
Remarkably Appealing

- 6384 1863-S AU58 NGC. CAC.** This is an attractive example, showing sharp detail and remarkably smooth surfaces. Rose and honey-gold luster resides in the protected areas, illuminating soft overtones of olive-gold on the relief elements. The eye appeal rivals that of many lower-grade Uncirculated coins. NGC ID# 269R, PCGS# 8940

1864 Double Eagle, XF40

- 6385 1864 XF40 NGC.** The caramel-gold surfaces show some luster remaining despite 20 points of wear, and the high points display a smoke-gray haze no doubt created by long-term bag storage of this piece. Extensive abrasions of varying sizes are as expected for the grade on this Civil War date. NGC ID# 269S, PCGS# 8941

1864 Double Eagle, AU53
Vivid Color, Nice Luster

- 6386 1864 AU53 NGC. CAC.** Ex: Duquesne. From a nominal mintage of 204,235 pieces, the 1864 Liberty double eagle has a low survival rate, like many Type One twenties. Outside of some recent shipwreck finds, the issue is rarely seen in high grade. This attractive AU53 example is lightly worn and lightly abraded, with lustrous orange-gold surfaces and strong eye appeal.
From The Duquesne Collection. NGC ID# 269S, PCGS# 8941

- 6387 1864-S XF40 PCGS.** This is a lovely example for the grade, housed in an older green-label PCGS holder. Smooth and attractive with traces of luster on the orange-gold surfaces. NGC ID# 269T, PCGS# 8942

- 6388 1864-S XF45 NGC.** Ex: Duquesne. This attractive orange-gold representative shows some light wear on Liberty's crown and hair, but most interior detail remains intact. The pleasing orange-gold surfaces are lightly abraded. The 1864-S Liberty double eagle was seldom seen in high grade before the recoveries of the S.S. *Brother Jonathan* and the S.S. *Republic*.
From The Duquesne Collection. NGC ID# 269T, PCGS# 8942

1865 Double Eagle, Lustrous XF45

- 6389 1865 XF45 NGC.** The wheat-gold surfaces show scattered extensive marks but none of them are individually significant, appearing more as field chatter without magnification. Much reflectivity radiates from beneath the surfaces, safeguarding the eye appeal. The 1865 is the last P-mint Type One issue in the series. NGC ID# 269U, PCGS# 8943

**1865 Liberty Twenty, AU55
Colorful, Lustrous Example**

6390 1865 AU55 NGC. CAC. Ex: Duquesne. Although the issue is still scarce in Mint State grades, the supply of high-grade 1865 Liberty double eagles was increased dramatically by the discovery of the *S.S. Republic*. This impressive Choice AU example shows a touch of high-point wear on the well-detailed design elements and the lustrous greenish-gold surfaces are lightly abraded on both sides. From *The Duquesne Collection*. NGC ID# 269U, PCGS# 8943

6391 1865-S XF45 NGC. CAC. Ex: Duquesne. Small S. From a substantial mintage of just over 1 million pieces, the 1865-S Liberty double eagle was a heavily circulated issue that was seldom encountered in high grade before it surfaced in recent shipwreck finds. This lightly worn Choice XF example offers lightly abraded orange-gold surfaces with traces of original mint luster. From *The Duquesne Collection*. NGC ID# 269V, PCGS# 8944

**1865-S Twenty Dollar, MS62
Ex: S.S. Brother Jonathan**

6392 1865-S MS62 PCGS. Ex: *S.S. Brother Jonathan*, #834. The sidewheel steamship *S.S. Brother Jonathan* wrecked off the coast of Crescent City, California, on July 30, 1865. More than a thousand gold coins were recovered from the shipwreck in 1997, including many Uncirculated 1865-S twenties. The present caramel-gold representative is well struck and lustrous with clean fields and only minor facial marks. Ex: *S.S. Brother Jonathan Treasure Coins (Bowers and Merena, 5/1999)*, lot 720. NGC ID# 269V, PCGS# 8944

**1866 With Motto Twenty, AU58
Deep, Original Patina**

6393 1866 Motto AU58 PCGS. The scarcity of Mint State 1866 double eagles heightens demand for high-end AU examples such as the present coin. Both sides yield undeniably original orange and green-gold color with luster remaining the protected areas of the fields. Brief circulation is evident on the high points of the portrait and in the open regions of the fields. Population: 63 in 58, 41 finer (6/15). From *The Badger Collection*. NGC ID# 269X, PCGS# 8949

**1866 Liberty Twenty, AU58
First Type Two Double Eagle**

6394 1866 Motto AU58 NGC. CAC. Ex: Duquesne. The motto *IN GOD WE TRUST* was added to the design of the double eagle in 1866, introducing the popular Type Two design. From an adequate mintage of 698,745 pieces, the 1866 Liberty double eagle is not difficult to locate in most circulated grades, but Mint State examples are rare. This attractive near-Mint example exhibits well-detailed design elements with just a trace of friction on the high points. The lustrous orange-gold surfaces are pleasing and lightly abraded. NGC has graded 45 numerically finer examples (5/15). From *The Duquesne Collection*. NGC ID# 269X, PCGS# 8949

**1866-S Motto Double Eagle, XF40
Gold CAC Approved**

6395 1866-S Motto XF40 PCGS. Gold CAC. The first year of the Type Two With Motto double eagle is represented by a spectacular gold-CAC approved example that is housed in a green-label PCGS holder. Traces of delicate orange toning appear in the protected areas with dark high-point toning. Only 21 Type Two double eagles have been rewarded with a gold-CAC sticker (7/15). NGC ID# 269Y, PCGS# 8950

1866-S Twenty Dollar, AU50
Nice Luster Remains

- 6396 1866-S Motto AU50 NGC.** Double eagles were struck at the San Francisco Mint both Without Motto and With Motto in 1866, a function of when the dies were received with the motto added. While the S-Mint Without Motto twenties are far scarcer than the first-year With Motto coins, both varieties circulated heavily in the West. This medium-gold example of the Motto type retains considerable mint luster for the AU50 grade. The surfaces are expectedly busy with small bagmarks and minor evidence of circulation. NGC ID# 269Y, PCGS# 8950

1867 Liberty Double Eagle, AU58
Lightly Marked, Lustrous Surfaces

- 6397 1867 AU58 NGC. CAC.** Ex: Duquesne. The reported mintage of 1867 Liberty double eagles was 251,015 pieces, relatively modest in the context of the series. Fortunately for present-day collectors, a number of coins have surfaced in European holdings over the years. This attractive near-Mint specimen features sharply detailed design elements with just a trace of wear, and lightly marked orange-gold surfaces with vibrant mint luster.
From *The Duquesne Collection*. NGC ID# 269Z, PCGS# 8951

1867 Twenty Dollar, MS61
Smoothly Lustrous Surfaces

- 6398 1867 MS61 NGC.** A favored Philadelphia issue for its Type Two reverse and generally high quality color and luster, this gleaming Mint State example displays remarkably few abrasions for the grade. The smooth surfaces are brilliantly lustrous with the preferred sun-gold coloration and Mint-fresh appeal. Sharply struck. NGC ID# 269Z, PCGS# 8951

1867 Double Eagle, MS61
Radiant, Original Luster

- 6399 1867 MS61 PCGS.** Typical of the issue, the surfaces are noticeably abraded, and yet the comprehensive luster brings out considerable eye appeal. The 1867 twenty was struck too late to participate in shipwreck hoards, yet coined too early to be exported to foreign banks in large number. As a result, Uncirculated examples are scarce.
Ex: *Baltimore ANA (Heritage, 8/2008)*, lot 3302; *Pittsburgh Signature (Heritage, 10/2011)*, lot 5119. NGC ID# 269Z, PCGS# 8951

- 6400 1867-S XF45 NGC.** Small Squat S. The 1867-S Liberty double eagle claims a large mintage of 920,750 pieces, but few examples were saved from the rigors of circulation and high-grade pieces are seldom encountered. This lightly worn and lightly abraded Choice XF specimen retains much original mint luster.
From *The Duquesne Collection*. NGC ID# 26A2, PCGS# 8952

1867-S Liberty Twenty, AU55
Scarce in High Grade

- 6401 1867-S AU55 NGC.** Bright, yellow-gold surfaces retain hints of luster in the protected regions, giving this Choice AU 1867-S double eagle pleasing eye appeal. About Uncirculated examples of this issue are marginally available, but Mint State coins are rare and almost all show extensive abrasions. This coin is lightly circulated but exhibits fairly smooth surfaces.
From *The Badger Collection*. NGC ID# 26A2, PCGS# 8952

1868 Liberty Twenty, AU58
Elusive Low-Mintage Issue

- 6402 1868 AU58 NGC. CAC.** Ex: Duquesne. With a reported mintage of 98,575 pieces, the 1868 Liberty double eagle is a scarce-to-rare issue in all grades. This impressive near-Mint specimen shows just a touch of friction on the high points of the well-detailed design elements and the brightly lustrous yellow-gold surfaces display well-scattered minor abrasions. Census: 43 in 58, 8 finer (5/15).
From *The Duquesne Collection*. NGC ID# 26A3, PCGS# 8953

1868-S Double Eagle, AU58
Few Survive Finer

- 6403 1868-S AU58 NGC.** Medium green-gold patina shows hints of rose-gold luster in the peripheral recesses, giving this near-Mint 1868-S double eagle pleasing eye appeal. AU examples of this San Francisco issue are usually available, but Mint State coins are seldom seen in any grade. The present piece offers an affordable, yet, well-detailed alternative to a bagmarked Mint State representative. NGC lists 38 Uncirculated coins finer (6/15).
From The Badger Collection. NGC ID# 26A4, PCGS# 8954

1868-S Liberty Double Eagle, AU58
Seldom Encountered Finer

- 6404 1868-S AU58 NGC. CAC.** Ex: Duquesne. Like most Type Two Liberty double eagles, the 1868-S is easily located in lower circulated grades but rare in Mint State. This attractive near-Mint representative exhibits well-detailed design elements that show just a trace of wear and lustrous yellow and orange-gold surfaces with a scattering of minor abrasions. NGC has graded 38 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26A4, PCGS# 8954

- 6405 1869 AU50 NGC. CAC.** Ex: Duquesne. This popular Type Two double eagle shows minimal wear on the design elements and lightly abraded orange-gold surfaces that retain significant amounts of original mint luster. From a mintage of 175,155 pieces, the 1869 Liberty twenty is a scarce issue in high grade.
From The Duquesne Collection. NGC ID# 26A5, PCGS# 8955

1869-S Liberty Twenty, AU55
Popular Type Two Issue

- 6406 1869-S AU55 NGC.** Ex: Duquesne. The 1869-S Liberty double eagle enjoyed a substantial mintage of 686,750 pieces, making it reasonably available in most circulated grades. As is typical of Type Two twenties, few examples have survived in Mint State condition. This Choice AU specimen shows light wear on the well-detailed design elements and the lustrous orange-gold surfaces exhibit scattered minor abrasions.
From The Duquesne Collection. NGC ID# 26A6, PCGS# 8956

1869-S Double Eagle, Lovely AU58

- 6407 1869-S AU58 PCGS.** A lovely example with pinkish-gold luster and only a trace of wear on the high points. The surfaces on both sides show numerous tiny abrasions, most visible only with magnification. This is quite a scarce coin in the high AU or Mint State grades. Population: 86 in 58 (2 in 58+), 53 finer (6/15).
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 5001.
From The Badger Collection. NGC ID# 26A6, PCGS# 8956

1869-S Liberty Double Eagle, AU58
Popular Type Two Issue

- 6408 1869-S AU58 PCGS.** Like most Type Two double eagles, the 1869-S is not difficult to locate in average circulated grades, but high-grade specimens are rare. This attractive near-Mint example exhibits well-detailed design elements with just a trace of wear on the high points, and lustrous, lightly abraded surfaces. Housed in a green label holder. PCGS has graded 53 numerically finer examples (7/15). NGC ID# 26A6, PCGS# 8956

**1870 Liberty Double Eagle, AU55
Scarcer Philadelphia Issue**

- 6409** 1870 AU55 NGC. Ex: Duquesne. From a nominal mintage of 155,150 pieces, the 1870 Liberty double eagle is surprisingly elusive in all grades. This impressive Choice AU specimen offers well-detailed design elements with just a touch of rub on the high points. The colorful orange-gold surfaces show some scattered minor abrasions and vibrant mint luster adds to the considerable eye appeal.

From The Duquesne Collection. NGC ID# 26A7, PCGS# 8957

1870 Twenty Dollar, Lustrous AU55

- 6410** 1870 AU55 NGC. Somewhat overshadowed by its more famous Carson City counterpart, the 1870 double eagle is itself scarce in the finer AU grades and is seldom seen in Mint State. This Choice AU representative is pleasantly original with blended rose and yellow-gold hues that exhibit radiant luster in the fields. Trivial wear accompanies a scattering of minor abrasions, as expected for the grade. Housed in a prior generation holder.

From The Badger Collection. NGC ID# 26A7, PCGS# 8957

**1870 Double Eagle, AU55
Choice Original Surfaces**

- 6411** 1870 AU55 PCGS. The 1870 Liberty double eagle is a better Philadelphia issue with a notably small Mint State population. This Choice AU example is a well-detailed, still-lustrous representative of the date that is somewhat more affordable than the heavily abraded Uncirculated pieces. Both sides show medium orange-gold patina, with a few scattered abrasions as allowed by the grade. Population: 19 in 55, 74 finer (7/15). NGC ID# 26A7, PCGS# 8957

**1870 Double Eagle, AU58
Preferred Philadelphia Issue**

- 6412** 1870 AU58 PCGS. Although not nearly as rare or celebrated as its Carson City counterpart, the 1870 Philadelphia issue is squarely in the crosshairs of gold specialists who realize the scarcity of the issue in Mint State. This near-Mint example provides many of the attributes usually seen only in higher grades. Much mint luster remains over the impressive orange-gold surfaces. Marks are minimal in severity and frequency. The frosty surfaces reveal a sharp strike and few signs of wear or handling. An opportunity for the astute bidder. Population: 30 in 58 (1 in 58+), 44 finer (7/15). NGC ID# 26A7, PCGS# 8957

**1870-S Twenty Dollar, AU58
Lustrous and Original**

- 6413** 1870-S AU58 NGC. The S-mint silver dollar of this year is a major rarity, but the double eagle is collectible through the AU grade levels. This original example displays medium green-gold patina with hints of luster in the protected regions. Minor friction leaves the surfaces lightly abraded, but without any individually significant distractions. Seldom found finer.

From The Badger Collection. NGC ID# 26A9, PCGS# 8959

**1871 Liberty Twenty, AU55
Better P-Mint Type Two Issue**

- 6414** 1871 AU55 PCGS. A rather limited mintage of 80,120 double eagles was accomplished in Philadelphia in 1871. Mint State survivors are rare, and high-end AU coins are only occasionally seen. This Choice About Uncirculated example displays lustrous yellow-gold surfaces with just a touch of wear over the high points of the design. Light, scattered abrasions accompany the grade, as usual. Population: 26 in 55, 27 finer (7/15). NGC ID# 26AA, PCGS# 8960

**1871 Liberty Twenty, AU55
Better Philadelphia Date**

- 6415 1871 AU55 NGC.** Ex: Duquesne. The 1871 Liberty double eagle is a better date from a low Philadelphia mintage of 80,120 pieces. This impressive Choice AU example displays lightly worn, well-detailed design elements, and lustrous surfaces with a scattering of minor abrasions. Census: 54 in 55, 88 finer (5/15).
From *The Duquesne Collection*. NGC ID# 26AA, PCGS# 8960

- 6416 1871-S AU55 NGC.** Micro S. From a substantial mintage of 928,000 pieces, the 1871-S Liberty double eagle is a relatively plentiful issue that has surfaced in European holdings over the years. Like all Type Two issues, the 1871-S is elusive in high grade. This lustrous Choice AU example is well-detailed, lightly worn, and lightly abraded.
From *The Duquesne Collection*. NGC ID# 26AC, PCGS# 8962

- 6417 1871-S AU58 NGC.** Micro S. This honey-gold Type Two twenty displays substantial luster but has a few too many bagmarks to be regarded as Mint State. Most '71-S examples served in West Coast commerce, given the rarity of the issue in Uncirculated grades.
From *The Badger Collection*. NGC ID# 26AC, PCGS# 8962

**1871-S Double Eagle, MS60
Scarce in Mint State**

- 6418 1871-S MS60 PCGS.** Micro S, one of three mintmark sizes known for the issue. Like all Type Two twenties, the 1871-S is scarce in Uncirculated grades. The present apricot-gold example displays relatively few abrasions. Cartwheel luster dominates the reverse and illuminates generous portions of the obverse. NGC ID# 26AC, PCGS# 8962

- 6419 1872 AU53 PCGS.** Nearly full satin luster is apparent on both sides of this lovely double eagle that is housed in a green-label PCGS holder. Hints of prooflike surface on both sides add to its eye appeal. NGC ID# 26AD, PCGS# 8963

- 6420 1872 AU58 NGC.** CAC. Ex: Duquesne. The 1872 Liberty double eagle is very scarce in Mint State grades. This attractive near-Mint example shows just a trace of high-point wear and the vivid orange-gold surfaces retain almost all of their original mint luster. NGC has graded 82 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 26AD, PCGS# 8963

- 6421 1872-S AU58 NGC.** Small Squat S, the most available of three mintmark sizes found on '72-S twenties. Luster illuminates the borders and motifs of this yellow-gold representative. The scattered moderate marks are characteristic of the grade and denomination.
From *The Badger Collection*. NGC ID# 26AF, PCGS# 8965

- 6422 1873-S Closed 3 AU58 NGC.** Small S. The Type Two design is known for its elusiveness in Uncirculated grades. While the present piece shows slight wear on the obverse field, it is also valued at only about half the price of an MS61 example. The obverse displays the expected number of small marks, though only a short line on the chin merits mention.
From *The Badger Collection*. NGC ID# 26AL, PCGS# 8969

**1873-S Liberty Twenty, MS61
Popular Closed 3 Variant**

- 6423 1873-S Closed 3 MS61 NGC.** CAC. Ex: Duquesne. The 1873-S Liberty double eagle with a Closed 3 in the date is not too difficult to locate in circulated grades, but Mint State examples are quite scarce. This attractive MS61 specimen exhibits well-detailed design elements and vivid orange-gold surfaces with a scattering of minor contact marks that explain the grade. NGC has graded 28 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 26AL, PCGS# 8969

1873-S Closed 3 Twenty, Appealing MS61

- 6424 1873-S Closed 3 MS61 PCGS.** CAC. The Closed 3 variety of the 1873-S Liberty Head double eagle is more available than its Open 3 counterpart, but examples in Mint State are scarce. The present coin is a well-detailed MS61 specimen, with slightly reflective yellow-gold surfaces. Strong rose-gold highlights are noted on both sides, and the coin possesses considerable eye appeal.
Ex: *Sacramento Signature* (Heritage, 3/2011), lot 4948. NGC ID# 26AL, PCGS# 8969

- 6425 1873-S Open 3 AU55 NGC.** Small Squat S. Nearly full luster remains on this Choice AU S-Mint double eagle with brilliant light yellow surfaces and dark high-point toning. Scattered handling marks on each side are trivial and insignificant. NGC ID# 26AM, PCGS# 8979

- 6426 1873-S Open 3 AU55 NGC.** CAC. Ex: Duquesne. Small S. The 1873-S Liberty double eagle with an Open 3 in the date is more difficult to locate than its Closed 3 counterpart. This impressive Choice AU specimen exhibits just a trace of wear on the strongly impressed design elements and the colorful orange-gold surfaces are lightly abraded, with vibrant mint luster on both sides.
From *The Duquesne Collection*. NGC ID# 26AM, PCGS# 8979

**1873-S Double Eagle, AU58
Scarcer Open 3 Variant**

- 6427 1873-S Open 3 AU58 NGC.** The Open 3 1873-S double eagle is notably scarcer than its Closed 3 counterpart, and Mint State examples are seldom seen. This Borderline Uncirculated coin exhibits medium yellow-gold patina with luster shining in the protected regions of the fields. Scattered abrasions are present, the most noticeable being a thin scratch in the left obverse field near Liberty's nose.
From The Badger Collection. NGC ID# 26AM, PCGS# 8979

**1874-CC Double Eagle, AU50
Popular Mintmark Type Issue**

- 6428 1874-CC AU50 NGC. Variety 1-A. Ex: Duquesne.** An unusually large mintage of 115,085 Liberty double eagles was accomplished at the Carson City Mint in 1874, making the issue one of the more available dates from this popular mint. This attractive AU example shows light wear on the design elements and the lightly abraded orange-gold surfaces retain significant amounts of original mint luster.
From The Duquesne Collection. NGC ID# 26AP, PCGS# 8971

**1874-S Liberty Twenty, MS61
Attractive Type Two Double Eagle**

- 6429 1874-S MS61 NGC. Ex: Duquesne.** The 1874-S Liberty double eagle was produced in large numbers, but the issue circulated widely and few examples were saved. Accordingly, the 1874-S is very scarce in grades above the MS61 level. This attractive Mint State example is well-detailed and brightly lustrous, with scattered minor contact marks that explain the grade. NGC has graded 34 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26AR, PCGS# 8972

**1874-S Double Eagle, MS61
Attractive Original Toning**

- 6430 1874-S MS61 PCGS. Block S.** Rich lemon-gold toning consumes this lustrous Type Three twenty. The fields and cheek display the expected number of small to moderate marks. Very scarce any finer, since Uncirculated survivors were loosely stored by banks. At least three different mintmark sizes exist on 1874-S double eagles, an underappreciated topic of research.
From The Badger Collection. NGC ID# 26AR, PCGS# 8972

- 6431 1875 MS60 PCGS.** Housed in a green-label PCGS holder, this frosty Mint State double eagle displays impressive eye appeal with brilliant and fully lustrous surfaces. While scattered hairlines prevent a higher grade, no distracting marks are apparent on either side. NGC ID# 26AS, PCGS# 8973

**1875-CC Liberty Double Eagle, AU55
Type Two Branch Mint Issue**

- 6432 1875-CC AU55 NGC. CAC. Variety 2-B. Ex: Duquesne.** The 1875-CC Liberty double eagle is one of the more available Type Two issues from the Carson City Mint, making it a popular choice with mintmark type collectors. This attractive Choice AU specimen is lightly worn and lightly abraded, with pleasing orange-gold surfaces that retain much original mint luster in sheltered areas.
From The Duquesne Collection. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty, Borderline Uncirculated

- 6433 1875-CC AU58 NGC. Variety 1-A.** A butter-gold example that approaches Mint State, although luster is incomplete across the left obverse field. Liberty's jaw and the field beneath the wings show unobtrusive abrasions. 13 die marriages are confirmed for '75-CC double eagles. Variety 2-B appears to be most often encountered, while the other varieties range from scarce to rare. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, AU58
Lustrous Fields

6434 1875-CC AU58 PCGS. Variety 4-B. One of the more available Type Two Carson City issues, ideal for type representation. This near-Mint example is sharply detailed and retains significant amounts of orange-gold luster in the protected areas of the fields. A few scattered abrasions are not detracting and the strike is bold. NGC ID# 26AT, PCGS# 8974

6435 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. This impressive double eagle is an important entry in the Type Two design. The lightly hairlined obverse retains full luster while the frosty reverse is fully brilliant. NGC ID# 26AT, PCGS# 8974

6436 1875-S MS61 NGC. Yellow-gold surfaces display hints of light rose. Distributed marks, primarily on the obverse, impede the luster flow. The design elements are well-struck throughout. The 1875-S is readily obtainable through MS61, after which the population declines considerably.
From The Badger Collection. NGC ID# 26AU, PCGS# 8975

1875-S Twenty Dollar, MS62
Appealing Type Two Representative

6437 1875-S MS62 PCGS. CAC. The fate met by most 1875-S double eagles included circulation on the West Coast, exportation overseas for international trade, or both. Coins found in foreign holdings usually grade between AU and MS60 to MS61 with heavy bagmarks. This MS62 representative is cleaner than the typical survivor, though small abrasions and grazes are scattered throughout. Moderate softness occurs over a few stars and the hair curls, while frosty S-mint luster and peach-gold color combine to give this coin excellent eye appeal. PCGS reports 22 finer submissions (7/15). NGC ID# 26AU, PCGS# 8975

1875-S Twenty, Frosty MS63
Seldom Seen So Fine

6438 1875-S MS63 PCGS. Highly lustrous, frosty surfaces set this gleaming Select Uncirculated double eagle apart. Captivating overtones of copper-red, lime-green, and olive-gold appear amid richly flowing, orange-gold luster. Only scattered, minor abrasions touch the satin-smooth surfaces. An area of alloy toning on the reverse above the eagle's head as well as a small accent by star 5 on the obverse add interest to the lush toning.

The 1875-S issue belies its 1.2 million-piece mintage with the availability of Uncirculated examples abruptly ending at the MS62 level. Most collections (including many of the finest) lack a Select example of this date. Population: 16 in 63 (2 in 63+), 6 finer (6/15). NGC ID# 26AU, PCGS# 8975

6439 1876 MS61 PCGS. Light Motto. The ephemeral Light Motto is found only on a portion of 1876 Philadelphia twenties. It appears on no other issue, probably because the reverse was modified in 1877 to spell out DOLLARS. The layout of the rays differs from the usual Heavy Motto variety. This apricot-gold example is lustrous and well struck. Slender marks on the cheek and chin determine the grade.
From The Badger Collection. NGC ID# 26AV, PCGS# 8976

1876-CC Double Eagle, AU58
Colorful and Lustrous

6440 1876-CC AU58 NGC. Variety 1-A. Ex: Duquesne. From a series-high mintage of 138,441 pieces, the 1876-CC Liberty double eagle is relatively easy to locate in circulated grades, but Mint State specimens are still elusive. This well-detailed near-Mint example shows just a trace of high-point wear, and the lustrous orange-gold surfaces are free of large or distracting abrasions.

From The Duquesne Collection. NGC ID# 26AU, PCGS# 8977

1876-CC Liberty Twenty, AU58
Some Semiprooflike Surface

- 6441 1876-CC AU58 NGC. Variety 3-A.** A popular Carson City issue, moderately available for the budget-conscious collector seeking a single coin from this mint. The present example is nearly Mint State, showing only trivial friction over the sharply rendered motifs. Bright yellow-gold patina is highlighted by semiprooflike mirroring in the protected regions of the fields.

From The Badger Collection. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU58
Great Color and Surfaces

- 6442 1876-CC AU58 NGC. Variety 2-C,** showing the second C in the mintmark left of the second T in TWENTY and the 1 in the date a bit further from the bust than on the 1-C variety. A die lump appears in Liberty's hair over the R in LIBERTY. This near-Mint State example offers great eye appeal on reddish-orange surfaces that show a few scattered ticks but no singular marks on either side. The large mintage of the 1876-CC, more than 138,000 coins, makes it a great choice for a Type Three Carson City representative.

NGC ID# 26AW, PCGS# 8977

- 6443 1876-S MS61 PCGS.** An attractive Mint State example of this popular type issue, with vibrant mint luster and well-detailed design elements. The bright orange-gold surfaces show the minimum number of minor contact marks for the grade. *NGC ID# 26AX, PCGS# 8978*

1876-S Double Eagle, MS62
Excellent Type Coin

- 6444 1876-S MS62 NGC.** Ex: Duquesne. With a mintage of nearly 1.6 million pieces, the 1876-S Liberty double eagle is one of the most available Type Two twenties, and a popular choice of type collectors. This attractive MS62 example displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster on both sides.

From The Duquesne Collection. NGC ID# 26AX, PCGS# 8978

1876-S Twenty Dollar, Satiny MS62

- 6445 1876-S MS62 PCGS.** A satiny and crisply struck piece with pleasantly unmarked surfaces. A popular issue from the final year of the Type Two design; the denomination would be spelled out beginning in 1877. Clash marks (as made) surround the ear. The mintmark is placed further right than usual, nearly centered above the first T in TWENTY.

Ex: Meads Point Collection / Dallas Signature (Heritage, 12/2005), lot 1729.

From The Badger Collection. NGC ID# 26AX, PCGS# 8978

1877-CC Double Eagle, AU Details
Popular as the First Type Three CC-Mint Issue

- 6446 1877-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** The second C in the mintmark higher than the first, the die line from the rim to star 10, and the clashmarks above Liberty's earlobe confirm the variety. The orange-gold surfaces of this AU Details example display whispers of yellow-gold. The few minute marks are in concert with a lightly circulated large gold coin. The 1877-CC is popular as the first issue of the Type Three design type struck at the Carson City Mint.

1877-CC Double Eagle, AU50
First Type Three CC-Mint Issue

- 6447 1877-CC AU50 NGC. Variety 1-A.** Ex: Duquesne. The 1877-CC Liberty double eagle is always popular as the first Type Three twenty from the Carson City Mint. This attractive AU specimen features sharply struck design elements that show just a trace of wear on the high points. The vivid orange-gold surfaces are lustrous and lightly abraded and overall eye appeal is quite strong.

From The Duquesne Collection. NGC ID# 26AZ, PCGS# 8983

1877-CC Twenty, Lustrous AU55

- 6448 1877-CC AU55 PCGS. Variety 1-A.** The obverse is in a later die state, showing clash marks within Liberty's ear from the shield crossbars on the reverse. Three obverse dies and four reverse dies were combined into five die combinations for the 1877-CC double eagles. This Choice AU example displays frosty yellow-gold surfaces with nearly full luster and minor traces of wear on each side.
Ex: FUN Signature (Heritage, 1/2012), lot 6686. NGC ID# 26AZ, PCGS# 8983

**1877-CC Twenty Dollar, Choice AU
Conditionally Scarce Carson City Issue**

- 6449 1877-CC AU55 PCGS. Variety 2-C.** The first 7 in the date is centered over a dentil, and both Cs in the mintmark are level. This is the first year of implementation for the Type Three design, and CC-mint output amounted to just 42,565 double eagles in that year. Orange-gold surfaces feature boldly rendered relief elements with moderate blending over Liberty's hair strands. The detail is otherwise crisp, and small scattered abrasions are undistracting. NGC ID# 26AZ, PCGS# 8983

**1877-S Twenty Dollar, MS62
Radiant Orange-Gold Luster**

- 6450 1877-S MS62 PCGS.** The inaugural Type Three San Francisco issue, the 1877-S double eagle had a substantial mintage of more than 1.7 million coins, however, pieces surviving finer than the present MS62 example are genuinely rare. This coin displays sharp devices and frosty orange-gold luster. Light, scattered abrasions limit the grade, yet only 32 pieces are numerically finer at PCGS (6/15).
From The Badger Collection. NGC ID# 26B2, PCGS# 8984

1877-S Twenty, Sharp MS62

- 6451 1877-S MS62 PCGS.** The 1877-S is the most plentiful double eagle of this year, and the first San Francisco issue of the Type Three design which shows the denomination spelled out on the reverse, rather than abbreviated. This Uncirculated example is sharply struck, with frosty yellow-gold luster. Light, scattered abrasions are as expected for the grade. PCGS lists 32 numerically finer coins (7/15). NGC ID# 26B2, PCGS# 8984

**1877-S Double Eagle, MS62
First Type Three Twenty**

- 6452 1877-S MS62 NGC. CAC.** Ex: Duquesne. The 1877-S Liberty twenty represents the first year of the Type Three design, an important consideration for type purposes. The 1877-S was produced in large numbers, but relatively few were saved by contemporary collectors, making the issue rare in grades above the MS62 level. The present coin offers well-detailed design elements and vivid, lustrous orange-gold surfaces with some scattered minor contact marks. NGC has graded nine numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26B2, PCGS# 8984

**1878 Liberty Twenty, MS62
Seldom Encountered Any Finer**

- 6453 1878 MS62 NGC.** Ex: Duquesne. Although the 1878 Liberty double eagle is plentiful in lower Mint State grades, the population drops off dramatically at the MS62 level, and finer examples are rare. This sharply detailed example possesses vibrant mint luster and lightly marked yellow-gold surfaces with strong eye appeal. NGC has graded 28 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26B3, PCGS# 8985

**1878-CC Liberty Double Eagle, XF45
Elusive Low-Mintage Issue**

- 6454 1878-CC XF45 NGC. Variety 1-A.** Ex: Duquesne. The 1878-CC Liberty double eagle is a scarce issue in all grades, from a low mintage of 13,180 pieces. This Choice XF example offers sharply struck design elements that show a trace of wear on the coronet and Liberty's hair, but retain most interior detail intact. The lustrous yellow and rose-gold surfaces are lightly abraded. From *The Duquesne Collection*. NGC ID# 26B4, PCGS# 8986

**1878-S Twenty, Vibrant MS62
Warm Coloration**

- 6455 1878-S MS62 PCGS.** A small number of 1878-S double eagles were among the coins discovered in the Saddle Ridge Hoard, but the availability of Mint State coins was largely unaffected. This MS62 example exhibits sharp motifs and rich orange-gold luster. A scattering of minor abrasions limits the grade but poses minimal distraction. Only nine coins are numerically finer at PCGS (6/15). From *The Badger Collection*. NGC ID# 26B5, PCGS# 8987

1879-CC Double Eagle, AU Details.

- 6456 1879-CC — Obverse Damage — NGC Details. AU. Variety 1-A.** Variety 1-A, the only known dies for the 1879-CC double eagle. The mintage was an impressively low 10,708 coins, and examples are rarely encountered today. The Obverse damage is apparently nothing more than a few small dents at the top of Liberty's head on this mostly lustrous light yellow double eagle. NGC ID# 26B7, PCGS# 8989

1879-S Twenty, Lustrous MS61

- 6457 1879-S MS61 PCGS.** Lustrous green-gold surfaces yield hints of rose and peach throughout each side of this 1879-S double eagle. The devices are sharp and abrasions are pleasantly at a minimum for the grade. This San Francisco issue is usually available in MS60 and MS61, but finer examples are seldom encountered. From *The Badger Collection*. NGC ID# 26B9, PCGS# 8991

**1879-S Twenty, Lustrous MS61
Appealing Color**

- 6458 1879-S MS61 PCGS.** Generous cartwheel luster occupies both sides of this Mint State 1879-S twenty dollar, showing appealing wheat-gold and orange-gold coloration amid abrasions that are typical for the grade but not terribly heavy. The strike is sharp throughout. Certified in a green-label holder. NGC ID# 26B9, PCGS# 8991

- 6459 1880 AU55 NGC.** The 1880 Liberty double eagle is a scarcer issue from a mintage of just 51,420 pieces. This impressive Choice AU example is lustrous, well-detailed, and lightly abraded, with just a trace of wear. From *The Duquesne Collection*. NGC ID# 26BA, PCGS# 8992

**1880-S Double Eagle, MS61
Deep Original Color**

- 6460 1880-S MS61 PCGS.** Double eagles of this issue are often sharp and attractive, and the currently offered coin does not disappoint. A scattering of minor abrasions defines the grade, but deep orange and rose-gold hues heighten the eye appeal. The 1880-S twenty is infrequently seen in finer condition. From *The Badger Collection*. NGC ID# 26BB, PCGS# 8993

**1880-S Liberty Double Eagle, MS61
Scarce in Finer Grades**

- 6461 1880-S MS61 NGC. CAC.** Ex: Duquesne. From a mintage of 836,000 pieces, the 1880-S Liberty double eagle is an available issue in circulated grades but even lower Mint State examples are scarce. This sharply detailed MS61 specimen offers brightly lustrous yellow-gold surfaces with a number of minor contact marks that explain the grade. Eye appeal is quite strong. NGC has graded 63 numerically finer examples (5/15).
From *The Duquesne Collection*. NGC ID# 26BB, PCGS# 8993

1881-S Twenty Dollar, Lustrous MS62

- 6462 1881-S MS62 PCGS.** Apricot-gold and reddish-orange patina competes for territory on this Type Three S-mint survivor of the original issue of 727,000 coins. Scattered abrasions on the high points and fields determine the grade, but generous luster is present, producing good eye appeal. The 1881-S is seldom seen in Mint State, and the certified population at PCGS in higher grades is only 21 submissions (6/15).
From *The Badger Collection*. NGC ID# 26BD, PCGS# 8995

**1882-CC Double Eagle, AU50
Nice Color and Luster**

- 6463 1882-CC AU50 NGC. Variety 1-A.** Ex: Duquesne. Coinage of double eagles was suspended for two years at the Carson City Mint, but resumed in 1882 with a mintage of 39,140 pieces. This attractive AU specimen exhibits sharply detailed design elements, with just a trace of high-point wear, and lightly abraded orange-gold surfaces that show a few hints of green and retain much of their original mint luster.
From *The Duquesne Collection*. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, Orange-Gold AU58

- 6464 1882-CC AU58 NGC. Variety 1-B.** The second C in the CC mintmark is slightly higher than the first, and a die crack encircles all of the letter tops on the reverse periphery. Rich luster emanates from this orange-gold near-Mint example, showing scattered ticks and marks among good eye appeal. A couple of copper-colored alloy spots appear on the reverse. The 1882-CC twenties saw a production of only 39,140 pieces. NGC ID# 26BF, PCGS# 8997

**1882-S Double Eagle, MS62
Rose-Tinted Luster**

- 6465 1882-S MS62 PCGS.** Frosty original luster yields primarily green-gold hues, but is occasionally enlivened by tinges of rose-red in the protected regions. Bold design elements are illuminated by a vibrant cartwheel effect, and grade-limiting abrasions are light and evenly distributed over each side. Finer examples are rarely seen.
From *The Badger Collection*. NGC ID# 26BG, PCGS# 8998

**1883-CC Double Eagle, AU53
Surprisingly Strong Definition**

- 6466 1883-CC AU53 NGC. Variety 1-B.** This is the more elusive of two varieties for the date, attributed by the second C in the mintmark positioned left of the D in DOLLAR and die lines within the reverse shield. The 1883-CC is a lower-mintage date with a production of 59,962 pieces. Examples are available for a price through near-Mint condition, but anything finer is out of reach for most enthusiasts. This lightly circulated coin exhibits strongly defined motifs with minimal rub over attractive orange-gold surfaces. The stars show full radials and the hair curls are bold. NGC ID# 26BH, PCGS# 8999

**1883-CC Liberty Twenty, AU53
Well-Produced Carson City Issue**

- 6467** 1883-CC AU53 NGC. CAC. **Variety 2-A.** Ex: Duquesne. From a relatively generous reported mintage of 59,962 pieces, the 1883-CC double eagle was a well-produced issue, making it a popular choice with mintmark type collectors. This attractive AU53 example shows some light wear on the well-detailed design elements and the rich yellow-gold surfaces are lustrous and lightly abraded. *From The Duquesne Collection.* NGC ID# 26BH, PCGS# 8999
-

**1883-CC Double Eagle, Choice AU
Scarcer Die Pairing**

- 6468** 1883-CC AU55 NGC. **Variety 1-B.** Two die marriages exist for the 1883-CC, despite a mintage of less than 60,000 pieces. Variety 1-A is the most often encountered. Variety 1-B is considerably scarcer, and can be identified at arm's length by the mintmark placement, fully between the Y and D in TWENTY DOLLAR. The present butter-gold representative has a thin mark between obverse stars 10 and 11, but is otherwise uncommonly unabraded for the grade and denomination. NGC ID# 26BH, PCGS# 8999
-

1883-CC Double Eagle, AU58

- 6469** 1883-CC AU58 PCGS. **Variety 2-A.** A lemon-gold CC-mint twenty that boasts a bold strike and considerable bright luster. Scattered small to moderate marks correspond to the type and grade. One small spot above obverse star 10, but no abrasions merit individual mention. 1883 was the last full year of production at Carson City during the 1880s, yet fewer than 60,000 double eagles were struck. *From The Badger Collection.* NGC ID# 26BH, PCGS# 8999
-

**1884-CC Liberty Double Eagle, AU53
Vivid Color, Vibrant Luster**

- 6470** 1884-CC AU53 NGC. **Variety 1-A.** Ex: Duquesne. With a reported mintage of 81,139 pieces, the 1884-CC Liberty double eagle is one of the more available Carson City twenties. This impressive AU53 example offers sharply rendered design elements with just a trace of wear on the high points of the devices. The lustrous orange-gold surfaces show highlights of green, with vibrant mint luster on both sides. Surface marks are minimal for the grade. *From The Duquesne Collection.* NGC ID# 26BK, PCGS# 9001
-

1884-CC Double Eagle, AU55

- 6471** 1884-CC AU55 NGC. **Variety 1-A.** The shoulder curl and wingtips show light wear, but cartwheel luster crosses much of the reverse, and luster also fills Liberty's hair and surrounds individual obverse stars. Noticeable abrasions are relegated to a cluster of small marks below Liberty's eye. Just one die marriage is known for the issue. NGC ID# 26BK, PCGS# 9001
-

**1884-CC Twenty Dollar, AU58
Popular Carson City Issue**

- 6472** 1884-CC AU58 NGC. CAC. **Variety 1-A.** An original Borderline Uncirculated example with nearly complete mint luster. The obverse field has its share of moderate marks, but the portrait and the reverse are unexpectedly smooth. The '90-CC is the most available Carson City twenty in the AU58 grade, yet the '84-CC trades for close to the same price. *Ex: Long Beach Signature (Heritage, 9/2007), lot 3865, which realized \$2,530.* *From The Badger Collection.* NGC ID# 26BK, PCGS# 9001
-

6473 1884-S MS62 NGC. Reddish-gold patina resides on both sides of this S-mint twenty dollar, each of which retains most of its luster. The design elements are sharply struck, including the strands of Liberty's hair. Scattered marks, primarily on the obverse, limit the grade. The 1884-S has become more available in recent decades as hundreds of Uncirculated examples have been found in Europe (Fuljenz, 2015).

From The Badger Collection. NGC ID# 26BL, PCGS# 9002

6474 1884-S MS62 PCGS. CAC. San Francisco double eagle output amounted to 916,000 coins, while Carson City struck just 81,139 pieces, and the Philadelphia Mint manufactured a mere 92 proofs. This gorgeous rose and green-gold representative features needle-sharp detail on the stars and hair with an expected number of bagmarks scattered over each side. Bold eye appeal. NGC ID# 26BL, PCGS# 9002

6475 1885-S MS62 NGC. Honey-gold surfaces exhibit well-struck design elements, including most of the strands in Liberty's hair. Moreover, both sides retain most of their luster despite some scattered contact marks. This coin will make a good type selection. While the 1885-S is readily available through MS62, Select examples are very scarce, and higher-grade coins are rare.

From The Badger Collection. NGC ID# 26BP, PCGS# 9005

6476 1885-S MS62 PCGS. An attractive MS62 Type Three double eagle with well-detailed design elements and lustrous peach-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 26BP, PCGS# 9005

1887-S Double Eagle, MS62 Very Scarce in Finer Grades

6477 1887-S MS62 NGC. Ex: Duquesne. The 1887-S Liberty double eagle claims a mintage of 283,000 pieces, somewhat smaller than the usual S-mint production. Still, the issue is not extremely difficult to locate in lower Mint State grades. This attractive MS62 example offers sharply detailed design elements and brightly lustrous greenish-gold surfaces with a scattering of minor contact marks. NGC has graded 24 numerically finer examples (5/15).

From The Duquesne Collection. NGC ID# 26BS, PCGS# 9007

1887-S Twenty Dollar, MS62 Unusually Vibrant

6478 1887-S MS62 PCGS. The 1887-S is date that is moderately available through the MS62 grade level, but becomes conditionally scarce any finer. This piece is boldly rendered and displays radiantly frosty yellow-gold luster. Scattered, grade-limiting abrasions on the obverse pose little distraction, while the reverse shows semiprooflike mirroring in the interior fields.

From The Badger Collection. NGC ID# 26BS, PCGS# 9007

6479 1888 Doubled Die Reverse, FS-801, MS60 PCGS. An important die variety with strong doubling at the lower reverse, especially evident at the bottoms of the letters in the denomination. Housed in a PCGS Regency holder, this Mint State double eagle has frosty yellow luster and exceptional surfaces for the grade. PCGS has certified 52 examples of the doubled die, compared to 903 regular die coins. Population: 4 in 60, 39 finer (7/15). PCGS# 145738

6480 1888-S MS62 PCGS. Rich honey-gold color with coppery accents in the right obverse field. Though both sides have a number of choppy marks, the overall eye appeal is solid for the MS62 grade.

From The Badger Collection. NGC ID# 26BU, PCGS# 9009

1888-S Twenty, Sharp MS63+

6481 1888-S MS63+ PCGS. CAC. A sharp, Plus-graded example of this popular Type Three San Francisco issue. The orange-gold surfaces display satiny luster and are free of any significant abrasions. Only a few light grazes on Liberty's cheek limit the grade. Finer pieces are scarce, with just 51 encapsulated by PCGS (7/15). NGC ID# 26BU, PCGS# 9009

1889 Double Eagle, MS62 Scarce Low-Mintage Issue

6482 1889 MS62 PCGS. CAC. The 1889 double eagle mintage was a low one, at 44,070 coins, and survivors are scarce at all grade levels. This example is highly lustrous, with bright peach-gold toning and much better eye appeal than its MS62 designation might imply. It is sharply struck with grade-consistent abrasions that are mostly confined to the field areas. NGC ID# 2695, PCGS# 9010

**1889-CC Twenty Dollar, AU53
Semiprooflike Fields, Clean Surfaces**

- 6483 1889-CC AU53 NGC. Variety 1-A.** After a four-year slumber, the Carson City Mint resumed coinage in 1889 primarily to strike silver dollars. But 30,945 double eagles were issued that year from the facility, approximately 4% of the production of its San Francisco counterpart. Half eagles and eagles were not coined until 1890. The present 1889-CC twenty displays substantial luster, especially on the reverse. The straw-gold surfaces exhibit scattered small marks, none of which merit further discussion. NGC ID# 26BV, PCGS# 9011

**1889-CC Double Eagle, AU55
Sharply Struck and Lustrous**

- 6484 1889-CC AU55 NGC. Variety 1-A.** Ex: Duquesne. From a mintage of 30,945 pieces, the 1889-CC Liberty double eagle is an available date in the context of the series. This attractive Choice AU specimen features sharply defined design elements that show just a touch of friction on the highest points, and lightly abraded, lustrous surfaces with strong visual appeal.
From The Duquesne Collection. NGC ID# 26BV, PCGS# 9011
- 6485 1889-S MS62 NGC.** Yellow-gold lustrous surfaces exhibit well-struck design features, including Liberty's hair, the obverse star centers, and the eagle's plumage. Distributed marks, perhaps less severe than typically seen on this heavily abraded issue, limit the grade. The 1899-S is a common date in the series through MS63, but the population drops markedly any finer to render this issue elusive.
From The Badger Collection. NGC ID# 26BW, PCGS# 9012

**1889-S Double Eagle, MS63
Original Surfaces**

- 6486 1889-S MS63 PCGS.** An original, distinct color scheme shows warm sun-gold interiors, blending to deeper green-gold margins, while retaining consistently frosted luster throughout. This 1889-S double eagle is boldly struck and shows only a few small abrasions on Liberty's cheek. PCGS has seen just 44 numerically finer representatives (6/15).
From The Badger Collection. NGC ID# 26BW, PCGS# 9012

**1889-S Twenty, Conditionally Scarce MS64+
Outstanding Eye Appeal**

- 6487 1889-S MS64+ PCGS. CAC.** The 1889-S double eagle can be located through the Select level of preservation with relatively little trouble thanks to the discovery of the Saddle Ridge hoard in February 2013. Near-Gems remain very scarce and higher-grade examples are rare. We believe the certified population reports to be inflated by resubmissions. Intense luster emanates from the peach-gold surfaces of this high-end MS64 offering and sharp detail is seen on the design elements. Both sides are remarkably smooth for the grade designation. These attributes add up to give this piece outstanding eye appeal. Population: 74 in 64 (18 in 64+), 5 finer (7/15). NGC ID# 26BW, PCGS# 9012

**1889-S Twenty, MS62 Prooflike
Uncommon Quality**

- 6488 1889-S MS62 Prooflike NGC.** In high grades, this date is frequently absent from major collections, as such coins are in limited supply. The present example combines the desirable attributes of a moderately high grade and prooflike surface to display an uncommonly strong degree of eye appeal. As such, it is a scarce coin, worthy of broad appeal and excited bidding intensity. NGC reports eight Prooflike examples, including this piece in MS62 and a single MS64+ coin finer (6/15).
Ex: Long Beach Signature (Heritage, 9/2006), lot 4201, which realized \$2,530. PCGS# 79012

1890 Double Eagle, MS62
Pleasantly Smooth Surfaces

- 6489 1890 MS62 NGC.** This Philadelphia issue is seldom seen above the MS62 level. The present example is notably appealing for the grade, showing sharp design elements and frosty green-gold luster. Scattered abrasions on Liberty's cheek and in the fields limit the grade, but there are no major distractions observed. NGC lists only 22 numerically finer examples (6/15).
From The Badger Collection. NGC ID# 26BX, PCGS# 9013

1890-CC Twenty Dollar, AU55
Great Color and Surfaces

- 6490 1890-CC AU55 PCGS. Variety 1-A.** This die pair shows the CC mintmark mostly left of the D in DOLLAR, and the early reverse die state signifies that the later lapping has not yet effaced most of the right-side tailfeathers. This Choice AU piece offers great, deep orange-reddish color and minimal wear consistent with the grade. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58
Partially Reflective Fields

- 6491 1890-CC AU58 NGC. Variety 1-A.** A typical late die state example, with the outer tailfeathers of the eagle weakened by die lapping. Nonetheless, the motifs are sharp and the bright yellow-gold fields exhibit noticeable semiprooflike mirroring. As expected for the grade, a few scattered abrasions are observed, but none are individually noteworthy.
From The Badger Collection. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58
Excellent Mintmark Type Coin

- 6492 1890-CC AU58 NGC. CAC. Variety 1-A.** Ex: Duquesne. The 1890-CC Liberty double eagle is a plentiful issue in the context of the series and a popular choice of mintmark type collectors. This attractive near-Mint specimen offers sharply detailed design elements that show almost invisible traces of wear on the highpoints. The colorful orange and greenish-gold surfaces are lustrous and lightly abraded. Eye appeal is outstanding.
From The Duquesne Collection. NGC ID# 26BY, PCGS# 9014

- 6493 1890-SMS62 PCGS.** The lustrous yellow-gold surfaces of this double eagle display whispers of rose and mint-green and exhibit sharply struck design elements. Minute marks determine the grade, but these are fewer and less severe than ordinarily found on this heavily abraded date. This issue is scarce in MS63 and rare any finer.
From The Badger Collection. NGC ID# 26BZ, PCGS# 9015

1891-S Twenty Dollar, MS62
Elusive Prooflike Representative

- 6494 1891-S MS62 Prooflike NGC.** A boldly struck and moderately abraded Liberty Head twenty, with appreciable mirrored brilliance in the fields. Quite scarce with prooflike qualities. NGC has so-designated only 16 coins in all grades, with five in MS62 and none finer (6/15).
Ex: *New York Signature* (Heritage, 6/2005), lot 6755; *Long Beach Signature* (Heritage, 9/2005), lot 5097. PCGS# 79018

1892-CC Twenty, Sharp AU58

- 6495 1892-CC AU58 PCGS.** Both sides of this near-Mint State CC-mint example retain considerable luster on the reddish-gold surfaces. The design elements are sharply struck, including Liberty's hair and the beads on the crown, star centers, and the eagle's plumage. The few minute marks present are less than might be expected for a coin having seen brief circulation. Mint State pieces are difficult to come by, making AU58s an excellent alternative.
Ex: New York Signature (Heritage, 11/2013), lot 3914. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty, Near-Mint Attractive Peach Patina

- 6496 1892-CC AU58 NGC. CAC.** Pleasing peach-gold patina accompanies the legends and stars of this better-date Carson City double eagle. The cartwheel luster is substantial, and the surfaces are less abraded than is customary for the designated grade. CAC is finicky with the issue, and shows only an AU58 population of 13 pieces (6/15).
*Ex: West Palm Beach FUN Signature (Heritage, 7/2007), lot 3004.
From The Badger Collection. NGC ID# 26C6, PCGS# 9020*

1892-CC Twenty, Unc Details Good Remaining Eye Appeal

- 6497 1892-CC — Improperly Cleaned — NGC Details. Unc. Variety 1-A.** The 1892-CC double eagle saw a remarkably small mintage of 27,265 pieces, and most are circulated to some degree. This example shows some prooflike reflectivity, as might be expected on such a low-mintage issue, but the fields are rather extensively hairlined on top, indicative of cleaning. The golden-orange surfaces nonetheless still exhibit good eye appeal and a nice sharp strike. NGC ID# 26C6, PCGS# 9020

- 6498 1892-S MS63 NGC.** The 1892-S Liberty double eagle is very scarce in grades above the MS63 level. This attractive Select example exhibits well-detailed design elements and lustrous green and rose-gold surfaces with scattered minor contact marks. NGC has graded 72 numerically finer examples (5/15).
From The Duquesne Collection. NGC ID# 26C7, PCGS# 9021

- 6499 1892-S MS63 NGC.** This attractive Select specimen exhibits well-detailed design elements and vibrant mint luster throughout. The orange-gold surfaces display a scattering of minor contact marks that explain the grade. NGC ID# 26C7, PCGS# 9021

1892-S Twenty Dollar, MS64 Great Luster and Color

- 6500 1892-S MS64 PCGS. CAC.** This high-grade Type Three S-mint Liberty twenty is certified in a PCGS small-size green-label holder and shows the CAC green approval sticker in addition to its own broad eye appeal, a coin that should find a spate of willing bidders. Beautiful orange-gold color and top-notch cartwheel luster that would not be out of place on a Morgan dollar are hallmarks of this coin. A small scrape below star 13 is the only mentionable contact. NGC ID# 26C7, PCGS# 9021

- 6501 1893 MS63 PCGS. CAC.** This attractive Select specimen offers well-detailed design elements and brightly lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 26C8, PCGS# 9022

- 6502 1894-S MS63 NGC.** The pleasing original orange-gold surfaces of this impressive Select example are lightly marked and display ample mint luster on both sides. The design elements are well-detailed and overall visual appeal is quite strong.
From The Duquesne Collection. NGC ID# 26CC, PCGS# 9026

1897-S Double Eagle, MS61 Prooflike

- 6503 1897-S MS61 Prooflike NGC.** Seldom encountered with prooflike surfaces. Struck from Klondike gold, this readily available San Francisco date shows numerous friction-like marks that interrupt the mirrored fields, but is devoid of major abrasions. The coin displays a bold strike and flashy, medium-gold color. PCGS# 79032

- 6504 1898 MS62 NGC. CAC.** *Ex: Duquesne.* The vivid orange-gold surfaces of this attractive MS62 double eagle show a few highlights of lilac and vibrant mint luster on both sides, with a moderate number of minor contact marks for the grade. The design elements are well-detailed and eye appeal is quite strong.
From The Duquesne Collection. NGC ID# 26CK, PCGS# 9033

**1900 Double Eagle, MS65+
Copious Cartwheel Luster**

6505 1900 MS65+ PCGS. At one time, the mintage for the 1900 double eagle, exceeding 1.8 million coins, appeared large. Then the 1904 and 1904-S issues came along, more than 11 million pieces between them. The 1900 double eagle can nonetheless be obtained up to the Gem grade (beyond is harder) for a price. This is a lovely orange-gold example sporting copious cartwheel luster and a bold strike. One thin mark crosses Liberty's face, and a small luster graze is just right of 1 in the date. Population: 10 in 65+, 2 finer (7/15). NGC ID# 26CP, PCGS# 9037

6506 1901 MS64+ PCGS. Crisply struck at the centers, this high-end Liberty double eagle has vibrant frosty luster over minimally abraded lavender and peach-gold surfaces. Several minor copper alloy spots occur on each side, as usual. An ideal type representative. NGC ID# 26CS, PCGS# 9039

**1901-S Twenty Dollar, MS63
Rich Luster**

6507 1901-S MS63 PCGS. Rich reddish-orange luster is the calling card of this 1901-S double eagle, showing some scattered abrasions on each side, mostly minor, that account for the grade. The eye appeal is good overall, despite a strike that is somewhat blunt on some of the high points and some parallel planchet striations appearing on both sides but more prominent on the obverse. NGC ID# 26CT, PCGS# 9040

6508 1902 MS61 NGC. CAC. Ex: Duquesne. An attractive Mint State double eagle, with sharply detailed design elements and bright orange-gold surfaces that show a number of minor contact marks on both sides, with ample mint luster and eye appeal. From *The Duquesne Collection*. NGC ID# 26CU, PCGS# 9041

6509 1902-S MS63 NGC. Ex: Duquesne. Like most coins in this collection, this attractive MS63 double eagle displays vibrant mint luster and vivid orange-gold surfaces, with a scattering of minor contact marks that explain the grade. The design elements are well-detailed and eye appeal is quite strong. From *The Duquesne Collection*. NGC ID# 26CV, PCGS# 9042

6510 1903 MS64+ NGC. Although there is no designation, this Choice Mint State double eagle has mirrored fields around its boldly defined and lustrous devices. NGC has only certified 18 prooflike 1903 double eagles, and none of those are finer than this undesignated example (7/15). NGC ID# 26CW, PCGS# 9043

**1904 Twenty Dollar, Bold MS65
Generous Luster**

6511 1904 MS65 NGC. CAC. Only the huge production of more than 6.2 million pieces and their subsequent good preservation enabled the existence of coins such as this stunning NGC Gem 1904 twenty. Orange-gold surfaces show the typical bold strike, minimal abrasions, and generous luster. A great type coin. From *The Glacier Collection*. NGC ID# 26CY, PCGS# 9045

6512 1904 MS61 Prooflike NGC. Apricot-gold toning embraces both sides of this 1904 double eagle. The design features are sharply struck, including the strands of Liberty's hair. Scattered marks, especially on Liberty's cheek and in the left obverse field, account for the grade. From a mintage exceeding 6.2 million pieces, the 1904 is a readily available issue, and as such is a popular type coin. Ex: *Chicago Signature (Heritage, 8/2011)*, lot 11952. PCGS# 79045

6513 1904 MS62 Prooflike NGC. Lime-green highlights visit the warm, orange-gold surfaces of this eye-stopping, prooflike double eagle. Marks are infrequent and the strike is bold, with a mellow mirrored appeal seldom encountered at this grade level. PCGS# 79045

6514 1904 MS62 Prooflike NGC. A sharp strike and fully mirrored fields are evident on this brilliant yellow-gold prooflike 1904 double eagle. Slight field-to-device contrast heightens the eye appeal of this splendid twenty. PCGS# 79045

6515 1904 MS62 Prooflike NGC. Reflective satin devices are boldly defined on this lovely double eagle that displays brilliant mirrored fields. Scattered marks are expected at this grade level. PCGS# 79045

6516 1904 MS63 Prooflike NGC. An unusually large number (773 pieces) of this issue have been certified as Prooflike by NGC. This brassy example is superior to most of those, with moderate to deep mirrors and a sharp strike. Scattered marks are noted on both sides. PCGS# 79045

6517 1904 MS63 Prooflike NGC. Both sides of this Select Mint State double eagle display fully mirrored surfaces and bold design motifs with light cameo contrast. A sharp strike and brilliant light yellow-gold surfaces enhance the eye appeal. PCGS# 79045

6518 1904-S MS64 ★ NGC. The lightly marked orange-gold surfaces of this high-end Choice specimen show prooflike reflectivity in many areas. The design elements are well-detailed and the outstanding eye appeal is attested by the star designation. NGC ID# 26CZ, PCGS# 9046

1905 Double Eagle, MS62
Attractive for the Grade

- 6519 1905 MS62 NGC.** Appreciably vibrant, yellow-gold mint frost accentuates the sharp design elements of this 1905 Liberty double eagle. Scattered abrasions are uncommonly minor in nature and pose comparably little distraction. The 1905 is a better date in the 20th century portion of the series, boasting a mintage of only 58,919 pieces. NGC has seen just 19 coins numerically finer than the present example (6/15).
From The Badger Collection. NGC ID# 26D2, PCGS# 9047

- 6520 1905-S MS62 NGC.** Both sides of this S-mint twenty dollar display considerable luster on its honey-gold surfaces that are imbued with hints of olive-green. The design elements are well-impressed throughout, including the strands in Liberty's hair. Contact marks are more evident on the obverse.
From The Badger Collection. NGC ID# 26D3, PCGS# 9048

- 6521 1905-S MS62 NGC. CAC. Ex: Duquesne.** Vibrant mint luster and vivid orange-gold color are the outstanding visual attributes of this attractive MS62 double eagle. The design elements are well-detailed and the surfaces show a scattering of grade-consistent minor contact marks on both sides.
From The Duquesne Collection. NGC ID# 26D3, PCGS# 9048

1905-S Double Eagle, MS64+
Rarely Encountered Finer

- 6522 1905-S MS64+ NGC. CAC.** The 1905-S double eagle is usually available in lower circulated grades, but not to the extent suggested by its mintage of more than 1.8 million coins. Choice examples are more elusive than they theoretically should be, and Gems are rare. This Plus-graded MS64 example displays a bold strike and vibrant yellow-gold luster. A scattering of insignificant ticks is not bothersome to the naked eye. NGC lists only nine finer pieces (7/15). NGC ID# 26D3, PCGS# 9048

- 6523 1906 MS61 PCGS.** Beautiful deep peach-gold color and lively luster are attributes of this Mint State 1906 double eagle, certified in a green-label holder. Abrasions are as expected, but the strike is sharp. The low mintage was only 69,500 coins in this year. NGC ID# 26D4, PCGS# 9049

1906 Double Eagle, MS62
Smooth, Satiny Patina

- 6524 1906 MS62 PCGS.** For the grade, this 1906 double eagle is quite appealing, showing soft yellow-gold patina and unusually smooth surfaces that are free of distracting abrasions. Well-struck, with satiny luster illuminating the fields. This date had a limited production of just 69,596 coins, and is infrequently seen finer than MS62.
From The Badger Collection. NGC ID# 26D4, PCGS# 9049

1906 Double Eagle, Appealing MS62+
Low-Mintage Issue

- 6525 1906 MS62+ NGC.** The perception of Philadelphia as the "common double eagle producer" has perhaps led some in the numismatic community to overlook the remarkably low output of the 1906 twenty dollar issue, at around 70,000 coins. (The 1902 and 1905 are also low-mintage issues.) Most certified survivors are scarcely Mint State, if that. This appealing example boasts a sharp strike amid good luster on medium yellow-gold surfaces. Small- and medium-sized abrasions account for the grade, including some on Liberty's cheek. NGC ID# 26D4, PCGS# 9049

1906-D Twenty, Frosty MS63

- 6526 1906-D MS63 NGC.** The appeal of this coin is perhaps not so much its scarcity, but more its original luster and attractive green-gold color scheme that shows tinges of peach and rose. The strike is sharp and a few grade-limiting abrasions are restricted to the high points of the devices. The fields are largely clean.
From The Badger Collection. NGC ID# 26D5, PCGS# 9050

**1906-D Twenty Dollar, MS64+
Strong Strike, Minimally Marked**

6527 1906-D MS64+ PCGS. Mike Fuljenz writes of the 1906-D in the most recent edition of *Type Three Double Eagles 1877-1907*: "This is the better struck of the two Denver issues of this design. The quality of strike seen on most 1906-D double eagles is quite sharp with strong centers and borders." Such is the case with this amazing Plus-designated near-Gem. Moreover, while the issue typically comes heavily bagmarked, this lustrous, even reddish-gold representative is surprisingly clean aside from a few more prominent reeding marks at the lower right reverse. PCGS has seen just 13 finer examples (7/15). NGC ID# 26D5, PCGS# 9050

**1906-S Double Eagle, MS64+
Nearly Uncollectible in Better Condition**

6528 1906-S MS64+ PCGS. CAC. With a mintage of just over 2 million coins, the 1906-S is a fairly available issue through Select condition. Choice examples are scarce (rare in MS64+), while higher-graded coins are very rare. Light rose-gold color covers the radiant surfaces of this Plus-designated and CAC-endorsed near-Gem. The stars show full radials, and the hair is completely delineated. Minimally marked. PCGS records a mere four submissions finer (7/15). NGC ID# 26D6, PCGS# 9051

6529 1907 MS64 PCGS. The vivid orange-gold surfaces of this attractive Choice specimen are well-preserved and brightly lustrous, with sharply detailed design elements throughout. Always in demand as a final-date type issue. PCGS has graded 17 numerically finer examples (7/15). NGC ID# 26D7, PCGS# 9052

**1907-D Double Eagle, MS63
Final Year of Design**

6530 1907-D MS63 NGC. Ex: Duquesne. This impressive Select double eagle represents the final year of the Liberty design and just the second year of coinage at the Denver Mint. The design elements are well-detailed and the vivid orange-gold surfaces radiate vibrant mint luster, with only minor signs of contact. Eye appeal is outstanding. *From The Duquesne Collection.* NGC ID# 26D8, PCGS# 9053

**1907-D Twenty Dollar, MS63
Soft, Frosty Surfaces**

6531 1907-D MS63 NGC. Glowing, frosty surfaces yield yellow and green-gold hues on this Select 1907-D double eagle. The devices are boldly rendered and only a few minor grazes on Liberty's cheek limit the grade. This final-year Denver issue is moderately available in pleasing Mint State condition, obtainable for type purposes. *From The Badger Collection.* NGC ID# 26D8, PCGS# 9053

**1907-D Double Eagle, MS62 Prooflike
Deeply Mirrored**

6532 1907-D MS62 Prooflike NGC. Gleaming wheat-gold fields endorse the Prooflike designation on this eye-catching final-year D-mint example. The strike is sharp, and were it not for a few light lines in the fields, this piece might have garnered a higher grade. NGC has seen 16 Prooflike examples overall, including five MS62 (one MS62 ★), and seven finer (6/15). PCGS# 79053

6533 1907-S MS63 NGC. Ex: Duquesne. An attractive Select example from the final year of the Liberty design, this coin displays well-detailed design elements and vibrant mint luster on both sides. The vivid orange-gold surfaces show a scattering of minor contact marks, all consistent with the grade. *From The Duquesne Collection.* NGC ID# 26D9, PCGS# 9054

6534 1907-S MS63 PCGS. While the Philadelphia Mint was in the process of transitioning to the Saint-Gaudens design in 1907, the San Francisco branch remained completely devoted to the coinage of Liberty Head double eagles throughout the year. This issue had a mintage of more than 2.1 million pieces, and is suitable for type purposes. The present Select example shows a sharp strike and satiny orange-gold luster, with minimal abrasions. NGC ID# 26D9, PCGS# 9054

**1907-S Twenty Dollar, MS64+
Amazing Quality, Prohibitively Rare Any Finer**

- 6535 1907-S MS64+ NGC. CAC.** The 1907-S is readily collectible in lower Mint State grades with heavy bagmarks, but in Choice condition "it is the rarest of the three double eagle 1907 issues" (Garrett and Guth, 2006). This high-end near-Gem is just a half grade point from being a significant condition rarity that would fetch well into the five-figure price range. Frosty medium orange-gold surfaces feature needle-sharp design definition, and abrasions are minimally scattered. NGC reports just 17 submissions finer (7/15). NGC ID# 26D9, PCGS# 9054

HIGH RELIEF DOUBLE EAGLES

**1907 High Relief Wire Rim Twenty
VF Details**

- 6536 1907 High Relief, Wire Rim — Mount Removed — PCGS Genuine. VF Details.** An affordable example of the High Relief issue, ideal for the collector on a budget. The detail is strong for the VF level, but the sharpness of the finer elements is softened by extensive cleaning from the coin's life as part of a piece of jewelry. The mount removal noted by PCGS is evident at 10 and 2 o'clock on the rim. NGC ID# 26F2, PCGS# 9135

**1907 Saint-Gaudens Twenty, Unc Details
High Relief, Flat Rim Variant**

- 6537 1907 High Relief, Flat Rim — Improperly Cleaned — NGC Details. Unc.** An unworn and lightly marked example of this iconic issue, with sharply detailed design elements and lustrous orange-gold surfaces that display a slightly unnatural sheen. The overall presentation is quite attractive despite the noted cleaning. The scarcer Flat Rim variety. PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

- 6538 1907 Arabic Numerals MS64 NGC.** Certified in an old-style NGC "no line fatty" holder, this lovely near-Gem 1907 Arabic Numerals twenty sports luminous luster on well-preserved (and equally well-struck) surfaces. A great example for type purposes. NGC ID# 26F5, PCGS# 9141

- 6539 1908 No Motto MS65 PCGS.** Short Rays Obverse. This sun-gold Gem has a crisp strike and potent luster. Close to pristine except for a moderate field mark near Liberty's branch. A two-year design subtype. NGC ID# 26F6, PCGS# 9142

- 6540 1908-D No Motto MS64 PCGS.** Short Rays Obverse. A lustrous caramel-gold example. Only lightly abraded except for moderate scuffs on the drapery below the torch. Scarcer than the Philadelphia No Motto variety in better Mint State grades. NGC ID# 26F7, PCGS# 9143

1908-D No Motto Twenty, Top-Notch MS65

- 6541 1908-D No Motto MS65 PCGS. CAC.** This Gem 1908-D No Motto twenty virtually provides a model for what the issue should look like in this grade. Great luster runs over orange-gold surfaces with minimal abrasions and a nice sharp strike. The fields show a somewhat mattelike texture. A top-notch example, approved by CAC as well. PCGS reports only 10 in MS66 or finer (7/15). *From The Glacier Collection.* NGC ID# 26F7, PCGS# 9143

- 6542 1908 Motto MS63 PCGS.** The columns and rows on the Capitol are clear, as are the fingers on Liberty's torch hand. This Select first-year type coin has glowing luster over primarily green-gold surfaces with lightly scattered marks. The reverse is remarkably clean for the grade. All 1908 Motto twenties were struck after July 1. NGC ID# 26F8, PCGS# 9147

**1908 Twenty Dollar, MS64+
With Motto**

- 6543 1908 Motto MS64+ PCGS. CAC.** The luster on this first-year With Motto Saint-Gaudens twenty is especially attractive, showing vibrant wheat-gold hues on each side. Light, scattered grazes are not overly obtrusive and there are no singularly mentionable abrasions. Sharp detail is seen throughout the eagle's feathers and Liberty's torch hand shows well-delineated fingers. NGC ID# 26F8, PCGS# 9147

- 6544 1908-D Motto MS64 NGC.** This impressive Choice example represents the first year of the Motto design. The design elements are sharply detailed and the lustrous orange-gold surfaces are free of mentionable distractions. NGC ID# 26F9, PCGS# 9148

- 6545 1908-D Motto MS64 PCGS.** In 1908, Denver Mint production of the With Motto twenties amounted to 349,500 pieces. Coins are available in nearly any desired grade, including MS64 like this frosty and brilliant example. Both sides have wisps of rose over light yellow-gold surfaces with a few small marks.
Ex: *Central States Signature (Heritage, 4/2011)*, lot 6932. NGC ID# 26F9, PCGS# 9148

**1908-D Motto Twenty, MS64
Relatively Unabraded**

- 6546 1908-D Motto MS64 PCGS. CAC.** The wheat-gold surfaces show a thin ring of orange around parts of the periphery and some smoke-gray accents in the fields. Abrasions are minor for the assigned grade and removed from the focal points, and the luster is excellent, making this piece a great candidate for type purposes. NGC ID# 26F9, PCGS# 9148

**1908-S Twenty Dollar, VF35
Lowest Mintage in the Series**

- 6547 1908-S VF35 PCGS.** The 1908-S has the lowest mintage among regular-issue Saint-Gaudens twenties (22,000 coins minted), and it is one of the most elusive dates after the heavy melt rarities with which the series concludes. Unlike most other Saint-Gaudens double eagles, the 1908-S actually served as a medium of exchange in the West. This well-circulated, bright yellow-gold representative shows an expected amount of rub over the devices and myriad abrasions scattered over each side. An excellent capstone example for the budget-minded collector. NGC ID# 26FA, PCGS# 9149

- 6548 1909/8 AU58 NGC. FS-301.** This "slider" is oh so close to Uncirculated, showing a slightly thinned luster in the fields rather than perceptible wear. The mattelike orange-gold surfaces are quite well-preserved, sharply struck, and free of distractions. NGC ID# 26FC, PCGS# 9151

- 6549 1909 MS63 PCGS. CAC.** Satiny luster shows evidence of die erosion in the fields on this Select 1909 double eagle, but the design sharpness is unaffected. Orange-gold patina glows amid a vibrant cartwheel effect, with few noticeable abrasions. NGC ID# 26FB, PCGS# 9150

**1909-D Twenty Dollar, High-End MS63
Sharply Struck and Lustrous**

- 6550 1909-D MS63 PCGS.** The memorably low mintage of the 1909-D Saint-Gaudens was only 52,500 pieces, and few survive as nice as this Select Mint State example. Excellent luster runs over orange-gold surfaces that seem to verge on an even finer grade, were it not for a couple of stray marks, including one on Liberty's face and a patch of small luster grazes in the right obverse field. The strike is sharp throughout both sides. NGC ID# 26FD, PCGS# 9152

- 6551 1910 MS64+ PCGS.** The 1910 Saint-Gaudens twenty is an available issue through MS64, above which it becomes conditionally scarce. This typically sharp near-Gem shows swirling mint frost over orange and rose-gold surfaces, and above-average preservation with light, well-hidden marks scattered throughout. NGC ID# 26FF, PCGS# 9154

**1911 Saint-Gaudens Twenty, MS64
Scarce Any Finer**

- 6552 1911 MS64 PCGS.** The 1911 Saint-Gaudens double eagle boasts a smaller-than-average mintage of 197,250 pieces and the issue is very scarce in grades above the MS64 level. This attractive Choice example is sharply detailed, with well-preserved orange-gold surfaces and vibrant mint luster. Eye appeal is outstanding. PCGS has graded 54 numerically finer examples (7/15). NGC ID# 26FJ, PCGS# 9157

- 6553 1911-D MS65 PCGS.** This boldly defined Gem Saint-Gaudens double eagle will serve an advanced Saint-Gaudens collector or a Denver Mint type collector. This piece has frosty and fully lustrous yellow-gold surfaces with excellent eye appeal. NGC ID# 26FK, PCGS# 9158

**1911-D Saint-Gaudens Twenty, MS66
Excellent Type Selection**

- 6554 1911-D MS66 NGC.** While the Denver twenty dollar issue is generally available in Gem condition, finer coins become scarce. This MS66 example is among the increasingly challenging representatives — still available at a reasonable price for type, but virtually unavailable any finer. Sharply struck, frosty, and brightly lustrous, the coin is every bit a Premium Gem and it is highly desirable as such. NGC reports just 34 finer coins (7/15). NGC ID# 26FK, PCGS# 9158

**1911-D/D Double Eagle, MS65
FS-501 Doubled Mintmark**

- 6555 1911-D/D FS-501 MS65 PCGS.** The mintmark is boldly doubled outside the right curve on this scarce variety. The 1911-D/D is not currently listed in the popular price books such as the Guide Book, but it should be in our opinion. Such a listing would dramatically influence the valuation. This piece has muted mint frost with brilliant orange-gold luster and exceptional eye appeal. PCGS# 145010 Base PCGS# 9158

**1911-D/D Twenty Dollar, MS66
Repunched Mintmark**

- 6556 1911-D/D FS-501 MS66 PCGS.** The mintmark shows bold repunching left. This is one of the most collectible branch mint issues in the Saint-Gaudens double eagle series. The design motifs on each side exhibit pinpoint definition, while tiny marks are scant and unobtrusive. A highly lustrous orange-gold representative with no shortage of appeal. Population for the variety: 38 in 66, 0 finer (7/15). PCGS# 145010 Base PCGS# 9158
- 6557 1913-D MS64 PCGS.** This sharply struck orange-gold near-Gem boasts scintillating luster and attractively preserved surfaces. A good value relative to higher grades. Encapsulated in a green-label holder. NGC ID# 26FP, PCGS# 9162

1913-D Double Eagle, MS65

- 6558 1913-D MS65 NGC.** A sun-gold example with dynamic luster and a sharp strike. Both sides display only minor abrasions. The former generation holder has a small chip on the upper left border that does not affect its integrity. The 1913-D can be located as a Gem but it is a costly acquisition any finer. NGC ID# 26FP, PCGS# 9162

- 6559 1914 MS63 NGC.** The 1914 is one of the lowest-mintage issues in the Saint-Gaudens series (95,250 coins). Examples are typically heavily abraded and become conditionally scarce in MS64. This Select piece offers lustrous green-gold surfaces and an expected number of bagmarks. Well-struck with trivial high-point softness. NGC ID# 26FS, PCGS# 9164

- 6560 1914 MS63 PCGS.** A pleasing Select Mint State example of the scarce, low-mintage 1914 double eagle. Just 95,200 examples were minted and survivors are infrequently encountered. NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64+
Nearly Unobtainable in Higher Grades**

- 6561 1914 MS64+ PCGS. CAC.** The 1914 claims a low mintage of 95,000 coins, most of which were exported overseas and survive with heavy bagmarks. This carefully preserved near-Gem features splendid rose-gold hues centrally surrounded by pale, even reddish-gold coloration and coruscating luster throughout. The torch hand and Capitol building show delineation of the fingers and columns, and the eagle's feathers are equally bold. A marvelous representative of Saint-Gaudens' acclaimed design. Both the Plus designation and CAC endorsement speak to the quality of this Choice piece. Rare in higher grades. NGC ID# 26FS, PCGS# 9164

- 6562 1914-D MS65 PCGS.** Vibrant mint luster and vivid orange-gold surfaces are the calling cards of this delightful Gem, with sharply detailed design elements and outstanding eye appeal. PCGS has graded 65 numerically finer examples (7/15). NGC ID# 26FT, PCGS# 9165

- 6563 1914-S MS65 PCGS.** The 1914-S Saint-Gaudens double eagle becomes scarce in grades above the MS65 level. This well-detailed Gem displays well-preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 26FU, PCGS# 9166

- 6564 1916-S MS64 PCGS.** The vivid orange-gold surfaces of this attractive Choice example show only minor signs of contact, with ample mint luster on both sides. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 26FX, PCGS# 9169

6565 1920 MS63 PCGS. CAC. Just 228,250 double eagles were minted in Philadelphia in 1920 as gold production resumed following World War I. This Select Mint State example has brilliant yellow-gold surfaces with trivial, grade-consistent marks. NGC ID# 26FY, PCGS# 9170

**1920 Saint-Gaudens Twenty, MS64
Conditionally Very Rare in Higher Grades**

6566 1920 MS64 PCGS. CAC. Although the 1920 Saint-Gaudens double eagle is not difficult to locate in MS64, the issue is a prime condition rarity in finer grades. This attractive Choice specimen offers well-preserved orange-gold surfaces, with vibrant mint luster and well-detailed design elements. PCGS has certified only one coin in higher numeric grade (7/15). NGC ID# 26FY, PCGS# 9170

**1920 Saint, MS64+
Fantastic Luster and Color**

6567 1920 MS64+ PCGS. CAC. The 1920 Saint-Gaudens twenty is one of those curious issues in the series, quite available in Choice condition but virtually unknown in Gem. This lovely coin splits the difference, showing fantastic luster on surfaces that alternate between greenish-gold and orange-gold color. Minimal marks and copious luster separate this piece from most of its cohort, as does the CAC endorsement. Population: 45 in 64+, 1 finer (7/15). NGC ID# 26FY, PCGS# 9170

**1922-S Double Eagle, MS64+
Heavily Melted Branch Mint Issue**

6568 1922-S MS64+ PCGS. This San Francisco issue suffered from mass meltings after the Gold Recall of April 1933, along with many other branch mint issues from the 1920s and 1930s stored in vaults at the time the Executive Order was signed. Minor strike softness occurs at the lower obverse, but the overall impression is sharp. Butter-gold surfaces show minimally scattered marks, and three noticeable nicks on Liberty's left leg likely prohibit an even higher grade. There are only 16 finer submissions at PCGS (7/15). NGC ID# 26G4, PCGS# 9174

6569 1924 MS65 NGC. This available date is a favorite among type collectors. The present Gem is vibrantly lustrous and boldly struck. A loupe reveals light, scattered ticks, not out of line for the grade and none of which are individually bothersome. NGC ID# 26G7, PCGS# 9177

6570 1924 MS66 PCGS Secure. Despite its rank as the most plentiful issue in the entire Saint-Gaudens series, the 1924 is elusive in top grades, and PCGS has only certified 90 finer pieces (7/15). An impressive example, this 1924 is ideal for a high-grade gold type set. Both sides exhibit bold design motifs and brilliant yellow luster. NGC ID# 26G7, PCGS# 9177

6571 1924 MS66+ PCGS. Nearly the entire mintage of 4.3 million coins was exported overseas, and well-preserved examples are collectible even in this high grade. This Premium Gem features bold definition on the Liberty's torch hand, face, and leg. Highly lustrous orange-gold surfaces are astonishingly unabraded. A perfect Saint-Gaudens type coin. NGC ID# 26G7, PCGS# 9177

6572 1924-D AU53 NGC. This D-mint issue is scarce in all grades, and this lightly circulated example represents a more affordable opportunity for a collector to own an example. A few larger abrasions are present on the obverse. Most of the luster is present in the fields, with just a bit of friction over the highpoints. NGC ID# 26G8, PCGS# 9178

**1924-D Twenty Dollar, MS62+
Heavily Melted Semikey**

6573 1924-D MS62+ PCGS. The Gold Recall of 1933 saw the mass-melting of several mid-to-late date branch mint double eagle issues, the 1924-D among them. More than 3 million coins were struck, but probably only 1,000 or so examples survive. This MS62+ representative is minimally marked for the grade, though small abrasions are scattered throughout. Medium orange-gold surfaces feature well-detailed motifs and shimmering satin luster. NGC ID# 26G8, PCGS# 9178

**1924-D Saint-Gaudens Twenty, MS63+
Lustrous, Colorful Example**

6574 1924-D MS63+ PCGS. CAC. Despite the reported mintage of more than 3 million pieces, the 1924-D Saint-Gaudens double eagle is a better date in high grade. This high-end Select example exhibits sharply detailed design elements, aside from a few peripheral stars, and lightly marked orange-gold surfaces, with hints of red and vibrant mint luster. NGC ID# 26G8, PCGS# 9178

6575 1925 MS66 PCGS. The rich yellow-gold surfaces of this delightful Premium Gem radiate vibrant mint luster with a few hints of peach. The design elements are sharply detailed and no mentionable distractions are evident. PCGS has graded seven numerically finer examples (7/15). NGC ID# 26GA, PCGS# 9180

TERRITORIAL GOLD

1851 Reeded Edge Humbert Fifty, K-7, VF Details 887 Thous. Variety

- 6582** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. — **Tooled** — **PCGS Genuine. VF Details. K-7, R.4.** We would describe the surfaces of this piece not so much tooled — although they are that — as “engraved,” as someone has placed fine engraved lines throughout much of the obverse. It is, of course, now impossible to determine what is original wear versus later artistry. This is a piece that must be inspected personally, but it proves a belief we have long held — that it is impossible to erase the eye appeal and cachet these coins possess. This Reeded Edge 887 Thous. Humbert fifty dollar may form a cornerstone of some collector’s assemblage of Territorial gold. Listed on page 385 of the 2016 *Guide Book*. **PCGS# 10214**

- 6576** 1925 MS66 NGC. The grading services have seen at least 100,000 1925 double eagles, but most examples are bagmarked from indifferent storage and shipment. The present sun-gold Premium Gem has potent luster and a sharp strike, but its standout feature is its minimal evidence of abrasions.
Ex: Long Beach Signature (Heritage, 6/2005), lot 8252; Orlando FUN Signature (Heritage, 1/2008), lot 5112. NGC ID# 26GA, PCGS# 9180

1925-D Double Eagle, MS61 Elusive in Any Grade

- 6577** 1925-D MS61 NGC. While the Gold Recall wiped out much of the nearly 3 million-piece mintage, a few fortunate coins survived in private hands and others were tucked away in small European hoards, returning to the collector market over the past few decades. The issue remains scarce in all grades. This lustrous, frosty example shows no major marks and a reasonably strong strike at the centers, with just a bit of weakness at the obverse periphery. A popular mintmarked Saint, always in demand. **NGC ID# 26GB, PCGS# 9181**

1925-S Saint-Gaudens Double Eagle, AU55 Challenging Branch Mint Issue

- 6578** 1925-S AU55 NGC. CAC. Despite the ample reported mintage of 3.7 million pieces, the 1925-S Saint-Gaudens double eagle has always been a challenging date, especially in higher Mint State grades. Undoubtedly, most of the large production total was melted after the Gold Recall of 1933. This attractive Choice AU example shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain almost all of their original mint luster. **NGC ID# 26GC, PCGS# 9182**

- 6579** 1927 MS65 NGC. Sharply detailed in most areas, this attractive Gem shows just a touch of softness on the Capitol and Liberty’s torch hand. The well-preserved yellow and rose-gold surfaces radiate vibrant mint luster. **NGC ID# 26GG, PCGS# 9186**

- 6580** 1927 MS65 NGC. A common date in the Saint-Gaudens double eagle series, the 1927 is one of five issues that are frequently chosen for type sets. This Gem has frosty light yellow luster with excellent eye appeal. **NGC ID# 26GG, PCGS# 9186**

- 6581** 1927 MS66 PCGS. Potent luster sweeps this magnificently preserved Saint-Gaudens double eagle. The strike is sharp and the eye appeal is excellent. Ideal for type purposes, given the cost of an MS67. Certified in a first generation holder. **NGC ID# 26GG, PCGS# 9186**

**Miners Bank Ten Dollar, K-1
Plain Border, AU Details**

- 6583 (1849) Miners Bank Ten Dollar, Plain Border — Cleaning — PCGS Genuine. AU Details. K-1, R.6.** The Miners Bank was among the early issuers of private gold coins in California. The principals were Stephen A. Wright and Samuel W. Haight. Eventually, assays confirmed that the coins were moderately underweight, and most were melted. The present apricot-gold example has an unusually sharp strike. The surfaces are somewhat bright but are refreshingly free from abrasions. Although designated as AU Details by PCGS, no wear is readily apparent. Listed on page 389 of the 2016 *Guide Book*. PCGS# 10236

**1852 Wass Molitor Five Dollar
Small Head, K-1**

- 6584 1852 Wass Molitor Five Dollar, Small Head, PCGS Genuine. K-1, R.6.** PCGS deemed this coin not gradable, without designating a reason. In our opinion, this coin has the details of a VF specimen that has been repaired and cleaned. The left obverse field, the upper right reverse field, and a portion of Liberty's neck are smoothed. Both sides are hairlined. A green-gold example of this rare Wass Molitor variety. Listed on page 393 of the 2016 *Guide Book*.

- 6585 1860 Clark, Gruber \$20 Copper Die Trial — Environmental Damage — NGC Details. AU. K-4a, R.5.** Struck in copper with a reeded edge. A copper die trial struck from dies made in Philadelphia that show Pike's Peak as a stylized triangle. This example retains almost all of its original design detail, but the olive and chocolate-brown surfaces show questionable texture and color in some areas. PCGS# 10146

**1861 Clark, Gruber & Co. Five, VF35
Copper Die Trial, K-10c**

- 6586 1861 Clark, Gruber \$5 Copper Die Trial VF35 PCGS. K-10c, R.7.** Struck in copper with a reeded edge. This coin is a die trial struck from the regular-issue dies for the 1861 five dollar gold piece of Clark, Gruber & Company. It is most unusual to find a worn specimen, since the copper composition would make it impossible for such a piece to mistakenly circulate as a gold example. This Choice VF specimen retains three quarters of its interior design detail and the olive-brown surfaces show only minor abrasions, suggesting this coin was carried as a pocket piece. Population: 1 in 35, 8 finer (7/15). PCGS# 10151

CALIFORNIA FRACTIONAL GOLD

- 6587 1856 Liberty Octagonal 25 Cents, BG-107, Low R.4, MS66 NGC.** Well-struck and semiprooflike, with moderate die polishing evident within the recesses of the obverse portrait. A scarce Period One variety, produced by Frontier, Deviercy & Co. This is the highest-graded example at NGC, although it shares an overall finest-known status with one other equally graded piece at PCGS (7/15). PCGS# 10376
- 6588 1867 Liberty Octagonal 25 Cents, BG-709, R.4, MS67 NGC.** A high-end example of this scarce period two octagonal quarter dollar, made by Frontier & Co. The strike is decidedly well-executed, and the satiny yellow-gold luster is beautifully preserved. BG-709 representatives are rarely encountered this fine. Census: 5 in 67, 0 finer (7/15). PCGS# 10536

**1870 BG-713 Octagonal Quarter
MS68, Single Finest Certified**

- 6589 1870 Liberty Octagonal 25 Cents, BG-713, R.4, MS68 NGC.** NGC has certified thousands of California fractional gold pieces, but as of (6/15), just two coins have attained the lofty MS68 grade, a BG-714 quarter and the present BG-713 example. Both pieces were struck by the same obverse die, but the reverses bear different dates. The large, crude Liberty head is associated with the output of Frontier & Co., a San Francisco jeweler. This pristine caramel-gold and lime-green quarter has a sharp strike and shimmering luster. PCGS# 10540

6590 1871 Liberty Octagonal 25 Cents, BG-718, High R.6, MS65 PCGS. Ex: Jay Roe. A lustrous and solidly struck sun-gold Gem. Die rust is apparent on the field above the fraction, the field is buckled between the first two stars, and Liberty's nose is lapped, all as made. An outstanding representative. Population: 2 in 65, 2 finer (6/15). Ex: Jay Roe Collection (Bowers and Merena, 9/2003), lot 161, which realized \$1,380. PCGS# 10545

6591 1865/4 Liberty Octagonal 25 Cents, BG-736, Low R.6, MS64 PCGS. A brightly mirrored lemon-gold representative. The portrait is lapped, the strike is blunt, the stars are blobs, and the bust tip extends to the rim, all as made and characteristic of the rare die variety. As of (6/15), the single finest PCGS-certified example. PCGS# 10563

6592 1866 Liberty Octagonal 25 Cents, BG-740, Low R.6, MS64 NGC. The reflective honey-gold surfaces are overlaid with blushes of golden-brown and cobalt-blue. A well struck and unmarked example of this rare variety. The G initial beneath the portrait represents the maker, San Francisco jeweler Robert B. Gray. Census: 1 in 64, 2 in 64 Prooflike, 0 finer (6/15). PCGS# 10567

6593 1876 Indian Octagonal 25 Cents, BG-786, Low R.6, MS65 Prooflike NGC. Among the finest graded examples of the very scarce BG-786, exceeded only by a single MS66 NGC without a Prooflike designation. The single finest at PCGS is an MS65. Boldly struck and prominently mirrored with sun-gold centers and russet-brown borders. Ex: Schaumburg Central States (Heritage, 4/2013), lot 6190, which realized \$1,762.50. PCGS# 710613

6594 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS66 Prooflike NGC. Heavy Date, Period After CAL. One of the Christoph Mohrig products. This lemon-yellow, contrasted Prooflike example shows great eye appeal on problem-free surfaces that show an obverse die state a tad later than the Breen-Gillio plate coin. This piece shows the die crack connecting the rim to stars 2-5 plus a second crack running across the neck to 72 in the date. Other minor cracks show as well. Census: 6 in 66 Prooflike, 1 finer (7/15). PCGS# 710617

**1873 Indian Octagonal Quarter Dollar
Rare BG-794 Variety, MS66**

6595 1873 Indian Octagonal 25 Cents, BG-794, High R.5, MS66 NGC. A lovely Period Two octagonal quarter dollar made by Christopher Ferdinand Mohrig of San Francisco. The BG-794 variety is rare in any condition. NGC has seen just nine pieces in all grades, with this coin tied with one other for finest; PCGS has certified 26 pieces, but none finer than MS65 (7/15). This piece is boldly rendered, with prooflike fields and warm straw-gold color. Struck with a coin-turn die alignment. Listed on page 400 of the 2016 Guide Book. PCGS# 10621

**1859 Round Liberty Quarter Dollar
BG-801, MS66 Deep Prooflike**

6596 1859 Liberty Round 25 Cents, BG-801, R.3, MS66 Deep Prooflike NGC. Produced by Frontier, Deviercy & Co., this variety is seldom seen in high grade and is rare as fine as the present piece. This deeply prooflike Premium Gem exhibits noticeable cameo contrast as allowed by sharp, frosty design elements and glass-like fields that still show remnants of circular die striae. PCGS# 710662

6597 1870 Liberty Round 25 Cents, BG-835A, R.7, MS62 PCGS. Robert B. Leece is credited with the 1991 discovery of the very rare BG-835A. Thus, the variety does not appear in any of the Lee references, or the first edition of Breen-Gillio. This flashy and sharply struck example is principally orange-gold but displays plumbed on the right reverse. As of (6/19), PCGS has certified a total of four examples, 1 in 58 and 3 in 61. PCGS# 10957

**1875 Round Indian Quarter, MS66
Single Finest Certified BG-847
Large Letters Variant**

6598 1875 Indian Round 25 Cents, BG-847, R.4, MS66 NGC. The present lot is the only example of BG-847 to attain an MS66 grade at either NGC or PCGS. It is sharply struck with smooth, flashy apricot-gold surfaces and a minor strike-through on the reverse border near 9 o'clock. BG-847 has two important die states. The early die state (as depicted in the Breen-Gillio Jay Roe plate coin) has small letters in the reverse legend. The late die state (as seen on the present coin) has a large letters reverse (compare, for example, the A in CAL) and a crack from the rim at 2:30 through the wreath. It is the cataloger's opinion that the large letters variety merits a separate Breen-Gillio listing, i.e. BG-847A. PCGS# 10708

**1874 Indian Round Quarter Dollar
BG-875, MS66 Prooflike**

6599 1874 Indian Round 25 Cents, BG-875, High R.4, MS66 Prooflike NGC. Period Two issue, made by Christopher Ferdinand Mohrig of San Francisco. A scarce variety, seldom seen this fine. NGC lists 13 Prooflike examples, with this piece as the finest. No MS67 examples are known in any contrast category. The finest at PCGS is a single MS66 (7/15). This Premium Gem is fully prooflike and well-struck, save for "ghosts" of the obverse stars seen around the reverse periphery as shallow planchet depressions. Well-preserved, with straw-gold color. Listed on page 401 of the 2016 *Guide Book*. PCGS# 710736

6600 1875 Indian Round 25 Cents, BG-877, High R.5, MS65 PCGS. Hints of cherry-red adorn the margins, but the majority of this high grade example is peach-gold. Numerous tiny die flaws near the C in CAL are all of mint origin. Population: 3 in 65, 0 finer (6/15). PCGS# 10738

6601 1880/76 Indian Round 25 Cents, BG-885, R.3, MS65 Prooflike NGC. A flashy lemon-gold Gem. Unabraded except for moderate contact near star 4. The strike is good aside from obverse incompleteness near 12 o'clock. Struck from widely rotated dies. PCGS# 710746

6602 1881 Indian Round 25 Cents, BG-887, R.3, MS66 Deep Mirror Prooflike NGC. The repunched star 7 helps attribute this late-period 1881 round quarter, as does the die flaw connecting star 13 to the feather. Lemon-yellow, reflective fields contrast nicely against frosted, wheat-gold devices, creating top-notch eye appeal. Census: 1 in 66 Deep Mirror Prooflike, 3 finer (7/15). PCGS# 910748 Base PCGS# 10748

**1874 Octagonal Half Dollar, MS64
BG-959, Tied for Finest Certified**

6603 1874 Indian Octagonal 50 Cents, BG-959, R.7, MS64 PCGS. The relief elements are thickly frosted and the fields brightly mirrored, giving each side of this near-Gem an attractive prooflike appearance. Strike incompleteness occurs on the denomination, while Liberty's portrait is crisp. Several stars are recut. PCGS has graded five BG-959 submissions and estimates that perhaps eight representatives survive in all grades. Population: 2 in 64, 0 finer (7/15). PCGS# 10817

6604 1859 Liberty Round 50 Cents, BG-1004, Low R.6, MS64 PCGS. Ex: Jay Roe. An originally toned honey-gold Choice Liberty half dollar. Freckles of golden-tan patina are scattered across minimally marked surfaces. Population: 4 in 64, 0 finer (6/15). Ex: *New England Rare Coin Gallery*, 5/1977; *Jay Roe Collection* (Bowers and Merena, 9/2003), lot 461, which realized \$1,725. PCGS# 10833

6605 1870 Liberty Round 50 Cents, BG-1023, Low R.7, MS61 PCGS. This is an extremely rare round half dollar made by Robert B. Gray & Co. The Breen-Gillio reference lists only 11 different examples known, one of which is holed. This Mint State piece shows semiprooflike fields and vivid original toning that blankets the orange-gold surfaces in amber, violet, and deep blue overtones. Slightly weak on the high points of the devices, but without any singularly bothersome abrasions. PCGS# 10852

6606 1874 Indian Round 50 Cents, BG-1053, High R.5, MS65 PCGS. Ex: Jay Roe. A splendid apricot-gold Gem that boasts glassy fields and a bold strike. No detractors are remotely consequential. Pedigreed to the best known (and most complete) collection of California fractional gold. Population: 2 in 65, 0 finer (6/15). Ex: *Jay Roe Collection* (Bowers and Merena, 9/2003), lot 516, which realized \$1,380. PCGS# 10882

6607 1869 Liberty Octagonal 1 Dollar, BG-1106, High R.4, MS62 PCGS. Die State I, with the initial G visible beneath the bust. This scarce variety, made by Robert B. Gray & Co., has the distinction of being the only octagonal gold dollar known with the date 1869. This piece is well-struck around the peripheries, but shows minor weakness in the centers. Peach overtones accent bright yellow-gold surfaces and fully prooflike fields. Population: 24 in 62, 10 finer (7/15). PCGS# 10917

6608 1876/5 Indian Octagonal 1 Dollar, BG-1128, R.5, MS62 Prooflike NGC. A flashy butter-gold example with pastel blushes of ocean-blue and lavender on the upper reverse. The centers exhibit incompleteness of strike, customary for the scarce BG-1128. Christopher Ferdinand Mohrig of San Francisco was the maker. PCGS# 710939

COMMEMORATIVE SILVER

6609 1893 Isabella Quarter MS65 PCGS. Generous luster covers each side of this Gem Isabella quarter, which boasts the usual hammered strike amid pleasing eye appeal. A couple of marks in the left obverse field and ticks on the cheek and nose account for the grade, but this piece shows much eye appeal. NGC ID# 28HR, PCGS# 9220

6610 1893 Isabella Quarter MS65 PCGS. Dusky shades of magenta and golden-brown toning blanket the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and vibrant mint luster underneath. NGC ID# 28HR, PCGS# 9220

6611 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. A brilliant near-Gem that has booming luster and a good strike. Marks are essentially confined to a tick on the nose of the conjoined Lafayette bust. An impressive example of this early silver commemorative type. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS65
First Silver Dollar Commemorative**

6612 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. Attractive shades of apple-green, violet, and lavender-gray toning blanket the surfaces of this charming Gem in a delightful play of colors. The design elements are sharply detailed throughout and the well-preserved surfaces show only insignificant signs of contact. Eye appeal is outstanding. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS66
Significant Conditional Rarity**

- 6613** 1900 Lafayette Dollar MS66 NGC. DuVall 2-C. Vibrant luster sweeps this richly patinated Premium Gem. The centers are blended dove-gray and wheat-gold, while the margins display blue-green. The reverse appears pristine, and the obverse exhibits only a couple of tiny marks. Washington's cheek retains minor planchet striae, as made. MS66 is an uncommonly high grade for the Lafayette type, which is typically encountered in AU58 through MS64. Most Lafayette dollars are either DuVall 1-B or 2-C, although three other scarce to very rare die marriages are known. Census: 65 in 66 (3 in 66+, 2 in 66 ★), 10 finer (7/15). NGC ID# 28N8, PCGS# 9222

**1921 2x2 Alabama Half Dollar, MS66
Vibrant, Frosty Luster**

- 6614** 1921 Alabama 2x2 MS66 NGC. The 1921 Alabama 2x2 represents a difficult issue to locate in MS65, and coins that grade finer are particularly elusive and desirable. This is a beautiful Premium Gem with smooth, lustrous surfaces that are well-struck and completely brilliant. The few scattered surface nicks are too trivial to be of any consequence. A bright, premium quality example, this coin has all of the eye appeal that one could ever expect from an untoned silver commemorative, and is highly desirable based upon both technical and visual considerations. Census: 94 in 66 (7 in 66+, 9 in 66 ★), 5 finer (7/15).
Ex: *Long Beach Bullet* (Heritage, 9/2002), lot 2743; *Baltimore Signature* (Heritage, 7/2003), lot 9130. NGC ID# 28HS, PCGS# 9225

**1935 Arkansas Centennial Half, MS67
Among the Finest at PCGS**

- 6615** 1935 Arkansas MS67 PCGS. CAC. Ex: Heller. A boldly struck example from the first year of the Arkansas Centennial half dollar series. The centers show dusky lavender-gray toning and the peripheries show deeper olive and gold hues. This issue is available in lower grades, but becomes rare this well-preserved. Population: 21 in 67 (3 in 67+), 0 finer (6/15). NGC ID# 28HW, PCGS# 9233

- 6616** 1936 Arkansas MS67 PCGS. Ex: Heller. A few hints of greenish-gold toning highlight the impeccably preserved surfaces of this spectacular Superb Gem, with satiny mint luster underneath. The design elements are sharply detailed and eye appeal is outstanding. Population: 15 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 28HZ, PCGS# 9237

- 6617** 1936-S Arkansas MS67 PCGS. Ex: Heller. The design elements of this impressive Superb Gem exhibit razor-sharp definition throughout and the virtually pristine surfaces radiate vibrant mint luster, with a few hints of greenish-gold and pink toning. Population: 17 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 28J3, PCGS# 9239

- 6618** 1937-D Arkansas MS67 PCGS. This delightful Superb Gem exhibits well-detailed design elements and vibrant satiny mint luster on both sides. The impeccably preserved surfaces show highlights of gold and lavender toning. Population: 32 in 67 (5 in 67+), 1 finer (7/15). NGC ID# 28J5, PCGS# 9242

**1938 Arkansas Half, MS67
Excellent Surface Quality**

- 6619** 1938 Arkansas MS67 PCGS. CAC. Ex: Heller. The 1938 Arkansas Centennial half had a distribution of just 3,156 pieces. Superb Gem survivors are rarely seen. This piece is well-struck and devoid of distracting abrasions. Iridescent pastel-champagne toning is visited by hues of olive and russet around the rims. Population: 15 in 67 (2 in 67+), 0 finer (6/15). NGC ID# 28J7, PCGS# 9245

- 6620** 1939 Arkansas MS66 PCGS. CAC. Ex: Heller. Dusky shades of lavender-gray and golden-brown toning visit the well-preserved surfaces of this impressive Premium Gem, with sharply detailed design elements and satiny luster underneath. Population: 55 in 66 (7 in 66+), 2 finer (7/15). NGC ID# 28JA, PCGS# 9249

**1939-D Arkansas Half Dollar, MS67
Only One Coin Certified Finer**

- 6621** 1939-D Arkansas MS67 PCGS. Mintages dwindled at the end of the Arkansas series, as few contemporary collectors had an interest in such pieces. Of course, that means that today's collectors are challenged to find nice examples such as this Superb Gem. Only one numerically finer example has been certified, and few others could possibly match the quality of this brilliant and highly lustrous beauty, with its delicate peripheral gold toning. Population: 10 in 67 (1 in 67+), 1 finer (7/15). NGC ID# 28JB, PCGS# 9250

1939-S Arkansas Half, MS67
Low-Mintage, None Finer

- 6622 1939-S Arkansas MS67 PCGS.** Ex: Heller. With a low distribution of just 2,105 pieces each, the 1939-PDS Arkansas commemoratives rank among the lowest-mintage issues of the entire classic series. This satiny, unmarked, and untoned Superb Gem is tied for finest-known according to both services. Delightful satiny luster covers both sides. Population: 11 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 28JC, PCGS# 9251

1939-S Arkansas Centennial Half, MS67
Softly Lustrous

- 6623 1939-S Arkansas MS67 NGC.** The 1939-S was issued in three-coin sets along with an example each of the Philadelphia and Denver issues, struck to the extent of just 2,100 pieces (plus five coins for assay purposes). Superb Gem survivors are rare and highly sought-after. This piece displays a bold strike and satiny luster with a dusting of golden-gray color. Close examination with a loupe confirms the exceptional surface quality. Census: 9 in 67, 0 finer (7/15). NGC ID# 28JC, PCGS# 9251

- 6624 1936-S Bay Bridge MS67 PCGS.** Soft silver-gray interiors with gold-orange, tan, and sage patina at the borders. This Superb Gem of the popular Bay Bridge design has few better; PCGS recognizes just 10 numerically finer pieces (7/15). NGC ID# 28JD, PCGS# 9254

- 6625 1936-S Bay Bridge MS67 PCGS.** An outstanding iridescent display masks the underlying mint luster of this Superb Gem. The surfaces are pristine and the intermingled golden-brown, rose, and violet toning enhances the eye appeal. PCGS has only certified 10 finer examples of this issue (7/15). NGC ID# 28JD, PCGS# 9254

- 6626 1935-D Boone MS67 PCGS.** Ex: Heller. This remarkable Superb Gem offers pinpoint definition on all design elements and the lustrous surfaces display no mentionable distractions. A few hints of greenish-gold toning add to the outstanding eye appeal. Population: 15 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28JG, PCGS# 9259

- 6627 1938 Boone MS67 PCGS.** Ex: Heller. Razor-sharp definition is evident on all design elements and the well-preserved surfaces of this delightful Superb Gem radiate vibrant mint luster. Eye appeal is terrific. Population: 38 in 67 (5 in 67+), 1 finer (7/15). NGC ID# 28JU, PCGS# 9274

- 6628 1938-D Boone MS67 PCGS. CAC.** The impeccably preserved surfaces of this impressive Superb Gem are blanketed in shades of greenish-gold and lavender-gray toning, with satiny mint luster underneath. The design elements are well-detailed and few examples are known in higher grade. Population: 70 in 67 (6 in 67+), 5 finer (7/15). NGC ID# 28JV, PCGS# 9275

- 6629 1938-S Boone MS67 PCGS. CAC.** This impressive Superb Gem specimen displays unusually sharp definition on all design elements and the impeccably preserved lustrous surfaces are enhanced by shades of lavender and greenish-gold toning. Population: 39 in 67 (2 in 67+), 3 finer (7/15). NGC ID# 28JW, PCGS# 9276

- 6630 1925-S California MS67 ★ NGC.** Vivid shades of lavender, blue, and greenish-gold toning blanket the impeccably preserved surfaces of this exquisite Superb Gem, with vibrant mint luster and sharply detailed design elements underneath. NGC has certified 15 numerically finer examples (7/15). NGC ID# 28JY, PCGS# 9281

- 6631 1925-S California MS67 PCGS. CAC.** A wonderful Superb Gem marking the 75th anniversary of California statehood, this piece has soft, frosty silver luster with pastel blue, green, and gold toning along the borders. PCGS has only certified six finer examples (7/15). NGC ID# 28JY, PCGS# 9281

1925-S California Diamond Jubilee Half
Glowing, Beautifully Toned MS68

- 6632 1925-S California MS68 NGC.** Jo Mora designed the iconic designs of the California Diamond Jubilee half dollar which depicts a Forty-Niner on the obverse and a grizzly bear (the state emblem) on the reverse. This Superb Gem example is among the finest certified at either service, and displays captivating eye appeal with a wide spectrum of multicolor hues accenting satiny champagne surfaces on each side. The strike is bold and there are no signs of contact present. Census: 15 in 68 (5 in 68 ★, 1 in 68+★), 0 finer (7/15). NGC ID# 28JY, PCGS# 9281

1936 Cincinnati Half, MS67
Tied for the Finest Certified

- 6633 1936 Cincinnati MS67 PCGS.** This stunning Superb Gem has distinctive peripheral gold and iridescent toning on the obverse, with mottled gold toning over much of the reverse. Both sides exhibit satiny silver luster. Tied for the finest certified with 10 others at PCGS and seven at NGC (6/15). An important opportunity for the commemorative connoisseur. NGC ID# 28JZ, PCGS# 9283

1936 Cincinnati Half Dollar, MS67
Among the Finest Certified

- 6634 1936 Cincinnati MS67 PCGS.** Satiny silver luster reveals hints of pale-gold toning near the margins, yet this smooth and problem-free Superb Gem is essentially untoned on the obverse and only lightly patinated on the reverse. The lack of all but the tiniest marks anywhere on the coin confirm the lofty grade, which is unsurpassed by any examples at either service. Few coins can equal the stately appeal of this excellent Cincinnati half. Population: 11 in 67 (1 in 67+), 0 finer (6/15). NGC ID# 28JZ, PCGS# 9283

1936 Cincinnati Half Dollar, MS67
Touch of Iridescence

- 6635 1936 Cincinnati MS67 PCGS.** The Cincinnati half dollar was produced at all three active mints and distributed in sets. Today, the Philadelphia issue is one of the scarcer in high grade. This Superb Gem is among the finest certified and displays sharp motifs with satiny luster. Hints of iridescence appear throughout the pale champagne patina. Population: 11 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28JZ, PCGS# 9283

- 6636 1936 Cleveland MS67 PCGS.** This spectacular Superb Gem exhibits well-detailed design elements and virtually pristine lustrous surfaces under shades of greenish-gold, lavender, and amber toning. Population: 80 in 67 (9 in 67+), 1 finer (7/15). NGC ID# 28K4, PCGS# 9288

- 6637 1936-D Columbia MS67+ PCGS. CAC.** From a small distribution of 8,009 pieces, this high-end Superb Gem displays vibrant mint luster and sharply detailed design elements throughout, with impeccably preserved surfaces and incredible eye appeal. PCGS has graded 23 numerically finer examples (7/15). NGC ID# 28K6, PCGS# 9292

- 6638 1936-S Columbia MS67+ PCGS. CAC.** This high-end Superb Gem exhibits sharply detailed design elements and satiny mint luster under shades of lavender, gray, and greenish-gold toning. PCGS has graded six numerically finer examples (7/15). NGC ID# 28K7, PCGS# 9293

1893 Columbian Half Dollar, MS67
Lovely Two-Sided Toning

- 6639 1893 Columbian MS67 PCGS Secure.** A spectacularly toned example, as is characteristic of original examples of this first commemorative half dollar issue. Concentric shades of golden-violet and emerald-green iridescence adorn both sides, and the soft, frosted surfaces that rest under the toning are refreshingly smooth. Population: 19 in 67 (2 in 67+), 0 finer (7/15). Ex: *New York Signature (Heritage, 11/2003)*, lot 9098. NGC ID# 26H6, PCGS# 9297

- 6640 1935 Connecticut MS67+ NGC. CAC.** This high-end Superb Gem displays impeccably preserved surfaces with vibrant mint luster and well-detailed design elements under attractive shades of pale gold and lavender toning. Census: 96 in 67 (5 in 67+, 12 in 67 ★), 1 finer (7/15). NGC ID# 28K8, PCGS# 9299

- 6641 1936 Elgin MS67 ★ NGC. CAC.** Vivid shades of magenta and greenish-gold toning highlight the impeccably preserved surfaces of this incredible Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. Eye appeal is extraordinary. NGC has graded 11 numerically finer examples (7/15). NGC ID# 28KA, PCGS# 9303

1936 Gettysburg Half Dollar, MS67
Extremely Rare any Finer

- 6642 1936 Gettysburg MS67 PCGS. CAC.** The turning point of the Civil War, the Battle of Gettysburg, is remembered in the designs of this popular classic commemorative. The issue had a moderate distribution of 26,928 coins, but Superb Gem survivors are scarce. This piece is boldly struck and well-preserved. Champagne-gray luster reveals hints of amber, olive, and lavender around the borders. There are two MS68 coins finer at PCGS (6/15). NGC ID# 28KB, PCGS# 9305

- 6643 1922 Grant No Star MS66+ PCGS. CAC.** The pleasing lavender-gray centers of this high-end Premium Gem are surrounded by vivid rings of greenish-gold toning. The design elements are well-detailed, with ample mint luster under the patina. NGC ID# 28KD, PCGS# 9306

**1922 No Star Grant Memorial Half, MS67
Sharply Struck, Pearlescent Patina**

- 6644 1922 Grant No Star MS67 PCGS.** More available than the scarce With Star version, the No Star variety is nonetheless conditionally rare in Superb Gem grades. A weak central strike plagues the issue, although here the strike is sharp. Hints of lilac enhance the pearlescent-gray surfaces, with vibrant mint luster shining through. Aside from some Mint-related die polishing lines, there are no notable surface irregularities or distractions. Population: 47 in 67 (2 in 67+), 0 finer (6/15). NGC ID# 28KD, PCGS# 9306

**1922 Grant No Star Half Dollar, MS67
Delightful Gold and Powder-Blue Patina**

- 6645 1922 Grant No Star MS67 PCGS. CAC.** The No Star variety is far more available than its With Star cousin, but examples are rarely seen at this grade level. Specks of gold toning blend with pale-blue patina overall, delivering considerable visual appeal throughout this Laura Gardin Fraser-designed commemorative half dollar. Satiny surfaces are devoid of overt impairments, as the rarified Superb Gem grade suggests. Population: 48 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 28KD, PCGS# 9306

- 6646 1922 Grant With Star MS64 PCGS.** The low mintage variety with an incused star above the N in GRANT. Lightly toned, lustrous, and smooth save for a graze above the SS in Ulysses. The dies clashed early and were lapped, leaving die polish lines throughout the obverse field. Certified in a green label holder. NGC ID# 28KC, PCGS# 9307

- 6647 1922 Grant With Star MS64 NGC.** Well struck and carefully preserved with a hint of green-gold toning. The dies clashed early on this issue, and the Mint responded by lapping the obverse die to remove the clash marks. The obverse field displays myriad die polish lines, as made. Housed in a first generation holder. NGC ID# 28KC, PCGS# 9307

**1922 With Star Grant Half, MS66
Original Toning**

- 6648 1922 Grant With Star MS66 NGC.** This is a satiny Premium Gem example of the scarcer of the two Grant Memorial half dollar varieties, denoted by a small incuse star in the right obverse field. Both sides are toned in olive-gold and light russet hues. The high point of Grant's hair shows minor softness, as usual. Census: 55 in 66 (1 in 66+, 2 in 66 ★), 9 finer (7/15). NGC ID# 28KC, PCGS# 9307

- 6649 1928 Hawaiian MS63 PCGS.** Vivid shades of golden-brown, magenta, and amber toning blanket the lightly marked surfaces of this impressive Select specimen. The design elements are well-detailed and vibrant mint luster shines through the toning. *From The College Collection, Part Two.* NGC ID# 28KE, PCGS# 9309

- 6650 1928 Hawaiian MS64 NGC.** An attractive Choice example of this key silver commemorative, with well-detailed design elements and well-preserved lustrous surfaces that show a few highlights of pale gold toning. NGC ID# 28KE, PCGS# 9309

- 6651 1928 Hawaiian MS64 NGC.** A well-preserved Choice specimen of this silver commemorative key, with sharply detailed design elements and vibrant mint luster on both sides. From a low distribution total of 9,958 pieces. NGC ID# 28KE, PCGS# 9309

1946 Iowa Centennial Half, Outstanding MS68

- 6652 1946 Iowa MS68 PCGS. CAC.** The 1946 Iowa Centennial half dollar is one of the more plentiful classic commemoratives is MS68, but such pieces are still scarce. This coin is among the finest at PCGS. The strike is sharp and the surfaces display satiny luster. The obverse is encompassed by gold, crimson, and forest-green toning; the reverse shows similar hues but with the addition of lilac-gray over most of the center. Population: 82 in 68 (9 in 68+), 0 finer (7/15). *From The College Collection, Part Two.* NGC ID# 28KJ, PCGS# 9316

- 6653 1925 Lexington MS66+ PCGS. CAC.** The 1925 Lexington half dollar is not difficult to locate in MS66 condition, but the population drops off dramatically in finer grades. This high-end Premium Gem is well-detailed and lustrous, under attractive shades of greenish-gold and lavender toning. PCGS has graded 23 numerically finer examples (7/15). NGC ID# 28KK, PCGS# 9318

1918 Illinois Centennial Half, Stellar MS67+

- 6654 1918 Lincoln MS67+ PCGS. CAC.** The Plus designation sets this Superb Gem Illinois Centennial half dollar apart from most other MS67 examples, and only two MS68 coins (one MS68+) are finer at PCGS (6/15). This piece is razor-sharp and displays frosty mint radiance. Tinges of amber-gold, violet, and blue toning surround the obverse periphery, while the remainder of each side shows just a hint of light golden color. PCGS# 9320

**1921 Missouri Centennial Half
Appealing Premium Gem, None Finer at PCGS**

- 6655 1921 Missouri MS66 PCGS.** Colorful iridescent shades appear on the sloped borders of this attractive Premium Gem Missouri half. Sea-green and golden hues venture inward toward the centers, which are fully struck-up and boldly defined. Designed by Robert Aitken (who also designed the Panama-Pacific fifty dollar gold pieces), the pleasing frontier motifs are among the favorites of most commemorative collectors. PCGS has not certified any coins numerically finer than this MS66 example. Population: 42 in 66, 0 finer (6/15). NGC ID# 28KS, PCGS# 9330
- 6656 1921 Missouri 2x4 MS65 PCGS. CAC.** This Gem representative of the scarcer 2x4 variant displays crimson toning at the borders with an added sliver of color in the right obverse field. The otherwise brilliant surfaces glisten with satiny luster. Approximately 9,400 pieces were distributed, but examples finer than the coin here offered are rare. NGC ID# 28KR, PCGS# 9331

**1921 Missouri 2x4 Half Dollar, MS66
Among the Top Coins at Both Services**

- 6657 1921 Missouri 2x4 MS66 NGC.** San Francisco artist Robert Aitken, famous for his 1915 Pan-Pac \$50 gold coins, also designed the 1921 Missouri Centennial commemorative halves. Researchers have long debated the issue's distribution totals. It is certain that 50,028 coins (both varieties) were minted, and that 29,600 coins were melted. Current distribution estimates stand at 9,400 2x4 coins and 11,400 Plain representatives. This well-defined, satiny 2x4 variant has pearl-gray iridescence in the centers surrounded by golden-orange and indigo toning around the edges. Census: 39 in 66 (1 in 66 ★), 0 finer (7/15). NGC ID# 28KR, PCGS# 9331

- 6658 1923-S Monroe MS65 PCGS. CAC.** A Gem example of the notoriously challenging Monroe half dollar, mostly silver-gray with elements of peach and deep claret. A green CAC label further attests to the quality.
From The College Collection, Part Two. NGC ID# 28KT, PCGS# 9333

**1938 New Rochelle Half, SP66
One of 50 Specimens Believed Struck**

- 6659 1938 New Rochelle SP66 NGC.** According to research by noted commemorative authority, Anthony Swiatek, 50 New Rochelle half dollars were struck on polished proof planchets, and were then given to various members of the Commemorative Coin Committee. One of the earliest auction appearances of an example was in lot 1707 of the 1958 ANA sale (Kosoff, 8/1958), where a piece was described as a "Special Proof Half Dollar of the New Rochelle Commemorative issue, struck in very limited number ..." Recognized as a specimen, this Premium Gem example is boldly struck, with gleaming prooflike fields that denote its special status. Traces of gold toning appear overall.

**1938 New Rochelle Half Dollar
Specimen MS66**

- 6660 1938 New Rochelle MS66 NGC.** Both Prooflike and Specimen strikings are known and certified for the New Rochelle. The Specimen coins, such as this one, are only graded by NGC. Such pieces are presumably from the 50 coins presented to various dignitaries, members of the Coinage Committee, and selected members of the Westchester County Coin Club. This is a deeply mirrored example with only slight contrast evident between the fields and devices. There are no obvious contact marks present, and each side is primarily brilliant with a slight reddish tinge evident. NGC has only certified 13 coins as Specimen strikings, and five others have been graded the same as this coin with six finer, minus possible resubmissions (7/15). NGC ID# 28KU, PCGS# 9335

**1925 Norse Medal, MS66
Scarcer Thin Planchet Variant**

- 6661 1925 Norse Thin Planchet MS66 PCGS. CAC.** Two variants exist for the 1925 Norse commemorative medals. Thin Planchet examples were struck to the extent of 6,000 pieces, while Thick Planchet medals claim a net distribution of 31,750 pieces. This scarcer Thin Planchet representative is mostly brilliant with satiny luster and mottled violet and orange toning around the edges. Population: 7 in 66, 0 finer (7/15).
From The College Collection, Part Two. PCGS# 9451

- 6662 1933-D Oregon MS67+ PCGS. CAC. FS-801.** Satiny luster glistens over mostly brilliant, impeccably preserved surfaces with dappled blue, magenta, yellow, and orange toning around the rims. A total of 5,000 1933-D Oregon halves were struck plus eight coins for assay purposes. PCGS shows just two finer submissions (6/15). NGC ID# 28KZ, PCGS# 9343

**1938-D Oregon Half, MS68
Icy Luster**

- 6663 1938-D Oregon MS68 PCGS.** Ice-blue, frosty luster shows hints of light golden color around the peripheries on this incredible Oregon Trail half dollar, a conditionally scarce example. Close inspection with a loupe reveals bold design elements and seemingly perfect surfaces. Population: 43 in 68 (5 in 68+), 2 finer (7/15). NGC ID# 28L7, PCGS# 9349

- 6664 1939 Oregon MS67+ PCGS. CAC.** The entire obverse is veiled in mottled golden-brown, plum, and russet patina. The target-like reverse exhibits comparably toned borders that cede to frosty brilliance, culminating in a circle of color at the extreme center. The underlying surfaces are immaculate. This is one of six MS67+ coins at PCGS with four pieces finer (7/15). NGC ID# 28L9, PCGS# 9352

**1939-D Oregon Half, MS68+
Deep Tab Toning**

6665 1939-D Oregon MS68+ NGC. Boldly rendered design elements are illuminated by glowing, satiny luster on this Plus-designated MS68 example, one of the finest 1939-D Oregon Trail halves known. The reverse is tab-toned in vivid amber-russet, crimson, and sun-gold hues, with pale champagne over most of the interiors. The obverse shows similar hues but in a more intermingled pattern. Census: 33 in 68 (5 in 68+, 14 in 68 ★, 2 in 68+★), 0 finer (7/15). NGC ID# 28LA, PCGS# 9353

6666 1939-S Oregon MS67+ PCGS. CAC. A total of 3,005 S-mint examples were distributed in the series' final year. Specks of fiery orange and crimson patina overlay shimmering surfaces that appear flawless at first glance and remain so even after close inspection. There are only eight finer submissions at PCGS (7/15). NGC ID# 28LB, PCGS# 9354

6667 1939 SET Oregon PDS Set MS65 to MS66 NGC. This matched set contains a 1939 MS65, 1939-D MS66, and 1939-S MS65. All coins have brilliant satin surfaces with glimpses of pale golden toning. Certified in NGC holders with consecutive serial numbers. (Total: 3 coins) PCGS# 9355

6668 1915-S Panama-Pacific MS65 NGC. Vivid shades of greenish-gold and magenta toning highlight the well-preserved surfaces of this delightful Gem, with vibrant mint luster and sharply detailed design elements throughout. NGC ID# 26H7, PCGS# 9357

**1915-S Panama-Pacific Half Dollar
Seemingly Flawless Superb Gem**

6669 1915-S Panama-Pacific MS67 PCGS. CAC. Concentric rings of rainbow iridescence surround brilliant interiors on both sides. From a technical standpoint, this is a near-flawless Superb Gem without a single impairment that merits mention. Even close study with magnification fails to reveal where this amazing coin lost points. The obverse and reverse of the 1915 Pan-Pac half dollar were designed by Charles Barber and George T. Morgan, and 27,134 pieces were distributed in all. This is easily among the top survivors; PCGS has seen just three submissions in higher grades (7/15). NGC ID# 26H7, PCGS# 9357

6670 1915-S/S Panama-Pacific, FS-501, MS64 PCGS. CAC. A collector-grade example of this popular Panama-Pacific International Exposition commemorative. The strike is sharp and abrasions are minimal. Silvery interiors contrast sharply with vivid multicolor peripheries, which are most bold on the obverse. PCGS# 145748 Base PCGS# 9357

**1915-S/S Panama-Pacific Half, MS66
Barber-Morgan Design Collaboration**

6671 1915-S/S Panama-Pacific, FS-502, MS66 PCGS. CAC. One of two repunched mintmark varieties for the issue, showing the upper serif of an errant S in the field above the primary. The Panama-Pacific half dollar had a distribution of 27,134 pieces, and is one of the more affordable commemoratives struck for the Panama-Pacific International Exposition held in San Francisco in 1915. This Premium Gem is sharply struck, with satiny golden-gray luster. PCGS# 511601 Base PCGS# 9357

6672 1936 Robinson MS67 PCGS. This extraordinary Superb Gem is deeply toned in gold, green, and rose shades with underlying frosty mint luster. Population: 76 in 67 (1 in 67+), 2 finer (7/15). NGC ID# 28LJ, PCGS# 9369

6673 1935 Spanish Trail MS65 ★ NGC. An especially attractive Gem example of this popular silver commemorative, with sharply detailed design elements and vibrant satiny mint luster under shades of lavender-gray and greenish-gold toning. NGC ID# 28LN, PCGS# 9376

6674 1935 Spanish Trail MS66+ PCGS. CAC. A high-end Premium Gem example of this popular issue, with satiny mint luster and sharply detailed design elements throughout. The well-preserved surfaces are visited by highlights of lavender, gray, and amber toning. NGC ID# 28LN, PCGS# 9376

6675 1925 Stone Mountain MS67 PCGS. CAC. Soft orange-tan and bluish-green toning visits the radiantly lustrous surfaces of this Superb Gem commemorative half. Sharply struck design features and impeccably preserved surfaces round out the coin's outstanding eye appeal, appropriately recognized by CAC. PCGS reports just eight examples finer (7/15). NGC ID# 26H8, PCGS# 9378

**1925 Stone Mountain Half Dollar, MS67+
Amazing Array of Colors**

6676 1925 Stone Mountain MS67+ PCGS. CAC. The color palette seen on each side of this well-struck Superb Gem includes shades of fiery orange, blue, red-violet, and green when rotated under a lamp. Soft, frosty mint luster percolates through the variegated toning. The 1925 Stone Mountain half dollar is one of the most available commemoratives from the 1920s. Nevertheless, only 5% of all MS67 submissions at PCGS have received a Plus designation, and there are just eight examples rated finer at that service (7/15). NGC ID# 26H8, PCGS# 9378

6677 1936-S Texas MS67+ PCGS. CAC. This high-end Superb Gem displays sharply detailed design elements and vibrant satiny mint luster with a few hints of pale gold toning. One of 9,055 pieces struck. PCGS has graded just two coins as MS68 or better (6/15). NGC ID# 28LW, PCGS# 9388

6678 1937 Texas MS67+ PCGS. A scarce Texas Centennial issue from a mintage of just 6,571 coins, this Superb Gem exhibits delicate wisps of gold and blue toning that intensifies along the borders. PCGS has only certified four finer examples (7/15). NGC ID# 28LX, PCGS# 9390

6679 1937-D Texas MS67+ PCGS. CAC. Silver-white interiors have gold and peach toning around. The reverse adds hints of blue and violet. An impressively preserved later-date Texas half from Denver. PCGS has graded just two pieces as MS68 or better (7/15). NGC ID# 28LY, PCGS# 9391

6680 1937-D Texas MS67+ PCGS. CAC. Gold overtones grace most of this beautifully preserved later Texas half. Shades of green outline portions of Liberty on the reverse. PCGS has graded only two coins finer than this magnificent MS67+ example (6/15). NGC ID# 28LY, PCGS# 9391

6681 1938 Texas MS67 PCGS. CAC. A sharply detailed Superb Gem, with virtually pristine surfaces and satiny mint luster throughout. From a small distribution of 3,780 pieces. Population: 55 in 67 (4 in 67+), 1 finer (7/15). NGC ID# 28M2, PCGS# 9394

1938-D Texas Half, Pristine MS67+

6682 1938-D Texas MS67+ PCGS. CAC. Pale lilac, rose, and gold appear faintly on each side of this remarkably pristine 1938-D Texas half, which still presents as largely untoned. The hunt for a finer-graded example of this Texas issue would likely result in a long and futile search. Population: 13 in 67+, 1 finer (7/15). NGC ID# 28M3, PCGS# 9395

1938-D Texas Independence Half, MS67+ Exceptional Quality

6683 1938-D Texas MS67+ PCGS. CAC. A stunning representative of the Texas design, coined at the closest operating mint to the state. The distribution for this issue total just 3,775 pieces, sold in three-coin sets along with an example each of the Philadelphia and San Francisco issues. This Superb Gem exhibits satiny silver luster with wisps of delicate gold, violet, and blue peripheral toning. Population: 100 in 67 (13 in 67+), 1 finer (7/15). NGC ID# 28M3, PCGS# 9395

1938-D Texas Half Dollar, MS68 Among the Finest Known

6684 1938-D Texas MS68 NGC. The 1938-D Texas Independence Centennial half dollar had a limited distribution of only 3,775 coins. The present MS68 example is among only a handful of pieces that claim status as the finest known. The design elements are boldly defined and the satiny surfaces are devoid of abrasions. Iridescent silvery-gold surfaces show irregular splashes of olive and deep amber-orange toning. Census: 7 in 68 (3 in 68 ★), 0 finer (7/15). NGC ID# 28M3, PCGS# 9395

6685 1925 Vancouver MS66+ PCGS. CAC. Light gold and gunmetal-blue toning embraces the obverse, while the reverse maintains its brilliance. Frosty S-mint luster issues from the immaculate surfaces. Boldly rendered with a small reeding mark under the lapel. Scarcely seen at this grade level. NGC ID# 28M5, PCGS# 9399

1925 Fort Vancouver Centennial Half Satiny MS67

6686 1925 Vancouver MS67 PCGS. CAC. The 1925 Vancouver half dollar is very scarce above the MS66 grade level. Attractive toning in shades of golden-orange, cherry-red, forest-green, aquamarine, lemon-yellow, green-gray, and russet, primarily at the outer edges, adds to the visual allure of this Superb Gem. The piece displays deep satin luster that further enhances the appearance. Population: 56 in 67 (8 in 67+), 1 finer (7/15). NGC ID# 28M5, PCGS# 9399

1927 Vermont Half Dollar, MS67 Scarce This Fine

6687 1927 Vermont MS67 PCGS. The Vermont Sesquicentennial half dollar, struck as a souvenir to commemorate the 150th anniversary of Vermont's independence, is seldom seen in Superb Gem condition. This MS67 coin is boldly struck and free of major abrasions. Both sides show satiny luster and a blush of light golden toning. Population: 37 in 67 (2 in 67+), 1 finer (7/15). NGC ID# 28M6, PCGS# 9401

**1927 Vermont Half Dollar, MS67
Only One Finer at PCGS**

6688 1927 Vermont MS67 PCGS. Dusky mustard-yellow patina is typical for the Vermont half dollars. This Superb Gem exhibits that patina at the upper right obverse and lower right reverse. This piece approaches the top of the certification charts, with only three finer examples in the combined PCGS and NGC population reports. Population: 37 in 67 (2 in 67+), 1 finer (7/15). NGC ID# 28M6, PCGS# 9401

6689 1946-D Booker T. Washington MS67 PCGS Secure. CAC. The ice-blue and lavender centers of this spectacular Superb Gem yield to shades of greenish-gold at the peripheries. The design elements are sharply detailed and vibrant mint luster shines through the toning. Population: 48 in 67 (4 in 67+), 0 finer (7/15). NGC ID# 28M8, PCGS# 9405

6690 1946-D Booker T. Washington MS67 PCGS Secure. CAC. Ex: Bruce Scher. Bruce Scher's 144-piece Registry Set of classic silver commemoratives is ranked as the #1 All-Time Finest at PCGS. He sold his set to Pinnacle in 2012, and passed away late that year. The present lustrous Superb Gem has aquamarine fields and devices. The obverse margin exhibits narrow but exquisite bands of ruby-red, orange-gold, and forest-green. NGC ID# 28M8, PCGS# 9405

6691 1946-D Booker T. Washington MS67 ★ NGC. CAC. Darkly patinated in shades of green, gold, violet, and amber, this spectacular Superb Gem exhibits sharply detailed design elements, with vibrant mint luster under the toning. No mentionable surface marks are apparent. From a large distribution of 200,113 pieces. Census: 70 in 67 (1 in 67+, 21 in 67 ★, 3 in 67+★), 9 finer (7/15). NGC ID# 28M8, PCGS# 9405

6692 1946-S Booker T. Washington MS67 PCGS. Ex: Bruce Scher. Remarkable obverse toning includes arcs of cherry-red, lemon-gold, and apple-green along the left and lower margins. The reverse toning is similar but not quite as spectacular. The centers are olive-green. Bruce Scher's high grade type collection of silver commemoratives was auctioned by Heritage in February 2005, but did not include the present piece. NGC ID# 28M9, PCGS# 9406

**1951-S Washington-Carver Half, MS67
Pastel Peripheral Toning**

6693 1951-S Washington-Carver MS67 PCGS. CAC. The net distribution of this issue was a hair more than 10,000 pieces, but this piece is nonetheless one of only five Superb Gems graded at PCGS. Pale pastel rainbow iridescence appears on the right margins of each side, with pale silver-gray centers and outstanding preservation throughout. Population: 4 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28MU, PCGS# 9432

6694 1952 Washington-Carver MS67 NGC. Mottled golden-olive and violet-gray tones shroud the obverse, while the same colors adhere to the rims and centers respectively on the reverse. The only marks on this Superb Gem appear linearly on the temple of George Carver. Census: 34 in 67 (1 in 67+, 10 in 67 ★, 2 in 67+★), 1 finer (7/15). NGC ID# 28MV, PCGS# 9434

6695 1952 Washington-Carver MS67 PCGS Secure. CAC. Vivid shades of mingled magenta, violet, amber, and sea-green toning blanket the impeccably preserved surfaces of this remarkable Superb Gem, with vibrant mint luster and well-detailed design elements underneath. Population: 17 in 67 (2 in 67+), 1 finer (7/15). NGC ID# 28MV, PCGS# 9434

**1953-S Washington-Carver Half, MS67
Tied for Finest Certified**

6696 1953-S Washington-Carver MS67 PCGS Secure. Ex: Bruce Scher. The final issue in the classic commemorative series was the Washington-Carver series issued from 1951 to 1954. Authorized on September 21, 1951, these half dollars were issued to commemorate the lives and perpetuate the ideals and teachings of Booker T. Washington and George Washington Carver. Examples were coined at three mints from 1951 to 1954.

The 1952, 1953-S, and 1954-S issues had the largest mintages, including 88,020 examples of this 1953-S half dollar. This stunning example is tied for the finest certified. Both sides have deep cobalt-blue and iridescent toning with underlying frosty luster. Population: 10 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 28N2, PCGS# 9440

**1936 Wisconsin Half Dollar, MS68
Delicately Toned**

6697 1936 Wisconsin MS68 PCGS. Ex: W.P.E. Collection. The Wisconsin Territorial Centennial half dollar is seldom seen in MS68, and no examples are known finer. This piece is boldly struck and seemingly pristine. Each side shows light champagne toning with glimpses of iridescence throughout. Population: 34 in 68 (5 in 68+), 0 finer (7/15). NGC ID# 28N6, PCGS# 9447

**1936 York Tercentenary Half, MS68
Intense Cartwheel Luster**

- 6698** 1936 York MS68 PCGS. The intricate details of the stockade on this York County Tercentenary commemorative half are sharply brought up, mirroring the definition of the reverse. The obverse shows warm champagne toning overall, while the reverse exhibits the same but with an additional ribbon of amber-gold around much of the periphery. The surfaces are seemingly perfect. Population: 26 in 68, 0 finer (7/15). NGC ID# 28N7, PCGS# 9449

COMMEMORATIVE GOLD

- 6699** 1903 Louisiana Purchase, Jefferson, MS65 NGC. CAC. The peach-gold surfaces reveal hints of rose on the obverse while the reverse shows slightly deeper shades of this color palette joined by whispers of lime-green and lavender. Radiant luster and impeccable preservation further contribute to the coin's pleasing eye appeal. NGC ID# 26HA, PCGS# 7443
- 6700** 1903 Louisiana Purchase, Jefferson, MS65 NGC. CAC. The orange-gold surfaces of this popular gold commemorative coin are awash with mint luster, and sharp definition characterizes the design elements. A few unobtrusive handling marks are inconsequential. The gorgeous eye appeal is affirmed by the CAC endorsement. NGC ID# 26HA, PCGS# 7443
- 6701** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. Bands of deep reddish-orange toning hug the left and right reverse borders, leaving the remaining surfaces yellow-gold with lilac hues on each side. The central motifs are strongly brought up with insignificant softness toward the upper reverse rim. A lovely example of the scarcer Jefferson type. NGC ID# 26HA, PCGS# 7443
- 6702** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. The Louisiana Purchase Exposition took place in St. Louis from April 30 to December 1, 1904, though it was intended to open in 1903. This bold orange-gold representative has magnificent eye appeal, the result of swirling mint frost and minimal abrasions. A sliver a darker patina occurs through LOUIS. NGC ID# 26HA, PCGS# 7443
- 6703** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. Sea-green and peach-gold compete for territory across this lustrous and attractive Gem. Unabraded aside from an unobtrusive graze on Jefferson's forehead. Encased in a green label holder.
Ex: Chicago Signature (Heritage, 8/2011), lot 5057, which realized \$1,610. NGC ID# 26HA, PCGS# 7443
- 6704** 1903 Louisiana Purchase, Jefferson, MS65 PCGS. CAC. Lemon-gold color on the obverse appears lighter than the deeper shades of green-gold on the reverse, though each side shows complementary rose accents. This crisp Gem Jefferson head gold dollar is void of notable distractions. A small planchet flake occurs below D(OLLAR). NGC ID# 26HA, PCGS# 7443
- 6705** 1903 Louisiana Purchase, Jefferson, MS66 NGC. CAC. President Thomas Jefferson's portrait on this issue stems from the coin's commemoration of the 100th anniversary of the purchase of a vast tract of land from France in 1803 during his administration. Intense luster radiates from the yellow-gold of this sharply impressed and impeccably preserved Premium Gem. NGC ID# 26HA, PCGS# 7443

- 6706** 1903 Louisiana Purchase, Jefferson, MS66 NGC. CAC. Wisps of nearly imperceptible soft green are imbued within the yellow-gold toning of this lustrous Premium Gem. All design features are well-brought up. Demand is extremely high for both varieties (Jefferson and McKinley) of 1903 gold dollars. NGC ID# 26HA, PCGS# 7443
- 6707** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC. According to Dave Bowers, "[Charles] Barber copied a portrait of Thomas Jefferson from the portrait on an Indian peace medal created in three sizes in the latter part of 1801 by John Reich." This strongly struck Premium Gem is awash in glistening mint luster with pleasing lavender and yellow-gold coloration. NGC ID# 26HA, PCGS# 7443
- 6708** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC. The obverse is fully detailed with sharp denticles and portrait definition, while the equally bold reverse has a bit of softness at the lower rims. A small alloy spot occurs above HA in PURCHASE. Radiant lilac and peach-gold surfaces are undeniably appealing. NGC ID# 26HA, PCGS# 7443
- 6709** 1903 Louisiana Purchase, McKinley, MS65 NGC. CAC. The yellow-gold surfaces of this commemorative gold dollar display occasional hints of apricot and exhibit strong design detail. Both sides are virtually flawless. The present variant of the two Louisiana Purchase gold dollars shows President William McKinley, who sanctioned the Exposition held in St. Louis in 1904. NGC ID# 26HB, PCGS# 7444
- 6710** 1903 Louisiana Purchase, McKinley, MS65 NGC. CAC. Shades of orange- and yellow-gold patina adorn the highly lustrous surfaces of this Gem. The design elements are sharply impressed and both sides are well-preserved. Some mild, as-made orange-peel effect is evident around the borders. NGC ID# 26HB, PCGS# 7444
- 6711** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. A lovely and lustrous lemon-gold Gem. The strike is full on the legends and motifs, although the dentils show occasional inexactness. Virtually void of contact, and housed in an old green label holder. NGC ID# 26HB, PCGS# 7444
- 6712** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. A no-questions Gem, both the obverse and reverse are awash in orange-gold color. The smooth surfaces are attractive with crisp strike definition in all areas. A tiny alloy spot is mentioned under the U of LOUIS at the base of the reverse.
Ex: Denver Signature (Heritage, 8/2006), lot 3948. NGC ID# 26HB, PCGS# 7444
- 6713** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. Pale-lilac accents and rich tones of orange-gold account for the CAC-approved aesthetic appeal seen throughout this Gem. Swirling luster, bold design detail, and the absence of singular marks heighten the desirability. Only 35,000 coins were distributed (both variants) from a total mintage of 250,000 pieces. NGC ID# 26HB, PCGS# 7444
- 6714** 1903 Louisiana Purchase, McKinley, MS65 PCGS. CAC. This beautifully original olive and reddish-gold Louisiana Purchase representative features bold central definition with minor strike softness around the rims. There are no mentionable imperfections, and three small alloy spots appear below TES in STATES. NGC ID# 26HB, PCGS# 7444
- 6715** 1903 Louisiana Purchase, McKinley, MS66 PCGS. CAC. Lemon-gold color and shimmering luster blend over each side, showing glints of rose mainly on the reverse. This sharply detailed commemorative dollar is boldly struck and virtually unmarked. A small die crack connects the rim to (LOUIS)I(ANA). Scarcely seen finer. NGC ID# 26HB, PCGS# 7444

1903 McKinley Gold Dollar, MS67
Impeccable Technical and Visual Quality

6716 1903 Louisiana Purchase/McKinley, MS67 PCGS. CAC. An impeccable butter-gold representative, this Superb Gem features vibrant mint frost over rose-tinted, mark-free surfaces. A high-powered loupe fails to yield any noticeable impairments, though a tiny alloy spot occurs in the left obverse field. The distribution of Louisiana Purchase commemorative gold dollars amounted to 35,000 pieces, 17,500 each of the Jefferson and McKinley types. Coins sold for \$3 each during the Exposition, but traded at steep discounts thereafter. PCGS reports just two submissions finer (7/15). NGC ID# 26HB, PCGS# 7444

6717 1904 Lewis and Clark MS64 PCGS. This boldly defined and fully lustrous yellow-gold commemorative exhibits reflective fields that create exceptional eye appeal. Housed in an old green-label PCGS holder. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS66
Lustrous, Technically Superior Example

6718 1904 Lewis and Clark MS66 PCGS. Strike quality and eye appeal are splendid for this lustrous, Premium Gem Lewis and Clark dollar. Surprisingly little metal flow exists along the margins as normally seen on the issue. Honey-gold fields and devices display mint frost and radiantly lustrous surfaces. Just 10,025 pieces were actually distributed from a production of 25,000 pieces, with the unsold coins melted. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS66
Beautiful, Impressively Preserved Example

6719 1904 Lewis and Clark MS66 PCGS. This commemorative issue is not absolutely scarce, despite its small production of 10,025 pieces, but it is conditionally scarce at the Premium Gem level, and rare any finer. This beautiful coin exhibits luminous green-gold and peach surfaces. The strike definition across each side is exceptionally sharp, and the surfaces are pristine. NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS66

6720 1904 Lewis and Clark MS66 PCGS. The Lewis and Clark Exposition gold dollars were struck dated 1904 and 1905. The earlier issue is the more available of the two, but is nonetheless rare above the MS66 level. This Premium Gem is sharply struck, with satiny yellow-gold luster. The usual die stress flow lines appear in the fields around the peripheral legends. PCGS lists 20 finer examples (7/15). NGC ID# 26HC, PCGS# 7447

1905 Lewis and Clark Gold Dollar
Satiny MS65

6721 1905 Lewis and Clark MS65 NGC. This Gem 1905 Lewis and Clark gold dollar is well-struck and shows only minimal evidence of die stress in the peripheral fields, a characteristic to which this type is usually prone. The surfaces are devoid of major abrasions and show warm straw-gold luster, with a single coppery spot seen near OF. Scarce any finer. NGC ID# 26HD, PCGS# 7448

6722 1915-S Panama-Pacific Gold Dollar MS65 PCGS. This fully brilliant Gem exhibits light greenish yellow-gold surfaces with satin luster. The central obverse is a trifle weak as usual. NGC ID# 26HE, PCGS# 7449

6723 1915-S Panama-Pacific Gold Dollar MS65 NGC. CAC. The mintmark is nicely repunched southeast, a variety presently unlisted in *Cherry-pickers*. This lustrous peach-gold Gem has a sharp strike and exemplary preservation. NGC ID# 26HE, PCGS# 7449

6724 1915-S Panama-Pacific Gold Dollar MS65 NGC. CAC. Brass-yellow patination adorns the lustrous surfaces of this well-struck Gem. The CAC sticker confirms the coin's outstanding eye appeal. This issue is one of the most available and most popular commemorative gold dollars. NGC ID# 26HE, PCGS# 7449

6725 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Both the Panama Canal and the exposition celebrating its completion were monumental in scale and significance. The 1915 commemorative gold dollar may be physically small, but its design captures the importance of two the events. This splendid Gem has vibrant luster over lavender and yellow-gold surfaces with minimal marks. NGC ID# 26HE, PCGS# 7449

6726 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Most of the 15,000 Panama-Pacific gold dollars were distributed singly for \$2 each, and only a few hundred were likely sold as part of four or five piece sets. This gorgeous Gem is awash in frosty luster, and typical orange and rose-gold shades. There are no marks of note, and the CAC sticker is well-deserved. NGC ID# 26HE, PCGS# 7449

6727 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Daubs of deep orange color appear over the rose and lemon-gold surfaces. Charles Keck's design is crisply rendered, and coruscating mint frost rolls over each side. A total of 25,034 Panama-Pacific gold dollars were struck at the S-mint in 1915 (34 coins for assaying), but only 15,000 coins were distributed and the rest melted. NGC ID# 26HE, PCGS# 7449

6728 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Deep peach patina invigorates this satiny and virtually immaculate Gem. The fully struck surfaces displays traces of gunmetal-blue at the centers. Encased in a green label holder.

Ex: Dallas Signature (Heritage, 10/2012), lot 5238, which realized \$1,351.25. NGC ID# 26HE, PCGS# 7449

6729 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. The obverse Panama Canal worker and the reverse dolphins are allegories of labor and the transportation route created by the new waterway. Light butter-gold surfaces feature radiant mint frost and fully struck devices. Marks are virtually indistinguishable. An eye-appealing Pan-Pac gold dollar. NGC ID# 26HE, PCGS# 7449

6730 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Equal parts orange and yellow-gold in color, the surfaces of this Gem feature typical S-mint frost and boast phenomenal eye-appeal. Pan-Pac gold dollars sold well in 1915. Most coins were distributed to the public rather than wholesaled to dealers in bulk, as was the case with less popular commemorative issues. NGC ID# 26HE, PCGS# 7449

6731 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Rose overtones reside on the brilliant and highly lustrous yellow-gold surfaces of this frosty Premium Gem. PCGS has only certified 64 finer examples of this issue (7/15). NGC ID# 26HE, PCGS# 7449

6732 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC. Intense luster emanates from the yellow-gold surfaces of this lovely Premium Gem commemorative. The design features are uniformly well-defined. The CAC sticker affirms the coin's outstanding eye appeal. Finer pieces become very challenging. Indeed, PCGS has graded just 64 coins finer (7/2015). NGC ID# 26HE, PCGS# 7449

6733 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC. The yellow-gold surfaces of this Premium Gem Panama-Pacific commemorative gold dollar display a splash or two of deep reddish-gold on each side. Scintillating luster and sharply struck design elements enhance the coin's marvelous eye appeal. This piece is well-deserving of the CAC endorsement. PCGS has seen only 64 coins finer (7/2015). NGC ID# 26HE, PCGS# 7449

6734 1915-S Panama-Pacific Quarter Eagle AU50 NGC. Light yellow-gold surfaces retain traces of luster on this lightly circulated Panama-Pacific quarter eagle. It might have been carried for a short time as a pocket piece, or less likely, it may have actually entered circulation for a period of time. Regardless, the grade is unusual and this piece will certainly garner interest at the sale. NGC ID# 26HK, PCGS# 7450

1915-S Quarter Eagle, MS65

Popular Panama-Pacific Issue

6735 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. Farran Zerbe proposed and offered an extensive series of silver and gold commemorative coins for the event, including this quarter eagle. This Gem has frosty luster on brilliant light yellow-gold surfaces. A few copper toning spots are insignificant. NGC ID# 26HK, PCGS# 7450

1915-S Quarter Eagle, MS65

Farran Zerbe's Panama-Pacific Issue

6736 1915-S Panama-Pacific Quarter Eagle MS65 NGC. Numismatist Farran Zerbe was the guiding light for numismatic activities at San Francisco's Panama-Pacific International Exposition in 1915. The strike is a trifle weak at the central obverse of this brilliant and fully lustrous Gem. A few scattered marks prevent a higher grade. NGC ID# 26HK, PCGS# 7450

1915-S Pan-Pac Two and a Half, MS65

Beautiful Reddish-Orange Patina

6737 1915-S Panama-Pacific Quarter Eagle MS65 NGC. Superlative eye appeal is the hallmark of this Gem NGC-graded 1915-S Pan-Pac quarter eagle, a coin richly layered in mint luster and covered with an even, beautiful patina of reddish-orange. Some lighter wheat-gold accents appear in the interstices on the obverse, and there are no marks of any consequence. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Lovely Gem Example**

- 6738** 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. Gem-quality surfaces yield frosty wheat-gold luster with hints of peach and rose throughout. This Panama-Pacific quarter eagle is well-struck and slightly above-average for the issue in regards to technical quality. The issue had a distribution of only 6,749 pieces, the lowest in the five-coin Pan-Pac set behind the legendary round and octagonal fifties. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Minimally Abraded for the Issue**

- 6739** 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. Luminous yellow-gold with hints of orange and a touch of duskiness. Carefully preserved and all-around appealing, if softly struck as usual on Columbia's features. The Pan-Pac is rarely seen in high grade as abrasions are a consistent problem; thus, a minimally marked piece such as this one will be of great interest to collectors. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Frosty Premium Gem**

- 6740** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. Glowing yellow-gold mint luster illuminates the sharply rendered design elements of this Premium Gem Panama-Pacific quarter eagle. Close study with a loupe confirms the outstanding surface preservation, and the corresponding eye appeal is equally excellent. Finer representatives are infrequently encountered. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Two and a Half
Eye-Appealing MS66**

- 6741** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. The visual merit of this Premium Gem Pan-Pac quarter eagle draws from a combination of sharp motifs, smooth, frosty surfaces, and delicately intermingled peach, orange, and wheat-gold hues. It is difficult to imagine an aesthetically finer example of this popular commemorative in the MS66 grade. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Exceptional High-Grade Example**

- 6742** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. Responsibility for the design of this commemorative quarter eagle issue was originally assigned to sculptor Evelyn Longman of New York, but either due to her illness or a decision by Assistant Secretary of the Treasury William Moburn (alleged by Walter Breen and Anthony Swiatek in their 1981 *Encyclopedia of United States Gold and Silver Commemorative Coins*), the designs were actually executed by Mint personnel Charles Barber and George Morgan.

This Premium Gem example of the type shows mark-free surfaces and lovely pale gold coloration. The strike definition is exceptional, fully bringing up all elements of the classically-inspired design.

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3434. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Original MS66**

- 6743** 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC. This Premium Gem Panama-Pacific quarter eagle exhibits original, frosty surfaces with medium honey-gold luster. Some minor striking softness is seen on the forward eagle's feathers, but there are no major abrasions. This issue is scarce in finer grades, with only 38 coins so-certified at PCGS (6/15). NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Eye-Appealing MS67**

6744 1915-S Panama-Pacific Quarter Eagle MS67 NGC. The Panama-Pacific quarter eagle is scarce at the MS67 level, with this grade encompassing the finest-known examples. The present piece shows sharp motifs and frosty, beautifully preserved luster. Two-toned patina consists of well-balanced yellow and apricot-gold hues which impart outstanding eye appeal. This issue's limited distribution of 6,749 coins did not allow for large quantities of high-grade survivors.

From The Badger Collection. NGC ID# 26HK, PCGS# 7450

6745 1916 McKinley MS65 NGC. CAC. Vibrant luster issues from the orange- and yellow-gold surfaces that are imbued with hints of rose. Sharply impressed devices and impeccable preservation further enhance the coin's impressive eye appeal, aptly recognized by CAC. NGC ID# 26HF, PCGS# 7454

6746 1916 McKinley MS65 NGC. CAC. Peach-gold luster embraces this impressively struck Gem. Both surfaces are free of significant marks. The 1916 McKinley Memorial gold dollar has an estimated distribution of 15,000 pieces, helping to make it more available than its 1917 counterpart with an estimated 5,000-piece distribution. NGC ID# 26HF, PCGS# 7454

6747 1916 McKinley MS65 NGC. CAC. Both sides of this Gem commemorative gold dollar are awash with frosty luster and each exhibits well-struck design features. Yellow-gold coloration assumes deeper hues on the reverse. There are no marks or spots worthy of individual mention. NGC ID# 26HF, PCGS# 7454

6748 1916 McKinley MS65 PCGS. CAC. Mint-green and reddish-violet hues complement lemon-gold color overall. The obverse appears pristine to the naked eye, and the only visible impairment on the reverse is a minuscule tick between the two columns just left of the central statue. A total of 15,000 1916 coins were distributed compared to 5,000 1917 examples. NGC ID# 26HF, PCGS# 7454

6749 1916 McKinley MS65 PCGS. CAC. Caramel-gold and lime-green toning embraces this well preserved Gem. No marks emerge beneath a lens, and the strike is intricate save for minor blending on the left-side borders. Certified in a green label holder. NGC ID# 26HF, PCGS# 7454

6750 1916 McKinley MS65 PCGS. CAC. Light orange-gold tones surround blushes of deep sunburst-gold color at the central obverse. Yellow-gold relief elements on the reverse partly stand out against rose-gold fields. Minimal abrasions generally only appear under magnification. Top-notch eye appeal. NGC ID# 26HF, PCGS# 7454

6751 1916 McKinley MS65 PCGS. CAC. A fully struck Gem bathed in orange-gold and lime-green luster. The fields are immaculate, and the portrait high points show only trivial indications of contact. Certified in a green label holder. NGC ID# 26HF, PCGS# 7454

6752 1916 McKinley MS65 PCGS. CAC. This is an excellent McKinley gold dollar type coin, as the 1916 is far more available than its 1917 counterpart. Orange-gold surfaces display faint reddish-violet accents and frosty luster. The Barber-designed obverse appears softly impressed, while the Morgan design on the reverse is much sharper, as usual. NGC ID# 26HF, PCGS# 7454

6753 1916 McKinley MS65 PCGS. CAC. The McKinley gold dollar bears a portrait of the slain president on the obverse and an image of the Niles, Ohio memorial on the reverse for which the coins raised funds. This splendid Gem has lovely rose-gold surfaces and vibrant mint frost with minimal marks and strongly detailed motifs. NGC ID# 26HF, PCGS# 7454

**1916 McKinley Memorial Dollar, MS67
Splendid, Flawlessly Preserved Example**

6754 1916 McKinley MS67 PCGS. This is a splendid Superb Gem example of the 1916 McKinley Memorial gold dollar. Fully struck with shimmering mint luster and seemingly flawless surfaces. Only one coin has received a numerically higher grade: an MS68 example at NGC. Population: 90 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 26HF, PCGS# 7454

1916 McKinley Dollar, Patinated MS67+

- 6755 1916 McKinley MS67+ NGC.** Intended to raise funds for the McKinley birthplace memorial in Niles, Ohio, this 1916 and 1917 commemorative gold dollars saw minimal distribution. This extraordinary Superb Gem displays splashes of orange and powder-blue on its bright yellow surfaces. Census: 80 in 67 (3 in 67+, 2 in 67 ★), 1 finer (7/15). NGC ID# 26HF, PCGS# 7454

**1916 McKinley Memorial Gold Dollar
High-End Superb Gem, None Finer at PCGS**

- 6756 1916 McKinley MS67+ PCGS. CAC.** While the design was a tenuous collaboration between Charles E. Barber and George T. Morgan (Barber did the obverse, Morgan the reverse), the marketing of the McKinley gold dollars was even less coordinated, with only a total of 15,000 or so pieces sold dated 1916 or 1917. The 1916 pieces outnumber the 1917 issue approximately 2 to 1. This example is one of the finest survivors. Both sides are beautifully patinated in shades of lilac and rose-red over gleaming rich-gold surfaces. The obverse is more frosty, the reverse mostly prooflike. Exceptionally struck and problem-free for the issue, this lustrous Superb Gem McKinley dollar will be the centerpiece of an advanced commemorative gold collection. Population: 90 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 26HF, PCGS# 7454

- 6757 1917 McKinley MS65 PCGS. CAC.** The yellow-gold surfaces of this Gem display ebullient luster and are free of any significant marks. All design elements are well-defined. The CAC endorsement affirms the coin's magnificent eye appeal. NGC ID# 26HG, PCGS# 7455

1917 McKinley Dollar, Yellow-Gold MS67

- 6758 1917 McKinley MS67 PCGS.** The McKinley dollars are popular as a necessary part of a commemorative gold collection. Fewer 1917-dated coins were distributed than 1916 pieces and are more difficult to locate. Lustrous yellow-gold surfaces exhibit well-struck design features and are nicely preserved. Population: 69 in 67 (3 in 67+), 0 finer (7/15). NGC ID# 26HG, PCGS# 7455

-
- 6759 1922 Grant No Star MS65 PCGS. CAC.** A beautiful orange-gold example of this low mintage issue. Lustrous and free from evident abrasion. The strike is sharp save for the usual incompleteness on the tree trunk near the frame house window. Housed in a green label holder. NGC ID# 26HJ, PCGS# 7458

- 6760 1922 Grant No Star MS65 PCGS. CAC.** Attractive orange-gold patination with occasional wisps of yellow-gold cascades over the lustrous surfaces of this Grant No Star commemorative. Well-struck design features and impeccable preservation further heighten the coin's great eye appeal. NGC ID# 26HJ, PCGS# 7458

- 6761 1922 Grant No Star MS66 PCGS. CAC.** Bright yellow-gold luster emanates from both sides of this Premium Gem, each of which exhibits sharply struck design elements. Impeccably preserved surfaces further contribute to this coin's remarkable eye appeal. NGC ID# 26HJ, PCGS# 7458

1922 Grant No Star Dollar, Sharply Struck MS67

- 6762 1922 Grant No Star MS67 PCGS. CAC.** With a limited distribution of 5,000 examples the Grant No Star commemorative is very challenging in Superb Gem. Moreover, this issue is virtually unobtainable any finer. PCGS has seen none finer and NGC has graded only five examples higher (7/15). Lustrous orange-gold surfaces exhibit sharply struck design elements and are devoid of mentionable marks. NGC ID# 26HJ, PCGS# 7458

-
- 6763 1922 Grant With Star MS65 NGC. CAC.** The Grant with Star dollar is a key issue among earlier commemorative gold issues, partly due to its low production of only 5,016 pieces. Ebullient luster radiates from the orange-gold surfaces of this Gem offering. The design elements are sharply struck, and neither side reveals mentionable marks. NGC ID# 26HH, PCGS# 7459

- 6764 1922 Grant With Star MS66 NGC. CAC.** The bright yellow-gold surfaces of this Premium Gem display pleasing luster. Sharply struck design features and impeccable preservation round out the coin's stunning eye appeal. NGC ID# 26HH, PCGS# 7459

6765 1922 Grant With Star MS66 PCGS. CAC. Orange-gold color and attractive lavender accents dominate the carefully preserved surfaces of this Premium Gem gold dollar. The Grant With Star coins were struck to the extent of 5,000 coins (plus 16 assay pieces), and they sold for a \$0.50 premium over the No Star gold dollars (\$3.50 versus \$3). NGC ID# 26HH, PCGS# 7459

6766 1922 Grant With Star MS66 PCGS. CAC. The legislation providing for the production of Grant gold dollars initially stipulated a mintage of 200,000 coins, but that was later reduced to 10,000 pieces (5,000 of each type). Coruscating frosty luster and medium yellow-gold color account for the CAC endorsement. Pristine surfaces feature sharply struck motifs. NGC ID# 26HH, PCGS# 7459

6767 1926 Sesquicentennial MS65 PCGS. CAC. Lavender and orange hues grace the obverse, while the reverse shows primarily olive and reddish-gold coloration. Minor ticks on the scroll and in the left obverse field are hardly noticeable without a lens. Sesquicentennial quarter eagle output totaled 200,226 coins, and all but 49,019 pieces were melted. NGC ID# 26HL, PCGS# 7466

6768 1926 Sesquicentennial MS65 PCGS. CAC. Unlike the 1903 Louisiana Purchase and 1922 Grant commemorative gold dollars, the 1926 Sesquicentennial quarter eagle was sold to the public in large quantities, and examples are very scarce in higher grades. This highly lustrous Gem has boldly defined legends and motifs. Green and rose-gold hues color each side. NGC ID# 26HL, PCGS# 7466

**1926 Sesquicentennial Quarter Eagle
Vibrantly Lustrous MS66**

6769 1926 Sesquicentennial MS66 NGC. The undisturbed surfaces of this charming Sesquicentennial quarter eagle are aglow with varying peach and yellow-gold hues, with design elements that sharply detailed. This is the final gold issue in the classic commemorative series, distributed to the extent of 46,019 coins. Pieces grading finer than this Premium Gem are prohibitively rare, with just three such coins certified at NGC, and none at PCGS (7/15). NGC ID# 26HL, PCGS# 7466

End of Session Five

SESSION SIX

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. After proxy bidding closes, live bidding will take place through Heritage Live!®, that lets you bid live during the actual auction. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bids will not be recognized, so we advise placing your proxy bids in advance.)

☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000

7 Easy Ways to Bid

1 Internet

Simply go to www.pearsoncmg.com

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 eMail

You can also

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGELive!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Credit writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$4,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A

REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot

lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-23-2015
